

This sheet should be filled out first. General information about the report, and the reporting agency, is defined here.

If the agency's FOIA information is reported by 'component' (sub-organization, office, division), the components must be defined here. Component abbreviations entered here are available throughout this workbook in drop-down lists, allowing entry of information for each component.

You can make room to enter additional components by right-clicking on any editable cell in the component definition table and choosing 'Add Row'. A new, empty component row will be added at the bottom of the table. If you select multiple existing rows within the component definition table, right-click over the selected area, then choose 'Add Row', a corresponding number of component rows will be added at the bottom of the table. This convention is used throughout this workbook for expanding the size of entry tables.

Each row represents values for a single component. Enter the component abbreviation, or choose it from the drop-down, then enter values for that component in the editable columns to the right. Component abbreviations must match those set up on the 'Agency Information' sheet. If the report is not broken out by component, the agency abbreviation must be entered, which is the only option offered in the drop-down.

Blank lines are ignored, but if the component column is filled in, all other editable columns must be filled in. All values must be non-negative integers.

### Footnotes

"AGENCY OVERALL" information cannot be calculated from component information, and must be entered.

A component, or the agency overall, may not have ten consultations pending. Thus, some columns may be not applicable. In this case, "N/A" should be entered in the "Date" cell, and "0" should be entered in the "Number of Days" cell. However, if a column is used for a valid date, all columns to the right of it must also be filled in with a valid date. If a date is filled in, the number of days associated with the date must also be filled in. "Number of Days" values must be non-negative integers.
