- Calculated the economic impact of construction of El Monte Village in El Monte, CA.

- Built an input/output model of Guam to be used to calculate economic impact of EB-5 projects. Used this model to estimate impact of various proposed projects.

- Calculated the economic impact of moving the Social Security Administration building in Birmingham, AL, and revitalizing the surrounding neighborhood.

- Calculated the economic impact of rehabbing and expanding the Everett Mall in Everett, WA.

- Determined the economic impact of building a new medical center in Charleston, SC

- Calculated economic impact of expanding Sugarbush resort in Vermont. Study included expansion of existing facilities and addition of new facilities.

• Calculated economic impact for new market tax credit program in Portsmouth, N.H. Study included both overall economic impact, and the increase in employment and income and the decrease in the unemployment rate and incidence of poverty in individual census tracts.

• Calculated the economic benefits of EB-5 programs for foreign investors for a mixed-use construction project, including a hotel, retail stores, apartments, and a sports stadium in the Washington, D. C. metropolitan area

• Calculated the economic benefits of EB-5 programs for foreign investors for a mixed-used retail shopping center in the New York City metropolitan area.

• Calculated the economic benefits of EB-5 programs for foreign investors for proposed shopping centers in five separate counties in Southern California, including differential impacts of building the shopping centers in different counties.

B. Projects for State and Local Governments

• Constructed an econometric model for the State of New York and determined the change in employment, labor income, and tax revenues for 43 different tax changes proposed by the Governor's office.

• Constructed a detailed econometric model for the State of Pennsylvania to determine the economic impact of the complete panoply of state taxes levied; the model contains over 1,000 equations. In cooperation with American Economics Group, the model was developed to simulate the effect of changes in any state tax rate on households and businesses by income deciles, household status, age of individuals, size of households, and many other demographic variables. The change in business taxes can also be simulated for detailed industry classifications.

• Determined whether the Washington, D.C. water and sewer authority should accept a high bid for a new waste disposal system. Decision to reject has saved the authority over $200 million, as construction prices turned down sharply as predicted.

• Built an econometric model to determine the "tax gap" caused by Internet sales for the state of Minnesota.

• Determined appropriate levels of shelter grants individual counties in New York State, and for utility allowances in New York City. Reviewed and prepared testimony in ongoing court cases in these areas.

• Calculated the economic impact of the revitalization of downtown Milwaukee, Wisconsin.

C. Economic Impact of Casino Gaming

• Built an econometric model to predict the growth of the gaming industry over the next decade, and the economic impact of that industry on employment and tax revenues at the Federal and state levels.

• Estimated the economic impact of Indian casino gaming nationally and for the State of Wisconsin.

• Determined the economic impact of the Oneida Indian gaming casino on the Green Bay metropolitan area.

• Estimated the negative economic impact on the Milwaukee area if a new Indian gaming casino were to be built in Kenosha, Wisconsin.

D. Economic Impact of Smoking Bans and Higher Taxes

• Testified on economic impact of smoking bans in Canada; certified as an expert witness by the Court.

• Examined the impact of smoking bans on restaurant sales in several different locations in the U.S. to determine how much sales changed when these bans were imposed, and the differential effects depending on whether these bans were partial or total.

• Determined the cross-border effects on retail sales from differential rates in cigarette, gasoline, and alcohol excise taxes

• Determined the economic impact of higher cigarette taxes on minority group employment.

• Estimated the economic impact and loss of Federal and state tax revenues when higher cigarette prices lead to increased smuggling.

E. Consulting Projects for Travel and Tourism

• Built an econometric model to predict tourism trips and revenues for the major regions of the U.S. economy.

• Constructed econometric models to predict tourism in Las Vegas and Orlando.

• Using the IMPLAN model, predicted economic impact of tourism and travel expenditures for all counties in Pennsylvania.

F. Other Private Sector Consulting Projects

• Calculated the economic impact of proposed EPA bans on fluoropolymer production.

• Estimated the size and economic importance of the fluoropolymer industry, and calculated economic impact of shutting down domestic production.

• Built an econometric model to examine how U.S. tax and regulatory policies help determine whether the gold mining industry would invest in the U.S. or other countries. Testified before Congress to help defeat legislation inimical to the mining industry.

• Built an econometric model to predict consumer bankruptcies, based on recent growth in consumer credit outstanding, the overall economic environment, and recent changes in credit regulations

• Estimated the economic impact of the ethanol subsidy on the U.S. economy and Farm Belt States, including the impact on the balance of payments, employment, and tax receipts. Testified before Congress to help pass legislation to extent subsidies to the ethanol industry.

• Built an econometric model to determine the impact of updating and improving the system of locks on the Upper Mississippi River on corn prices and exports, farm income, and the overall economy.

Re: Targeted Employment Area Designation in Tennessee

Dear Mr. Kruszka,

The Tennessee Department of Labor and Workforce Development, Research and Statistics has been delegated the authority to certify 'high unemployment' areas in Tennessee, according to the provisions of the Immigration Act of 1990 and 8 C.F.R. 204.6(i). We hereby certify that the following areas are Targeted Employment Areas (TEA) within the State of Tennessee. Targeted Employment Areas are defined as an area, which at the time of investment, is a rural area, or an area which has experienced unemployment of at least 150 per cent of the national average rate within Tennessee.

High unemployment areas were determined using the 2008 national not seasonally adjusted unemployment rate of 5.8%; 150 per cent of 5.8% is 8.676%. High unemployment areas are any particular geographic or political subdivision located within a Metropolitan Statistical Area (MSA) or within a city or town having or population of 20,000 or more within such state. In order to decrease the high unemployment rate, these areas are designated as TEA to seek enhanced economic recovery and development.

Rural areas are defined as civil jurisdictions not located within any standard MSA as designated by the Office of Management and Budget, or within any city or town having or population of 20,000 ore more based on the most recent decennial census of the United States.

The following attachments contain designated Targeted Employment Areas for the State of Tennessee. If you have any questions or comments, please contact Mark Herron of the Tennessee Department of Labor and Workforce Development, Employment Security Division, Research and Statistics, 220 French Landing Drive, Nashville, Tennessee 37243. Also, you may call him at (615) 741-2284.

Sincerely,

Jeff Hentschel
Communications Director
TN Department of Labor and Workforce Development

Re: Reply to USCIS December 1, 2009 EB-5 Regional Center Compliance Letter
Regional Center: Gulf Coast Funds Management

Dear Mr. Kruszka:

This letter is a timely response to the USCIS letter of December 1, 2009, seeking to ascertain if our regional center is complying with the EB-5 program. This letter answers each of the items in your letter. The bolded headings below correspond to the headings in your letter.

Issue #1: Provide the principal authorized official and point of contact of the regional center responsible for the normal operation, management and administration of the regional center.

Response: The principal authorized official and point of contact for the Regional Center is Mr. Jack Deng [redacted] or 703-203-0488). Mr. Deng is previously the Chief
(b)(6) Financial Officer for GreenTech Automotive, formerly Hybrid Kinetics, a company incorporated in Mississippi in 2008 to engage in the development, production, marketing and financing of energy-efficient and environmentally friendly vehicles. Mr. Deng possesses more than 12 years of corporate finance experience with Fortune 500 companies such as MCI Worldcom (2000-2006), Fannie Mae (2006-2007) and the Agricultural Bank of China (1993-1995). In these companies, Mr. Deng had various responsibilities, such as corporate strategic planning, financial modeling and analysis, financial reporting and accounting. Mr. Deng holds a Masters of

Financial Engineering degree from the University of California, Berkeley, an International MBA degree from the University of South Carolina, and a BS degree in Finance from Fudan University in Shanghai, China.

Bios for all Regional Center officials are attached in the Notification Regarding Change of Ownership of Gulf Coast Funds Management Regional Center to USCIS, dated October 28, 2009, at Exhibit 1.

Issue #2: Explain how you are administering the regional center and how you are actively engaged in supporting a due diligence screening of its alien investors' lawful source of capital and the alien investor's ability to fully invest the requisite amount of capital.

Response: The principals of GCFM manage and oversee all administrative functions of GCFM. In addition, GCFM has partnered with Capital Wealth Holdings Limited, through a Placement Agent Agreement, at Exhibit 2, to assist GCFM with certain administrative and due diligence activities.

GCFM has retained the law firm of Miller Mayer, LLC to ensure timely and accurate compliance with applicable USCIS regional center reporting requirements. Miller Mayer will work with GCFM to assemble all necessary regional center business and investor documentation required by USCIS. In addition, GCFM will engage the services of outside accountants to prepare annual financial documents for all GCFM projects. Please see the Regional Center Administration and Operations Plan attached at Exhibit 3.

GCFM is and will actively engage in a due diligence screening of its potential and actual alien investors. Specifically, GCFM requires investors to complete questionnaires and provide documentation regarding, among other things, the source of their EB-5 investment funds, financial documents (such as bank records and tax returns), investment documents, business documents, and personal identity documentation. GCFM will also require EB-5 investors to provide to the investor's immigration attorney similar documentation necessary to file an I-526 petition. GCFM will adhere to all USCIS rules and regulations relating to confirming the legal source of funds used for investments in GCFM projects. GCFM's escrow bank will also comply with 31 U.S.C. 5318(i), "Due Diligence for United States Private Banking and Correspondent Bank Accounts Involving Foreign Persons." GCFM is confident that its investor funds will be lawfully obtained, based on:

- GCFM and Capital Wealth Holdings' due diligence questionnaires and document requests;
- Escrow bank obligation to comply with 31 U.S.C. § 5318(i) "Due Diligence for United States Private Banking and Correspondent Bank Accounts Involving Foreign Persons"; and
- USCIS's own background check conducted on all I-526 petitioners.

Additionally, GCFM's due diligence will include "Accredited Investor" verification. GCFM will follow applicable U.S. Securities and Exchange Commission rules for classifying an EB-5 investor as an "Accredited Investor" according to the definitions contained in Rule 501 of

Regulation D. Two applicable definitions, either of which must be met by potential EB-5 investors, are as follows:

(b)(4)

Each prospective EB-5 investor will be required to complete a questionnaire that provides adequate supporting information to verify compliance with either of these definitions. In addition to the Regional Center Administration and Operations Plan at Exhibit 3, please see the description of the due diligence process in the Email between GCFM and the Escrow Agent, JPMorgan Chase, dated November 13, 2009 at Exhibit 4.

Issue #3A: Explain how the regional center is actively engaged in the evaluation, oversight and follows up on any proposed commercial activities that <u>will be</u> utilized by alien investors.

Response: GCFM is actively managing it's investment in GreenTech Automotive through the Gulf Coast Automotive Investment Fund A-1 and contemplating other potential projects that include commercial activities to be used by alien investors. GCFM holds regular internal meetings to ensure evaluation, oversight and follow up on these contemplated commercial activities, as they are conceptually developed and as they are prepared for EB-5 capital investment.

Specifically, GCFM evaluates potential investment projects and commercial activities to ensure consistency with the USCIS regional center designation and the objectives of GCFM. GCFM will conduct this assessment collectively with in-house professionals as well as certain third parties to confirm consistency with GCFM's regional center designation and objectives, project viability, timetable, capital investment required, pro-forma income projections and financial forecast, preliminary job creation potential, investor marketability, and other elements that will bear on the success of GCFM and the commercial activities it sponsors. GCFM will oversee compliance with these standards for commercial success, through, among other oversight functions, regular meetings internally and with other entities involved in the proposed projects to ensure that financial and job creation targets are met. GCFM will provide assistance and guidance as appropriate to eliminate any variance between actual and target objectives and milestones. Please see the Regional Center Administration and Operations Plan attached at Exhibit 3.

GCFM will retain all project and investor information in a GCFM database system for good recordkeeping and for reporting to USCIS each Federal Fiscal year.

Issue #3B: Explain how the regional center is actively engaged in the ongoing monitoring, evaluation, oversight and follow up on any investor commercial activity affiliated through the regional center <u>that has been</u> utilized by alien investors in order to create direct and/or

indirect jobs through qualifying EB-5 capital investments into commercial enterprises within the regional center.

(b)(4)

Response: As demonstrated in Exhibit 5, all EB-5 investments have been only recently been made to GreenTech Automotive (GTA). The GTA automotive project has just begun operations and has only created [redacted] direct jobs to date. A shareholder related lawsuit brought by Mr. Yang Rong and his companies in the U.S. District Court for the Northern District of Mississippi, which is titled *Hybrid Kinetic Automotive Holdings, Ltd, et al. v. Hybrid Kinetic Automotive Corp. et al.*, Civil Action No. 3:09-cv-035-MPM-DAS has significantly impaired the original GCFM marketing plan and delayed GTA project progress. Now the lawsuit was already settled, and GTA expects to move the project speedily and is on track to fulfill job creation consistent with the economic analysis submitted to USCIS. GCFM will follow the procedures described in response to Issue #3A above to ensure ongoing monitoring, evaluation, oversight and follow up on investor activity when alien investments are made through GCFM.

Issue #4A: Provide the name, date of birth, petition receipt number, and alien registration number (if one has been assigned by USCIS) of each principal alien investor who has made/will make an investment and has filed or will file an EB-5/I-526 Petition with USCIS, specifying whether:

- **i. the petition was filed,**
- **ii. is pending,**
- **iii. was approved,**
- **iv. denied, or**
- **v. withdrawn by the petitioner, together with the date(s) of such event.**

Response: Please refer to the Investor/Investment Spreadsheet included as Exhibit 5.

Issue #4B: Provide the total number of visas represented in each case for the principal alien investor identified in 4a. above, plus his/her dependents (spouse and children) for whom immigrant status is sought or has been granted.

Response: Please refer to the Investor/Investment Spreadsheet included as Exhibit 5.

Issue #4C: Provide the country of nationality of each alien investor who has made an investment and filed and EB-5/I-526 petition with USCIS.

Response: Please refer to the Investor/Investment Spreadsheet included as Exhibit 5.

Issue #4D: Provide the US city and state of residence (or intended residence) of each alien investor who has made an investment and filed an EB-5/I-526 petition with USCIS.

Response: Please refer to the Investor/Investment Spreadsheet included as Exhibit 5.

Issue #4E: For each alien investor listed in item 4a above, identify the following:

- **i. the date(s) of investment in the commercial enterprise;**
- **ii. the amount(s) of investment in the commercial enterprise; and**

iii. **the date(s), nature, and amount(s) of any payment/remuneration/profit/return on investment made to the alien investor by the commercial enterprise and/or regional center from when the investment was initiated to the present.**

Response: Please refer to the Investor/Investment Spreadsheet included as Exhibit 5.

Issue #5A: Identify/list each of the target industry categories of business activity within the geographic boundaries of your regional center that have received alien investors' capital, and what in aggregate amounts.

Response: Please refer to the Investor/Investment Spreadsheet included as Exhibit 5.

Issue #5B: Identify/list each of the target industry categories of business activity within the geographic boundaries of your regional center that have received non-EB-5 domestic capital that has been combined and invested together, specifying the separate aggregate amounts of the domestic investment capital.

Response: Please refer to the Investor/Investment Spreadsheet included as Exhibit 5.

Issue #5C: Of the total investor capital (alien and domestic) identified above in 5a and 5b, identify and list the following:

i. **The name and address of each "direct" job creating commercial enterprise.**
ii. **The industry category for each indirect job creating investment activity.**

Response: Please refer to the Investor/Investment Spreadsheet included as Exhibit 5.

Issue #6A: Provide the total number of approved EB-5 alien investor I-526 petitions per each Federal Fiscal Year to date made through your regional center.

Response: Please refer to the Investor/Investment Spreadsheet included as Exhibit 5.

Issue #6B: Provide the total aggregate number of approved EB-5 alien investor I-829 petitions per each Federal Fiscal Year to date through your regional center.

(b)(4) **Response:** As of the date of this submission [ ] I-829 petitions have been filed through GCFM and thus [ ] I-829 petitions have been approved.

Issue #7: The total aggregate sum of EB-5 alien capital invested through your regional center for each Federal Fiscal Year to date since your approval and designation.

Response: Please refer to the Investor/Investment Spreadsheet included as Exhibit 5.

Issue #8: The combined total aggregate of "new" direct and/or indirect jobs created by EB-5 investors through your regional center for each Federal Fiscal Year to date since your approval and designation.

Response: Please refer to the Investor/Investment Spreadsheet included as Exhibit 5.

Issue #9: If applicable, the total aggregate of "preserved" or saved jobs by EB-5 alien investors into troubled businesses through your regional center for each Federal Fiscal Year to date since your approval and designation.

Response: This request is not applicable as GCFM has not invested in any troubled businesses since our approval and designation.

Issue #10A: If for any given Federal Fiscal Year your regional center did or does not have investors to report, then provide a detailed written explanation for the inactivity.

Response: This request is not applicable to GCFM.

Issue #10B: If for any given Federal Fiscal Year your regional center did or does not have investors to report, then provide a specific plan which specifies the budget, timelines, milestones and critical steps to:

i. **actively promote your regional center program,**
ii. **identify and recruit legitimate and viable alien investors, and**
iii. **a strategy to invest into job creating enterprises and/or investment activities within the regional center.**

Response: This request is not applicable to GCFM.

Issue #11: Regarding your website, please provide a hard copy which represents fully what your regional center has posted on its website, as well as providing your web address. Additionally, please provide a packet containing all of your regional center's hard copy promotional materials such as brochures, flyers, press articles, advertisements, etc.

Response: The GCFM website is accessible online at: www.gulfcoastfunds.com. A hard copy of the website contents is attached at Exhibit 6. Hard copies of GCFM's Private Placement Memorandum for the Automotive Fund is attached at Exhibit 7.

Plans and Intent to Amend GCFM Regional Center Proposal

On December 7, 2009 GCFM submitted a request to USCIS to amend its application to expand its geography to cover the Tobacco Regions in Virginia. This request is based on the previously approved hybrid automobile manufacturing project managed by the same company, GreenTech Automotive (GTA), and merely re-allocates a portion of GTA's original planned production to Virginia. Therefore, the methodology for job multipliers described in the original independent economic study, which was approved by USCIS, should be applicable to the manufacturing facilities to be built in the Tobacco Region, and the overall impact would stay intact.

The EB-5 program is an effective way to attract private investment into the Tobacco Region, whish would not only create many new jobs, but also provide much needed diversification to the region's economy. The Virginia State government has expressed strong

support for the Project.

Therefore, GCFM respectfully submitted its requests to expand its geographic coverage area to include the entire Tobacco Region in Virginia. For more information on the request please see Exhibit 8.

Please contact me at ([redacted] or 703-203-0488) if you have any questions.

Re: Notification Regarding Change in Ownership of Gulf Coast Funds Management Regional Center

Dear Ms. Velarde:

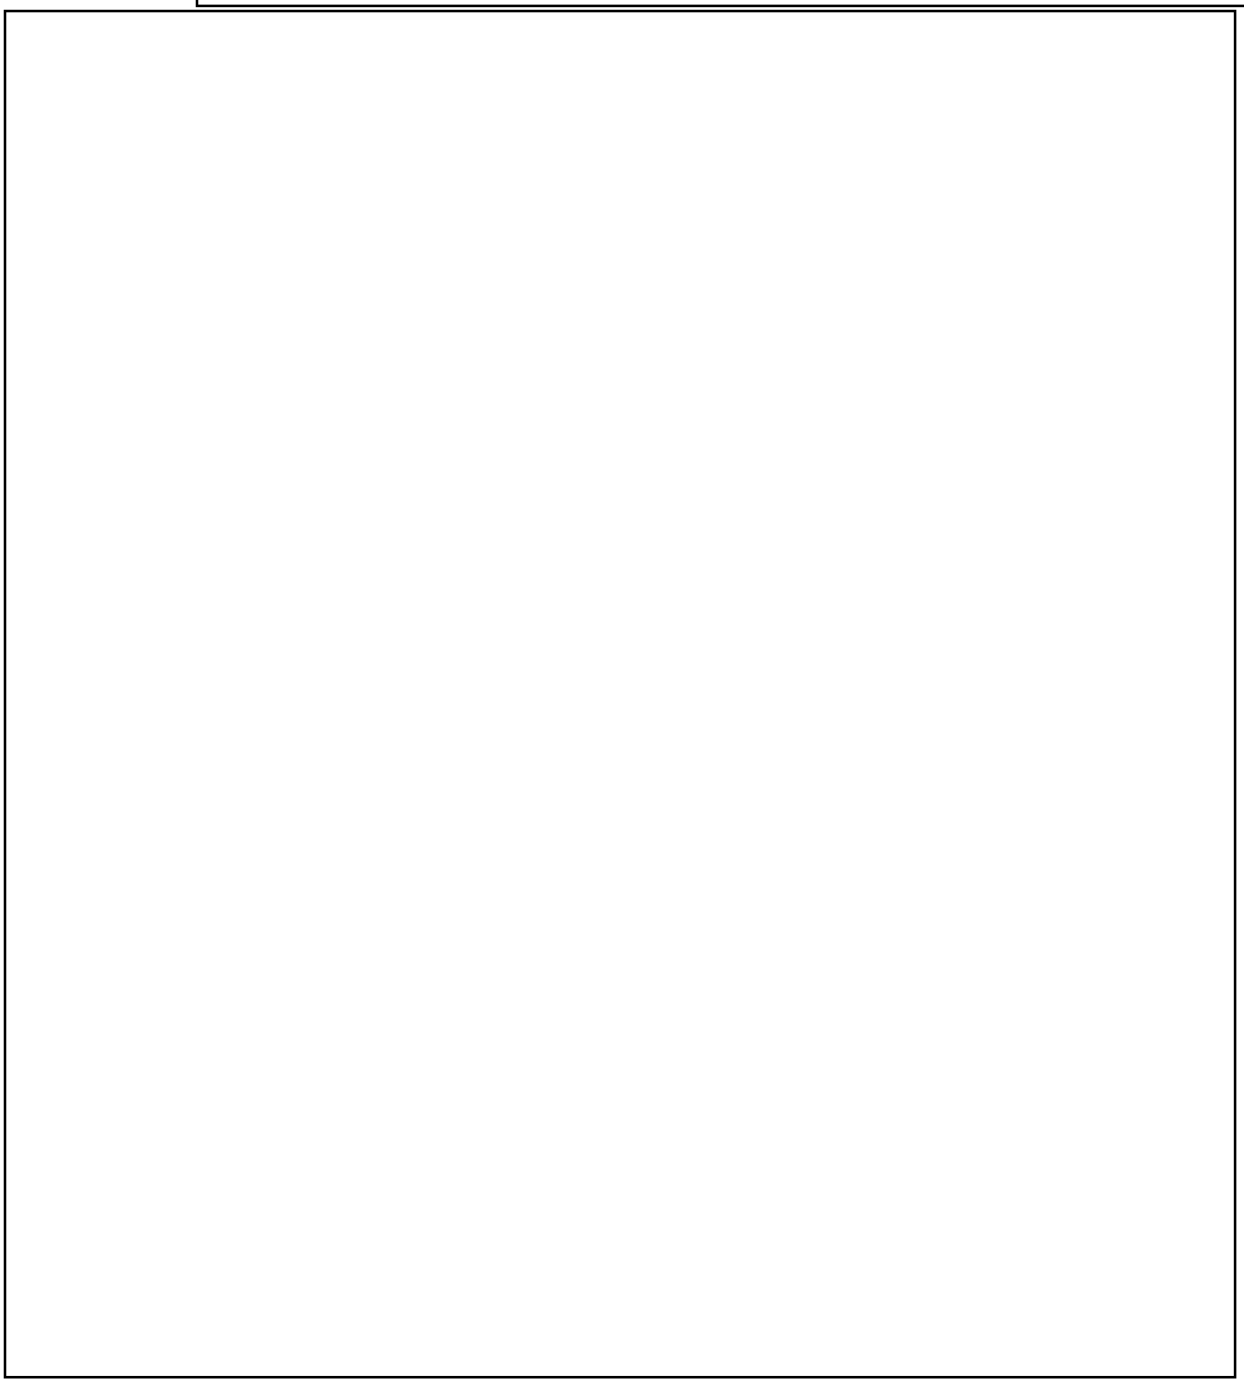
On August 18, 2008 the USCIS issued to Gulf Coast Funds Management, LLC ("GCFM, LLC") a regional center approval and designation (the "Approval") for the Gulf Coast Funds Management Regional Center ("GCFM"). Pursuant to the reporting requirements set forth in the Approval, GCFM, LLC hereby notifies the USCIS of a change of ownership of GCFM, LLC.

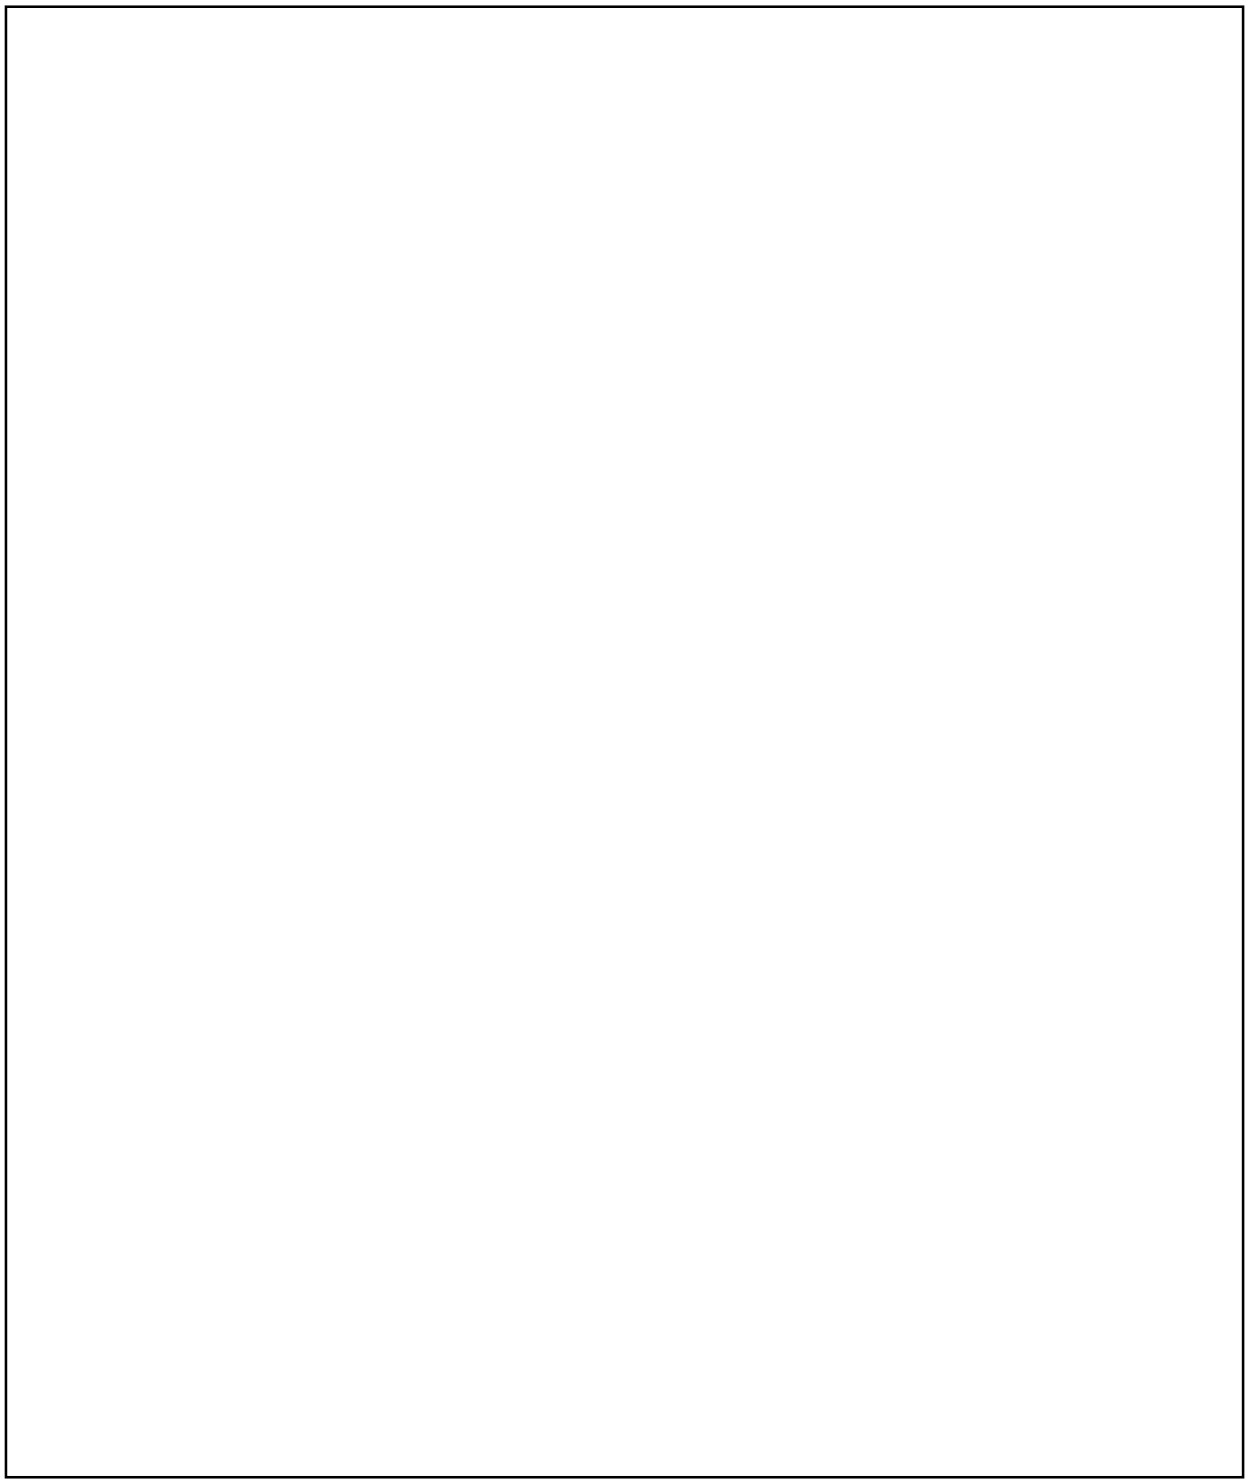
GCFM, LLC has issued [ ] membership interests ("Units"). The current ownership structure of GCFM, LLC is as follows:

(b)(4)

(b)(6)

(b)(4)





(b)(4) [redacted]

The changes described above are the only changes being made to GCFM. Given significant corporate, financial and immigration experience of the new GCFM owner and management team, coupled with the ongoing consulting services provided by two of GCFM's original founders, GCFM will clearly continue to meet the statutory requirements of the Immigrant Investor Pilot Program by serving the purpose of promoting economic growth, improving regional productivity, creating jobs, and increasing domestic capital investment.

Please contact me if you have any questions. Please also update the EB-5 chart on the USCIS website to reflect this change in ownership.

Sincerely,

(b)(6) [redacted]

Re: Proposal for Designation of Gulf Coast Funds Management (GCFM) as a USCIS recognized Regional Center under the Immigrant Investor Pilot Program

BACKGROUND:

Pursuant to Section 610 of the Appropriations Act of 1993, on January 17, 2008, Gulf Coast Funds Management (GCFM) submitted a proposal seeking approval and designation by U.S. Citizenship and Immigration Services (USCIS) of the GCFM Regional Center (GCFM-RC), with a geographic area focusing on the entirety of the states of Mississippi and Louisiana. The GCFM-RC for EB-5 Immigrant Investor purposes shall focus investment in the following three target industry economic clusters:

1. Shipbuilding;
2. Food Processing; and
3. Manufacturing.

The initial proposal contained the following evidence in support of its requested designation:

- A Job Creation Analysis and Econometric Model prepared by a professional economic analysis firm which specifically calculates but excludes construction jobs from the detailed prediction;
- A business plan reflecting the timing, scale and planned use of the alien investor capital;
- A sample Private Placement Memorandum;
- A sample Operating Agreement;
- A sample Subscription Agreement; and
- A sample Management Agreement.

DECISION:

Based on its review and analysis of your January 17, 2008 proposal, and of your response to the USCIS Request For Evidence of August 1, 2008, to which you provided a supplemental business plan, and a more in-depth and comprehensive economic and job creation analysis relating to the two-state scope and economic impacts, USCIS hereby approves and designates GCFM as a Regional Center within the Immigrant Investor Pilot Program with a geographic scope which includes the entire states of Mississippi and Louisiana.

FOCUS OF INVESTMENT ACTIVITY AND CAPITAL INVESTMENT THRESHOLD:

The USCIS-approved focus of the GCFM-RC business plan and job creation analysis and multipliers is to generate immigrant investor capital into the following target industry commercial enterprise activities within Mississippi and Louisiana:

1. Shipbuilding;
2. Food Processing; and
3. Manufacturing.

As such, aliens seeking immigrant visas through the Immigrant Investor Pilot Program may file individual petitions with USCIS for these commercial enterprises located within the GCFM-RC area comprised of the states of Mississippi and Louisiana. The geographic focus of this area contains numerous High Unemployment Targeted Employment Areas (TEA) as designated by the States of Mississippi and Louisiana, and rural TEA's as defined in 8 CFR 204.6(e). Therefore, the minimum capital investment threshold for any individual immigrant investment into an approved commercial enterprise throughout the Regional Center shall be not less than $500,000, if the investment target is located within a TEA or $1,000,000 if located outside of a TEA.

EMPLOYMENT CREATION:

Immigrant investors who file petitions for commercial enterprises located in the GCFM-RC area must fulfill all of the requirements set forth in 8 CFR 204.6, except that the petition need not show that the new commercial enterprises created ten new jobs indirectly as a result of the immigrant investor's investment. This determination has been established by way of USCIS' acceptance of the final economic analysis that is contained as part of the approved GCFM-RC proposal and its indirect job creation model and multipliers contained within the final approved GCFM-RC application package.

In addition, where job creation or preservation of existing jobs is claimed based on a multiplier rooted in underlying new "direct jobs" in support of an immigrant investor's individual I-526 petition affiliated with the GCFM-RC, then:

- To be credited with projected creation of new "direct" jobs for "qualifying employees" upon filing the I-526 petition, then the petition must be supported by a comprehensive detailed business plan and supporting financial, marketing and related data and analysis providing a reasonable basis for projecting creation of any new direct jobs for "qualifying employees" to be achieved/realized within two years pursuant to 8 CFR 204.6(j)(4)(B).

For purposes of an alien investor's filing of a subsequent I-829 petition to remove the conditions wherein the investment through the GCFM-RC in an enterprise for which the initial I-526 petition approval involved the creation of new direct jobs or the creation of new indirect jobs based on a multiplier tied to underlying new direct jobs, then to support the full number of direct and indirect new jobs being claimed at that point, an alien's subsequent I-829 petition will need to be supported by probative evidence of the number of new direct full time (35 hours per week) for qualified employees whose positions have been created as a result of the alien's investment. Such evidence may include copies of quarterly state employment tax reports, Forms W-2, Forms I-9, and any other pertinent employment records sufficient to demonstrate the number of qualified employees whose jobs were created directly.

Each individual petition, in order to demonstrate that it is associated with the GCFM-RC , in conjunction with addressing all the requirements for an individual immigrant investor petition, shall also contain as supporting evidence relating to this amended regional center designation, the following:

1. A copy of this letter for the GCFM-RC approval and designation.

2. A copy of the USCIS approved regional center narrative proposal and business plan.[1]

3. A copy of the job creation methodology required in 8 CFR 204.6(j)(4)(iii), as contained in the final regional center economic analysis which has been approved by USCIS, which reflects that investment by an individual immigrant investor will create not fewer than ten (10) full-time employment positions, either directly or indirectly, per each immigrant investor.

4. A legally executed copy of the USCIS approved:

    a. Private Placement Memorandum;
    b. Subscription Agreement;

[1]With respect to an individual I-526 individual investor petition, for any large scale high impact investor manufacturing or processing projects such as a shipyard, other large-scale manufacturing or processing plants, the detailed business plan should also address or reflect those project critical factors associated with infrastructure required to support operations on the scale proposed, in terms of roads, rail tracks and facilities, port capacity, water, sewage, electrical power capacity to meet the projected demand imposed by the envisioned facility, fire fighting services and capabilities, and environmental impact issues.

c. Operating Agreement; and
d. Management Agreement.

DESIGNEE'S RESPONSIBILITIES INHERENT IN CONDUCT OF THE GCFM-RC REGIONAL CENTER:

The law, as reflected in the regulations at 8 CFR 204.6(m)(6), requires that an approved regional center in order to maintain the validity of its approval and designation must continue to meet the statutory requirements of the Immigrant Investor Pilot Program by serving the purpose of promoting economic growth, including increased export sales (where applicable), improved regional productivity, job creation, and increased domestic capital investment. Therefore, in order for USCIS to determine whether your regional center is in compliance with the above cited regulation, and in order to continue to operate as a USCIS approved and designated regional center, your administration, oversight, and management of your regional center shall be such as to monitor all investment activities under the sponsorship of your regional center and to maintain records, data and information on a quarterly basis in order to report to USCIS upon request the following year to date information for each Federal Fiscal Year[2], commencing with the initial year as follows:

1. Provide the principal authorized official and point of contact of the regional center responsible for the normal operation, management and administration of the regional center.

2. Be prepared to explain how you are administering the regional center and how you will be actively engaged in supporting a due diligence screening of its alien investors' lawful source of capital and the alien investor's ability to fully invest the requisite amount of capital.

3. Be prepared to explain the following:

   a. How the regional center is actively engaged in the evaluation, oversight and follows up on any proposed commercial activities that will be utilized by alien investors.

   b. How the regional center is actively engaged in the ongoing monitoring, evaluation, oversight and follows up on any investor commercial activity affiliated through the regional center that will be utilized by alien investors in order to create direct and/or indirect jobs through qualifying EB-5 capital investments into commercial enterprises within the regional center.

4. Be prepared to provide:

   a. the name, date of birth, petition receipt number, and alien registration number (if one

[2] A Federal Fiscal Year runs for twelve consecutive months from October 1st to September 30th.

has been assigned by USCIS) of each principal alien investor who has made an investment and has filed an EB-5/I-526 Petition with USCIS, specifying whether:

i. the petition was filed,
ii. is pending,
iii. was approved,
iv. denied, or
v. withdrawn by the petitioner, together with the date(s) of such event.

b. The total number of visas represented in each case for the principal alien investor identified in 4.a. above, plus his/her dependents (spouse and children) for whom immigrant status is sought or has been granted.

c. The country of nationality of each alien investor who has made an investment and filed an EB-5/I-526 petition with USCIS.

d. The U.S. city and state of residence (or intended residence) of each alien investor who has made an investment and filed an EB-5/I-526 petition with USCIS.

e. For each alien investor listed in item 4.a., above, identify the following:

i. the date(s) of investment in the commercial enterprise;

ii. the amount(s) of investment in the commercial enterprise; and

iii. the date(s), nature, and amount(s) of any payment/remuneration/profit/return on investment made to the alien investor by the commercial enterprise and/or regional center from when the investment was initiated to the present.

5. Be prepared to identify/list each of the target industry categories of business activity within the geographic boundaries of your regional center that have:

a. received alien investors' capital, and in what aggregate amounts;

b. received non-EB-5 domestic capital that has been combined and invested together, specifying the separate aggregate amounts of the domestic investment capital;

c. of the total investor capital (alien and domestic) identified above in 5.a and 5.b, identify and list the following:
i. The name and address of each "direct" job creating commercial enterprise.
ii. The industry category for each indirect job creating investment activity.

6. Be prepared to provide:

a. The total aggregate number of approved EB-5 alien investor I-526 petitions per each

Federal Fiscal Year to date made through your regional center.

b. The total aggregate number of approved EB-5 alien investor I-829 petitions per each Federal Fiscal Year to date through your regional center.

7. The total aggregate sum of EB-5 alien capital invested through your regional center for each Federal Fiscal Year to date since your approval and designation.

8. The combined total aggregate of "new" direct and/or indirect jobs created by EB-5 investors through your regional center for each Federal Fiscal Year to date since your approval and designation.

9. If applicable, the total aggregate of "preserved" or saved jobs by EB-5 alien investors into troubled businesses through your regional center for each Federal Fiscal Year to date since your approval and designation.

10. If for any given Federal Fiscal Year your regional center did or does not have investors to report, then provide:

    a. a detailed written explanation for the inactivity,

    b. a specific plan which specifies the budget, timelines, milestones and critical steps to:

        i. actively promote your regional center program,

        ii. identify and recruit legitimate and viable alien investors, and

        iii. a strategy to invest into job creating enterprises and/or investment activities within the regional center.

11. Regarding your website, if any, please be prepared to provide a hard copy which represents fully what your regional center has posted on its website, as well as providing your web address. Additionally, please provide a packet containing all of your regional center's hard copy promotional materials such as brochures, flyers, press articles, advertisements, etc.

12. Finally, please be aware that it is incumbent on each USCIS approved and designated regional center, in order to remain in good standing, to notify the USCIS Foreign Trader, Investor & Regional Center Program within 15 business days at USCIS.ImmigrantInvestorProgram@dhs.gov of any change of address or occurrence of any material change in:

    - the name and contact information of the responsible official and/or Point of Contact (POC) for the RC

- the management and administration of the RC,
- the RC structure,
- the RC mailing address, web site address, email address, phone and fax number,
- the scope of the RC operations and focus,
- the RC business plan,
- any new, reduced or expanded delegation of authority, MOU, agreement, contract, etc. with another party to represent or act on behalf of the RC,
- the economic focus of the RC, or
- any material change relating to your regional center's basis for its most recent designation and/or reaffirmation by USCIS.

If you have any questions concerning the GCFM-RC approval and designation under the Immigrant Investor Pilot Program, please contact the USCIS Foreign Trader, Investor and Regional Center Program by Email at USCIS.ImmigrantInvestorProgram@dhs.gov.

Sincerely,

/s/
Barbara Q. Velarde

Frequently Asked Questions

How much would I need to invest to receive a visa for myself and my family members?
If you invest in a regional center, like ours, you need to invest $500,000. There is also a administrative fee required for an investment in a fund.

What is the region covered by the Gulf Coast Funds regional center?
Our regional center covers the largest geographical region in the EB-5 visa program. It covers the entire states of Louisiana and Mississippi.

Do I have to live in Louisiana or Mississippi to participate in this program?
No. You do not have to live in Louisiana or Mississippi. You do not even have to ever visit the region.

When will I have to make my investment into one of the GCFM managed funds?
Once you have signed an investment agreement with an agent of GCFM, the investor will deposit his or her money into a designated account in the United States. Here, you can choose to put your money into escrow or you can choose to put it directly in the fund. If you choose the former, we will place your investment in escrow, pending approval of your filing. If you choose latter, the money will begin to be put to work immediately through investments in our regional center.

What is the escrow arrangement for my cash?
Your money will be placed in escrow in a United States national bank. It will be invested only in U.S. government securities that are highly liquid. If, for any reason, your application for a visa is not approved, we will return your initial investment and administrative fee, if any, to you.

What do I have to do to get my visa application approved?
Normally, you will get an American immigration lawyer to help you in the visa application process. If you do not have an immigration lawyer, we can recommend a lawyer to you based on which fund you are investing into. For more information on the particular counsels which we suggest for each fund, please reference the fund specific pages on this website. The lawyer will help you file an I-526 petition. I-526. With your I-526 petition, you will have to submit proof that the source of your $500,000 investment is lawful. You will also have to submit the same type of documentation that other visa applicants to the United States are required to submit. Here is a general description, from the U.S. government's web site, of certain requirements for receiving a visa:

> **VISA INELIGIBILITY / WAIVER**
> The immigration laws of the United States, in order to protect the health, welfare, and security of the U.S., prohibit the issuance of a visa to certain applicants. Examples of applicants who must be refused visas are those who: have a communicable disease, or have a dangerous physical or mental disorder; have committed serious criminal acts; are terrorists, subversives, members of a totalitarian party, or former Nazi war criminals; have used illegal means to enter the U.S.; or are ineligible for citizenship. Some former exchange visitors must live abroad for two years. Physicians who intend to practice medicine must pass a qualifying exam before receiving immigrant visas. If found to be ineligible, the consular officer will advise the applicant of any waivers.
>
> **OTHER IMPORTANT INFORMATION**
>
> **Documents for Visa Application**
> All applicants must submit certain personal documents such as passports, birth certificates, police certificates, and other civil documents, as well as evidence that they will not become public charges in the United States. The consular officer will inform visa applicants of the documents needed as their applications are processed.
>
> **Medical Examinations**
> Before the issuance of an immigrant visa, every applicant, regardless of age, must undergo a medical examination. The examination will be conducted by a physician designated by the consular officer. Examination costs must be borne by the applicant, in addition to the visa fees.
>
> **Visa Fees**
> The cost of each immigrant visa application may vary for additional visa fees apply. For up to date immigration visa fee costs, please consult your immigration attorney or please visit the USCIS fee schedule web page.
>
> *Source: www.uscis.gov*

How will my money be invested?
Your money will be invested in one of our regional center funds chosen by you. These funds will invest in a variety of businesses headquartered in the states of Louisiana and Mississippi. We will invest in industries that have historically been successful in our region, such as shipbuilding, agribusiness and manufacturing. For more information on the specific funds, please reference the particular fund descriptions on this website. In order to meet the immigration goals of the EB-5 regional center program, our investments must help businesses create at least ten new direct, indirect and induced jobs for every $500,000 we invest.

What is the regional center Fund's investment strategy?
Our first and foremost obligation is to invest in businesses that actually create the ten jobs that each of our investors needs in order to meet the requirements of the EB-5 regional center program. We will also seek investments that offer attractive rates of return.

How will the investments be structured?

We will make investments that are in the form of equity or debt, or a combination of both. We will seek to have input in the overall governance of the companies we invest in, and hope to help those companies achieve success.

Who will manage the regional center Fund?
Each Fund is limited to 100 investors. The day-to-day management of the regional center Fund will be handled by our management company.

When will my visa become permanent?
Two years after you receive your initial visa, you must apply for a permanent green card. At that time, we will join in your application to show that your money has been invested in the region and that it has had the effect of creating ten direct, indirect and induced jobs. Once your application is approved, you will be a permanent resident of the United States, and may soon apply for full citizenship if you desire.

Where can I get information about investing in the Fund?
If you are interested in investing in the Fund, and want to receive financial information about the Fund, you can click here to register as a potential investor. Information will be given exclusively to potential investors who live outside of the United States or who certify that they are accredited investors within the meaning of the Securities and Exchange Commission rules and regulations.

Who can I call if I have questions about the Fund?
Please feel free to email us at any time info@gulfcoastfunds.com.

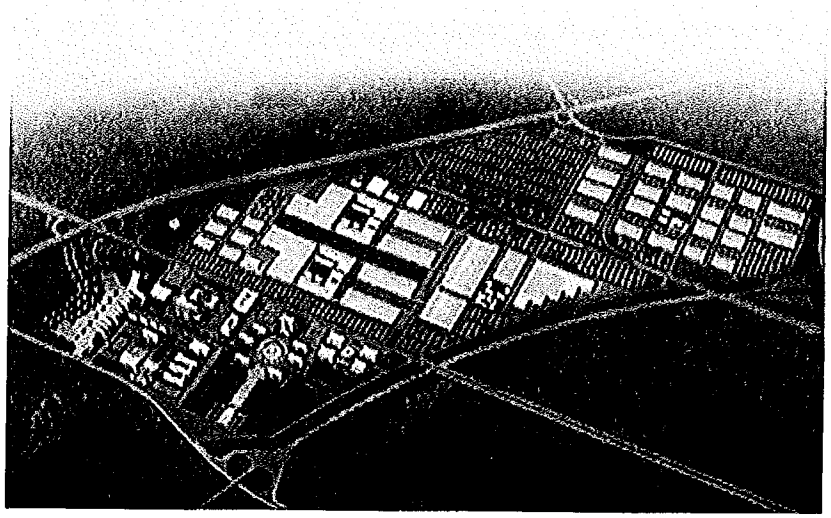
Gulf Coast Automotive Fund A-1



Capital Wealth Holdings Limited, a British Virgin Island company, is authorized to be the exclusive placement agent for Gulf Coast Automotive Fund A-1. The Fund will invest all of the proceeds of this offering in GreenTech Automotive preferred stock. GreenTech Automotive will invest the funds it receives, along with substantial funds from other sources, in designing, building and operating an automotive plant, which builds a new line of vehicles with reduced fuel consumption and emission.

GreenTech Automotive was incorporated in Mississippi, U.S. in 2008 to engage in the development, production, marketing, and financing of energy-efficient and environmentally friendly vehicles. Its main operations will be based in Mississippi, a right-to-work state, on a mega-site of approximately 3,500 acres, or 14.2 km2, with convenient access to major transportation systems. The targeted full production capacity is one million vehicles per year, with four production lines: compact cars, midsize cars, full sized cars, and SUVs. Each production line will have different models depending on the market demand. GreenTech Automotivewill start production by the end of 2011 or the beginning of 2012 and reach full production capacity of one million vehicles by 2015. With full production, GreenTech Automotive will hire approximately 25,000 employees, realize annual revenues of up to $33 billion and have an average operating margin of approximately 8%. If full production of one million vehicles is realized, the Mississippi facility will be one of the largest automobile manufacturing plants in the world.

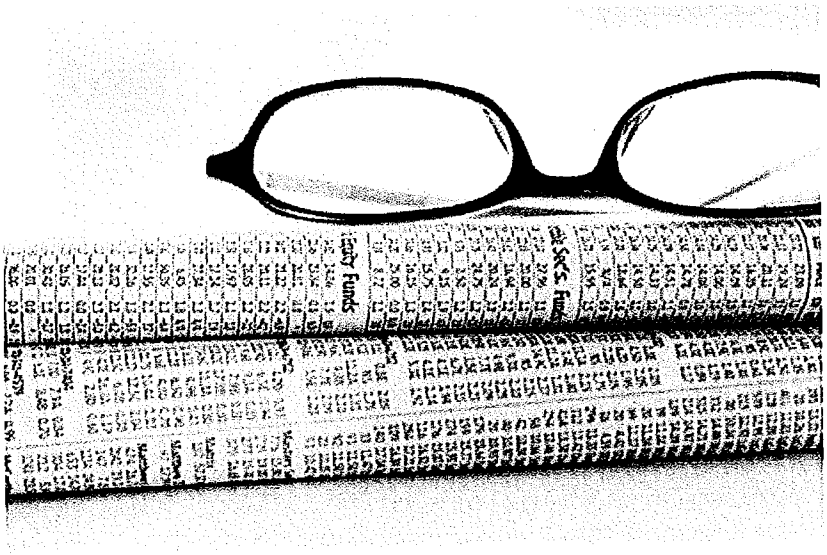
Our Relationship with Immigration Counsel



You will need to file your personal application for an EB-5 visa, and you should be represented by a U.S. immigration lawyer. If you do not have immigration counsel, we are happy to recommend our immigration council, Miller Mayer, LLP. Miller Mayer can handle the EB-5 I-526 petition filing and any other legal needs you may have in securing permanent residency status in the U.S. We work closely with Miller Mayer because they serve as immigration counsel to the Fund and the management company. You can reach Miller Mayer by phone at 607.273.4200 or through the firm's website: www.millermayer.com.

Investors in our Gulf Coast Automotive Fund A-1, LLC will be represented by a team of immigration attorneys with David Z. Lu as the lead counsel.

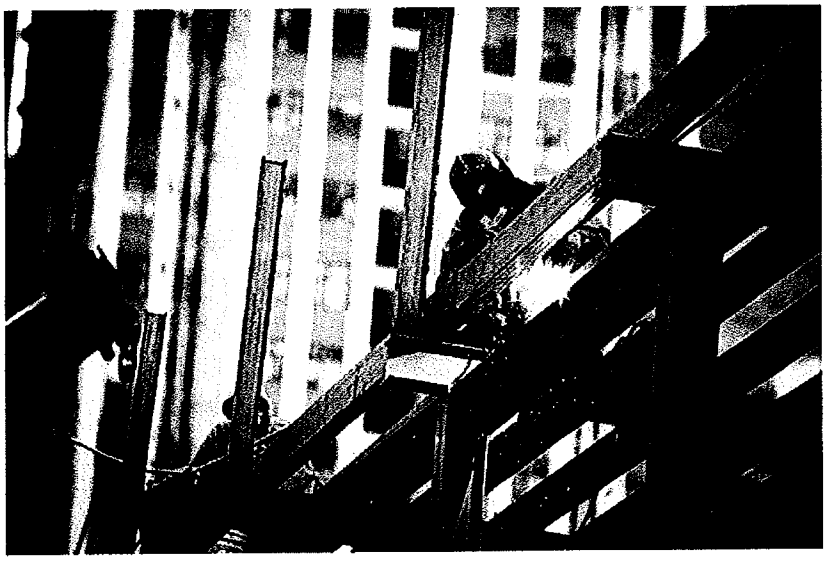
Why Are We A Good Partner?



As a regional center, GCFM spans across the states of Louisiana and Mississippi which is the largest geographical region in the EB-5 visa program. While many regional centers only invest in one project, GCFM will use a "funds-approach" that will combine the security of the job-creation needed to fulfill the EB-5 requirements with a diverse investment portfolio.

Gulf Coast Funds Management LLC

EB-5 Regional Center | Investment Funds | Immigrant Investors | Management Team | Contact Us

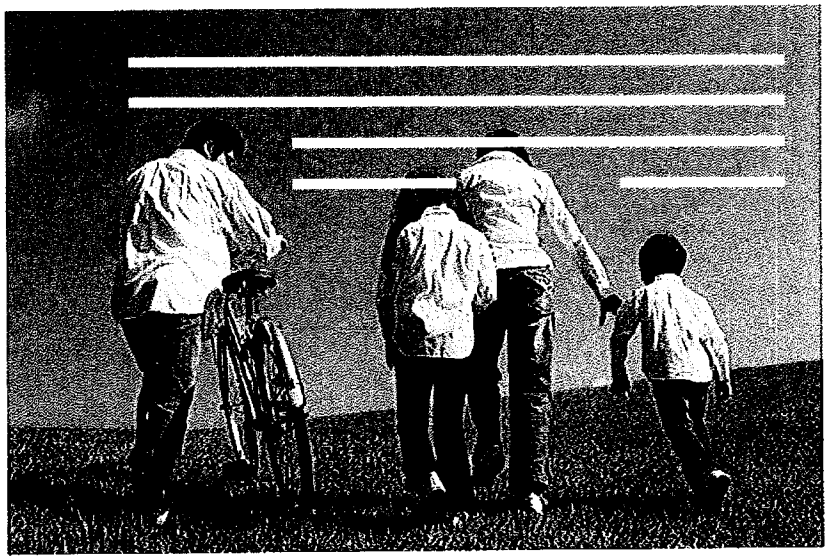
Why Gulf Coast Funds Management



We are unlike any other regional center because of the experience of our management team, our business model and the geographic scope of our region. Our funds offer competitive returns and will be managed by an experienced management company.

Most of our investment funds will be diversified, which provides more comfort to our investors that their immigration goals will be met and their capital will be returned. We intend to pay very competitive returns on capital invested in our regional center. We will concentrate on investments in the manufacturing, shipbuilding and food processing industries, which are prevalent in the region and provide dependable sources of job creation. Our regional center spans over two states, Louisiana and Mississippi, making our region the largest regional center in the EB-5 program.

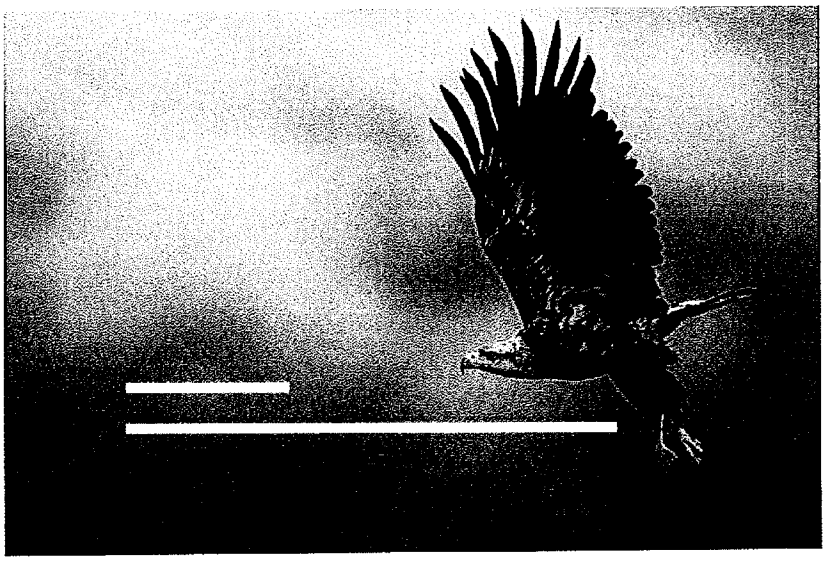
Our Investment Fund Strategy



In order to achieve our objectives, we will use our long-standing history of successful investing in Louisiana and Mississippi. We will use our knowledge of the region to make investments in projects that will create enough jobs for you to receive your permanent residency status and provide strong opportunities for capital preservation and potential capital appreciation. The officers of the management company have participated in the business communities of Louisiana and Mississippi for more than 75 years and have established a network of contacts and relationships within the two states. We will invest in a series of projects including large projects with a proven track record of success that leverage other sources of capital in order to ensure that all of your requirements are met. We will establish a series of funds to serve the Immigrant Investor community. Additional information, including the specific investment strategy for each Fund, is available on this website.

Offering restrictions

"Offering restrictions" means:

Each distributor agrees in writing:

That all offers and sales of the securities prior to the expiration of the distribution compliance period specified in Category 2 or 3 (paragraph (b)(2) or (b)(3)) in Rule 903, as applicable, shall be made only in accordance with the provisions of Rule 903 or Rule 904; pursuant to registration of the securities under the Act; or pursuant to an available exemption from the registration requirements of the Act; and

For offers and sales of equity securities of domestic issuers, not to engage in hedging transactions with regard to such securities prior to the expiration of the distribution compliance period specified in Category 2 or 3 (paragraph (b)(2) or (b)(3)) in Rule 903, as applicable, unless in compliance with the Act; and

All offering materials and documents (other than press releases) used in connection with offers and sales of the securities prior to the expiration of the distribution compliance period specified in Category 2 or 3 (paragraph (b)(2) or (b)(3)) in Rule 903, as applicable, shall include statements to the effect that "These securities have not been registered under the Securities Act of 1933 and may not be offered or sold in the United States or to U.S. persons (other than distributors) unless the securities are registered under the Securities Act, or an exemption from the registration requirements of the Act is available. Hedging transactions involving these securities may not be conducted unless in compliance with the Securities Act." Such statements shall appear:

1. On the cover or inside cover page of any ppm or offering circular used in connection with the offer or sale of the securities;
2. In the offering section of our ppm or offering circular used in connection with the offer or sale of the securities; and
3. In any advertisement made or issued by the issuer, any distributor, any of their respective affiliates, or any person acting on behalf of any of the foregoing. Such statements may appear in summary form on prospectus cover pages and in advertisements.

Offshore transaction

An offer or sale of securities is made in an "offshore transaction" if:

The offer is not made to a person in the United States; and

Either:

At the time the buy order is originated, the buyer is outside the United States, or the seller and any person acting on its behalf reasonably believe that the buyer is outside the United States; or

For purposes of:

Section Rule 903, the transaction is executed in, on or through a physical trading floor of an established foreign securities exchange that is located outside the United States; or

Section Rule 904, the transaction is executed in, on or through the facilities of a designated offshore securities market described in paragraph (b) of this section, and neither the seller nor any person acting on its behalf knows that the transaction has been pre-arranged with a buyer in the United States.

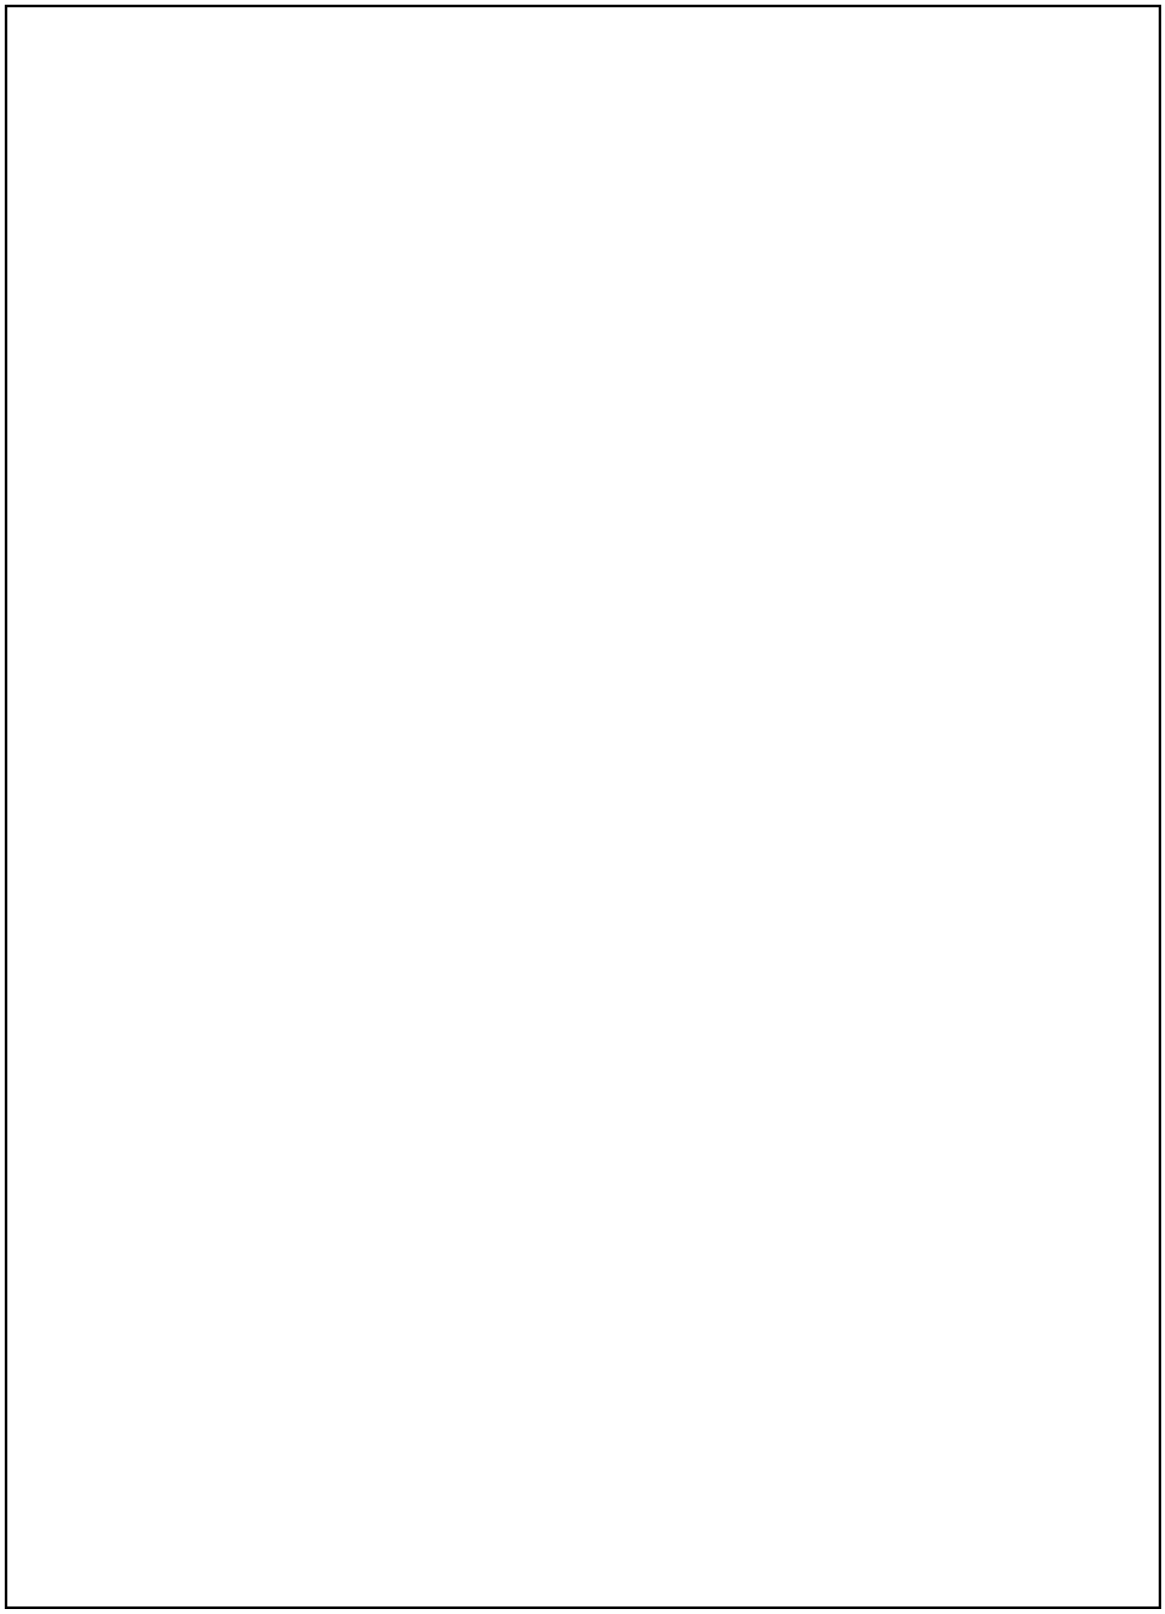
(b)(4)

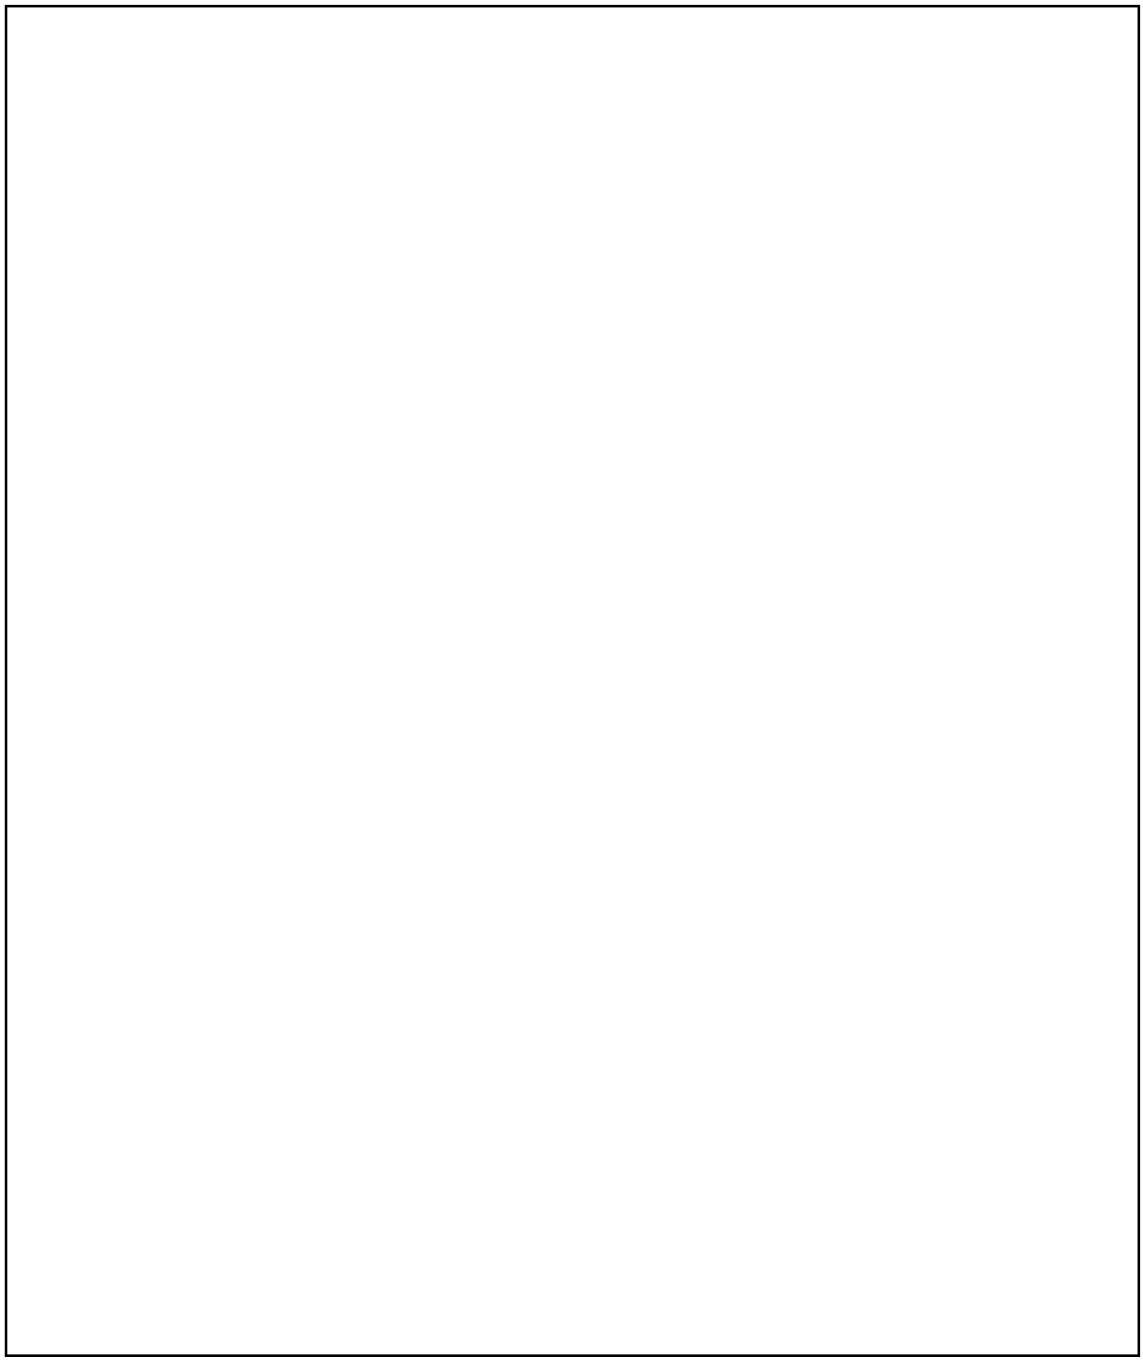
Private Placement Memorandum Copy No. _____

The date of this Offering Memorandum is August 15, 2009.



(b)(4)

(b)(4)



SUMMARY

The Offering

The EB-5 Immigrant Investor Program

EB-5 visas may be issued to immigrants and their immediate families by investing in an approved "regional center" projects such as our Fund. A foreign investor may apply for a conditional immigration status to live, work and study in the United States, once his or her investment is made. If the Fund invests this money in businesses within the region that create at least ten new jobs within two years, the immigrant investors receive permanent resident status in the United States, and eventually become eligible for U.S. citizenship, should they so choose. In the section of this offering memorandum entitled "Frequently Asked Questions about the EB-5 Visa Program," beginning on page 26, you will find a detailed discussion of the EB-5 program. You can also read about the program on our website: www.GulfCoastFunds.com.

The Fund

The Fund is a newly organized Mississippi limited liability company formed solely for the purpose of making EB-5 investments in GreenTech Automotive. We have entered into a management agreement with Gulf Coast Funds Management LLC, our

(b)(4)

management company, to manage the day-to-day operations of the Fund. The owners of the management company are a team of experienced investors with long business careers spent in Mississippi and Louisiana. The background of our management team is described in detail in the "Management" section of this private placement memorandum, beginning on page 23. Our management company is headquartered at 650 Poydras Street, 28th Floor, New Orleans, Louisiana 70130, our telephone number is 1-866-448-8738, and our website address is www.GulfCoastFunds.com.

(b)(4)

(b)(4)

(b)(4)

The EB-5 regional center program is a U.S. government program that is highly regulated and that requires frequent interaction between the Fund and government officials.

The EB-5 regional center program was created by Congress, which has accorded broad regulatory powers to the Department of Homeland Security and in particular to the United States Citizenship and Immigration Service (USCIS). Currently, all EB-5 related filings are reviewed by USCIS adjudicators in the USCIS California service center. While the Fund will strive to coordinate with USCIS to achieve our investors' immigration goal, there can be no assurance that USCIS adjudicators will take a consistent position on issues arising under the program, and there can be no assurance that USCIS regulations will not change in the future. Since the laws, regulations and bureaucratic interpretations applicable to the Fund's investments are subject to change at any time, there can be no assurance that the Fund will not be required to substantially change its investment policies in the future. The EB-5 program could be discontinued or altered by Congress at any time.

It is a requirement of the EB-5 program that an immigrant investor's source of funds be proper, under U.S. immigration guidelines.

EB-5 immigrant investors must demonstrate to the USCIS that the funds they invest in the Units were obtained through lawful means. Each EB-5 immigrant investor must document, to the satisfaction of the USCIS and the U.S. State Department, that the

source of funds is acceptable. The Fund, and the EB-5 immigrant investor's immigration attorney, may make a preliminary assessment, but the ultimate decision will be made solely by USCIS and the U.S. State Department. Each EB-5 immigrant investor must agree to provide information and documents to the Fund, and to allow the Fund to make further investigation, concerning the EB-5 immigrant investor's source of funds and the personal and business background of the EB-5 immigrant investor and accompanying family members.

Achieving your immigration goal of conditional and permanent resident status will require you to maintain your primary residence in the United States.

EB-5 immigrant investors who obtain conditional resident status or permanent resident status must intend to make the United States their primary residence. Conditional residents or permanent residents who maintain their primary residence outside the United States risk revocation of their U.S. residence status. Each prospective EB-5 immigrant investor should consult a competent immigration attorney to review the likelihood that the investor's immigration objectives will be achieved.

THE EB-5 PROGRAM

Overview

In 1990, the U. S. Congress created the employment based 5th preference (EB-5) immigrant investor visa program. The EB-5 program offers 10,000 immigrant visas a year to qualified investors who wish to obtain residence in the United States by investing in businesses that will benefit the economy and create jobs. The EB-5 Immigrant Investor Regional Center Pilot Program ("The Pilot Program") was created by Congress in 1992 and sets aside 3,000 of the 10,000 EB-5 visas each year for people who invest in designated "regional centers."

Once a qualifying investment has been made in a regional center, an investor files a Form I-526 Immigrant Petition by Alien Entrepreneur, ("Form I-526") with the USCIS. After the USCIS approves I-526 petition, an investor files an adjustment of status application if he or she is already in the U.S. in valid non-immigrant status or ii) applies for an interview and entry visa at a U.S. embassy or consulate abroad ("consular processing"). When an adjustment of status application is approved, a conditional residence status of two years will be given to the investor. If the investor pursues consular processing, upon approval the investor and his or her family will be issued an EB-5 entry visa to the U.S. Once they enter the U.S., the two-year conditional residence status starts.

At the end of the two-year conditional resident period the investor must show that his or her investment has been sustained and the projects invested in by the regional center have created at least ten jobs for each investor. Assuming the investor provides that evidence, the USCIS will remove the conditional residence status, and the investor will receive his or her permanent residency status.

The Immigration Process

The Fund's primary role in the immigration process is to sell interests in the Fund to immigrant investors (which allow the investors to file Form I-526) and invest the investors' capital in a manner that is consistent with the EB-5 program and leads to the creation of at least ten jobs for each Unit holder in the Fund. If GreenTech Automotive's proposed business plan succeeds, our independent economist's report indicates that GreenTech Automotive will create enough jobs to meet the EB-5 program requirements for every investor in the Fund. The rest of the immigration process will be led by the immigrant investor and his or her independent immigration counsel. The management company will maintain a current record of jobs created by the Fund's investment activities. The management company will assist each Unit holder by providing information about job creation to the USCIS in the manner required by the EB-5 program. Upon the initial conditional residency filing, the Fund will certify to the USCIS with respect to the projected number of jobs that will be created. Two years after an immigrant investor is granted conditional resident status, the investor must file with the USCIS Form I-829, Petition by Entrepreneur to Remove Conditions ("Form I-829") to convert his or her status to permanent residency. At that time, the Fund will allocate to

each Unit holder ten jobs from those jobs created and maintained by GreenTech Automotive.

Frequently Asked Questions

The following are some frequently asked questions about the EB-5 program, along with answers to the questions:

How much do I need to invest to receive conditional and ultimately permanent residency status for myself and my family members?
If you invest in a regional center, like ours, you need to invest $500,000 if the investment is made in a high unemployment or rural area. There are also other fees such as legal fees for your immigration and tax counsel and application fees paid to USCIS.

What is the region covered by the Gulf Coast Funds regional center?
Our regional center is the largest geographical regional center in the United States. It covers the entire states of Louisiana and Mississippi.

Do I have to live in Louisiana or Mississippi to participate in this program?
No. You do not have to live in Louisiana or Mississippi. You do not even have to ever visit the region.

When will I have to pay $555,000?
When you are ready to file your application for the I-526, you would send us $555,000.

What do I have to do to get my visa application approved?
Normally, you will get an American immigration lawyer to help you in the visa application process. If you do not have an immigration lawyer, the Placement Agent suggests that you use David Z. Lu, Esq., an immigration lawyer with whom we work with on a regular basis. The lawyer will help you file a Form I-526. With your Form I-526, you will have to submit proof that the source of your $500,000 investment is lawful.

Once the USCIS approves your Form I-526 you will need to adjust your status if you are already living in the U.S. in non-immigrant status or you will have to schedule an interview at a U.S. embassy or consulate abroad. In either case, you will have to submit the same type of documentation that other visa applicants to the United States are required to submit. Here is a general description, from the U.S. government's web site, of certain requirements for receiving a visa:

> **VISA INELIGIBILITY / WAIVER**
> The immigration laws of the United States, in order to protect the health, welfare, and security of the U.S., prohibit the issuance of a visa to certain applicants. Examples of applicants who must be refused visas are those who: have a communicable disease, or have a dangerous physical or mental disorder; have committed serious criminal acts; are terrorists, subversives, members of a totalitarian party, or former Nazi war criminals; have used illegal means to enter the U.S.; or are ineligible for citizenship. Some former exchange visitors must

live abroad for two years. Physicians who intend to practice medicine must pass a qualifying exam before receiving immigrant visas. If found to be ineligible, the consular officer will advise the applicant of any waivers.

OTHER IMPORTANT INFORMATION

Documents for Visa Application
All applicants must submit certain personal documents such as passports, birth certificates, police certificates, and other civil documents, as well as evidence that they will not become public charges in the United States. The consular officer will inform visa applicants of the documents needed as their applications are processed.

Medical Examinations
Before the issuance of an immigrant visa, every applicant, regardless of age, must undergo a medical examination. The examination will be conducted by a physician designated by the consular officer. Examination costs must be borne by the applicant, in addition to the visa fees.

Visa Fees
The cost of each immigrant visa application may vary for additional visa fees apply. For up to date immigration visa fee costs, please consult your immigration attorney or please visit the USCIS fee schedule web page.

Source: www.uscis.gov

How will my money be invested?
Your money will be invested in our regional center Fund, which will re-invest your money in GreenTech Automotive. To meet the immigration goals of the EB-5 regional center program, GreenTech Automotive must create at least 10 new jobs (both direct and indirect or induced jobs) for every $500,000 we invest.

How will the investment in GreenTech Automotive be structured?
All of the proceeds of this offering will be invested in convertible preferred stock or debt of GreenTech Automotive. We will receive one share of convertible preferred stock or debt for each $500,000 we invest in GreenTech Automotive. Investors will be charged a $55,000 administrative fee at the time that the Unit is purchased. This administrative fee is to pay legal and other administrative fees associated with marketing the Units world-wide. Five years after each such investment, each share of convertible preferred stock or debt will be automatically converted into shares of common stock of GreenTech Automotive having an estimated fair market value of $555,000.

When will my visa become permanent?
Two years after you receive your conditional resident status, you must apply for permanent residency. At that time, we will supply documents for your Form I-829 petition to show that your money has been invested in the region and that the Fund's

investment has created at least ten jobs. Once your application is approved, you will become a permanent resident of the United States, and may soon apply for full citizenship if you desire.

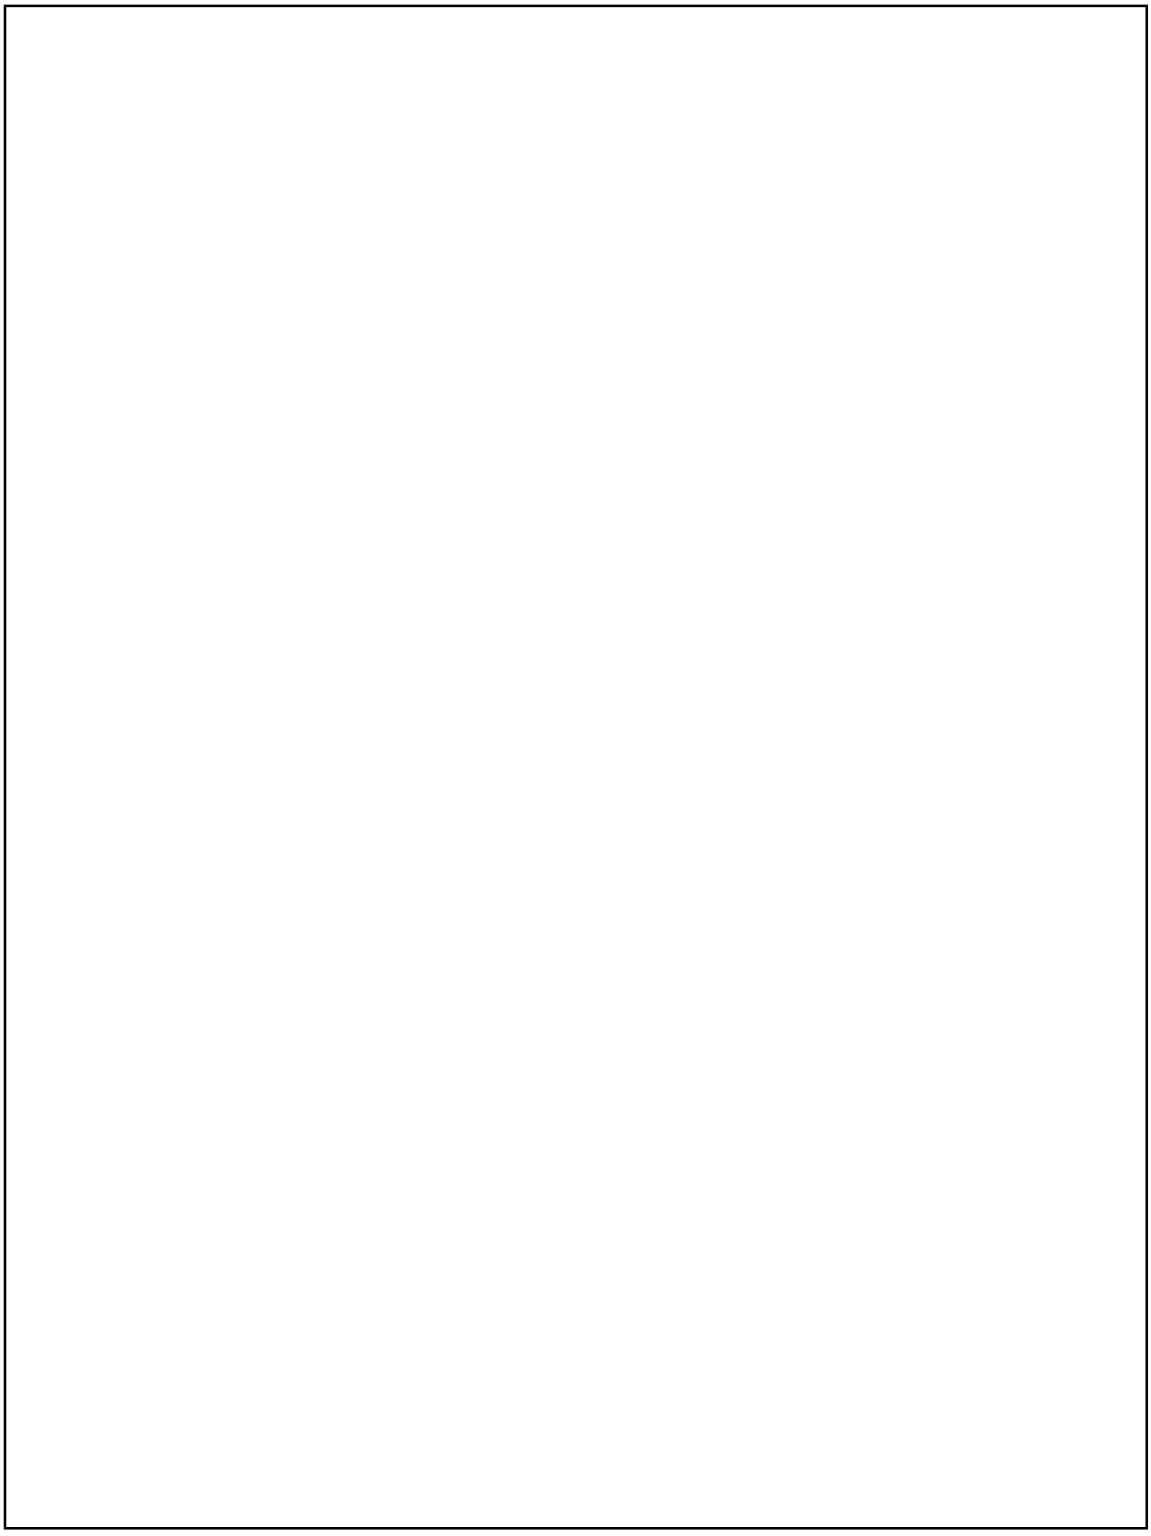
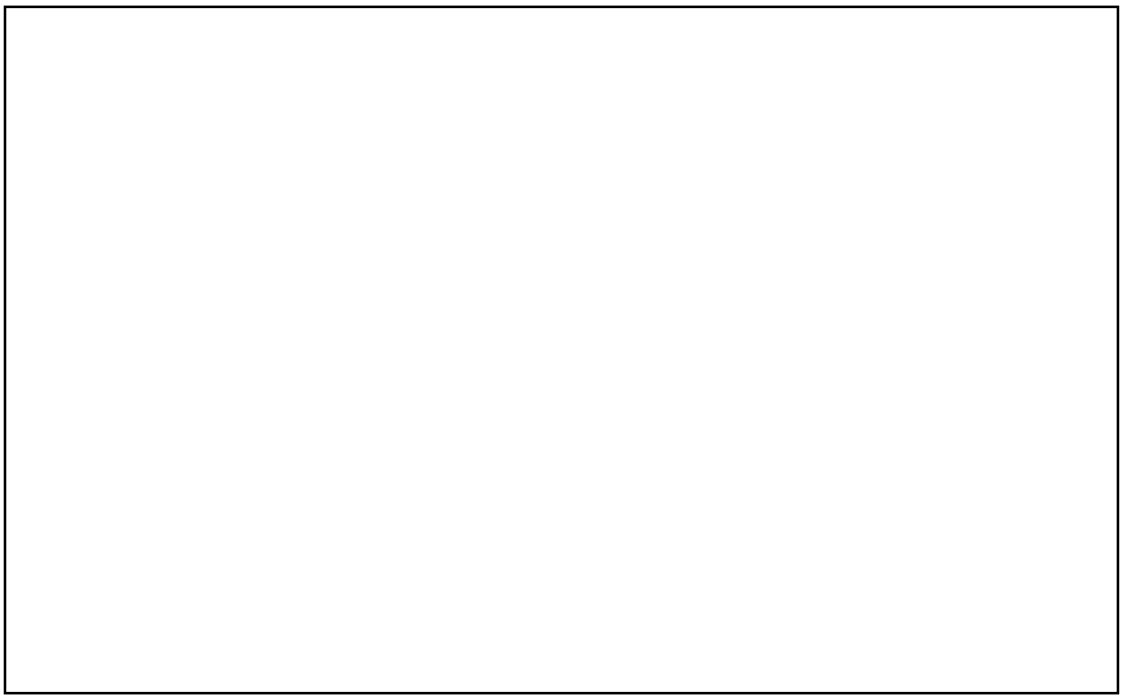
RIGHTS OF UNIT HOLDERS





(b)(4)

CERTAIN U.S. FEDERAL INCOME TAX CONSIDERATIONS

The following discussion about certain U.S. federal income tax and other tax considerations that you should weigh prior to investing in a Unit is merely a presentation of certain tax issues that generally apply to all investors in EB-5 funds. You should not consider this discussion to be tax advice, applicable to your particular situation or a full discussion of all material United States, state, local and foreign tax consequences of an investment in the Fund or your status as U.S. tax resident or non-resident and you should consult with your personal tax advisor about these, and all other issues relevant to your personal decision to invest in a Unit. Neither the Fund nor the management company is qualified to provide the tax advice you will need. You cannot use this summary for the purpose of avoiding United States federal tax penalties.

The following discussion is based upon the Internal Revenue Code of 1986 (the "Code"), the applicable Treasury Regulations promulgated or proposed under the Code (the "Regulations"), current positions of the IRS contained in published revenue rulings and revenue procedures, current administrative positions of the IRS, and existing judicial decisions, as in effect on the date of this Memorandum, all of which are subject to change or modification, with or without retroactive effect, at any time.

No assurance can be given as to the future status of federal income tax laws or other tax laws as they pertain to limited liability companies of the type described herein. It is likely that changes to the Code will be proposed in the future. The effect of such proposals on the Fund and on an investment therein cannot be analyzed. Accordingly, potential investors are urged to consider on-going developments regarding changes in the federal income tax law and other tax laws and to consult their own advisors in assessing the risks associated with an investment in the Fund.

Classification of the Fund

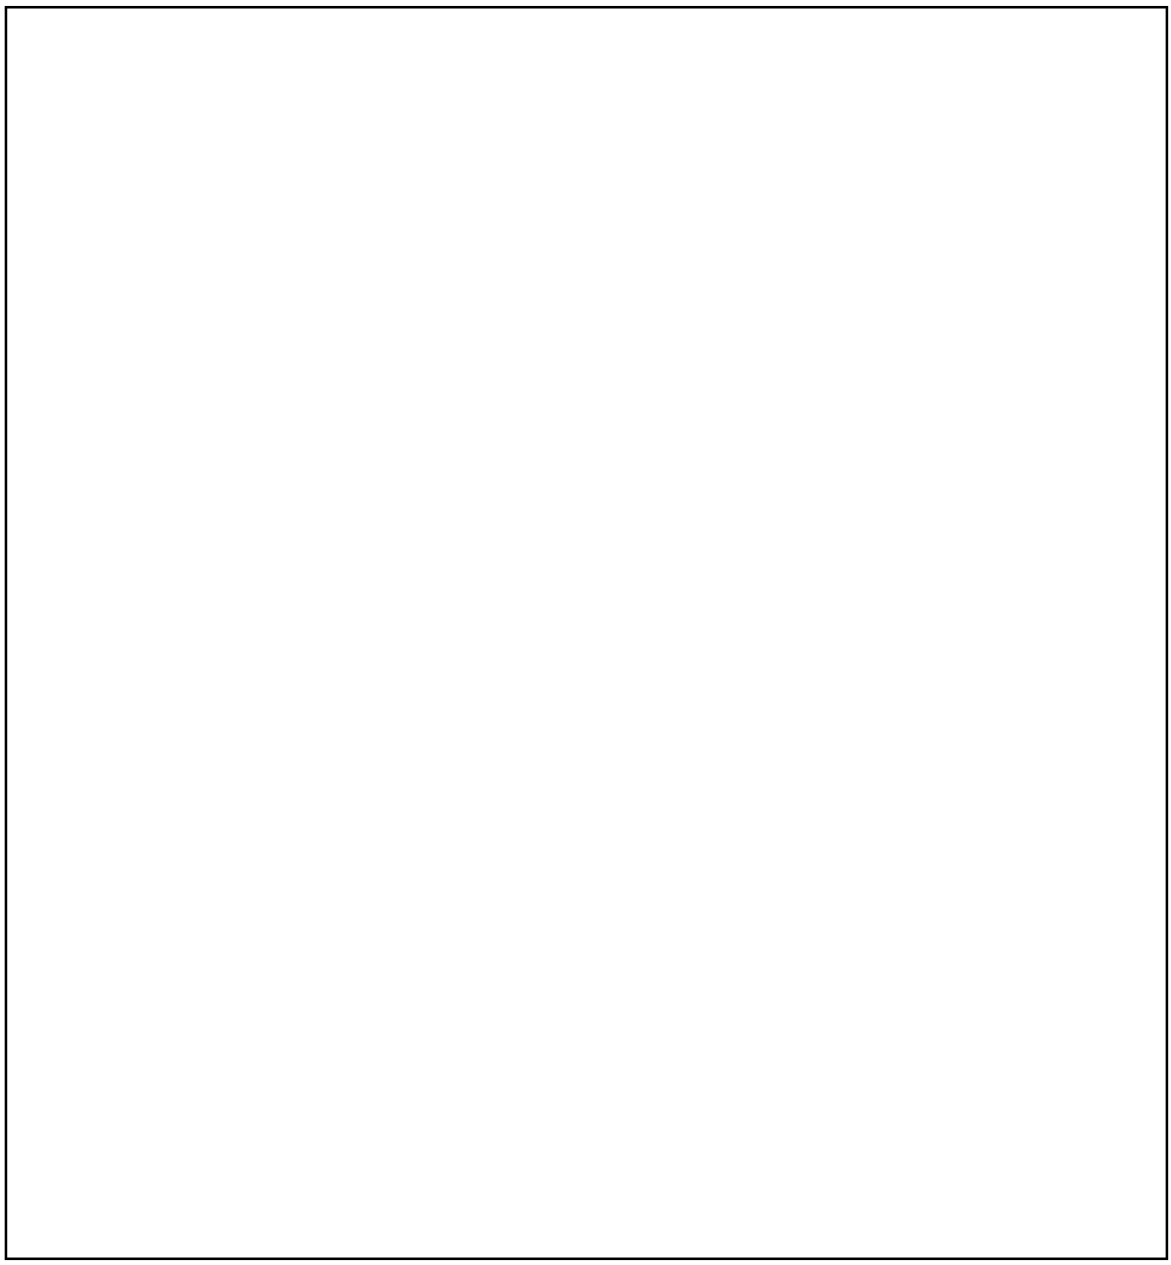
The Fund will be treated as a partnership for federal income tax purposes under the "check the box" Regulations. Under these regulations, an unincorporated domestic entity, such as the Fund, with at least two members will be taxed as a partnership if no election is made to be taxed as a corporation. Accordingly, the discussion herein relating to partnerships and partners generally will be applicable to Unit holders in the Fund.

Partnership Taxation in General

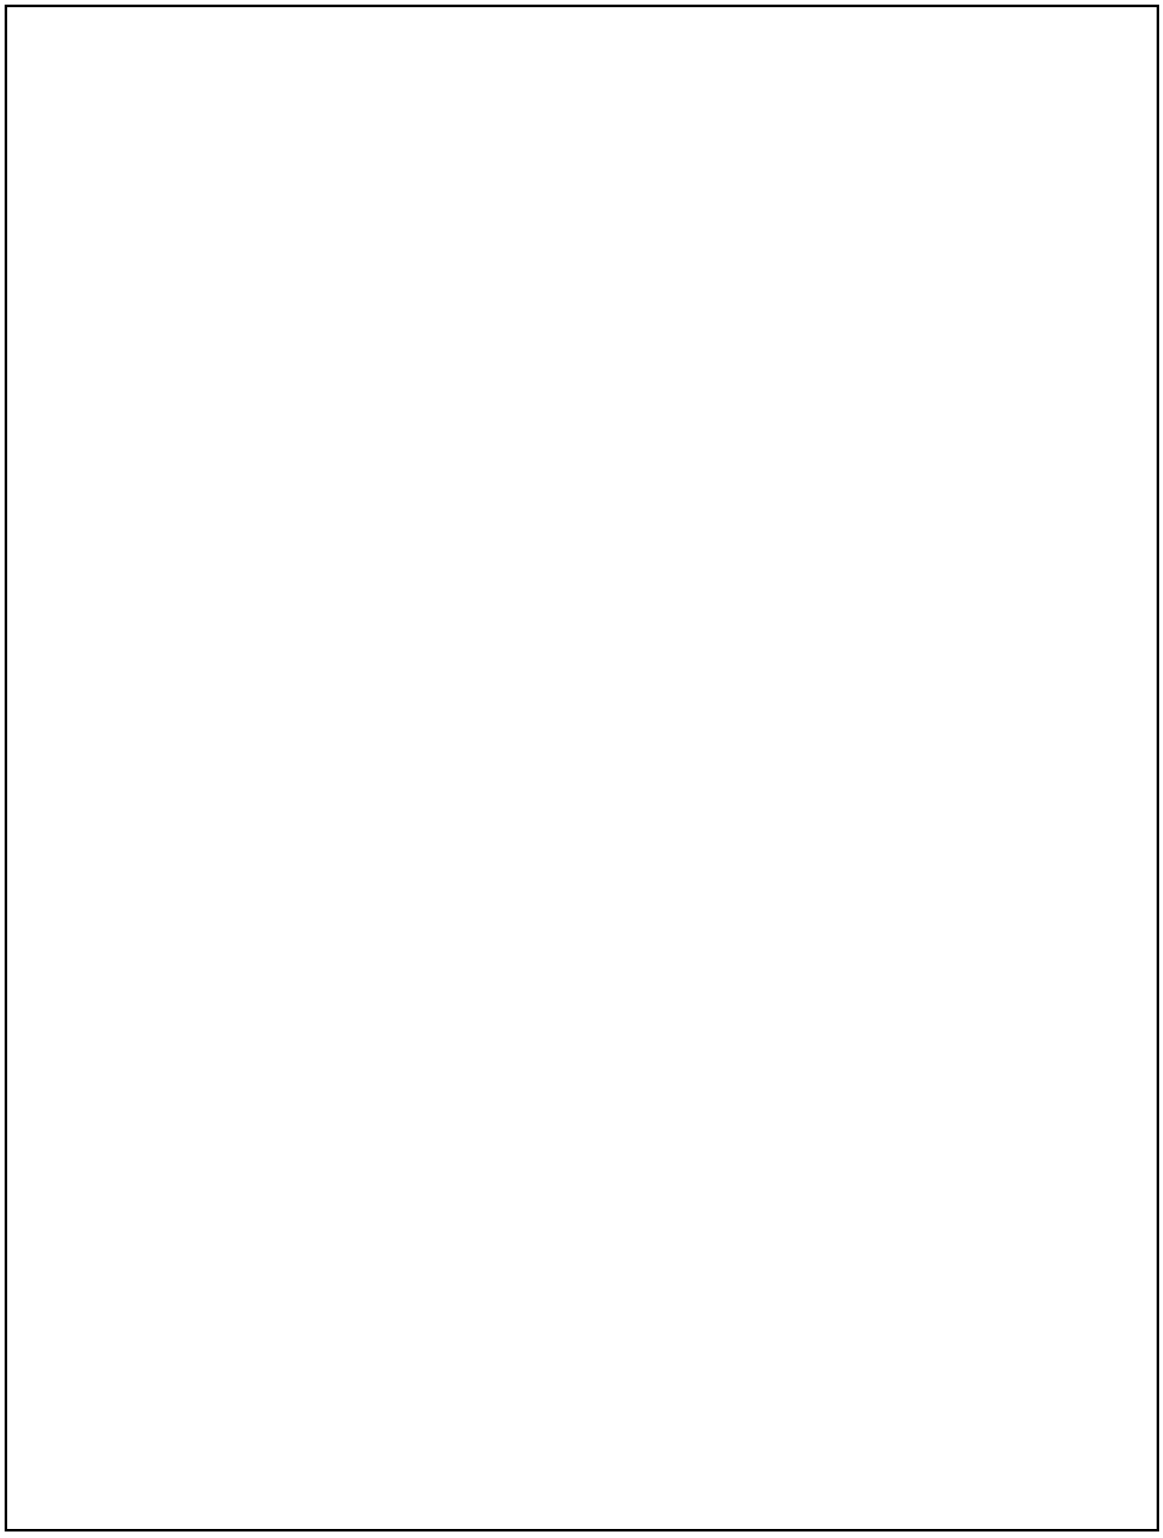
Under the Code, a partnership pays no federal income tax, although it may be required to withhold and pay taxes on behalf of certain of its partners. Rather, each partner reports on his federal income tax return his distributive share of all items of income, gain, loss, deduction, credit and tax preference of the partnership, whether or not the partnership makes any actual distribution to the partner during the taxable year. Thus, it is possible that distributions from the Fund will not be sufficient to pay tax liabilities with respect to the tax income and gain allocated to a Unit holder and that the only source of payment of such tax liabilities would be from the Unit holder's funds from sources

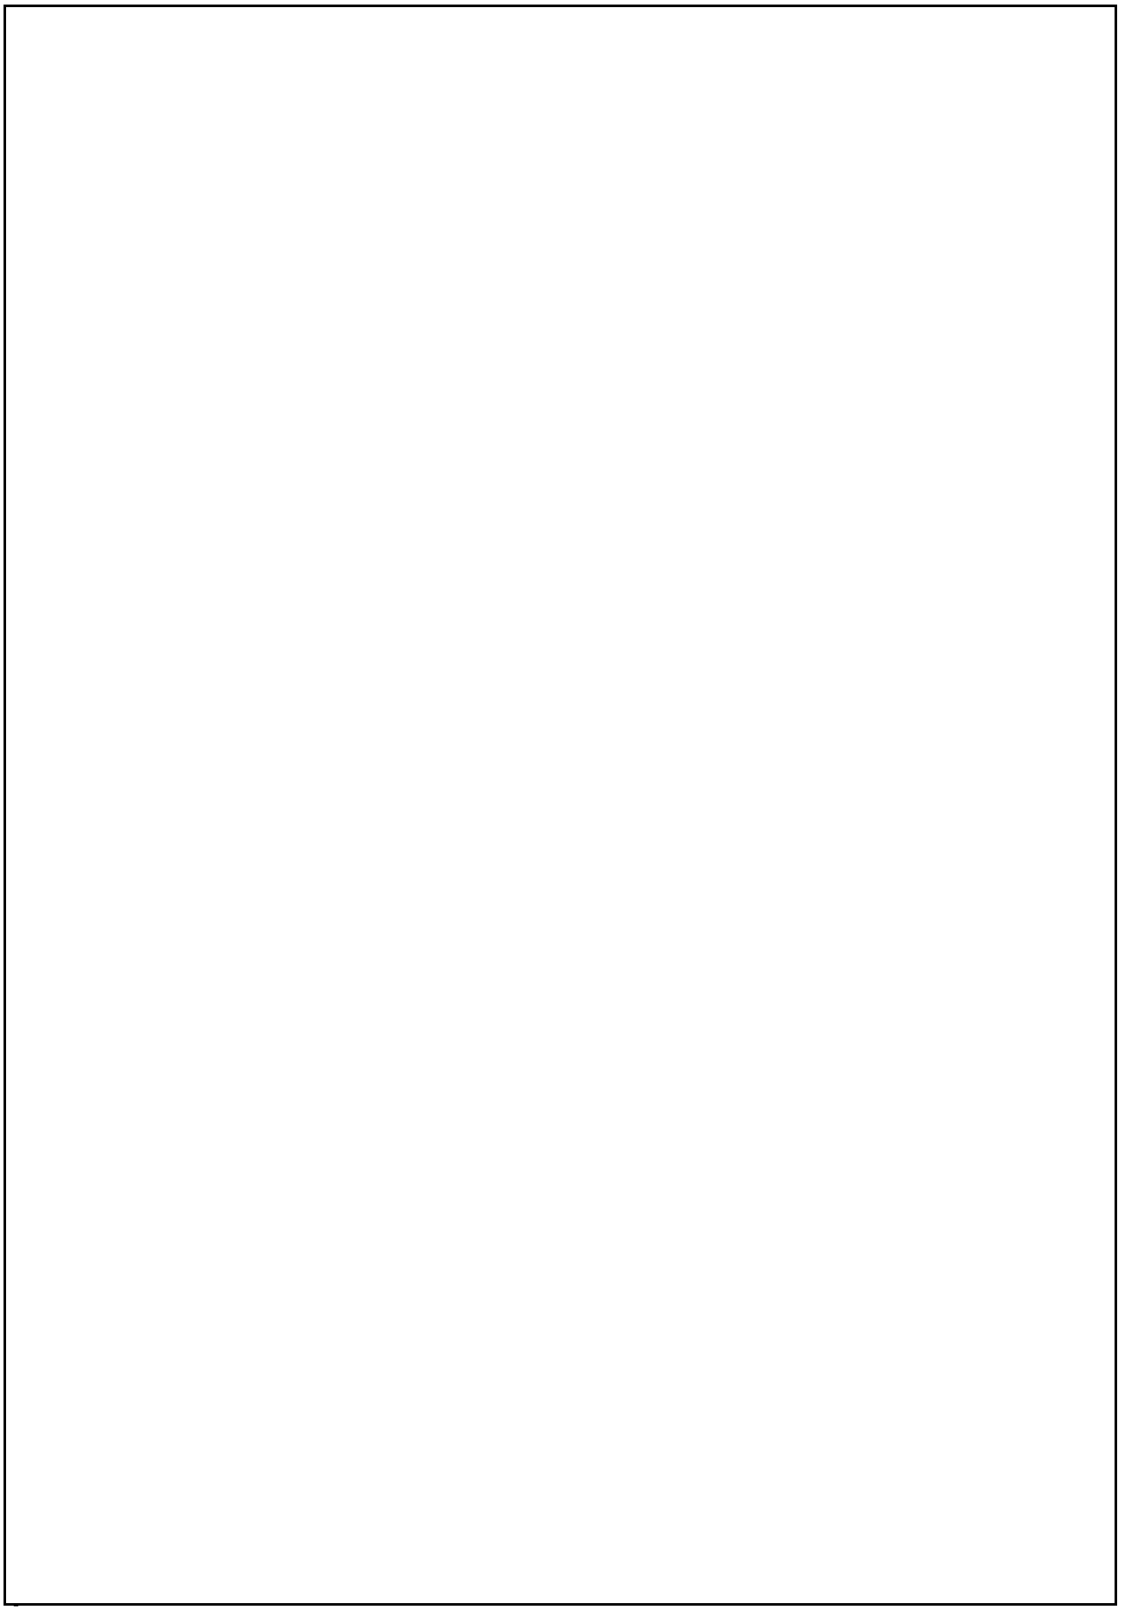
other than the Fund.

The extent to which a Unit holder may utilize Fund losses in any tax year is limited to the adjusted tax basis of his interest in the Fund at the end of the Fund tax year (See "Basis of Units"). In addition, a Unit holder may not deduct Fund losses in excess of the amount the Unit holder is considered "at risk" with respect to the Fund under Code Section 465 (See "At Risk Limitations"). A Unit holder generally may use his distributive share of any partnership losses allowable after applying the foregoing loss limitation only to offset his income from other passive sources (see "Passive Activity Loss Limitations"). (b)(4)



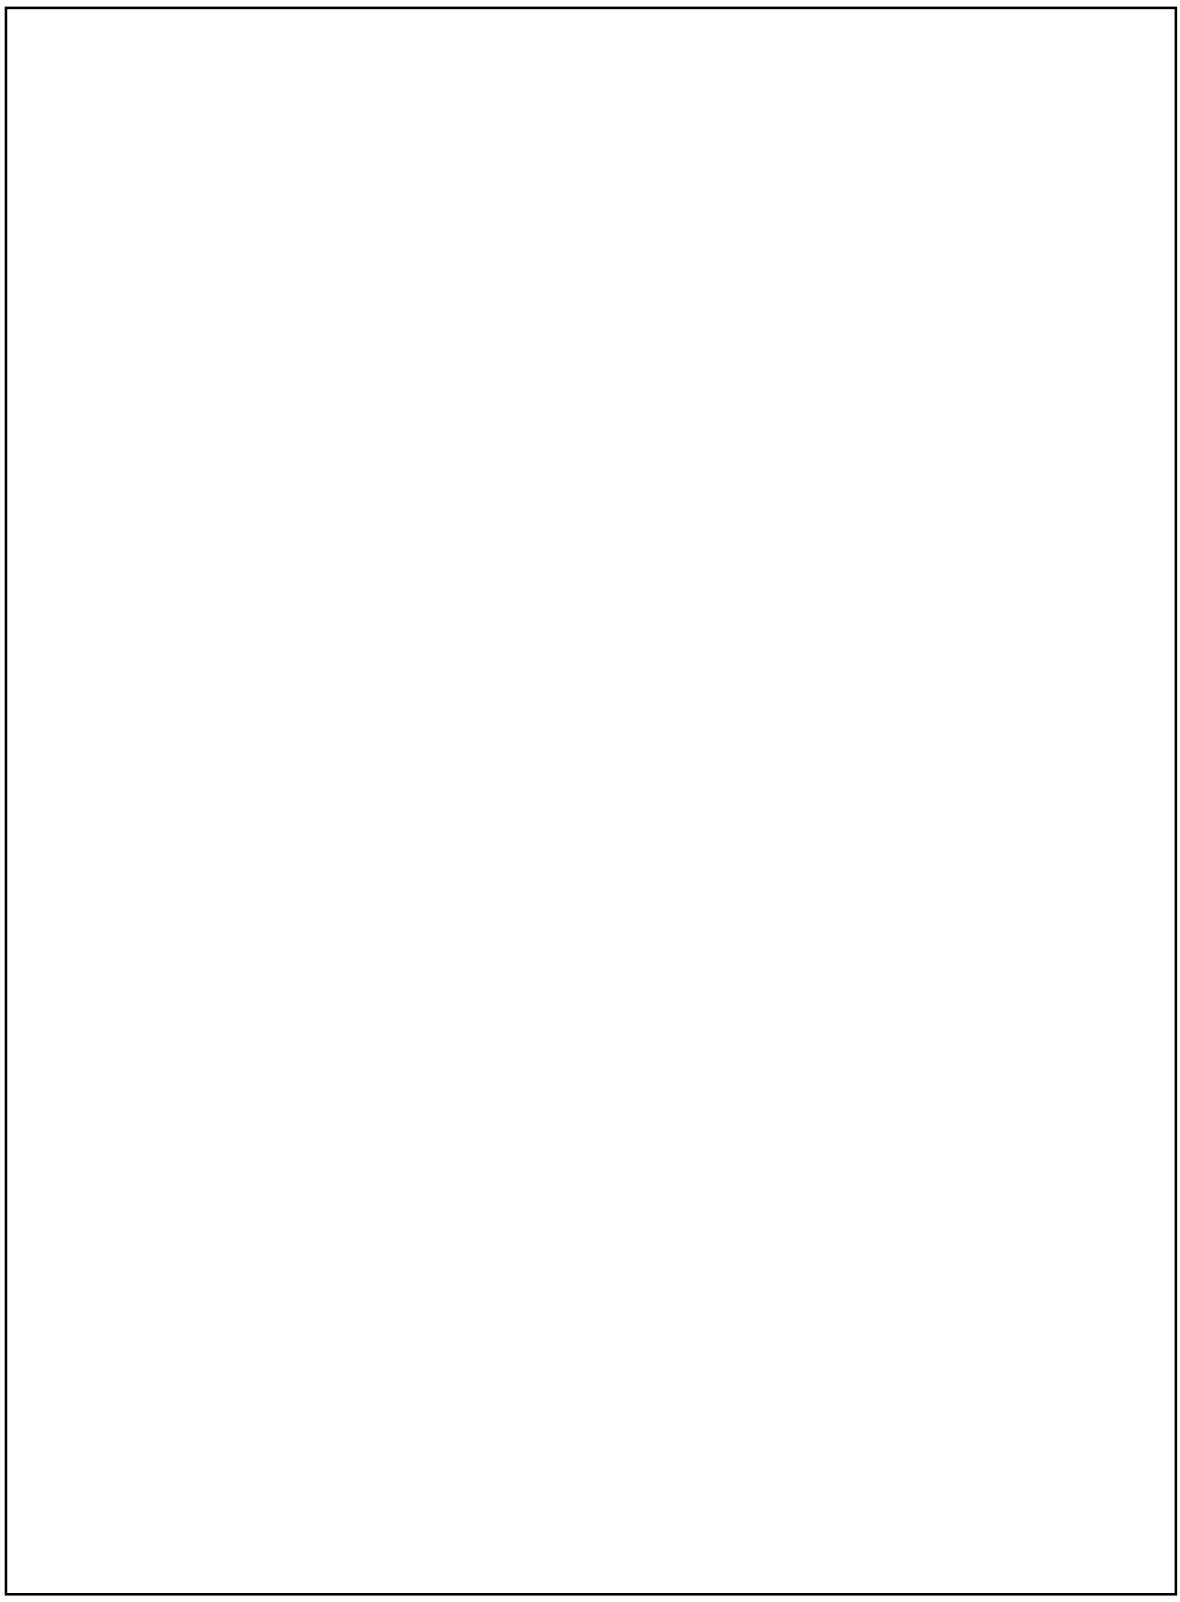
(b)(4)



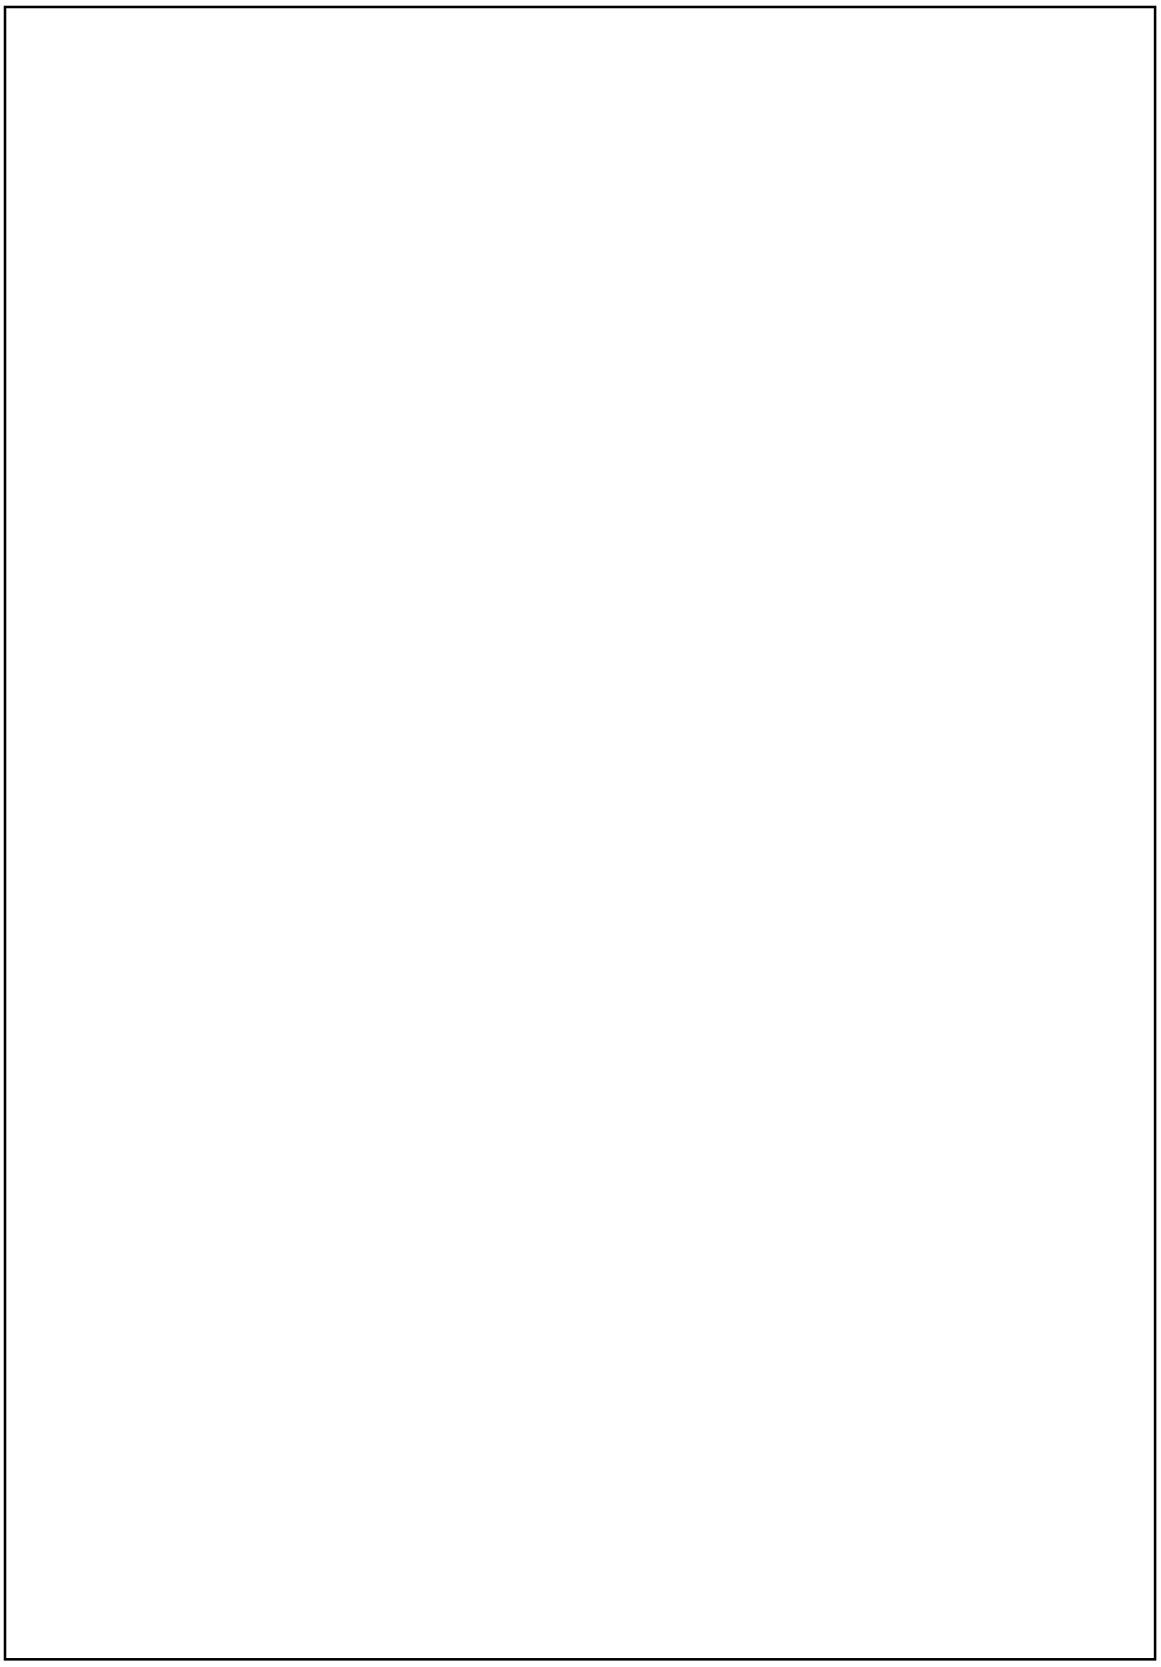


(b)(4)

(b)(4)



(b)(4)



(b)(4)

Certain Tax Consequences to Non-United States Investors

Foreign Individuals Potentially Subject to U.S. Tax on Their Worldwide Income. Individuals who are not citizens of the United States but who are treated as "residents" of the United States for federal income tax purposes are subject to United States federal income tax on their worldwide income, including but not limited to their income from the Fund. For this purpose, an individual who is a lawful permanent resident of the United States (e.g., a holder of a "green card") generally will be treated as a resident. In addition, an individual who is not a lawful permanent resident under the immigration laws may nevertheless be a "resident" for tax purposes based upon a "substantial presence" in the United States as defined under Code Section 7701(b). For example, under that Code Section, an individual may be a "resident" if the individual is physically present in the United States on all or any part of a certain number of days, determined under a formula, within a three-year testing period. An individual present in the United States under certain types of temporary visas (e.g., teachers or students) may be excepted from the "substantial presence" test, but the determination whether an individual is a resident can be a complex determination. Potential investors who are foreign individuals should consult with their own tax advisors to be certain of their tax status under United States law.

Taxation of Non-U.S. Individuals Not Treated as Tax Residents. Potential investors who are neither citizens nor residents (as determined for tax purposes) of the United States ("Non-U.S. Investors") are subject to additional tax rules. Generally, Non-U.S. Investors are taxable on certain United States source passive investment income ("FDAP"), including dividends, interest and rents, at a flat rate of 30% on the gross amount of such income, without reduction for any expenses or other tax deductions, and that tax is satisfied by withholding of tax on payments of such amounts to the Non-U.S. Investors. In the case of a partnership, the partnership generally will be required to withhold based on the share of its FDAP allocable to its Non-U.S. Investors. The 30% tax on the gross amount of FDAP may be reduced or eliminated if the Non-U.S. Investor

is a resident of a country with which the United States has a bilateral income tax treaty, provide that the Non-U.S. Investor submits timely certification of his entitlement to treaty relief. Certain other exceptions apply which may reduce or eliminate the tax on certain types of FDAP, including interest income. Non-U.S. Investors generally are not subject to tax on capital gains unless either (1) the gains are attributable to a United States trade or business or (2) the Non-U.S. Investor is an individual who is present in the United States for more than 183 days during the taxable year in which the gains are realized.

The 30% taxation of FDAP will not apply to any income that is effectively connected with the active conduct of a trade or business within the United States. The net income from such a trade or business within the United States realized by a Non-U.S. Investor will be subject to tax at the regular graduated income tax rates applicable to resident individuals. Such income currently will be subject to income tax withholding, generally at a rate of 35%. A Non-U.S. Investor who realizes any such income will be required to file a United States federal income tax return with respect to the taxable year in which the income is realized.

A Non-U.S. Investor in the Fund who is allocated a share of passive income (including capital gain) or active trade or business income realized by the Fund will be subject to tax under the above rules as if such Non-U.S. Investor had realized such income directly. Any withholding of federal income taxes by the Fund attributable to a Non-U.S. Investor will be treated as a distribution to that particular Unit holder.

THE FOREGOING IS NOT A COMPLETE DISCUSSION OF ALL OF THE FEDERAL INCOME TAX CONSEQUENCES TO A NON-U.S. INVESTOR; THERE ARE STATE AND LOCAL TAX AND ESTATE TAX CONSEQUENCES TO BE CONSIDERED. ALSO, FOREIGN TAXES MAY BE IMPOSED ON A NON-U.S. INVESTOR'S INCOME FROM THE FUND. INVESTORS ARE STRONGLY ADVISED TO CONSULT WITH THEIR TAX ADVISORS WITH RESPECT TO THE TAX CONSEQUENCES OF AN INVESTMENT IN THE FUND.

Compliance Matters

Tax Returns/Audits. The Fund will furnish annually (and in certain circumstances, periodically) to each of the Unit holders sufficient information from the Fund's tax return for the Unit holders to prepare their own federal income tax returns.

The tax treatment of items of partnership income, loss, deduction, and credit will be determined at the partnership level. In addition, all partners are required, on their individual federal income tax returns, to treat partnership items in a manner that is consistent with the treatment of such items on the partnership's return.

The tax matters partner for the Fund will be the management company. The tax matters partner is required to, among other things, keep the other partners informed of all administrative and judicial proceedings and represent the Fund in such proceedings. The

tax matters partner is authorized to obtain judicial review of any proposed readjustment of partnership items. Although every partner with an interest in the outcome is allowed to participate in an action filed by the tax matters partner, the outcome of that proceeding will bind all partners. If the tax matters partner fails to seek judicial review of a proposed adjustment of partnership items, other partners may seek such review, provided that there can be only one judicial proceeding with respect to a partnership. The foregoing procedures may adversely affect a Unit holder's ability to deal with adjustments to his income tax return resulting from adjustments made with respect to the Fund.

If any of the tax returns of the Fund are audited, it is possible that substantial legal and accounting fees will have to be paid to substantiate the position of the Fund, and such fees would reduce the cash otherwise available to meet Fund obligations or for distribution to the Unit holders. Such an audit may result in adjustments to each Unit holder's income tax return. An audit of the Fund's tax returns may also result in an audit of non-partnership items on each Unit holder's income tax returns, which in turn could result in adjustments to such items. The costs incurred by a Unit holder in connection with an IRS audit of his income tax return will be borne solely by that Unit holder.

State and Local Taxes

In addition to federal income taxes, the Fund and the Unit holders may be subject to other taxes imposed by various jurisdictions, such as state and local income taxes. Although a detailed analysis of these various taxes is not presented here, investors should consider the potential state and local tax consequences of an investment in the Fund. For example, a Unit holder's distributive share of all or a portion of Fund income, gains, losses and deductions, profits and losses, may be required to be included in determining his income subject to tax under the laws of the state or locality in which he is a resident, as well as jurisdictions in which the Fund does business.

For example, with respect to Unit holders who are not residents of the State of Louisiana, if the Fund has Louisiana source income allocated to such Unit holders, the Fund will be required to file composite returns and make composite payments of tax on behalf of all of its Unit holders who are not residents of Louisiana. The current rate of the Louisiana composite tax is 6% and any composite payment on behalf of a non-resident Unit holder will be treated by the Fund as a distribution to the non-resident Unit holder.

The State of Mississippi also requires a partnership to withhold income tax on a non-resident partner's allocable share of Mississippi source income. The Fund will withhold at the required withholding rate (currently 5%) of Mississippi source income allocable to Unit holders who are not residents of Mississippi. Any such withholding will be treated by the Fund as a distribution to the non-resident Unit holder. The withholding by a partnership does not relieve the non-resident partner of his obligation to file a Mississippi income tax return. A partnership is allowed to file a composite return on behalf of non-resident partners who have no activity in Mississippi other than that from the partnership. If a composite filing is allowable with respect to a non-resident partner and the composite return is properly filed and all taxes, including applicable interest and

penalty is paid, the individual non-resident partner is relieved of his separate individual filing requirement. If the Fund elects to file a composite return on behalf of any non-resident Unit holders, the composite tax payment attributable to the non-resident will be treated as a distribution by the Fund to that non-resident Unit holder.

The Fund intends to supply the Unit holders with information regarding their income, if any, derived from various jurisdictions in which the Fund does business. Unit holders are urged to consult with their own tax advisors regarding state and local tax laws.

U.S. Federal Estate and Gift Taxation

U.S. residents generally are subject to federal estate taxes on their taxable estates at death which includes the value at the time of a decedent's death of all of his property, real or personal, tangible or intangible, wherever situated. Additionally, U.S. residents are subject to gift taxes on the transfer of any property by gift. U.S. estate taxes can also apply to a Non-U.S. Investor to tax that part of his gross estate which at the time of his death is situated in the United States. For example, shares of stock in a domestic U.S. corporation owned by a non-resident alien is treated as property situated in the United States for purposes of this provision. Further, the IRS has ruled that a partner's interest in a partnership is situated where the partnership's business is carried on for purposes of applying the U.S.-United Kingdom Estate Tax Convention. Thus, a Unit in the Fund held by a Non-U.S. Investor could possibly be subject to U.S. estate tax on the death of the Non-U.S. Investor.

Additionally, state and local taxing jurisdictions may also impose state, inheritance and/or gift taxes on their residents or on property deemed situated within their respective jurisdictions.

Washington, DC 20536

Re: Amendment of GCFM Application to include Virginia Tobacco Regions

Dear Ms. Velarde:

Gulf Coast Funds Management, LLC (GCFM), an approved Regional Center pursuant to Section 610 of the Appropriations Act of 1993, respectfully requests to include additional geographical areas covering the tobacco-dependent localities in the Commonwealth of Virginia for the following industries: manufacturing, education and training, research and development, and wholesale trade (international). The tobacco region consists of 41 localities in the South Central and Southwest regions of Virginia ("Tobacco Region", see attached *Exhibit A*), which was established to revitalize tobacco-dependent communities.

Communities and citizens throughout the Tobacco Region continue to experience significant economic distress as a direct consequence of historical dependence on tobacco production, textile and furniture manufacturing and coal production.

The credit crisis and difficult economy have resulted in more severe job losses in the Tobacco Region, where unemployment rates have historically been higher than other regions in Virginia. The Virginia Employment Commission has designated many areas within the Tobacco Region as Targeted Employment Areas, thus enabling them to benefit from the Immigrant Investor Pilot Program to accelerate the economic recovery and transformation in those areas.

The proposed expansion of GCFM's geographic coverage area is derived from the existing hybrid automobile manufacturing plan administered (the "Project") by GCFM through Gulf Coast Automotive Investment Fund A-1 (GCAIF A-1). The Project has moved forward with great speed and tremendous support from state and local governments due to its significant potential job creation. The company, GreenTech Automotive, Inc.

GULF COAST FUNDS MANAGEMENT
650 Poydras St. Ste. 2830,
New Orleans, LA 70130

TELEPHONE: (504) 582-2244
FACSISMILE: (504) 582-2240

("GTA", formerly known as Hybrid Kinetic Automotive Corp) has recently revealed publicly its four prototype cars to be built in the United States, and broken ground on the construction of its manufacturing facilities in Tunica County, Mississippi. In the meantime, GTA has agreed to allocate part of its manufacturing operations, such as engine and transmission production, to the Tobacco Region, contingent on USCIS approval of this amendment application.

GCFM's request to amend its application to expand its geography to cover the Tobacco Regions in Virginia is based on the previously approved hybrid automobile manufacturing project managed by the same company, and merely re-allocates a portion of GTA's original planned production to Virginia. Therefore, the methodology for job multipliers described in the original independent economic study, which was approved by USCIS, should be applicable to the manufacturing facilities to be built in the Tobacco Region, and the overall impact would stay intact.

The EB-5 program is an effective way to attract private investment into the Tobacco Region, which would not only create many new jobs, but also provide much-needed diversification to the region's economy. The Virginia State government has thus far expressed strong support for the Project.

Therefore, GCFM respectfully requests the expansion of its geographic coverage area to include the entire Tobacco Region in Virginia, and the support of GTA in achieving its goal of manufacturing and distributing hybrid motor vehicles in the US.

The following documents are enclosed for your review:

Re: Reply to USCIS December 1, 2009 EB-5 Regional Center Compliance Letter
Regional Center: Gulf Coast Funds Management

Dear Mr. Kruszka:

This letter is a timely response to the USCIS letter of December 1, 2009, seeking to ascertain if our regional center is complying with the EB-5 program. This letter answers each of the items in your letter. The bolded headings below correspond to the headings in your letter.

Issue #1: Provide the principal authorized official and point of contact of the regional center responsible for the normal operation, management and administration of the regional center.

(b)(6)

Response: The principal authorized official and point of contact for the Regional Center is Mr. Jack Deng [redacted] or [redacted] Mr. Deng is previously the Chief Financial Officer for GreenTech Automotive, formerly Hybrid Kinetics, a company incorporated in Mississippi in 2008 to engage in the development, production, marketing and financing of energy-efficient and environmentally friendly vehicles. [redacted]

[redacted]

(b)(6)

Bios for all Regional Center officials are attached in the Notification Regarding Change of Ownership of Gulf Coast Funds Management Regional Center to USCIS, dated October 28, 2009, at Exhibit 1.

Issue #2: Explain how you are administering the regional center and how you are actively engaged in supporting a due diligence screening of its alien investors' lawful source of capital and the alien investor's ability to fully invest the requisite amount of capital.

Response: The principals of GCFM manage and oversee all administrative functions of GCFM. In addition, GCFM has partnered with Capital Wealth Holdings Limited, through a Placement Agent Agreement, at Exhibit 2, to assist GCFM with certain administrative and due diligence activities.

GCFM has retained the law firm of Miller Mayer, LLC to ensure timely and accurate compliance with applicable USCIS regional center reporting requirements. Miller Mayer will work with GCFM to assemble all necessary regional center business and investor documentation required by USCIS. In addition, GCFM will engage the services of outside accountants to prepare annual financial documents for all GCFM projects. Please see the Regional Center Administration and Operations Plan attached at Exhibit 3.

GCFM is and will actively engage in a due diligence screening of its potential and actual alien investors. Specifically, GCFM requires investors to complete questionnaires and provide documentation regarding, among other things, the source of their EB-5 investment funds, financial documents (such as bank records and tax returns), investment documents, business documents, and personal identity documentation. GCFM will also require EB-5 investors to provide to the investor's immigration attorney similar documentation necessary to file an I-526 petition. GCFM will adhere to all USCIS rules and regulations relating to confirming the legal source of funds used for investments in GCFM projects. GCFM's escrow bank will also comply with 31 U.S.C. 5318(i), "Due Diligence for United States Private Banking and Correspondent Bank Accounts Involving Foreign Persons." GCFM is confident that its investor funds will be lawfully obtained, based on:

- GCFM and Capital Wealth Holdings' due diligence questionnaires and document requests;
- Escrow bank obligation to comply with 31 U.S.C. § 5318(i) "Due Diligence for United States Private Banking and Correspondent Bank Accounts Involving Foreign Persons"; and
- USCIS's own background check conducted on all I-526 petitioners.

Additionally, GCFM's due diligence will include "Accredited Investor" verification. GCFM will follow applicable U.S. Securities and Exchange Commission rules for classifying an EB-5 investor as an "Accredited Investor" according to the definitions contained in Rule 501 of

Regulation D. Two applicable definitions, either of which must be met by potential EB-5 investors, are as follows:

- A natural person who has individual net worth, or joint net worth with the person's spouse, that exceeds $1 million at the time of the purchase; or
- A natural person with income exceeding $200,000 in each of the two most recent years or joint income with a spouse exceeding $300,000 for those years and a reasonable expectation of the same income level in the current year.

Each prospective EB-5 investor will be required to complete a questionnaire that provides adequate supporting information to verify compliance with either of these definitions. In addition to the Regional Center Administration and Operations Plan at Exhibit 3, please see the description of the due diligence process in the Email between GCFM and the Escrow Agent, JPMorgan Chase, dated November 13, 2009 at Exhibit 4.

Issue #3A: Explain how the regional center is actively engaged in the evaluation, oversight and follows up on any proposed commercial activities that <u>will be</u> utilized by alien investors.

Response: GCFM is actively managing it's investment in GreenTech Automotive through the Gulf Coast Automotive Investment Fund A-1 and contemplating other potential projects that include commercial activities to be used by alien investors. GCFM holds regular internal meetings to ensure evaluation, oversight and follow up on these contemplated commercial activities, as they are conceptually developed and as they are prepared for EB-5 capital investment.

Specifically, GCFM evaluates potential investment projects and commercial activities to ensure consistency with the USCIS regional center designation and the objectives of GCFM. GCFM will conduct this assessment collectively with in-house professionals as well as certain third parties to confirm consistency with GCFM's regional center designation and objectives, project viability, timetable, capital investment required, pro-forma income projections and financial forecast, preliminary job creation potential, investor marketability, and other elements that will bear on the success of GCFM and the commercial activities it sponsors. GCFM will oversee compliance with these standards for commercial success, through, among other oversight functions, regular meetings internally and with other entities involved in the proposed projects to ensure that financial and job creation targets are met. GCFM will provide assistance and guidance as appropriate to eliminate any variance between actual and target objectives and milestones. Please see the Regional Center Administration and Operations Plan attached at Exhibit 3.

GCFM will retain all project and investor information in a GCFM database system for good recordkeeping and for reporting to USCIS each Federal Fiscal year.

Issue #3B: Explain how the regional center is actively engaged in the ongoing monitoring, evaluation, oversight and follow up on any investor commercial activity affiliated through the regional center <u>that has been</u> utilized by alien investors in order to create direct and/or

indirect jobs through qualifying EB-5 capital investments into commercial enterprises within the regional center.

(b)(4)

Issue #4A: Provide the name, date of birth, petition receipt number, and alien registration number (if one has been assigned by USCIS) of each principal alien investor who has made/will make an investment and has filed or will file an EB-5/I-526 Petition with USCIS, specifying whether:

- **i. the petition was filed,**
- **ii. is pending,**
- **iii. was approved,**
- **iv. denied, or**
- **v. withdrawn by the petitioner, together with the date(s) of such event.**

Response: Please refer to the Investor/Investment Spreadsheet included as Exhibit 5.

Issue #4B: Provide the total number of visas represented in each case for the principal alien investor identified in 4a. above, plus his/her dependents (spouse and children) for whom immigrant status is sought or has been granted.

Response: Please refer to the Investor/Investment Spreadsheet included as Exhibit 5.

Issue #4C: Provide the country of nationality of each alien investor who has made an investment and filed and EB-5/I-526 petition with USCIS.

Response: Please refer to the Investor/Investment Spreadsheet included as Exhibit 5.

Issue #4D: Provide the US city and state of residence (or intended residence) of each alien investor who has made an investment and filed an EB-5/I-526 petition with USCIS.

Response: Please refer to the Investor/Investment Spreadsheet included as Exhibit 5.

Issue #4E: For each alien investor listed in item 4a above, identify the following:

- **i. the date(s) of investment in the commercial enterprise;**
- **ii. the amount(s) of investment in the commercial enterprise; and**

iii. **the date(s), nature, and amount(s) of any payment/remuneration/profit/return on investment made to the alien investor by the commercial enterprise and/or regional center from when the investment was initiated to the present.**

Response: Please refer to the Investor/Investment Spreadsheet included as Exhibit 5.

Issue #5A: Identify/list each of the target industry categories of business activity within the geographic boundaries of your regional center that have received alien investors' capital, and what in aggregate amounts.

Response: Please refer to the Investor/Investment Spreadsheet included as Exhibit 5.

Issue #5B: Identify/list each of the target industry categories of business activity within the geographic boundaries of your regional center that have received non-EB-5 domestic capital that has been combined and invested together, specifying the separate aggregate amounts of the domestic investment capital.

Response: Please refer to the Investor/Investment Spreadsheet included as Exhibit 5.

Issue #5C: Of the total investor capital (alien and domestic) identified above in 5a and 5b, identify and list the following:

i. **The name and address of each "direct" job creating commercial enterprise.**
ii. **The industry category for each indirect job creating investment activity.**

Response: Please refer to the Investor/Investment Spreadsheet included as Exhibit 5.

Issue #6A: Provide the total number of approved EB-5 alien investor I-526 petitions per each Federal Fiscal Year to date made through your regional center.

Response: Please refer to the Investor/Investment Spreadsheet included as Exhibit 5.

Issue #6B: Provide the total aggregate number of approved EB-5 alien investor I-829 petitions per each Federal Fiscal Year to date through your regional center.

Response: As of the date of this submission, no I-829 petitions have been filed through GCFM and thus no I-829 petitions have been approved.

Issue #7: The total aggregate sum of EB-5 alien capital invested through your regional center for each Federal Fiscal Year to date since your approval and designation.

Response: Please refer to the Investor/Investment Spreadsheet included as Exhibit 5.

Issue #8: The combined total aggregate of "new" direct and/or indirect jobs created by EB-5 investors through your regional center for each Federal Fiscal Year to date since your approval and designation.

Response: Please refer to the Investor/Investment Spreadsheet included as Exhibit 5.

Issue #9: If applicable, the total aggregate of "preserved" or saved jobs by EB-5 alien investors into troubled businesses through your regional center for each Federal Fiscal Year to date since your approval and designation.

(b)(4)

Issue #10A: If for any given Federal Fiscal Year your regional center did or does not have investors to report, then provide a detailed written explanation for the inactivity.

Response: This request is not applicable to GCFM.

Issue #10B: If for any given Federal Fiscal Year your regional center did or does not have investors to report, then provide a specific plan which specifies the budget, timelines, milestones and critical steps to:

- **i. actively promote your regional center program,**
- **ii. identify and recruit legitimate and viable alien investors, and**
- **iii. a strategy to invest into job creating enterprises and/or investment activities within the regional center.**

Response: This request is not applicable to GCFM.

Issue #11: Regarding your website, please provide a hard copy which represents fully what your regional center has posted on its website, as well as providing your web address. Additionally, please provide a packet containing all of your regional center's hard copy promotional materials such as brochures, flyers, press articles, advertisements, etc.

Response: The GCFM website is accessible online at: www.gulfcoastfunds.com. A hard copy of the website contents is attached at Exhibit 6. Hard copies of GCFM's Private Placement Memorandum for the Automotive Fund is attached at Exhibit 7.

Plans and Intent to Amend GCFM Regional Center Proposal

On December 7, 2009 GCFM submitted a request to USCIS to amend its application to expand its geography to cover the Tobacco Regions in Virginia. This request is based on the previously approved hybrid automobile manufacturing project managed by the same company, GreenTech Automotive (GTA), and merely re-allocates a portion of GTA's original planned production to Virginia. Therefore, the methodology for job multipliers described in the original independent economic study, which was approved by USCIS, should be applicable to the manufacturing facilities to be built in the Tobacco Region, and the overall impact would stay intact.

The EB-5 program is an effective way to attract private investment into the Tobacco Region, whish would not only create many new jobs, but also provide much needed diversification to the region's economy. The Virginia State government has expressed strong

support for the Project.

Therefore, GCFM respectfully submitted its requests to expand its geographic coverage area to include the entire Tobacco Region in Virginia. For more information on the request please see Exhibit 8.

Please contact me at [redacted] or [redacted] if you have any questions.

(b)(6)

Sincerely,

Gulf Coast Funds Management

SCOPS 70/6.2.8

December 1, 2009

Taylor Beery
President
Gulf Coast Funds Management, LLC
650 Poydras St., Suite 2830
New Orleans, LA 70130

Your entity is designated as a Regional Center within the Immigrant Investor Pilot Program by the U.S. Citizenship and Immigration Services (USCIS). Pursuant to the regulations at 8 CFR 204.6(m)(6) this letter seeks to ascertain if your regional center is in compliance with the above cited regulation in order to help USCIS determine if and how your regional center is presently serving the purpose of promoting economic growth, improving regional productivity, job creation, and increased domestic capital investment.

It is necessary to determine whether your regional center is in compliance with both regulations and the law in order for you to continue to operate as a USCIS approved and designated regional center. Therefore USCIS is requesting that **for each Federal Fiscal Year[1] to the present date of this letter, since your approval and designation as a regional center,** that you provide the following information by **not later than 45 calendar days from the date of this letter**:

1. Provide the principal authorized official and point of contact of the regional center responsible for the normal operation, management and administration of the regional center.

2. Explain how you are administering the regional center and how you are actively engaged in supporting a due diligence screening of its alien investors' lawful source of capital and the alien investor's ability to fully invest the requisite amount of capital.

[1] A Federal Fiscal Year runs for twelve consecutive months beginning October 1st and ending on September 30th.

3. Explain the following:

    a. How the regional center is actively engaged in the evaluation, oversight and follows up on any proposed commercial activities that will be utilized by alien investors.

    b. How the regional center is actively engaged in the ongoing monitoring, evaluation, oversight and follows up on any investor commercial activity affiliated through the regional center that has been utilized by alien investors in order to create direct and/or indirect jobs through qualifying EB-5 capital investments into commercial enterprises within the regional center.

4. Provide:

    a. the name, date of birth, petition receipt number, and alien registration number (if one has been assigned by USCIS) of each principal alien investor who has made/will make an investment and has filed or will file an EB-5/I-526 Petition with USCIS, specifying whether:
        i. the petition was filed,
        ii. is pending,
        iii. was approved,
        iv. denied, or
        v. withdrawn by the petitioner, together with the date(s) of such event.

    b. The total number of visas represented in each case for the principal alien investor identified in 4.a. above, plus his/her dependents (spouse and children) for whom immigrant status is sought or has been granted.

    c. The country of nationality of each alien investor who has made an investment and filed an EB-5/I-526 petition with USCIS.

    d. The U.S. city and state of residence (or intended residence) of each alien investor who has made an investment and filed an EB-5/I-526 petition with USCIS.

    e. For each alien investor listed in item 4.a., above, identify the following:

        i. the date(s) of investment in the commercial enterprise;

        ii. the amount(s) of investment in the commercial enterprise; and

        iii. the date(s), nature, and amount(s) of any payment/remuneration/profit/return on investment made to the alien investor by the commercial enterprise and/or regional center

from when the investment was initiated to the present.

5. Identify/list each of the target industry categories of business activity within the geographic boundaries of your regional center that have:

    a. received alien investors' capital, and in what aggregate amounts;

    b. received non-EB-5 domestic capital that has been combined and invested together, specifying the separate aggregate amounts of the domestic investment capital;

    c. of the total investor capital (alien and domestic) identified above in 5.a and 5.b, identify and list the following:
        i. The name and address of each "direct" job creating commercial enterprise.
        ii. The industry category for each indirect job creating investment activity.

6. Provide:

    a. The total aggregate number of approved EB-5 alien investor I-526 petitions per each Federal Fiscal Year to date made through your regional center.

    b. The total aggregate number of approved EB-5 alien investor I-829 petitions per each Federal Fiscal Year to date through your regional center.

7. The total aggregate sum of EB-5 alien capital invested through your regional center for each Federal Fiscal Year to date since your approval and designation.

8. The combined total aggregate of "new" direct and/or indirect jobs created by EB-5 investors through your regional center for each Federal Fiscal Year to date since your approval and designation.

9. If applicable, the total aggregate of "preserved" or saved jobs by EB-5 alien investors into troubled businesses through your regional center for each Federal Fiscal Year to date since your approval and designation.

10. If for any given Federal Fiscal Year your regional center did or does not have investors to report, then provide:

    a. a detailed written explanation for the inactivity,

    b. a specific plan which specifies the budget, timelines, milestones and critical steps to:

i. actively promote your regional center program,

ii. identify and recruit legitimate and viable alien investors, and

iii. a strategy to invest into job creating enterprises and/or investment activities within the regional center.

11. Regarding your website, please provide a hard copy which represents fully what your regional center has posted on its website, as well as providing your web address. Additionally, please provide a packet containing all of your regional center's hard copy promotional materials such as brochures, flyers, press articles, advertisements, etc.

If your submission is more than several pages, please use acco-fasteners to attach the documents at the top of each page, and separately tab the written materials/responses which you submit for each of the eleven (11) questions listed above.

Additionally, this letter of request affords you the opportunity to declare your intent to update and amend your original proposal and designation to reflect changes in the Pilot Program pursuant to amendments in the statute in 2000, 2002, and 2003. As such, in responding to this letter, you may also apprise USCIS in writing under a separate tab of any plans and intent to amend your regional center proposal and designation.

Finally, please be aware that it is incumbent on each USCIS approved and designated regional center, in order to remain in good standing, to notify the USCIS Regional Center Program within 15 business days at USCIS.ImmigrantInvestorProgram@dhs.gov of any change of address or occurrence of any material change in:

- the name and contact information of the responsible official and/or Point of Contact (POC) for the RC
- the management and administration of the RC,
- the RC structure,
- the RC mailing address, web site address, email address, phone and fax number,
- the scope of the RC operations and focus,
- the RC business plan,
- any new, reduced or expanded delegation of authority , MOU, agreement, contract, etc. , with another party to represent or act on behalf of the RC,
- the economic focus of the RC, or
- any material change relating to your regional center's basis for its most recent designation and/or reaffirmation by USCIS.

NOTE: Failure to respond to this request within 45 days of the date of this letter or to provide the requested information may result in USCIS initiating an intent to terminate action against your regional center designation with appropriate notification to the Department of State and all other appropriate Federal Government agencies.

Should you have any questions regarding this request please contact the USCIS Regional Center Program directly by email or courier service at the following address:

Re: Notification Regarding Change in Ownership of Gulf Coast Funds Management Regional Center

Dear Ms. Velarde:

On August 18, 2008 the USCIS issued to Gulf Coast Funds Management, LLC ("GCFM, LLC") a regional center approval and designation (the "Approval") for the Gulf Coast Funds Management Regional Center ("GCFM"). Pursuant to the reporting requirements set forth in the Approval, GCFM, LLC hereby notifies the USCIS of a change of ownership of GCFM, LLC.

GCFM, LLC has issued [ ] membership interests ("Units"). The current ownership structure of GCFM, LLC is as follows:

(b)(4)

(b)(6)

(b)(6) (b)(4)

(b)(6) (b)(4)

[redacted] (b)(4)

The changes described above are the only changes being made to GCFM. Given significant corporate, financial and immigration experience of the new GCFM owner and management team, coupled with the ongoing consulting services provided by two of GCFM's original founders, GCFM will clearly continue to meet the statutory requirements of the Immigrant Investor Pilot Program by serving the purpose of promoting economic growth, improving regional productivity, creating jobs, and increasing domestic capital investment.

Please contact me if you have any questions. Please also update the EB-5 chart on the USCIS website to reflect this change in ownership.

Sincerely,

[redacted] (b)(6)

Re: Proposal for Designation of Gulf Coast Funds Management (GCFM) as a USCIS recognized Regional Center under the Immigrant Investor Pilot Program

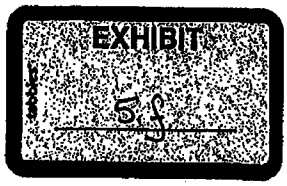
BACKGROUND:

Pursuant to Section 610 of the Appropriations Act of 1993, on January 17, 2008, Gulf Coast Funds Management (GCFM) submitted a proposal seeking approval and designation by U.S. Citizenship and Immigration Services (USCIS) of the GCFM Regional Center (GCFM-RC), with a geographic area focusing on the entirety of the states of Mississippi and Louisiana. The GCFM-RC for EB-5 Immigrant Investor purposes shall focus investment in the following three target industry economic clusters:

1. Shipbuilding;
2. Food Processing; and
3. Manufacturing.

The initial proposal contained the following evidence in support of its requested designation:

- A Job Creation Analysis and Econometric Model prepared by a professional economic analysis firm which specifically calculates but excludes construction jobs from the detailed prediction;
- A business plan reflecting the timing, scale and planned use of the alien investor capital;
- A sample Private Placement Memorandum;
- A sample Operating Agreement;
- A sample Subscription Agreement; and
- A sample Management Agreement.



DECISION:

Based on its review and analysis of your January 17, 2008 proposal, and of your response to the USCIS Request For Evidence of August 1, 2008, to which you provided a supplemental business plan, and a more in-depth and comprehensive economic and job creation analysis relating to the two-state scope and economic impacts, USCIS hereby approves and designates GCFM as a Regional Center within the Immigrant Investor Pilot Program with a geographic scope which includes the entire states of Mississippi and Louisiana.

FOCUS OF INVESTMENT ACTIVITY AND CAPITAL INVESTMENT THRESHOLD:

The USCIS-approved focus of the GCFM-RC business plan and job creation analysis and multipliers is to generate immigrant investor capital into the following target industry commercial enterprise activities within Mississippi and Louisiana:

1. Shipbuilding;
2. Food Processing; and
3. Manufacturing.

As such, aliens seeking immigrant visas through the Immigrant Investor Pilot Program may file individual petitions with USCIS for these commercial enterprises located within the GCFM-RC area comprised of the states of Mississippi and Louisiana. The geographic focus of this area contains numerous High Unemployment Targeted Employment Areas (TEA) as designated by the States of Mississippi and Louisiana, and rural TEA's as defined in 8 CFR 204.6(e). Therefore, the minimum capital investment threshold for any individual immigrant investment into an approved commercial enterprise throughout the Regional Center shall be not less than $500,000, if the investment target is located within a TEA or $1,000,000 if located outside of a TEA.

EMPLOYMENT CREATION:

Immigrant investors who file petitions for commercial enterprises located in the GCFM-RC area must fulfill all of the requirements set forth in 8 CFR 204.6, except that the petition need not show that the new commercial enterprises created ten new jobs indirectly as a result of the immigrant investor's investment. This determination has been established by way of USCIS' acceptance of the final economic analysis that is contained as part of the approved GCFM-RC proposal and its indirect job creation model and multipliers contained within the final approved GCFM-RC application package.

In addition, where job creation or preservation of existing jobs is claimed based on a multiplier rooted in underlying new "direct jobs" in support of an immigrant investor's individual I-526 petition affiliated with the GCFM-RC, then:

- To be credited with projected creation of new "direct" jobs for "qualifying employees" upon filing the I-526 petition, then the petition must be supported by a comprehensive detailed business plan and supporting financial, marketing and related data and analysis providing a reasonable basis for projecting creation of any new direct jobs for "qualifying employees" to be achieved/realized within two years pursuant to 8 CFR 204.6(j)(4)(B).

For purposes of an alien investor's filing of a subsequent I-829 petition to remove the conditions wherein the investment through the GCFM-RC in an enterprise for which the initial I-526 petition approval involved the creation of new direct jobs or the creation of new indirect jobs based on a multiplier tied to underlying new direct jobs, then to support the full number of direct and indirect new jobs being claimed at that point, an alien's subsequent I-829 petition will need to be supported by probative evidence of the number of new direct full time (35 hours per week) for qualified employees whose positions have been created as a result of the alien's investment. Such evidence may include copies of quarterly state employment tax reports, Forms W-2, Forms I-9, and any other pertinent employment records sufficient to demonstrate the number of qualified employees whose jobs were created directly.

Each individual petition, in order to demonstrate that it is associated with the GCFM-RC , in conjunction with addressing all the requirements for an individual immigrant investor petition, shall also contain as supporting evidence relating to this amended regional center designation, the following:

1. A copy of this letter for the GCFM-RC approval and designation.

2. A copy of the USCIS approved regional center narrative proposal and business plan.[1]

3. A copy of the job creation methodology required in 8 CFR 204.6(j)(4)(iii), as contained in the final regional center economic analysis which has been approved by USCIS, which reflects that investment by an individual immigrant investor will create not fewer than ten (10) full-time employment positions, either directly or indirectly, per each immigrant investor.

4. A legally executed copy of the USCIS approved:

    a. Private Placement Memorandum;
    b. Subscription Agreement;

[1]With respect to an individual I-526 individual investor petition, for any large scale high impact investor manufacturing or processing projects such as a shipyard, other large-scale manufacturing or processing plants, the detailed business plan should also address or reflect those project critical factors associated with infrastructure required to support operations on the scale proposed, in terms of roads, rail tracks and facilities, port capacity, water, sewage, electrical power capacity to meet the projected demand imposed by the envisioned facility, fire fighting services and capabilities, and environmental impact issues.

c. Operating Agreement; and
d. Management Agreement.

DESIGNEE'S RESPONSIBILITIES INHERENT IN CONDUCT OF THE GCFM-RC REGIONAL CENTER:

The law, as reflected in the regulations at 8 CFR 204.6(m)(6), requires that an approved regional center in order to maintain the validity of its approval and designation must continue to meet the statutory requirements of the Immigrant Investor Pilot Program by serving the purpose of promoting economic growth, including increased export sales (where applicable), improved regional productivity, job creation, and increased domestic capital investment. Therefore, in order for USCIS to determine whether your regional center is in compliance with the above cited regulation, and in order to continue to operate as a USCIS approved and designated regional center, your administration, oversight, and management of your regional center shall be such as to monitor all investment activities under the sponsorship of your regional center and to maintain records, data and information on a quarterly basis in order to report to USCIS upon request the following year to date information for each Federal Fiscal Year[2], commencing with the initial year as follows:

1. Provide the principal authorized official and point of contact of the regional center responsible for the normal operation, management and administration of the regional center.

2. Be prepared to explain how you are administering the regional center and how you will be actively engaged in supporting a due diligence screening of its alien investors' lawful source of capital and the alien investor's ability to fully invest the requisite amount of capital.

3. Be prepared to explain the following:

   a. How the regional center is actively engaged in the evaluation, oversight and follows up on any proposed commercial activities that will be utilized by alien investors.

   b. How the regional center is actively engaged in the ongoing monitoring, evaluation, oversight and follows up on any investor commercial activity affiliated through the regional center that will be utilized by alien investors in order to create direct and/or indirect jobs through qualifying EB-5 capital investments into commercial enterprises within the regional center.

4. Be prepared to provide:

   a. the name, date of birth, petition receipt number, and alien registration number (if one

[2] A Federal Fiscal Year runs for twelve consecutive months from October 1st to September 30th.

has been assigned by USCIS) of each principal alien investor who has made an investment and has filed an EB-5/I-526 Petition with USCIS, specifying whether:

i. the petition was filed,
ii. is pending,
iii. was approved,
iv. denied, or
v. withdrawn by the petitioner, together with the date(s) of such event.

b. The total number of visas represented in each case for the principal alien investor identified in 4.a. above, plus his/her dependents (spouse and children) for whom immigrant status is sought or has been granted.

c. The country of nationality of each alien investor who has made an investment and filed an EB-5/I-526 petition with USCIS.

d. The U.S. city and state of residence (or intended residence) of each alien investor who has made an investment and filed an EB-5/I-526 petition with USCIS.

e. For each alien investor listed in item 4.a., above, identify the following:

i. the date(s) of investment in the commercial enterprise;

ii. the amount(s) of investment in the commercial enterprise; and

iii. the date(s), nature, and amount(s) of any payment/remuneration/profit/return on investment made to the alien investor by the commercial enterprise and/or regional center from when the investment was initiated to the present.

5. Be prepared to identify/list each of the target industry categories of business activity within the geographic boundaries of your regional center that have:

a. received alien investors' capital, and in what aggregate amounts;

b. received non-EB-5 domestic capital that has been combined and invested together, specifying the separate aggregate amounts of the domestic investment capital;

c. of the total investor capital (alien and domestic) identified above in 5.a and 5.b, identify and list the following:
i. The name and address of each "direct" job creating commercial enterprise.
ii. The industry category for each indirect job creating investment activity.

6. Be prepared to provide:

a. The total aggregate number of approved EB-5 alien investor I-526 petitions per each

Federal Fiscal Year to date made through your regional center.

b. The total aggregate number of approved EB-5 alien investor I-829 petitions per each Federal Fiscal Year to date through your regional center.

7. The total aggregate sum of EB-5 alien capital invested through your regional center for each Federal Fiscal Year to date since your approval and designation.

8. The combined total aggregate of "new" direct and/or indirect jobs created by EB-5 investors through your regional center for each Federal Fiscal Year to date since your approval and designation.

9. If applicable, the total aggregate of "preserved" or saved jobs by EB-5 alien investors into troubled businesses through your regional center for each Federal Fiscal Year to date since your approval and designation.

10. If for any given Federal Fiscal Year your regional center did or does not have investors to report, then provide:

    a. a detailed written explanation for the inactivity,

    b. a specific plan which specifies the budget, timelines, milestones and critical steps to:

        i. actively promote your regional center program,

        ii. identify and recruit legitimate and viable alien investors, and

        iii. a strategy to invest into job creating enterprises and/or investment activities within the regional center.

11. Regarding your website, if any, please be prepared to provide a hard copy which represents fully what your regional center has posted on its website, as well as providing your web address. Additionally, please provide a packet containing all of your regional center's hard copy promotional materials such as brochures, flyers, press articles, advertisements, etc.

12. Finally, please be aware that it is incumbent on each USCIS approved and designated regional center, in order to remain in good standing, to notify the USCIS Foreign Trader, Investor & Regional Center Program within 15 business days at USCIS.ImmigrantInvestorProgram@dhs.gov of any change of address or occurrence of any material change in:

- the name and contact information of the responsible official and/or Point of Contact (POC) for the RC

- the management and administration of the RC,
- the RC structure,
- the RC mailing address, web site address, email address, phone and fax number,
- the scope of the RC operations and focus,
- the RC business plan,
- any new, reduced or expanded delegation of authority, MOU, agreement, contract, etc. with another party to represent or act on behalf of the RC,
- the economic focus of the RC, or
- any material change relating to your regional center's basis for its most recent designation and/or reaffirmation by USCIS.

If you have any questions concerning the GCFM-RC approval and designation under the Immigrant Investor Pilot Program, please contact the USCIS Foreign Trader, Investor and Regional Center Program by Email at USCIS.ImmigrantInvestorProgram@dhs.gov.

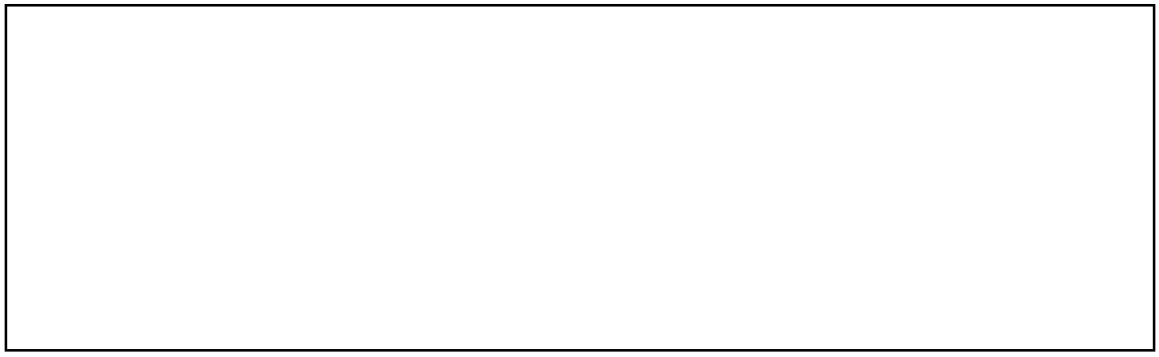
Importance: High

Kathy, Mr. David Lu is an immigration lawyer with over 15 years experience, and his law firm has worked with GCFM and marketing firms to ensure that a pre-screening for GTA project is done diligently. My understanding of the process is as follows.

David, please correct me if I missed anything.

Steps in EB-5 program for GTA project:

(b)(4) [redacted]



Hope this clarifies your questions.

Gary

(b)(6)

Kathy,

The attached questionnaire have been used to screen the investors' funds source since beginning of GTA project. Both documents are in Chinese. Hope this answers your questions.

Thank you for your attention on this matter.

Gary

Re: Proposal for Designation of Gulf Coast Funds Management (GCFM) as a USCIS recognized Regional Center under the Immigrant Investor Pilot Program

BACKGROUND:

Pursuant to Section 610 of the Appropriations Act of 1993, on January 17, 2008, Gulf Coast Funds Management (GCFM) submitted a proposal seeking approval and designation by U.S. Citizenship and Immigration Services (USCIS) of the GCFM Regional Center (GCFM-RC), with a geographic area focusing on the entirety of the states of Mississippi and Louisiana. The GCFM-RC for EB-5 Immigrant Investor purposes shall focus investment in the following three target industry economic clusters:

1. Shipbuilding;
2. Food Processing; and
3. Manufacturing.

The initial proposal contained the following evidence in support of its requested designation:

- A Job Creation Analysis and Econometric Model prepared by a professional economic analysis firm which specifically calculates but excludes construction jobs from the detailed prediction;
- A business plan reflecting the timing, scale and planned use of the alien investor capital;
- A sample Private Placement Memorandum;
- A sample Operating Agreement;
- A sample Subscription Agreement; and
- A sample Management Agreement.

DECISION:

Based on its review and analysis of your January 17, 2008 proposal, and of your response to the USCIS Request For Evidence of August 1, 2008, to which you provided a supplemental business plan, and a more in-depth and comprehensive economic and job creation analysis relating to the two-state scope and economic impacts, USCIS hereby approves and designates GCFM as a Regional Center within the Immigrant Investor Pilot Program with a geographic scope which includes the entire states of Mississippi and Louisiana.

FOCUS OF INVESTMENT ACTIVITY AND CAPITAL INVESTMENT THRESHOLD:

The USCIS-approved focus of the GCFM-RC business plan and job creation analysis and multipliers is to generate immigrant investor capital into the following target industry commercial enterprise activities within Mississippi and Louisiana:

1. Shipbuilding;
2. Food Processing; and
3. Manufacturing.

As such, aliens seeking immigrant visas through the Immigrant Investor Pilot Program may file individual petitions with USCIS for these commercial enterprises located within the GCFM-RC area comprised of the states of Mississippi and Louisiana. The geographic focus of this area contains numerous High Unemployment Targeted Employment Areas (TEA) as designated by the States of Mississippi and Louisiana, and rural TEA's as defined in 8 CFR 204.6(e). Therefore, the minimum capital investment threshold for any individual immigrant investment into an approved commercial enterprise throughout the Regional Center shall be not less than $500,000, if the investment target is located within a TEA or $1,000,000 if located outside of a TEA.

EMPLOYMENT CREATION:

Immigrant investors who file petitions for commercial enterprises located in the GCFM-RC area must fulfill all of the requirements set forth in 8 CFR 204.6, except that the petition need not show that the new commercial enterprises created ten new jobs indirectly as a result of the immigrant investor's investment. This determination has been established by way of USCIS' acceptance of the final economic analysis that is contained as part of the approved GCFM-RC proposal and its indirect job creation model and multipliers contained within the final approved GCFM-RC application package.

In addition, where job creation or preservation of existing jobs is claimed based on a multiplier rooted in underlying new "direct jobs" in support of an immigrant investor's individual I-526 petition affiliated with the GCFM-RC, then:

- To be credited with projected creation of new "direct" jobs for "qualifying employees" upon filing the I-526 petition, then the petition must be supported by a comprehensive detailed business plan and supporting financial, marketing and related data and analysis providing a reasonable basis for projecting creation of any new direct jobs for "qualifying employees" to be achieved/realized within two years pursuant to 8 CFR 204.6(j)(4)(B).

For purposes of an alien investor's filing of a subsequent I-829 petition to remove the conditions wherein the investment through the GCFM-RC in an enterprise for which the initial I-526 petition approval involved the creation of new direct jobs or the creation of new indirect jobs based on a multiplier tied to underlying new direct jobs, then to support the full number of direct and indirect new jobs being claimed at that point, an alien's subsequent I-829 petition will need to be supported by probative evidence of the number of new direct full time (35 hours per week) for qualified employees whose positions have been created as a result of the alien's investment. Such evidence may include copies of quarterly state employment tax reports, Forms W-2, Forms I-9, and any other pertinent employment records sufficient to demonstrate the number of qualified employees whose jobs were created directly.

Each individual petition, in order to demonstrate that it is associated with the GCFM-RC , in conjunction with addressing all the requirements for an individual immigrant investor petition, shall also contain as supporting evidence relating to this amended regional center designation, the following:

1. A copy of this letter for the GCFM-RC approval and designation.

2. A copy of the USCIS approved regional center narrative proposal and business plan.[1]

3. A copy of the job creation methodology required in 8 CFR 204.6(j)(4)(iii), as contained in the final regional center economic analysis which has been approved by USCIS, which reflects that investment by an individual immigrant investor will create not fewer than ten (10) full-time employment positions, either directly or indirectly, per each immigrant investor.

4. A legally executed copy of the USCIS approved:

    a. Private Placement Memorandum;
    b. Subscription Agreement;

[1]With respect to an individual I-526 individual investor petition, for any large scale high impact investor manufacturing or processing projects such as a shipyard, other large-scale manufacturing or processing plants, the detailed business plan should also address or reflect those project critical factors associated with infrastructure required to support operations on the scale proposed, in terms of roads, rail tracks and facilities, port capacity, water, sewage, electrical power capacity to meet the projected demand imposed by the envisioned facility, fire fighting services and capabilities, and environmental impact issues.

c. Operating Agreement; and
d. Management Agreement.

DESIGNEE'S RESPONSIBILITIES INHERENT IN CONDUCT OF THE GCFM-RC REGIONAL CENTER:

The law, as reflected in the regulations at 8 CFR 204.6(m)(6), requires that an approved regional center in order to maintain the validity of its approval and designation must continue to meet the statutory requirements of the Immigrant Investor Pilot Program by serving the purpose of promoting economic growth, including increased export sales (where applicable), improved regional productivity, job creation, and increased domestic capital investment. Therefore, in order for USCIS to determine whether your regional center is in compliance with the above cited regulation, and in order to continue to operate as a USCIS approved and designated regional center, your administration, oversight, and management of your regional center shall be such as to monitor all investment activities under the sponsorship of your regional center and to maintain records, data and information on a quarterly basis in order to report to USCIS upon request the following year to date information for each Federal Fiscal Year[2], commencing with the initial year as follows:

1. Provide the principal authorized official and point of contact of the regional center responsible for the normal operation, management and administration of the regional center.

2. Be prepared to explain how you are administering the regional center and how you will be actively engaged in supporting a due diligence screening of its alien investors' lawful source of capital and the alien investor's ability to fully invest the requisite amount of capital.

3. Be prepared to explain the following:

   a. How the regional center is actively engaged in the evaluation, oversight and follows up on any proposed commercial activities that will be utilized by alien investors.

   b. How the regional center is actively engaged in the ongoing monitoring, evaluation, oversight and follows up on any investor commercial activity affiliated through the regional center that will be utilized by alien investors in order to create direct and/or indirect jobs through qualifying EB-5 capital investments into commercial enterprises within the regional center.

4. Be prepared to provide:

   a. the name, date of birth, petition receipt number, and alien registration number (if one

[2] A Federal Fiscal Year runs for twelve consecutive months from October 1st to September 30th.

has been assigned by USCIS) of each principal alien investor who has made an investment and has filed an EB-5/I-526 Petition with USCIS, specifying whether:

i. the petition was filed,
ii. is pending,
iii. was approved,
iv. denied, or
v. withdrawn by the petitioner, together with the date(s) of such event.

b. The total number of visas represented in each case for the principal alien investor identified in 4.a. above, plus his/her dependents (spouse and children) for whom immigrant status is sought or has been granted.

c. The country of nationality of each alien investor who has made an investment and filed an EB-5/I-526 petition with USCIS.

d. The U.S. city and state of residence (or intended residence) of each alien investor who has made an investment and filed an EB-5/I-526 petition with USCIS.

e. For each alien investor listed in item 4.a., above, identify the following:

i. the date(s) of investment in the commercial enterprise;

ii. the amount(s) of investment in the commercial enterprise; and

iii. the date(s), nature, and amount(s) of any payment/remuneration/profit/return on investment made to the alien investor by the commercial enterprise and/or regional center from when the investment was initiated to the present.

5. Be prepared to identify/list each of the target industry categories of business activity within the geographic boundaries of your regional center that have:

a. received alien investors' capital, and in what aggregate amounts;

b. received non-EB-5 domestic capital that has been combined and invested together, specifying the separate aggregate amounts of the domestic investment capital;

c. of the total investor capital (alien and domestic) identified above in 5.a and 5.b, identify and list the following:
i. The name and address of each "direct" job creating commercial enterprise.
ii. The industry category for each indirect job creating investment activity.

6. Be prepared to provide:

a. The total aggregate number of approved EB-5 alien investor I-526 petitions per each

Federal Fiscal Year to date made through your regional center.

b. The total aggregate number of approved EB-5 alien investor I-829 petitions per each Federal Fiscal Year to date through your regional center.

7. The total aggregate sum of EB-5 alien capital invested through your regional center for each Federal Fiscal Year to date since your approval and designation.

8. The combined total aggregate of "new" direct and/or indirect jobs created by EB-5 investors through your regional center for each Federal Fiscal Year to date since your approval and designation.

9. If applicable, the total aggregate of "preserved" or saved jobs by EB-5 alien investors into troubled businesses through your regional center for each Federal Fiscal Year to date since your approval and designation.

10. If for any given Federal Fiscal Year your regional center did or does not have investors to report, then provide:

    a. a detailed written explanation for the inactivity,

    b. a specific plan which specifies the budget, timelines, milestones and critical steps to:

        i. actively promote your regional center program,

        ii. identify and recruit legitimate and viable alien investors, and

        iii. a strategy to invest into job creating enterprises and/or investment activities within the regional center.

11. Regarding your website, if any, please be prepared to provide a hard copy which represents fully what your regional center has posted on its website, as well as providing your web address. Additionally, please provide a packet containing all of your regional center's hard copy promotional materials such as brochures, flyers, press articles, advertisements, etc.

12. Finally, please be aware that it is incumbent on each USCIS approved and designated regional center, in order to remain in good standing, to notify the USCIS Foreign Trader, Investor & Regional Center Program within 15 business days at USCIS.ImmigrantInvestorProgram@dhs.gov of any change of address or occurrence of any material change in:

    - the name and contact information of the responsible official and/or Point of Contact (POC) for the RC

- the management and administration of the RC,
- the RC structure,
- the RC mailing address, web site address, email address, phone and fax number,
- the scope of the RC operations and focus,
- the RC business plan,
- any new, reduced or expanded delegation of authority, MOU, agreement, contract, etc. with another party to represent or act on behalf of the RC,
- the economic focus of the RC, or
- any material change relating to your regional center's basis for its most recent designation and/or reaffirmation by USCIS.

If you have any questions concerning the GCFM-RC approval and designation under the Immigrant Investor Pilot Program, please contact the USCIS Foreign Trader, Investor and Regional Center Program by Email at USCIS.ImmigrantInvestorProgram@dhs.gov.

Sincerely,

Barbara Q. Velarde

Frequently Asked Questions

How much would I need to invest to receive a visa for myself and my family members?
If you invest in a regional center, like ours, you need to invest $500,000. There is also a administrative fee required for an investment in a fund.

What is the region covered by the Gulf Coast Funds regional center?
Our regional center covers the largest geographical region in the EB-5 visa program. It covers the entire states of Louisiana and Mississippi.

Do I have to live in Louisiana or Mississippi to participate in this program?
No. You do not have to live in Louisiana or Mississippi. You do not even have to ever visit the region.

When will I have to make my investment into one of the GCFM managed funds?
Once you have signed an investment agreement with an agent of GCFM, the investor will deposit his or her money into a designated account in the United States. Here, you can choose to put your money into escrow or you can choose to put it directly in the fund. If you choose the former, we will place your investment in escrow, pending approval of your filing. If you choose latter, the money will begin to be put to work immediately through investments in our regional center.

What is the escrow arrangement for my cash?
Your money will be placed in escrow in a United States national bank. It will be invested only in U.S. government securities that are highly liquid. If, for any reason, your application for a visa is not approved, we will return your initial investment and administrative fee, if any, to you.

What do I have to do to get my visa application approved?
Normally, you will get an American immigration lawyer to help you in the visa application process. If you do not have an immigration lawyer, we can recommend a lawyer to you based on which fund you are investing into. For more information on the particular counsels which we suggest for each fund, please reference the fund specific pages on this website. The lawyer will help you file an I-526 petition. I-526. With your I-526 petition, you will have to submit proof that the source of your $500,000 investment is lawful. You will also have to submit the same type of documentation that other visa applicants to the United States are required to submit. Here is a general description, from the U.S. government's web site, of certain requirements for receiving a visa:

> **VISA INELIGIBILITY / WAIVER**
> The immigration laws of the United States, in order to protect the health, welfare, and security of the U.S., prohibit the issuance of a visa to certain applicants. Examples of applicants who must be refused visas are those who: have a communicable disease, or have a dangerous physical or mental disorder; have committed serious criminal acts; are terrorists, subversives, members of a totalitarian party, or former Nazi war criminals; have used illegal means to enter the U.S.; or are ineligible for citizenship. Some former exchange visitors must live abroad for two years. Physicians who intend to practice medicine must pass a qualifying exam before receiving immigrant visas. If found to be ineligible, the consular officer will advise the applicant of any waivers.
>
> **OTHER IMPORTANT INFORMATION**
>
> **Documents for Visa Application**
> All applicants must submit certain personal documents such as passports, birth certificates, police certificates, and other civil documents, as well as evidence that they will not become public charges in the United States. The consular officer will inform visa applicants of the documents needed as their applications are processed.
>
> **Medical Examinations**
> Before the issuance of an immigrant visa, every applicant, regardless of age, must undergo a medical examination. The examination will be conducted by a physician designated by the consular officer. Examination costs must be borne by the applicant, in addition to the visa fees.
>
> **Visa Fees**
> The cost of each immigrant visa application may vary for additional visa fees apply. For up to date immigration visa fee costs, please consult your immigration attorney or please visit the USCIS fee schedule web page.
>
> *Source: www.uscis.gov*

How will my money be invested?
Your money will be invested in one of our regional center funds chosen by you. These funds will invest in a variety of businesses headquartered in the states of Louisiana and Mississippi. We will invest in industries that have historically been successful in our region, such as shipbuilding, agribusiness and manufacturing. For more information on the specific funds, please reference the particular fund descriptions on this website. In order to meet the immigration goals of the EB-5 regional center program, our investments must help businesses create at least ten new direct, indirect and induced jobs for every $500,000 we invest.

What is the regional center Fund's investment strategy?
Our first and foremost obligation is to invest in businesses that actually create the ten jobs that each of our investors needs in order to meet the requirements of the EB-5 regional center program. We will also seek investments that offer attractive rates of return.

How will the investments be structured?

We will make investments that are in the form of equity or debt, or a combination of both. We will seek to have input in the overall governance of the companies we invest in, and hope to help those companies achieve success.

Who will manage the regional center Fund?
Each Fund is limited to 100 investors. The day-to-day management of the regional center Fund will be handled by our management company.

When will my visa become permanent?
Two years after you receive your initial visa, you must apply for a permanent green card. At that time, we will join in your application to show that your money has been invested in the region and that it has had the effect of creating ten direct, indirect and induced jobs. Once your application is approved, you will be a permanent resident of the United States, and may soon apply for full citizenship if you desire.

Where can I get information about investing in the Fund?
If you are interested in investing in the Fund, and want to receive financial information about the Fund, you can click here to register as a potential investor. Information will be given exclusively to potential investors who live outside of the United States or who certify that they are accredited investors within the meaning of the Securities and Exchange Commission rules and regulations.

Who can I call if I have questions about the Fund?
Please feel free to email us at any time info@gulfcoastfunds.com.

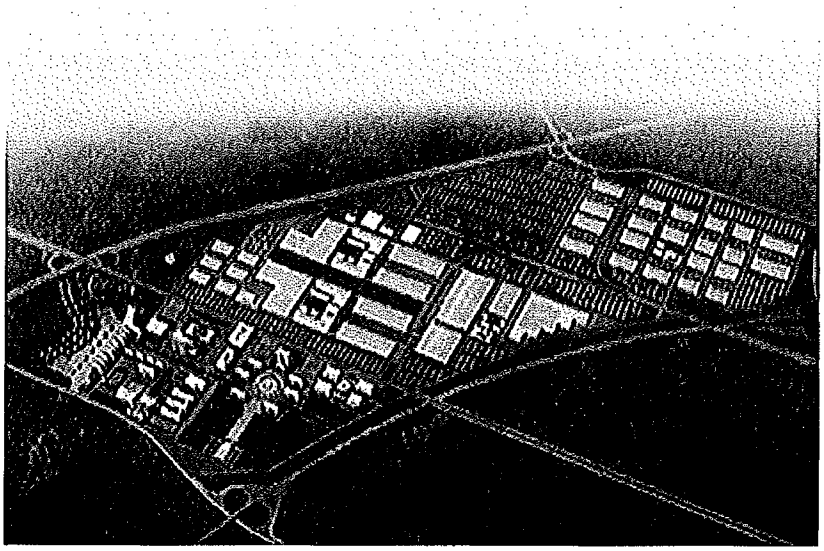
Gulf Coast Automotive Fund A-1



Capital Wealth Holdings Limited, a British Virgin Island company, is authorized to be the exclusive placement agent for Gulf Coast Automotive Fund A-1. The Fund will invest all of the proceeds of this offering in GreenTech Automotive preferred stock. GreenTech Automotive will invest the funds it receives, along with substantial funds from other sources, in designing, building and operating an automotive plant, which builds a new line of vehicles with reduced fuel consumption and emission.

GreenTech Automotive was incorporated in Mississippi, U.S. in 2008 to engage in the development, production, marketing, and financing of energy-efficient and environmentally friendly vehicles. Its main operations will be based in Mississippi, a right-to-work state, on a mega-site of approximately 3,500 acres, or 14.2 km2, with convenient access to major transportation systems. The targeted full production capacity is one million vehicles per year, with four production lines: compact cars, midsize cars, full sized cars, and SUVs. Each production line will have different models depending on the market demand. GreenTech Automotivewill start production by the end of 2011 or the beginning of 2012 and reach full production capacity of one million vehicles by 2015. With full production, GreenTech Automotive will hire approximately 25,000 employees, realize annual revenues of up to $33 billion and have an average operating margin of approximately 8%. If full production of one million vehicles is realized, the Mississippi facility will be one of the largest automobile manufacturing plants in the world.

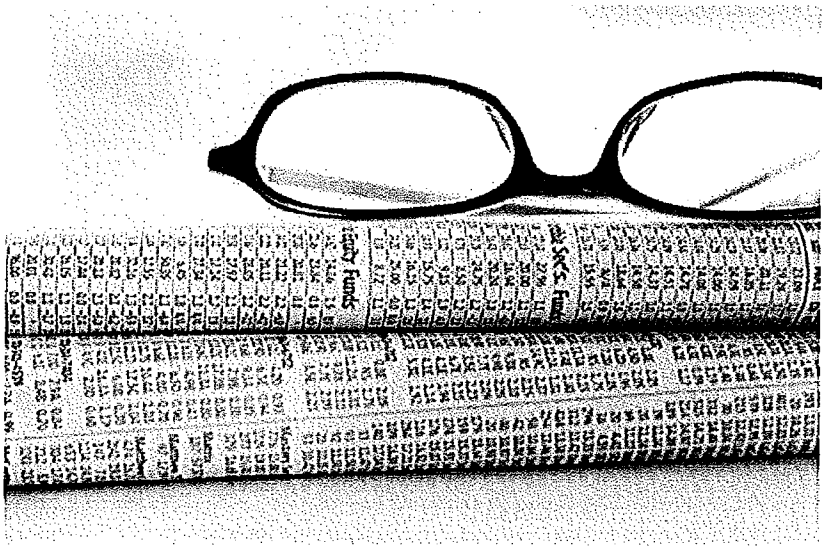
Our Relationship with Immigration Counsel



You will need to file your personal application for an EB-5 visa, and you should be represented by a U.S. immigration lawyer. If you do not have immigration counsel, we are happy to recommend our immigration council, Miller Mayer, LLP. Miller Mayer can handle the EB-5 I-526 petition filing and any other legal needs you may have in securing permanent residency status in the U.S. We work closely with Miller Mayer because they serve as immigration counsel to the Fund and the management company. You can reach Miller Mayer by phone at 607.273.4200 or through the firm's website: www.millermayer.com.

Investors in our Gulf Coast Automotive Fund A-1, LLC will be represented by a team of immigration attorneys with David Z. Lu as the lead counsel.

Why Are We A Good Partner?

As a regional center, GCFM spans across the states of Louisiana and Mississippi which is the largest geographical region in the EB-5 visa program. While many regional centers only invest in one project, GCFM will use a "funds-approach" that will combine the security of the job-creation needed to fulfill the EB-5 requirements with a diverse investment portfolio.

Why Gulf Coast Funds Management

We are unlike any other regional center because of the experience of our management team, our business model and the geographic scope of our region. Our funds offer competitive returns and will be managed by an experienced management company.

Most of our investment funds will be diversified, which provides more comfort to our investors that their immigration goals will be met and their capital will be returned. We intend to pay very competitive returns on capital invested in our regional center. We will concentrate on investments in the manufacturing, shipbuilding and food processing industries, which are prevalent in the region and provide dependable sources of job creation. Our regional center spans over two states, Louisiana and Mississippi, making our region the largest regional center in the EB-5 program.

Our Investment Fund Strategy

In order to achieve our objectives, we will use our long-standing history of successful investing in Louisiana and Mississippi. We will use our knowledge of the region to make investments in projects that will create enough jobs for you to receive your permanent residency status and provide strong opportunities for capital preservation and potential capital appreciation. The officers of the management company have participated in the business communities of Louisiana and Mississippi for more than 75 years and have established a network of contacts and relationships within the two states. We will invest in a series of projects including large projects with a proven track record of success that leverage other sources of capital in order to ensure that all of your requirements are met. We will establish a series of funds to serve the immigrant investor community. Additional information, including the specific investment strategy for each Fund, is available on this website.

Offering restrictions

"Offering restrictions" means:

Each distributor agrees in writing:

That all offers and sales of the securities prior to the expiration of the distribution compliance period specified in Category 2 or 3 (paragraph (b)(2) or (b)(3)) in Rule 903, as applicable, shall be made only in accordance with the provisions of Rule 903 or Rule 904; pursuant to registration of the securities under the Act; or pursuant to an available exemption from the registration requirements of the Act; and

For offers and sales of equity securities of domestic issuers, not to engage in hedging transactions with regard to such securities prior to the expiration of the distribution compliance period specified in Category 2 or 3 (paragraph (b)(2) or (b)(3)) in Rule 903, as applicable, unless in compliance with the Act; and

All offering materials and documents (other than press releases) used in connection with offers and sales of the securities prior to the expiration of the distribution compliance period specified in Category 2 or 3 (paragraph (b)(2) or (b)(3)) in Rule 903, as applicable, shall include statements to the effect that "These securities have not been registered under the Securities Act of 1933 and may not be offered or sold in the United States or to U.S. persons (other than distributors) unless the securities are registered under the Securities Act, or an exemption from the registration requirements of the Act is available. Hedging transactions involving these securities may not be conducted unless in compliance with the Securities Act." Such statements shall appear:

1. On the cover or inside cover page of any ppm or offering circular used in connection with the offer or sale of the securities;
2. In the offering section of our ppm or offering circular used in connection with the offer or sale of the securities; and
3. In any advertisement made or issued by the issuer, any distributor, any of their respective affiliates, or any person acting on behalf of any of the foregoing. Such statements may appear in summary form on prospectus cover pages and in advertisements.

Offshore transaction

An offer or sale of securities is made in an "offshore transaction" if:

The offer is not made to a person in the United States; and

Either:

At the time the buy order is originated, the buyer is outside the United States, or the seller and any person acting on its behalf reasonably believe that the buyer is outside the United States; or

For purposes of:

Section Rule 903, the transaction is executed in, on or through a physical trading floor of an established foreign securities exchange that is located outside the United States; or

Section Rule 904, the transaction is executed in, on or through the facilities of a designated offshore securities market described in paragraph (b) of this section, and neither the seller nor any person acting on its behalf knows that the transaction has been pre-arranged with a buyer in the United States.

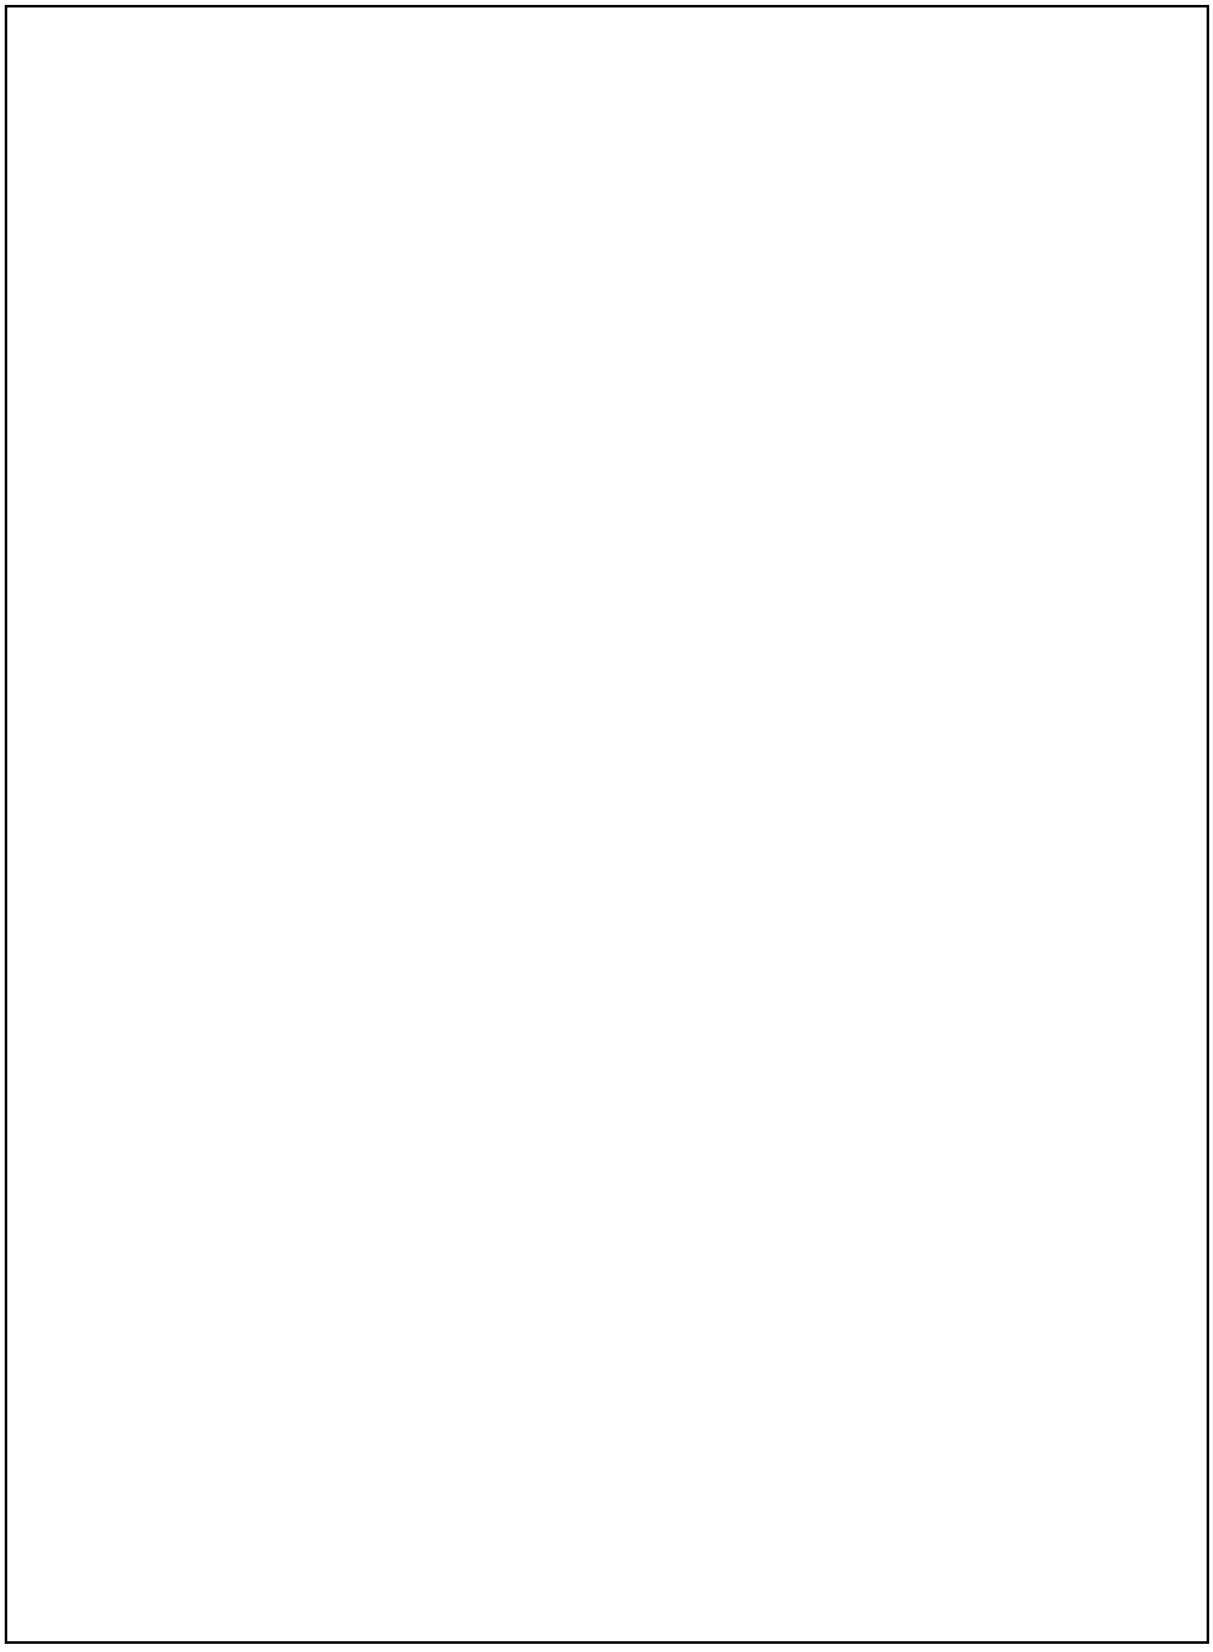
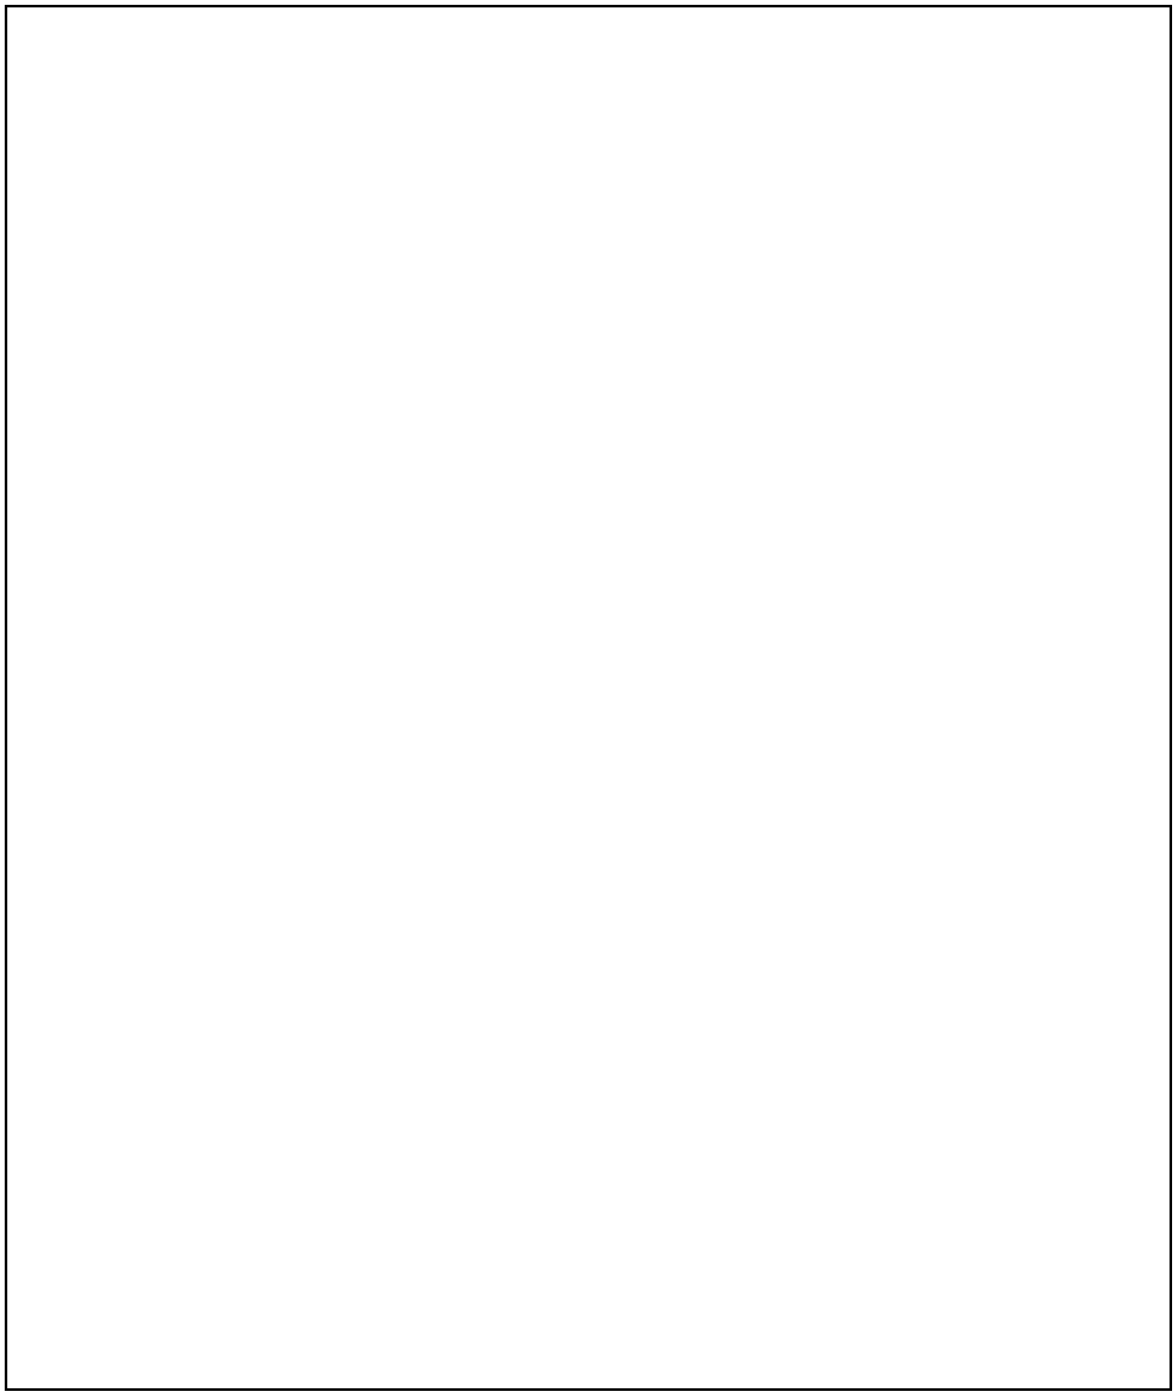
OFFERING MEMORANDUM



(b)(4)



(b)(4)

(b)(4)

SUMMARY

The Offering

The EB-5 Immigrant Investor Program

EB-5 visas may be issued to immigrants and their immediate families by investing in an approved "regional center" projects such as our Fund. A foreign investor may apply for a conditional immigration status to live, work and study in the United States, once his or her investment is made. If the Fund invests this money in businesses within the region that create at least ten new jobs within two years, the immigrant investors receive permanent resident status in the United States, and eventually become eligible for U.S. citizenship, should they so choose. In the section of this offering memorandum entitled "Frequently Asked Questions about the EB-5 Visa Program," beginning on page 26, you will find a detailed discussion of the EB-5 program. You can also read about the program on our website: www.GulfCoastFunds.com.

Where You Can Find Additional Information

In addition to the information included in this Offering Memorandum, you can find information about GreenTech Automotive at www.wmgta.com. You can also find additional information about Gulf Coast Funds Management, LLC, the management company for our Fund, on the worldwide web at www.GulfCoastFunds.com. If you are qualified to subscribe for a Unit and would like to review our operating agreement, the management agreement between our Fund and our management company or other documentation relating to our Fund, we will make those documents available to you upon request. Please contact Taylor Beery at 1-866-448-8738 or by e-mail at tbeery@GulfCoastFunds.com to request additional information about this offering and contact David Z. Lu at 1-703-883-1858 or by e-mail at EB5@wmgta.com to request additional information about GreenTech Automotive.

(b)(4)

(b)(4)

Immigration risks

The investor himself and herself must meet the requirements under the EB-5 program. Each purchaser of a Unit must understand that the Fund, the management company and each of their affiliates make no representation or warranty of any kind concerning whether an investment in the Fund will meet the requirements of the EB-5 program or other U.S. immigration requirements. Each investor in a Unit must further understand that there can be no assurance that an investment in the Unit will result in his or her family receiving an EB-5 visa, conditional resident status or permanent resident

status. Please carefully consider the following immigration risks, and discuss these and other immigration risks with your personal immigration lawyer.

As a Unit holder, you will be subjected to certain general immigration risks faced by all immigrants to the United States.

The process of obtaining conditional resident status and permanent resident status involves many factors and circumstances that are not within the control of the Fund. These include the investor's past history and source of funds, immigration visa backlogs, potential changes in immigration laws and regulations (including laws and regulations specific to the EB-5 immigrant investor program) and quotas established by the United States government limiting the number of visas available to qualified individuals seeking conditional resident status under the EB-5 program. Although the Fund has been structured with the objective of providing Unit holders with eligibility for conditional and permanent resident status under the EB-5 regional center provisions of the U.S. immigration laws, no assurance can be given that each Unit holder will obtain approval of his or her particular immigrant application. Purchase of a Unit does not guarantee conditional or permanent residency in the United States. Furthermore, no assurances or advice can be given that conditional resident status will be converted to permanent resident status.

An investment in a Unit is only a part of the requirement for meeting EB-5 residency status. In addition, the USCIS will require that you pass a background check.

Each immigrant investor in the United States is subjected to a thorough background check. An EB-5 immigrant investor's background (or that of an immediate family member) may not meet the USCIS criteria for temporary or permanent residency in the United States. For example, among other criteria, the following may be grounds for denial of immigration benefits for the immigrant, and/or other members of the immigrant's family: having a communicable disease (e.g., AIDS) or other dangerous contagious disease; having been at any time involved with, trafficking in, or taking, illegal drugs; having been convicted of certain crimes; having committed a fraud or misrepresentation to a U.S. Government official; or having violated U.S. immigration law in the past.

As a result of participation in the EB-5 program and as a result of your investment in the Fund, you must pay income taxes in the United States on your world-wide income. You should consult your personal tax advisor about this obligation.

As an EB-5 participant, you will have to pay taxes in the United States on your world-wide income. As a member of the Fund, which is a limited liability company, your proportionate share of the Fund's income will be "passed-through" to you for U.S. Federal income tax purposes. You will also be required to include in income your proportionate share of the taxable income of the Fund for the purposes of any state of which you are a resident. Please consult your personal tax advisor about the tax consequences of an investment in the Fund. Further information about these matters is

included in this private placement memorandum under the heading "Certain U.S. Federal Income Tax Considerations," beginning on page 32.

As a Unit holder, you will have no rights to receive a dividend and limited voting rights.

The GreenTech Automotive preferred stock or debt that the Fund will invest in is not expected to pay any dividends. Therefore, the Fund will probably never have any funds with which to pay any dividends. Under the Fund's operating agreement, while the holders of Units will have certain voting rights, they will not have the right to replace the management company.

As a Unit holder, you will not have the right to transfer your Unit for five years, and no market for Units is likely ever to exist.

The Fund's operating agreement includes provisions that prohibit Unit holders from any transfer of their Units for five years after purchase. The only transfers that will be honored by the Fund during the initial five years of your investment are transfers that occur as a result of death. After five years, your Unit will automatically convert into common stock of GreenTech Automotive having an estimated fair market value of $555,000. If GreenTech Automotive's common stock is not publicly traded at that time, your investment will continue to be extremely illiquid.

The EB-5 regional center program is a U.S. government program that is highly regulated and that requires frequent interaction between the Fund and government officials.

The EB-5 regional center program was created by Congress, which has accorded broad regulatory powers to the Department of Homeland Security and in particular to the United States Citizenship and Immigration Service (USCIS). Currently, all EB-5 related filings are reviewed by USCIS adjudicators in the USCIS California service center. While the Fund will strive to coordinate with USCIS to achieve our investors' immigration goal, there can be no assurance that USCIS adjudicators will take a consistent position on issues arising under the program, and there can be no assurance that USCIS regulations will not change in the future. Since the laws, regulations and bureaucratic interpretations applicable to the Fund's investments are subject to change at any time, there can be no assurance that the Fund will not be required to substantially change its investment policies in the future. The EB-5 program could be discontinued or altered by Congress at any time.

It is a requirement of the EB-5 program that an immigrant investor's source of funds be proper, under U.S. immigration guidelines.

EB-5 immigrant investors must demonstrate to the USCIS that the funds they invest in the Units were obtained through lawful means. Each EB-5 immigrant investor must document, to the satisfaction of the USCIS and the U.S. State Department, that the

source of funds is acceptable. The Fund, and the EB-5 immigrant investor's immigration attorney, may make a preliminary assessment, but the ultimate decision will be made solely by USCIS and the U.S. State Department. Each EB-5 immigrant investor must agree to provide information and documents to the Fund, and to allow the Fund to make further investigation, concerning the EB-5 immigrant investor's source of funds and the personal and business background of the EB-5 immigrant investor and accompanying family members.

Achieving your immigration goal of conditional and permanent resident status will require you to maintain your primary residence in the United States.

EB-5 immigrant investors who obtain conditional resident status or permanent resident status must intend to make the United States their primary residence. Conditional residents or permanent residents who maintain their primary residence outside the United States risk revocation of their U.S. residence status. Each prospective EB-5 immigrant investor should consult a competent immigration attorney to review the likelihood that the investor's immigration objectives will be achieved.

The Fund has to work with GreenTech Automotive to meet the job creation and retention requirements of the EB-5 program to ensure that sufficient jobs are created at the time when our investors file for the removal of the condition to their permanent residency.

For EB-5 immigrant investors to convert their temporary resident status to permanent resident status, the Fund's investments in any portfolio company must directly or indirectly create ten full-time jobs for each Unit sold within two years after the investor obtains conditional resident status. GreenTech Automotive eventually intends to directly hire 25,000 employees. The current economic study has shown that for each direct job created by GreenTech Automotive, there will be 11.86 indirect and induced jobs created, sufficient to support 25,000 EB-5 immigration applications. Based on the current economic analysis and GreenTech Automotive's business plan, there should be sufficient jobs for each Unit holder to achieve his or her immigration goal, but there can be no assurance that GreenTech Automotive will raise sufficient capital to implement its business plan, or do so within the required time period.

The foregoing risks do not purport to be a complete explanation of all the risks involved in acquiring a Unit. The Fund assumes no obligation (and specifically disclaims any such obligation) to update these Risk Factors or any other forward-looking statements to reflect actual results, changes in assumptions or other factors affecting such forward-looking statements. Potential investors are urged to read this entire document and the operating agreement of the Fund and conduct his or her own evaluation of an investment in GreenTech Automotive before deciding whether to invest in the Fund.

THE EB-5 PROGRAM

Overview

In 1990, the U. S. Congress created the employment based 5th preference (EB-5) immigrant investor visa program. The EB-5 program offers 10,000 immigrant visas a year to qualified investors who wish to obtain residence in the United States by investing in businesses that will benefit the economy and create jobs. The EB-5 Immigrant Investor Regional Center Pilot Program ("The Pilot Program") was created by Congress in 1992 and sets aside 3,000 of the 10,000 EB-5 visas each year for people who invest in designated "regional centers."

Once a qualifying investment has been made in a regional center, an investor files a Form I-526 Immigrant Petition by Alien Entrepreneur, ("Form I-526") with the USCIS. After the USCIS approves I-526 petition, an investor files an adjustment of status application if he or she is already in the U.S. in valid non-immigrant status or ii) applies for an interview and entry visa at a U.S. embassy or consulate abroad ("consular processing"). When an adjustment of status application is approved, a conditional residence status of two years will be given to the investor. If the investor pursues consular processing, upon approval the investor and his or her family will be issued an EB-5 entry visa to the U.S. Once they enter the U.S., the two-year conditional residence status starts.

At the end of the two-year conditional resident period the investor must show that his or her investment has been sustained and the projects invested in by the regional center have created at least ten jobs for each investor. Assuming the investor provides that evidence, the USCIS will remove the conditional residence status, and the investor will receive his or her permanent residency status.

The Immigration Process

The Fund's primary role in the immigration process is to sell interests in the Fund to immigrant investors (which allow the investors to file Form I-526) and invest the investors' capital in a manner that is consistent with the EB-5 program and leads to the creation of at least ten jobs for each Unit holder in the Fund. If GreenTech Automotive's proposed business plan succeeds, our independent economist's report indicates that GreenTech Automotive will create enough jobs to meet the EB-5 program requirements for every investor in the Fund. The rest of the immigration process will be led by the immigrant investor and his or her independent immigration counsel. The management company will maintain a current record of jobs created by the Fund's investment activities. The management company will assist each Unit holder by providing information about job creation to the USCIS in the manner required by the EB-5 program. Upon the initial conditional residency filing, the Fund will certify to the USCIS with respect to the projected number of jobs that will be created. Two years after an immigrant investor is granted conditional resident status, the investor must file with the USCIS Form I-829, Petition by Entrepreneur to Remove Conditions ("Form I-829") to convert his or her status to permanent residency. At that time, the Fund will allocate to

each Unit holder ten jobs from those jobs created and maintained by GreenTech Automotive.

Frequently Asked Questions

The following are some frequently asked questions about the EB-5 program, along with answers to the questions:

How much do I need to invest to receive conditional and ultimately permanent residency status for myself and my family members?
If you invest in a regional center, like ours, you need to invest $500,000 if the investment is made in a high unemployment or rural area. There are also other fees such as legal fees for your immigration and tax counsel and application fees paid to USCIS.

What is the region covered by the Gulf Coast Funds regional center?
Our regional center is the largest geographical regional center in the United States. It covers the entire states of Louisiana and Mississippi.

Do I have to live in Louisiana or Mississippi to participate in this program?
No. You do not have to live in Louisiana or Mississippi. You do not even have to ever visit the region.

When will I have to pay $555,000?
When you are ready to file your application for the I-526, you would send us $555,000.

What do I have to do to get my visa application approved?
Normally, you will get an American immigration lawyer to help you in the visa application process. If you do not have an immigration lawyer, the Placement Agent suggests that you use David Z. Lu, Esq., an immigration lawyer with whom we work with on a regular basis. The lawyer will help you file a Form I-526. With your Form I-526, you will have to submit proof that the source of your $500,000 investment is lawful.

Once the USCIS approves your Form I-526 you will need to adjust your status if you are already living in the U.S. in non-immigrant status or you will have to schedule an interview at a U.S. embassy or consulate abroad. In either case, you will have to submit the same type of documentation that other visa applicants to the United States are required to submit. Here is a general description, from the U.S. government's web site, of certain requirements for receiving a visa:

> **VISA INELIGIBILITY / WAIVER**
> The immigration laws of the United States, in order to protect the health, welfare, and security of the U.S., prohibit the issuance of a visa to certain applicants. Examples of applicants who must be refused visas are those who: have a communicable disease, or have a dangerous physical or mental disorder; have committed serious criminal acts; are terrorists, subversives, members of a totalitarian party, or former Nazi war criminals; have used illegal means to enter the U.S.; or are ineligible for citizenship. Some former exchange visitors must

live abroad for two years. Physicians who intend to practice medicine must pass a qualifying exam before receiving immigrant visas. If found to be ineligible, the consular officer will advise the applicant of any waivers.

OTHER IMPORTANT INFORMATION

Documents for Visa Application
All applicants must submit certain personal documents such as passports, birth certificates, police certificates, and other civil documents, as well as evidence that they will not become public charges in the United States. The consular officer will inform visa applicants of the documents needed as their applications are processed.

Medical Examinations
Before the issuance of an immigrant visa, every applicant, regardless of age, must undergo a medical examination. The examination will be conducted by a physician designated by the consular officer. Examination costs must be borne by the applicant, in addition to the visa fees.

Visa Fees
The cost of each immigrant visa application may vary for additional visa fees apply. For up to date immigration visa fee costs, please consult your immigration attorney or please visit the USCIS fee schedule web page.

Source: www.uscis.gov

How will my money be invested?
Your money will be invested in our regional center Fund, which will re-invest your money in GreenTech Automotive. To meet the immigration goals of the EB-5 regional center program, GreenTech Automotive must create at least 10 new jobs (both direct and indirect or induced jobs) for every $500,000 we invest.

How will the investment in GreenTech Automotive be structured?
All of the proceeds of this offering will be invested in convertible preferred stock or debt of GreenTech Automotive. We will receive one share of convertible preferred stock or debt for each $500,000 we invest in GreenTech Automotive. Investors will be charged a $55,000 administrative fee at the time that the Unit is purchased. This administrative fee is to pay legal and other administrative fees associated with marketing the Units world-wide. Five years after each such investment, each share of convertible preferred stock or debt will be automatically converted into shares of common stock of GreenTech Automotive having an estimated fair market value of $555,000.

When will my visa become permanent?
Two years after you receive your conditional resident status, you must apply for permanent residency. At that time, we will supply documents for your Form I-829 petition to show that your money has been invested in the region and that the Fund's

investment has created at least ten jobs. Once your application is approved, you will become a permanent resident of the United States, and may soon apply for full citizenship if you desire.

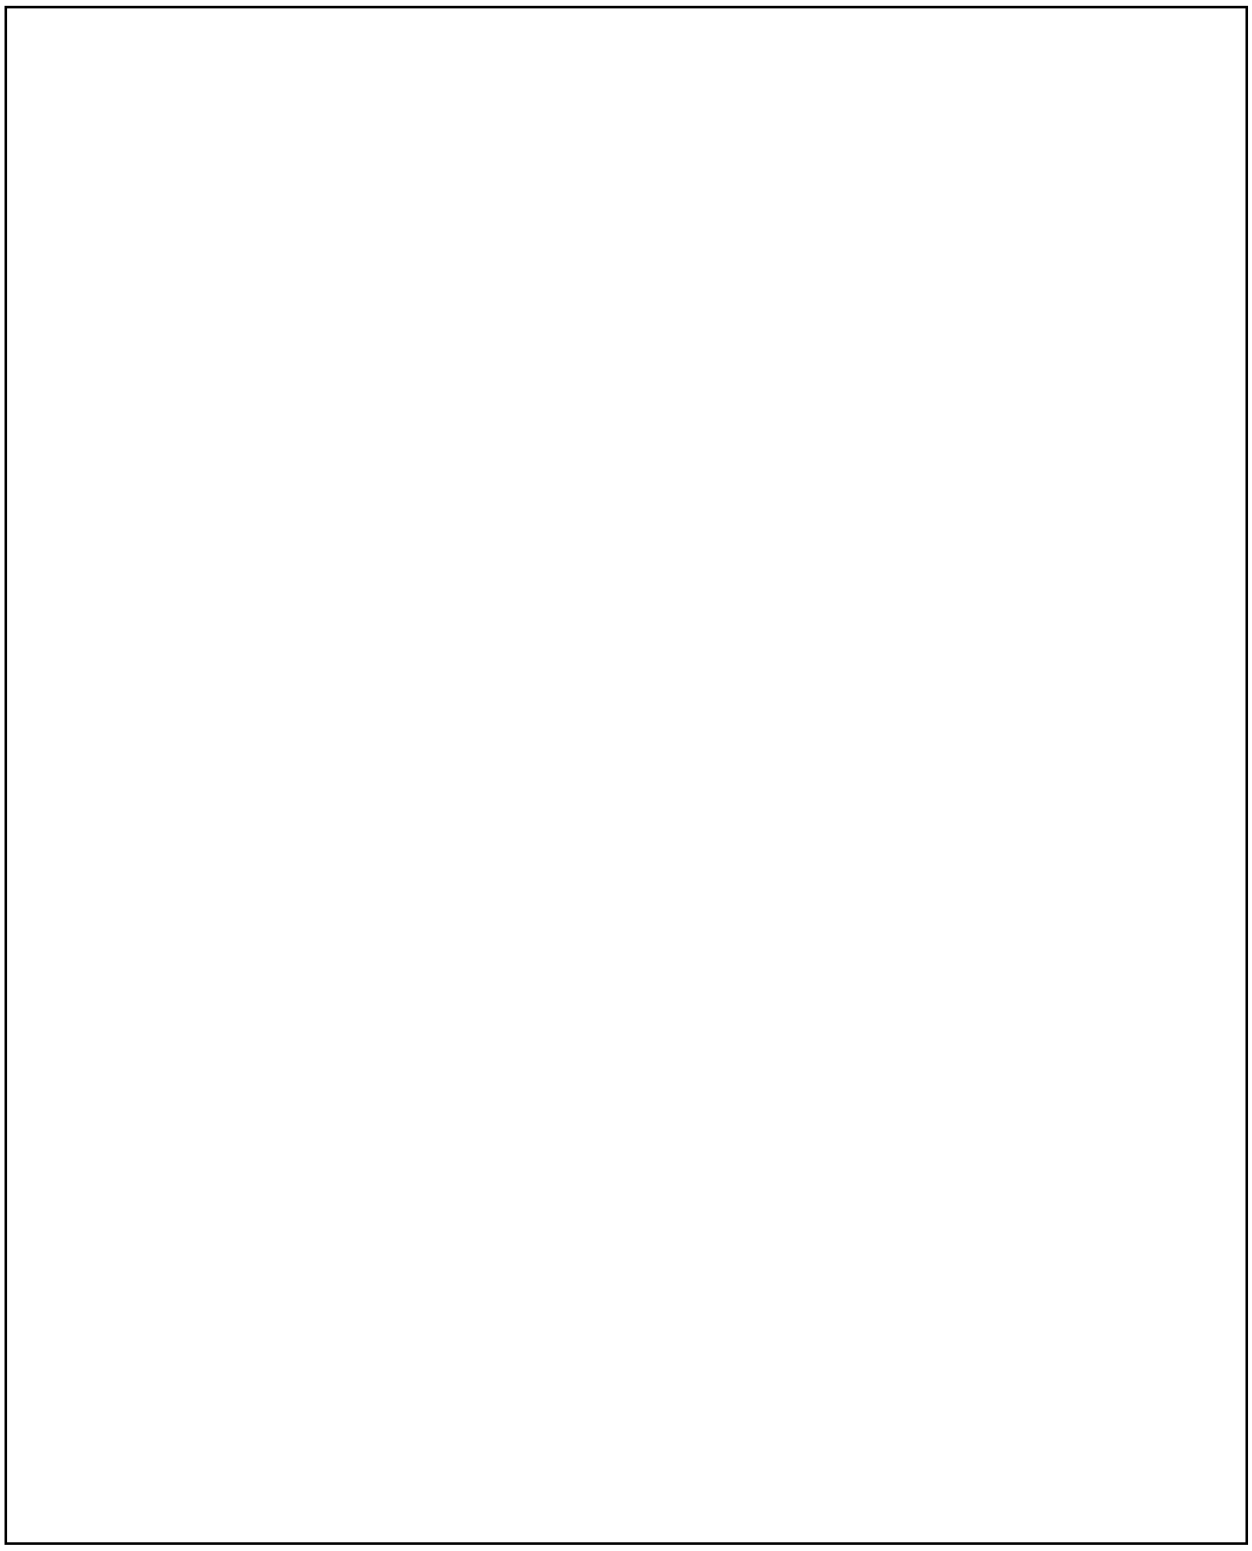
RIGHTS OF UNIT HOLDERS



(b)(4)

(b)(4)

CERTAIN U.S. FEDERAL INCOME TAX CONSIDERATIONS

The following discussion about certain U.S. federal income tax and other tax considerations that you should weigh prior to investing in a Unit is merely a presentation of certain tax issues that generally apply to all investors in EB-5 funds. You should not consider this discussion to be tax advice, applicable to your particular situation or a full discussion of all material United States, state, local and foreign tax consequences of an investment in the Fund or your status as U.S. tax resident or non-resident and you should consult with your personal tax advisor about these, and all other issues relevant to your personal decision to invest in a Unit. Neither the Fund nor the management company is qualified to provide the tax advice you will need. You cannot use this summary for the purpose of avoiding United States federal tax penalties.

The following discussion is based upon the Internal Revenue Code of 1986 (the "Code"), the applicable Treasury Regulations promulgated or proposed under the Code (the "Regulations"), current positions of the IRS contained in published revenue rulings and revenue procedures, current administrative positions of the IRS, and existing judicial decisions, as in effect on the date of this Memorandum, all of which are subject to change or modification, with or without retroactive effect, at any time.

No assurance can be given as to the future status of federal income tax laws or other tax laws as they pertain to limited liability companies of the type described herein. It is likely that changes to the Code will be proposed in the future. The effect of such proposals on the Fund and on an investment therein cannot be analyzed. Accordingly, potential investors are urged to consider on-going developments regarding changes in the federal income tax law and other tax laws and to consult their own advisors in assessing the risks associated with an investment in the Fund.

Classification of the Fund

The Fund will be treated as a partnership for federal income tax purposes under the "check the box" Regulations. Under these regulations, an unincorporated domestic entity, such as the Fund, with at least two members will be taxed as a partnership if no election is made to be taxed as a corporation. Accordingly, the discussion herein relating to partnerships and partners generally will be applicable to Unit holders in the Fund.

Partnership Taxation in General

Under the Code, a partnership pays no federal income tax, although it may be required to withhold and pay taxes on behalf of certain of its partners. Rather, each partner reports on his federal income tax return his distributive share of all items of income, gain, loss, deduction, credit and tax preference of the partnership, whether or not the partnership makes any actual distribution to the partner during the taxable year. Thus, it is possible that distributions from the Fund will not be sufficient to pay tax liabilities with respect to the tax income and gain allocated to a Unit holder and that the only source of payment of such tax liabilities would be from the Unit holder's funds from sources

other than the Fund.

The extent to which a Unit holder may utilize Fund losses in any tax year is limited to the adjusted tax basis of his interest in the Fund at the end of the Fund tax year (See "Basis of Units"). In addition, a Unit holder may not deduct Fund losses in excess of the amount the Unit holder is considered "at risk" with respect to the Fund under Code Section 465 (See "At Risk Limitations"). A Unit holder generally may use his distributive share of any partnership losses allowable after applying the foregoing loss limitation only to offset his income from other passive sources (see "Passive Activity Loss Limitations").

Basis of the Units

A Unit holder's initial tax basis for his Units will be the amount of money he contributes to the Fund.

A Unit holder's basis is his Units increased by (a) his share of the non-recourse liabilities of the Fund, and (b) his share of profits. The adjusted tax basis of his Units will be decreased, but not below zero, by (1) distributions to the Unit holder by the Fund; (ii) reductions in his share of the non-recourse obligations of the Fund; (iii) his share of the losses of the Fund; and (iv) his share of Fund expenditures not chargeable to his capital account.

Under Regulation Section 1.752-1(a)(2), a partnership liability is a non-recourse liability to the extent that no partner or related person (for the purpose of Regulation Section 1.752-4(b)) bears any economic risk of loss. A partnership liability generally is not considered non-recourse to the extent that any partner guarantees the payment of such liability. If a Unit holder or a "related" person guarantees all or a portion of the non-recourse liabilities of the Fund, the other Unit holders' tax basis in their Units will not include such guaranteed portion of the Fund's non-recourse liabilities.

Similarly, if a partner or a person related to a partner loans funds to a partnership and the other partners are not personally liable for the repayment of the loan, only the lending partners may include that loan in the basis of their partnership interests. For example, if a Unit holder or one of his affiliates makes a loan to the Fund, the other Unit holders would not include any portion of such a loan in the basis of their Units.

The Fund may be a "tiered" partnership if it owns interests in other entities taxed as partnerships for federal income tax purposes. With respect to "tiered" partnerships, the Regulations provide that the "upper-tier" partnership's share of the liabilities of the "lower-tier" partnership will be treated as liabilities of the upper-tier partnership for purposes of applying Code Section 752 to the partners of the upper-tier partnership (Regulation Section 1.752-4(a)).

If a Unit holder's basis in his Units is reduced to zero, the amount of any distributions (including any deemed distributions due to a reduction in Fund non-recourse

liabilities) in excess of his share of the Fund's taxable income for the year will be treated as capital gain, except to the extent that ordinary income treatment is required for his *pro rata* share of depreciation recapture.

A partner may not deduct his share of losses of a partnership to the extent such losses exceed the partner's basis for his interest in the partnership. Any losses that are not currently deductible by a partner due to this limitation may be deducted when and to the extent the partner's basis is increased (for example, by the allocation of partnership income). The ability of a partner to claim his share of partnership losses will also depend on the impact of the "at risk" rules of Code Section 465 (see "At Risk Limitations") and the passive activity loss limitation rules of Code Section 469 (see "Passive Activity Loss Limitations").

Allocations of Profits and Losses

Under Code Section 704, a partner's distributive share of the income, gain, loss, deduction, or credit of a partnership is determined by reference to the partnership agreement, unless the allocation contained in the agreement does not have "substantial economic effect," in which case the allocation is determined by reference to the partners' interests in the partnership, taking into account all facts and circumstances.

Although it is intended that the Fund's allocations will be in accordance with the Unit holders' interests in the Fund, it is possible that the Internal Revenue Service will challenge the Fund's tax allocations and attempt to reallocate tax items among the Unit holders. Any such reallocations of tax items may have adverse tax and financial consequences to a Unit holder.

"At Risk" Limitations

Code Section 465 limits the amount of losses that a partner can deduct in a particular year to the amount that such partner is considered "at risk" at the close of the partnership's taxable year. Generally, a taxpayer is considered "at risk" to the extent of (i) the amount of money and the adjusted basis of property he contributes to an activity, plus (ii) any amounts borrowed with respect to an activity for which the taxpayer is personally liable or for which the taxpayer has pledged property (other than property used in the activity) as security. A taxpayer will generally not be considered "at risk" with respect to amounts protected against loss through non-recourse financing, guarantees, stop loss agreements or similar arrangements.

A taxpayer generally is not considered to be "at risk" for non-recourse obligations. Losses not deductible by reason of the "at risk" rules may be carried forward indefinitely and deducted at such time as the taxpayer becomes "at risk" to a greater extent with respect to the activity.

Passive Activity Loss Limitations

Code Section 469 generally provides that losses attributable to "passive activities" may be used only to offset income from passive activities. Code Section 469 applies to individuals, estates, trusts, personal service corporations (corporations providing services that are substantially performed by owner-employees), and closely-held corporations (corporations having 5 or fewer shareholders who own more than 50% in value of the stock).

Code Section 469 defines a "passive activity" as (i) the conduct of a trade or business in which the taxpayer does not materially participate or (ii) any rental activity (without regard to participation). Under Code Section 469, the interest of a limited partner in a limited partnership is not considered an interest with respect to which a person materially participates, except as provided in regulations. Accordingly, a Unit holder's investment in the Fund will be a passive activity, and any Fund losses allocated to the Unit holders will constitute passive losses.

Under Code Section 469, passive losses generally may be used only to offset passive income until the taxable year in which the taxpayer disposes of his interest in the activity producing the passive losses.

Passive income is defined as the income from passive activities. Passive income does not include (i) income received as salary or wages; (ii) income derived from a trade or business in which the taxpayer materially participates ("active income"); (iii) interest, dividends, annuities or royalties ("portfolio income") not derived in the ordinary course of business; (iv) gain or loss from the disposition of property used in the ordinary course of business producing portfolio income; or (v) gain or loss from the disposition of property held for investment which is not considered to be an interest in a passive activity.

Passive losses that are not deductible in a particular year may be carried forward indefinitely and used to offset passive income in subsequent years. In addition, upon a fully taxable disposition of a taxpayer's entire interest in the passive activity (other than to a related party), any unused passive losses from the activity for the year that have been carried forward, and the loss, if any, on the disposition, may be applied first to offset any income from that activity for the year (including the gain, if any, from the disposition); second, to offset any other passive income for the year; and third, any remaining unused passive losses from the activity may be used to offset the taxpayer's active and portfolio income.

Based on the foregoing, a Unit holder may use any Fund losses allocated to him only to offset his passive income. If the Fund losses are not fully deductible in the year incurred, they may be applied against passive income (that is not portfolio income) in future years. If any unused losses from the Fund remain when the Unit holder disposes of his entire interest in the Fund, these losses may be used in full at such time, first against passive income, and then against any other income of the Unit holder.

The foregoing analysis assumes that the Fund constitutes a single "activity" for purposes of Code Section 469. If the Fund consisted of more than one activity, the passive activity loss limitations would apply separately to each such activity.

The Regulations provide flexibility in grouping a taxpayer's trade or business activities and rental activities for purposes of applying the passive activity rules. In this respect, one or more trade or business activities or rental activities may be treated as a single activity if the activities constitute an appropriate economic unit for the measurement of gain or loss for the purposes of Code Section 469. However, generally rental activities may not be grouped with a trade or business activity. Further, a taxpayer that owns an interest as a limited partner or limited entrepreneur (e.g., a member of an LLC who does not actively participate in the management of the LLC) may not group the following activities with any other activity: (i) holding, producing or distributing motion picture films or video tapes, (ii) farming, (iii) leasing personal property, (iv) exploring for or exploiting oil and gas resources, and (v) exploring for or exploiting geothermal deposits. A partnership must group its activities under the rules of the Regulations and once the partnership groups its activities, the partner may group those activities with each other, with activities conducted directly by the partner, and with activities conducted through other C corporations subject to Code Section 469, S corporations and partnerships, except that a partner may not treat activities grouped together by any 469 entity as separate activities.

Whether or not the Fund's activities are aggregated into a single activity should not affect a Unit holder's ability to offset passive losses from one Fund activity against passive income of another Fund activity. However, any previously suspended passive losses from a particular activity that is part of a single activity will not become deductible against non-passive income upon a disposition of that particular activity alone, but only upon a taxable disposition by the Fund of all of its interest in the single activity, or the Unit holder's disposition of his Units. Further, the Fund's debt investments or equity investments in C corporations may produce interest income or dividend income, respectively, that is classified as portfolio income for purposes of Code Section 469, and the Fund's other equity investments may produce losses classified as passive under Code Section 469, and in this situation a Unit holder's share of passive losses may not be utilizable to offset his share of portfolio income.

Distributions

Distributions (which include any deemed distribution arising from a reduction, by repayment or otherwise, in Fund liabilities) made to a Unit holder generally do not result in any recognition of gain for federal income tax purposes to the extent the amount of cash or debt reduction does not exceed the basis of the Unit holder's Units. A Unit holder's adjusted tax basis in his Units is reduced by the amount of the distribution. Distributions of cash (including reductions in liabilities) by the Fund in excess of a Unit holder's adjusted tax basis in his Units will result in the recognition of gain to the extent of such excess. Such gain is considered gain from the sale or exchange of the Units by

the Unit holder and in certain cases may be treated in part as ordinary income because of the depreciation recapture provisions. (see "Sale or Disposition of Units").

Sale or Disposition of Units

Upon a sale of a Unit, a Unit holder will realize gain or loss in an amount equal to the difference between the amount realized and his adjusted tax basis in the Unit. Under Code Section 751(a), any gain realized by a selling partner is taxed as ordinary income to the extent of the partner's *pro rata* share of "ordinary income assets" of the partnership. The balance of gain, if any, or the loss is treated as a capital gain or loss. In determining the amount received upon the sale or exchange of a Unit, a Unit holder must include, among other things, his allocable share of the outstanding amount of the indebtedness to which the Fund's property is subject. Therefore, it is possible that the gain realized on the sale of a Unit may exceed the cash proceeds of such sale. As a result, in some cases, the income taxes payable with respect to such gain may exceed such cash proceeds.

Certain Deductions to Be Claimed

Organization, Start-Up and Syndication Costs. Under the Code, neither a partnership nor its partners may deduct amounts paid or incurred in the promotion and sale of the interests in the partnership ("syndication" expenses), including those amounts paid as commissions, professional fees, and printing costs. These expenses must be capitalized and may not be amortized. Under the Regulations, the following expenses constitute non-deductible syndication expenses which must be capitalized and not amortized: (i) brokerage fees; (ii) registration fees; (iii) legal fees for securities advice and advice pertaining to the adequacy of tax disclosures in the offering memorandum for securities law purposes; (iv) accounting fees for the preparation of representations to be included in the offering memorandum; and (v) costs of printing the offering memorandum.

However, to the extent a partnership pays or incurs organizational expenses incidental to the creation of the partnership or start-up expenditures with respect to an active trade or business, the partnership generally may elect to capitalize such expenditures and amortize them ratably over a period of not less than 180 months, commencing in the month in which the partnership begins business. Organizational expenses include (i) legal fees for services incidental to the organization of the partnership, such as the negotiation and preparation of a partnership agreement; (ii) accounting fees for services incidental to the organization of the partnership, and (iii) filing fees. On the other hand, organizational expenses do not include (i) expenses incurred in connection with the acquisition of partnership assets or the transfer of assets to the partnership; (ii) syndication expenses; and (iii) certain other expenses. Start-up expenditures include (i) certain expenses related to the investigation of the creation or acquisition of an active trade or business; and (ii) expenses paid or incurred pursuant to the creation of an active trade or business, which expenses would be deductible if they were incurred after the commencement of the particular business operation to which they relate.

The Fund has incurred organizational expenses which it will elect to amortize over 180 months. Additionally, the Fund has incurred or may incur start-up expenditures which the Fund, if it is eligible to do so, intends to amortize over a 180 month period. Any costs incurred by the Fund associated with offering of the Units will be capitalized by the Fund as non-deductible syndication costs.

Other Limitations on Deductions. Other limitations may apply to reduce or eliminate the deductibility by a Unit holder of his share of the Fund's expenses, including fees paid to the management company. For example, to the extent deductions of the Fund are deemed not to be incurred in connection with a business, they will be treated as miscellaneous itemized deductions that, in the case of Unit holders, are deductible only to the extent that, when taken together with other similar deductions, they exceed 2% of the Unit holder's adjusted gross income. Also, miscellaneous itemized deductions are not deductible by a Unit holder in computing the Unit holder's alternative minimum tax.

Certain Tax Consequences to Non-United States Investors

Foreign Individuals Potentially Subject to U.S. Tax on Their Worldwide Income. Individuals who are not citizens of the United States but who are treated as "residents" of the United States for federal income tax purposes are subject to United States federal income tax on their worldwide income, including but not limited to their income from the Fund. For this purpose, an individual who is a lawful permanent resident of the United States (e.g., a holder of a "green card") generally will be treated as a resident. In addition, an individual who is not a lawful permanent resident under the immigration laws may nevertheless be a "resident" for tax purposes based upon a "substantial presence" in the United States as defined under Code Section 7701(b). For example, under that Code Section, an individual may be a "resident" if the individual is physically present in the United States on all or any part of a certain number of days, determined under a formula, within a three-year testing period. An individual present in the United States under certain types of temporary visas (e.g., teachers or students) may be excepted from the "substantial presence" test, but the determination whether an individual is a resident can be a complex determination. Potential investors who are foreign individuals should consult with their own tax advisors to be certain of their tax status under United States law.

Taxation of Non-U.S. Individuals Not Treated as Tax Residents. Potential investors who are neither citizens nor residents (as determined for tax purposes) of the United States ("Non-U.S. Investors") are subject to additional tax rules. Generally, Non-U.S. Investors are taxable on certain United States source passive investment income ("FDAP"), including dividends, interest and rents, at a flat rate of 30% on the gross amount of such income, without reduction for any expenses or other tax deductions, and that tax is satisfied by withholding of tax on payments of such amounts to the Non-U.S. Investors. In the case of a partnership, the partnership generally will be required to withhold based on the share of its FDAP allocable to its Non-U.S. Investors. The 30% tax on the gross amount of FDAP may be reduced or eliminated if the Non-U.S. Investor

is a resident of a country with which the United States has a bilateral income tax treaty, provide that the Non-U.S. Investor submits timely certification of his entitlement to treaty relief. Certain other exceptions apply which may reduce or eliminate the tax on certain types of FDAP, including interest income. Non-U.S. Investors generally are not subject to tax on capital gains unless either (1) the gains are attributable to a United States trade or business or (2) the Non-U.S. Investor is an individual who is present in the United States for more than 183 days during the taxable year in which the gains are realized.

The 30% taxation of FDAP will not apply to any income that is effectively connected with the active conduct of a trade or business within the United States. The net income from such a trade or business within the United States realized by a Non-U.S. Investor will be subject to tax at the regular graduated income tax rates applicable to resident individuals. Such income currently will be subject to income tax withholding, generally at a rate of 35%. A Non-U.S. Investor who realizes any such income will be required to file a United States federal income tax return with respect to the taxable year in which the income is realized.

A Non-U.S. Investor in the Fund who is allocated a share of passive income (including capital gain) or active trade or business income realized by the Fund will be subject to tax under the above rules as if such Non-U.S. Investor had realized such income directly. Any withholding of federal income taxes by the Fund attributable to a Non-U.S. Investor will be treated as a distribution to that particular Unit holder.

THE FOREGOING IS NOT A COMPLETE DISCUSSION OF ALL OF THE FEDERAL INCOME TAX CONSEQUENCES TO A NON-U.S. INVESTOR; THERE ARE STATE AND LOCAL TAX AND ESTATE TAX CONSEQUENCES TO BE CONSIDERED. ALSO, FOREIGN TAXES MAY BE IMPOSED ON A NON-U.S. INVESTOR'S INCOME FROM THE FUND. INVESTORS ARE STRONGLY ADVISED TO CONSULT WITH THEIR TAX ADVISORS WITH RESPECT TO THE TAX CONSEQUENCES OF AN INVESTMENT IN THE FUND.

Compliance Matters

Tax Returns/Audits. The Fund will furnish annually (and in certain circumstances, periodically) to each of the Unit holders sufficient information from the Fund's tax return for the Unit holders to prepare their own federal income tax returns.

The tax treatment of items of partnership income, loss, deduction, and credit will be determined at the partnership level. In addition, all partners are required, on their individual federal income tax returns, to treat partnership items in a manner that is consistent with the treatment of such items on the partnership's return.

The tax matters partner for the Fund will be the management company. The tax matters partner is required to, among other things, keep the other partners informed of all administrative and judicial proceedings and represent the Fund in such proceedings. The

tax matters partner is authorized to obtain judicial review of any proposed readjustment of partnership items. Although every partner with an interest in the outcome is allowed to participate in an action filed by the tax matters partner, the outcome of that proceeding will bind all partners. If the tax matters partner fails to seek judicial review of a proposed adjustment of partnership items, other partners may seek such review, provided that there can be only one judicial proceeding with respect to a partnership. The foregoing procedures may adversely affect a Unit holder's ability to deal with adjustments to his income tax return resulting from adjustments made with respect to the Fund.

If any of the tax returns of the Fund are audited, it is possible that substantial legal and accounting fees will have to be paid to substantiate the position of the Fund, and such fees would reduce the cash otherwise available to meet Fund obligations or for distribution to the Unit holders. Such an audit may result in adjustments to each Unit holder's income tax return. An audit of the Fund's tax returns may also result in an audit of non-partnership items on each Unit holder's income tax returns, which in turn could result in adjustments to such items. The costs incurred by a Unit holder in connection with an IRS audit of his income tax return will be borne solely by that Unit holder.

State and Local Taxes

In addition to federal income taxes, the Fund and the Unit holders may be subject to other taxes imposed by various jurisdictions, such as state and local income taxes. Although a detailed analysis of these various taxes is not presented here, investors should consider the potential state and local tax consequences of an investment in the Fund. For example, a Unit holder's distributive share of all or a portion of Fund income, gains, losses and deductions, profits and losses, may be required to be included in determining his income subject to tax under the laws of the state or locality in which he is a resident, as well as jurisdictions in which the Fund does business.

For example, with respect to Unit holders who are not residents of the State of Louisiana, if the Fund has Louisiana source income allocated to such Unit holders, the Fund will be required to file composite returns and make composite payments of tax on behalf of all of its Unit holders who are not residents of Louisiana. The current rate of the Louisiana composite tax is 6% and any composite payment on behalf of a non-resident Unit holder will be treated by the Fund as a distribution to the non-resident Unit holder.

The State of Mississippi also requires a partnership to withhold income tax on a non-resident partner's allocable share of Mississippi source income. The Fund will withhold at the required withholding rate (currently 5%) of Mississippi source income allocable to Unit holders who are not residents of Mississippi. Any such withholding will be treated by the Fund as a distribution to the non-resident Unit holder. The withholding by a partnership does not relieve the non-resident partner of his obligation to file a Mississippi income tax return. A partnership is allowed to file a composite return on behalf of non-resident partners who have no activity in Mississippi other than that from the partnership. If a composite filing is allowable with respect to a non-resident partner and the composite return is properly filed and all taxes, including applicable interest and

penalty is paid, the individual non-resident partner is relieved of his separate individual filing requirement. If the Fund elects to file a composite return on behalf of any non-resident Unit holders, the composite tax payment attributable to the non-resident will be treated as a distribution by the Fund to that non-resident Unit holder.

The Fund intends to supply the Unit holders with information regarding their income, if any, derived from various jurisdictions in which the Fund does business. Unit holders are urged to consult with their own tax advisors regarding state and local tax laws.

U.S. Federal Estate and Gift Taxation

U.S. residents generally are subject to federal estate taxes on their taxable estates at death which includes the value at the time of a decedent's death of all of his property, real or personal, tangible or intangible, wherever situated. Additionally, U.S. residents are subject to gift taxes on the transfer of any property by gift. U.S. estate taxes can also apply to a Non-U.S. Investor to tax that part of his gross estate which at the time of his death is situated in the United States. For example, shares of stock in a domestic U.S. corporation owned by a non-resident alien is treated as property situated in the United States for purposes of this provision. Further, the IRS has ruled that a partner's interest in a partnership is situated where the partnership's business is carried on for purposes of applying the U.S.-United Kingdom Estate Tax Convention. Thus, a Unit in the Fund held by a Non-U.S. Investor could possibly be subject to U.S. estate tax on the death of the Non-U.S. Investor.

Additionally, state and local taxing jurisdictions may also impose state, inheritance and/or gift taxes on their residents or on property deemed situated within their respective jurisdictions.

Re: Amendment of GCFM Application to include Virginia Tobacco Regions

Dear Ms. Velarde:

Gulf Coast Funds Management, LLC (GCFM), an approved Regional Center pursuant to Section 610 of the Appropriations Act of 1993, respectfully requests to include additional geographical areas covering the tobacco-dependent localities in the Commonwealth of Virginia for the following industries: manufacturing, education and training, research and development, and wholesale trade (international). The tobacco region consists of 41 localities in the South Central and Southwest regions of Virginia ("Tobacco Region", see attached *Exhibit A*), which was established to revitalize tobacco-dependent communities.

Communities and citizens throughout the Tobacco Region continue to experience significant economic distress as a direct consequence of historical dependence on tobacco production, textile and furniture manufacturing and coal production.

The credit crisis and difficult economy have resulted in more severe job losses in the Tobacco Region, where unemployment rates have historically been higher than other regions in Virginia. The Virginia Employment Commission has designated many areas within the Tobacco Region as Targeted Employment Areas, thus enabling them to benefit from the Immigrant Investor Pilot Program to accelerate the economic recovery and transformation in those areas.

The proposed expansion of GCFM's geographic coverage area is derived from the existing hybrid automobile manufacturing plan administered (the "Project") by GCFM through Gulf Coast Automotive Investment Fund A-1 (GCAIF A-1). The Project has moved forward with great speed and tremendous support from state and local governments due to its significant potential job creation. The company, GreenTech Automotive, Inc.

GULF COAST FUNDS MANAGEMENT

New Orleans, LA 70130

TELEPHONE: (504) 582-2244
FACSISMILE: (504) 582-2240

("GTA", formerly known as Hybrid Kinetic Automotive Corp) has recently revealed publicly its four prototype cars to be built in the United States, and broken ground on the construction of its manufacturing facilities in Tunica County, Mississippi. In the meantime, GTA has agreed to allocate part of its manufacturing operations, such as engine and transmission production, to the Tobacco Region, contingent on USCIS approval of this amendment application.

GCFM's request to amend its application to expand its geography to cover the Tobacco Regions in Virginia is based on the previously approved hybrid automobile manufacturing project managed by the same company, and merely re-allocates a portion of GTA's original planned production to Virginia. Therefore, the methodology for job multipliers described in the original independent economic study, which was approved by USCIS, should be applicable to the manufacturing facilities to be built in the Tobacco Region, and the overall impact would stay intact.

The EB-5 program is an effective way to attract private investment into the Tobacco Region, which would not only create many new jobs, but also provide much-needed diversification to the region's economy. The Virginia State government has thus far expressed strong support for the Project.

Therefore, GCFM respectfully requests the expansion of its geographic coverage area to include the entire Tobacco Region in Virginia, and the support of GTA in achieving its goal of manufacturing and distributing hybrid motor vehicles in the US.

The following documents are enclosed for your review:

1. Support letter from Governor of Virginia
2. TEA agency designation letter from Governor of Virginia
3. TEA designation letter from Virginia Employment Commission

NOTICE OF INTENT TO TERMINATE

This notice is in reference to the approved designation of Gulf Coast Funds Management, (the "Regional Center"), as a regional center in the Immigrant Investor Program (the "Program"). The purpose of this notice is to notify the Regional Center that, pursuant to 8 C.F.R. § 204.6(m)(6), U.S. Citizenship and Immigration Services ("USCIS") intends to terminate the participation of the Regional Center in the Program because it no longer serves the purpose of promoting economic growth.

(SEE ATTACHED)

Pursuant to 8 C.F.R. 204.6(m)(6), you are provided thirty (30) days from receipt of this notice of intent to terminate to offer evidence in opposition to the ground or grounds alleged.

Failure to respond within the time allotted may result in the termination of your designation for participation as a regional center in the Immigrant Investor Program.

Your deadline for submitting a response is: **March 18, 2018.**

Keep a photocopy of this notice for your records. If you otherwise write to us about your case, please provide a copy of this notice.

You will be notified separately about any other applications or petitions you have filed.

IMPORTANT: RETURN THIS ORIGINAL NOTICE ON TOP OF YOUR RESPONSE.

NOTICE OF INTENT TO TERMINATE

Form I-924, Application for Regional Center Designation Under the Immigrant Investor Program
Gulf Coast Funds Management, LLC

This notice is in reference to the approved designation of Gulf Coast Funds Management, LLC (the "Regional Center"), as a regional center in the Immigrant Investor Program (the "Program").[1] The purpose of this notice is to notify the Regional Center that, pursuant to 8 C.F.R. § 204.6(m)(6), U.S. Citizenship and Immigration Services ("USCIS") intends to terminate the designation of the Regional Center in the Program because:

- The Regional Center failed to provide USCIS with updated information annually, and/or as otherwise requested by USCIS, to demonstrate that the regional center is continuing to promote economic growth, including increased export sales, improved regional productivity, job creation, and increased domestic capital investment in the approved geographic area, using a form designated for this purpose; and

- The Regional Center failed to pay the fee provided by 8 CFR 103.7(b)(1)(i)(XX).

The regulation at 8 C.F.R. § 204.6(m)(6) (*Continued participation requirements for regional centers*) provides:

> (i) Regional centers approved for participation in the program must:
>
> > (A) Continue to meet the requirements of section 610(a) of the Appropriations Act.
> >
> > (B) Provide USCIS with updated information annually, and/or as otherwise requested by USCIS, to demonstrate that the regional center is continuing to promote economic growth, including increased export sales, improved regional productivity, job creation, and increased domestic capital investment in the approved geographic area, using a form designated for this purpose; and
> >
> > (C) Pay the fee provided by 8 CFR 103.7(b)(1)(i)(XX).
>
> (ii) USCIS will issue a notice of intent to terminate the designation of a regional center in the program if:

---

[1] *See* Section 610 of the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act, 1993, Pub. L. No. 102-395, 106 Stat. 1828 (1992), as amended (hereinafter "Appropriations Act").

(A) A regional center fails to submit the information required in paragraph (m)(6)(i)(B) of this section, or pay the associated fee; or

(B) USCIS determines that the regional center no longer serves the purpose of promoting economic growth, including increased export sales, improved regional productivity, job creation, and increased domestic capital investment.

(iii) A notice of intent to terminate the designation of a regional center will be sent to the regional center and set forth the reasons for termination.

(iv) The regional center will be provided 30 days from receipt of the notice of intent to terminate to rebut the ground or grounds stated in the notice of intent to terminate.

(v) USCIS will notify the regional center of the final decision. If USCIS determines that the regional center's participation in the program should be terminated, USCIS will state the reasons for termination. The regional center may appeal the final termination decision in accordance with 8 CFR 103.3.

(vi) A regional center may elect to withdraw from the program and request a termination of the regional center designation. The regional center must notify USCIS of such election in the form of a letter or as otherwise requested by USCIS. USCIS will notify the regional center of its decision regarding the withdrawal request in writing.

I. Procedural History

A. Initial Designation

On July 13, 2009, USCIS designated the Regional Center following approval of its application to participate in the Program (RCW1031910101). Based on the initial designation, the Regional Center obtained approval to promote economic growth under the Program in the following geographic regions:

Name of State	Counties
Louisiana	Statewide
Mississippi	Statewide

B. Amendments

The Regional Center filed four amendment to date.

C. Regional Center Projects

USCIS has received a total of [ ] Forms I-526, Immigrant Petition by Alien Entrepreneur, filed by petitioners asserting that they have invested capital in five new commercial enterprises each, "NCE"), associated with the Regional Center as shown in the table below. USCIS has approved [ ] of these Form I-526 petitions.

New Commercial Enterprise	Job-Creating Entity	Number of I-526 Petitions Filed	Number of I-526 Petitions Approved to Date
Greentech Automotive AKA Hybrid Kinetic Automotive Corp.	-		
Greentech Automotive Partnership A-3, LP	Greentech Automotive		
Greentech Automotive, Inc.	-		
GTA Fund A-2, LLC	-		
Gulf Coast Automotive Investment Fund A-1 LLC	-		
Totals	--		

D. Annual Reports (Forms I-924A)

The Regional Center has filed six Forms I-924A, Annual Certification of Regional Center. The table below summarizes the information that the Regional Center provided to USCIS in those forms regarding the claimed aggregate amount of capital investment from EB-5 petitioners associated with the Regional Center and the new direct, indirect, and/or induced jobs created through the regional center to date.

Fiscal Year	Receipt No.	Date Received	Aggregate EB-5 Capital Investment	Aggregate Direct/ Indirect Job Creation	Aggregate Jobs Maintained
2011	RCW1200450517	12/29/2011			
2012	RCW1300351038	01/03/2013			
2013	RCW1335751429	12/23/2013			
2014	RCW1435252147	12/18/2014			
2015	RCW1535653836	12/22/2015			
2016	RCW1634054613	12/05/2016			

II. Analysis

A. Failure to Submit Required Information to USCIS

The Regional Center failed to provide information to USCIS:

- Its annual Form I-924A filing for Federal fiscal year 2017 (October 1 through September 30) 2017.

Under 8 C.F.R. § 204.6(m)(6)(i)(B), a regional center must:

> Provide USCIS with updated information annually, and/or as otherwise requested by USCIS, to demonstrate that the regional center is continuing to promote economic growth, including increased export sales, improved regional productivity, job creation, and increased domestic capital investment in the approved geographic area, using a form designated for this purpose.

1. Failure to Timely File Form I-924A, Annual Certification of Regional Center

The Form I-924A Instructions state that each designated regional center must file a Form I-924A, Annual Certification of Regional Center, for each fiscal year (October 1 through September 30) within 90 days after the end of the fiscal year (on or before December 29 of the calendar year in which the fiscal year ended). The Form Instructions further state that failure to file Form I-924A in a timely manner for each Federal fiscal year in which the regional center has been designated to participate in the Program will result in the issuance of a notice of intent to terminate the participation of the regional center in the Program, which may ultimately result in the termination of the approval and designation of the regional center.

As of the date of this notice, USCIS records indicate that the Regional Center has not filed a Form I-924A for Federal fiscal year 2017. Due to the Regional Center's failure to file Form I-924A in a timely manner, as required by 8 C.F.R. § 204.6(m)(6)(i)(B) and the Form I-924A Instructions, USCIS intends to terminate the designation of the regional center in the Program.

III. Conclusion

USCIS has determined that the Regional Center has failed to submit required information to USCIS. Therefore, USCIS intends to terminate the designation of the Regional Center in the Program.

In accordance with 8 C.F.R. § 204.6(m)(6)(iv), the Regional Center will be provided 30 days from receipt of this notice to rebut the grounds alleged above. Failure to respond to this notice of intent to terminate will result in termination of the regional center designation based on the above stated reasons.

Please mail any evidence you wish to provide in opposition to the grounds alleged in this notice of intent to terminate to the address noted below and include a copy of this letter on top of your submission.

Re: Response to Notice of Intent to Terminate
Submission of I-924A
Gulf Coast Funds Management, LLC

Dear Sir or Madam:

I respectfully submit Form I-924 for the fiscal year ended September 30, 2017 on behalf of Gulf Cost Funds Management, LLC, for its continuing eligibility for Regional Center designation. Attached please find the following documents:

1. Form G-28, Notice of Appearance as Attorney of Record for the Regional Center
2. Form I-924A, Annual Certification of Regional Center with fee
3. A copy of the Regional Center's approved notice.

Please let me know if any additional information or documents are needed or would be helpful for your review and approval.

Sincerely,

(b)(6)

David Z. Lu

Re: Response to Notice of Intent to Terminate
Submission of I-924A for Annual Certification of Regional Center
Gulf Coast Funds Management, LLC

Dear Sir or Madam:

This letter is written in response to your Notice of Intent to Terminate on the approved designation of Gulf Coast Funds Management, LLC (the "Regional Center") on behalf of my client. Enclosed please find a copy of my G-28 for my representation.

Gulf Coast Funds Management, LLC has relied on the law firm of Dentons US LLP, specifically, Mathew C. Schulz, Esq. to file annual updates on the Regional Center's status and activities for several years now. Last year, one of the Regional Center's key managers, Fang Fang Liao, left employment with the Regional Center in the middle of the year. The Regional Center's management was not made aware of the deadline for filing I-924A by Mr. Schulz or his inability to prepare it for the Regional Center until we received the Notice in question. The Regional Center has been advised by Dentons law firm that Mr. Schulz had left the firm before the filing was due and no one was made aware that there was a deadline to meet. The Regional Center acknowledges that it is responsible for fulfilling its compliance obligations under the applicable regulations. However, the circumstances of the turnover in responsible personnel resulted in management not being apprised of the filing requirement and resulted in this filing not being timely.

Gulf Coast Funds Management, LLC did continue to promote economic growth by publicizing the green auto project in order to improve regional productivity. It continued to promote GreenTech Automotive, Inc.'s production facility in Mississippi and solicit new investment to the job creation entity. While managing investor relations with EB-5 investors, it also brought and coordinated some potential investors to visit the manufacturing facility in Mississippi.

The management of Gulf Coast Funds Management, LLC, therefore, requests the continuation of its eligibility by submitting the accompanying Form I-924 for the fiscal year ended September 30, 2017.

Your assistance is greatly appreciated.

Sincerely,

(b)(6)

/David Z. Lu

Re: Proposal for Designation of Gulf Coast Funds Management (GCFM) as a USCIS recognized Regional Center under the Immigrant Investor Pilot Program

BACKGROUND:

Pursuant to Section 610 of the Appropriations Act of 1993, on January 17, 2008, Gulf Coast Funds Management (GCFM) submitted a proposal seeking approval and designation by U.S. Citizenship and Immigration Services (USCIS) of the GCFM Regional Center (GCFM-RC), with a geographic area focusing on the entirety of the states of Mississippi and Louisiana. The GCFM-RC for EB-5 Immigrant Investor purposes shall focus investment in the following three target industry economic clusters:

1. Shipbuilding;
2. Food Processing; and
3. Manufacturing.

The initial proposal contained the following evidence in support of its requested designation:

- A Job Creation Analysis and Econometric Model prepared by a professional economic analysis firm which specifically calculates but excludes construction jobs from the detailed prediction;
- A business plan reflecting the timing, scale and planned use of the alien investor capital;
- A sample Private Placement Memorandum;
- A sample Operating Agreement;
- A sample Subscription Agreement; and
- A sample Management Agreement.

DECISION:

Based on its review and analysis of your January 17, 2008 proposal, and of your response to the USCIS Request For Evidence of August 1, 2008, to which you provided a supplemental business plan, and a more in-depth and comprehensive economic and job creation analysis relating to the two-state scope and economic impacts, USCIS hereby approves and designates GCFM as a Regional Center within the Immigrant Investor Pilot Program with a geographic scope which includes the entire states of Mississippi and Louisiana.

FOCUS OF INVESTMENT ACTIVITY AND CAPITAL INVESTMENT THRESHOLD:

The USCIS-approved focus of the GCFM-RC business plan and job creation analysis and multipliers is to generate immigrant investor capital into the following target industry commercial enterprise activities within Mississippi and Louisiana:

1. Shipbuilding;
2. Food Processing; and
3. Manufacturing.

As such, aliens seeking immigrant visas through the Immigrant Investor Pilot Program may file individual petitions with USCIS for these commercial enterprises located within the GCFM-RC area comprised of the states of Mississippi and Louisiana. The geographic focus of this area contains numerous High Unemployment Targeted Employment Areas (TEA) as designated by the States of Mississippi and Louisiana, and rural TEA's as defined in 8 CFR 204.6(e). Therefore, the minimum capital investment threshold for any individual immigrant investment into an approved commercial enterprise throughout the Regional Center shall be not less than $500,000, if the investment target is located within a TEA or $1,000,000 if located outside of a TEA.

EMPLOYMENT CREATION:

Immigrant investors who file petitions for commercial enterprises located in the GCFM-RC area must fulfill all of the requirements set forth in 8 CFR 204.6, except that the petition need not show that the new commercial enterprises created ten new jobs indirectly as a result of the immigrant investor's investment. This determination has been established by way of USCIS' acceptance of the final economic analysis that is contained as part of the approved GCFM-RC proposal and its indirect job creation model and multipliers contained within the final approved GCFM-RC application package.

In addition, where job creation or preservation of existing jobs is claimed based on a multiplier rooted in underlying new "direct jobs" in support of an immigrant investor's individual I-526 petition affiliated with the GCFM-RC, then:

- To be credited with projected creation of new "direct" jobs for "qualifying employees" upon filing the I-526 petition, then the petition must be supported by a comprehensive detailed business plan and supporting financial, marketing and related data and analysis providing a reasonable basis for projecting creation of any new direct jobs for "qualifying employees" to be achieved/realized within two years pursuant to 8 CFR 204.6(j)(4)(B).

For purposes of an alien investor's filing of a subsequent I-829 petition to remove the conditions wherein the investment through the GCFM-RC in an enterprise for which the initial I-526 petition approval involved the creation of new direct jobs or the creation of new indirect jobs based on a multiplier tied to underlying new direct jobs, then to support the full number of direct and indirect new jobs being claimed at that point, an alien's subsequent I-829 petition will need to be supported by probative evidence of the number of new direct full time (35 hours per week) for qualified employees whose positions have been created as a result of the alien's investment. Such evidence may include copies of quarterly state employment tax reports, Forms W-2, Forms I-9, and any other pertinent employment records sufficient to demonstrate the number of qualified employees whose jobs were created directly.

Each individual petition, in order to demonstrate that it is associated with the GCFM-RC , in conjunction with addressing all the requirements for an individual immigrant investor petition, shall also contain as supporting evidence relating to this amended regional center designation, the following:

1. A copy of this letter for the GCFM-RC approval and designation.

2. A copy of the USCIS approved regional center narrative proposal and business plan.[1]

3. A copy of the job creation methodology required in 8 CFR 204.6(j)(4)(iii), as contained in the final regional center economic analysis which has been approved by USCIS, which reflects that investment by an individual immigrant investor will create not fewer than ten (10) full-time employment positions, either directly or indirectly, per each immigrant investor.

4. A legally executed copy of the USCIS approved:

    a. Private Placement Memorandum;
    b. Subscription Agreement;

[1]With respect to an individual I-526 individual investor petition, for any large scale high impact investor manufacturing or processing projects such as a shipyard, other large-scale manufacturing or processing plants, the detailed business plan should also address or reflect those project critical factors associated with infrastructure required to support operations on the scale proposed, in terms of roads, rail tracks and facilities, port capacity, water, sewage, electrical power capacity to meet the projected demand imposed by the envisioned facility, fire fighting services and capabilities, and environmental impact issues.

c. Operating Agreement; and
d. Management Agreement.

DESIGNEE'S RESPONSIBILITIES INHERENT IN CONDUCT OF THE GCFM-RC REGIONAL CENTER:

The law, as reflected in the regulations at 8 CFR 204.6(m)(6), requires that an approved regional center in order to maintain the validity of its approval and designation must continue to meet the statutory requirements of the Immigrant Investor Pilot Program by serving the purpose of promoting economic growth, including increased export sales (where applicable), improved regional productivity, job creation, and increased domestic capital investment. Therefore, in order for USCIS to determine whether your regional center is in compliance with the above cited regulation, and in order to continue to operate as a USCIS approved and designated regional center, your administration, oversight, and management of your regional center shall be such as to monitor all investment activities under the sponsorship of your regional center and to maintain records, data and information on a quarterly basis in order to report to USCIS upon request the following year to date information for each Federal Fiscal Year[2], commencing with the initial year as follows:

1. Provide the principal authorized official and point of contact of the regional center responsible for the normal operation, management and administration of the regional center.

2. Be prepared to explain how you are administering the regional center and how you will be actively engaged in supporting a due diligence screening of its alien investors' lawful source of capital and the alien investor's ability to fully invest the requisite amount of capital.

3. Be prepared to explain the following:

    a. How the regional center is actively engaged in the evaluation, oversight and follows up on any proposed commercial activities that will be utilized by alien investors.

    b. How the regional center is actively engaged in the ongoing monitoring, evaluation, oversight and follows up on any investor commercial activity affiliated through the regional center that will be utilized by alien investors in order to create direct and/or indirect jobs through qualifying EB-5 capital investments into commercial enterprises within the regional center.

4. Be prepared to provide:

    a. the name, date of birth, petition receipt number, and alien registration number (if one

[2] A Federal Fiscal Year runs for twelve consecutive months from October 1st to September 30th.

has been assigned by USCIS) of each principal alien investor who has made an investment and has filed an EB-5/I-526 Petition with USCIS, specifying whether:

i. the petition was filed,
ii. is pending,
iii. was approved,
iv. denied, or
v. withdrawn by the petitioner, together with the date(s) of such event.

b. The total number of visas represented in each case for the principal alien investor identified in 4.a. above, plus his/her dependents (spouse and children) for whom immigrant status is sought or has been granted.

c. The country of nationality of each alien investor who has made an investment and filed an EB-5/I-526 petition with USCIS.

d. The U.S. city and state of residence (or intended residence) of each alien investor who has made an investment and filed an EB-5/I-526 petition with USCIS.

e. For each alien investor listed in item 4.a., above, identify the following:

i. the date(s) of investment in the commercial enterprise;

ii. the amount(s) of investment in the commercial enterprise; and

iii. the date(s), nature, and amount(s) of any payment/remuneration/profit/return on investment made to the alien investor by the commercial enterprise and/or regional center from when the investment was initiated to the present.

5. Be prepared to identify/list each of the target industry categories of business activity within the geographic boundaries of your regional center that have:

a. received alien investors' capital, and in what aggregate amounts;

b. received non-EB-5 domestic capital that has been combined and invested together, specifying the separate aggregate amounts of the domestic investment capital;

c. of the total investor capital (alien and domestic) identified above in 5.a and 5.b, identify and list the following:
i. The name and address of each "direct" job creating commercial enterprise.
ii. The industry category for each indirect job creating investment activity.

6. Be prepared to provide:

a. The total aggregate number of approved EB-5 alien investor I-526 petitions per each

Federal Fiscal Year to date made through your regional center.

b. The total aggregate number of approved EB-5 alien investor I-829 petitions per each Federal Fiscal Year to date through your regional center.

7. The total aggregate sum of EB-5 alien capital invested through your regional center for each Federal Fiscal Year to date since your approval and designation.

8. The combined total aggregate of "new" direct and/or indirect jobs created by EB-5 investors through your regional center for each Federal Fiscal Year to date since your approval and designation.

9. If applicable, the total aggregate of "preserved" or saved jobs by EB-5 alien investors into troubled businesses through your regional center for each Federal Fiscal Year to date since your approval and designation.

10. If for any given Federal Fiscal Year your regional center did or does not have investors to report, then provide:

    a. a detailed written explanation for the inactivity,

    b. a specific plan which specifies the budget, timelines, milestones and critical steps to:

        i. actively promote your regional center program,

        ii. identify and recruit legitimate and viable alien investors, and

        iii. a strategy to invest into job creating enterprises and/or investment activities within the regional center.

11. Regarding your website, if any, please be prepared to provide a hard copy which represents fully what your regional center has posted on its website, as well as providing your web address. Additionally, please provide a packet containing all of your regional center's hard copy promotional materials such as brochures, flyers, press articles, advertisements, etc.

12. Finally, please be aware that it is incumbent on each USCIS approved and designated regional center, in order to remain in good standing, to notify the USCIS Foreign Trader, Investor & Regional Center Program within 15 business days at USCIS.ImmigrantInvestorProgram@dhs.gov of any change of address or occurrence of any material change in:

    - the name and contact information of the responsible official and/or Point of Contact (POC) for the RC

- the management and administration of the RC,
- the RC structure,
- the RC mailing address, web site address, email address, phone and fax number,
- the scope of the RC operations and focus,
- the RC business plan,
- any new, reduced or expanded delegation of authority, MOU, agreement, contract, etc. with another party to represent or act on behalf of the RC,
- the economic focus of the RC, or
- any material change relating to your regional center's basis for its most recent designation and/or reaffirmation by USCIS.

If you have any questions concerning the GCFM-RC approval and designation under the Immigrant Investor Pilot Program, please contact the USCIS Foreign Trader, Investor and Regional Center Program by Email at USCIS.ImmigrantInvestorProgram@dhs.gov.

Sincerely,

/s/

NOTICE OF INTENT TO TERMINATE

This notice is in reference to the approved designation of Gulf Coast Funds Management, (the "Regional Center"), as a regional center in the Immigrant Investor Program (the "Program"). The purpose of this notice is to notify the Regional Center that, pursuant to 8 C.F.R. § 204.6(m)(6), U.S. Citizenship and Immigration Services ("USCIS") intends to terminate the participation of the Regional Center in the Program because it no longer serves the purpose of promoting economic growth.

(SEE ATTACHED)

Pursuant to 8 C.F.R. 204.6(m)(6), you are provided thirty (30) days from receipt of this notice of intent to terminate to offer evidence in opposition to the ground or grounds alleged.

Failure to respond within the time allotted may result in the termination of your designation for participation as a regional center in the Immigrant Investor Program.

Your deadline for submitting a response is: **March 18, 2018.**

Keep a photocopy of this notice for your records. If you otherwise write to us about your case, please provide a copy of this notice.

You will be notified separately about any other applications or petitions you have filed.

Please send your response to this address:

NOTICE OF INTENT TO TERMINATE

Form I-924, Application for Regional Center Designation Under the Immigrant Investor Program
Gulf Coast Funds Management, LLC

This notice is in reference to the approved designation of Gulf Coast Funds Management, LLC (the "Regional Center"), as a regional center in the Immigrant Investor Program (the "Program").[1] The purpose of this notice is to notify the Regional Center that, pursuant to 8 C.F.R. § 204.6(m)(6), U.S. Citizenship and Immigration Services ("USCIS") intends to terminate the designation of the Regional Center in the Program because:

- The Regional Center failed to provide USCIS with updated information annually, and/or as otherwise requested by USCIS, to demonstrate that the regional center is continuing to promote economic growth, including increased export sales, improved regional productivity, job creation, and increased domestic capital investment in the approved geographic area, using a form designated for this purpose; and

- The Regional Center failed to pay the fee provided by 8 CFR 103.7(b)(1)(i)(XX).

The regulation at 8 C.F.R. § 204.6(m)(6) (*Continued participation requirements for regional centers*) provides:

> (i) Regional centers approved for participation in the program must:
>
> > (A) Continue to meet the requirements of section 610(a) of the Appropriations Act.
> >
> > (B) Provide USCIS with updated information annually, and/or as otherwise requested by USCIS, to demonstrate that the regional center is continuing to promote economic growth, including increased export sales, improved regional productivity, job creation, and increased domestic capital investment in the approved geographic area, using a form designated for this purpose; and
> >
> > (C) Pay the fee provided by 8 CFR 103.7(b)(1)(i)(XX).
>
> (ii) USCIS will issue a notice of intent to terminate the designation of a regional center in the program if:

---

[1] *See* Section 610 of the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act, 1993, Pub. L. No. 102-395, 106 Stat. 1828 (1992), as amended (hereinafter "Appropriations Act").

(A) A regional center fails to submit the information required in paragraph (m)(6)(i)(B) of this section, or pay the associated fee; or

(B) USCIS determines that the regional center no longer serves the purpose of promoting economic growth, including increased export sales, improved regional productivity, job creation, and increased domestic capital investment.

(iii) A notice of intent to terminate the designation of a regional center will be sent to the regional center and set forth the reasons for termination.

(iv) The regional center will be provided 30 days from receipt of the notice of intent to terminate to rebut the ground or grounds stated in the notice of intent to terminate.

(v) USCIS will notify the regional center of the final decision. If USCIS determines that the regional center's participation in the program should be terminated, USCIS will state the reasons for termination. The regional center may appeal the final termination decision in accordance with 8 CFR 103.3.

(vi) A regional center may elect to withdraw from the program and request a termination of the regional center designation. The regional center must notify USCIS of such election in the form of a letter or as otherwise requested by USCIS. USCIS will notify the regional center of its decision regarding the withdrawal request in writing.

I. Procedural History

A. Initial Designation

On July 13, 2009, USCIS designated the Regional Center following approval of its application to participate in the Program (RCW1031910101). Based on the initial designation, the Regional Center obtained approval to promote economic growth under the Program in the following geographic regions:

Name of State	Counties
Louisiana	Statewide
Mississippi	Statewide

B. Amendments

The Regional Center filed four amendment to date.

(b)(4)

C. Regional Center Projects

USCIS has received a total of [ ] Forms I-526, Immigrant Petition by Alien Entrepreneur, filed by petitioners asserting that they have invested capital in five new commercial enterprises each, "NCE"), associated with the Regional Center as shown in the table below. USCIS has approved [ ] of these Form I-526 petitions.

New Commercial Enterprise	Job-Creating Entity	Number of I-526 Petitions Filed	Number of I-526 Petitions Approved to Date
Greentech Automotive AKA Hybrid Kinetic Automotive Corp.	-		
Greentech Automotive Partnership A-3, LP	Greentech Automotive		
Greentech Automotive, Inc.	-		
GTA Fund A-2, LLC	-		
Gulf Coast Automotive Investment Fund A-1 LLC	-		
Totals	--		

D. Annual Reports (Forms I-924A)

The Regional Center has filed six Forms I-924A, Annual Certification of Regional Center. The table below summarizes the information that the Regional Center provided to USCIS in those forms regarding the claimed aggregate amount of capital investment from EB-5 petitioners associated with the Regional Center and the new direct, indirect, and/or induced jobs created through the regional center to date.

Fiscal Year	Receipt No.	Date Received	Aggregate EB-5 Capital Investment	Aggregate Direct/ Indirect Job Creation	Aggregate Jobs Maintained
2011	RCW1200450517	12/29/2011			
2012	RCW1300351038	01/03/2013			
2013	RCW1335751429	12/23/2013			
2014	RCW1435252147	12/18/2014			
2015	RCW1535653836	12/22/2015			
2016	RCW1634054613	12/05/2016			

(b)(4)

II. Analysis

A. Failure to Submit Required Information to USCIS

The Regional Center failed to provide information to USCIS:

- Its annual Form I-924A filing for Federal fiscal year 2017 (October 1 through September 30) 2017.

Under 8 C.F.R. § 204.6(m)(6)(i)(B), a regional center must:

> Provide USCIS with updated information annually, and/or as otherwise requested by USCIS, to demonstrate that the regional center is continuing to promote economic growth, including increased export sales, improved regional productivity, job creation, and increased domestic capital investment in the approved geographic area, using a form designated for this purpose.

1. Failure to Timely File Form I-924A, Annual Certification of Regional Center

The Form I-924A Instructions state that each designated regional center must file a Form I-924A, Annual Certification of Regional Center, for each fiscal year (October 1 through September 30) within 90 days after the end of the fiscal year (on or before December 29 of the calendar year in which the fiscal year ended). The Form Instructions further state that failure to file Form I-924A in a timely manner for each Federal fiscal year in which the regional center has been designated to participate in the Program will result in the issuance of a notice of intent to terminate the participation of the regional center in the Program, which may ultimately result in the termination of the approval and designation of the regional center.

As of the date of this notice, USCIS records indicate that the Regional Center has not filed a Form I-924A for Federal fiscal year 2017. Due to the Regional Center's failure to file Form I-924A in a timely manner, as required by 8 C.F.R. § 204.6(m)(6)(i)(B) and the Form I-924A Instructions, USCIS intends to terminate the designation of the regional center in the Program.

III. Conclusion

USCIS has determined that the Regional Center has failed to submit required information to USCIS. Therefore, USCIS intends to terminate the designation of the Regional Center in the Program.

In accordance with 8 C.F.R. § 204.6(m)(6)(iv), the Regional Center will be provided 30 days from receipt of this notice to rebut the grounds alleged above. Failure to respond to this notice of intent to terminate will result in termination of the regional center designation based on the above stated reasons.

Please mail any evidence you wish to provide in opposition to the grounds alleged in this notice of intent to terminate to the address noted below and include a copy of this letter on top of your submission.

Re: Amendment to a Regional Center under the Immigrant Investor Pilot Program

BACKGROUND:

Pursuant to Section 610 of the Appropriations Act of 1993, on January 17, 2008, GCFM submitted a proposal for the designation of Gulf Coast Funds Management Regional Center which focuses on the entirety of the states of Mississippi and Louisiana. The industry focus is primarily as follows:

1. Shipbuilding,
2. Food Processing Plants, and
3. Manufacturing Plants.

The initial proposal contained the following evidence in support of its requested designation:

- A Job Creation Analysis and Econometric Model prepared by a professional economic analysis firm which specifically calculates but excludes construction jobs from the detailed prediction;
- A business plan reflecting the timing, scale and planned use of the alien investor capital;
- A Private Placement Memorandum;
- An Operating Agreement;
- A Subscription Agreement; and
- A Management Agreement.

The initial regional center proposal for GCFM was approved by USCIS on August 18, 2008.

On May 7, 2009, petitioner submitted an amendment to its approved regional center requesting the establishment of two additional investment GCFM funds. The amendment is approved. The separate IMPLAN investment funds have been added below.

Re: Amendment to a Regional Center under the Immigrant Investor Pilot Program

BACKGROUND:

Pursuant to Section 610 of the Appropriations Act of 1993, on January 17, 2008, GCFM submitted a proposal for the designation of Gulf Coast Funds Management Regional Center which focuses on the entirety of the states of Mississippi and Louisiana. The industry focus is primarily as follows:

1. Shipbuilding,
2. Food Processing Plants, and
3. Manufacturing Plants.

The initial proposal contained the following evidence in support of its requested designation:

- A Job Creation Analysis and Econometric Model prepared by a professional economic analysis firm which specifically calculates but excludes construction jobs from the detailed prediction;
- A business plan reflecting the timing, scale and planned use of the alien investor capital;
- A Private Placement Memorandum;
- An Operating Agreement;
- A Subscription Agreement; and
- A Management Agreement.

The initial regional center proposal for GCFM was approved by USCIS on August 18, 2008.

On May 7, 2009, petitioner submitted an amendment to its approved regional center requesting the establishment of two additional investment GCFM funds. The amendment is approved. The separate IMPLAN investment funds have been added below.

1. Gulf Coast Automotive Investment Fund A-1 (GCAIF A-1)

Gulf Coast Automotive Investment Fund A-1 entails the construction and subsequent operation of a manufacturing facility where hybrid automobiles will be designed and manufactured. The facility will consist of multiple buildings including a factory, machine shop, office building, museum and residential housing. When fully operational, the facility is expected to be able to produce up to one million vehicles per year.

2. Gulf Coast Fund I (GCF)

Gulf Coast Fund I entails the construction and subsequent operation a shipyard in Houma, Louisiana where $60 million in new ships will be built. The shipyard complex will consist of four buildings, an underground foundation, footings, drainage, utilities, electrical platforms, a parking lot, warehouse and a sewage plant.

DECISION:

Based on its review and analysis of your proposal, and of your response to the USCIS Request For Evidence to which you provided a satisfactory response, USCIS hereby approves and designates GCFM as a Regional Center within the Immigrant Investor Pilot Program to include two additional, separate capital investment funds. GCFM shall continue to have a geographic scope that includes the entire states of both Mississippi and Louisiana as a Regional Center.

FOCUS OF INVESTMENT ACTIVITY AND CAPITAL INVESTMENT THRESHOLD:

The USCIS-approved focus of the GCFM business plan and job creation analysis and multipliers is to generate immigrant investor capital into the following commercial enterprise activities within Mississippi and Louisiana:

1. Shipbuilding,
2. Food Processing Plants, and
3. Manufacturing Plants.

As such, aliens seeking immigrant visas through the Immigrant Investor Pilot Program may file individual petitions with USCIS for these commercial enterprises located within the GCFM area comprised of the states of Mississippi and Louisiana. The geographic focus of this area contains numerous High Unemployment Targeted Employment Areas (TEAs) as designated by the States of Mississippi and Louisiana and rural TEA's as defined in 8 CFR 204.6(e). Therefore, the minimum capital investment threshold for any individual immigrant investment into an approved commercial enterprise throughout the Regional Center shall be not less than $ 500,000 if inside a TEA, or $1,000,000 if outside a TEA.

EMPLOYMENT CREATION:

Alien entrepreneurs who file petitions for commercial enterprises located in the GCFM area must fulfill all of the requirements set forth in 8 CFR 204.6, except that the petition need not show that the new commercial enterprises created ten new jobs indirectly as a result of the alien entrepreneur's investment. This determination has been established by way of USCIS' acceptance of the final economic analysis that is contained as part of the approved GCFM proposal and its indirect job creation model and multipliers contained within the final approved GCFM application package. In addition, where job creation or preservation of existing jobs is claimed based on a multiplier rooted in underlying new "direct jobs" in support of an immigrant investor's individual I-526 petition affiliated with the GCFM, then:

- To be credited with projected creation of new "direct" jobs for "qualifying employees" upon filing the I-526 petition, then the petition must be supported by a comprehensive detailed business plan and supporting financial, marketing and related data and analysis providing a reasonable basis for projecting creation of any new direct jobs for "qualifying employees" to be achieved/realized within two years pursuant to 8 CFR 204.6(j)(4)(B).

An alien investor's I-829 petition to remove the conditions which was based on an I-526 petition approval that involved the creation of new direct jobs or the creation of new indirect jobs based on a multiplier tied to underlying new direct jobs needs to be properly supported by evidence of job creation. To support the full number of direct and indirect new jobs being claimed in connection with removal of conditions, the petition will need to be supported by probative evidence of the number of new direct full time (35 hours per week) jobs for qualified employees whose positions have been created as a result of the alien's investment. Such evidence may include copies of quarterly state employment tax reports, Forms W-2, Forms I-9, and any other pertinent employment records sufficient to demonstrate the number of qualified employees whose jobs were created directly.

Each individual petition, in order to demonstrate that it is associated with the GCFM , in conjunction with addressing all the requirements for an individual alien entrepreneur petition, shall also contain as supporting evidence relating to this amended regional center designation, the following:

1. A copy of this letter for the GCFM amendment approval and designation.

2. A copy of the approved regional center narrative proposal and business plan.

3. A copy of the job creation methodology required in 8 CFR 204.6(j)(4)(iii), as contained in the regional center economic analysis which has been approved by USCIS, which reflects that investment by an individual alien investor of at least $500,000 into the Transit Village or any other similar project will create full-time employment positions, either directly or indirectly, for not fewer than ten qualified employees per alien investor.

4. A legally executed copy of:

    a. the Private Placement Memorandum;
    b. the Subscription Agreement; and
    c. the Operating Agreement.

DESIGNEE'S RESPONSIBILITIES INHERENT IN CONDUCT OF THE GCFM REGIONAL CENTER:

The law, as reflected in the regulations at 8 CFR 204.6(m)(6), requires that an approved regional center, in order to maintain the validity of its approval and designation, must continue to meet the statutory requirements of the Immigrant Investor Pilot Program by serving the purpose of promoting economic growth, including increased export sales (where applicable), improved regional productivity, job creation, and increased domestic capital investment. Therefore, in order for USCIS to determine whether your regional center is in compliance with the above cited regulation, and in order to continue to operate as a USCIS approved and designated regional center, your administration, oversight, and management of your regional center shall be such as to monitor all investment activities under the sponsorship of your regional center and to maintain records, data and information on a quarterly basis in order to report to USCIS upon request the following year to date information for each Federal Fiscal Year[1], commencing with the initial year as follows:

1. Provide the principal authorized official and point of contact of the regional center responsible for the normal operation, management and administration of the regional center.

2. Be prepared to explain how you are administering the regional center and how you will be actively engaged in supporting a due diligence screening of its alien investors' lawful source of capital and the alien investor's ability to fully invest the requisite amount of capital.

3. Be prepared to explain the following:

    a. How the regional center is actively engaged in the evaluation, oversight and follows up on any proposed commercial activities that will be utilized by alien investors.

    b. How the regional center is actively engaged in the ongoing monitoring, evaluation, oversight and follows up on any investor commercial activity affiliated through the regional center that will be utilized by alien investors in order to create direct and/or indirect jobs through qualifying EB-5 capital investments into commercial enterprises within the regional center.

[1] A Federal Fiscal Year runs for twelve consecutive months from October 1st to September 30th.

4. Be prepared to provide:

   a. the name, date of birth, petition receipt number, and alien registration number (if one has been assigned by USCIS) of each principal alien investor who has made an investment and has filed an EB-5/I-526 Petition with USCIS, specifying whether:
      i. the petition was filed,
      ii. is pending,
      iii. was approved,
      iv. denied, or
      v. withdrawn by the petitioner, together with the date(s) of such event.

   b. The total number of visas represented in each case for the principal alien investor identified in 4.a. above, plus his/her dependents (spouse and children) for whom immigrant status is sought or has been granted.

   c. The country of nationality of each alien investor who has made an investment and filed an EB-5/I-526 petition with USCIS.

   d. The U.S. city and state of residence (or intended residence) of each alien investor who has made an investment and filed an EB-5/I-526 petition with USCIS.

   e. For each alien investor listed in item 4.a., above, identify the following:

      i. the date(s) of investment in the commercial enterprise;

      ii. the amount(s) of investment in the commercial enterprise; and

      iii. the date(s), nature, and amount(s) of any payment/remuneration/profit/return on investment made to the alien investor by the commercial enterprise and/or regional center from when the investment was initiated to the present.

Be prepared to identify/list each of the target industry categories of business activity within he geographic boundaries of your regional center that have:

a. received alien investors' capital, and in what aggregate amounts;

received non-EB-5 domestic capital that has been combined and invested together, pecifying the separate aggregate amounts of the domestic investment capital;

he total investor capital (alien and domestic) identified above in 5.a and 5.b, ify and list the following:
The name and address of each "direct" job creating commercial enterprise.
The industry category for each indirect job creating investment activity.

6. Be prepared to provide:

   a. The total aggregate number of approved EB-5 alien investor I-526 petitions per each Federal Fiscal Year to date made through your regional center.

   b. The total aggregate number of approved EB-5 alien investor I-829 petitions per each Federal Fiscal Year to date through your regional center.

7. The total aggregate sum of EB-5 alien capital invested through your regional center for each Federal Fiscal Year to date since your approval and designation.

8. The combined total aggregate of "new" direct and/or indirect jobs created by EB-5 investors through your regional center for each Federal Fiscal Year to date since your approval and designation.

9. If applicable, the total aggregate of "preserved" or saved jobs by EB-5 alien investors into troubled businesses through your regional center for each Federal Fiscal Year to date since your approval and designation.

10. If for any given Federal Fiscal Year your regional center did or does not have investors to report, then provide:

    a. a detailed written explanation for the inactivity,

    b. a specific plan which specifies the budget, timelines, milestones and critical steps to:

       i. actively promote your regional center program,

       ii. identify and recruit legitimate and viable alien investors, and

       iii. a strategy to invest into job creating enterprises and/or investment activities within the regional center.

11. Regarding your website, if any, please be prepared to provide a hard copy which represents fully what your regional center has posted on its website, as well as providing your web address. Additionally, please provide a packet containing all of your regional center's hard copy promotional materials such as brochures, flyers, press articles, advertisements, etc.

12. Finally, please be aware that it is incumbent on each USCIS approved and designated regional center, in order to remain in good standing, to notify USCIS within 15 business days at USCIS.ImmigrantInvestorProgram@dhs.gov of any change of address or occurrence of any material change in:

- the name and contact information of the responsible official and/or Point of Contact (POC) for the RC

- the management and administration of the RC,
- the RC structure,
- the RC mailing address, web site address, email address, phone and fax number,
- the scope of the RC operations and focus,
- the RC business plan,
- any new, reduced or expanded delegation of authority , MOU, agreement, contract, etc. with another party to represent or act on behalf of the RC,
- the economic focus of the RC, or
- any material change relating to your regional center's basis for its most recent designation and/or reaffirmation by USCIS.

If you have any questions concerning the GCFM amendment approval and designation under the Immigrant Investor Pilot Program, please contact USCIS by e-mail at USCIS.ImmigrantInvestorProgram@dhs.gov.

Sincerely,

Barbara Q. Velarde

Re: Gulf Coast Funds Management's Request for Amendment to an Existing Regional Center Application

Dear Examiner,

This letter is a response to the June 2, 2009 Request for Evidence (RFE) issued in connection with the Gulf Coast Funds Management Regional Center amendment application submitted by Gulf Coast Funds Management. The bolded text below corresponds to the language appearing in the RFE.

Issue: The amendment proposal contains standard documents to be used in dealings with alien investors. The HK Auto Private Placement Memorandum (PPM) on pages ii, iii, and 17, as well as the Gulf Coast I Fund PPM on pages v and 19 make reference to USCIS regulations and that funds must be invested for five years. These are misstatements that need correction or in the alternative, please cite the regulation or Policy Memorandum to

justify such statements.

Response: Please see the attached PPMs which eliminate reference to the USCIS five year investment requirement.

Please note that the only other change to the HK Auto Private Placement Memorandum is that the management fee is now [redacted] (b)(4)

Should you require further information please do not hesitate to contact us.

Sincerely,

(b)(6) [redacted]

Stephen Yale-Loehr

RE: Amendment Proposal for an Existing Regional Center under the Immigrant Investor Pilot Program.

REQUEST FOR ADDITIONAL EVIDENCE

This office is unable to complete processing of your request without further information. **Please read and comply with those items requested below, then resubmit the evidence requested to the address listed below, including this letter, within 87 days.**

If your submission is more than several pages, please use acco-fasteners to attach the documents at the top of each page.

USCIS
Office of Service Center Operations, EB-5 Investor Program
20 Massachussetts Avenue, NW, MS 2060
Washington, DC 20529

The business aspects of the Regional Center must be fully explained as to its structure. This aspect of a proposal includes, but is not limited to, the following basic elements or samples of them ***as applicable to the business approach and structure to be used by the Regional Center:***

- An overall Business Plan - mandatory
- Draft Operating Agreement
- Draft Partnership Agreement
- Draft Subscription Agreement

- Draft Escrow Agreements and Instructions (one for capital and one for any service fees). Such agreements usually include an "out clause" in the event of an unsuccessful visa process as a marketing tool[1] but are not required.
- List of proposed reputable financial institutions to serve as the Escrow Agent(s).
- Draft of an Offering Letter, Memorandum, Confidential Private Placement Memorandum, or similar offering made in writing to an immigrant investor through the Regional Center.
- Draft Memorandum of Understanding, Interagency Agreement, Contract, Letter of Intent, Advisory Agreement, or similar agreement to be entered into with any other party, agency or organization to engage in activities on behalf of or in the name of the Regional Center.

The amendment proposal contains standard documents to be used in dealings with alien investors. The HK Auto Private Placement Memorandum (PPM) on pages ii, iii, and 17, as well as the Gulf Coast I Fund PPM on pages v and 19 make reference to USCIS regulations and Policy that funds must be invested for five years. These are misstatements that need correction or in the alternative, please cite the regulation or Policy Memorandum to justify such statements.

To make an inquiry or ask a question about the Regional Center Program you may send an e-mail to: USCIS.ImmigrantInvestorProgram@dhs.gov

Sincerely,

Barbara Q. Velarde
Chief
Office of Service Center Operations

[1] **NOTE: Under NO circumstances** may any agreement or document in support of an investor's I-526 petition offer or imply return or reimbursement of his/her capital investment should the subsequent I-829 Petition to Remove Conditions be denied by USCIS. The USCIS considers any such reimbursement provision within the period of an alien investor's conditional residence prohibited by precedent decision in Matter of Izumii.

Re: Notification Regarding Change in Ownership of Gulf Coast Funds Management Regional Center

Dear Ms. Velarde:

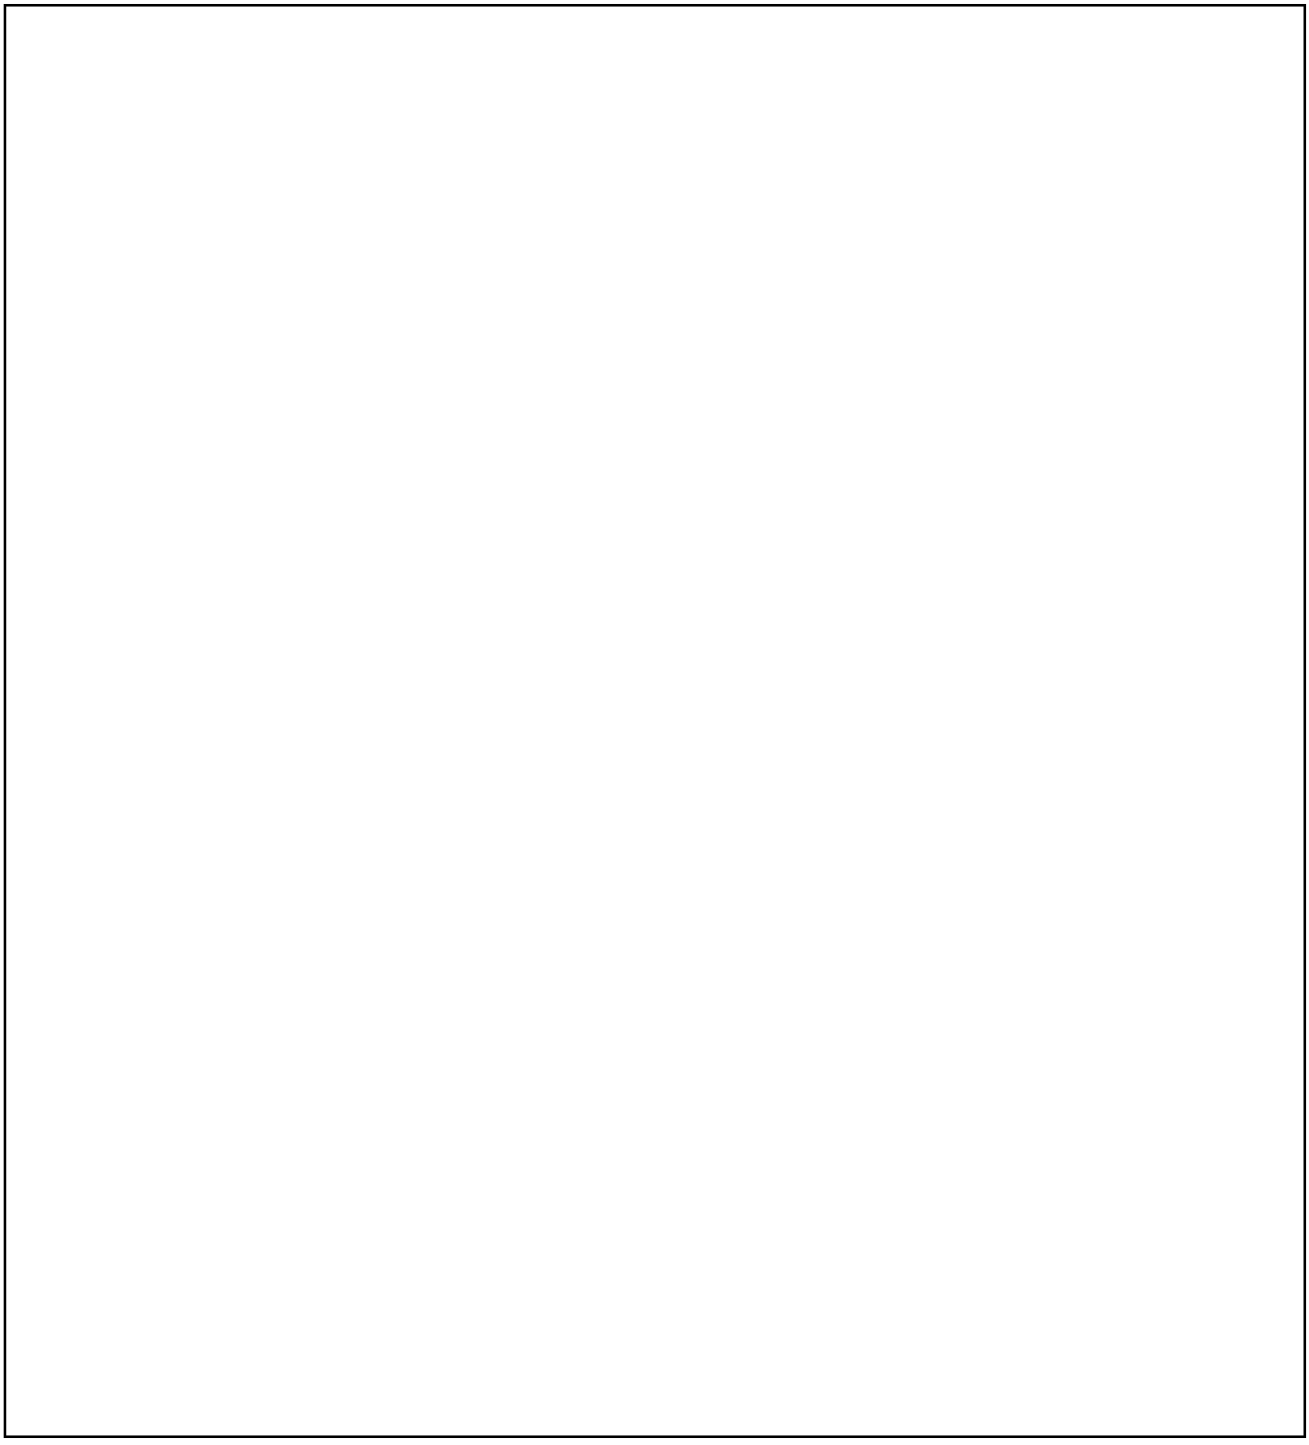
On August 18, 2008 the USCIS issued to Gulf Coast Funds Management, LLC ("GCFM, LLC") a regional center approval and designation (the "Approval") for the Gulf Coast Funds Management Regional Center ("GCFM"). Pursuant to the reporting requirements set forth in the Approval, GCFM, LLC hereby notifies the USCIS of a change of ownership of GCFM, LLC.

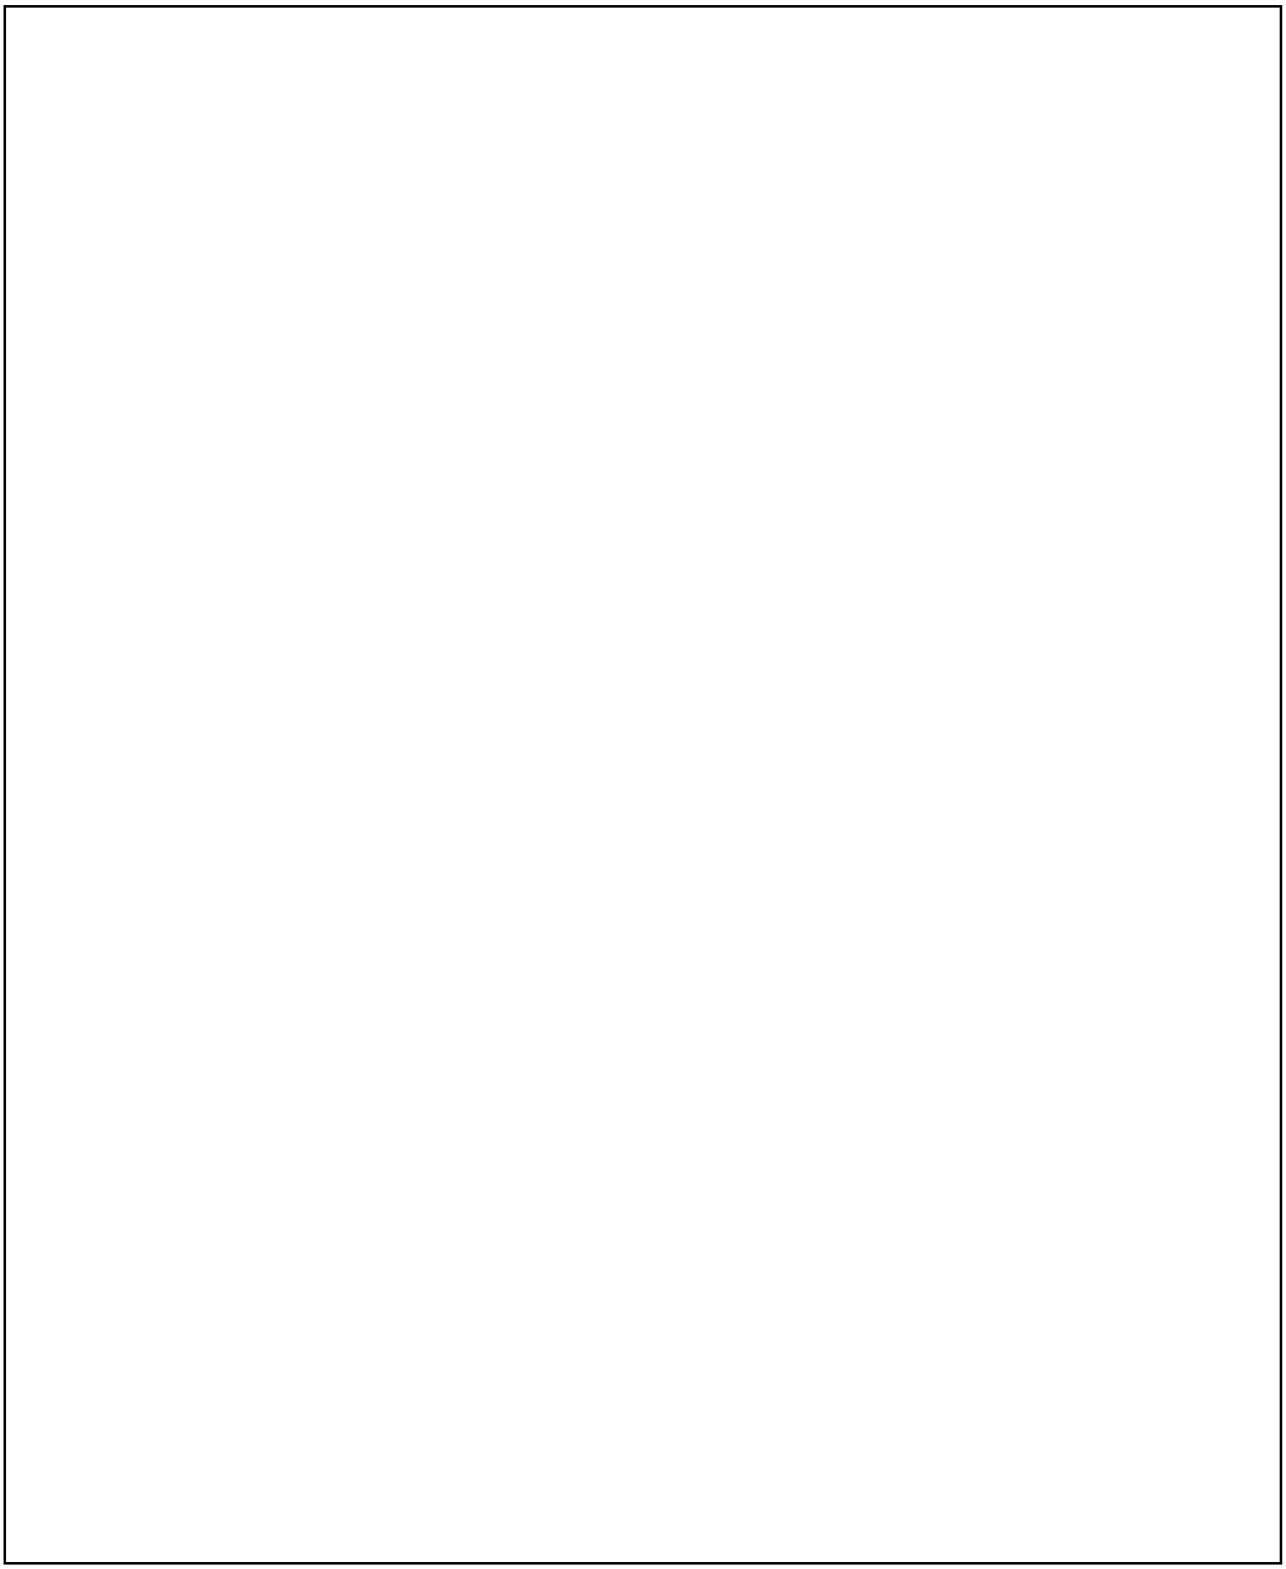
GCFM, LLC has issued [ ] membership interests ("Units"). The current ownership structure of GCFM, LLC is as follows:

(b)(4)

(b)(6)

(b)(4) (b)(6)





(b)(4) [redacted]

The changes described above are the only changes being made to GCFM. Given significant corporate, financial and immigration experience of the new GCFM owner and management team, coupled with the ongoing consulting services provided by two of GCFM's original founders, GCFM will clearly continue to meet the statutory requirements of the Immigrant Investor Pilot Program by serving the purpose of promoting economic growth, improving regional productivity, creating jobs, and increasing domestic capital investment.

Please contact me if you have any questions. Please also update the EB-5 chart on the USCIS website to reflect this change in ownership.

Sincerely,

[redacted] (b)(6)

Stephen Yale-Loehr

The EB-5 Immigrant Investor Program

EB-5 visas are issued to immigrants and their immediate family members if they invest in a USCIS approved "regional center." Gulf Coast Funds Management LLC ("GCFM") received regional center designation from the USCIS on August 18, 2008 and serves as the contract manager of the Fund. A foreign investor may apply for conditional residency to live, work and study in the United States, once his or her investment is made and his or her I-526 petition is approved by the USCIS. At that point an investor must file a petition with the USCIS to adjust his or her status from a valid non-immigrant status to that of conditional permanent resident or apply for an immigrant visa at a U.S. consulate or embassy abroad. If the Fund invests this money in businesses within the geographic scope of the regional center that create at least ten new jobs for each foreign investor within two years from the time the immigrant investor is admitted to the United States as a conditional permanent resident, the immigrant investor is eligible to receive permanent resident status in the United States. After five years from the date of admission to the Untied States as a conditional permanent resident, the investor may become eligible for U.S. citizenship. In the section of this private placement memorandum entitled "Frequently Asked Questions about the EB-5 Visa Program," beginning on page 20, you will find a detailed discussion of the EB-5 program. You can also read about the program on our website: www.GulfCoastFunds.com

RISK FACTORS

(b)(4)

(b)(4)

(b)(4)

(b)(4)

[redacted]

Immigration risks

Each purchaser of a Class A Unit must understand that the Fund, the management company and each of their affiliates make no representation or warranty of any kind concerning whether an investment in the Fund will meet the requirements of the EB-5 program or other U.S. immigration requirements. Each investor in a Class A Unit must further understand that there

can be no assurance that an investment in the Class A Unit will result in his or her family receiving a conditional resident status or permanent resident status. Please carefully consider the following immigration risks, and discuss these and other immigration risks with your personal immigration lawyer.

As a Class A Unit holder, you will be subjected to certain general immigration risks faced by all immigrants to the United States.

The process of obtaining conditional resident status and permanent resident status involves many factors and circumstances that are not within the control of the Fund. These include the investor's past history, source of funds, immigration visa backlogs, potential changes in immigration laws and regulations (including laws and regulations specific to the EB-5 immigrant investor program) and quotas established by the United States government limiting the number of visas available to qualified individuals seeking conditional resident status under the EB-5 program. Although the Fund has been structured with the objective of providing Class A Unit holders with eligibility for conditional and permanent resident status under the EB-5 regional center provisions of the U.S. immigration laws, no assurance can be given that each Class A Unit holder will obtain approval of his or her particular immigrant petition. Purchase of a Class A Unit does not guarantee conditional or permanent residency in the United States. Furthermore, no assurances or advice can be given that conditional resident status will be converted to permanent resident status.

The EB-5 program and other immigration laws can be discontinued or changed at any time.

Immigration programs have long been part of the American history. However, the U.S. Congress and/or other governmental agencies may discontinue some or all immigration programs, or the U.S. Congress and/or other governmental agencies may change the requirements of existing or subsequent programs. Changes to and/or elimination of immigration program(s) may adversely affect an EB-5 immigrant investor who invests in a Class A Unit.

The EB-5 immigrant investor program was created by the United States Congress as the employment-based fifth preference immigrant visa category in 1990 for immigrants who invest in U.S. companies and benefit the U.S. economy. The U.S. Congress and/or other government agencies may discontinue or change some or all of the EB-5 immigrant investor program. Changes to and/or elimination of the EB-5 immigrant investor program may adversely affect the holders of Class A Units.

You must have rights under the operating agreement sufficient to meet the USCIS requirement of holding a policymaking position.

The EB-5 program requires an investor to hold a policymaking or management position in the Fund. The Fund believes that each investor, as the holder of a Class A Unit, is provided with the powers and duties under the Operating Agreement sufficient to meet the USCIS requirement that an investor is actively participating in policymaking or management of a new commercial enterprise.

Investment in the Class A Units and approval of the I-526 petition is only the first step towards acquiring conditional residency status.

After approval of their I-526 petition, EB-5 immigrant investors must file Form I-485, *Application to Register Permanent Residence or Adjust Status* ("I-485") with the USCIS if the investor is already residing in the United States in valid non-immigrant status. If the investor is living outside the United States, he or she must obtain a conditional immigrant visa through an application filed with the U.S. Department of State followed by an interview at a U.S. embassy or consulate. An EB-5 immigrant investor's background (or that of an immediate family member) may not meet the USCIS or the Department of State criteria for temporary or permanent residency in the United States. For example, among other criteria, the following may be grounds for denial of immigration benefits for the immigrant, and/or other members of the immigrant's family: having a communicable disease (e.g., AIDS) or other dangerous contagious disease; having been at any time involved with, trafficking in, or taking, illegal drugs; having been convicted of certain crimes; having committed a fraud or misrepresentation to a U.S. government official; or having violated U.S. immigration law in the past.

It is a requirement of the EB-5 program that an immigrant investor's source of funds be proper, under the U.S. immigration rules and regulations.

EB-5 immigrant investors must demonstrate to the USCIS that the funds they invest in the Class A Units were obtained through lawful means. Each EB-5 immigrant investor must document, to the satisfaction of the USCIS, the source of his or her funds. The Fund and the EB-5 immigrant investor's immigration attorney may make a preliminary assessment of the adequacy of an investor's source of funds, but the ultimate decision will be made solely by USCIS. Each EB-5 immigrant investor must agree to provide information and documents to the Fund, and to allow the Fund to make further investigation, concerning the EB-5 immigrant investor's source of funds and the personal and business background of the EB-5 immigrant investor and accompanying family members.

Achieving your immigration goal of conditional and permanent resident status will require you to maintain your primary residence in the United States.

EB-5 immigrant investors who obtain conditional resident status or permanent resident status must intend to make the United States their primary residence. Conditional residents or permanent residents who maintain their primary residence outside the United States risk revocation of their U.S. residence status.

Each prospective EB-5 immigrant investor should consult a competent immigration attorney to review the likelihood that the investor's immigration objectives will be achieved. The management company's preferred immigration counsel is Miller Mayer, a law firm headquartered in Ithaca, New York. Lawyers at Miller Mayer have represented many regional centers and immigrant investors in securing visas under the EB-5 program. You can contact the firm at 607-273-4200, or you can access their website at www.millermayer.com.

The foregoing risks do not purport to be a complete explanation of all the risks involved in acquiring a Class A Unit. Potential investors are urged to read this entire document and the operating agreement of the Fund before deciding whether to invest in the Fund.

USE OF PROCEEDS

(b)(4)

OUR BUSINESS

Management of our Fund

The Fund has a Board of Directors of four people, three of whom are independent directors and one of whom is designated by the management company. The Board of Directors of the Fund, or the "Board," approves all investments of the Fund. The Board has entered into an agreement with the management company to manage the day-to-day activities of the Fund, reporting to the Board at monthly meetings. Both the Board and the management company have extensive experience in business and civic organizations in the Region as well as government experience at the state and federal level. There are currently 3 independent directors of the Fund, however the Class B Unit holder reserves the right to appoint 1 additional director of the Fund.

The management company's founder and chairman, David Voelker, has been a director of many companies, both public and private, civic and business organizations within the Region. After hurricanes Katrina and Rita in 2005, Governor Blanco, a Democrat, appointed Mr. Voelker to the Louisiana Recovery Authority or the "LRA". The LRA is charged with securing funding and other resources needed for recovery and establishing principles and policies for redevelopment following the devastating hurricanes of 2005. In 2008, Governor Jindal, a Republican, appointed Mr. Voelker to the Chairmanship of the LRA where he continues to serve.

We discuss Mr. Voelker and other members of the Board and management company in greater detail below.

THE EB-5 PROGRAM

Overview

In 1990, the U. S. Congress created the employment based 5th preference (EB-5) immigrant investor visa program. The EB-5 program offers 10,000 immigrant visas a year to qualified investors who wish to obtain residence in the United States by investing in businesses that will benefit the economy and create jobs. The EB-5 Immigrant Investor Regional Center Pilot Program ("The Pilot Program") was created by Congress in 1992 and sets aside 3,000 of the 10,000 EB-5 visas each year for people who invest in designated "regional centers."

Once a qualifying investment has been made in a regional center, an investor files a Form I-526 Immigrant Petition by Alien Entrepreneur, ("Form I-526") with the USCIS. After the USCIS approves I-526 petition, an investor files an adjustment of status application if he or she is already in the U.S. in valid non-immigrant status or ii) applies for an interview and entry visa at a U.S. embassy or consulate abroad ("consular processing"). When an adjustment of status application is approved, a conditional residence status of two years will be given to the investor. If the investor pursues consular processing, upon approval the investor and his or her family will be issued an EB-5 entry visa to the U.S. Once they enter the U.S., the two-year conditional residence status starts.

At the end of the two-year conditional resident period the investor must show that his or her investment has been sustained and the projects invested in by the regional center have created at least ten jobs for each investor. Assuming the investor provides that evidence, the USCIS will remove the conditional residence status, and the investor will receive his or her permanent residency status.

The Immigration Process

The Fund's primary role in the immigration process is to sell interests in the Fund to immigrant investors (which allow the investors to file Form I-526) and invest the investors' capital in a manner that is consistent with the EB-5 program and leads to the creation of at least ten jobs for each Unit holder in the Fund. If Hybrid Kinetics' proposed business plan succeeds, our independent economist's report indicates that Hybrid Kinetics will create enough jobs to meet the EB-5 program requirements for every investor in the Fund. The rest of the immigration process will be led by the immigrant investor and his or her independent immigration counsel. The management company will maintain a current record of jobs created by the Fund's investment activities. The management company will assist each Unit holder by providing information about job creation to the USCIS in the manner required by the EB-5 program. Upon the initial conditional residency filing, the Fund will certify to the USCIS with respect to the projected number of jobs that will be created. Two years after an immigrant investor is granted conditional resident status, the investor must file with the USCIS Form I-829, Petition by Entrepreneur to Remove Conditions ("Form I-829") to

convert his or her status to permanent residency. At that time, the Fund will allocate to each Unit holder ten jobs from those jobs created and maintained by Hybrid Kinetics.

Frequently Asked Questions

The following are some frequently asked questions about the EB-5 program, along with answers to the questions:

How much do I need to invest to receive conditional and ultimately permanent residency status for myself and my family members?
If you invest in a regional center, like ours, you need to invest $500,000 if the investment is made in a high unemployment or rural area. There are also other fees such as legal fees for your immigration and tax counsel and application fees paid to USCIS.

What is the region covered by the Gulf Coast Funds regional center?
Our regional center is the largest geographical regional center in the United States. It covers the entire states of Louisiana and Mississippi.

Do I have to live in Louisiana or Mississippi to participate in this program?
No. You do not have to live in Louisiana or Mississippi. You do not even have to ever visit the region.

When will I have to pay $555,000?
When you are ready to file your application for the I-526, you would send us $555,000.

What do I have to do to get my visa application approved?
Normally, you will get an American immigration lawyer to help you in the visa application process. If you do not have an immigration lawyer, the Placement Agent suggests that you use David Lu, Esq., an immigration lawyer with whom we work with on a regular basis. The lawyer will help you file a Form I-526. With your Form I-526, you will have to submit proof that the source of your $500,000 investment is lawful.

Once the USCIS approves your Form I-526 you will need to adjust your status if you are already living in the U.S. in non-immigrant status or you will have to schedule an interview at a U.S. embassy or consulate abroad. In either case, you will have to submit the same type of documentation that other visa applicants to the United States are required to submit. Here is a general description, from the U.S. government's web site, of certain requirements for receiving a visa:

> **VISA INELIGIBILITY / WAIVER**
> The immigration laws of the United States, in order to protect the health, welfare, and security of the U.S., prohibit the issuance of a visa to certain applicants. Examples of applicants who must be refused visas are those who: have a communicable disease, or have a dangerous physical or mental disorder; have committed serious criminal acts; are terrorists, subversives, members of a totalitarian party, or former Nazi war criminals; have used illegal means to enter the U.S.; or are ineligible for citizenship. Some former exchange visitors must

live abroad for two years. Physicians who intend to practice medicine must pass a qualifying exam before receiving immigrant visas. If found to be ineligible, the consular officer will advise the applicant of any waivers.

OTHER IMPORTANT INFORMATION

Documents for Visa Application
All applicants must submit certain personal documents such as passports, birth certificates, police certificates, and other civil documents, as well as evidence that they will not become public charges in the United States. The consular officer will inform visa applicants of the documents needed as their applications are processed.

Medical Examinations
Before the issuance of an immigrant visa, every applicant, regardless of age, must undergo a medical examination. The examination will be conducted by a physician designated by the consular officer. Examination costs must be borne by the applicant, in addition to the visa fees.

Visa Fees
The cost of each immigrant visa application may vary for additional visa fees apply. For up to date immigration visa fee costs, please consult your immigration attorney or please visit the USCIS fee schedule web page.

Source: www.uscis.gov

How will my money be invested?
Your money will be invested in our regional center Fund, which will immediately re-invest your money in Hybrid Kinetics. To meet the immigration goals of the EB-5 regional center program, Hybrid Kinetics must create at least 10 new jobs (both direct and indirect or induced jobs) for every $500,000 we invest.

How will the investment in Hybrid Kinetics be structured?
All of the proceeds of this offering will be invested in convertible preferred stock of Hybrid Kinetics. We will receive one share of convertible preferred stock for each $500,000 we invest in Hybrid Kinetics. Investors will be charged a $55,000 administrative fee which the Fund will transfer to Hybrid Kinetics Automotive Corp. at the time that the Unit is purchased. Hybrid Kinetics Automotive Corp. will use this administrative fee to pay legal and other administrative fees associated with marketing the Units world-wide. Five years after each such investment, each share of convertible preferred stock will be automatically converted into shares of common stock of Hybrid Kinetics having an estimated fair market value of $555,000.

When will my visa become permanent?
Two years after you receive your conditional resident status, you must apply for permanent residency. At that time, we will supply documents for your Form I-829

petition to show that your money has been invested in the region and that the Fund's investment has created at least ten jobs. Once your application is approved, you will become a permanent resident of the United States, and may soon apply for full citizenship if you desire.

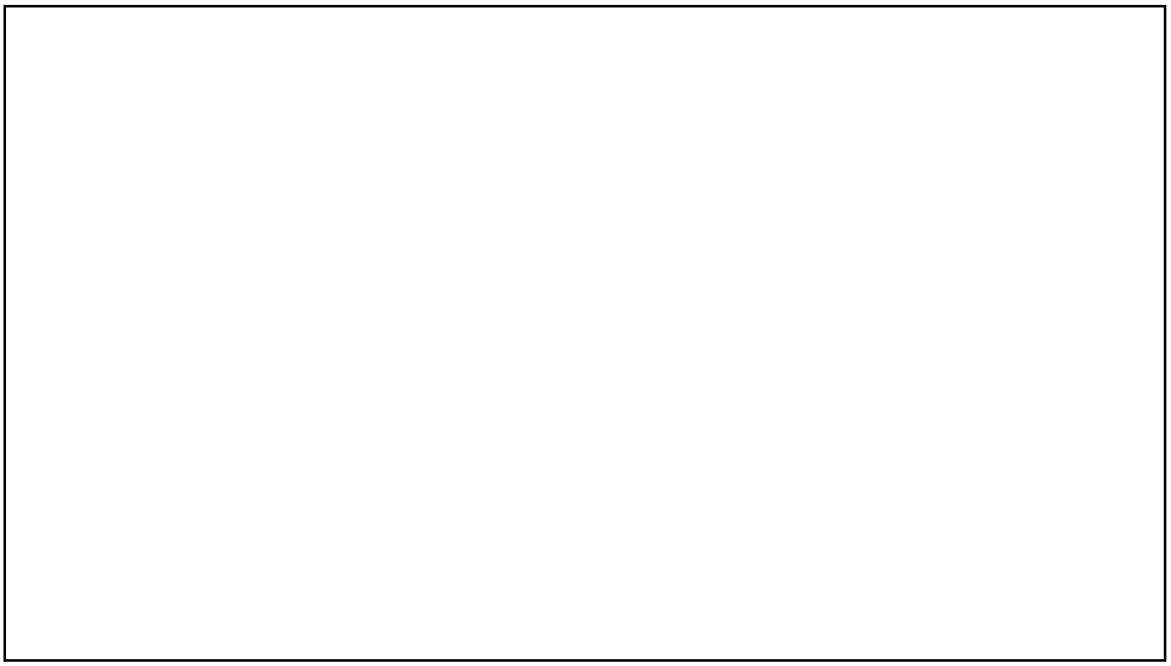
(b)(4)

RIGHTS OF UNIT HOLDERS



(b)(4)

CERTAIN U.S. FEDERAL INCOME TAX CONSIDERATIONS

The following discussion about certain U.S. federal income tax and other tax considerations that you should weigh prior to investing in a Unit is merely a presentation of certain tax issues that generally apply to all investors in EB-5 funds. You should not consider this discussion to be tax advice, applicable to your particular situation or a full discussion of all material United States, state, local and foreign tax consequences of an investment in the Fund or your status as U.S. tax resident or non-resident and you should consult with your personal tax advisor about these, and all other issues relevant to your personal decision to invest in a Unit. Neither the Fund nor the management company is qualified to provide the tax advice you will need. You cannot use this summary for the purpose of avoiding United States federal tax penalties.

The following discussion is based upon the Internal Revenue Code of 1986 (the "Code"), the applicable Treasury Regulations promulgated or proposed under the Code (the "Regulations"), current positions of the IRS contained in published revenue rulings and revenue procedures, current administrative positions of the IRS, and existing judicial decisions, as in effect on the date of this Memorandum, all of which are subject to change or modification, with or without retroactive effect, at any time.

No assurance can be given as to the future status of federal income tax laws or other tax laws as they pertain to limited liability companies of the type described herein. It is likely that changes to the Code will be proposed in the future. The effect of such proposals on the Fund and on an investment therein cannot be analyzed. Accordingly, potential investors are urged to consider on-going developments regarding changes in the federal income tax law and other tax laws and to consult their own advisors in assessing the risks associated with an investment in the Fund.

Classification of the Fund

The Fund will be treated as a partnership for federal income tax purposes under the "check the box" Regulations. Under these regulations, an unincorporated domestic entity, such as the Fund, with at least two members will be taxed as a partnership if no election is made to be taxed as a corporation. Accordingly, the discussion herein relating to partnerships and partners generally will be applicable to Unit holders in the Fund.

Partnership Taxation in General

Under the Code, a partnership pays no federal income tax, although it may be required to withhold and pay taxes on behalf of certain of its partners. Rather, each partner reports on his federal income tax return his distributive share of all items of income, gain, loss, deduction, credit and tax preference of the partnership, whether or not the partnership makes any actual distribution to the partner during the taxable year. Thus, it is possible that distributions from the Fund will not be sufficient to pay tax liabilities with respect to the tax income and gain allocated to a Unit holder and that the only source of payment of such tax liabilities would be from the Unit holder's funds from sources

other than the Fund.

The extent to which a Unit holder may utilize Fund losses in any tax year is limited to the adjusted tax basis of his interest in the Fund at the end of the Fund tax year (See "Basis of Units"). In addition, a Unit holder may not deduct Fund losses in excess of the amount the Unit holder is considered "at risk" with respect to the Fund under Code Section 465 (See "At Risk Limitations"). A Unit holder generally may use his distributive share of any partnership losses allowable after applying the foregoing loss limitation only to offset his income from other passive sources (see "Passive Activity Loss Limitations").

Basis of the Units

A Unit holder's initial tax basis for his Units will be the amount of money he contributes to the Fund.

A Unit holder's basis is his Units increased by (a) his share of the non-recourse liabilities of the Fund, and (b) his share of profits. The adjusted tax basis of his Units will be decreased, but not below zero, by (1) distributions to the Unit holder by the Fund; (ii) reductions in his share of the non-recourse obligations of the Fund; (iii) his share of the losses of the Fund; and (iv) his share of Fund expenditures not chargeable to his capital account.

Under Regulation Section 1.752-1(a)(2), a partnership liability is a non-recourse liability to the extent that no partner or related person (for the purpose of Regulation Section 1.752-4(b)) bears any economic risk of loss. A partnership liability generally is not considered non-recourse to the extent that any partner guarantees the payment of such liability. If a Unit holder or a "related" person guarantees all or a portion of the non-recourse liabilities of the Fund, the other Unit holders' tax basis in their Units will not include such guaranteed portion of the Fund's non-recourse liabilities.

Similarly, if a partner or a person related to a partner loans funds to a partnership and the other partners are not personally liable for the repayment of the loan, only the lending partners may include that loan in the basis of their partnership interests. For example, if a Unit holder or one of his affiliates makes a loan to the Fund, the other Unit holders would not include any portion of such a loan in the basis of their Units.

The Fund may be a "tiered" partnership if it owns interests in other entities taxed as partnerships for federal income tax purposes. With respect to "tiered" partnerships, the Regulations provide that the "upper-tier" partnership's share of the liabilities of the "lower-tier" partnership will be treated as liabilities of the upper-tier partnership for purposes of applying Code Section 752 to the partners of the upper-tier partnership (Regulation Section 1.752-4(a)).

If a Unit holder's basis in his Units is reduced to zero, the amount of any distributions (including any deemed distributions due to a reduction in Fund non-recourse

liabilities) in excess of his share of the Fund's taxable income for the year will be treated as capital gain, except to the extent that ordinary income treatment is required for his *pro rata* share of depreciation recapture.

A partner may not deduct his share of losses of a partnership to the extent such losses exceed the partner's basis for his interest in the partnership. Any losses that are not currently deductible by a partner due to this limitation may be deducted when and to the extent the partner's basis is increased (for example, by the allocation of partnership income). The ability of a partner to claim his share of partnership losses will also depend on the impact of the "at risk" rules of Code Section 465 (see "At Risk Limitations") and the passive activity loss limitation rules of Code Section 469 (see "Passive Activity Loss Limitations").

Allocations of Profits and Losses

Under Code Section 704, a partner's distributive share of the income, gain, loss, deduction, or credit of a partnership is determined by reference to the partnership agreement, unless the allocation contained in the agreement does not have "substantial economic effect," in which case the allocation is determined by reference to the partners' interests in the partnership, taking into account all facts and circumstances.

Although it is intended that the Fund's allocations will be in accordance with the Unit holders' interests in the Fund, it is possible that the Internal Revenue Service will challenge the Fund's tax allocations and attempt to reallocate tax items among the Unit holders. Any such reallocations of tax items may have adverse tax and financial consequences to a Unit holder.

"At Risk" Limitations

Code Section 465 limits the amount of losses that a partner can deduct in a particular year to the amount that such partner is considered "at risk" at the close of the partnership's taxable year. Generally, a taxpayer is considered "at risk" to the extent of (i) the amount of money and the adjusted basis of property he contributes to an activity, plus (ii) any amounts borrowed with respect to an activity for which the taxpayer is personally liable or for which the taxpayer has pledged property (other than property used in the activity) as security. A taxpayer will generally not be considered "at risk" with respect to amounts protected against loss through non-recourse financing, guarantees, stop loss agreements or similar arrangements.

A taxpayer generally is not considered to be "at risk" for non-recourse obligations. Losses not deductible by reason of the "at risk" rules may be carried forward indefinitely and deducted at such time as the taxpayer becomes "at risk" to a greater extent with respect to the activity.

Passive Activity Loss Limitations

Code Section 469 generally provides that losses attributable to "passive activities" may be used only to offset income from passive activities. Code Section 469 applies to individuals, estates, trusts, personal service corporations (corporations providing services that are substantially performed by owner-employees), and closely-held corporations (corporations having 5 or fewer shareholders who own more than 50% in value of the stock).

Code Section 469 defines a "passive activity" as (i) the conduct of a trade or business in which the taxpayer does not materially participate or (ii) any rental activity (without regard to participation). Under Code Section 469, the interest of a limited partner in a limited partnership is not considered an interest with respect to which a person materially participates, except as provided in regulations. Accordingly, a Unit holder's investment in the Fund will be a passive activity, and any Fund losses allocated to the Unit holders will constitute passive losses.

Under Code Section 469, passive losses generally may be used only to offset passive income until the taxable year in which the taxpayer disposes of his interest in the activity producing the passive losses.

Passive income is defined as the income from passive activities. Passive income does not include (i) income received as salary or wages; (ii) income derived from a trade or business in which the taxpayer materially participates ("active income"); (iii) interest, dividends, annuities or royalties ("portfolio income") not derived in the ordinary course of business; (iv) gain or loss from the disposition of property used in the ordinary course of business producing portfolio income; or (v) gain or loss from the disposition of property held for investment which is not considered to be an interest in a passive activity.

Passive losses that are not deductible in a particular year may be carried forward indefinitely and used to offset passive income in subsequent years. In addition, upon a fully taxable disposition of a taxpayer's entire interest in the passive activity (other than to a related party), any unused passive losses from the activity for the year that have been carried forward, and the loss, if any, on the disposition, may be applied first to offset any income from that activity for the year (including the gain, if any, from the disposition); second, to offset any other passive income for the year; and third, any remaining unused passive losses from the activity may be used to offset the taxpayer's active and portfolio income.

Based on the foregoing, a Unit holder may use any Fund losses allocated to him only to offset his passive income. If the Fund losses are not fully deductible in the year incurred, they may be applied against passive income (that is not portfolio income) in future years. If any unused losses from the Fund remain when the Unit holder disposes of his entire interest in the Fund, these losses may be used in full at such time, first against passive income, and then against any other income of the Unit holder.

The foregoing analysis assumes that the Fund constitutes a single "activity" for purposes of Code Section 469. If the Fund consisted of more than one activity, the passive activity loss limitations would apply separately to each such activity.

The Regulations provide flexibility in grouping a taxpayer's trade or business activities and rental activities for purposes of applying the passive activity rules. In this respect, one or more trade or business activities or rental activities may be treated as a single activity if the activities constitute an appropriate economic unit for the measurement of gain or loss for the purposes of Code Section 469. However, generally rental activities may not be grouped with a trade or business activity. Further, a taxpayer that owns an interest as a limited partner or limited entrepreneur (e.g., a member of an LLC who does not actively participate in the management of the LLC) may not group the following activities with any other activity: (i) holding, producing or distributing motion picture films or video tapes, (ii) farming, (iii) leasing personal property, (iv) exploring for or exploiting oil and gas resources, and (v) exploring for or exploiting geothermal deposits. A partnership must group its activities under the rules of the Regulations and once the partnership groups its activities, the partner may group those activities with each other, with activities conducted directly by the partner, and with activities conducted through other C corporations subject to Code Section 469, S corporations and partnerships, except that a partner may not treat activities grouped together by any 469 entity as separate activities.

Whether or not the Fund's activities are aggregated into a single activity should not affect a Unit holder's ability to offset passive losses from one Fund activity against passive income of another Fund activity. However, any previously suspended passive losses from a particular activity that is part of a single activity will not become deductible against non-passive income upon a disposition of that particular activity alone, but only upon a taxable disposition by the Fund of all of its interest in the single activity, or the Unit holder's disposition of his Units. Further, the Fund's debt investments or equity investments in C corporations may produce interest income or dividend income, respectively, that is classified as portfolio income for purposes of Code Section 469, and the Fund's other equity investments may produce losses classified as passive under Code Section 469, and in this situation a Unit holder's share of passive losses may not be utilizable to offset his share of portfolio income.

Distributions

Distributions (which include any deemed distribution arising from a reduction, by repayment or otherwise, in Fund liabilities) made to a Unit holder generally do not result in any recognition of gain for federal income tax purposes to the extent the amount of cash or debt reduction does not exceed the basis of the Unit holder's Units. A Unit holder's adjusted tax basis in his Units is reduced by the amount of the distribution. Distributions of cash (including reductions in liabilities) by the Fund in excess of a Unit holder's adjusted tax basis in his Units will result in the recognition of gain to the extent of such excess. Such gain is considered gain from the sale or exchange of the Units by

the Unit holder and in certain cases may be treated in part as ordinary income because of the depreciation recapture provisions. (see "Sale or Disposition of Units").

Sale or Disposition of Units

Upon a sale of a Unit, a Unit holder will realize gain or loss in an amount equal to the difference between the amount realized and his adjusted tax basis in the Unit. Under Code Section 751(a), any gain realized by a selling partner is taxed as ordinary income to the extent of the partner's *pro rata* share of "ordinary income assets" of the partnership. The balance of gain, if any, or the loss is treated as a capital gain or loss. In determining the amount received upon the sale or exchange of a Unit, a Unit holder must include, among other things, his allocable share of the outstanding amount of the indebtedness to which the Fund's property is subject. Therefore, it is possible that the gain realized on the sale of a Unit may exceed the cash proceeds of such sale. As a result, in some cases, the income taxes payable with respect to such gain may exceed such cash proceeds.

Certain Deductions to Be Claimed

Organization, Start-Up and Syndication Costs. Under the Code, neither a partnership nor its partners may deduct amounts paid or incurred in the promotion and sale of the interests in the partnership ("syndication" expenses), including those amounts paid as commissions, professional fees, and printing costs. These expenses must be capitalized and may not be amortized. Under the Regulations, the following expenses constitute non-deductible syndication expenses which must be capitalized and not amortized: (i) brokerage fees; (ii) registration fees; (iii) legal fees for securities advice and advice pertaining to the adequacy of tax disclosures in the offering memorandum for securities law purposes; (iv) accounting fees for the preparation of representations to be included in the offering memorandum; and (v) costs of printing the offering memorandum.

However, to the extent a partnership pays or incurs organizational expenses incidental to the creation of the partnership or start-up expenditures with respect to an active trade or business, the partnership generally may elect to capitalize such expenditures and amortize them ratably over a period of not less than 180 months, commencing in the month in which the partnership begins business. Organizational expenses include (i) legal fees for services incidental to the organization of the partnership, such as the negotiation and preparation of a partnership agreement; (ii) accounting fees for services incidental to the organization of the partnership, and (iii) filing fees. On the other hand, organizational expenses do not include (i) expenses incurred in connection with the acquisition of partnership assets or the transfer of assets to the partnership; (ii) syndication expenses; and (iii) certain other expenses. Start-up expenditures include (i) certain expenses related to the investigation of the creation or acquisition of an active trade or business; and (ii) expenses paid or incurred pursuant to the creation of an active trade or business, which expenses would be deductible if they were incurred after the commencement of the particular business operation to which they relate.

The Fund has incurred organizational expenses which it will elect to amortize over 180 months. Additionally, the Fund has incurred or may incur start-up expenditures which the Fund, if it is eligible to do so, intends to amortize over a 180 month period. Any costs incurred by the Fund associated with offering of the Units will be capitalized by the Fund as non-deductible syndication costs.

Other Limitations on Deductions. Other limitations may apply to reduce or eliminate the deductibility by a Unit holder of his share of the Fund's expenses, including fees paid to the management company. For example, to the extent deductions of the Fund are deemed not to be incurred in connection with a business, they will be treated as miscellaneous itemized deductions that, in the case of Unit holders, are deductible only to the extent that, when taken together with other similar deductions, they exceed 2% of the Unit holder's adjusted gross income. Also, miscellaneous itemized deductions are not deductible by a Unit holder in computing the Unit holder's alternative minimum tax.

Certain Tax Consequences to Non-United States Investors

Foreign Individuals Potentially Subject to U.S. Tax on Their Worldwide Income. Individuals who are not citizens of the United States but who are treated as "residents" of the United States for federal income tax purposes are subject to United States federal income tax on their worldwide income, including but not limited to their income from the Fund. For this purpose, an individual who is a lawful permanent resident of the United States (e.g., a holder of a "green card") generally will be treated as a resident. In addition, an individual who is not a lawful permanent resident under the immigration laws may nevertheless be a "resident" for tax purposes based upon a "substantial presence" in the United States as defined under Code Section 7701(b). For example, under that Code Section, an individual may be a "resident" if the individual is physically present in the United States on all or any part of a certain number of days, determined under a formula, within a three-year testing period. An individual present in the United States under certain types of temporary visas (e.g., teachers or students) may be excepted from the "substantial presence" test, but the determination whether an individual is a resident can be a complex determination. Potential investors who are foreign individuals should consult with their own tax advisors to be certain of their tax status under United States law.

Taxation of Non-U.S. Individuals Not Treated as Tax Residents. Potential investors who are neither citizens nor residents (as determined for tax purposes) of the United States ("Non-U.S. Investors") are subject to additional tax rules. Generally, Non-U.S. Investors are taxable on certain United States source passive investment income ("FDAP"), including dividends, interest and rents, at a flat rate of 30% on the gross amount of such income, without reduction for any expenses or other tax deductions, and that tax is satisfied by withholding of tax on payments of such amounts to the Non-U.S. Investors. In the case of a partnership, the partnership generally will be required to withhold based on the share of its FDAP allocable to its Non-U.S. Investors. The 30% tax on the gross amount of FDAP may be reduced or eliminated if the Non-U.S. Investor

is a resident of a country with which the United States has a bilateral income tax treaty, provide that the Non-U.S. Investor submits timely certification of his entitlement to treaty relief. Certain other exceptions apply which may reduce or eliminate the tax on certain types of FDAP, including interest income. Non-U.S. Investors generally are not subject to tax on capital gains unless either (1) the gains are attributable to a United States trade or business or (2) the Non-U.S. Investor is an individual who is present in the United States for more than 183 days during the taxable year in which the gains are realized.

The 30% taxation of FDAP will not apply to any income that is effectively connected with the active conduct of a trade or business within the United States. The net income from such a trade or business within the United States realized by a Non-U.S. Investor will be subject to tax at the regular graduated income tax rates applicable to resident individuals. Such income currently will be subject to income tax withholding, generally at a rate of 35%. A Non-U.S. Investor who realizes any such income will be required to file a United States federal income tax return with respect to the taxable year in which the income is realized.

A Non-U.S. Investor in the Fund who is allocated a share of passive income (including capital gain) or active trade or business income realized by the Fund will be subject to tax under the above rules as if such Non-U.S. Investor had realized such income directly. Any withholding of federal income taxes by the Fund attributable to a Non-U.S. Investor will be treated as a distribution to that particular Unit holder.

THE FOREGOING IS NOT A COMPLETE DISCUSSION OF ALL OF THE FEDERAL INCOME TAX CONSEQUENCES TO A NON-U.S. INVESTOR; THERE ARE STATE AND LOCAL TAX AND ESTATE TAX CONSEQUENCES TO BE CONSIDERED. ALSO, FOREIGN TAXES MAY BE IMPOSED ON A NON-U.S. INVESTOR'S INCOME FROM THE FUND. INVESTORS ARE STRONGLY ADVISED TO CONSULT WITH THEIR TAX ADVISORS WITH RESPECT TO THE TAX CONSEQUENCES OF AN INVESTMENT IN THE FUND.

Compliance Matters

Tax Returns/Audits. The Fund will furnish annually (and in certain circumstances, periodically) to each of the Unit holders sufficient information from the Fund's tax return for the Unit holders to prepare their own federal income tax returns.

The tax treatment of items of partnership income, loss, deduction, and credit will be determined at the partnership level. In addition, all partners are required, on their individual federal income tax returns, to treat partnership items in a manner that is consistent with the treatment of such items on the partnership's return.

The tax matters partner for the Fund will be the management company. The tax matters partner is required to, among other things, keep the other partners informed of all administrative and judicial proceedings and represent the Fund in such proceedings. The

tax matters partner is authorized to obtain judicial review of any proposed readjustment of partnership items. Although every partner with an interest in the outcome is allowed to participate in an action filed by the tax matters partner, the outcome of that proceeding will bind all partners. If the tax matters partner fails to seek judicial review of a proposed adjustment of partnership items, other partners may seek such review, provided that there can be only one judicial proceeding with respect to a partnership. The foregoing procedures may adversely affect a Unit holder's ability to deal with adjustments to his income tax return resulting from adjustments made with respect to the Fund.

If any of the tax returns of the Fund are audited, it is possible that substantial legal and accounting fees will have to be paid to substantiate the position of the Fund, and such fees would reduce the cash otherwise available to meet Fund obligations or for distribution to the Unit holders. Such an audit may result in adjustments to each Unit holder's income tax return. An audit of the Fund's tax returns may also result in an audit of non-partnership items on each Unit holder's income tax returns, which in turn could result in adjustments to such items. The costs incurred by a Unit holder in connection with an IRS audit of his income tax return will be borne solely by that Unit holder.

State and Local Taxes

In addition to federal income taxes, the Fund and the Unit holders may be subject to other taxes imposed by various jurisdictions, such as state and local income taxes. Although a detailed analysis of these various taxes is not presented here, investors should consider the potential state and local tax consequences of an investment in the Fund. For example, a Unit holder's distributive share of all or a portion of Fund income, gains, losses and deductions, profits and losses, may be required to be included in determining his income subject to tax under the laws of the state or locality in which he is a resident, as well as jurisdictions in which the Fund does business.

For example, with respect to Unit holders who are not residents of the State of Louisiana, if the Fund has Louisiana source income allocated to such Unit holders, the Fund will be required to file composite returns and make composite payments of tax on behalf of all of its Unit holders who are not residents of Louisiana. The current rate of the Louisiana composite tax is 6% and any composite payment on behalf of a non-resident Unit holder will be treated by the Fund as a distribution to the non-resident Unit holder.

The State of Mississippi also requires a partnership to withhold income tax on a non-resident partner's allocable share of Mississippi source income. The Fund will withhold at the required withholding rate (currently 5%) of Mississippi source income allocable to Unit holders who are not residents of Mississippi. Any such withholding will be treated by the Fund as a distribution to the non-resident Unit holder. The withholding by a partnership does not relieve the non-resident partner of his obligation to file a Mississippi income tax return. A partnership is allowed to file a composite return on behalf of non-resident partners who have no activity in Mississippi other than that from the partnership. If a composite filing is allowable with respect to a non-resident partner and the composite return is properly filed and all taxes, including applicable interest and

penalty is paid, the individual non-resident partner is relieved of his separate individual filing requirement. If the Fund elects to file a composite return on behalf of any non-resident Unit holders, the composite tax payment attributable to the non-resident will be treated as a distribution by the Fund to that non-resident Unit holder.

The Fund intends to supply the Unit holders with information regarding their income, if any, derived from various jurisdictions in which the Fund does business. Unit holders are urged to consult with their own tax advisors regarding state and local tax laws.

U.S. Federal Estate and Gift Taxation

U.S. residents generally are subject to federal estate taxes on their taxable estates at death which includes the value at the time of a decedent's death of all of his property, real or personal, tangible or intangible, wherever situated. Additionally, U.S. residents are subject to gift taxes on the transfer of any property by gift. U.S. estate taxes can also apply to a Non-U.S. Investor to tax that part of his gross estate which at the time of his death is situated in the United States. For example, shares of stock in a domestic U.S. corporation owned by a non-resident alien is treated as property situated in the United States for purposes of this provision. Further, the IRS has ruled that a partner's interest in a partnership is situated where the partnership's business is carried on for purposes of applying the U.S.-United Kingdom Estate Tax Convention. Thus, a Unit in the Fund held by a Non-U.S. Investor could possibly be subject to U.S. estate tax on the death of the Non-U.S. Investor.

Additionally, state and local taxing jurisdictions may also impose state, inheritance and/or gift taxes on their residents or on property deemed situated within their respective jurisdictions.

RE: Gulf Coast Funds Management (GFMC)
202 East State Street, Suite 700
Ithaca, NY 14850

Application: Gulf Coast Funds Management's Request for Amendment of an Existing Regional Center
Applicants: David Voelker and George E. Brower II

RE: Amendment Proposal for an Existing Regional Center under the Immigrant Investor Pilot Program.

REQUEST FOR ADDITIONAL EVIDENCE

This office is unable to complete processing of your request without further information. **Please read and comply with those items requested below, then resubmit the evidence requested to the address listed below, including this letter, within 87 days.**

If your submission is more than several pages, please use acco-fasteners to attach the documents at the top of each page.

USCIS
Office of Service Center Operations, EB-5 Investor Program
20 Massachussetts Avenue, NW, MS 2060
Washington, DC 20529

The business aspects of the Regional Center must be fully explained as to its structure. This aspect of a proposal includes, but is not limited to, the following basic elements or samples of them ***as applicable to the business approach and structure to be used by the Regional Center:***

- An overall Business Plan - mandatory
- Draft Operating Agreement
- Draft Partnership Agreement
- Draft Subscription Agreement

- Draft Escrow Agreements and Instructions (one for capital and one for any service fees). Such agreements usually include an "out clause" in the event of an unsuccessful visa process as a marketing tool[1] but are not required.
- List of proposed reputable financial institutions to serve as the Escrow Agent(s).
- Draft of an Offering Letter, Memorandum, Confidential Private Placement Memorandum, or similar offering made in writing to an immigrant investor through the Regional Center.
- Draft Memorandum of Understanding, Interagency Agreement, Contract, Letter of Intent, Advisory Agreement, or similar agreement to be entered into with any other party, agency or organization to engage in activities on behalf of or in the name of the Regional Center.

The amendment proposal contains standard documents to be used in dealings with alien investors. The HK Auto Private Placement Memorandum (PPM) on pages ii, iii, and 17, as well as the Gulf Coast I Fund PPM on pages v and 19 make reference to USCIS regulations and Policy that funds must be invested for five years. These are misstatements that need correction or in the alternative, please cite the regulation or Policy Memorandum to justify such statements.

To make an inquiry or ask a question about the Regional Center Program you may send an e-mail to: USCIS.ImmigrantInvestorProgram@dhs.gov

Sincerely,

Barbara Q. Velarde
Chief
Office of Service Center Operations

[1] **NOTE: Under NO circumstances** may any agreement or document in support of an investor's I-526 petition offer or imply return or reimbursement of his/her capital investment should the subsequent I-829 Petition to Remove Conditions be denied by USCIS. The USCIS considers any such reimbursement provision within the period of an alien investor's conditional residence prohibited by precedent decision in Matter of Izumii.

Re: Amendment to Gulf Coast Funds Management Regional Center

Dear Ms. Velarde: (b)(4)

This letter requests an amendment to the Gulf Coast Funds Management Regional Center (GCFM) approval and designation issued by the USCIS on August 18, 2008 (the "Approval"). GCFM is requesting this amendment in connection with the establishment of two separate GCFM funds that will seek to raise a total of [redacted] of EB-5 immigrant investor capital for projects in the GCFM region, including two large-scale manufacturing projects.

First, Gulf Coast Automotive Investment Fund A-1 (GCAIF A-1) has been formed solely for the purpose of making EB-5 investments in Hybrid Kinetics Automotive Corporation ("HKAC"), a Mississippi limited liability company established to build and operate an automotive manufacturing facility in Mississippi (the "HKAC Project"). While the first GCFM fund for the HKAC Project will seek to raise [redacted] it is expected that a series of identical funds will be established to later invest in the HKAC Project in the same manner.

Second, Gulf Coast Fund 1 (GCF) is a separate fund. It will be structured as a fund-of-funds and will invest in new and expanding businesses or projects headquartered or with substantial operations in the GCFM approved geographic region. Among other investments,

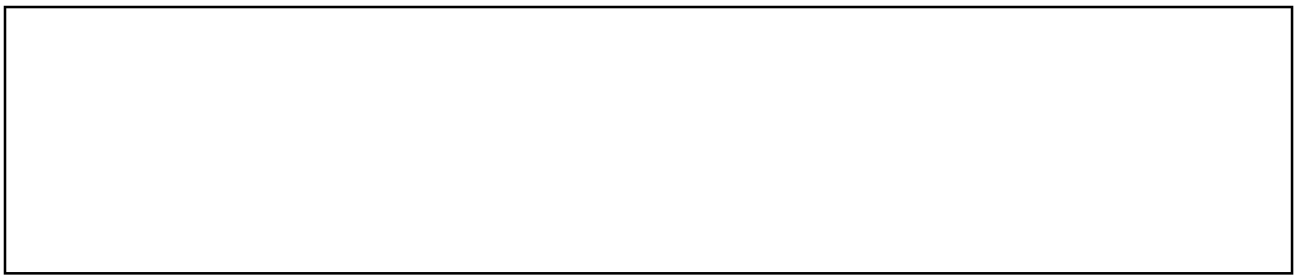
GCF will seek to extend a loan to a shipbuilder to fund construction of a shipyard in Houma, Louisiana.

We discuss each of these large and exciting projects in more detail below.

(b)(4)

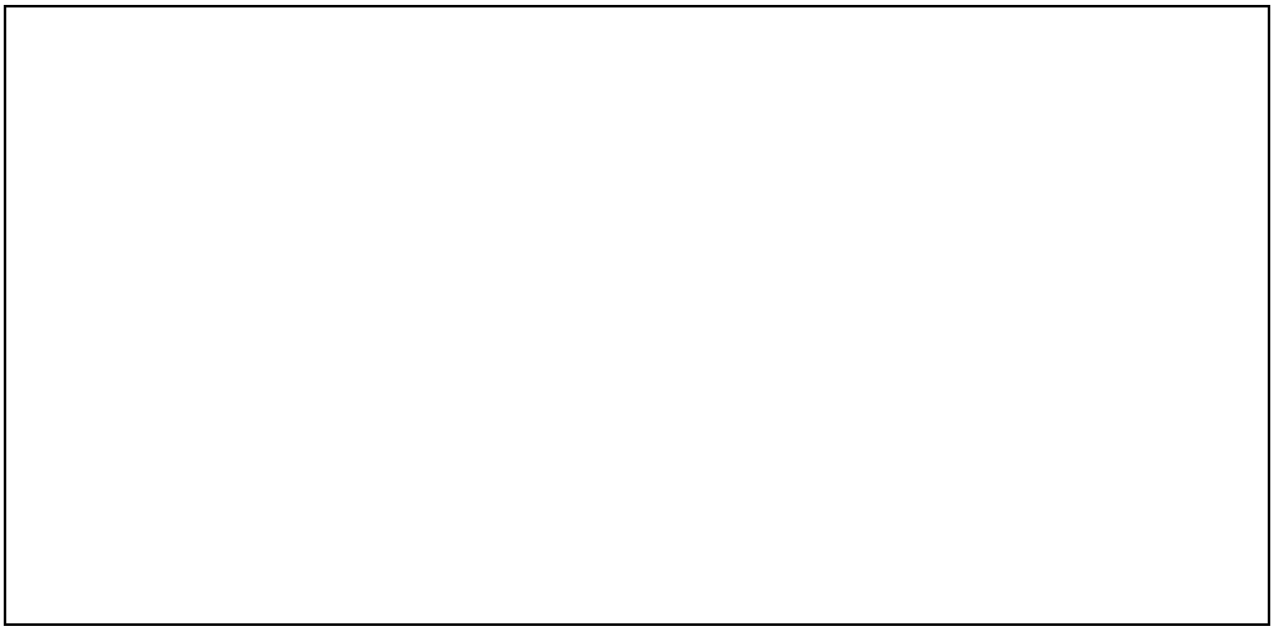
Gulf Coast Automotive Investment Fund

(b)(4)



Gulf Coast Fund 1

(b)(4)

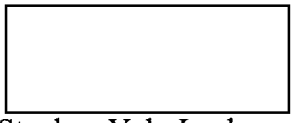


Summary

The two projects described above represent immediate and significant investment dollars for the ailing U.S. economy. We therefore respectfully request that you expeditiously approve this amendment. Please contact me if you have any questions.

Sincerely,

(b)(6)



Stephen Yale-Loehr

SUMMARY

The Offering

The EB-5 Immigrant Investor Program

EB-5 visas may be issued to immigrants and their immediate families by investing in an approved "regional center" projects such as our Fund. A foreign investor may apply for a conditional immigration status to live, work and study in the United States, once his or her investment is made. If the Fund invests this money in businesses within the region that create at least ten new jobs within two years, the immigrant investors receive permanent resident status in the United States, and eventually become eligible for U.S. citizenship, should they so choose. In the section of this offering memorandum entitled "Frequently Asked Questions about the EB-5 Visa Program," beginning on page 28, you will find a detailed discussion of the EB-5 program. You can also read about the program on our website: www.GulfCoastFunds.com.

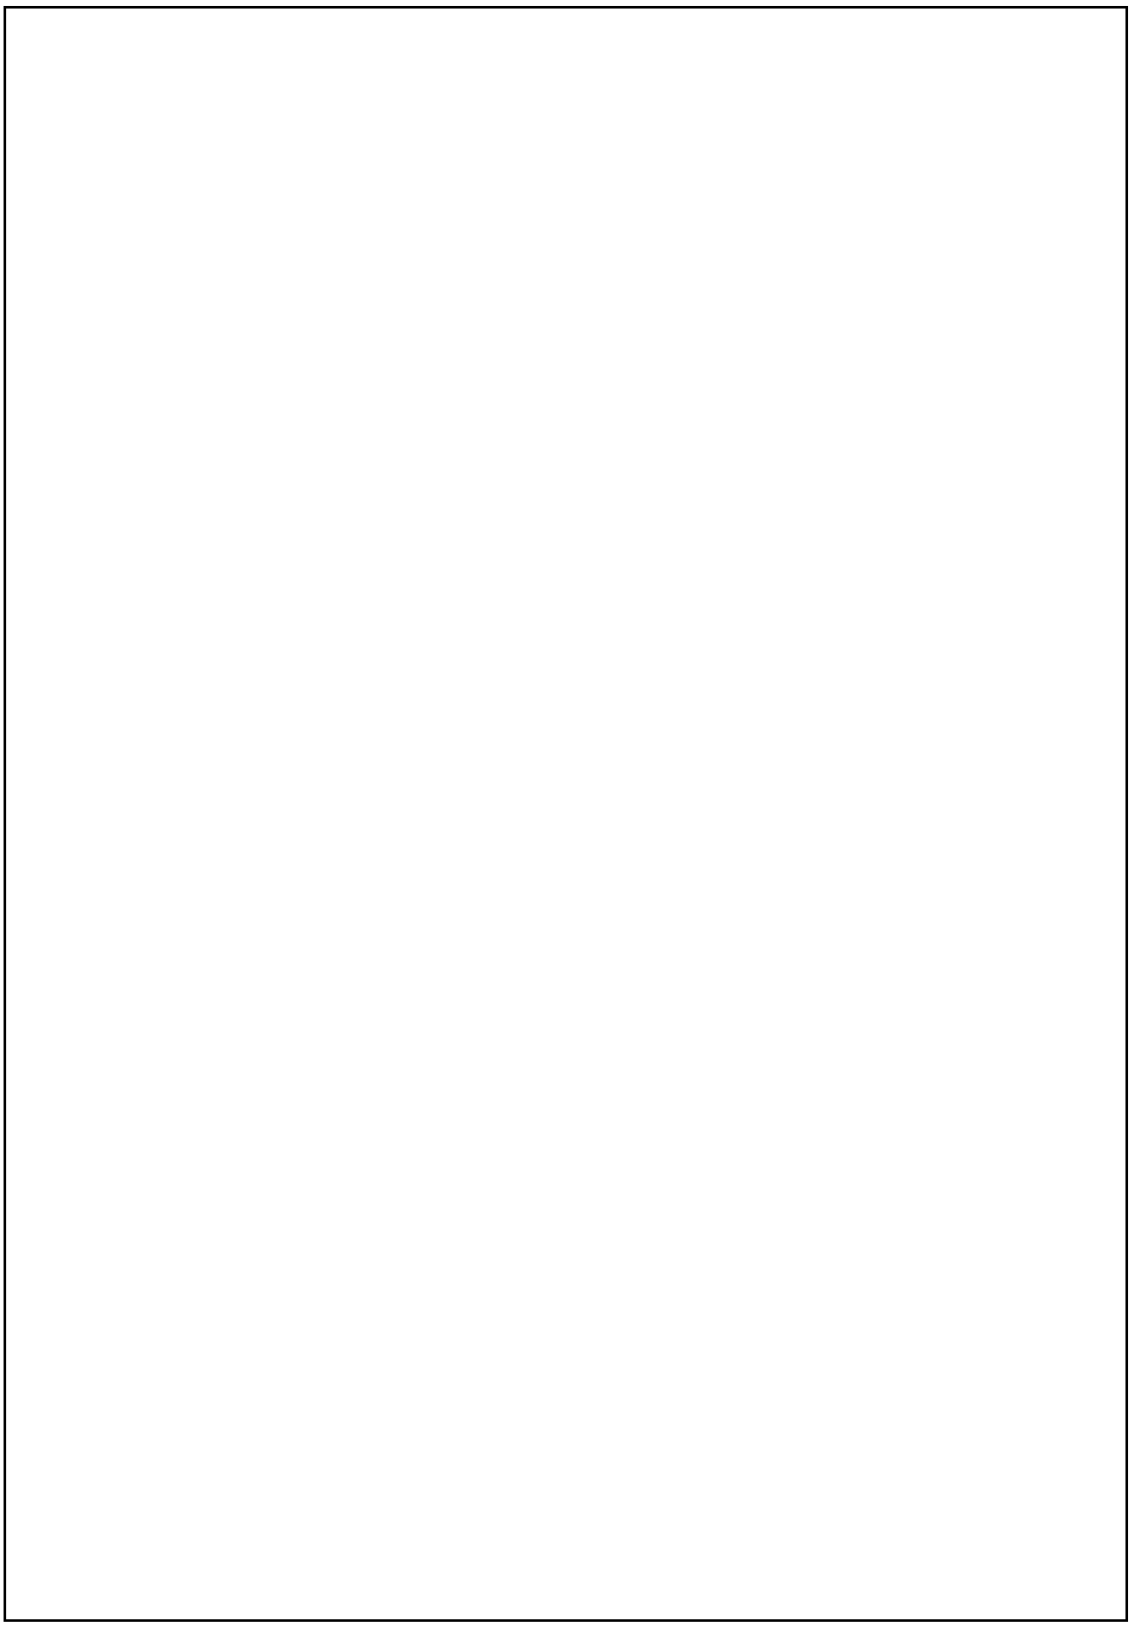
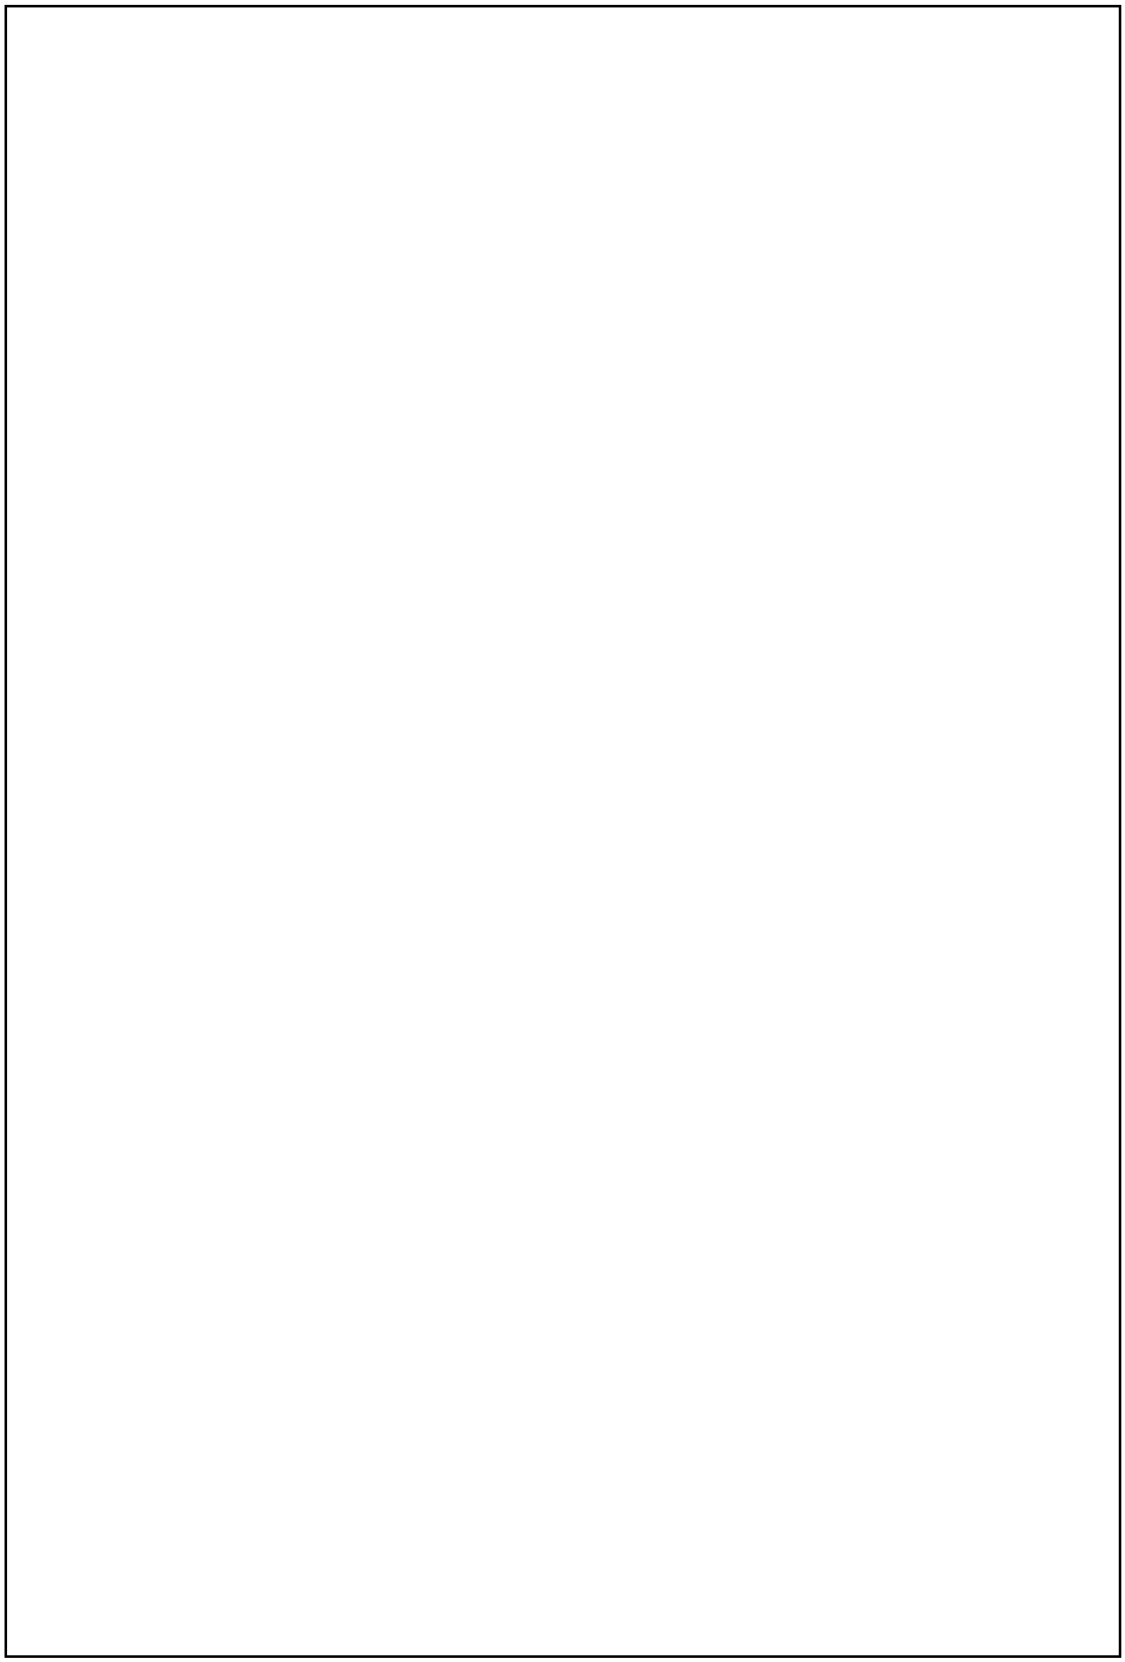
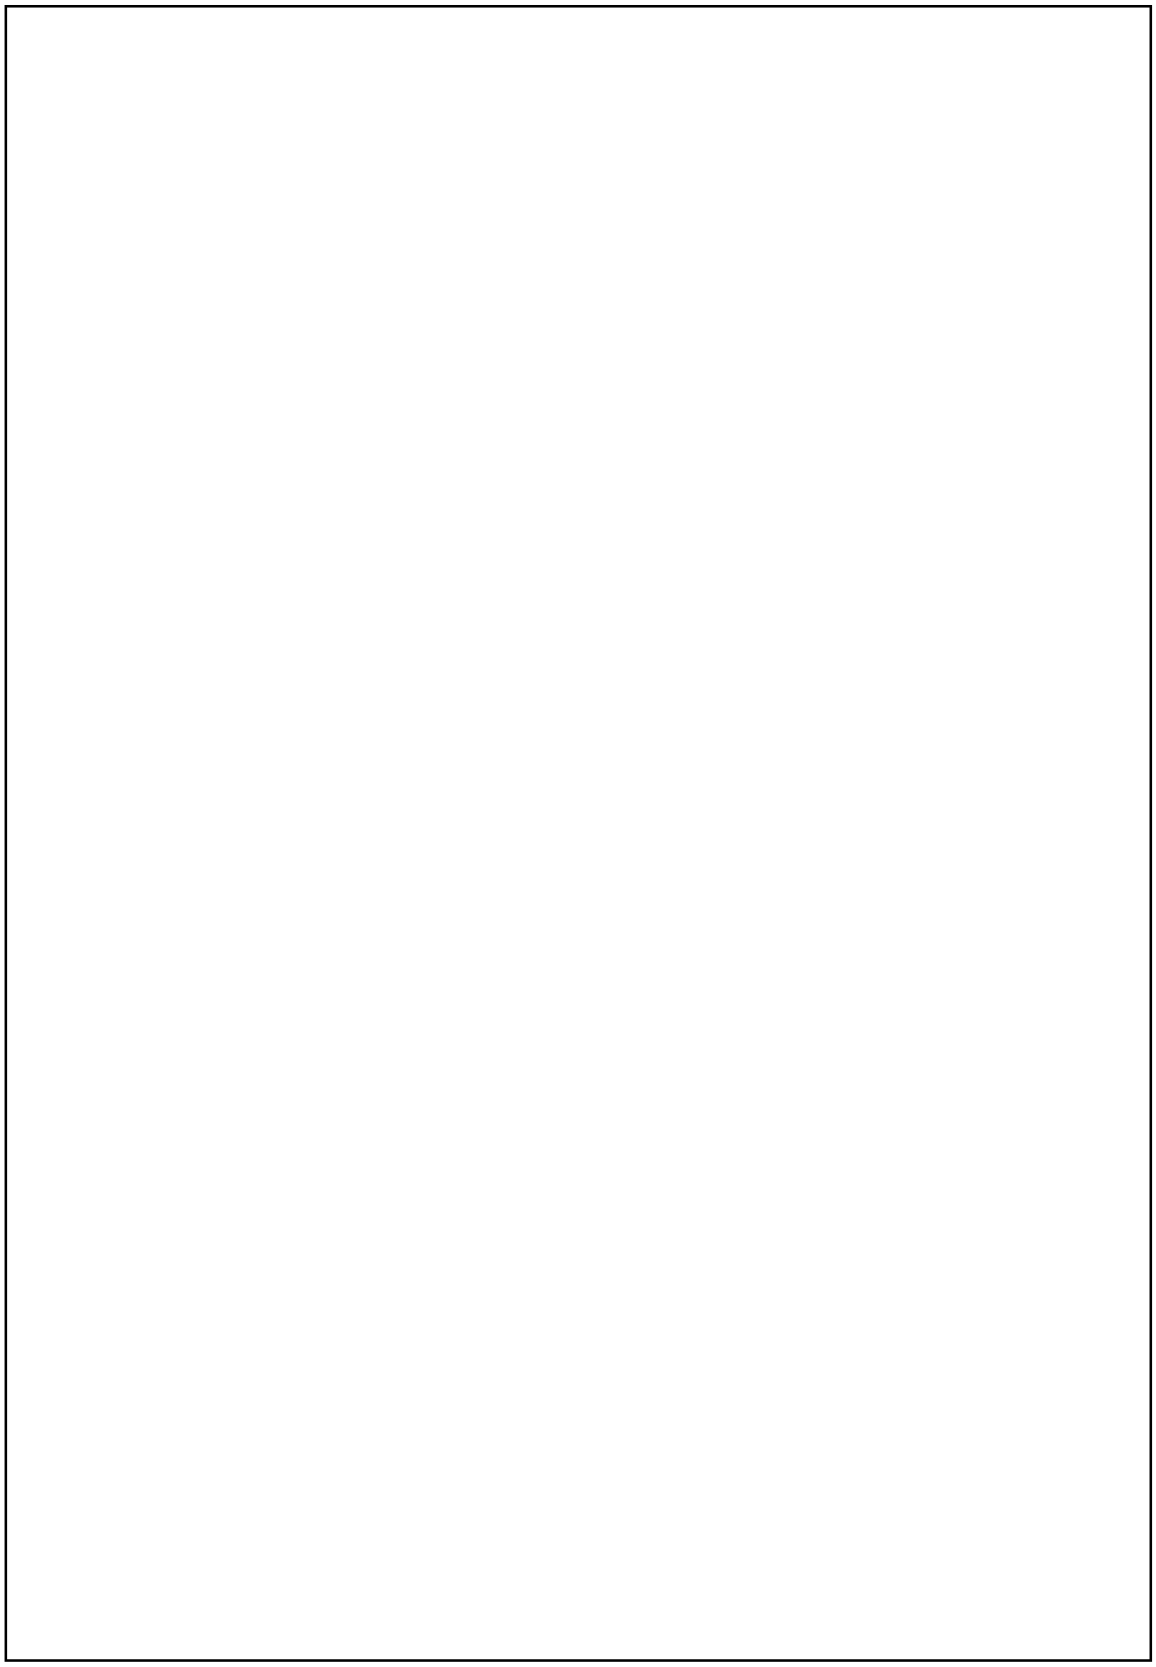
RISK FACTORS



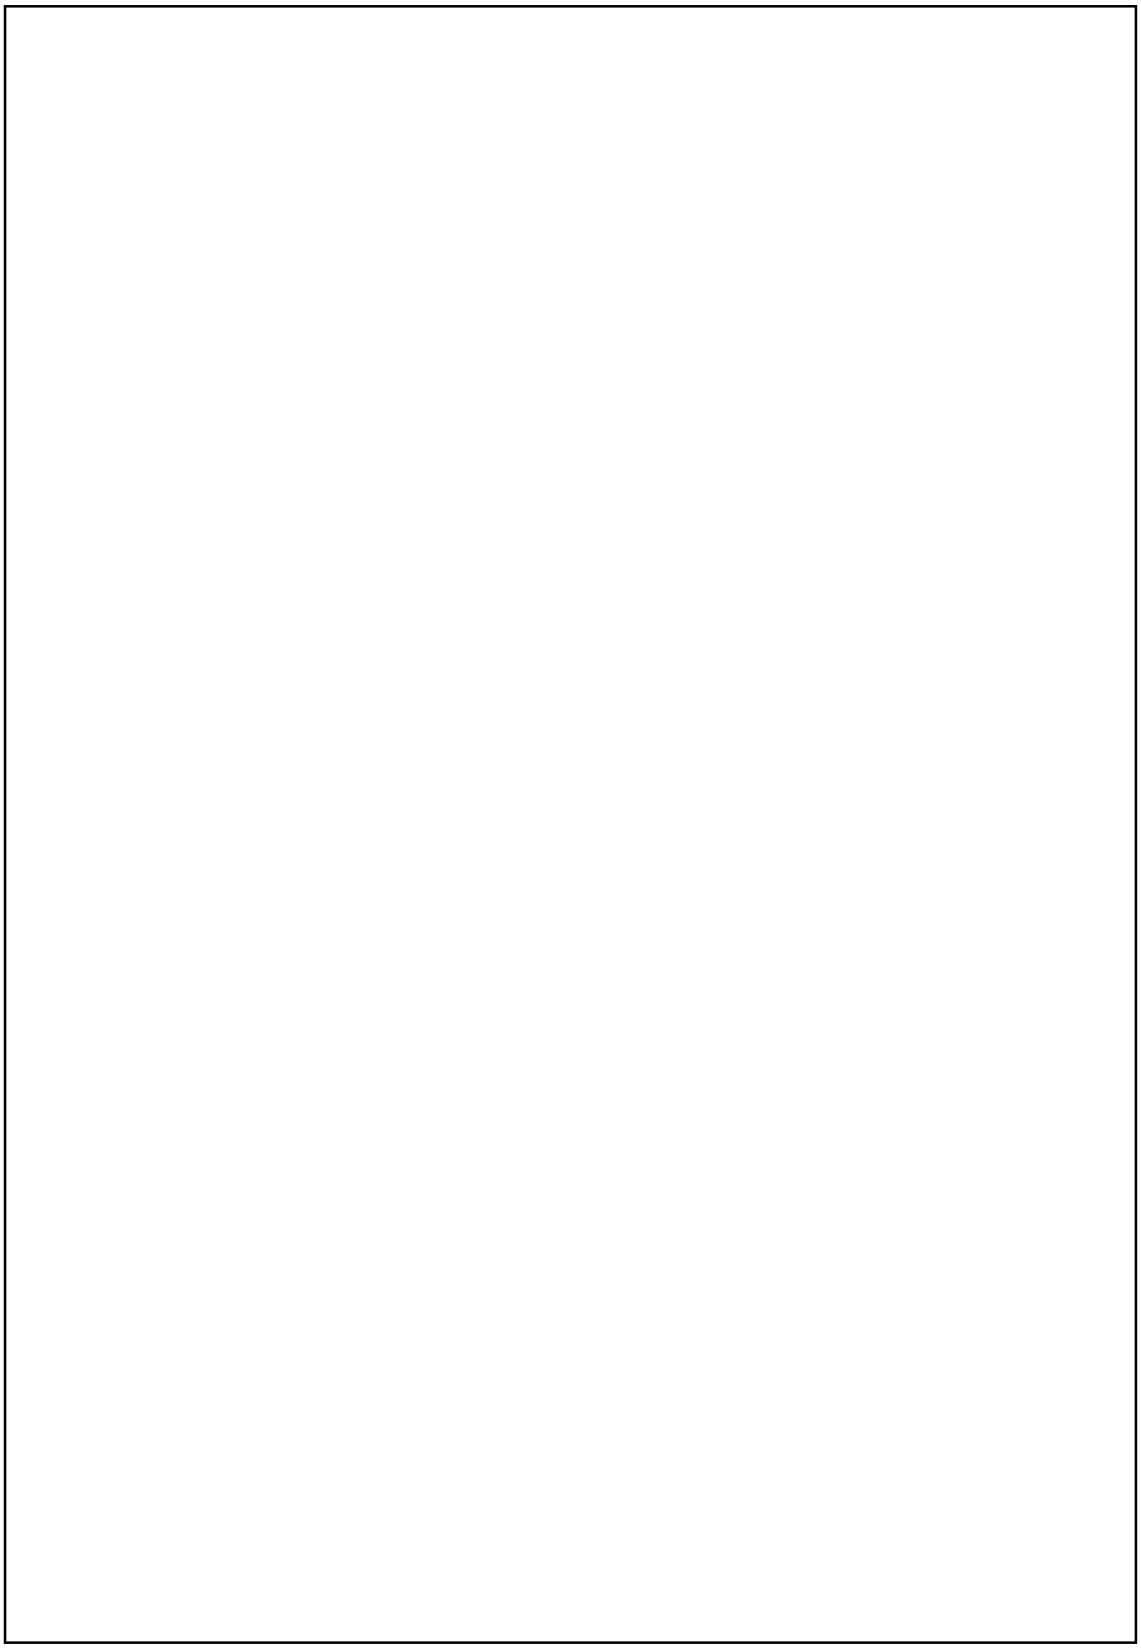
(b)(4)



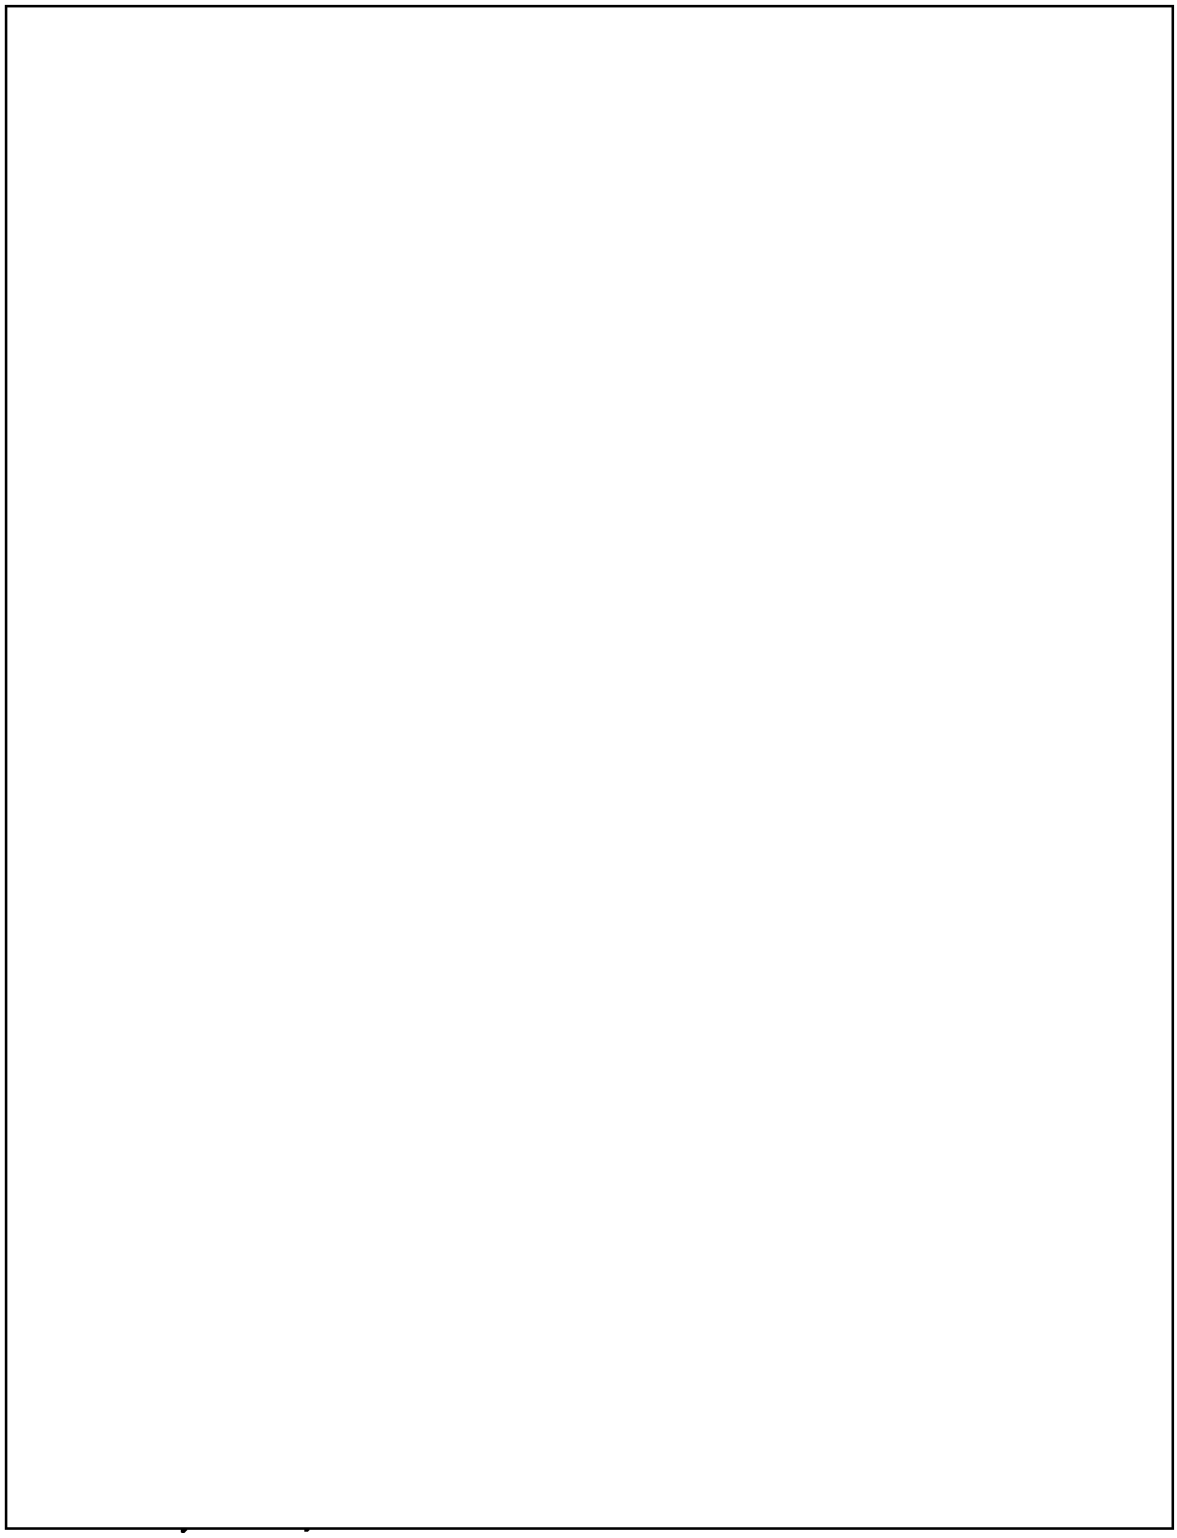
(b)(4)



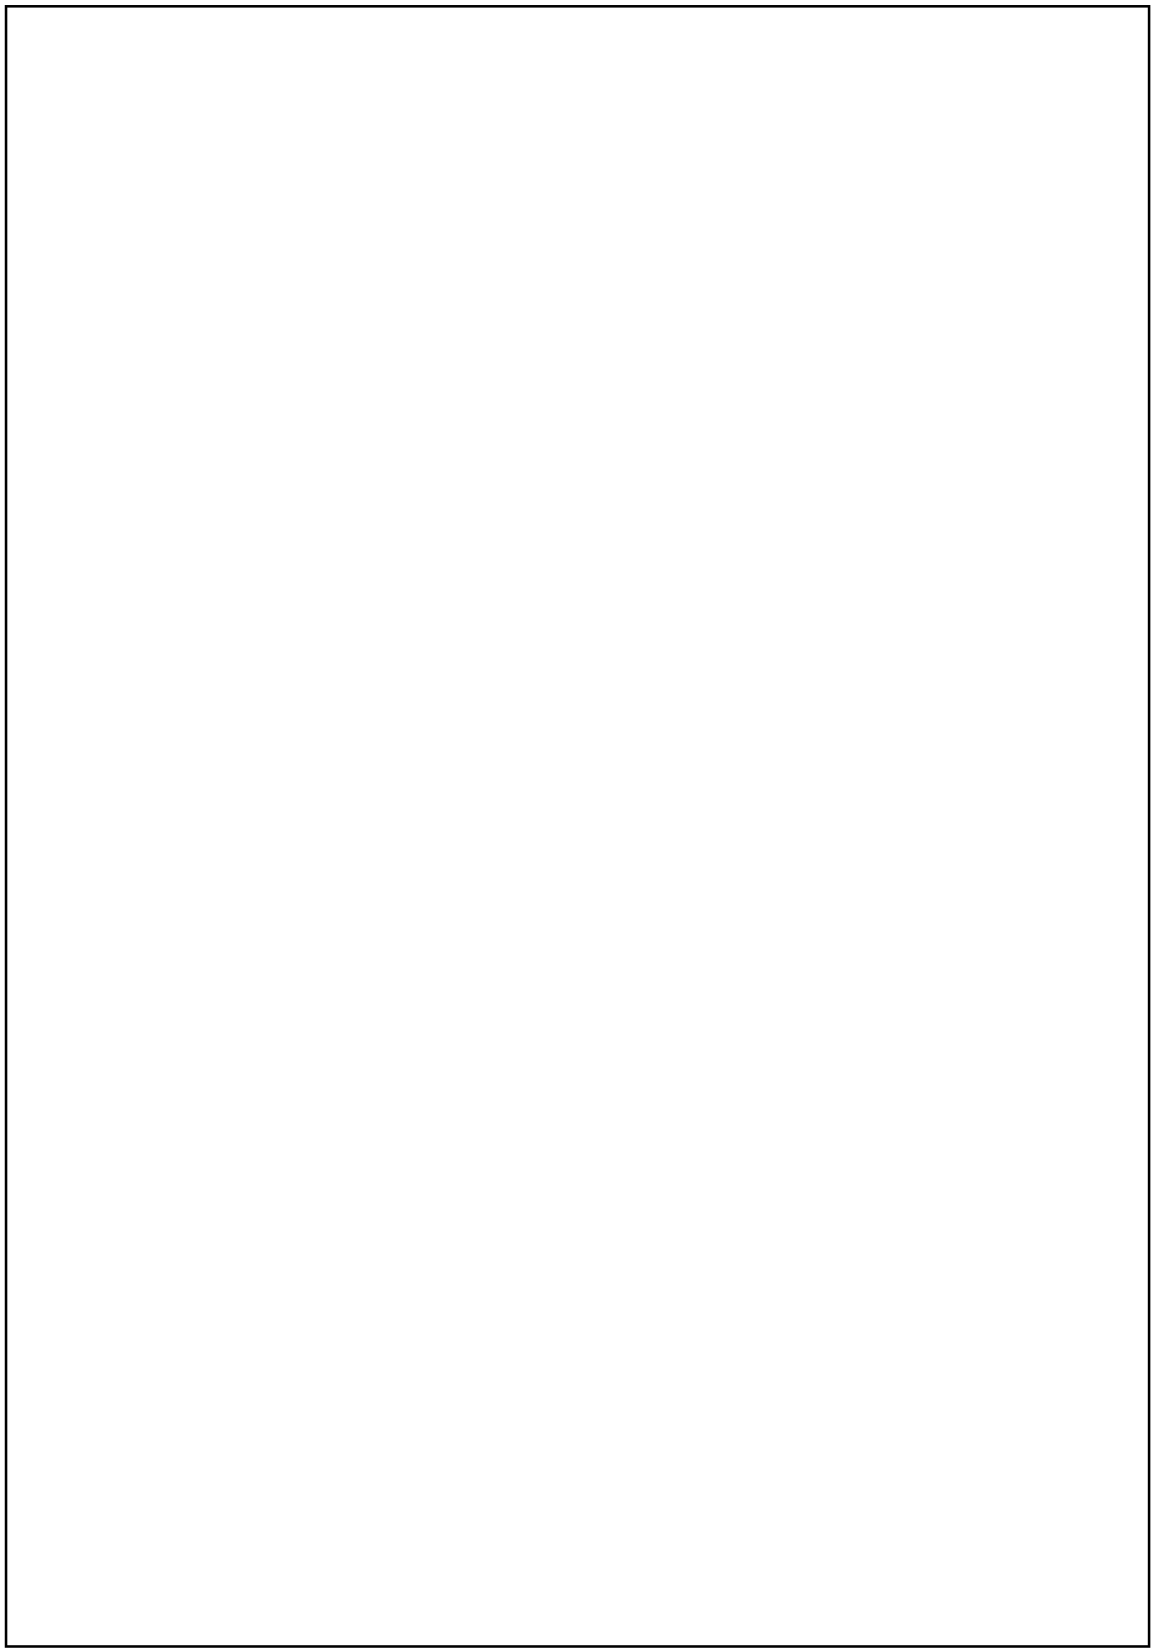
(b)(4)



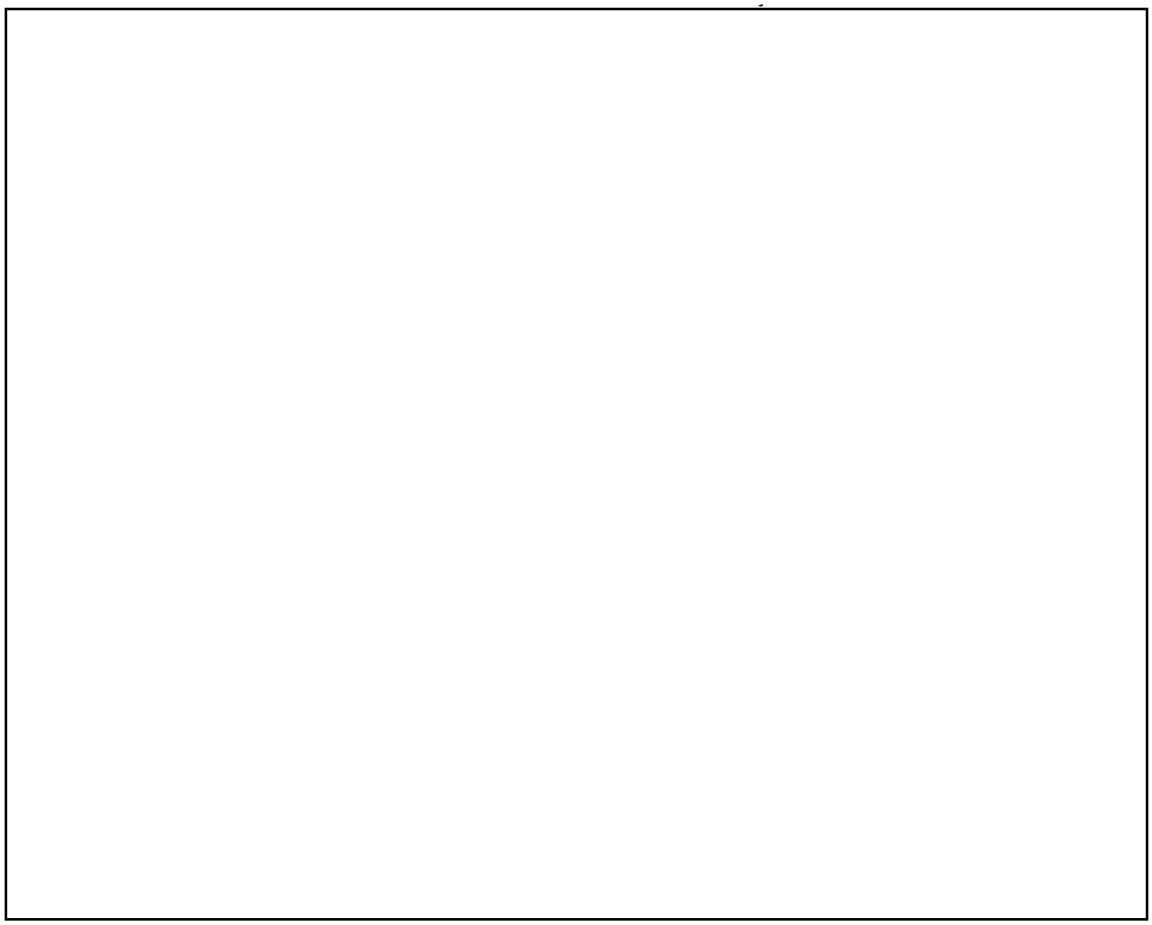
(b)(4)



(b)(4)



(b)(4)



Immigration risks

The investor himself and herself must meet the requirements under the EB-5 program. Each purchaser of a Unit must understand that the Fund, the management company and each of their affiliates make no representation or warranty of any kind concerning whether an investment in the Fund will meet the requirements of the EB-5 program or other U.S. immigration requirements. Each investor in a Unit must further understand that there can be no assurance that an investment in the Unit will result in his or her family receiving an EB-5 visa, conditional resident status or permanent resident status. Please carefully consider the following immigration risks, and discuss these and other immigration risks with your personal immigration lawyer.

As a Unit holder, you will be subjected to certain general immigration risks faced by all immigrants to the United States.

The process of obtaining conditional resident status and permanent resident status involves many factors and circumstances that are not within the control of the Fund. These include the investor's past history and source of funds, immigration visa backlogs,

potential changes in immigration laws and regulations (including laws and regulations specific to the EB-5 immigrant investor program) and quotas established by the United States government limiting the number of visas available to qualified individuals seeking conditional resident status under the EB-5 program. Although the Fund has been structured with the objective of providing Unit holders with eligibility for conditional and permanent resident status under the EB-5 regional center provisions of the U.S. immigration laws, no assurance can be given that each Unit holder will obtain approval of his or her particular immigrant application. Purchase of a Unit does not guarantee conditional or permanent residency in the United States. Furthermore, no assurances or advice can be given that conditional resident status will be converted to permanent resident status.

An investment in a Unit is only a part of the requirement for meeting EB-5 residency status. In addition, the USCIS will require that you pass a background check.

Each immigrant investor in the United States is subjected to a thorough background check. An EB-5 immigrant investor's background (or that of an immediate family member) may not meet the USCIS criteria for temporary or permanent residency in the United States. For example, among other criteria, the following may be grounds for denial of immigration benefits for the immigrant, and/or other members of the immigrant's family: having a communicable disease (e.g., AIDS) or other dangerous contagious disease; having been at any time involved with, trafficking in, or taking, illegal drugs; having been convicted of certain crimes; having committed a fraud or misrepresentation to a U.S. Government official; or having violated U.S. immigration law in the past.

As a result of participation in the EB-5 program and as a result of your investment in the Fund, you must pay income taxes in the United States on your world-wide income. You should consult your personal tax advisor about this obligation.

As an EB-5 participant, you will have to pay taxes in the United States on your world-wide income. As a member of the Fund, which is a limited liability company, your proportionate share of the Fund's income will be "passed-through" to you for U.S. Federal income tax purposes. You will also be required to include in income your proportionate share of the taxable income of the Fund for the purposes of any state of which you are a resident. Please consult your personal tax advisor about the tax consequences of an investment in the Fund. Further information about these matters is included in this private placement memorandum under the heading "Certain U.S. Federal Income Tax Considerations," beginning on page 33.

	(b)(4)

(b)(4)

As a Unit holder, you will not have the right to transfer your Unit for five years, and no market for Units is likely ever to exist.

The Fund's operating agreement includes provisions that prohibit Unit holders from any transfer of their Units for five years after purchase. This provision complies with the policy position of the USCIS to the effect that the EB-5 Minimum Capital Requirement must be "at-risk" for five years. The only transfers that will be honored by the Fund during the initial five years of your investment are transfers that occur as a result of death. After five years, your Unit will automatically convert into common stock of Hybrid Kinetics having an estimated fair market value of $545,000. If Hybrid Kinetics' common stock is not publicly traded at that time, your investment will continue to be extremely illiquid.

The EB-5 regional center program is a U.S. government program that is highly regulated and that requires frequent interaction between the Fund and government officials.

The EB-5 regional center program was created by Congress, which has accorded broad regulatory powers to the Department of Homeland Security and in particular to the United States Citizenship and Immigration Service (USCIS). Currently, all EB-5 related filings are reviewed by USCIS adjudicators in the USCIS California service center. While the Fund will strive to coordinate with USCIS to achieve our investors' immigration goal, there can be no assurance that USCIS adjudicators will take a consistent position on issues arising under the program, and there can be no assurance that USCIS regulations will not change in the future. Since the laws, regulations and bureaucratic interpretations applicable to the Fund's investments are subject to change at any time, there can be no assurance that the Fund will not be required to substantially change its investment policies in the future. The EB-5 program could be discontinued or altered by Congress at any time.

It is a requirement of the EB-5 program that an immigrant investor's source of funds be proper, under U.S. immigration guidelines.

EB-5 immigrant investors must demonstrate to the USCIS that the funds they invest in the Units were obtained through lawful means. Each EB-5 immigrant investor must document, to the satisfaction of the USCIS and the U.S. State Department, that the source of funds is acceptable. The Fund, and the EB-5 immigrant investor's immigration attorney, may make a preliminary assessment, but the ultimate decision will be made solely by USCIS and the U.S. State Department. Each EB-5 immigrant investor must agree to provide information and documents to the Fund, and to allow the Fund to make further investigation, concerning the EB-5 immigrant investor's source of funds and the personal and business background of the EB-5 immigrant investor and accompanying family members.

Achieving your immigration goal of conditional and permanent resident status will require you to maintain your primary residence in the United States.

EB-5 immigrant investors who obtain conditional resident status or permanent resident status must intend to make the United States their primary residence. Conditional residents or permanent residents who maintain their primary residence outside the United States risk revocation of their U.S. residence status. Each prospective EB-5 immigrant investor should consult a competent immigration attorney to review the likelihood that the investor's immigration objectives will be achieved.

The Fund has to work with Hybrid Kinetics to meet the job creation and retention requirements of the EB-5 program to ensure that sufficient jobs are created at the time when our investors file for the removal of the condition to their permanent residency.

For EB-5 immigrant investors to convert their temporary resident status to permanent resident status, the Fund's investments in any portfolio company must directly or indirectly create ten full-time jobs for each Unit sold within two years after the investor obtains conditional resident status. Hybrid Kinetics eventually intends to directly hire 25,000 employees. The current economic study has shown that for each direct job created by Hybrid Kinetics, there will be 11.86 indirect and induced jobs created, sufficient to support 25,000 EB-5 immigration applications. Based on the current economic analysis and Hybrid Kinetics' business plan, there should be sufficient jobs for each Unit holder to achieve his or her immigration goal, but there can be no assurance that Hybrid Kinetics will raise sufficient capital to implement its business plan, or do so within the required time period.

The foregoing risks do not purport to be a complete explanation of all the risks involved in acquiring a Unit. The Fund assumes no obligation (and specifically disclaims any such obligation) to update these Risk Factors or any other forward-looking statements to reflect actual results, changes in assumptions or other factors affecting such forward-looking statements. Potential investors are urged to read this entire document and the operating agreement of the Fund and conduct his or her own evaluation of an investment in Hybrid Kinetics before deciding whether to invest in the Fund.

Yucheng Lei, Director and Chief Engineer

[redacted]

MANAGEMENT OF OUR FUND

The Fund has a Board of Directors of four people, one of whom is designated by the management company and three of whom are independent directors. The following is a description of the business backgrounds of the Board of the Fund and the management company:

Board of Directors

David R. Voelker, Director of the Fund and Founder and Chairman of the Management Company

(b)(6)

Donald E. Powell, Director of the Fund

(b)(6)

Donna Brazile, Director of the Fund

Veteran Democratic political strategist Donna Brazile is an adjunct professor, author, and syndicated columnist. Ms. Brazile has led a long and active career in politics including numerous state and local campaigns, as well as every presidential campaign from 1976 through 2000, when she served as presidential campaign manager for former Vice President Al Gore. Author of the best-selling autobiography *Cooking with Grease: Stirring the Pots in American Politics*, Ms. Brazile is an adjunct professor at Georgetown University and a senior lecturer at the University of Maryland. In the media, she serves as a political contributor on CNN; consultant to ABC News; regularly appearing commentator on ABC's *This Week with George Stephanopoulos*; and frequent contributor to NPR's Political Corner. In print and online, she is a columnist for *Roll Call* and *Ms.* magazine; and is a content contributor to BlackAmericaWeb.com. Washingtonian named Ms. Brazile one of the "100 most powerful women" and Essence named her one of the "top 50 women in America." The Congressional Black Caucus Foundation has bestowed upon her its award for political achievement. Ms. Brazile is the chair of the Democratic National Committee's Voting Rights Institute, established in 2001 to help protect and promote the rights of all American citizens to participate in the electoral process. Like Mr. Voelker, Ms. Brazile served as a member of the board of directors of the Louisiana Recovery Authority. Ms. Brazile is also founder and managing director of Brazile & Associates LLC, a general consulting, grassroots advocacy, and training firm based in Washington, D.C. Washington View Tenants Association.

Kathleen B. Blanco, Director of the Fund

Governor Kathleen Babineaux Blanco's career as a trailblazer in Louisiana politics and a leader in economic development and education spans more than 25 years. In 1984, Governor Blanco became the first woman elected to represent the Lafayette region in the Louisiana House of Representatives. Five years later, Governor Blanco became the first woman elected to the Public Service Commission (PSC). As the first woman Chair of the PSC, Governor Blanco built a record of balancing the interests of consumers and corporate entities. She established and maintained a modern but fair regulatory environment for national and international telecommunications, electricity and natural gas corporations doing business in Louisiana. Governor Blanco was first elected Lieutenant Governor of Louisiana in 1996, and then re-elected by 80% of the electorate in 1999. During her eight-years as Lieutenant Governor, Blanco lead the way in growing Louisiana's tourism economy by more than 40%, and expanding the state's parks, tourist centers, and historic sites. In 2004, Kathleen Babineaux Blanco became the first woman elected Governor of Louisiana, and only the second woman representing a Southern state to be elected governor in her own right. Governor Blanco led Louisiana's immediate and long-term recovery efforts following hurricanes Katrina and Rita. In 2006 and 2007, Southern Business and Development magazine named Governor Blanco among the "Top 10 Who Made a Difference in Economic Development" for her innovative efforts to

diversify Louisiana's economy and recruit new business. Governor Blanco passed far-reaching ethics reforms, reformed Louisiana's juvenile justice system, expanded early childhood education, pushed through reforms in education standards and accountability, and directed the single largest increased investment in education in Louisiana's history.

THE EB-5 PROGRAM

Overview

In 1990, the U. S. Congress created the employment based 5th preference (EB-5) immigrant investor visa program. The EB-5 program offers 10,000 immigrant visas a year to qualified investors who wish to obtain residence in the United States by investing in businesses that will benefit the economy and create jobs. The EB-5 Immigrant Investor Regional Center Pilot Program ("The Pilot Program") was created by Congress in 1992 and sets aside 3,000 of the 10,000 EB-5 visas each year for people who invest in designated "regional centers."

Once a qualifying investment has been made in a regional center, an investor files a Form I-526 Immigrant Petition by Alien Entrepreneur, ("Form I-526") with the USCIS. After the USCIS approves I-526 petition, an investor files an adjustment of status application if he or she is already in the U.S. in valid non-immigrant status or ii) applies for an interview and entry visa at a U.S. embassy or consulate abroad ("consular processing"). When an adjustment of status application is approved, a conditional residence status of two years will be given to the investor. If the investor pursues consular processing, upon approval the investor and his or her family will be issued an EB-5 entry visa to the U.S. Once they enter the U.S., the two-year conditional residence status starts.

At the end of the two-year conditional resident period the investor must show that his or her investment has been sustained and the projects invested in by the regional center have created at least ten jobs for each investor. Assuming the investor provides that evidence, the USCIS will remove the conditional residence status, and the investor will receive his or her permanent residency status.

The Immigration Process

The Fund's primary role in the immigration process is to sell interests in the Fund to immigrant investors (which allow the investors to file Form I-526) and invest the investors' capital in a manner that is consistent with the EB-5 program and leads to the creation of at least ten jobs for each Unit holder in the Fund. If Hybrid Kinetics' proposed business plan succeeds, our independent economist's report indicates that Hybrid Kinetics will create enough jobs to meet the EB-5 program requirements for every investor in the Fund. The rest of the immigration process will be led by the immigrant investor and his or her independent immigration counsel. The management company will maintain a current record of jobs created by the Fund's investment activities. The management company will assist each Unit holder by providing information about job creation to the USCIS in the manner required by the EB-5 program. Upon the initial conditional residency filing, the Fund will certify to the USCIS with respect to the projected number of jobs that will be created. Two years after an immigrant investor is granted conditional resident status, the investor must file with the USCIS Form I-829, Petition by Entrepreneur to Remove Conditions ("Form I-829") to

convert his or her status to permanent residency. At that time, the Fund will allocate to each Unit holder ten jobs from those jobs created and maintained by Hybrid Kinetics.

Frequently Asked Questions

The following are some frequently asked questions about the EB-5 program, along with answers to the questions:

How much do I need to invest to receive conditional and ultimately permanent residency status for myself and my family members?
If you invest in a regional center, like ours, you need to invest $500,000 if the investment is made in a high unemployment or rural area. There are also other fees such as legal fees for your immigration and tax counsel and application fees paid to USCIS.

What is the region covered by the Gulf Coast Funds regional center?
Our regional center is the largest geographical regional center in the United States. It covers the entire states of Louisiana and Mississippi.

Do I have to live in Louisiana or Mississippi to participate in this program?
No. You do not have to live in Louisiana or Mississippi. You do not even have to ever visit the region.

When will I have to pay $500,000?
When you are ready to file your application for the I-526, you would send us $500,000.

What do I have to do to get my visa application approved?
Normally, you will get an American immigration lawyer to help you in the visa application process. If you do not have an immigration lawyer, the Placement Agent suggests that you use David Lu, Esq., an immigration lawyer with whom we work with on a regular basis. The lawyer will help you file a Form I-526. With your Form I-526, you will have to submit proof that the source of your $500,000 investment is lawful.

Once the USCIS approves your Form I-526 you will need to adjust your status if you are already living in the U.S. in non-immigrant status or you will have to schedule an interview at a U.S. embassy or consulate abroad. In either case, you will have to submit the same type of documentation that other visa applicants to the United States are required to submit. Here is a general description, from the U.S. government's web site, of certain requirements for receiving a visa:

> **VISA INELIGIBILITY / WAIVER**
> The immigration laws of the United States, in order to protect the health, welfare, and security of the U.S., prohibit the issuance of a visa to certain applicants. Examples of applicants who must be refused visas are those who: have a communicable disease, or have a dangerous physical or mental disorder; have committed serious criminal acts; are terrorists, subversives, members of a totalitarian party, or former Nazi war criminals; have used illegal means to enter the U.S.; or are ineligible for citizenship. Some former exchange visitors must

live abroad for two years. Physicians who intend to practice medicine must pass a qualifying exam before receiving immigrant visas. If found to be ineligible, the consular officer will advise the applicant of any waivers.

OTHER IMPORTANT INFORMATION

Documents for Visa Application
All applicants must submit certain personal documents such as passports, birth certificates, police certificates, and other civil documents, as well as evidence that they will not become public charges in the United States. The consular officer will inform visa applicants of the documents needed as their applications are processed.

Medical Examinations
Before the issuance of an immigrant visa, every applicant, regardless of age, must undergo a medical examination. The examination will be conducted by a physician designated by the consular officer. Examination costs must be borne by the applicant, in addition to the visa fees.

Visa Fees
The cost of each immigrant visa application may vary for additional visa fees apply. For up to date immigration visa fee costs, please consult your immigration attorney or please visit the USCIS fee schedule web page.

Source: www.uscis.gov

How will my money be invested?
Your money will be invested in our regional center Fund, which will immediately re-invest your money in Hybrid Kinetics. To meet the immigration goals of the EB-5 regional center program, Hybrid Kinetics must create at least 10 new jobs (both direct and indirect or induced jobs) for every $500,000 we invest.

How will the investment in Hybrid Kinetics be structured?
All of the proceeds of this offering will be invested in convertible preferred stock of Hybrid Kinetics. We will receive one share of convertible preferred stock for each $500,000 we invest in Hybrid Kinetics. Five years after each such investment, each share of convertible preferred stock will be automatically converted into shares of common stock of Hybrid Kinetics having an estimated fair market value of $545,000.

When will my visa become permanent?
Two years after you receive your conditional resident status, you must apply for permanent residency. At that time, we will supply documents for your Form I-829 petition to show that your money has been invested in the region and that the Fund's investment has created at least ten jobs. Once your application is approved, you will become a permanent resident of the United States, and may soon apply for full citizenship if you desire.

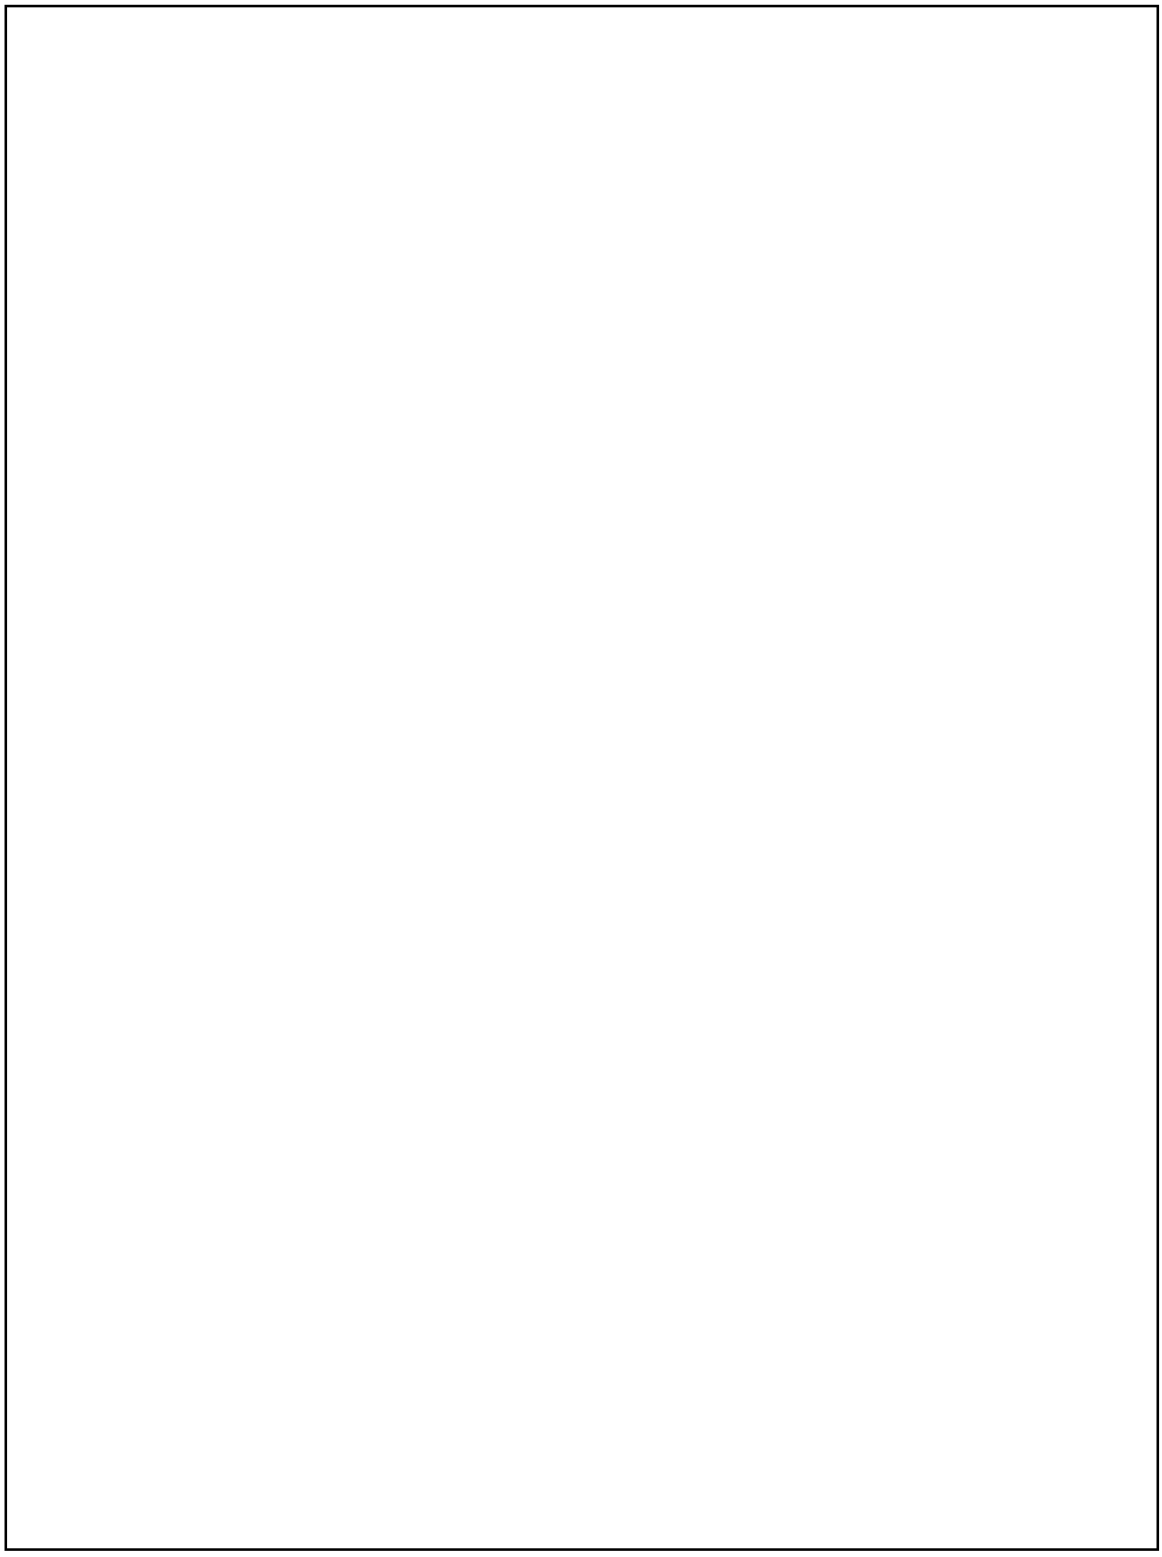
RIGHTS OF UNIT HOLDERS

(b)(4)



(b)(4)

CERTAIN U.S. FEDERAL INCOME TAX CONSIDERATIONS

The following discussion about certain U.S. federal income tax and other tax considerations that you should weigh prior to investing in a Unit is merely a presentation of certain tax issues that generally apply to all investors in EB-5 funds. You should not consider this discussion to be tax advice, applicable to your particular situation or a full discussion of all material United States, state, local and foreign tax consequences of an investment in the Fund or your status as U.S. tax resident or non-resident and you should consult with your personal tax advisor about these, and all other issues relevant to your personal decision to invest in a Unit. Neither the Fund nor the management company is qualified to provide the tax advice you will need. You cannot use this summary for the purpose of avoiding United States federal tax penalties.

The following discussion is based upon the Internal Revenue Code of 1986 (the "Code"), the applicable Treasury Regulations promulgated or proposed under the Code (the "Regulations"), current positions of the IRS contained in published revenue rulings and revenue procedures, current administrative positions of the IRS, and existing judicial decisions, as in effect on the date of this Memorandum, all of which are subject to change or modification, with or without retroactive effect, at any time.

No assurance can be given as to the future status of federal income tax laws or other tax laws as they pertain to limited liability companies of the type described herein. It is likely that changes to the Code will be proposed in the future. The effect of such proposals on the Fund and on an investment therein cannot be analyzed. Accordingly, potential investors are urged to consider on-going developments regarding changes in the federal income tax law and other tax laws and to consult their own advisors in assessing the risks associated with an investment in the Fund.

Classification of the Fund

The Fund will be treated as a partnership for federal income tax purposes under the "check the box" Regulations. Under these regulations, an unincorporated domestic entity, such as the Fund, with at least two members will be taxed as a partnership if no election is made to be taxed as a corporation. Accordingly, the discussion herein relating to partnerships and partners generally will be applicable to Unit holders in the Fund.

Partnership Taxation in General

Under the Code, a partnership pays no federal income tax, although it may be required to withhold and pay taxes on behalf of certain of its partners. Rather, each partner reports on his federal income tax return his distributive share of all items of income, gain, loss, deduction, credit and tax preference of the partnership, whether or not the partnership makes any actual distribution to the partner during the taxable year. Thus, it is possible that distributions from the Fund will not be sufficient to pay tax liabilities with respect to the tax income and gain allocated to a Unit holder and that the only source of payment of such tax liabilities would be from the Unit holder's funds from sources

other than the Fund.

The extent to which a Unit holder may utilize Fund losses in any tax year is limited to the adjusted tax basis of his interest in the Fund at the end of the Fund tax year (See "Basis of Units"). In addition, a Unit holder may not deduct Fund losses in excess of the amount the Unit holder is considered "at risk" with respect to the Fund under Code Section 465 (See "At Risk Limitations"). A Unit holder generally may use his distributive share of any partnership losses allowable after applying the foregoing loss limitation only to offset his income from other passive sources (see "Passive Activity Loss Limitations").

Basis of the Units

A Unit holder's initial tax basis for his Units will be the amount of money he contributes to the Fund.

A Unit holder's basis is his Units increased by (a) his share of the non-recourse liabilities of the Fund, and (b) his share of profits. The adjusted tax basis of his Units will be decreased, but not below zero, by (1) distributions to the Unit holder by the Fund; (ii) reductions in his share of the non-recourse obligations of the Fund; (iii) his share of the losses of the Fund; and (iv) his share of Fund expenditures not chargeable to his capital account.

Under Regulation Section 1.752-1(a)(2), a partnership liability is a non-recourse liability to the extent that no partner or related person (for the purpose of Regulation Section 1.752-4(b)) bears any economic risk of loss. A partnership liability generally is not considered non-recourse to the extent that any partner guarantees the payment of such liability. If a Unit holder or a "related" person guarantees all or a portion of the non-recourse liabilities of the Fund, the other Unit holders' tax basis in their Units will not include such guaranteed portion of the Fund's non-recourse liabilities.

Similarly, if a partner or a person related to a partner loans funds to a partnership and the other partners are not personally liable for the repayment of the loan, only the lending partners may include that loan in the basis of their partnership interests. For example, if a Unit holder or one of his affiliates makes a loan to the Fund, the other Unit holders would not include any portion of such a loan in the basis of their Units.

The Fund may be a "tiered" partnership if it owns interests in other entities taxed as partnerships for federal income tax purposes. With respect to "tiered" partnerships, the Regulations provide that the "upper-tier" partnership's share of the liabilities of the "lower-tier" partnership will be treated as liabilities of the upper-tier partnership for purposes of applying Code Section 752 to the partners of the upper-tier partnership (Regulation Section 1.752-4(a)).

If a Unit holder's basis in his Units is reduced to zero, the amount of any distributions (including any deemed distributions due to a reduction in Fund non-recourse

liabilities) in excess of his share of the Fund's taxable income for the year will be treated as capital gain, except to the extent that ordinary income treatment is required for his *pro rata* share of depreciation recapture.

A partner may not deduct his share of losses of a partnership to the extent such losses exceed the partner's basis for his interest in the partnership. Any losses that are not currently deductible by a partner due to this limitation may be deducted when and to the extent the partner's basis is increased (for example, by the allocation of partnership income). The ability of a partner to claim his share of partnership losses will also depend on the impact of the "at risk" rules of Code Section 465 (see "At Risk Limitations") and the passive activity loss limitation rules of Code Section 469 (see "Passive Activity Loss Limitations").

Allocations of Profits and Losses

Under Code Section 704, a partner's distributive share of the income, gain, loss, deduction, or credit of a partnership is determined by reference to the partnership agreement, unless the allocation contained in the agreement does not have "substantial economic effect," in which case the allocation is determined by reference to the partners' interests in the partnership, taking into account all facts and circumstances.

Although it is intended that the Fund's allocations will be in accordance with the Unit holders' interests in the Fund, it is possible that the Internal Revenue Service will challenge the Fund's tax allocations and attempt to reallocate tax items among the Unit holders. Any such reallocations of tax items may have adverse tax and financial consequences to a Unit holder.

"At Risk" Limitations

Code Section 465 limits the amount of losses that a partner can deduct in a particular year to the amount that such partner is considered "at risk" at the close of the partnership's taxable year. Generally, a taxpayer is considered "at risk" to the extent of (i) the amount of money and the adjusted basis of property he contributes to an activity, plus (ii) any amounts borrowed with respect to an activity for which the taxpayer is personally liable or for which the taxpayer has pledged property (other than property used in the activity) as security. A taxpayer will generally not be considered "at risk" with respect to amounts protected against loss through non-recourse financing, guarantees, stop loss agreements or similar arrangements.

A taxpayer generally is not considered to be "at risk" for non-recourse obligations. Losses not deductible by reason of the "at risk" rules may be carried forward indefinitely and deducted at such time as the taxpayer becomes "at risk" to a greater extent with respect to the activity.

Passive Activity Loss Limitations

Code Section 469 generally provides that losses attributable to "passive activities" may be used only to offset income from passive activities. Code Section 469 applies to individuals, estates, trusts, personal service corporations (corporations providing services that are substantially performed by owner-employees), and closely-held corporations (corporations having 5 or fewer shareholders who own more than 50% in value of the stock).

Code Section 469 defines a "passive activity" as (i) the conduct of a trade or business in which the taxpayer does not materially participate or (ii) any rental activity (without regard to participation). Under Code Section 469, the interest of a limited partner in a limited partnership is not considered an interest with respect to which a person materially participates, except as provided in regulations. Accordingly, a Unit holder's investment in the Fund will be a passive activity, and any Fund losses allocated to the Unit holders will constitute passive losses.

Under Code Section 469, passive losses generally may be used only to offset passive income until the taxable year in which the taxpayer disposes of his interest in the activity producing the passive losses.

Passive income is defined as the income from passive activities. Passive income does not include (i) income received as salary or wages; (ii) income derived from a trade or business in which the taxpayer materially participates ("active income"); (iii) interest, dividends, annuities or royalties ("portfolio income") not derived in the ordinary course of business; (iv) gain or loss from the disposition of property used in the ordinary course of business producing portfolio income; or (v) gain or loss from the disposition of property held for investment which is not considered to be an interest in a passive activity.

Passive losses that are not deductible in a particular year may be carried forward indefinitely and used to offset passive income in subsequent years. In addition, upon a fully taxable disposition of a taxpayer's entire interest in the passive activity (other than to a related party), any unused passive losses from the activity for the year that have been carried forward, and the loss, if any, on the disposition, may be applied first to offset any income from that activity for the year (including the gain, if any, from the disposition); second, to offset any other passive income for the year; and third, any remaining unused passive losses from the activity may be used to offset the taxpayer's active and portfolio income.

Based on the foregoing, a Unit holder may use any Fund losses allocated to him only to offset his passive income. If the Fund losses are not fully deductible in the year incurred, they may be applied against passive income (that is not portfolio income) in future years. If any unused losses from the Fund remain when the Unit holder disposes of his entire interest in the Fund, these losses may be used in full at such time, first against passive income, and then against any other income of the Unit holder.

The foregoing analysis assumes that the Fund constitutes a single "activity" for purposes of Code Section 469. If the Fund consisted of more than one activity, the passive activity loss limitations would apply separately to each such activity.

The Regulations provide flexibility in grouping a taxpayer's trade or business activities and rental activities for purposes of applying the passive activity rules. In this respect, one or more trade or business activities or rental activities may be treated as a single activity if the activities constitute an appropriate economic unit for the measurement of gain or loss for the purposes of Code Section 469. However, generally rental activities may not be grouped with a trade or business activity. Further, a taxpayer that owns an interest as a limited partner or limited entrepreneur (e.g., a member of an LLC who does not actively participate in the management of the LLC) may not group the following activities with any other activity: (i) holding, producing or distributing motion picture films or video tapes, (ii) farming, (iii) leasing personal property, (iv) exploring for or exploiting oil and gas resources, and (v) exploring for or exploiting geothermal deposits. A partnership must group its activities under the rules of the Regulations and once the partnership groups its activities, the partner may group those activities with each other, with activities conducted directly by the partner, and with activities conducted through other C corporations subject to Code Section 469, S corporations and partnerships, except that a partner may not treat activities grouped together by any 469 entity as separate activities.

Whether or not the Fund's activities are aggregated into a single activity should not affect a Unit holder's ability to offset passive losses from one Fund activity against passive income of another Fund activity. However, any previously suspended passive losses from a particular activity that is part of a single activity will not become deductible against non-passive income upon a disposition of that particular activity alone, but only upon a taxable disposition by the Fund of all of its interest in the single activity, or the Unit holder's disposition of his Units. Further, the Fund's debt investments or equity investments in C corporations may produce interest income or dividend income, respectively, that is classified as portfolio income for purposes of Code Section 469, and the Fund's other equity investments may produce losses classified as passive under Code Section 469, and in this situation a Unit holder's share of passive losses may not be utilizable to offset his share of portfolio income.

Distributions

Distributions (which include any deemed distribution arising from a reduction, by repayment or otherwise, in Fund liabilities) made to a Unit holder generally do not result in any recognition of gain for federal income tax purposes to the extent the amount of cash or debt reduction does not exceed the basis of the Unit holder's Units. A Unit holder's adjusted tax basis in his Units is reduced by the amount of the distribution. Distributions of cash (including reductions in liabilities) by the Fund in excess of a Unit holder's adjusted tax basis in his Units will result in the recognition of gain to the extent of such excess. Such gain is considered gain from the sale or exchange of the Units by

the Unit holder and in certain cases may be treated in part as ordinary income because of the depreciation recapture provisions. (see "Sale or Disposition of Units").

Sale or Disposition of Units

Upon a sale of a Unit, a Unit holder will realize gain or loss in an amount equal to the difference between the amount realized and his adjusted tax basis in the Unit. Under Code Section 751(a), any gain realized by a selling partner is taxed as ordinary income to the extent of the partner's *pro rata* share of "ordinary income assets" of the partnership. The balance of gain, if any, or the loss is treated as a capital gain or loss. In determining the amount received upon the sale or exchange of a Unit, a Unit holder must include, among other things, his allocable share of the outstanding amount of the indebtedness to which the Fund's property is subject. Therefore, it is possible that the gain realized on the sale of a Unit may exceed the cash proceeds of such sale. As a result, in some cases, the income taxes payable with respect to such gain may exceed such cash proceeds.

Certain Deductions to Be Claimed

Organization, Start-Up and Syndication Costs. Under the Code, neither a partnership nor its partners may deduct amounts paid or incurred in the promotion and sale of the interests in the partnership ("syndication" expenses), including those amounts paid as commissions, professional fees, and printing costs. These expenses must be capitalized and may not be amortized. Under the Regulations, the following expenses constitute non-deductible syndication expenses which must be capitalized and not amortized: (i) brokerage fees; (ii) registration fees; (iii) legal fees for securities advice and advice pertaining to the adequacy of tax disclosures in the offering memorandum for securities law purposes; (iv) accounting fees for the preparation of representations to be included in the offering memorandum; and (v) costs of printing the offering memorandum.

However, to the extent a partnership pays or incurs organizational expenses incidental to the creation of the partnership or start-up expenditures with respect to an active trade or business, the partnership generally may elect to capitalize such expenditures and amortize them ratably over a period of not less than 180 months, commencing in the month in which the partnership begins business. Organizational expenses include (i) legal fees for services incidental to the organization of the partnership, such as the negotiation and preparation of a partnership agreement; (ii) accounting fees for services incidental to the organization of the partnership, and (iii) filing fees. On the other hand, organizational expenses do not include (i) expenses incurred in connection with the acquisition of partnership assets or the transfer of assets to the partnership; (ii) syndication expenses; and (iii) certain other expenses. Start-up expenditures include (i) certain expenses related to the investigation of the creation or acquisition of an active trade or business; and (ii) expenses paid or incurred pursuant to the creation of an active trade or business, which expenses would be deductible if they were incurred after the commencement of the particular business operation to which they relate.

The Fund has incurred organizational expenses which it will elect to amortize over 180 months. Additionally, the Fund has incurred or may incur start-up expenditures which the Fund, if it is eligible to do so, intends to amortize over a 180 month period. Any costs incurred by the Fund associated with offering of the Units will be capitalized by the Fund as non-deductible syndication costs.

Other Limitations on Deductions. Other limitations may apply to reduce or eliminate the deductibility by a Unit holder of his share of the Fund's expenses, including fees paid to the management company. For example, to the extent deductions of the Fund are deemed not to be incurred in connection with a business, they will be treated as miscellaneous itemized deductions that, in the case of Unit holders, are deductible only to the extent that, when taken together with other similar deductions, they exceed 2% of the Unit holder's adjusted gross income. Also, miscellaneous itemized deductions are not deductible by a Unit holder in computing the Unit holder's alternative minimum tax.

Certain Tax Consequences to Non-United States Investors

Foreign Individuals Potentially Subject to U.S. Tax on Their Worldwide Income. Individuals who are not citizens of the United States but who are treated as "residents" of the United States for federal income tax purposes are subject to United States federal income tax on their worldwide income, including but not limited to their income from the Fund. For this purpose, an individual who is a lawful permanent resident of the United States (e.g., a holder of a "green card") generally will be treated as a resident. In addition, an individual who is not a lawful permanent resident under the immigration laws may nevertheless be a "resident" for tax purposes based upon a "substantial presence" in the United States as defined under Code Section 7701(b). For example, under that Code Section, an individual may be a "resident" if the individual is physically present in the United States on all or any part of a certain number of days, determined under a formula, within a three-year testing period. An individual present in the United States under certain types of temporary visas (e.g., teachers or students) may be excepted from the "substantial presence" test, but the determination whether an individual is a resident can be a complex determination. Potential investors who are foreign individuals should consult with their own tax advisors to be certain of their tax status under United States law.

Taxation of Non-U.S. Individuals Not Treated as Tax Residents. Potential investors who are neither citizens nor residents (as determined for tax purposes) of the United States ("Non-U.S. Investors") are subject to additional tax rules. Generally, Non-U.S. Investors are taxable on certain United States source passive investment income ("FDAP"), including dividends, interest and rents, at a flat rate of 30% on the gross amount of such income, without reduction for any expenses or other tax deductions, and that tax is satisfied by withholding of tax on payments of such amounts to the Non-U.S. Investors. In the case of a partnership, the partnership generally will be required to withhold based on the share of its FDAP allocable to its Non-U.S. Investors. The 30% tax on the gross amount of FDAP may be reduced or eliminated if the Non-U.S. Investor

is a resident of a country with which the United States has a bilateral income tax treaty, provide that the Non-U.S. Investor submits timely certification of his entitlement to treaty relief. Certain other exceptions apply which may reduce or eliminate the tax on certain types of FDAP, including interest income. Non-U.S. Investors generally are not subject to tax on capital gains unless either (1) the gains are attributable to a United States trade or business or (2) the Non-U.S. Investor is an individual who is present in the United States for more than 183 days during the taxable year in which the gains are realized.

The 30% taxation of FDAP will not apply to any income that is effectively connected with the active conduct of a trade or business within the United States. The net income from such a trade or business within the United States realized by a Non-U.S. Investor will be subject to tax at the regular graduated income tax rates applicable to resident individuals. Such income currently will be subject to income tax withholding, generally at a rate of 35%. A Non-U.S. Investor who realizes any such income will be required to file a United States federal income tax return with respect to the taxable year in which the income is realized.

A Non-U.S. Investor in the Fund who is allocated a share of passive income (including capital gain) or active trade or business income realized by the Fund will be subject to tax under the above rules as if such Non-U.S. Investor had realized such income directly. Any withholding of federal income taxes by the Fund attributable to a Non-U.S. Investor will be treated as a distribution to that particular Unit holder.

THE FOREGOING IS NOT A COMPLETE DISCUSSION OF ALL OF THE FEDERAL INCOME TAX CONSEQUENCES TO A NON-U.S. INVESTOR; THERE ARE STATE AND LOCAL TAX AND ESTATE TAX CONSEQUENCES TO BE CONSIDERED. ALSO, FOREIGN TAXES MAY BE IMPOSED ON A NON-U.S. INVESTOR'S INCOME FROM THE FUND. INVESTORS ARE STRONGLY ADVISED TO CONSULT WITH THEIR TAX ADVISORS WITH RESPECT TO THE TAX CONSEQUENCES OF AN INVESTMENT IN THE FUND.

Compliance Matters

Tax Returns/Audits. The Fund will furnish annually (and in certain circumstances, periodically) to each of the Unit holders sufficient information from the Fund's tax return for the Unit holders to prepare their own federal income tax returns.

The tax treatment of items of partnership income, loss, deduction, and credit will be determined at the partnership level. In addition, all partners are required, on their individual federal income tax returns, to treat partnership items in a manner that is consistent with the treatment of such items on the partnership's return.

The tax matters partner for the Fund will be the management company. The tax matters partner is required to, among other things, keep the other partners informed of all administrative and judicial proceedings and represent the Fund in such proceedings. The

tax matters partner is authorized to obtain judicial review of any proposed readjustment of partnership items. Although every partner with an interest in the outcome is allowed to participate in an action filed by the tax matters partner, the outcome of that proceeding will bind all partners. If the tax matters partner fails to seek judicial review of a proposed adjustment of partnership items, other partners may seek such review, provided that there can be only one judicial proceeding with respect to a partnership. The foregoing procedures may adversely affect a Unit holder's ability to deal with adjustments to his income tax return resulting from adjustments made with respect to the Fund.

If any of the tax returns of the Fund are audited, it is possible that substantial legal and accounting fees will have to be paid to substantiate the position of the Fund, and such fees would reduce the cash otherwise available to meet Fund obligations or for distribution to the Unit holders. Such an audit may result in adjustments to each Unit holder's income tax return. An audit of the Fund's tax returns may also result in an audit of non-partnership items on each Unit holder's income tax returns, which in turn could result in adjustments to such items. The costs incurred by a Unit holder in connection with an IRS audit of his income tax return will be borne solely by that Unit holder.

State and Local Taxes

In addition to federal income taxes, the Fund and the Unit holders may be subject to other taxes imposed by various jurisdictions, such as state and local income taxes. Although a detailed analysis of these various taxes is not presented here, investors should consider the potential state and local tax consequences of an investment in the Fund. For example, a Unit holder's distributive share of all or a portion of Fund income, gains, losses and deductions, profits and losses, may be required to be included in determining his income subject to tax under the laws of the state or locality in which he is a resident, as well as jurisdictions in which the Fund does business.

For example, with respect to Unit holders who are not residents of the State of Louisiana, if the Fund has Louisiana source income allocated to such Unit holders, the Fund will be required to file composite returns and make composite payments of tax on behalf of all of its Unit holders who are not residents of Louisiana. The current rate of the Louisiana composite tax is 6% and any composite payment on behalf of a non-resident Unit holder will be treated by the Fund as a distribution to the non-resident Unit holder.

The State of Mississippi also requires a partnership to withhold income tax on a non-resident partner's allocable share of Mississippi source income. The Fund will withhold at the required withholding rate (currently 5%) of Mississippi source income allocable to Unit holders who are not residents of Mississippi. Any such withholding will be treated by the Fund as a distribution to the non-resident Unit holder. The withholding by a partnership does not relieve the non-resident partner of his obligation to file a Mississippi income tax return. A partnership is allowed to file a composite return on behalf of non-resident partners who have no activity in Mississippi other than that from the partnership. If a composite filing is allowable with respect to a non-resident partner and the composite return is properly filed and all taxes, including applicable interest and

penalty is paid, the individual non-resident partner is relieved of his separate individual filing requirement. If the Fund elects to file a composite return on behalf of any non-resident Unit holders, the composite tax payment attributable to the non-resident will be treated as a distribution by the Fund to that non-resident Unit holder.

The Fund intends to supply the Unit holders with information regarding their income, if any, derived from various jurisdictions in which the Fund does business. Unit holders are urged to consult with their own tax advisors regarding state and local tax laws.

U.S. Federal Estate and Gift Taxation

U.S. residents generally are subject to federal estate taxes on their taxable estates at death which includes the value at the time of a decedent's death of all of his property, real or personal, tangible or intangible, wherever situated. Additionally, U.S. residents are subject to gift taxes on the transfer of any property by gift. U.S. estate taxes can also apply to a Non-U.S. Investor to tax that part of his gross estate which at the time of his death is situated in the United States. For example, shares of stock in a domestic U.S. corporation owned by a non-resident alien is treated as property situated in the United States for purposes of this provision. Further, the IRS has ruled that a partner's interest in a partnership is situated where the partnership's business is carried on for purposes of applying the U.S.-United Kingdom Estate Tax Convention. Thus, a Unit in the Fund held by a Non-U.S. Investor could possibly be subject to U.S. estate tax on the death of the Non-U.S. Investor.

Additionally, state and local taxing jurisdictions may also impose state, inheritance and/or gift taxes on their residents or on property deemed situated within their respective jurisdictions.

About the Transportation Equipment Manufacturing subsector

The transportation equipment manufacturing subsector is part of the manufacturing sector.

Industries in the Transportation Equipment Manufacturing subsector produce equipment for transporting people and goods. Transportation equipment is a type of machinery. An entire subsector is devoted to this activity because of the significance of its economic size in all three North American countries. Establishments in this subsector utilize production processes similar to those of other machinery manufacturing establishments - bending, forming, welding, machining, and assembling metal or plastic parts into components and finished products. However, the assembly of components and subassemblies and their further assembly into finished vehicles tends to be a more common production process in this subsector than in the Machinery Manufacturing subsector.

North American Industry Classification System

The transportation equipment manufacturing subsector consists of these industry groups:

- Motor Vehicle Manufacturing: NAICS 3361
- Motor Vehicle Body and Trailer Manufacturing: NAICS 3362
- Motor Vehicle Parts Manufacturing: NAICS 3363
- Aerospace Product and Parts Manufacturing: NAICS 3364
- Railroad Rolling Stock Manufacturing: NAICS 3365
- Ship and Boat Building: NAICS 3366
- Other Transportation Equipment Manufacturing: NAICS 3369

NOTE: There was a change in the definition of this subsector between NAICS 2002 and NAICS 2007. Some of the data below reflect the 2002 definition and some reflect the 2007 definition. See the BLS implementation schedule for NAICS 2007 to find out which BLS programs have already implemented NAICS 2007.

4. Using the IMPLAN Model to Calculate National Multipliers

The IMPLAN model is a regional input/model developed and maintained by the Minnesota IMPLAN group, headquartered in Minneapolis. The basic model was originally developed by the USDA Forest Service in cooperation with the Federal Emergency Management Agency and the USDI Bureau of Land Management.

The IMPLAN model has certain similarities with the RIMS (Regional Input/Output Modeling system) model developed by the Department of Commerce, but is generally thought to contain several superior features besides its greater ease and flexibility of use. These improvements can be summarized as follows:

1. The Commerce Department is not permitted to publish data in any category where there are less than three organizations in a given economic area. IMPLAN has developed an algorithm to fill in the missing numbers.

2. IMPLAN has introduced improved methods of accounting for flows of goods and services among counties.

3. IMPLAN permits aggregation of any subset of industries for calculation and tabular purposes. This is useful when results are desired for, say, 1-digit industries instead of the 509 industries actually found in the input/output table.

4. As seen in the tables throughout this text, IMPLAN estimates three separate effects, labeled "direct", "indirect" and "induced". The direct effects are those entered by the user. The other two columns represent the multiplier effects, but they are usually combined in other input/output models. Briefly, the indirect effect represents purchases made by businesses when their sales rise. For example, a restaurant might order more food produced or sold in the region, or an automobile plant might order more steel. The induced effect represents the additional household spending because income has risen. For example, casino workers would spend their paychecks on various goods and services, some of which are produced in the region. In general, then, the larger the region under consideration, the larger the multipliers would be.

The following material, taken from the IMPLAN manual, describes the input/output process in more detail.

Input/output analysis is a means of examining relationships within an economy, both between businesses and between businesses and final consumers. It captures all of the monetary market transactions for consumption in a given time period. The resulting mathematical formulae allow examination of

the effects of a change in one or several economic activities on an entire economy.

A descriptive model includes information about local economic interactions known as regional economic accounts. These tables describe a local economy in terms of the flow of dollars from purchasers to producers within the region. The initial IMPLAN data details all purchases, including imported goods and services. When regional economic accounts are created, imports to the region are removed from the initial data, allowing examination of local inter-industry transactions and final purchases.

The regional economic accounts are used to construct local level multipliers. Multipliers describe the response of the economy to a stimulus (a change in demand or production). The multipliers represent the Predictive Model.

Purchases for final use (final demand) drive an input/output model. Industries producing goods and services for consumption purchase goods and services from other producers. These other producers, in turn, purchase goods and services. These indirect purchases (or indirect effects) continue until leakages from the region (imports, wages, profits, etc.) stop the cycle.

The indirect effects and the effects of increased household spending (induced effects) can be mathematically derived as sets of multipliers. The derivation is called the Leontief inverse. The resulting sets of multipliers describe the change of output for each industry caused by a one dollar change in final demand for any given industry.

The input/output analysis framework is similar to a financial accounting framework that tracks purchases of and expenditures on goods and services in dollars. Input/output accounting traces the flow of dollars between businesses and between businesses and final consumers. An input/output accounting framework can be illustrated using classic financial accounting T-accounts, which include receipts (income) and expenditures (expenses) on each side of a "T", as shown below.

Final Consumption (or final demand) drives input/output models. Industries respond to meet demand directly or indirectly, by supplying goods and services to industries responding directly. Each industry that produces goods and services generates demands for other goods and services, and so on. Multipliers describe these iterations.

There are three different multipliers developed for predictive modeling: Type I, Type II, and Type SAM. We start with the transactions table and derive a coefficient by dividing each industry column by the column total. This coefficient matrix is also known as the ***A Matrix***.

Appendix B. Resume of Dr. Michael K. Evans

CURRENT AND PREVIOUS POSITIONS

• Chairman, *Evans, Carroll & Associates, Inc.*, 1980-present (previously Evans Economics)

Economic consulting firm specializing in EB-5 immigration analysis, economic impact studies of development projects and new construction, models of state and local tax receipts, impact of current and proposed government legislation, and construction of econometric models for individual industries and companies.

• Chief Economist, *American Economics Group*, 2000-present.

Built a comprehensive state modeling system that provides economic analysis for a variety of consulting projects (see below).

• Clinical Professor of Economics, Department of Managerial Economics and Decision Sciences (MEDS), Kellogg Graduate School of Management, Northwestern University, 1996-99.

Taught courses in macroeconomics and business forecasting. Wrote textbooks for both courses.

• Winner of Blue Chip Economic Indicator Award for most accurate macroeconomic forecasts during the past four years, November 1999

• Founder and President, *Chase Econometric Associates*, 1970-1980

• Assistant and Associate Professor of Economics, Wharton School, University of Pennsylvania, 1964-69. Co-developer of the original Wharton Model.

• Visiting Professor, Radford University, (Radford, VA), 1987

Chairman of Institute for International Economic Competitiveness

• Visiting Lecturer, Hebrew University (Jerusalem), 1966-67

Built econometric model of the Israeli economy

Ph. D. in Economics, Brown University. Dissertation, "A Postwar Quarterly Model of the United States Economy, 1948-1962". A. B. in Mathematical Economics, Brown University

PREVIOUS ACTIVITIES AND EDUCATION

- Contributing Editor, *Industry Week*

Wrote a column in each issue on economic and financial trends as they impact the mfg sector.

- Editor, *The Evans Report*

Weekly newsletter discussing economic trends and financial markets. Pioneered the concept of the Monthly Tracking Model to incorporate recent economic releases into the overall economic forecast, including methods to predict these economic data.

- Consultant, *National Printing Equipment and Supply Association*

Prepares quarterly forecasts of shipments of printing equipment and graphic arts supplies by product line, based on an econometric model constructed for NPES. Also prepares analysis and forecasts of exports and imports by principal product line.

- Consultant, *APICS -- The Educational Society for Resource Management*,

In 1993, designed and developed the *APICS Business Outlook Index*, which uses survey data collected by the Evans Group to measure current production, production plans, shipments, employment, new orders, unfilled orders, inventory stocks, and the comparison of the actual to desired inventory/sales ratio to predict short-term changes in mfg sector activity. The results of this survey appeared every month in *APICS: The Performance Advantage*

- Consultant, *American Hardware Mfg Association*

Wrote a separate weekly edition of the Evans Report analyzing recent trends in the hardware and housing industries, including forecasts of the hardware industry based on an econometric model developed for AHMA.

- Board of Economists, *Los Angeles Times*

Wrote column every 6 weeks (5 other economists on the Board)

- Columnist, *United Press International*

  Wrote twice-weekly column, "Dollars and Trends"

- Consultant, Senate Finance Committee,

  Built the first large-scale supply-side model of the U. S. economy

- Consultant, Environmental Protection Agency and Council on Environmental Quality

  Estimated inflationary impact of government regulations

- Consultant, National Aeronautics and Space Administration

  Estimate impact of R&D spending on productivity growth

- Consultant, U. S. Treasury

  Estimated impact of investment tax credit and accelerated depreciation on capital spending by industry

- Consultant, U. S. Department of Agriculture

  Built large-scale econometric model of agricultural sector of U. S. economy

- Consultant, Organization of Economic Cooperation and Development

  Built econometric model of the French economy

SAMPLE OF RECENT CONSULTING PROJECTS

A. Economic Impact of EB-5 Immigrant Investor Programs and New Markets Tax Credits

- Calculated the number of jobs created for a film production company in New York City.

- Calculated economic impact of small-scale rooftop solar panels in various counties in California.

- Calculated economic impact of 7 different types of proposed businesses for a proposed regional center in the Bay Area of California.

- Determined the economic impact of a new biological research park, office building, and logistics center in Wooster, Ohio.

- Calculated the economic effect of a mixed-use urban renewal project in Cleveland, Ohio.

- Calculated economic impact of 14 different types of proposed businesses for a proposed EB-5 regional center that would include the entire state of Florida.

- Calculated economic impact of dairy farm and cheese processing plant in Northern California.

- Determined economic impact of a shipyard, food processing plant, and semiconductor plant for a proposed regional center in Louisiana and Mississippi.

- Calculated the economic impact of a new gaming casino in Natchez, Mississippi.

- Calculated the economic impact of a retail shopping center in suburban Los Angeles County.

- Prepared an economic impact analysis for the "timber to homes" project for a proposed regional center in Colorado.

- Calculated the economic impact for a proposed regional center in Baltimore, Maryland that would include the rebuilding of depressed areas in East Baltimore and along the riverfront.

- Prepared the economic analysis for a proposed EB-5 regional center for the entire state of Florida that included impact calculations for 14 different types of industries.

- Prepared the economic analysis for a proposed EB-5 regional center in the San Francisco Bay area that included calculations for 10 different types of industries.

- Prepared economic impact calculations for proposed EB-5 regional centers in New York City and Northeastern New Jersey.

- Calculated the economic impact of a rehabilitated office building in Albuquerque, New Mexico, including the increase in high quality jobs.

- Calculated the economic impact of a rehabilitated skilled nursing center in East Los Angeles, California, including the impact on nearby census tracts.

- Calculated the economic impact of development of warehouse and light industrial mfg space in Las Vegas, Nevada.

- Calculated the economic impact of rehabilitation and expansion of a vacation and health spa in Sharon Springs, New York

- Calculated economic impact of revitalizing an old resort hotel and adding new facilities for Lake Geneva, WI.

- Calculated the employment and tax effects for a portfolio of projects undertaken under the New Market capital program.

- Calculated generic employment changes for proposed EB-5 project for an Inland Port in Palm Beach County, FL

- Calculated the economic impact of construction of El Monte Village in El Monte, CA.

- Built an input/output model of Guam to be used to calculate economic impact of EB-5 projects. Used this model to estimate impact of various proposed projects.

- Calculated the economic impact of moving the Social Security Administration building in Birmingham, AL, and revitalizing the surrounding neighborhood.

- Calculated the economic impact of rehabbing and expanding the Everett Mall in Everett, WA.

- Determined the economic impact of building a new medical center in Charleston, SC

- Calculated economic impact of expanding Sugarbush resort in Vermont. Study included expansion of existing facilities and addition of new facilities.

• Calculated economic impact for new market tax credit program in Portsmouth, N.H. Study included both overall economic impact, and the increase in employment and income and the decrease in the unemployment rate and incidence of poverty in individual census tracts.

• Calculated the economic benefits of EB-5 programs for foreign investors for a mixed-use construction project, including a hotel, retail stores, apartments, and a sports stadium in the Washington, D. C. metropolitan area

• Calculated the economic benefits of EB-5 programs for foreign investors for a mixed-used retail shopping center in the New York City metropolitan area.

• Calculated the economic benefits of EB-5 programs for foreign investors for proposed shopping centers in five separate counties in Southern California, including differential impacts of building the shopping centers in different counties.

B. Projects for State and Local Governments

• Constructed an econometric model for the State of New York and determined the change in employment, labor income, and tax revenues for 43 different tax changes proposed by the Governor's office.

• Constructed a detailed econometric model for the State of Pennsylvania to determine the economic impact of the complete panoply of state taxes levied; the model contains over 1,000 equations. In cooperation with American Economics Group, the model was developed to simulate the effect of changes in any state tax rate on households and businesses by income deciles, household status, age of individuals, size of households, and many other demographic variables. The change in business taxes can also be simulated for detailed industry classifications.

• Determined whether the Washington, D.C. water and sewer authority should accept a high bid for a new waste disposal system. Decision to reject has saved the authority over $200 million, as construction prices turned down sharply as predicted.

• Built an econometric model to determine the "tax gap" caused by Internet sales for the state of Minnesota.

• Determined appropriate levels of shelter grants individual counties in New York State, and for utility allowances in New York City. Reviewed and prepared testimony in ongoing court cases in these areas.

• Calculated the economic impact of the revitalization of downtown Milwaukee, Wisconsin.

C. Economic Impact of Casino Gaming

• Built an econometric model to predict the growth of the gaming industry over the next decade, and the economic impact of that industry on employment and tax revenues at the Federal and state levels.

• Estimated the economic impact of Indian casino gaming nationally and for the State of Wisconsin.

• Determined the economic impact of the Oneida Indian gaming casino on the Green Bay metropolitan area.

• Estimated the negative economic impact on the Milwaukee area if a new Indian gaming casino were to be built in Kenosha, Wisconsin.

D. Economic Impact of Smoking Bans and Higher Taxes

• Testified on economic impact of smoking bans in Canada; certified as an expert witness by the Court.

• Examined the impact of smoking bans on restaurant sales in several different locations in the U.S. to determine how much sales changed when these bans were imposed, and the differential effects depending on whether these bans were partial or total.

• Determined the cross-border effects on retail sales from differential rates in cigarette, gasoline, and alcohol excise taxes

• Determined the economic impact of higher cigarette taxes on minority group employment.

• Estimated the economic impact and loss of Federal and state tax revenues when higher cigarette prices lead to increased smuggling.

E. Consulting Projects for Travel and Tourism

• Built an econometric model to predict tourism trips and revenues for the major regions of the U.S. economy.

• Constructed econometric models to predict tourism in Las Vegas and Orlando.

• Using the IMPLAN model, predicted economic impact of tourism and travel expenditures for all counties in Pennsylvania.

F. Other Private Sector Consulting Projects

• Calculated the economic impact of proposed EPA bans on fluoropolymer production.

• Estimated the size and economic importance of the fluoropolymer industry, and calculated economic impact of shutting down domestic production.

• Built an econometric model to examine how U.S. tax and regulatory policies help determine whether the gold mining industry would invest in the U.S. or other countries. Testified before Congress to help defeat legislation inimical to the mining industry.

• Built an econometric model to predict consumer bankruptcies, based on recent growth in consumer credit outstanding, the overall economic environment, and recent changes in credit regulations

• Estimated the economic impact of the ethanol subsidy on the U.S. economy and Farm Belt States, including the impact on the balance of payments, employment, and tax receipts. Testified before Congress to help pass legislation to extent subsidies to the ethanol industry.

• Built an econometric model to determine the impact of updating and improving the system of locks on the Upper Mississippi River on corn prices and exports, farm income, and the overall economy.

The EB-5 Immigrant Investor Program

EB-5 visas are issued to immigrants and their immediate family members if they invest in a USCIS approved "regional center." Gulf Coast Funds Management LLC ("GCFM") received regional center designation from the USCIS on August 18, 2008 and serves as the contract manager of the Fund. A foreign investor may apply for conditional residency to live, work and study in the United States, once his or her investment is made and his or her I-526 petition is approved by the USCIS. At that point an investor must file a petition with the USCIS to adjust his or her status from a valid non-immigrant status to that of conditional permanent resident or apply for an immigrant visa at a U.S. consulate or embassy abroad. If the Fund invests this money in businesses within the geographic scope of the regional center that create at least ten new jobs for each foreign investor within two years from the time the immigrant investor is admitted to the United States as a conditional permanent resident, the immigrant investor is eligible to receive permanent resident status in the United States. After five years from the date of admission to the Untied States as a conditional permanent resident, the investor may become eligible for U.S. citizenship. In the section of this private placement memorandum entitled "Frequently Asked Questions about the EB-5 Visa Program," beginning on page 20, you will find a detailed discussion of the EB-5 program. You can also read about the program on our website: www.GulfCoastFunds.com

Risks to Consider

Where You Can Find Additional Information

(b)(4)

(b)(4)

RISK FACTORS

(b)(4)

(b)(4)

(b)(4)

(b)(4)

Immigration risks

Each purchaser of a Class A Unit must understand that the Fund, the management company and each of their affiliates make no representation or warranty of any kind concerning whether an investment in the Fund will meet the requirements of the EB-5 program or other U.S. immigration requirements. Each investor in a Class A Unit must further understand that there

can be no assurance that an investment in the Class A Unit will result in his or her family receiving a conditional resident status or permanent resident status. Please carefully consider the following immigration risks, and discuss these and other immigration risks with your personal immigration lawyer.

As a Class A Unit holder, you will be subjected to certain general immigration risks faced by all immigrants to the United States.

The process of obtaining conditional resident status and permanent resident status involves many factors and circumstances that are not within the control of the Fund. These include the investor's past history, source of funds, immigration visa backlogs, potential changes in immigration laws and regulations (including laws and regulations specific to the EB-5 immigrant investor program) and quotas established by the United States government limiting the number of visas available to qualified individuals seeking conditional resident status under the EB-5 program. Although the Fund has been structured with the objective of providing Class A Unit holders with eligibility for conditional and permanent resident status under the EB-5 regional center provisions of the U.S. immigration laws, no assurance can be given that each Class A Unit holder will obtain approval of his or her particular immigrant petition. Purchase of a Class A Unit does not guarantee conditional or permanent residency in the United States. Furthermore, no assurances or advice can be given that conditional resident status will be converted to permanent resident status.

The EB-5 program and other immigration laws can be discontinued or changed at any time.

Immigration programs have long been part of the American history. However, the U.S. Congress and/or other governmental agencies may discontinue some or all immigration programs, or the U.S. Congress and/or other governmental agencies may change the requirements of existing or subsequent programs. Changes to and/or elimination of immigration program(s) may adversely affect an EB-5 immigrant investor who invests in a Class A Unit.

The EB-5 immigrant investor program was created by the United States Congress as the employment-based fifth preference immigrant visa category in 1990 for immigrants who invest in U.S. companies and benefit the U.S. economy. The U.S. Congress and/or other government agencies may discontinue or change some or all of the EB-5 immigrant investor program. Changes to and/or elimination of the EB-5 immigrant investor program may adversely affect the holders of Class A Units.

You must have rights under the operating agreement sufficient to meet the USCIS requirement of holding a policymaking position.

The EB-5 program requires an investor to hold a policymaking or management position in the Fund. The Fund believes that each investor, as the holder of a Class A Unit, is provided with the powers and duties under the Operating Agreement sufficient to meet the USCIS requirement that an investor is actively participating in policymaking or management of a new commercial enterprise.

Investment in the Class A Units and approval of the I-526 petition is only the first step towards acquiring conditional residency status.

After approval of their I-526 petition, EB-5 immigrant investors must file Form I-485, *Application to Register Permanent Residence or Adjust Status* ("I-485") with the USCIS if the investor is already residing in the United States in valid non-immigrant status. If the investor is living outside the United States, he or she must obtain a conditional immigrant visa through an application filed with the U.S. Department of State followed by an interview at a U.S. embassy or consulate. An EB-5 immigrant investor's background (or that of an immediate family member) may not meet the USCIS or the Department of State criteria for temporary or permanent residency in the United States. For example, among other criteria, the following may be grounds for denial of immigration benefits for the immigrant, and/or other members of the immigrant's family: having a communicable disease (e.g., AIDS) or other dangerous contagious disease; having been at any time involved with, trafficking in, or taking, illegal drugs; having been convicted of certain crimes; having committed a fraud or misrepresentation to a U.S. government official; or having violated U.S. immigration law in the past.

It is a requirement of the EB-5 program that an immigrant investor's source of funds be proper, under the U.S. immigration rules and regulations.

EB-5 immigrant investors must demonstrate to the USCIS that the funds they invest in the Class A Units were obtained through lawful means. Each EB-5 immigrant investor must document, to the satisfaction of the USCIS, the source of his or her funds. The Fund and the EB-5 immigrant investor's immigration attorney may make a preliminary assessment of the adequacy of an investor's source of funds, but the ultimate decision will be made solely by USCIS. Each EB-5 immigrant investor must agree to provide information and documents to the Fund, and to allow the Fund to make further investigation, concerning the EB-5 immigrant investor's source of funds and the personal and business background of the EB-5 immigrant investor and accompanying family members.

Achieving your immigration goal of conditional and permanent resident status will require you to maintain your primary residence in the United States.

EB-5 immigrant investors who obtain conditional resident status or permanent resident status must intend to make the United States their primary residence. Conditional residents or permanent residents who maintain their primary residence outside the United States risk revocation of their U.S. residence status.

Each prospective EB-5 immigrant investor should consult a competent immigration attorney to review the likelihood that the investor's immigration objectives will be achieved. The management company's preferred immigration counsel is Miller Mayer, a law firm headquartered in Ithaca, New York. Lawyers at Miller Mayer have represented many regional centers and immigrant investors in securing visas under the EB-5 program. You can contact the firm at 607-273-4200, or you can access their website at www.millermayer.com.

The foregoing risks do not purport to be a complete explanation of all the risks involved in acquiring a Class A Unit. Potential investors are urged to read this entire document and the operating agreement of the Fund before deciding whether to invest in the Fund.

USE OF PROCEEDS

(b)(4)

OUR BUSINESS

Management of our Fund

The Fund has a Board of Directors of four people, three of whom are independent directors and one of whom is designated by the management company. The Board of Directors of the Fund, or the "Board," approves all investments of the Fund. The Board has entered into an agreement with the management company to manage the day-to-day activities of the Fund, reporting to the Board at monthly meetings. Both the Board and the management company have extensive experience in business and civic organizations in the Region as well as government experience at the state and federal level. There are currently 3 independent directors of the Fund, however the Class B Unit holder reserves the right to appoint 1 additional director of the Fund.

The management company's founder and chairman, David Voelker, has been a director of many companies, both public and private, civic and business organizations within the Region. After hurricanes Katrina and Rita in 2005, Governor Blanco, a Democrat, appointed Mr. Voelker to the Louisiana Recovery Authority or the "LRA". The LRA is charged with securing funding and other resources needed for recovery and establishing principles and policies for redevelopment following the devastating hurricanes of 2005. In 2008, Governor Jindal, a Republican, appointed Mr. Voelker to the Chairmanship of the LRA where he continues to serve.

We discuss Mr. Voelker and other members of the Board and management company in greater detail below.

Board of Directors

(b)(6)

Donna Brazile	**50**	**Director of the Fund**

Veteran Democratic political strategist Donna Brazile is an adjunct professor, author, and syndicated columnist. Ms. Brazile has led a long and active career in politics including numerous state and local campaigns, as well as every presidential campaign from 1976 through 2000, when she served as presidential campaign manager for former Vice President Al Gore. Author of the best-selling autobiography *Cooking with Grease: Stirring the Pots in American Politics*, Ms. Brazile is an adjunct professor at Georgetown University and a senior lecturer at the University of Maryland. In the media, she serves as a political contributor on CNN; consultant to ABC News; regularly appearing commentator on ABC's *This Week with George Stephanopoulos*; and frequent contributor to NPR's *Political Corner*. In print and online, she is a columnist for *Roll Call* and *Ms.* magazine; and is a content contributor to *BlackAmericaWeb.com*. *Washingtonian* named Ms. Brazile one of the "100 most powerful women" and *Essence* named her one of the "top 50 women in America." The Congressional Black Caucus Foundation has bestowed upon her its award for political achievement. Ms. Brazile is the chair of the Democratic National Committee's Voting Rights Institute, established in 2001 to help protect and promote the rights of all American citizens to participate in the electoral process. Like Mr. Voelker, Ms. Brazile served as a member of the board of directors of the Louisiana Recovery Authority. Ms. Brazile is also founder and managing director of Brazile & Associates LLC, a general consulting, grassroots advocacy, and training firm based in Washington, D.C.

Board of Directors *(continued)*

Name	*Age*	*Position*
Kathleen B. Blanco	**66**	**Director of the Fund**

Governor Kathleen Babineaux Blanco's career as a trailblazer in Louisiana politics and a leader in economic development and education spans more than 25 years. In 1984, Governor Blanco became the first woman elected to represent the Lafayette region in the Louisiana House of Representatives. Five years later, Governor Blanco became the first woman elected to the Public Service Commission (PSC). As the first woman Chair of the PSC, Governor Blanco built a record of balancing the interests of consumers and corporate entities. She established and maintained a modern but fair regulatory environment for national and international telecommunications, electricity and natural gas corporations doing business in Louisiana. Governor Blanco was first elected Lieutenant Governor of Louisiana in 1996, and then re-elected by 80% of the electorate in 1999. During her eight-years as Lieutenant Governor, Blanco lead the way in growing Louisiana's tourism economy by more than 40%, and expanding the state's parks, tourist centers, and historic sites. In 2004, Kathleen Babineaux Blanco became the first woman elected Governor of Louisiana, and only the second woman representing a Southern state to be elected governor in her own right. Governor Blanco led Louisiana's immediate and long-term recovery efforts following hurricanes Katrina and Rita. In 2006 and 2007, Southern Business and Development magazine named Governor Blanco among the "Top 10 Who Made a Difference in Economic Development" for her innovative efforts to diversify Louisiana's economy and recruit new business. Governor Blanco passed far-reaching ethics reforms, reformed Louisiana's juvenile justice system, expanded early childhood education, pushed through reforms in education standards and accountability, and directed the single largest increased investment in education in Louisiana's history.

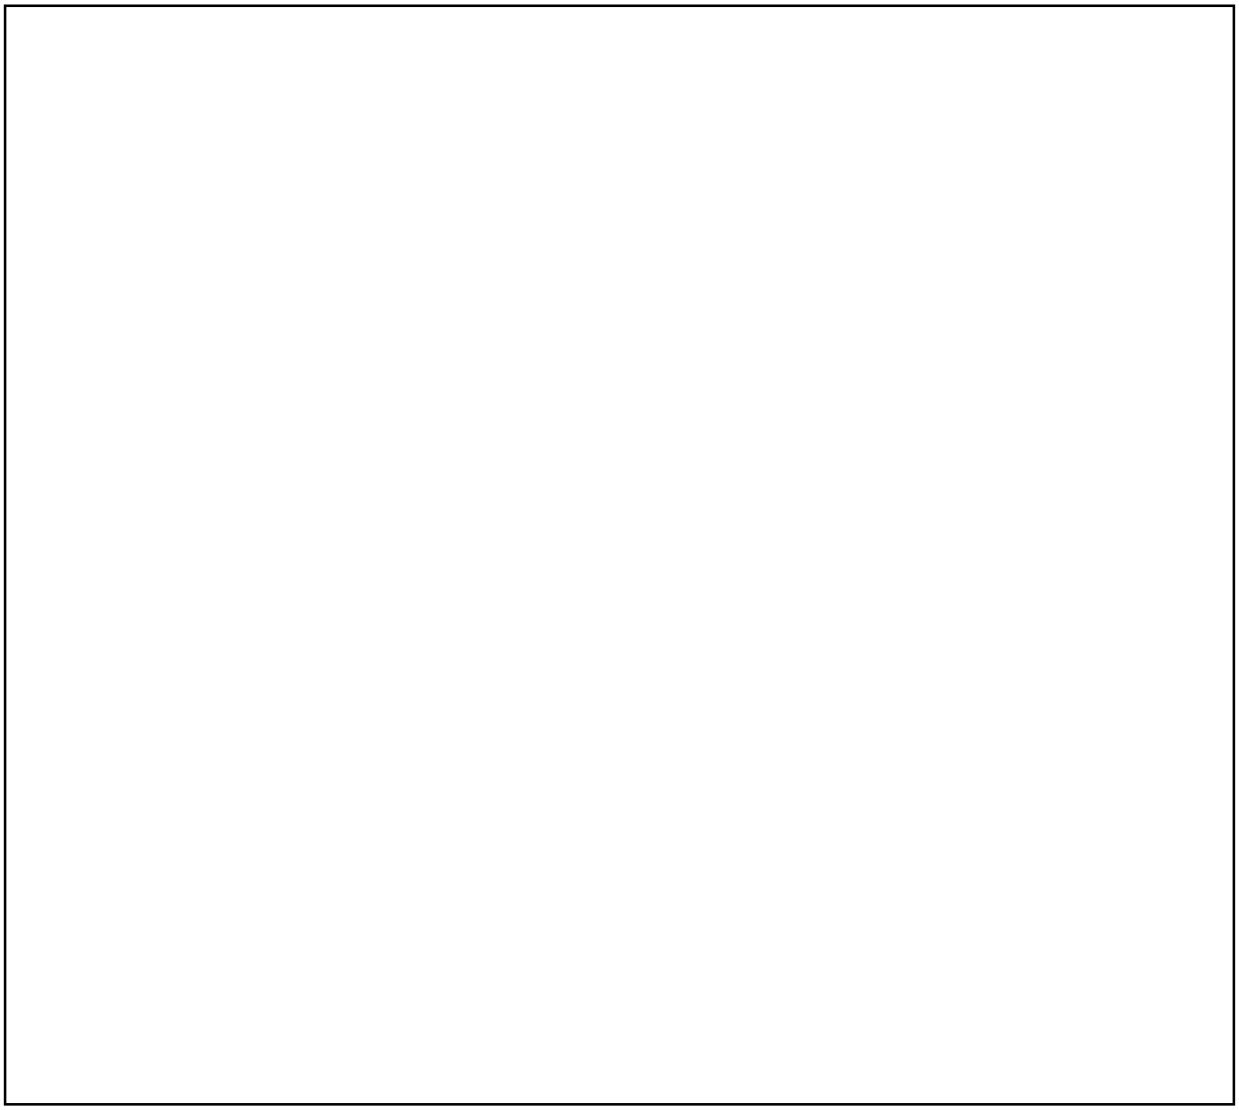
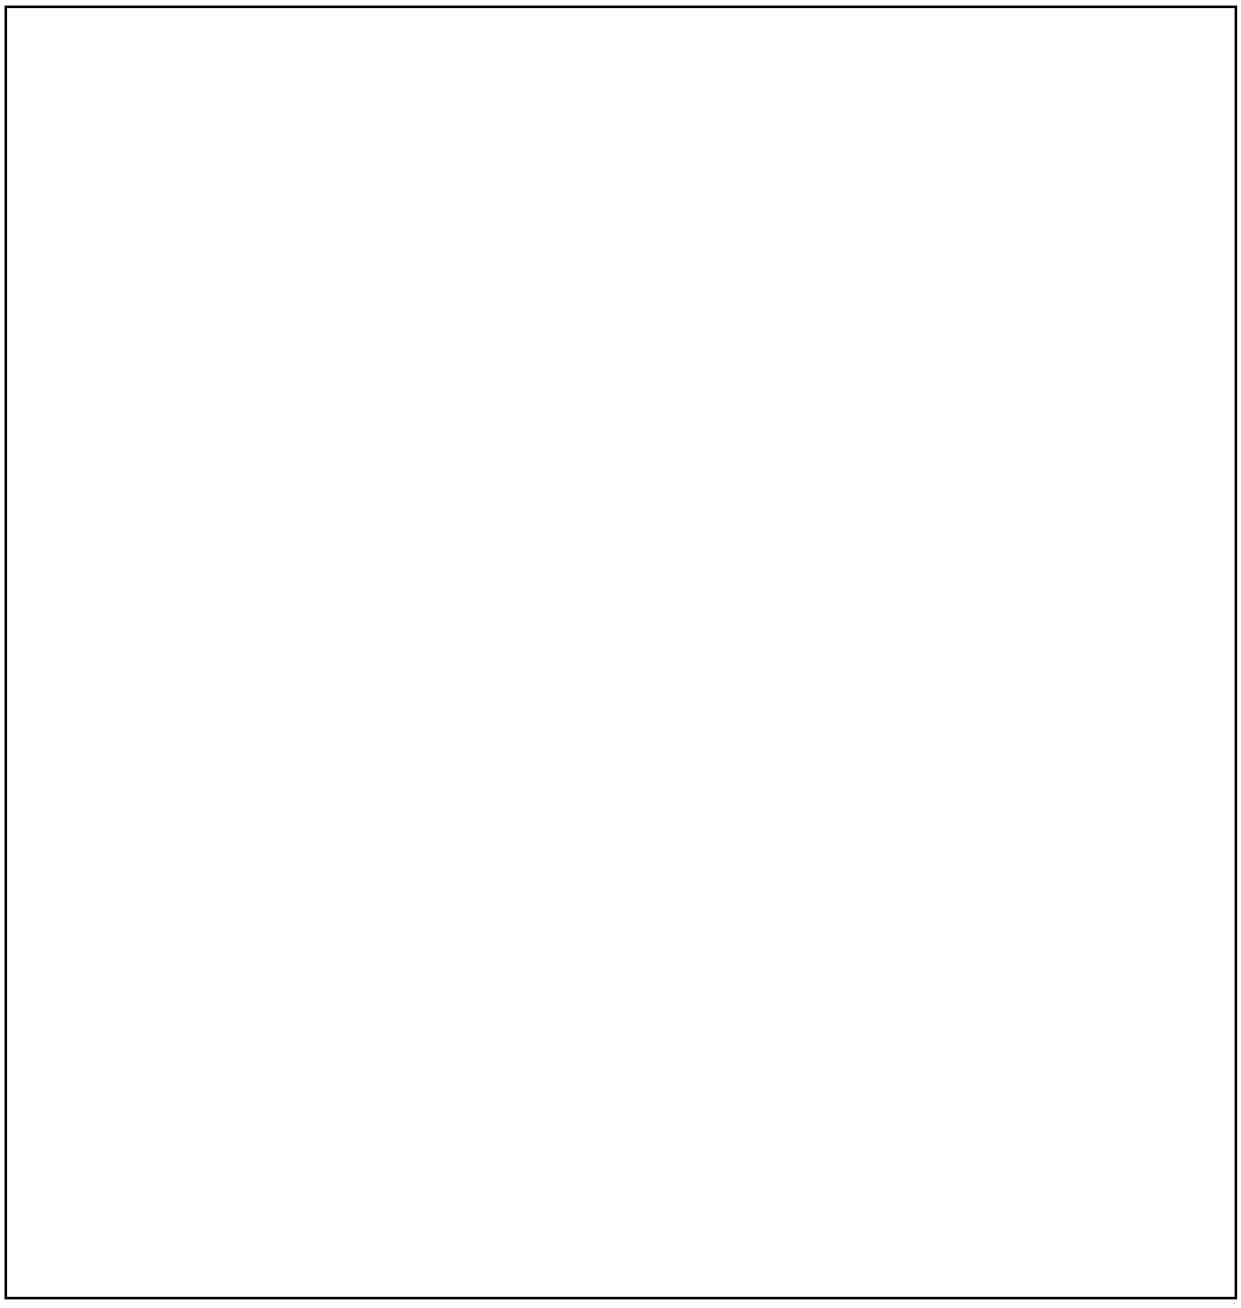
Our Investment Process

(b)(4)





(b)(4)

THE EB-5 PROGRAM

Overview

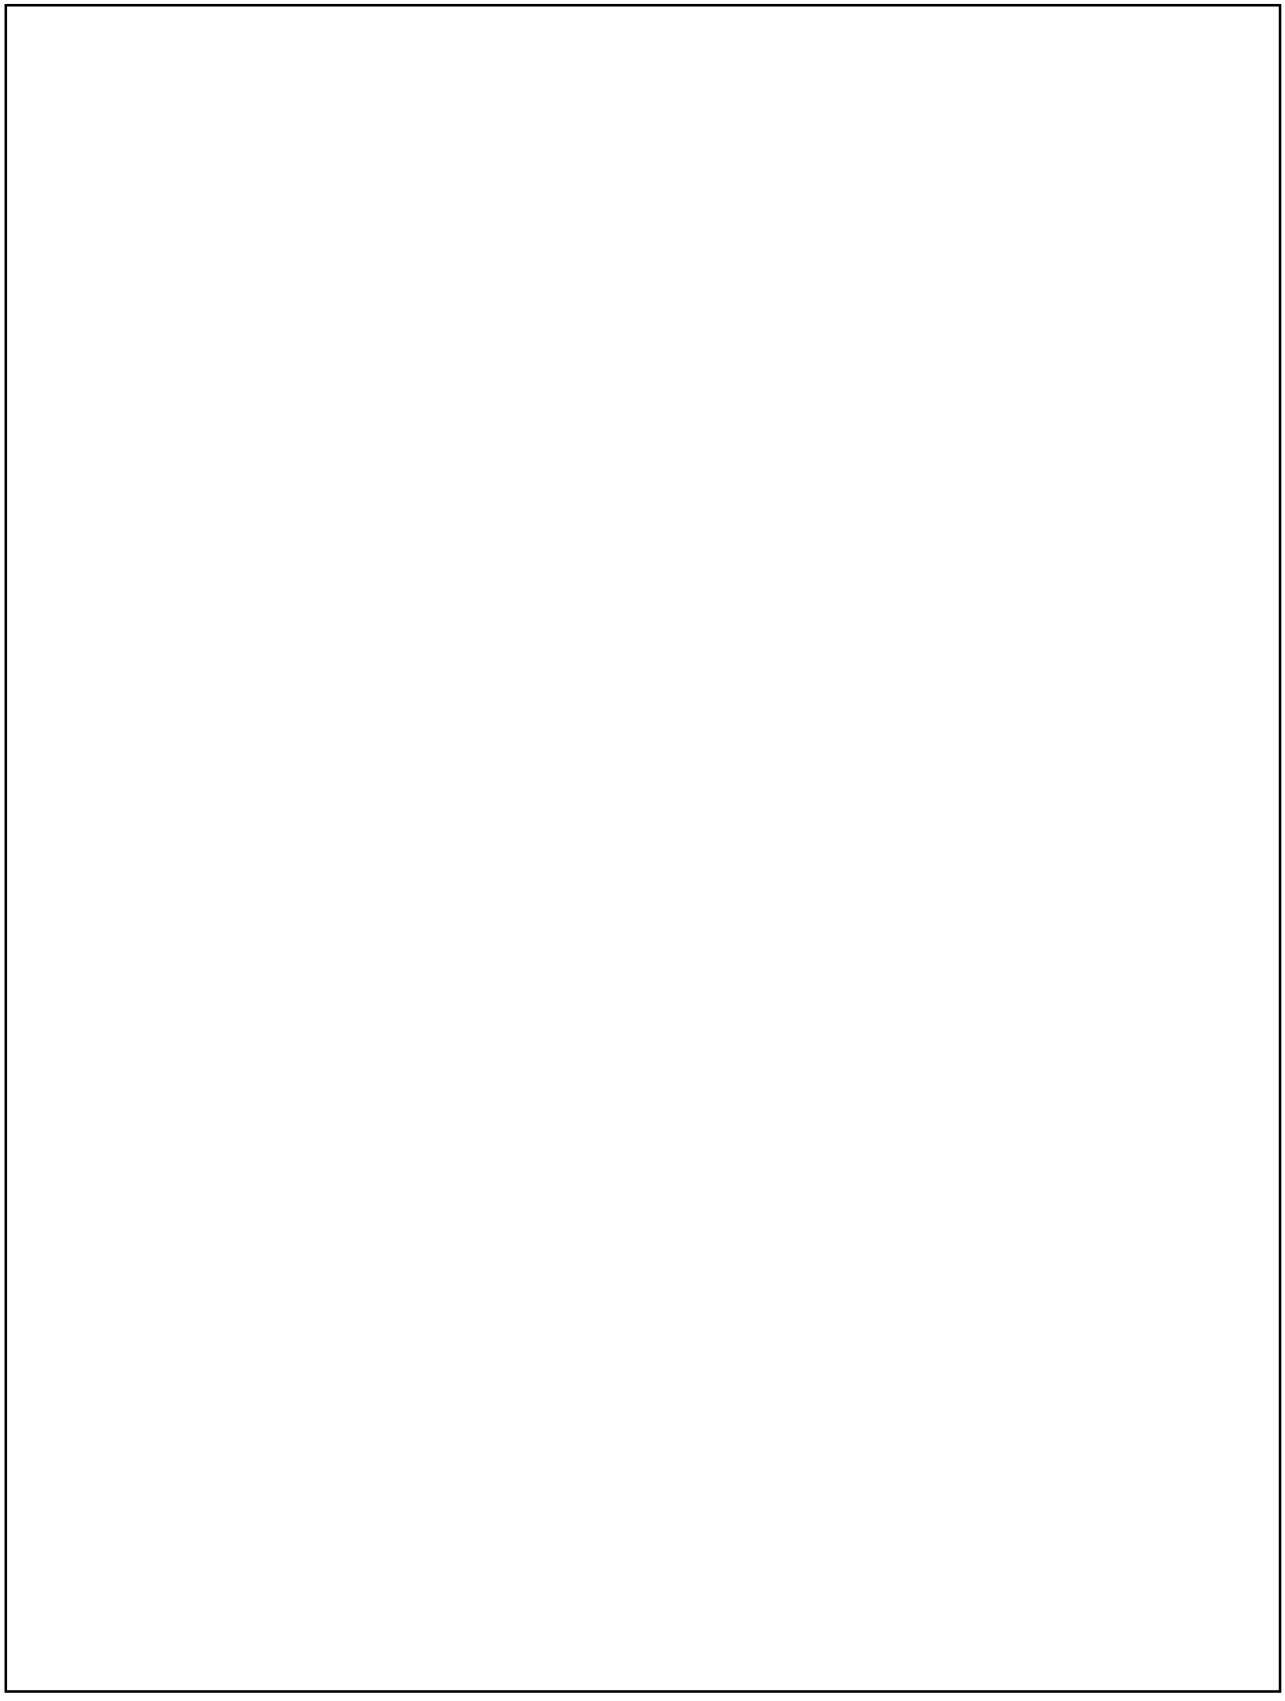
In 1990, the U.S. Congress created the employment based 5th preference (EB-5) immigrant investor visa program. The EB-5 program offers 10,000 immigrant visas a year to qualified investors who wish to obtain residence in the United States by investing in businesses that will benefit the U.S. economy and create jobs. The required investment amount is $1 million or $500,000 if the investment is made in a targeted employment area ("TEA"). Of the 10,000 investor visas available annually, 3,000 are set aside for those who apply under the immigrant investor pilot program involving a USCIS designated "regional center."

Once the investment has been made in a regional center and the I-526 is approved by USCIS, to adjust status to that of conditional permanent resident an immigrant investor must file a Form I-485 with the USCIS if the investor is already residing in the United States in valid non-immigrant status. If the investor is living outside the United States, he or she must obtain a conditional immigrant visa through an application filed with the U.S. Department of State followed by an interview at a U.S. embassy or consulate. Ninety days before the two-year anniversary of the granting of conditional residence status, an investor must file a Form I-829, *Petition by Entrepreneur to Remove Conditions,* ("I-829") to show that his or her investment has been sustained and has created at least ten jobs within the geographic scope of the regional center. Once the I-829 is approved, an investor is granted permanent resident status.

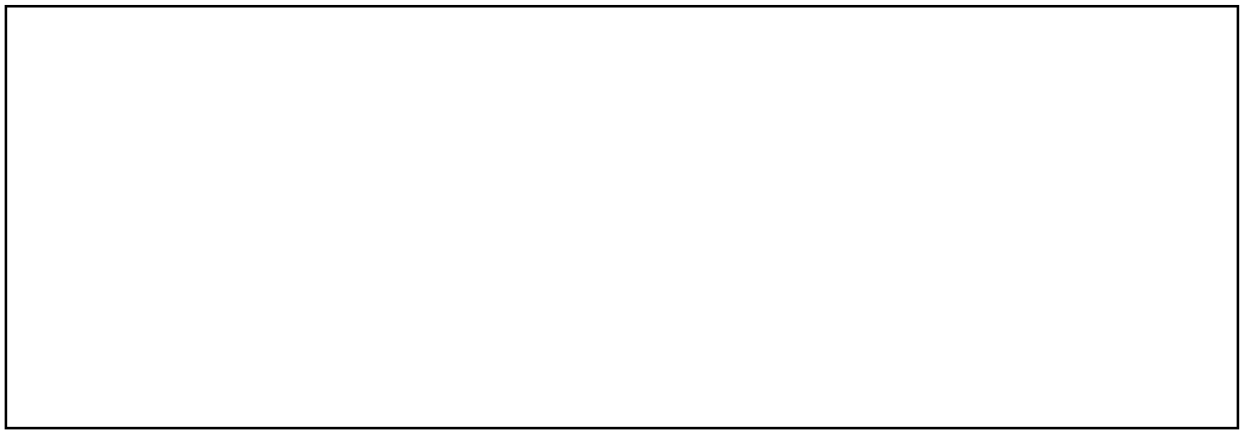
The Immigration Process

The Fund's primary role in the immigration process is to sell interests in the Fund to immigrant investors (which allow the investors to petition for conditional residency status) and invest the investors' capital in a manner that is consistent with the EB-5 program by creating at least ten jobs for each Class A Unit holder in the Fund. The rest of the immigration process will be led by the immigrant investor and his or her independent immigration counsel. The management company will maintain a current record of jobs created by the Fund's investment activities. Twice during the immigration process, the management company will assist each Class A Unit holder by providing information about job creation to be submitted to the USCIS in the manner required by the EB-5 program. Upon the initial I-526 filing, the Fund will certify to the USCIS with respect to the projected number of jobs that will be created. For the I-829 filing, the Fund will allocate to each Class A Unit holder ten jobs from those jobs created and maintained by the Fund's investments. For an overview of the immigration process, please review the diagram below:

(b)(4)



(b)(4)



What do I have to do to get my I-526 approved?

Normally, you will retain an U.S. immigration lawyer to help you in the I-526 petition process. Our preferred investor immigration counsel is Miller Mayer, LLP. Miller Mayer will help you file a Form I-526 which, among other things, requires proof that the source of your $500,000 investment is lawful.

Will I receive my conditional permanent residence card as soon as my Form I-526 is approved?

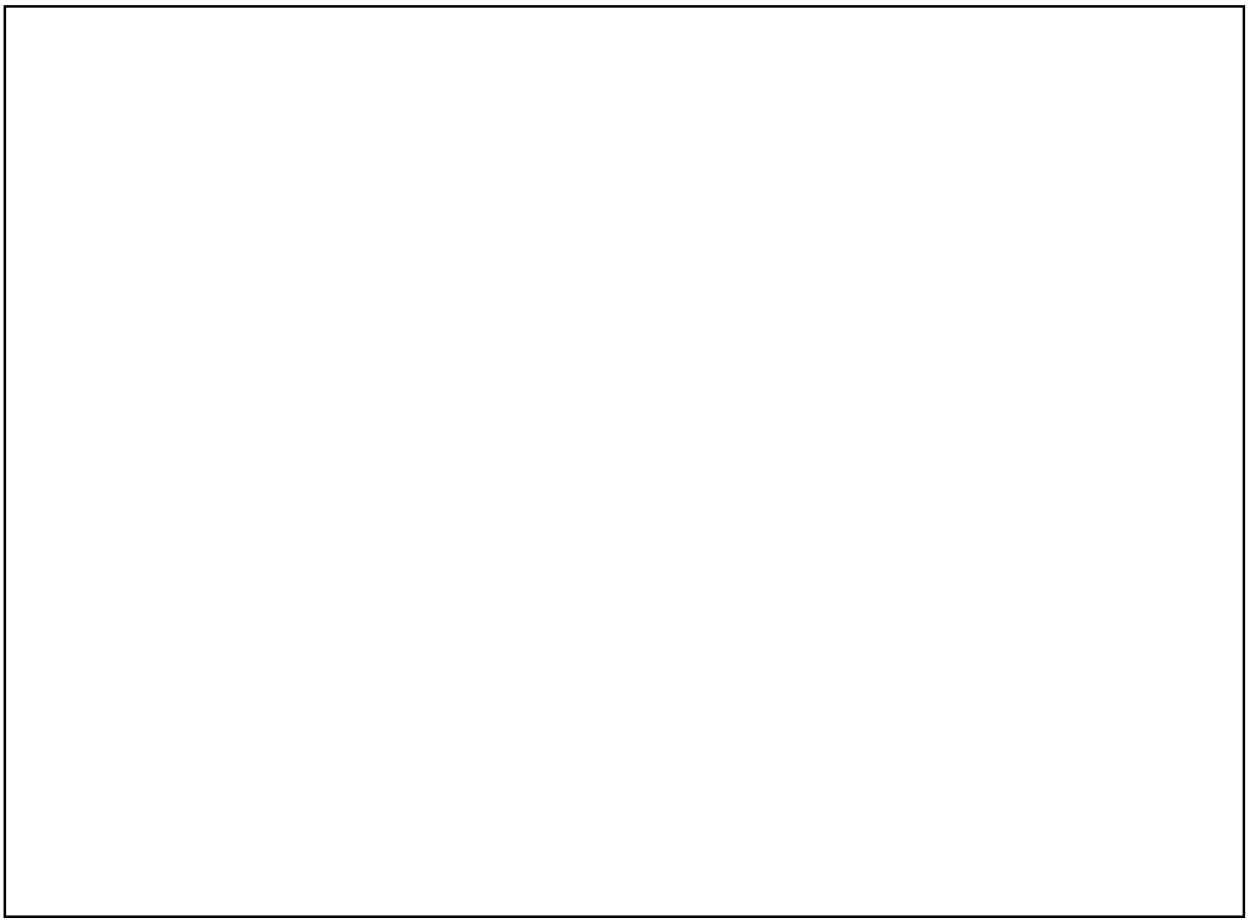
No. After approval of the I-526 petition, an immigrant investor must file a Form I-485 with the USCIS if the investor is already residing in the United States in valid non-immigrant status. If the investor is living outside the United States, he or she must obtain a conditional immigrant visa through an application filed with the U.S. Department of State followed by an interview at a U.S. embassy or consulate. An EB-5 immigrant investor's background (or that of an immediate family member) may not meet the USCIS or the U.S. Department of State criteria for temporary or permanent residency in the United States. Here is a general description, from the U.S. government's web site, of certain requirements for receiving a visa from the U.S. Department of State:

> **VISA INELIGIBILITY / WAIVER**
> The immigration laws of the United States, in order to protect the health, welfare, and security of the U.S., prohibit the issuance of a visa to certain applicants. Examples of applicants who must be refused visas are those who: have a communicable disease, or have a dangerous physical or mental disorder; have committed serious criminal acts; are terrorists, subversives, members of a totalitarian party, or former Nazi war criminals; have used illegal means to enter the U.S.; or are ineligible for citizenship. Some former exchange visitors must live abroad for two years. Physicians who intend to practice medicine must pass a qualifying exam before receiving immigrant visas. If found to be ineligible, the consular officer will advise the applicant of any possible waivers.
>
> **OTHER IMPORTANT INFORMATION**
>
> **Documents for Visa Application**
> All applicants must submit certain personal documents such as passports, birth

certificates, police certificates, and other civil documents, as well as evidence that they will not become public charges in the United States. The consular officer will inform visa applicants of the documents needed as their applications are processed.

Medical Examinations
Before the issuance of an immigrant visa, every applicant, regardless of age, must undergo a medical examination. The examination will be conducted by a physician designated by the consular officer. Examination costs must be borne by the applicant, in addition to the visa fees.

Visa Fees
The cost of each immigrant visa application may vary for additional visa fees apply. For up to date immigration visa fee costs, please consult your immigration attorney or please
(b)(4) visit the USCIS fee schedule web page.
Source: www.uscis.gov



When will my conditional immigrant status become permanent?
Ninety days before the two year anniversary of your receipt of conditional immigrant status, you must file an I-829 petition to remove the conditions. We will provide supporting documentation for the I-829 filing to show that your money has been invested in the Region and that it has had

the effect of creating ten jobs. If your I-829 petition is approved, you will become a permanent resident of the United States, and may apply for full citizenship if you desire.

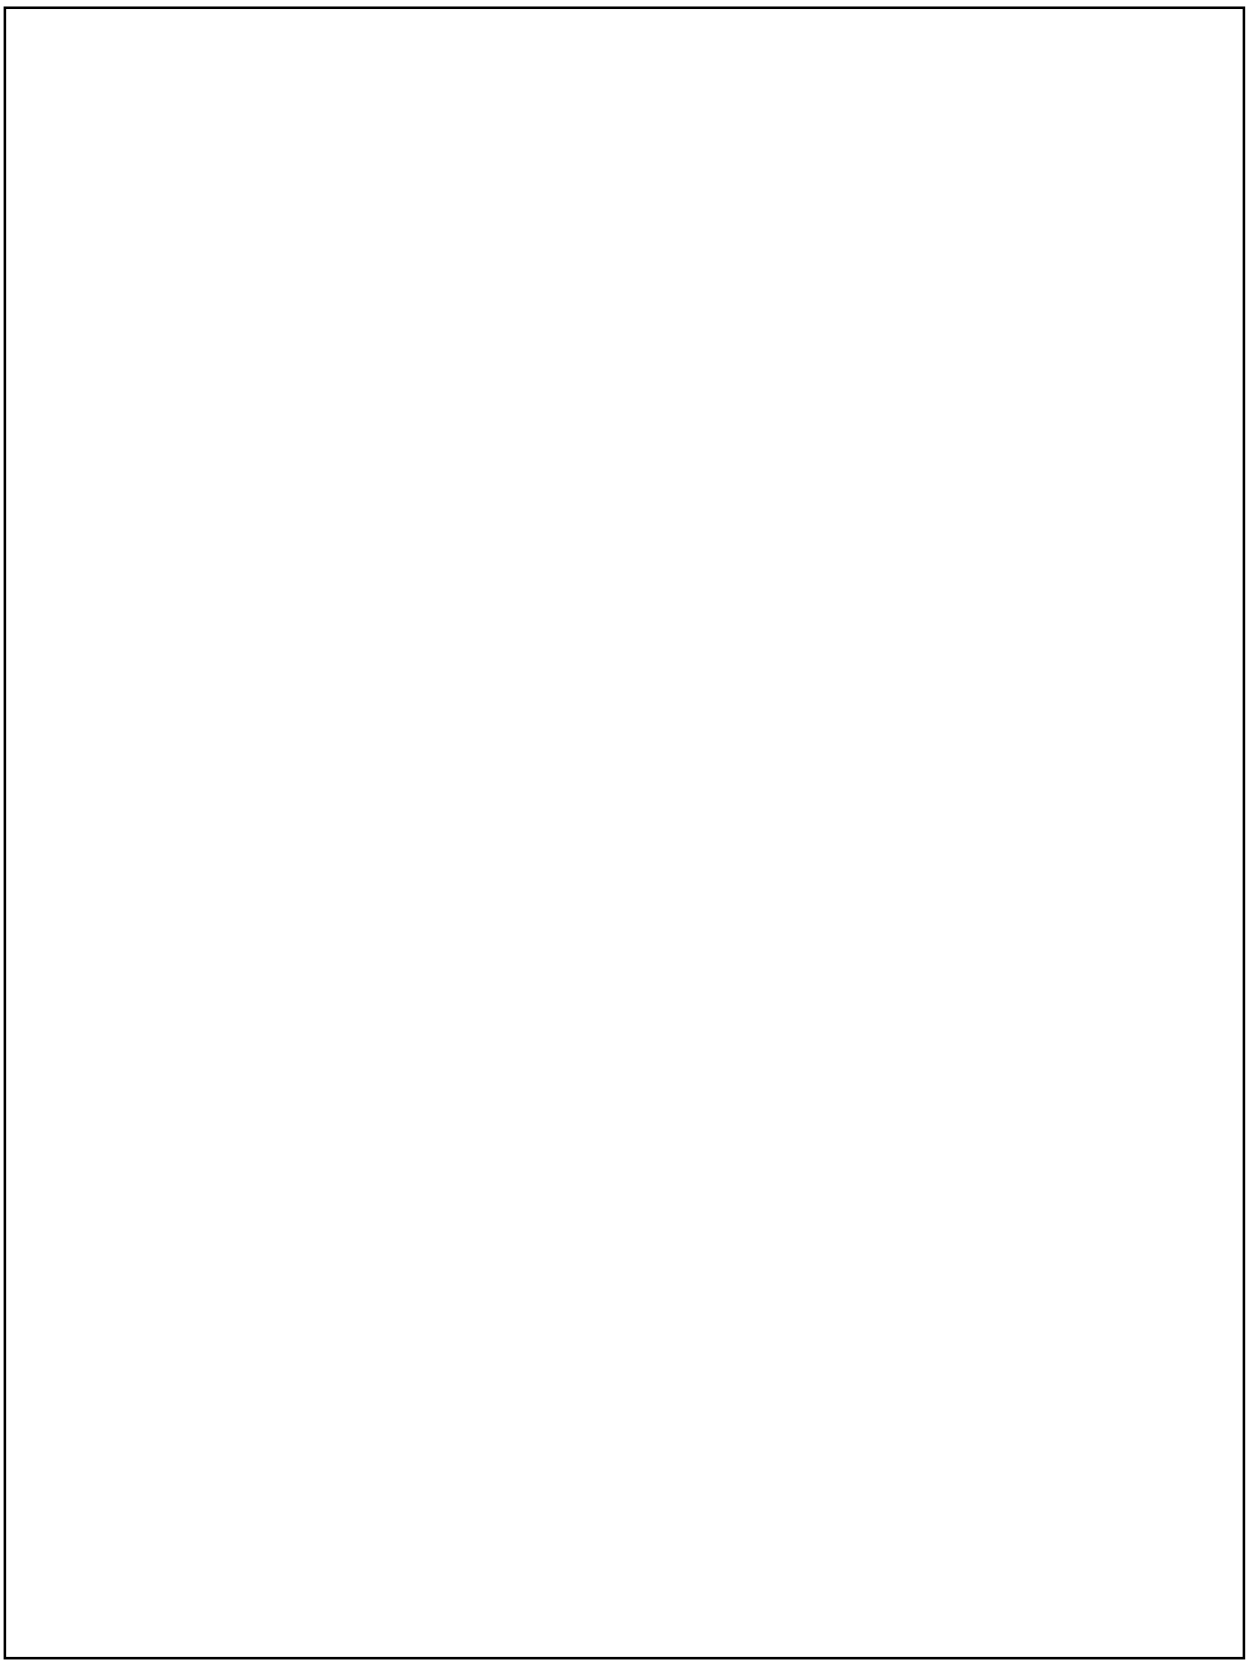
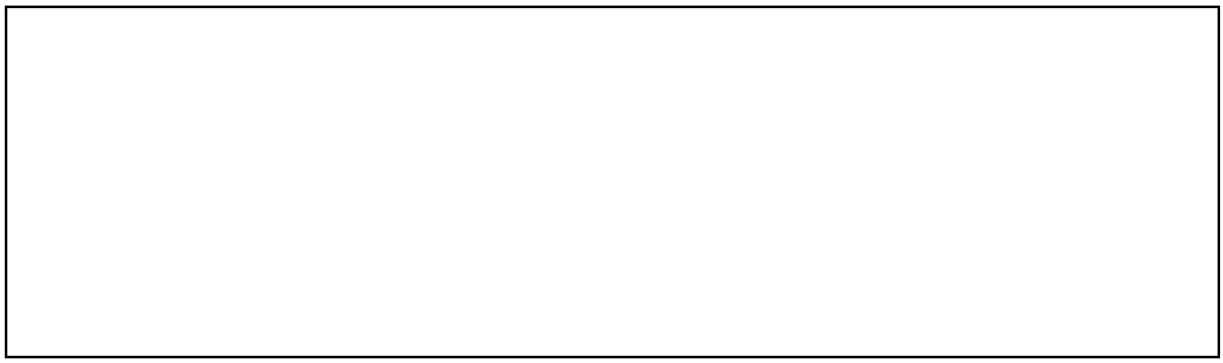
(b)(4)

RIGHTS OF CLASS A UNIT HOLDERS

(b)(4)





(b)(4)

CERTAIN TAX CONSIDERATIONS

The following discussion about certain U.S. federal income tax and other tax considerations that you should weigh prior to investing in a Class A Unit is merely a presentation of certain tax issues that generally apply to all investors in EB-5 funds. You should not consider this discussion to be tax advice, applicable to your particular situation or a full discussion of all material United States, state, local and foreign tax consequences of an investment in the Fund or your status as U.S. tax resident or non-resident and you should consult with your personal tax advisor about these, and all other issues relevant to your personal decision to invest in a Class A Unit. Neither the Fund nor the management company is qualified to provide the tax advice you will need. You cannot use this summary for the purpose of avoiding United States federal tax penalties.

The following discussion is based upon the Internal Revenue Code of 1986 (the "Code"), the applicable Treasury Regulations promulgated or proposed under the Code (the "Regulations"), current positions of the IRS contained in published revenue rulings and revenue procedures, current administrative positions of the IRS, and existing judicial decisions, as in effect on the date of this Memorandum, all of which are subject to change or modification, with or without retroactive effect, at any time.

No assurance can be given as to the future status of federal income tax laws or other tax laws as they pertain to limited liability companies of the type described herein. It is likely that changes to the Code will be proposed in the future. The effect of such proposals on the Fund and on an investment therein cannot be analyzed. Accordingly, potential investors are urged to consider on-going developments regarding changes in the federal income tax law and other tax laws and to consult their own advisors in assessing the risks associated with an investment in the Fund.

Classification of the Fund

The Fund will be treated as a partnership for federal income tax purposes under the "check the box" Regulations. Under these regulations, an unincorporated domestic entity, such as the Fund, with at least two members will be taxed as a partnership if no election is made to be taxed as a corporation. Accordingly, the discussion herein relating to partnerships and partners generally will be applicable to Class A Unit holders in the Fund.

Partnership Taxation in General

Under the Code, a partnership pays no federal income tax, although it may be required to withhold and pay over taxes on behalf of certain of its partners. Rather, each partner reports on his federal income tax return his distributive share of all items of income, gain, loss, deduction, credit and tax preference of the partnership, whether or not the partnership makes any actual distribution to the partner during the taxable year. Thus, it is possible that distributions from the Fund will not be sufficient to pay tax liabilities with respect to the tax income and gain allocated to a unit holder and that the only source of payment of such tax liabilities would be from the unit holder's funds from sources other than the Fund.

The extent to which a unit holder may utilize Fund losses in any tax year is limited to the adjusted tax basis of his interest in the Fund at the end of the Fund tax year (see "Basis of Units"). In addition, a unit holder may not deduct Fund losses in excess of the amount the unit holder is considered "at risk" with respect to the Fund under Code Section 465 (See "At Risk Limitations"). A unit holder generally may use his distributive share of any partnership losses allowable after applying the foregoing loss limitation only to offset his income from other passive sources (see "Passive Activity Loss Limitations").

Basis of the Units

A unit holder's initial tax basis for his Units will be the amount of money he contributes to the Fund.

A unit holder's basis is his Units is increased by (a) his share of the non-recourse liabilities of the Fund, and (b) his share of profits. The adjusted tax basis of his Units will be decreased, but not below zero, by (1) distributions to the unit holder by the Fund; (ii) reductions in his share of the non-recourse obligations of the Fund; (iii) his share of the losses of the Fund; and (iv) his share of Fund expenditures not chargeable to his capital account.

Under Regulation Section 1.752-1(a)(2), a partnership liability is a non-recourse liability to the extent that no partner or related person (for the purpose of Regulation Section 1.752-4(b)) bears any economic risk of loss. A partnership liability generally is not considered non-recourse to the extent that any partner guarantees the payment of such liability. If a unit holder or a "related" person guarantees all or a portion of the non-recourse liabilities of the Fund, the other unit holders' tax basis in their Units will not include such guaranteed portion of the Fund's non-recourse liabilities.

Similarly, if a partner or a person related to a partner loans funds to a partnership and the other partners are not personally liable for the repayment of the loan, only the lending partners may include that loan in the basis of their partnership interests. For example, if a unit holder or one of his affiliates makes a loan to the Fund, the other unit holders would not include any portion of such a loan in the basis of their Units.

The Fund may be a "tiered" partnership if it owns interests in other entities taxed as partnerships for federal income tax purposes. With respect to "tiered" partnerships, the Regulations provide that the "upper-tier" partnership's share of the liabilities of the "lower-tier" partnership will be treated as liabilities of the upper-tier partnership for purposes of applying Code Section 752 to the partners of the upper-tier partnership (Regulation Section 1.752-4(a)).

If a unit holder's basis in his Units is reduced to zero, the amount of any distributions (including any deemed distributions due to a reduction in Fund non-recourse liabilities) in excess of his share of the Fund's taxable income for the year will be treated as capital gain, except to the extent that ordinary income treatment is required for his pro rata share of depreciation recapture.

A partner may not deduct his share of losses of a partnership to the extent such losses exceed the partner's basis for his interest in the partnership. Any losses that are not currently deductible by a partner due to this limitation may be deducted when and to the extent the partner's basis is increased (for example, by the allocation of partnership income). The ability of a partner to claim his share of partnership losses will also depend on the impact of the "at risk" rules of Code Section 465 (see "At Risk Limitations") and the passive activity loss limitation rules of Code Section 469 (see "Passive Activity Loss Limitations").

Allocations of Profits and Losses

Under Code Section 704, a partner's distributive share of the income, gain, loss, deduction, or credit of a partnership is determined by reference to the partnership agreement, unless the allocation contained in the agreement does not have "substantial economic effect," in which case the allocation is determined by reference to the partners' interests in the partnership, taking into account all facts and circumstances.

Although it is intended that the Fund's allocations will be in accordance with the unit holders' interests in the Fund, it is possible that the Internal Revenue Service will challenge the Fund's tax allocations and attempt to reallocate tax items among the unit holders. Any such reallocations of tax items may have adverse tax and financial consequences to a unit holder.

"At Risk" Limitations

Code Section 465 limits the amount of losses that a partner can deduct in a particular year to the amount that such partner is considered "at risk" at the close of the partnership's taxable year. Generally, a taxpayer is considered at risk to the extent of (i) the amount of money and the adjusted basis of property he contributes to an activity, plus (ii) any amounts borrowed with respect to an activity for which the taxpayer is personally liable or for which the taxpayer has pledged property (other than property used in the activity) as security. A taxpayer will generally not be considered "at risk" with respect to amounts protected against loss through non-recourse financing, guarantees, stop loss agreements or similar arrangements.

A taxpayer generally is not considered to be "at risk" for non-recourse obligations. Losses not deductible by reason of the at-risk rules may be carried forward indefinitely and deducted at such time as the taxpayer becomes at risk to a greater extent with respect to the activity.

Passive Activity Loss Limitations

Code Section 469 generally provides that losses attributable to "passive activities" may be used only to offset income from passive activities. Code Section 469 applies to individuals, estates, trusts, personal service corporations (corporations providing services that are substantially performed by owner-employees), and closely-held corporations (corporations having 5 or fewer shareholders who own more than 50% in value of the stock).

Code Section 469 defines a "passive activity" as (i) the conduct of a trade or business in which the taxpayer does not materially participate or (ii) any rental activity (without regard to participation). Under Code Section 469, the interest of a limited partner in a limited partnership is not considered an interest with respect to which a person materially participates, except as provided in regulations. Accordingly, a unit holder's investment in the Fund will be a passive activity, and any Fund losses allocated to the unit holders will constitute passive losses.

Under Code Section 469, passive losses generally may be used only to offset passive income until the taxable year in which the taxpayer disposes of his interest in the activity producing the passive losses.

Passive income is defined as the income from passive activities. Passive income does not include (i) income received as salary or wages; (ii) income derived from a trade or business in which the taxpayer materially participates ("active income"); (iii) interest, dividends, annuities or royalties ("portfolio income") not derived in the ordinary course of business; (iv) gain or loss from the disposition of property used in the ordinary course of business producing portfolio income; or (v) gain or loss from the disposition of property held for investment which is not considered to be an interest in a passive activity.

Passive losses that are not deductible in a particular year may be carried forward indefinitely and used to offset passive income in subsequent years. In addition, upon a fully taxable disposition of a taxpayer's entire interest in the passive activity (other than to a related party), any unused passive losses from the activity for the year that have been carried forward, and the loss, if any, on the disposition, may be applied first to offset any income from that activity for the year (including the gain, if any, from the disposition); second, to offset any other passive income for the year; and third, any remaining unused passive losses from the activity may be used to offset the taxpayer's active and portfolio income.

Based on the foregoing, a unit holder may use any Fund losses allocated to him only to offset his passive income. If the Fund losses are not fully deductible in the year incurred, they may be applied against passive income (that is not portfolio income) in future years. If any unused losses from the Fund remain when the unit holder disposes of his entire interest in the Fund, these losses may be used in full at such time, first against passive income, and then against any other income of the unit holder.

The foregoing analysis assumes that the Fund constitutes a single "activity" for purposes of Code Section 469. If the Fund consisted of more than one activity, the passive activity loss limitations would apply separately to each such activity.

The Regulations provide flexibility in grouping a taxpayer's trade or business activities and rental activities for purposes of applying the passive activity rules. In this respect, one or more trade or business activities or rental activities may be treated as a single activity if the activities constitute an appropriate economic unit for the measurement of gain or loss for the purposes of Code Section 469. However, generally rental activities may not be grouped with a trade or business activity. Further, a taxpayer that owns an interest as a limited partner or limited entrepreneur (e.g., a member of an LLC who does not actively participate in the management of

the LLC) may not group the following activities with any other activity: (i) holding, producing or distributing motion picture films or video tapes, (ii) farming, (iii) leasing personal property, (iv) exploring for or exploiting oil and gas resources, and (v) exploring for or exploiting geothermal deposits. A partnership must group its activities under the rules of the Regulations and once the partnership groups its activities, the partner may group those activities with each other, with activities conducted directly by the partner, and with activities conducted through other C corporations subject to Code Section 469, S corporations and partnerships, except that a partner may not treat activities grouped together by any 469 entity as separate activities.

Whether or not the Fund's activities are aggregated into a single activity should not affect a unit holder's ability to offset passive losses from one Fund activity against passive income of another Fund activity. However, any previously suspended passive losses from a particular activity that is part of a single activity will not become deductible against non-passive income upon a disposition of that particular activity alone, but only upon a taxable disposition by the Fund of all of its interest in the single activity, or the unit holder's disposition of his Units. Further, the Fund's debt investments or equity investments in C corporations may produce interest income or dividend income, respectively, that is classified as portfolio income for purposes of Code Section 469, and the Fund's other equity investments may produce losses classified as passive under Code Section 469, and in this situation a unit holder's share of passive losses may not be utilizable to offset his share of portfolio income.

Distributions

Distributions (which include any deemed distribution arising from a reduction, by repayment or otherwise, in Fund liabilities) made to a unit holder generally do not result in any recognition of gain for federal income tax purposes to the extent the amount of cash or debt reduction does not exceed the basis of the unit holder's Units. A unit holder's adjusted tax basis in his Units is reduced by the amount of the distribution. Distributions of cash (including reductions in liabilities) by the Fund in excess of a unit holder's adjusted tax basis in his Units will result in the recognition of gain to the extent of such excess. Such gain is considered gain from the sale or exchange of the Units by the unit holder and in certain cases may be treated in part as ordinary income because of the depreciation recapture provisions. (See "Sale or Disposition of Units").

Sale or Disposition of Units

Upon a sale of a Unit, a unit holder will realize gain or loss in an amount equal to the difference between the amount realized and his adjusted tax basis in the Unit. Under Code Section 751(a), any gain realized by a selling partner is taxed as ordinary income to the extent of the partner's pro rata share of "ordinary income assets" of the partnership. The balance of gain, if any, or the loss is treated as a capital gain or loss. In determining the amount received upon the sale or exchange of a Unit, a unit holder must include, among other things, his allocable share of the outstanding amount of the indebtedness to which the Fund's property is subject. Therefore, it is possible that the gain realized on the sale of a Unit may exceed the cash proceeds of such sale. As a result, in some cases, the income taxes payable with respect to such gain may exceed such cash proceeds.

Certain Deductions to Be Claimed

Organization, Start-Up and Syndication Costs. Under the Code, neither a partnership nor its partners may deduct amounts paid or incurred in the promotion and sale of the interests in the partnership ("syndication" expenses), including those amounts paid as commissions, professional fees, and printing costs. These expenses must be capitalized and may not be amortized. Under the Regulations, the following expenses constitute non-deductible syndication expenses which must be capitalized and not amortized: (i) brokerage fees; (ii) registration fees; (iii) legal fees for securities advice and advice pertaining to the adequacy of tax disclosures in the offering memorandum for securities law purposes; (iv) accounting fees for the preparation of representations to be included in the offering memorandum; and (v) costs of printing the offering memorandum.

However, to the extent a partnership pays or incurs organizational expenses incidental to the creation of the partnership or start-up expenditures with respect to an active trade or business, the partnership generally may elect to capitalize such expenditures and amortize them ratably over a period of not less than 180 months, commencing in the month in which the partnership begins business. Organizational expenses include (i) legal fees for services incidental to the organization of the partnership, such as the negotiation and preparation of a partnership agreement; (ii) accounting fees for services incidental to the organization of the partnership, and (iii) filing fees. On the other hand, organizational expenses do not include (i) expenses incurred in connection with the acquisition of partnership assets or the transfer of assets to the partnership; (ii) syndication expenses; and (iii) certain other expenses. Start-up expenditures include (i) certain expenses related to the investigation of the creation or acquisition of an active trade or business; and (ii) expenses paid or incurred pursuant to the creation of an active trade or business, which expenses would be deductible if they were incurred after the commencement of the particular business operation to which they relate.

The Fund has incurred organizational expenses which it will elect to amortize over 180 months. Additionally, the Fund has incurred or may incur start-up expenditures which the Fund, if it is eligible to do so, intends to amortize over a 180 month period. Any costs incurred by the Fund associated with offering of the Units will be capitalized by the Fund as non-deductible syndication costs.

Other Limitations on Deductions. Other limitations may apply to reduce or eliminate the deductibility by a unit holder of his share of the Fund's expenses, including fees paid to the management company. For example, to the extent deductions of the Fund are deemed not to be incurred in connection with a business, they will be treated as miscellaneous itemized deductions that, in the case of unit holders, are deductible only to the extent that, when taken together with other similar deductions, they exceed 2% of the unit holder's adjusted gross income. Also, miscellaneous itemized deductions are not deductible by a unit holder in computing the unit holder's alternative minimum tax.

Certain Tax Consequences to Non-United States Investors

Foreign Individuals Potentially Subject to U.S. Tax on Their Worldwide Income. Individuals who are not citizens of the United States but who are treated as "residents" of the United States for federal income tax purposes are subject to United States federal income tax on their worldwide income, including but not limited to their income from the Fund. For this purpose, an individual who is a lawful permanent resident of the United States (e.g., a holder of a "green card") generally will be treated as a resident. In addition, an individual who is not a lawful permanent resident under the immigration laws may nevertheless be a "resident" for tax purposes based upon a "substantial presence" in the United States as defined under Code Section 7701(b). For example, under that Code Section, an individual may be a "resident" if the individual is physically present in the United States on all or any part of a certain number of days, determined under a formula, within a three-year testing period. An individual present in the United States under certain types of temporary visas (e.g., teachers or students) may be excepted from the "substantial presence" test, but the determination whether an individual is a resident can be a complex determination. Potential investors who are foreign individuals should consult with their own tax advisors to be certain of their tax status under United States law.

Taxation of Non-U.S. Individuals Not Treated as Tax Residents. Potential investors who are neither citizens nor residents (as determined for tax purposes) of the United States ("Non-U.S. Investors") are subject to additional tax rules. Generally, Non-U.S. Investors are taxable on certain United States source passive investment income ("FDAP"), including dividends, interest and rents, at a flat rate of 30% on the gross amount of such income, without reduction for any expenses or other tax deductions, and that tax is satisfied by withholding of tax on payments of such amounts to the Non-U.S. Investors. In the case of a partnership, the partnership generally will be required to withhold based on the share of its FDAP allocable to its Non-U.S. Investors. The 30% tax on the gross amount of FDAP may be reduced or eliminated if the Non-U.S. Investor is a resident of a country with which the United States has a bilateral income tax treaty, provide that the Non-U.S. Investor submits timely certification of his entitlement to treaty relief. Certain other exceptions apply which may reduce or eliminate the tax on certain types of FDAP, including interest income. Non-U.S. Investors generally are not subject to tax on capital gains unless either (1) the gains are attributable to a United States trade or business or (2) the Non-U.S. Investor is an individual who is present in the United States for more than 183 days during the taxable year in which the gains are realized.

The 30% taxation of FDAP will not apply to any income that is effectively connected with the active conduct of a trade or business within the United States. The net income from such a trade or business within the United States realized by a Non-U.S. Investor will be subject to tax at the regular graduated income tax rates applicable to resident individuals. Such income currently will be subject to income tax withholding, generally at a rate of 35%. A Non-U.S. Investor who realizes any such income will be required to file a United States federal income tax return with respect to the taxable year in which the income is realized.

A Non-U.S. Investor in the Fund who is allocated a share of passive income (including capital gain) or active trade or business income realized by the Fund will be subject to tax under the above rules as if such Non-U.S. Investor had realized such income directly. Any withholding of federal income taxes by the Fund attributable to a Non-U.S. Investor will be treated as a distribution to that particular unit holder.

THE FOREGOING IS NOT A COMPLETE DISCUSSION OF ALL OF THE FEDERAL INCOME TAX CONSEQUENCES TO A NON-U.S. INVESTOR; THERE ARE STATE AND LOCAL TAX AND ESTATE TAX CONSEQUENCES TO BE CONSIDERED. ALSO, FOREIGN TAXES MAY BE IMPOSED ON A NON-U.S. INVESTOR'S INCOME FROM THE FUND. INVESTORS ARE STRONGLY ADVISED TO CONSULT WITH THEIR TAX ADVISORS WITH RESPECT TO THE TAX CONSEQUENCES OF AN INVESTMENT IN THE FUND.

Compliance Matters

Tax Returns/Audits. The Fund will furnish annually (and in certain circumstances, periodically) to each of the unit holders sufficient information from the Fund's tax return for the unit holders to prepare their own federal income tax returns.

The tax treatment of items of partnership income, loss, deduction, and credit will be determined at the partnership level. In addition, all partners are required, on their individual federal income tax returns, to treat partnership items in a manner that is consistent with the treatment of such items on the partnership's return.

The tax matters partner for the Fund will be the management company. The tax matters partner is required to, among other things, keep the other partners informed of all administrative and judicial proceedings and represent the Fund in such proceedings. The tax matters partner is authorized to obtain judicial review of any proposed readjustment of partnership items. Although every partner with an interest in the outcome is allowed to participate in an action filed by the tax matters partner, the outcome of that proceeding will bind all partners. If the tax matters partner fails to seek judicial review of a proposed adjustment of partnership items, other partners may seek such review, provided that there can be only one judicial proceeding with respect to a partnership. The foregoing procedures may adversely affect a unit holder's ability to deal with adjustments to his income tax return resulting from adjustments made with respect to the Fund.

If any of the tax returns of the Fund are audited, it is possible that substantial legal and accounting fees will have to be paid to substantiate the position of the Fund, and such fees would reduce the cash otherwise available to meet Fund obligations or for distribution to the unit holders. Such an audit may result in adjustments to each unit holder's income tax return. An audit of the Fund's tax returns may also result in an audit of non-partnership items on each unit holder's income tax returns, which in turn could result in adjustments to such items. The costs incurred by a unit holder in connection with an IRS audit of his income tax return will be borne solely by that unit holder.

State and Local Taxes

In addition to federal income taxes, the Fund and the unit holders may be subject to other taxes imposed by various jurisdictions, such as state and local income taxes. Although a detailed analysis of these various taxes is not presented here, investors should consider the potential state

and local tax consequences of an investment in the Fund. For example, a unit holder's distributive share of all or a portion of Fund income, gains, losses and deductions, profits and losses, may be required to be included in determining his income subject to tax under the laws of the state or locality in which he is a resident, as well as jurisdictions in which the Fund does business.

For example, with respect to unit holders who are not residents of the State of Louisiana, if the Fund has Louisiana source income allocated to such unit holders, the Fund will be required to file composite returns and make composite payments of tax on behalf of all of its unit holders who are not residents of Louisiana. The current rate of the Louisiana composite tax is 6% and any composite payment on behalf of a non-resident unit holder will be treated by the Fund as a distribution to the non-resident unit holder.

The State of Mississippi also requires a partnership to withhold income tax on a non-resident partner's allocable share of Mississippi source income. The Fund will withhold at the required withholding rate (currently 5%) of Mississippi source income allocable to unit holders who are not residents of Mississippi. Any such withholding will be treated by the Fund as a distribution to the non-resident unit holder. The withholding by a partnership does not relieve the non-resident partner of his obligation to file a Mississippi income tax return. A partnership is allowed to file a composite return on behalf of non-resident partners who have no activity in Mississippi other than that from the partnership. If a composite filing is allowable with respect to a non-resident partner and the composite return is properly filed and all taxes, including applicable interest and penalty is paid, the individual non-resident partner is relieved of his separate individual filing requirement. If the Fund elects to file a composite return on behalf of any non-resident unit holders, the composite tax payment attributable to the non-resident will be treated as a distribution by the Fund to that non-resident unit holder.

The Fund intends to supply the unit holders with information regarding their income, if any, derived from various jurisdictions in which the Fund does business. Unit holders are urged to consult with their own tax advisors regarding state and local tax laws.

U.S. Federal Estate and Gift Taxation

U.S. residents generally are subject to federal estate taxes on their taxable estates at death which includes the value at the time of a decedent's death of all of his property, real or personal, tangible or intangible, wherever situated. Additionally, U.S. residents are subject to gift taxes on the transfer of any property by gift. U.S. estate taxes can also apply to a Non-U.S. Investor to tax that part of his gross estate which at the time of his death is situated in the United States. For example, shares of stock in a domestic U.S. corporation owned by a non-resident alien is treated as property situated in the United States for purposes of this provision. Further, the IRS has ruled that a partner's interest in a partnership is situated where the partnership's business is carried on for purposes of applying the U.S.-United Kingdom Estate Tax Convention. Thus, a Unit in the Fund held by a Non-U.S. Investor could possibly be subject to U.S. estate tax on the death of the Non-U.S. Investor.

Additionally, state and local taxing jurisdictions may also impose state, inheritance

and/or gift taxes on their residents or on property deemed situated within their respective jurisdictions.

Re: Proposal for Designation as an EB-5 Regional Center
Response to Request for Additional Evidence (RFE)
Application: Gulf Coast Funds Management, LLC
Applicants: David Voelker and George E. Brower II

Dear Ms. Velarde:

This letter responds to the August 1, 2008 USCIS letter concerning the application of Gulf Coast Funds Management, LLC (GCFM) for approval of a two-state EB-5 regional center for the states of Mississippi and Louisiana. As background, GCFM plans to use a "fund of funds" approach, meaning EB-5 individuals will invest in a fund, which in turn will invest in a variety of projects in the two-state region. Thus, the funds invested by each participant will be pooled, as opposed to being designated for any one specific project.

Some EB-5 money from a given investor in a given fund will be invested in projects that create a lot of jobs; other EB-5 money from the same investor may be invested in projects that do not create many jobs but which offer a potentially higher rate of return. The period during which each investor is "at risk" would begin at the time the investor invests in the Gulf Coast Fund. At the time of each Gulf Coast Fund investor's I-829 filing, the Fund will allocate its investments in portfolio companies and the jobs created by its portfolio companies to each investor, on a first-come, first-served basis.

The USCIS letter detailed nine areas where further information was sought. This letter and

attachments fulfills all of the requests in the August 1, 2008 letter.

A summary of the August 1 letter and completion status of each response follow:

Request No. 1: A letter from the respective governors of Louisiana and Mississippi on official letterhead identifying the agency of each state that has been named to determine and designate areas of high unemployment as Targeted Employment Areas.

Provided in response:

Mississippi Determination Letter – **completed and transmitted by email on August 6; also attached here as Exhibit 1.**

Louisiana Determination Letter – **completed and transmitted on August 13; also attached here as Exhibit 2.**

Request No. 2: A letter on official letterhead from each state recognizing any areas as high unemployment areas that are located within metropolitan statistical areas or cities with populations of 20,000 or more with unemployment rates of 150% or higher of the national average.

Provided in response:

Mississippi Letter – **completed and transmitted by email on August 6; also attached here as Exhibit 3.**

Louisiana – **completed and transmitted by email on August 13; also attached here as Exhibit 4.**

Request No. 3: The economic analysis used for each of the three examples presented with regard to indirect and induced jobs provided is not sufficiently detailed to apply to the other 10 industry categories cited in the proposal and does not appear to include all the multipliers for each of the 13 categories. Please supplement the economic analysis with this information as well as for all of the proposed industry clusters.

Provided in response:

Revised economic impact analysis – **completed and transmitted by email on August 12; also attached here as Exhibit 5.**

Request No. 4: Please submit a detailed description of the past, current and future promotional activities and/or plan to market and promote the Regional Center and recruit investors along with a budget to accomplish the plan.

Provided in response:

Updated Marketing Plan and Budget – **completed and transmitted on August 6; also attached here as Exhibit 6.**

(b)(4)

Request No. 5: Page 11 in Tab 10, Table 7, 4 shows Jobs Produced on the Gulf Coast by ALL PROJECTS [redacted] jobs in all projects and [redacted] throughout the economy) with no delineation of category or industry/economic clusters. Are th[redacted] jobs projected by "all projects" double counted within "total jobs created in the economy"?

Provided in response:

Clarification on target industry economic clusters to show that the jobs are not double counted - **completed and transmitted as part of the revised economic analysis on August 12; also attached here as Exhibit 5.**

Request No. 6: Tab 10, Appendix A. In mapping by NAICS categories is not clear as to all 13 categories of target industry economic clusters and requires a clearer one-to-one crosswalk for each---categories 4, 8, 9, and 11 are not clearly cross-walked, "Agribusiness" under jobs created code is not within the listing of the 13 target industry economic clusters cited in the proposal. Please submit a revised copy of this table that more clearly delineates a one-to-one correlation for each of the 13 industry categories to the relevant NAICS codes.

Provided in response:

Clarification on target industry economic clusters - **completed and transmitted as part of the revised economic analysis on August 12; also attached here as Exhibit 5.**

Request No. 7: At Tab 10, Appendix B (RIMS-II Multipliers by NAICS categories by Area & Economics Sector. Are the "Final Demand" Multipliers and "Direct Effect" Multipliers cited based per $1 Million dollars of investment? Please verify whether the derived multipliers are per each $1 Million of capital invested.

Provided in response:

Clarification on multipliers including capital invested - **completed and transmitted as part of the revised economic analysis on August 12; also attached here as Exhibit 5.**

Request No. 8: Absent the proposal's level of analysis and even general data necessary to measure or sufficiently validate whether the economic, demographic and employment impact projections for this ambitious geographic area are reasonably accurate and reliable, a more complete data and analysis which definitively addresses the major disparities across urban communities, as well as the agricultural and rural areas, for both states is required.

Provided in response:

Two-state economic report supporting full two-state regional center as discussed on 8/5 conference call – **completed and transmitted as pages 28-41 of the revised economic analysis on August 12; also attached here as Exhibit 5.**

Request No. 9: PLEASE NOTE: The application narrative clearly states that the proposed Regional Center initially will focus principally on the hurricane-impacted areas and communities nearest to the Gulf Coast areas within the two states. As such, to facilitate a more expedited ability to favorably consider the geographic area of a proposed Gulf Coast Funds Management Regional Center,

a. it would be prudent to revise the proposed geographic boundaries for the requested regional center to focus clearly on the gulf coast areas across the southern portion of both states as alluded to in one part of your narrative proposal, or

b. You may choose instead to revise your application to submit two applications for a separate regional center in each state – one focusing on Louisiana and a second focusing on Mississippi.

Provided in response:

Two-state economic report supporting full two-state regional center as discussed on 8/5 conference call – **completed and transmitted as pages 28-41 of the revised economic analysis on August 12; also attached here as Exhibit 5.**

(b)(4)

Proposed Procedure After Approval

(b)(4)

Conclusion

GCFM looks forward to your early approval of its regional center application. Please contact me (b)(6) or) or Taylor Beery or) if you have any questions.

Sincerely

6. Using the IMPLAN Model

The IMPLAN model is a regional input/model developed and maintained by the Minnesota IMPLAN group, headquartered in Minneapolis. The basic model was originally developed by the USDA Forest Service in cooperation with the Federal Emergency Management Agency and the USDI Bureau of Land Management.

The IMPLAN model has certain similarities with the RIMS (Regional Input/Output Modeling system) model developed by the Department of Commerce, but is generally thought to contain several superior features besides its greater ease and flexibility of use. These improvements can be summarized as follows:

1. The Commerce Department is not permitted to publish data in any category where there are less than three organizations in a given economic area. IMPLAN has developed an algorithm to fill in the missing numbers.

2. IMPLAN has introduced improved methods of accounting for flows of goods and services among counties.

3. IMPLAN permits aggregation of any subset of industries for calculation and tabular purposes. This is useful when results are desired for, say, 1-digit industries instead of the 509 industries actually found in the input/output table.

4. As seen in the tables throughout this text, IMPLAN estimates three separate effects, labeled "direct", "indirect" and "induced". The direct effects are those entered by the user. The other two columns represent the multiplier effects, but they are usually combined in other input/output models. Briefly, the indirect effect represents purchases made by businesses when their sales rise. For example, a restaurant might order more food produced or sold in the region, or an automobile plant might order more steel. The induced effect represents the additional household spending because income has risen. For example, casino workers would spend their paychecks on various goods and services, some of which are produced in the region. In general, then, the larger the region under consideration, the larger the multipliers would be.

The following material, taken from the IMPLAN manual, describes the input/output process in more detail.

Input/output analysis is a means of examining relationships within an economy, both between businesses and between businesses and final consumers. It captures all of the monetary market transactions for consumption in a given time period. The resulting mathematical formulae allow examination of the effects of a change in one or several economic activities on an entire economy.

A descriptive model includes information about local economic interactions known as regional economic accounts. These tables describe a local economy in terms of the flow of dollars from purchasers to producers within the region. The initial IMPLAN data details all purchases, including imported goods and services. When regional economic accounts are created, imports to the region are removed from the initial data, allowing examination of local inter-industry transactions and final purchases.

The regional economic accounts are used to construct local level multipliers. Multipliers describe the response of the economy to a stimulus (a change in demand or production). The multipliers represent the Predictive Model.

Purchases for final use (final demand) drive an input/output model. Industries producing goods and services for consumption purchase goods and services from other producers. These other producers, in turn, purchase goods and services. These indirect purchases (or indirect effects) continue until leakages from the region (imports, wages, profits, etc.) stop the cycle.

The indirect effects and the effects of increased household spending (induced effects) can be mathematically derived as sets of multipliers. The derivation is called the Leontief inverse. The resulting sets of multipliers describe the change of output for each industry caused by a one dollar change in final demand for any given industry.

The input/output analysis framework is similar to a financial accounting framework that tracks purchases of and expenditures on goods and services in dollars. Input/output accounting traces the flow of dollars between businesses and between businesses and final consumers. An input/output accounting framework can be illustrated using classic financial accounting T-accounts, which include receipts (income) and expenditures (expenses) on each side of a "T", as shown below.

Final Consumption (or final demand) drives input/output models. Industries respond to meet demand directly or indirectly, by supplying goods and services to industries responding directly. Each industry that produces goods and services generates demands for other goods and services, and so on. Multipliers describe these iterations.

There are three different multipliers developed for predictive modeling: Type I, Type II, and Type SAM. We start with the transactions table and derive a coefficient by dividing each industry column by the column total. This coefficient matrix is also known as the ***A Matrix***.

Appendix A. Resume of Dr. Michael K. Evans

CURRENT AND PREVIOUS POSITIONS

• Chairman, *Evans, Carroll & Associates, Inc.*, 1980-present (previously Evans Economics)

Economic consulting firm specializing in EB-5 immigration analysis, economic impact studies of development projects and new construction, models of state and local tax receipts, impact of current and proposed government legislation, and construction of econometric models for individual industries and companies.

• Chief Economist, *American Economics Group*, 2000-present.

Built a comprehensive state modeling system that provides economic analysis for a variety of consulting projects (see below).

• Clinical Professor of Economics, Department of Managerial Economics and Decision Sciences (MEDS), Kellogg Graduate School of Management, Northwestern University, 1996-99.

Taught courses in macroeconomics and business forecasting. Wrote textbooks for both courses.

• Winner of Blue Chip Economic Indicator Award for most accurate macroeconomic forecasts during the past four years, November 1999

- Founder and President, *Chase Econometric Associates*, 1970-1980

- Assistant and Associate Professor of Economics, Wharton School, University of Pennsylvania, 1964-69. Co-developer of the original Wharton Model.

- Visiting Professor, Radford University, (Radford, VA), 1987

  Chairman of Institute for International Economic Competitiveness

- Visiting Lecturer, Hebrew University (Jerusalem), 1966-67

  Built econometric model of the Israeli economy

Ph. D. in Economics, Brown University. Dissertation, "A Postwar Quarterly Model of the United States Economy, 1948-1962". A. B. in Mathematical Economics, Brown University

PREVIOUS ACTIVITIES AND EDUCATION

- Contributing Editor, *Industry Week*

  Wrote a column in each issue on economic and financial trends as they impact the manufacturing sector.

- Editor, *The Evans Report*

  Weekly newsletter discussing economic trends and financial markets. Pioneered the concept of the Monthly Tracking Model to incorporate recent economic releases into the overall economic forecast, including methods to predict these economic data.

- Consultant, *National Printing Equipment and Supply Association*

  Prepares quarterly forecasts of shipments of printing equipment and graphic arts supplies by product line, based on an econometric model constructed for NPES. Also prepares analysis and forecasts of exports and imports by principal product line.

- Consultant, *APICS -- The Educational Society for Resource Management*,

  In 1993, designed and developed the *APICS Business Outlook Index*, which uses survey data collected by the Evans Group to measure current production, production plans, shipments, employment, new orders, unfilled orders, inventory stocks, and the comparison of the actual to desired

inventory/sales ratio to predict short-term changes in manufacturing sector activity. The results of this survey appeared every month in *APICS: The Performance Advantage*

- Consultant, *American Hardware Manufacturing Association*

Wrote a separate weekly edition of the Evans Report analyzing recent trends in the hardware and housing industries, including forecasts of the hardware industry based on an econometric model developed for AHMA.

- Board of Economists, *Los Angeles Times*

Wrote column every 6 weeks (5 other economists on the Board)

- Columnist, *United Press International*

Wrote twice-weekly column, "Dollars and Trends"

- Consultant, Senate Finance Committee,

Built the first large-scale supply-side model of the U. S. economy

- Consultant, Environmental Protection Agency and Council on Environmental Quality

Estimated inflationary impact of government regulations

- Consultant, National Aeronautics and Space Administration

Estimate impact of R&D spending on productivity growth

- Consultant, U. S. Treasury

Estimated impact of investment tax credit and accelerated depreciation on capital spending by industry

- Consultant, U. S. Department of Agriculture

Built large-scale econometric model of agricultural sector of U. S. economy

- Consultant, Organization of Economic Cooperation and Development

Built econometric model of the French economy

SAMPLE OF RECENT CONSULTING PROJECTS

A. Economic Impact of EB-5 Immigrant Investor Programs and New Markets Tax Credits

- Calculated the number of jobs created for a film production company in New York City.

- Calculated economic impact of small-scale rooftop solar panels in various counties in California.

- Calculated economic impact of 7 different types of proposed businesses for a proposed regional center in the Bay Area of California.

- Determined the economic impact of a new biological research park, office building, and logistics center in Wooster, Ohio.

- Calculated the economic effect of a mixed-use urban renewal project in Cleveland, Ohio.

- Calculated economic impact of 14 different types of proposed businesses for a proposed EB-5 regional center that would include the entire state of Florida.

- Calculated economic impact of dairy farm and cheese processing plant in Northern California.

- Determined economic impact of a shipyard, food processing plant, and semiconductor plant for a proposed regional center in Louisiana and Mississippi.

- Calculated the economic impact of a new gaming casino in Natchez, Mississippi.

- Calculated the economic impact of a retail shopping center in suburban Los Angeles County.

- Prepared an economic impact analysis for the "timber to homes" project for a proposed regional center in Colorado.

- Calculated the economic impact for a proposed regional center in Baltimore, Maryland that would include the rebuilding of depressed areas in East Baltimore and along the riverfront.

- Prepared the economic analysis for a proposed EB-5 regional center for the entire state of Florida that included impact calculations for 14 different types of industries.

After printing this label:
1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com.FedEx will not be responsible for any claim in excess of $100 per package, whether the result of loss, damage, delay, non-delivery,misdelivery,or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim.Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic valueof the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental,consequential, or special is limited to the greater of $100 or the authorized declared value. Recovery cannot exceed actual documented loss.Maximum for items of extraordinary value is $500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our ServiceGuide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Re: Notification Regarding Change in Ownership of Gulf Coast Funds Management Regional Center

Dear Ms. Velarde:

On August 18, 2008 the USCIS issued to Gulf Coast Funds Management, LLC ("GCFM, LLC") a regional center approval and designation (the "Approval") for the Gulf Coast Funds Management Regional Center ("GCFM"). Pursuant to the reporting requirements set forth in the Approval, GCFM, LLC hereby notifies the USCIS of a change of ownership of GCFM, LLC.

GCFM, LLC has issued [redacted] membership interests ("Units"). The current ownership structure of GCFM, LLC is as follows:

(b)(6)

(b)(4)

[redacted]

(b)(6)

(b)(4)

[redacted]

(b)(4) (b)(6)

[redacted]

- Mr. Charles Wang: [redacted]
- Mr. Gary Tang: [redacted]
- Mr. David Lu: [redacted]

[redacted]

(b)(4)

The changes described above are the only changes being made to GCFM. Given significant corporate, financial and immigration experience of the new GCFM owner and management team, coupled with the ongoing consulting services provided by two of GCFM's original founders, GCFM will clearly continue to meet the statutory requirements of the Immigrant Investor Pilot Program by serving the purpose of promoting economic growth, improving regional productivity, creating jobs, and increasing domestic capital investment.

Please contact me if you have any questions. Please also update the EB-5 chart on the USCIS website to reflect this change in ownership.

Sincerely,

(b)(6)

Stephen Yale-Loehr

Application: Request for Designation as EB-5 Regional Center
Applicant: Gulf Coast Funds Management, LLC (GCFM)

Dear Mr. Berez:

This letter and exhibits constitute an application for EB-5 regional center designation by Gulf Coast Funds Management, LLC (GCFM) to stimulate investment in the states of Louisiana and Mississippi. I and my colleague Carolyn Lee represent GCFM for purposes of this application. Signed G-28 forms are attached.

The attached letter and exhibits from GCFM explain how this application meets the requirements for regional center designation set forth at 8 C.F.R. § 204.6(m)(3).

We look forward to your early approval. Please contact Carolyn or me at 607-273-4200 if you have any questions.

Notice of Entry of Appearance as Attorney or Representative

Appearance - An appearance shall be filed on this form by the attorney or representative appearing in each case. Thereafter, substitution may be permitted upon the written withdrawal of the attorney or representative of record or upon notification of the new attorney or representative. When an appearance is made by a person acting in a representative capacity, his personal appearance or signature shall constitute a representation that under the provisions of this chapter he is authorized and qualified to represent. Further proof of authority to act in a representative capacity may be required. **Availability of Records** - During the time a case is pending, and except as otherwise provided in 8CFR 103.2(b), a party to a proceeding or his attorney or representative shall be permitted to examine the record of proceeding in a Service office. He may, in conformity with 8 CFR 103.10, obtain copies of Service records or information therefrom and copies of documents or transcripts of evidence furnished by him. Upon request, he/she may, in addition, be loaned a copy of the testimony and exhibits contained in the record of proceeding upon giving his/her receipt for such copies and pledging that it will be surrendered upon final disposition of the case or upon demand. If extra copies of exhibits do not exist, they shall not be furnished free on loan; however, they shall be made available for copying or purchase of copies as provided in 8 CFR 103.10.

RE: Gulf Coast Funds Management (GCFM)
202 East State Street, Suite 700
Ithaca, NY 14850

Application: Gulf Coast Funds Management's Request for Designation as a Regional Center
Applicants: David Voelker and George E. Brower II
Proposed Industry Focus:

1. Organic Chemical manufacturing (principally ethanol manufacturing)
2. Inorganic Chemical manufacturing
3. Petrochemical and other manufacturing
4. Petroleum refining
5. Shipbuilding
6. Medical research and development
7. Commercial real estate development
8. Commercial and industrial construction[1]
9. Hospital, hospice and other medical services
10. Oil and Gas services and manufacturing
11. Water transportation (ports and rivers)
12. Tourism and Hospitality
13. Agribusiness

RE: Proposal for Designation as a Regional Center under the Immigrant Investor Pilot Program.

REQUEST FOR ADDITIONAL EVIDENCE

This office is unable to complete processing of your request without further information. **Please read and comply with those items requested below, then resubmit the evidence requested to the address listed below, including this letter, within 87 days.**

If your submission is more than several pages, please use acco-fasteners to attach the documents at the top of each page.

[1] Direct construction jobs may not be credited as job creation because they are considered to be temporary and seasonal in nature. However, construction capital induced "indirect" jobs based on a USCIS-approved economic analysis and job creation econometric model may be credited.

USCIS Foreign Trader, Investor & Regional Center Program

What is the Immigrant Investor Pilot Program?

The Immigrant Investor Pilot Program ("Pilot Program") was created by Section 610 of Public Law 102-395 (October 6, 1992). This is different in certain ways from the basic EB-5 investor program.

The Pilot Program began in accordance with a Congressional mandate aimed at stimulating economic activity and creating jobs for U.S. workers, while simultaneously affording eligible aliens the opportunity to become lawful permanent residents. Through this innovative program, foreign investors are encouraged to invest funds in an economic unit known as a "Regional Center."

A Regional Center is defined as any economic unit, public or private, engaged in the promotion of economic growth, improved regional productivity, job creation and increased domestic capital investment.

PLEASE NOTE: for your proposal submission and supporting evidence for the items listed above, please use acco-fasteners to attach the documents at the top of each page, and individually tab the written materials/responses which you submit for each of the applicable items listed above. Also, please submit your response in duplicate.

Translations

Any document containing a foreign language submitted to USCIS shall be accompanied by a full English translation that the translator has certified as complete and accurate, and by the translator's certification that he or she is competent to translate from the foreign language into English.

Copies

Unless specifically required that an original document be filed with an application or petition, an ordinary legible photocopy may be submitted. Original documents submitted when not required will remain part of the record, even if the submission was not required.

Address Changes

If you change your address, you may change your address by sending an email notification to: USCIS.ImmigrantInvestorProgram@dhs.gov

The USCIS appreciates and fully understands the vital importance and need for sources of Immigrant Investor capital to assist in both the recovery and the economic development within both Louisiana and Mississippi. Please do not hesitate to contact Mr. Maurice (Morrie) Berez, Program Manager for the USCIS Foreign Trader and Regional Center should you have any questions or have a need for guidance to quickly resolve any of the nine (9) items cited in this RFE.

Sincerely,

Barbara Q. Velarde

Re: Proposal for Designation of Gulf Coast Funds Management (GCFM) as a USCIS recognized Regional Center under the Immigrant Investor Pilot Program

BACKGROUND:

Pursuant to Section 610 of the Appropriations Act of 1993, on January 17, 2008, Gulf Coast Funds Management (GCFM) submitted a proposal seeking approval and designation by U.S. Citizenship and Immigration Services (USCIS) of the GCFM Regional Center (GCFM-RC), with a geographic area focusing on the entirety of the states of Mississippi and Louisiana. The GCFM-RC for EB-5 Immigrant Investor purposes shall focus investment in the following three target industry economic clusters:

1. Shipbuilding;
2. Food Processing; and
3. Manufacturing.

The initial proposal contained the following evidence in support of its requested designation:

- A Job Creation Analysis and Econometric Model prepared by a professional economic analysis firm which specifically calculates but excludes construction jobs from the detailed prediction;
- A business plan reflecting the timing, scale and planned use of the alien investor capital;
- A sample Private Placement Memorandum;
- A sample Operating Agreement;
- A sample Subscription Agreement; and
- A sample Management Agreement.

EXHIBIT 53

DECISION:

Based on its review and analysis of your January 17, 2008 proposal, and of your response to the USCIS Request For Evidence of August 1, 2008, to which you provided a supplemental business plan, and a more in-depth and comprehensive economic and job creation analysis relating to the two-state scope and economic impacts, USCIS hereby approves and designates GCFM as a Regional Center within the Immigrant Investor Pilot Program with a geographic scope which includes the entire states of Mississippi and Louisiana.

FOCUS OF INVESTMENT ACTIVITY AND CAPITAL INVESTMENT THRESHOLD:

The USCIS-approved focus of the GCFM-RC business plan and job creation analysis and multipliers is to generate immigrant investor capital into the following target industry commercial enterprise activities within Mississippi and Louisiana:

1. Shipbuilding;
2. Food Processing; and
3. Manufacturing.

As such, aliens seeking immigrant visas through the Immigrant Investor Pilot Program may file individual petitions with USCIS for these commercial enterprises located within the GCFM-RC area comprised of the states of Mississippi and Louisiana. The geographic focus of this area contains numerous High Unemployment Targeted Employment Areas (TEA) as designated by the States of Mississippi and Louisiana, and rural TEA's as defined in 8 CFR 204.6(e). Therefore, the minimum capital investment threshold for any individual immigrant investment into an approved commercial enterprise throughout the Regional Center shall be not less than $500,000, if the investment target is located within a TEA or $1,000,000 if located outside of a TEA.

EMPLOYMENT CREATION:

Immigrant investors who file petitions for commercial enterprises located in the GCFM-RC area must fulfill all of the requirements set forth in 8 CFR 204.6, except that the petition need not show that the new commercial enterprises created ten new jobs indirectly as a result of the immigrant investor's investment. This determination has been established by way of USCIS' acceptance of the final economic analysis that is contained as part of the approved GCFM-RC proposal and its indirect job creation model and multipliers contained within the final approved GCFM-RC application package.

In addition, where job creation or preservation of existing jobs is claimed based on a multiplier rooted in underlying new "direct jobs" in support of an immigrant investor's individual I-526 petition affiliated with the GCFM-RC, then:

- To be credited with projected creation of new "direct" jobs for "qualifying employees" upon filing the I-526 petition, then the petition must be supported by a comprehensive detailed business plan and supporting financial, marketing and related data and analysis providing a reasonable basis for projecting creation of any new direct jobs for "qualifying employees" to be achieved/realized within two years pursuant to 8 CFR 204.6(j)(4)(B).

For purposes of an alien investor's filing of a subsequent I-829 petition to remove the conditions wherein the investment through the GCFM-RC in an enterprise for which the initial I-526 petition approval involved the creation of new direct jobs or the creation of new indirect jobs based on a multiplier tied to underlying new direct jobs, then to support the full number of direct and indirect new jobs being claimed at that point, an alien's subsequent I-829 petition will need to be supported by probative evidence of the number of new direct full time (35 hours per week) for qualified employees whose positions have been created as a result of the alien's investment. Such evidence may include copies of quarterly state employment tax reports, Forms W-2, Forms I-9, and any other pertinent employment records sufficient to demonstrate the number of qualified employees whose jobs were created directly.

Each individual petition, in order to demonstrate that it is associated with the GCFM-RC , in conjunction with addressing all the requirements for an individual immigrant investor petition, shall also contain as supporting evidence relating to this amended regional center designation, the following:

1. A copy of this letter for the GCFM-RC approval and designation.

2. A copy of the USCIS approved regional center narrative proposal and business plan.[1]

3. A copy of the job creation methodology required in 8 CFR 204.6(j)(4)(iii), as contained in the final regional center economic analysis which has been approved by USCIS, which reflects that investment by an individual immigrant investor will create not fewer than ten (10) full-time employment positions, either directly or indirectly, per each immigrant investor.

4. A legally executed copy of the USCIS approved:

    a. Private Placement Memorandum;
    b. Subscription Agreement;

[1]With respect to an individual I-526 individual investor petition, for any large scale high impact investor manufacturing or processing projects such as a shipyard, other large-scale manufacturing or processing plants, the detailed business plan should also address or reflect those project critical factors associated with infrastructure required to support operations on the scale proposed, in terms of roads, rail tracks and facilities, port capacity, water, sewage, electrical power capacity to meet the projected demand imposed by the envisioned facility, fire fighting services and capabilities, and environmental impact issues.

c. Operating Agreement; and
d. Management Agreement.

DESIGNEE'S RESPONSIBILITIES INHERENT IN CONDUCT OF THE GCFM-RC REGIONAL CENTER:

The law, as reflected in the regulations at 8 CFR 204.6(m)(6), requires that an approved regional center in order to maintain the validity of its approval and designation must continue to meet the statutory requirements of the Immigrant Investor Pilot Program by serving the purpose of promoting economic growth, including increased export sales (where applicable), improved regional productivity, job creation, and increased domestic capital investment. Therefore, in order for USCIS to determine whether your regional center is in compliance with the above cited regulation, and in order to continue to operate as a USCIS approved and designated regional center, your administration, oversight, and management of your regional center shall be such as to monitor all investment activities under the sponsorship of your regional center and to maintain records, data and information on a quarterly basis in order to report to USCIS upon request the following year to date information for each Federal Fiscal Year[2], commencing with the initial year as follows:

1. Provide the principal authorized official and point of contact of the regional center responsible for the normal operation, management and administration of the regional center.

2. Be prepared to explain how you are administering the regional center and how you will be actively engaged in supporting a due diligence screening of its alien investors' lawful source of capital and the alien investor's ability to fully invest the requisite amount of capital.

3. Be prepared to explain the following:

   a. How the regional center is actively engaged in the evaluation, oversight and follows up on any proposed commercial activities that will be utilized by alien investors.

   b. How the regional center is actively engaged in the ongoing monitoring, evaluation, oversight and follows up on any investor commercial activity affiliated through the regional center that will be utilized by alien investors in order to create direct and/or indirect jobs through qualifying EB-5 capital investments into commercial enterprises within the regional center.

4. Be prepared to provide:

   a. the name, date of birth, petition receipt number, and alien registration number (if one

[2] A Federal Fiscal Year runs for twelve consecutive months from October 1st to September 30th.

has been assigned by USCIS) of each principal alien investor who has made an investment and has filed an EB-5/I-526 Petition with USCIS, specifying whether:

i. the petition was filed,
ii. is pending,
iii. was approved,
iv. denied, or
v. withdrawn by the petitioner, together with the date(s) of such event.

b. The total number of visas represented in each case for the principal alien investor identified in 4.a. above, plus his/her dependents (spouse and children) for whom immigrant status is sought or has been granted.

c. The country of nationality of each alien investor who has made an investment and filed an EB-5/I-526 petition with USCIS.

d. The U.S. city and state of residence (or intended residence) of each alien investor who has made an investment and filed an EB-5/I-526 petition with USCIS.

e. For each alien investor listed in item 4.a., above, identify the following:

i. the date(s) of investment in the commercial enterprise;

ii. the amount(s) of investment in the commercial enterprise; and

iii. the date(s), nature, and amount(s) of any payment/remuneration/profit/return on investment made to the alien investor by the commercial enterprise and/or regional center from when the investment was initiated to the present.

5. Be prepared to identify/list each of the target industry categories of business activity within the geographic boundaries of your regional center that have:

a. received alien investors' capital, and in what aggregate amounts;

b. received non-EB-5 domestic capital that has been combined and invested together, specifying the separate aggregate amounts of the domestic investment capital;

c. of the total investor capital (alien and domestic) identified above in 5.a and 5.b, identify and list the following:
i. The name and address of each "direct" job creating commercial enterprise.
ii. The industry category for each indirect job creating investment activity.

6. Be prepared to provide:

a. The total aggregate number of approved EB-5 alien investor I-526 petitions per each

Federal Fiscal Year to date made through your regional center.

b. The total aggregate number of approved EB-5 alien investor I-829 petitions per each Federal Fiscal Year to date through your regional center.

7. The total aggregate sum of EB-5 alien capital invested through your regional center for each Federal Fiscal Year to date since your approval and designation.

8. The combined total aggregate of "new" direct and/or indirect jobs created by EB-5 investors through your regional center for each Federal Fiscal Year to date since your approval and designation.

9. If applicable, the total aggregate of "preserved" or saved jobs by EB-5 alien investors into troubled businesses through your regional center for each Federal Fiscal Year to date since your approval and designation.

10. If for any given Federal Fiscal Year your regional center did or does not have investors to report, then provide:

    a. a detailed written explanation for the inactivity,

    b. a specific plan which specifies the budget, timelines, milestones and critical steps to:

        i. actively promote your regional center program,

        ii. identify and recruit legitimate and viable alien investors, and

        iii. a strategy to invest into job creating enterprises and/or investment activities within the regional center.

11. Regarding your website, if any, please be prepared to provide a hard copy which represents fully what your regional center has posted on its website, as well as providing your web address. Additionally, please provide a packet containing all of your regional center's hard copy promotional materials such as brochures, flyers, press articles, advertisements, etc.

12. Finally, please be aware that it is incumbent on each USCIS approved and designated regional center, in order to remain in good standing, to notify the USCIS Foreign Trader, Investor & Regional Center Program within 15 business days at USCIS.ImmigrantInvestorProgram@dhs.gov of any change of address or occurrence of any material change in:

    - the name and contact information of the responsible official and/or Point of Contact (POC) for the RC

- the management and administration of the RC,
- the RC structure,
- the RC mailing address, web site address, email address, phone and fax number,
- the scope of the RC operations and focus,
- the RC business plan,
- any new, reduced or expanded delegation of authority, MOU, agreement, contract, etc. with another party to represent or act on behalf of the RC,
- the economic focus of the RC, or
- any material change relating to your regional center's basis for its most recent designation and/or reaffirmation by USCIS.

If you have any questions concerning the GCFM-RC approval and designation under the Immigrant Investor Pilot Program, please contact the USCIS Foreign Trader, Investor and Regional Center Program by Email at USCIS.ImmigrantInvestorProgram@dhs.gov.

Sincerely,

/s/ Barbara Q. Velarde

Re: Proposal for Designation of Gulf Coast Funds Management (GCFM) as a USCIS recognized Regional Center under the Immigrant Investor Pilot Program

BACKGROUND:

Pursuant to Section 610 of the Appropriations Act of 1993, on January 17, 2008, Gulf Coast Funds Management (GCFM) submitted a proposal seeking approval and designation by U.S. Citizenship and Immigration Services (USCIS) of the GCFM Regional Center (GCFM-RC), with a geographic area focusing on the entirety of the states of Mississippi and Louisiana. The GCFM-RC for EB-5 Immigrant Investor purposes shall focus investment in the following three target industry economic clusters:

1. Shipbuilding;
2. Food Processing; and
3. Manufacturing.

The initial proposal contained the following evidence in support of its requested designation:

- A Job Creation Analysis and Econometric Model prepared by a professional economic analysis firm which specifically calculates but excludes construction jobs from the detailed prediction;
- A business plan reflecting the timing, scale and planned use of the alien investor capital;
- A sample Private Placement Memorandum;
- A sample Operating Agreement;
- A sample Subscription Agreement; and
- A sample Management Agreement.

EXHIBIT
5.J.

DECISION:

Based on its review and analysis of your January 17, 2008 proposal, and of your response to the USCIS Request For Evidence of August 1, 2008, to which you provided a supplemental business plan, and a more in-depth and comprehensive economic and job creation analysis relating to the two-state scope and economic impacts, USCIS hereby approves and designates GCFM as a Regional Center within the Immigrant Investor Pilot Program with a geographic scope which includes the entire states of Mississippi and Louisiana.

FOCUS OF INVESTMENT ACTIVITY AND CAPITAL INVESTMENT THRESHOLD:

The USCIS-approved focus of the GCFM-RC business plan and job creation analysis and multipliers is to generate immigrant investor capital into the following target industry commercial enterprise activities within Mississippi and Louisiana:

1. Shipbuilding;
2. Food Processing; and
3. Manufacturing.

As such, aliens seeking immigrant visas through the Immigrant Investor Pilot Program may file individual petitions with USCIS for these commercial enterprises located within the GCFM-RC area comprised of the states of Mississippi and Louisiana. The geographic focus of this area contains numerous High Unemployment Targeted Employment Areas (TEA) as designated by the States of Mississippi and Louisiana, and rural TEA's as defined in 8 CFR 204.6(e). Therefore, the minimum capital investment threshold for any individual immigrant investment into an approved commercial enterprise throughout the Regional Center shall be not less than $500,000, if the investment target is located within a TEA or $1,000,000 if located outside of a TEA.

EMPLOYMENT CREATION:

Immigrant investors who file petitions for commercial enterprises located in the GCFM-RC area must fulfill all of the requirements set forth in 8 CFR 204.6, except that the petition need not show that the new commercial enterprises created ten new jobs indirectly as a result of the immigrant investor's investment. This determination has been established by way of USCIS' acceptance of the final economic analysis that is contained as part of the approved GCFM-RC proposal and its indirect job creation model and multipliers contained within the final approved GCFM-RC application package.

In addition, where job creation or preservation of existing jobs is claimed based on a multiplier rooted in underlying new "direct jobs" in support of an immigrant investor's individual I-526 petition affiliated with the GCFM-RC, then:

- To be credited with projected creation of new "direct" jobs for "qualifying employees" upon filing the I-526 petition, then the petition must be supported by a comprehensive detailed business plan and supporting financial, marketing and related data and analysis providing a reasonable basis for projecting creation of any new direct jobs for "qualifying employees" to be achieved/realized within two years pursuant to 8 CFR 204.6(j)(4)(B).

For purposes of an alien investor's filing of a subsequent I-829 petition to remove the conditions wherein the investment through the GCFM-RC in an enterprise for which the initial I-526 petition approval involved the creation of new direct jobs or the creation of new indirect jobs based on a multiplier tied to underlying new direct jobs, then to support the full number of direct and indirect new jobs being claimed at that point, an alien's subsequent I-829 petition will need to be supported by probative evidence of the number of new direct full time (35 hours per week) for qualified employees whose positions have been created as a result of the alien's investment. Such evidence may include copies of quarterly state employment tax reports, Forms W-2, Forms I-9, and any other pertinent employment records sufficient to demonstrate the number of qualified employees whose jobs were created directly.

Each individual petition, in order to demonstrate that it is associated with the GCFM-RC , in conjunction with addressing all the requirements for an individual immigrant investor petition, shall also contain as supporting evidence relating to this amended regional center designation, the following:

1. A copy of this letter for the GCFM-RC approval and designation.

2. A copy of the USCIS approved regional center narrative proposal and business plan.[1]

3. A copy of the job creation methodology required in 8 CFR 204.6(j)(4)(iii), as contained in the final regional center economic analysis which has been approved by USCIS, which reflects that investment by an individual immigrant investor will create not fewer than ten (10) full-time employment positions, either directly or indirectly, per each immigrant investor.

4. A legally executed copy of the USCIS approved:

    a. Private Placement Memorandum;
    b. Subscription Agreement;

[1]With respect to an individual I-526 individual investor petition, for any large scale high impact investor manufacturing or processing projects such as a shipyard, other large-scale manufacturing or processing plants, the detailed business plan should also address or reflect those project critical factors associated with infrastructure required to support operations on the scale proposed, in terms of roads, rail tracks and facilities, port capacity, water, sewage, electrical power capacity to meet the projected demand imposed by the envisioned facility, fire fighting services and capabilities, and environmental impact issues.

c. Operating Agreement; and
d. Management Agreement.

DESIGNEE'S RESPONSIBILITIES INHERENT IN CONDUCT OF THE GCFM-RC REGIONAL CENTER:

The law, as reflected in the regulations at 8 CFR 204.6(m)(6), requires that an approved regional center in order to maintain the validity of its approval and designation must continue to meet the statutory requirements of the Immigrant Investor Pilot Program by serving the purpose of promoting economic growth, including increased export sales (where applicable), improved regional productivity, job creation, and increased domestic capital investment. Therefore, in order for USCIS to determine whether your regional center is in compliance with the above cited regulation, and in order to continue to operate as a USCIS approved and designated regional center, your administration, oversight, and management of your regional center shall be such as to monitor all investment activities under the sponsorship of your regional center and to maintain records, data and information on a quarterly basis in order to report to USCIS upon request the following year to date information for each Federal Fiscal Year[2], commencing with the initial year as follows:

1. Provide the principal authorized official and point of contact of the regional center responsible for the normal operation, management and administration of the regional center.

2. Be prepared to explain how you are administering the regional center and how you will be actively engaged in supporting a due diligence screening of its alien investors' lawful source of capital and the alien investor's ability to fully invest the requisite amount of capital.

3. Be prepared to explain the following:

   a. How the regional center is actively engaged in the evaluation, oversight and follows up on any proposed commercial activities that will be utilized by alien investors.

   b. How the regional center is actively engaged in the ongoing monitoring, evaluation, oversight and follows up on any investor commercial activity affiliated through the regional center that will be utilized by alien investors in order to create direct and/or indirect jobs through qualifying EB-5 capital investments into commercial enterprises within the regional center.

4. Be prepared to provide:

   a. the name, date of birth, petition receipt number, and alien registration number (if one

[2] A Federal Fiscal Year runs for twelve consecutive months from October 1st to September 30th.

has been assigned by USCIS) of each principal alien investor who has made an investment and has filed an EB-5/I-526 Petition with USCIS, specifying whether:

i. the petition was filed,
ii. is pending,
iii. was approved,
iv. denied, or
v. withdrawn by the petitioner, together with the date(s) of such event.

b. The total number of visas represented in each case for the principal alien investor identified in 4.a. above, plus his/her dependents (spouse and children) for whom immigrant status is sought or has been granted.

c. The country of nationality of each alien investor who has made an investment and filed an EB-5/I-526 petition with USCIS.

d. The U.S. city and state of residence (or intended residence) of each alien investor who has made an investment and filed an EB-5/I-526 petition with USCIS.

e. For each alien investor listed in item 4.a., above, identify the following:

i. the date(s) of investment in the commercial enterprise;

ii. the amount(s) of investment in the commercial enterprise; and

iii. the date(s), nature, and amount(s) of any payment/remuneration/profit/return on investment made to the alien investor by the commercial enterprise and/or regional center from when the investment was initiated to the present.

5. Be prepared to identify/list each of the target industry categories of business activity within the geographic boundaries of your regional center that have:

a. received alien investors' capital, and in what aggregate amounts;

b. received non-EB-5 domestic capital that has been combined and invested together, specifying the separate aggregate amounts of the domestic investment capital;

c. of the total investor capital (alien and domestic) identified above in 5.a and 5.b, identify and list the following:
i. The name and address of each "direct" job creating commercial enterprise.
ii. The industry category for each indirect job creating investment activity.

6. Be prepared to provide:

a. The total aggregate number of approved EB-5 alien investor I-526 petitions per each

Federal Fiscal Year to date made through your regional center.

b. The total aggregate number of approved EB-5 alien investor I-829 petitions per each Federal Fiscal Year to date through your regional center.

7. The total aggregate sum of EB-5 alien capital invested through your regional center for each Federal Fiscal Year to date since your approval and designation.

8. The combined total aggregate of "new" direct and/or indirect jobs created by EB-5 investors through your regional center for each Federal Fiscal Year to date since your approval and designation.

9. If applicable, the total aggregate of "preserved" or saved jobs by EB-5 alien investors into troubled businesses through your regional center for each Federal Fiscal Year to date since your approval and designation.

10. If for any given Federal Fiscal Year your regional center did or does not have investors to report, then provide:

    a. a detailed written explanation for the inactivity,

    b. a specific plan which specifies the budget, timelines, milestones and critical steps to:

        i. actively promote your regional center program,

        ii. identify and recruit legitimate and viable alien investors, and

        iii. a strategy to invest into job creating enterprises and/or investment activities within the regional center.

11. Regarding your website, if any, please be prepared to provide a hard copy which represents fully what your regional center has posted on its website, as well as providing your web address. Additionally, please provide a packet containing all of your regional center's hard copy promotional materials such as brochures, flyers, press articles, advertisements, etc.

12. Finally, please be aware that it is incumbent on each USCIS approved and designated regional center, in order to remain in good standing, to notify the USCIS Foreign Trader, Investor & Regional Center Program within 15 business days at USCIS.ImmigrantInvestorProgram@dhs.gov of any change of address or occurrence of any material change in:

- the name and contact information of the responsible official and/or Point of Contact (POC) for the RC

- the management and administration of the RC,
- the RC structure,
- the RC mailing address, web site address, email address, phone and fax number,
- the scope of the RC operations and focus,
- the RC business plan,
- any new, reduced or expanded delegation of authority, MOU, agreement, contract, etc. with another party to represent or act on behalf of the RC,
- the economic focus of the RC, or
- any material change relating to your regional center's basis for its most recent designation and/or reaffirmation by USCIS.

If you have any questions concerning the GCFM-RC approval and designation under the Immigrant Investor Pilot Program, please contact the USCIS Foreign Trader, Investor and Regional Center Program by Email at USCIS.ImmigrantInvestorProgram@dhs.gov.

HALEY BARBOUR
GOVERNOR

STATE OF MISSISSIPPI
OFFICE OF THE GOVERNOR

February 27, 2008

The Honorable Michael Chertoff
Secretary
U.S. Department of Homeland Security
Washington DC 20536

Dear Secretary Chertoff:

As we assess the economy of Mississippi two years post-Katrina, we see a continuing need to increase the number of quality jobs state-wide, so that displaced Mississippi citizens can return to their home state. I understand that one of the most effective ways for government to assist private industry in this endeavor is through the federal EB-5 immigrant investor program.

I encourage the Department of Homeland Security and United States Citizenship and Immigration Services (USCIS) to allow for a regional center that serves all of the state of Mississippi. The EB-5 program is an efficient way to get private equity into all of the areas in Mississippi that need it, whether the need has been created by Hurricane Katrina or the loss of jobs.

The tragedy of Hurricane Katrina has caused our state to approach economic development with a regional focus. I support a regional center that includes both the State of Mississippi and the State of Louisiana and I encourage the Department of Homeland Security and USCIS to allow this. I further understand that Gulf Coast Funds Regional Center has an application pending at this time for a regional center that serves both states. Please approve that application as quickly as possible so the areas in need of supplementary funds receive them promptly.

Thank you for your coordination of this matter. Should you have any questions, please contact Marie Thomas of my staff at (601) 576 2014.

Sincerely,

Haley Barbour

Re: EB-5 Program Regional Center Application for Louisiana

Dear Secretary Chertoff:

The EB-5 immigrant investor program has historically proven to attract foreign capital to the United States while creating quality jobs for American citizens. I encourage the U.S. Department of Homeland Security and the U.S. Citizenship and Immigration Services (USCIS) to allow for a regional center that serves all of the State of Louisiana. In Louisiana, when one combines the areas of high poverty, the areas devastated by Hurricanes Katrina and Rita, and regions of the state designated as rural areas, essentially all of the state qualifies for this program.

The EB-5 program is an efficient way to direct private equity into all of the regions in Louisiana that need investment capital. I encourage the Department of Homeland Security and USCIS to make this designation. I further understand that Gulf Coast Funds Regional Center has an application pending at this time for a regional center that serves both Louisiana and Mississippi. I ask you to evaluate this application, and all regional center applications from this area as quickly as possible so that investor dollars can be put to use immediately.

Very Truly Yours,

Bobby Jindal
Governor

The Honorable Bobby Jindal
Governor of Louisiana
P.O. Box 94004
Baton Rouge, Louisiana 70804-9004

Dear Governor Jindal:

Thank you for your February 27, 2008, letter in which you requested that U.S. Citizenship and Immigration Services (USCIS) complete final action on the State of Louisiana's application to designate the entire State of Louisiana as a "regional center" for purposes of the Immigrant Investor Pilot Program.

The Immigrant Investor Pilot Program is part of the larger Employment Creation regime, commonly referred to as the "EB-5" program. The Department of Homeland Security (DHS) is supportive of the Pilot Program and viable regional centers. Recent experience demonstrates that regional centers similar to the one proposed by your state enable foreign investors to pool their capital, thus leveraging their individual capital investment into larger scale capital investments. Experience with the Pilot Program in recent years has shown that a well-planned and operating regional center offers an effective vehicle for immigrant investors and has substantially increased interest and participation in the investor program.

Over 80 percent of all EB-5 immigrant investors route their investment capital directly through an approved regional center, resulting in investments in projects ranging from $5 million to $120 million in aggregate capital (as opposed to where an individual investor might otherwise only be able to invest $500,000). DHS is fully appreciative of how a regional center enables immigrant investments to have a direct positive economic impact on a full range of economic, employment and infrastructure activities both within the geographic area of a regional center as well as indirectly on areas beyond the boundaries of a regional center.

Both USCIS Director Emilio Gonzalez and I appreciate your desire for final action on the application concerning the statewide regional center. Director Gonzalez has advised me
that the USCIS Foreign Trader, Investor and Regional Center Program, which has the authority to adjudicate and decide such cases, reviews and adjudicates Regional Center proposals on the basis of date received on a "first in first out" basis, and indicates that the Louisiana Regional Center proposal was received on January 17, 2008. I am further advised that the Louisiana proposal at present is in line to be reviewed within the next 90 days. It is important to bear in mind that there are at present several proposals ahead of Gulf Coast Funds Management, LLC (GCFM).

Should your staff and other officials in the State have any further questions, I would encourage them to contact the USCIS Foreign Trader, Investor and Regional Center Program directly wither by mail or email at:

U.S. Citizenship and Immigration Services
Foreign Trader, Investor and Regional Center Program
Office of Service Center Operations Business and Trade Services
20 Massachusetts Avenue, NW
Washington, D.C. 20529
Email Address: **USCIS.ImmigrantInvestorProgram@dhs.gov**

Again, thank you for your letter and for your interest in the Immigrant Investor Pilot Program. Both Director Gonzalez and I offer you our best wishes for a positive outcome to the adjudication of the Louisiana regional center proposal..

Sincerely,

Michael Chertoff

Enclosure

The Honorable Bobby Jindal
Governor of Louisiana
P.O. Box 94004
Baton Rouge, Louisiana 70804-9004

Dear Governor Jindal:

Thank you for your February 27, 2008, letter requesting that U.S. Citizenship and Immigration Services (USCIS) expeditiously consider applications that serve all of the State of Louisiana for "regional center" designation under the Immigrant Investor Pilot Program. There are two regional center proposals (one from Gulf Coast Funds Management, LLC (GCFM) and one from Louisiana Assets Partners (LAP) that are area-specific within the State of Louisiana pending at the present time, as well as one previously approved.

The Immigrant Investor Pilot Program is part of the larger Employment Creation regime, commonly referred to as the "EB-5" program. The Department of Homeland Security (DHS) is supportive of the Pilot Program and viable regional centers. Recent experience demonstrates that regional centers similar to the one proposed by GCFM enable foreign investors to pool their capital, thus leveraging their individual capital investment into larger scale capital investments. Experience with the Pilot Program in recent years has shown that a well-planned and operating regional center offers an effective vehicle for immigrant investors and has substantially increased interest and participation in the investor program.

Over 80 percent of EB-5 immigrant investors route their investment capital directly through an approved regional center, resulting in investments in projects ranging from $5 million to $120 million in aggregate capital (compared to the $500,000 that a typical individual investor might otherwise be able to invest). DHS fully appreciates how a regional center enables immigrant investments to have a direct positive economic impact on a full range of economic, employment and infrastructure activities within the center's geographic area, as well as indirectly on areas beyond its boundaries. GCFM seeks to cover areas within both Louisiana and Mississippi along the gulf coast, while LAP centers on a nine-parish area encompassing Baton Rouge. The one already approved encompasses the City of New Orleans and the Orleans parish.

Both USCIS Director Emilio González and I appreciate your desire for expeditious action on the applications concerning these regional centers. Director González has advised me that the USCIS Foreign Trader, Investor and Regional Center Program, which has the authority to adjudicate and decide such cases, reviews and adjudicates regional center proposals on a "first in, first out" basis according to the receipt date. He further advised me that there are presently several proposals ahead

of the GCFM proposal, which was received on January 17, 2008, but that it should be reviewed within the next 90 days. USCIS is actively reviewing the LAP proposal, and has already approved the New Orleans Regional Center.

If your staff or other officials in the State of Louisiana have any further questions, I encourage them to contact the USCIS Foreign Trader, Investor and Regional Center Program directly either by mail or email at:

U.S. Citizenship and Immigration Services
Foreign Trader, Investor and Regional Center Program
Office of Service Center Operations, Business and Trade Services
20 Massachusetts Avenue, NW
Washington, D.C. 20529
Email Address: **USCIS.ImmigrantInvestorProgram@dhs.gov**

Again, thank you for your letter expressing interest in the Immigrant Investor Pilot Program. Both Director González and I offer you our best wishes for a positive outcome on the adjudication of the Louisiana regional center proposals.

Sincerely,

Michael Chertoff

Labor Market Statistics for Areas Affected by Hurricanes Katrina and Rita: September and October 2005

- Labor force and unemployment, September 2005
- Labor force and unemployment, October 2005
- Affected area definitions

The data for September 2005 were the first from the Local Area Unemployment Statistics (LAUS) program to reflect the impact of Hurricane Katrina, which struck the Gulf Coast on August 29 with catastrophic effects in parts of Alabama, Louisiana, and Mississippi. This page presents a summary of those September data along with October data, and links to detailed county data.

Hurricane Rita made landfall after the September reference periods for the Current Population Survey and the Current Employment Statistics program, which provide inputs for LAUS estimation.

Revised data for August 2005 for areas affected by Katrina and Rita can be found at **http://www.bls.gov/katrina/data.htm#2**. Those data and the data below are not seasonally adjusted; therefore, over-the-month comparisons are discouraged.

Labor force and unemployment, September 2005 (revised, not seasonally adjusted)

In September 2005, the areas most affected by Hurricanes Katrina and Rita had a labor force of about 3.1 million workers, of whom 324,000 were unemployed. The unemployment rate for these most affected areas was 10.5 percent, 5.7 percentage points higher than the 4.8-percent rate for the U.S. as a whole.

Table 1. September 2005 labor force, employment, and unemployment, revised, not seasonally adjusted, in Alabama, Florida, Louisiana, Mississippi, and Texas (rates in percent), entire State and most affected areas in State

State or area	Labor force	Employment	Unemployment level	Unemployment rate
Entire State				
Alabama	2,169,355	2,081,973	87,382	4.0
Florida	8,757,070	8,427,298	329,772	3.8
Louisiana	2,004,625	1,777,069	227,556	11.4
Mississippi	1,299,299	1,171,811	127,488	9.8
Texas	11,276,764	10,684,597	592,167	5.3

TOTAL	25,507,113	24,142,748	1,364,365	5.3
Most affected areas* in State				
Alabama	394,752	376,666	18,086	4.6
Louisiana	1,433,054	1,252,679	180,375	12.6
Mississippi	869,475	769,590	99,885	11.5
Texas	396,485	370,425	26,060	6.6
TOTAL	3,093,766	2,769,360	324,406	10.5

* Note: These data represent the 10 counties in Alabama, 34 parishes in Louisiana, 47 counties in Mississippi, and 9 counties in Texas that were designated by the Federal Emergency Management Agency (FEMA) for both individual *and* public disaster assistance as of September 30, 2005.

Source: **Local Area Unemployment Statistics**

The overall unemployment rate in Louisiana was 11.4 percent in September. The most-affected areas in the state had an average unemployment rate of 12.6 percent. For 7 of the hardest-hit parishes in the state, individual unemployment rates are not available for September, because of the impact of Katrina on data collection.

Mississippi's overall September unemployment rate was 9.8 percent. In Mississippi, the most affected counties had an aggregate jobless rate of 11.5 percent.

In contrast, the unemployment rate was below the national average in Alabama in September 2005, and the most heavily affected counties in Alabama had an average unemployment rate of 4.6 percent. The unemployment rate in Florida was 3.8 percent in September 2005.

In Texas, the unemployment rate, at 5.3 percent, was one-half of a percentage point above the national average in September. (As mentioned above, the reference period for the September data was before Hurricane Rita struck eastern Texas and western Louisiana.)

State and individual county labor force and unemployment data tables from the **Local Area Unemployment Statistics** program -- September 2005:
Alabama, **Florida**, **Louisiana**, **Mississippi**, **Texas** (PDF files).

County unemployment rate maps for September 2005 from the **Local Area Unemployment Statistics** program:
Alabama, **Florida**, **Louisiana**, **Mississippi**, **Texas** (PDF files).

Labor force and unemployment, October 2005 (revised, not seasonally adjusted)

In October 2005, the unemployment rate for the areas most affected by Hurricanes Katrina and Rita was 10.5 percent, 5.9 percentage points higher than the 4.6-percent rate for the U.S. as a whole.

Table 2. October 2005 labor force, employment, and unemployment, revised, not seasonally adjusted, in Alabama, Florida, Louisiana, Mississippi, and Texas (rates in

percent), entire State and most affected areas in State

State or area	Labor force	Employment	Unemployment level	Unemployment rate
Entire State				
Alabama	2,191,653	2,092,427	99,226	4.5
Florida	8,781,944	8,474,953	306,991	3.5
Louisiana	1,974,707	1,744,408	230,299	11.7
Mississippi	1,299,629	1,186,785	112,844	8.7
Texas	11,320,982	10,745,171	575,811	5.1
TOTAL	25,568,915	24,243,744	1,325,171	5.2
Most affected areas* in State				
Alabama	397,697	379,060	18,637	4.7
Louisiana	1,413,980	1,227,936	186,044	13.2
Mississippi	866,780	782,126	84,654	9.8
Texas	400,258	365,129	35,129	8.8
TOTAL	3,078,715	2,754,251	324,464	10.5

* Note: These data represent the 10 counties in Alabama, 34 parishes in Louisiana, 47 counties in Mississippi, and 9 counties in Texas that were designated by the Federal Emergency Management Agency (FEMA) for both individual *and* public disaster assistance as of September 30, 2005.

Source: **Local Area Unemployment Statistics**

The overall unemployment rate in Louisiana was 11.7 percent in October. The most-affected areas in the state had an average unemployment rate of 13.2 percent. As was the case for September, individual unemployment rates are not available for October for 7 of the hardest-hit parishes in the state, because of the impact of Katrina on data collection.

Mississippi's overall October unemployment rate was 8.7 percent and the most affected counties had an aggregate jobless rate of 9.8 percent.

The unemployment rate in Alabama in October 2005 (4.5 percent) was about the same as the national average; the most heavily affected counties in Alabama had an average unemployment rate of 4.7 percent.

In Texas, the overall unemployment rate for October was 5.1 percent. The most-affected areas in Texas had an average unemployment rate of 8.8 percent.

In Florida, the unemployment rate was 3.5 percent in October.

State and individual county labor force and unemployment data tables from the **Local Area Unemployment Statistics** program -- October 2005:
Alabama, **Florida**, **Louisiana**, **Mississippi**, **Texas** (PDF files).

County unemployment rate maps for October 2005 from the **Local Area Unemployment Statistics** program:
Alabama, **Florida**, **Louisiana**, **Mississippi**, **Texas** (PDF files).

Hurricane Katrina Evacuees, October 2006

In October 2006, evacuees identified in CPS-sampled households represented about 1.1 million persons age 16 and over who had evacuated from where they were living in August 2005 due to Hurricane Katrina. About 6 in 10 of these persons were again living in the home from which they had evacuated. Of the 1.1 million evacuees, 62.8 percent were in the labor force in October 2006, and their unemployment rate was 11.0 percent. See table below.

Employment status in October 2006 of persons 16 years and over who evacuated from their August 2005 residence, even temporarily, due to Hurricane Katrina 1/

[Numbers in thousands, not seasonally adjusted]

Employment status in October 2006	Total	Residence in October 2006	
		Same as in August 2005	Different than in August 2005
Civilian noninstitutional population	1,065	659	407
Civilian labor force	669	421	247
Participation rate	62.8	64.0	60.8
Employed	595	392	203
Employment-population ratio	55.8	59.5	50.0
Unemployed	74	30	44
Unemployment rate	11.0	7.0	17.9
Not in labor force	397	237	159

1/ Represents persons in the civilian noninstitutional population age 16 and over who resided in households that were eligible to be selected for CPS. These data are not representative of the total evacuee population because they do not include children or people residing in shelters, hotels, places of worship, or other units out of scope for CPS. The total number of evacuees estimated from the CPS may change from month to month as people move in and out of the scope of the survey and because of sampling variability.

Note: These data use population controls that have been adjusted to account for interstate moves by evacuees.

NAFTA and the changing pattern of state exports*

Cletus C. Coughlin, Howard J. Wall

Research Division, Federal Reserve Bank of St. Louis, 411 Locust Street, St. Louis, MO 63102, USA (e-mail: coughlin@stls.frb.org; wall@stls.frb.org)

Received: 24 July 2001 / Accepted 11 February 2002

Abstract. The trade liberalization associated with NAFTA has affected the pattern of state exports by altering the origin as well as the destination of merchandise exports. We find that NAFTA has increased US merchandise exports to Mexico and Canada by just over 15 percent, and has increased total US merchandise exports by nearly 8 percent. We also find that although many states have seen large increases in exports to both Mexico and Canada, others have seen large decreases. NAFTA has also affected states' exports to non-NAFTA regions of the world, tending to decrease exports to Europe and Latin America and increase exports to Asia. States in the northeast regions of the United States have seen the smallest increases in exports in the wake of NAFTA.

JEL classification: F15, R12

Key words: NAFTA, state exports, regional integration

1 Introduction

Changes in trade policy have the potential to affect economic activity in regions of a country to varying degrees. The heated discussions preceding the passage of the North American Free Trade Agreement (NAFTA) in late 1993 demonstrated vividly that potential regional changes were a major concern of legislators. According to Baldwin and Magee (2000), the primary reason that some members in the US House of Representatives voted in favor of NAFTA was their expectation that the legislation's effects on trade and investment flows would increase jobs and wages in their districts. On the other hand, they also found that the primary reason that

* We would like to acknowledge the helpful suggestions of three anonymous referees and the participants at the October 2000 meeting of the Federal Reserve System Committee on Regional Analysis, especially Myriam Quispe-Agnoli. We would also like to thank Ling Wang for research assistance. The views expressed are those of the authors and do not necessarily represent official positions of the Federal Reserve Bank of St. Louis or of the Federal Reserve System.

many other House members voted against NAFTA was their expectation that passage would result in fewer jobs and lower wages.[1]

Regardless of whether one's primary interest is in NAFTA's effects on local jobs, as a politician might be, or in its effects on welfare, as an economist would likely be, any analysis of state or regional effects of NAFTA must begin with its effects on trade volumes. To this end, our analysis makes an initial assessment of the differential effects of NAFTA on merchandise exports across US states.[2] We find, not surprisingly, that the relative price and other changes set in motion by NAFTA had different effects across states.[3] These different effects likely reflect the varying distributions of productive resources across regions and the substantial regional differences in what is produced and exported.[4]

We estimate a gravity model that allows assessments of not only the effects of NAFTA on each state's exports to Mexico and to Canada, but also on exports to Asia, Europe, and Latin America and the Caribbean. Few estimates of the state-level effects of NAFTA have appeared to date. To our knowledge, this is the first study that estimates state-level export performance with a gravity model, a model that has become the workhorse of the international trade literature. Ideally, we would have included state imports in our analysis, but the United States does not

[1] The employment consequences of NAFTA, even at the national level, were at the center of the controversy. Despite strong economic arguments that the employment effects for the US economy as a whole would be minimal, these arguments were rejected by many. In fact, as discussed by Kahane (1996), estimated employment effects ranged from large (i.e., hundreds of thousands) job losses to large job gains.

[2] To simplify our discussion, we refer to the District of Columbia as a state.

[3] NAFTA, which entered into force on January 1, 1994, will lead to a phasing out of Canadian, Mexican, and US tariffs on goods produced in North America. Tariffs on US-Canada trade were eliminated by 1998 as part of the 1988 US-Canada Free Trade Agreement. Tariffs on trade involving either the United States or Canada with Mexico are to be eliminated by 2008. Some of these tariffs were eliminated immediately, while others are being phased out over time. For details on these tariff changes as well as other aspects of NAFTA, see United States Trade Representative (1997).

[4] See Coughlin and Fabel (1988), Coughlin and Mandelbaum (1990), Kim (1995), and Gazel and Schwer (1998).

collect state-level import data.[5] Nevertheless, the partial picture provided by export data provides substantial evidence of the importance of geography on the effects of NAFTA.

Standard customs union theory predicts that integration regimes such as NAFTA lead to increases in trade between member countries (trade creation) and decreases in trade between members and non-members (trade diversion). Because the distinction between countries and regions within countries is artificial, these same predictions apply to the effects of integration on regional trade volume — NAFTA should lead a region in the United States to trade more with Canada and Mexico and less with the rest of the world. However, recent theoretical advances under the label "new economic geography" suggest that the neat trade-creation/trade-diversion dichotomy is insufficient when factor mobility is taken into account.[6] This mobility might be between regions within a member country, or across member-country borders — Ross Perot's "giant sucking sound."

One of the ways by which factor mobility makes NAFTA affect geographic trade patterns is by expanding the spatial distributions of firms' customers and suppliers. For example, consider a firm initially located in New Jersey. The addition of Mexico to the free trade area expands the spatial distributions of the firm's customers and suppliers southward, increasing the profitability of being closer to Mexico. If the firm relocates, goods that had been exported to NAFTA members from New Jersey would instead be exported from, perhaps, Arizona. The firm's relocation would also change the firm's position relative to non-NAFTA markets, making it cheaper to export to Asia and more expensive to export to Europe. State export patterns would adjust accordingly.

---

[5] Using Canadian provincial data, which covers imports and exports, Wall (2000) provides a partial view of the effects of NAFTA on state imports.

[6] See Gunderson (1998), Krugman (1998), and Fujita et al. (1999).

NAFTA might also affect geographic trade patterns by expanding the set of possible places for firms to locate. Under NAFTA, if that firm from New Jersey moves into Mexico, it can do so without losing tariff-free access to its domestic markets. Thus, instead of the firm exporting to Mexico, it exports from Mexico to New Jersey and other states. Extra-NAFTA trade would also be affected because the firm's exports would be from Mexico to the rest of the world, rather than from New Jersey.

When these geographic effects are taken into account, the standard, unambiguous expectations of trade creation and trade diversion no longer hold at the national or state levels. Instead, they create the possibility that NAFTA has led to decreases in state exports to Mexico and Canada, or to increases in state exports to non-NAFTA countries. Indeed, we find that, while the standard results predominated, there were sufficiently many counter-results to indicate that geographic effects have been important in determining the effects of NAFTA on state export patterns.

2 An overview of empirical research

Prior to discussing our analysis in detail, we briefly examine some background material to provide some context for understanding our contribution. We highlight, first, the different approaches used in previous subnational export studies and, second, the emerging literature that has attempted to estimate the effects of NAFTA.

2.1 Subnational export studies

Research on exports from US states has tended to rely on either regression or shift-share models.[7] One group of studies, exemplified by Coughlin and Fabel (1988) and Erickson and

[7] See Cronovich and Gazel (1998) and Gazel and Schwer (1998) for a discussion of subnational export research.

Hayward (1992), is based on Heckscher-Ohlin trade models. These supply-oriented studies, focused on the sources of US comparative advantage, indicate that differences in state endowments of human and physical capital contribute to differences in state export performance. A second group of regression studies, exemplified by Erickson and Hayward (1991) and Cronovich and Gazel (1998), focuses on the role of foreign demand in explaining subnational export behavior. These studies are somewhat similar to our study because they examine some of the same determinants of export performance that appear in gravity models. Erickson and Hayward (1991) found that the exports of a US region are related positively to the destination country's gross domestic product and negatively to the distance to the destination. Recently, Cronovich and Gazel (1998) found that trade-weighted exchange rates and foreign incomes were statistically significant determinants of state exports.[8]

The other common method of analyzing subnational exports, shift-share analysis, is primarily an accounting method. Research using this method includes Coughlin and Mandelbaum (1990), Hayward (1995), Gazel and Schwer (1998), and Coughlin and Pollard (2001). Coughlin and Mandelbaum (1990) found that the industrial composition of a state's exports was not a major influence on its export growth between 1976 and 1986. Meanwhile, the competitive effect, which the authors link to human capital, is the primary factor accounting for state export growth. Hayward (1995) examines the importance to US states of European trade and discusses the possible state-level effects of European integration. Gazel and Schwer (1998) extended the classic shift-share model to incorporate what they classify as a demand factor, the

[8] Another focus of subnational studies is the relationship between states' foreign involvement and growth. Representative studies include Coughlin and Cartwright (1987), Manrique (1987), Erickson (1989), and Carlino et al. (1994). Coughlin and Cartwright (1987) estimate short- and long-run export elasticities of employment and find much diversity across states. Manrique (1987) estimates growth models and finds that those states increasing their export orientation tended to grow faster during the 1970s than those states that did not. Erickson (1989) also finds that state export growth contributes to employment and value-added growth. Finally, Carlino et al. (1994) find that real exchange rate movements have only small effects on most states' growth.

destination of a state's exports. Their results suggest that this demand factor is as important as supply conditions in explaining state export performance between 1989 and 1992. Using Gazel and Schwer's model, however, Coughlin and Pollard (2001) do not find a similar result for state export growth between 1988 and 1998. They find that the competitive effect dominates both the industry mix and destination effects in accounting for a state's relative export performance.[9]

2.2 The effects of NAFTA

Research attempting to make some preliminary assessments of the effects of NAFTA has begun. Krueger (1999, 2000) focuses on whether this preferential trading arrangement has reduced welfare via trade diversion rather than enhancing it via trade creation. Using a number of approaches, one of which is a gravity model of aggregate trade flows, she finds that the evidence for trade creation appears to be stronger than that for trade diversion.

She stresses, however, that her conclusion is tentative. For various reasons, it is difficult to separate economic behavior into pre-NAFTA (i.e., prior to January 1, 1994) and post-NAFTA periods. First, firms and other important decisionmakers had formed expectations of NAFTA prior to its official passage. Presidents Bush and Salinas signed an agreement in June 1990 to negotiate such an agreement, so it is reasonable to think that some economic actions were taken in anticipation of passage. Second, the agreement called for a 10-to15-year phase-in of the tariff cuts for many commodities. Third, NAFTA can be viewed as another step in the process of Mexican trade liberalization. For example, Hinojosa-Ojeda et al. (2000) found that Mexico's unilateral trade liberalization, begun in the mid-1980s, stimulated a substantial increase in the

[9] Gazel and Schwer (1998) discuss two other shift-share studies — Markusen et al. (1991) and Hayward and Erickson (1995) — that are relevant to understanding the determinants and effects of subnational trade flows.

two-way trade of manufactured intermediate goods that has continued and matured during NAFTA's existence.

More recently, Romalis (2001) concludes that NAFTA has had a substantial positive effect on Canadian and Mexican shares of US imports, particularly in the industries with the largest relative tariff reductions. Romalis concludes, though, that because NAFTA led to no increase in overall imports, the increase in imports from Canada and Mexico were at the expense of imports from the rest of the world.

Several studies using various methodologies have estimated the effect of NAFTA on trade and investment flows and, in turn, how these flows have affected employment and earnings.[10] In addition, some work has been done to estimate the partial equilibrium effects of NAFTA at the industry level.[11] Generally speaking, these studies have paid scant attention to the differing regional effects of NAFTA.[12] Nevertheless, given the disparity in states' comparative advantages and proximity to trading partners, there is every reason to believe that the state-level effects of NAFTA would be far from uniform. Also, because NAFTA set in motion changes in the United States' trading relationship with not only Mexico and Canada, but also with the rest of the world, it is likely that the existing estimates capture only some of NAFTA's effects. Thus, a more general approach to capture a broader geographic range of effects might generate results that are more meaningful. Research by Wall (2000) exemplifies one such approach.

---

[10] See Hinojosa-Ojeda et al. (2000) for a review of many of these studies.

[11] See Karemera and Ojah (1998), US International Trade Commission (1997a), and Wylie (1995).

[12] Exceptions include Scott (1999) and Rothstein and Scott (1997), who try to discern state employment effects from changes in aggregate bilateral trade deficits — a dubious yet common approach (Hinojosa-Ojeda et al., 2000, p. 6). State employment effects were also estimated by Bolle (2000), whose estimates of job losses depend on certifications under the Department of Labor's NAFTA-Transitional Adjustment Assistance program. Hinojosa-Ojeda et al. (2000, p. 62) cite several ways in which the numbers from this program mis-state the number of actual jobs lost due to NAFTA.

Using data on Canadian provincial trade, Wall uses a gravity model to estimate the effects of NAFTA on the geographic pattern of North American trade. Specifically, he looks at the effects of NAFTA on trade flows between subnational regions within North America and between North American regions and the non-NAFTA world. Although most of the estimated effects are consistent with standard customs union theory — increased trade between members of NAFTA and decreased trade between members of NAFTA and non-members — many are not. For example, Wall found that NAFTA led to decreased trade between Eastern Canada and much of North America and to increased trade between Mexico and Asia.

Similar to Wall (2000), our analysis is of the effect of NAFTA on the geographic pattern of trade. However, our analysis is from the perspective of US states and estimates the effects of NAFTA on their exports to Mexico, Canada, and major regions of the world.

3 The empirical model

As with the majority of recent work on the effects of international integration on aggregate trade volumes, we use a gravity model to estimate the effects of NAFTA. Gravity models of international trade were pioneered by Tinbergen (1962), Pöyhönen (1963), and Linnemann (1966). In gravity models, the volume of trade is estimated as an increasing function of the national incomes of the trading partners and a decreasing function of the distance between them. In these simple models, the effects of integration are estimated by including dummy variables to indicate shifts in the gravity equation following integration. Because of its simplicity and empirical success, the model has subsequently become a workhorse of the empirical trade literature. Further, because it is a general equilibrium model, it does not suffer from the well-known defects of partial equilibrium studies.

The major practical advantage of the gravity model is that it does not require one to specify the complicated processes underlying trade flows. On the other hand, despite its empirical usefulness, the fact that it is largely *ad hoc* means that it has been treated with some suspicion by international trade theorists. Nonetheless, Deardorff (1984, p. 504) concluded that gravity models "tell us something very important about what happens in international trade, even if they do not tell us why." More recently, papers by Bergstrand (1985, 1989) and Deardorff (1998), among others, demonstrate that the gravity model can be derived within a variety of standard theoretical frameworks. In fact, according to Frankel (1998, p. 2), the gravity model has "gone from an embarrassing poverty of theoretical foundations to an embarrassment of riches."

Our study relies on state-level merchandise export data for all 50 states and the District of Columbia to most countries in the world. The data are prepared by the Massachusetts Institute for Social and Economic Research (MISER) at the University of Massachusetts-Amherst. The MISER data are export shipments by state of origin of movement to various destinations throughout the world. Although this data set is regarded as the best available source for state export data, it has well-known weaknesses — the most important of which arise from the differences between the origin of movement and the origin of production — which have been discussed in Cronovich and Gazel (1999), Hayward and Erickson (1995), and Coughlin and Mandelbaum (1991).

While the potential problems with the MISER data are well documented, it is very difficult to measure the extent to which they matter. In examining the MISER series, Cronovich and Gazel (1999) compare with to the Census Bureau's AR series (Exports from Manufacturing Establishments) — which they regard as the series that best indicates the origin of production — that was published only for the period 1987 to 1992. They conclude that for most states, the

MISER series is "an acceptably close substitute for the AR series" for the period. The eight (mostly small) states that do not satisfy their criteria are the District of Columbia, Montana, Nevada, New Hampshire, New Mexico, Tennessee, and Vermont.

We include 32 destination countries in our data set: Canada, Mexico, and the top ten US export destinations in each of Europe, Asia, and Latin America and the Caribbean (excluding Mexico).[13] We complete our data set with gross domestic product (GDP) data from the World Bank, gross state product (GSP) data from the Bureau of Economic Analysis, and the consumer price index from the Bureau of Labor Statistics. We have complete data for the years 1988 to 1997, providing us with 16,320 observations.

Such a large data set provides substantial freedom to disaggregate the effects of NAFTA. To exploit this opportunity, we created 255 separate dummy variables to capture NAFTA's effects on every state's exports to each of Canada, Mexico, and three non-North American continents.[14] Our gravity model is standard, except that, following Mátyás (1997), Bayoumi and Eichengreen (1997), Baier and Bergstrand (2001), and Cheng and Wall (2001), we allow the intercept to differ across trading partners. The following heterogeneous gravity equation, modified as noted below, is estimated by least squares:

$$\begin{aligned}\ln(1+x_{ijt}) = {} & \alpha_0 + \alpha_{ij} + \beta \ln Y_{it} + \gamma \ln Y_{jt} + \delta \ln D_{ij} \\ & + \sum_{s=1}^{51}\left(\sum_{c=1}^{5} \theta^{sc} NAFTA_{ijt}^{sc} + \eta^{s} EU_{ijt}^{s} + \mu^{s} MERC_{ijt}^{s}\right) + \lambda t + \varepsilon_{ijt};\end{aligned} \tag{1}$$

where x_{ijt} is real exports from state i to country j in year t, α_0 is the portion of the intercept common to all state-country pairs, α_{ij} is the pair-specific portion of the intercept, Y_{it} is the real

[13] These countries are: *Europe:* the United Kingdom, Germany, the Netherlands, France, Belgium, Italy, Switzerland, Spain, Ireland, and Sweden; *Asia:* Japan, South Korea, Singapore, Hong Kong, China, Malaysia, Thailand, Philippines, Indonesia, and Vietnam; *Latin America and the Caribbean:* Brazil, Venezuela, Colombia, Argentina, Chile, Dominican Republic, Costa Rica, Peru, Guatemala, and Jamaica. Taiwan is not included because the World Bank does not provide GDP data for it.

[14] For simplicity, we refer to Latin America and the Caribbean as a continent.

GSP of state i in year t, Y_{jt} is the real GDP of country j in year t, and D_{ij} is the distance between state i and country j. Note that because some observations of state exports are zero, our dependent variable is the log of 1 plus exports. Censoring of this sort normally requires Tobit estimation, but doing so would mean losing the double-log relationship inherent to the gravity model. Our approach preserves the double-log form while approximating Tobit results (Eichengreen and Irwin, 1998).

Exports from state i to country j also depend on other factors — contiguity, common language, and historical or cultural links — that are usually included in gravity models. In (1), their effect on trade volume is $\alpha_{ij} = \omega \mathbf{Z}'_{\mathbf{ij}}$, where $\mathbf{Z_{ij}}$ is a vector of fixed factors that make the volume of exports from i to j differ from the average. This is the only difference between our heterogeneous gravity model and the traditional homogeneous one, which imposes the restriction that $\alpha_{ij} = 0$ for all pairs of i and j. Notice that α_{ij} and $\delta \ln D_{ij}$ cannot be separated in the estimation because they are perfectly collinear. Thus, we estimate their sum as a fixed effect, $\pi_{ij} = \alpha_{ij} + \delta \ln D_{ij}$. The fixed effects are estimated using a dummy variable for each of our 1,683 state-country pairs.[15] A state-country dummy takes the value of 1 whenever the observation is of exports from the state to the country, and is 0 otherwise.

Using fixed effects estimation allows us to capture the influence of not only distance and other fixed variables normally specified in gravity models, but also of any number of important factors that may be difficult or impossible to quantify and which are, therefore, normally excluded. As shown by Mátyás (1997), Bayoumi and Eichengreen (1997), and Cheng and Wall (2001), excluding these variables, which is the same as restricting their effects to be the same

[15] Note that we count pre- and post-unification Germany as two different countries, making our panel data set unbalanced, without 1988-90 observations for unified Germany or 1991-97 observations for West Germany.

across states and countries, results in serious estimation bias.[16] Also, because we do not have to measure distance — it is subsumed into the fixed effect — we avoid having to choose one of the *ad hoc* measures of distance normally used, while still controlling for the effects of distance on trade volume.

Another potential benefit of fixed effects estimation is that it may allow us to control for estimation bias resulting from the potentially large divergence between the MISER data and exports based on the origin of movement. This is because the fixed effect term would pick up any proportional divergence between the two series that is consistent over the sample. In this case, the divergence would be just like any other unobserved pair-specific heterogeneity, as it would be controlled for with the pair-specific fixed effects.

We estimate the effects of NAFTA and overseas integration on the exports of the 51 states. The percentage effects of NAFTA are approximated by the coefficients on a state's five state-to-continent dummy variables: $NAFTA_{ijt}^{sc}$ is equal to 1 when the observation is of exports from state s to a country in continent c in a year after and including 1994, and is 0 otherwise.

NAFTA was not the only regional integration agreement that happened during our sample period that could have affected North American trading patterns. The European Community (EC) reduced most internal barriers in 1993 when it became the European Union (EU); and Argentina, Brazil, Uruguay, and Paraguay formed the Southern Cone Common Market (Mercosur) in 1995. To control for the effects of these overseas regime changes on US state exports to EU and Mercosur members, we include state-specific dummy variables for both. The dummy EU_{ijt}^{s} takes the value of 1 when the observation is of state s exporting to an EU

[16] Rather than using dummy variables, we could control for fixed effects by using the first differences of the variables. However, this approach is not appropriate in the present case because it would place arbitrary restrictions on our estimates of the trend effect (Cheng and Wall 2001).

member and the year is 1993 or later, when the EU's single market program was put into place.[17] The dummy $MERC_{ijt}^{s}$ is equal to 1 beginning in 1995 when the observation is of state s exporting to Argentina or Brazil, the two Mercosur countries in our sample. The parameters associated with the EU and Mercosur dummies approximate the estimated percentage effects of the regimes on a state's exports.

Although not controlled for with a separate variable, our estimation also accounts for the effects of exchange rate changes, such as those following the Mexican peso crisis of 1995, by using market exchange rates to convert variables into dollars. In the spirit of gravity models, this means that the economic size of a country, as measured by GDP, changes along with the value of its currency.[18,19]

We also include a trend variable, t, that is common to all trading pairs and captures the changes in trade volume that would have occurred even if there were no new regional trading regimes and no changes in income levels. In this sense, the coefficient on the time trend indicates the percentage change in trade due to "globalization," here defined as an inherent common trend toward increased international trade. Finally, ε_{ijt} is the random error term.

4 Empirical results

Tables 1a-c contain the results of our least squares estimation. As expected in gravity models, the coefficients on the incomes of states and countries are positive and statistically significant. The coefficient on the trend variable is positive and statistically significant and indicates that

[17] Note also that EU_{ijt} is equals to 1 for Sweden beginning in 1994, when, as a member of the European Free Trade Area, it began enjoying equal access to EU markets.

[18] Note that it has become common in recent versions of the gravity model to use exchange rates measured according to purchasing power parity rather than market value. However, for trading purposes, the relevant measure of a country's economy is not its worth for domestic purchases, but its worth for international purchases.

[19] See Cronovich and Gazel (1998) for an alternative treatment of exchange rates in a model of state exports.

globalization was responsible for an increase in state exports of 3.2 percent per year. Also, as Figure 1 illustrates, the residuals are reasonably well behaved, especially when compared with those generated by homogeneous gravity models. As demonstrated by Cheng and Wall (2001), plots of residuals generated by homogeneous gravity models indicate a strong tendency to underestimate high levels of trade and to overestimate low levels of trade.

Other than the effects of NAFTA, our most interesting results are our estimates of the effects of the EU and Mercosur on state exports. These are provided by Table 1b and are illustrated by Figures 2 and 3. Standard theory suggests that these customs unions would lead their members to divert their imports from non-member producers, such as the United States, toward other member countries. Thus, one would expect negative signs for our EU and Mercosur coefficients. However, we find that, while the change from the EC to the EU reduced total US exports to EU members by just over 24 percent, the formation of Mercosur *increased* total US exports to Mercosur members by nearly 29 percent.[20] The most likely explanation for this rather anomalous result is that the formation of Mercosur coincided with fairly dramatic liberalization of the economies of the member countries, including the relaxation of trade restrictions.

The effects of the EU and Mercosur were not uniform across states. There were three states — Idaho, Maryland, and Wyoming — for which the EU led to large increases (10% or greater) in exports to EU members; there were 14 other states for which the effect of the EU was small (less than 10% in either direction). Thus, for 34 states, the effect of the EU was a large decline in exports to EU members. All but one of the 27 statistically significant EU effects were negative.

[20] Throughout, the aggregate effects are calculated using 1997 exports to weight the state-level effects.

As for the effects of Mercosur, there were 13 states (concentrated in the Northeast and Northwest) that saw large decreases in exports to Mercosur members in the wake of that agreement. The effect of Mercosur was small for only six states and was large and positive for 32 states. Moreover, of the 31 statistically significant Mercosur effects, 29 were positive.

Our estimates of the 255 state-level NAFTA dummies, which approximate the percentage change in exports, are presented in Table 1c — 153 (102) possess positive (negative) signs, with 48 percent being statistically significant. These estimates are illustrated by maps in Figures 4 through 9. Table 1c also provides the estimated effects of NAFTA aggregated for each state across continents and for each continent across states. Table 2 presents the results aggregated to the regional level. Our results indicate that the effects of NAFTA were often contrary to the neat predictions of standard customs union theory. For example, while we find that at the aggregate level NAFTA led to increases of over 15 percent in US exports to Mexico and Canada, its effects on exports to non-NAFTA regions of the world were more complex.[21] Exports to Europe fell by almost 6 percent, exports to Asia rose by 15 percent, and there was a small negative effect of roughly 3 percent on exports to Latin America and the Caribbean.

As discussed in more detail below, the effects of NAFTA differed a great deal at the state and regional levels. For most states, the effects of NAFTA mirrored the increase in total US exports to Mexico and Canada, although to widely varying degrees. Perhaps more interesting, though, is our finding that many states have seen NAFTA lead to decreased exports to Mexico and Canada. Similarly, for extra-NAFTA exports the aggregate effects of NAFTA mask a rich variety of state and regional effects that were often counter to standard theoretical predictions.

[21] Despite the difficulty of making a straightforward comparison, our estimate of the overall effect of NAFTA on exports to Mexico is similar to one generated by Gould (1998). Our point estimate of NAFTA's effect on US exports to Canada exceeds Gould's; however, Gould characterizes his estimate as very imprecise.

NAFTA's effects on state exports to Mexico were not highly correlated with its effects on state exports to Canada. The simple correlation of 0.04 suggests that state exports to the two countries did not tend to be affected similarly by NAFTA. For extra-NAFTA exports, the various effects were similarly unrelated. Simple correlations between NAFTA's effects on state exports to Latin America and the Caribbean and on state exports to Europe as well as Asia are only 0.16 and 0.05, respectively. Also, the simple correlation of -0.04 between the effects of NAFTA on Asia and Europe suggests that these effects were also unrelated.

The only relationships between different NAFTA effects that we detect are for the effects on exports to both Canada and Mexico with the effect on exports to Latin America. The correlation coefficient between the effects for Mexico and Latin America is 0.34, which is statistically significant at the 1 percent level. Similarly, the correlation coefficient between the effects for Canada and Latin America is 0.22, which is significant at the 12 percent level. Thus, if NAFTA had a positive effect on a state's exports to Canada or Mexico, it also tended to have a positive effect on the state's exports to Latin America and the Caribbean.

4.1 Intra-NAFTA state and regional exports

Our estimates of the state-level effects of NAFTA on US exports to Mexico and Canada are listed in Table 1c and are illustrated by Figures 4 and 5. While we find that 28 states had their exports to Mexico increase by more than 10 percent because of NAFTA, we also find that eight states had decreases of greater than 10 percent. About two-thirds of these estimated changes, both positive and negative, were statistically significant. At the regional level (see Table 2), six of the nine regions of the United States experienced positive NAFTA effects of between 11 and 22 percent on exports to Mexico. The Southeast stood out, though, with a NAFTA effect of 32 percent driven by large effects for Virginia and the Carolinas. For the Plains the effect of

NAFTA on exports to Mexico was a rather modest 6.5 percent, while the Mideast, primarily reflecting a large negative effect on exports from New York, was the only region for which NAFTA led to a decrease in exports to Mexico.

Positive state-level effects of NAFTA on exports to Canada were widespread: 36 states had positive NAFTA effects of 10 percent or higher, and the effects tended to be statistically significant. Nevertheless, there were four states whose exports to Canada fell by more than 10 percent in the wake of NAFTA. At the regional level, though, NAFTA increased the exports to Canada for all nine regions, although the increases for the Great Lakes and Rocky Mountain regions were rather modest. For the Great Lakes, the regional number was dragged down by the large negative effect for Michigan, the only state in the region for which NAFTA did not lead to a large increase in exports to Canada.

Although our finding that NAFTA increased total US exports to Canada by 15 percent is very similar to the 13 percent increase found by Wall (2000), our estimates of the regional effects of NAFTA differ a great deal from his estimates. In particular, he finds a large increase (21 percent) in exports from the Great Lakes region to Canada, whereas we find a much more modest increase. Also, he finds small increases in exports from the Plains and Southwest to Canada (6 percent for each), whereas we find increases of 23 and 30 percent, respectively. His region-level results are not directly comparable to ours, however, as Canadian provincial trade data uses the Census Bureau's "origin of movement" method to assign states of origin, without adjustments of the sort performed by MISER.

4.2 Extra-NAFTA state and regional exports

Our estimates of the effects of NAFTA on US state exports to Europe, Asia, and Latin America and the Caribbean are listed in their respective columns of Table 1c and are illustrated by Figures

6, 7, and 8. The estimates aggregated to the regional level are listed in Table 2. We found that the 6 percent NAFTA-induced decrease in total US exports to Europe was regionally concentrated, and only 14 of the state-level effects were statistically significant. The Far West and the Mideast both saw NAFTA lead to large decreases in exports to Europe. For the Far West this was dominated by Washington's NAFTA effect of -25 percent, while it was New York's NAFTA effect of -19 percent that drove down the number for the Mideast. In contrast, the Rocky Mountain region saw a somewhat large increase in exports to Europe, driven by a NAFTA effect of 32 percent for Utah.

Similar to the effects of NAFTA on exports to Europe, its effect on US exports to Asia was far from uniform across states and regions. In contrast to the effects on exports to Europe, the effects of NAFTA on state exports to Asia were spread across the regions, and the state-level effects are statistically significant for 30 states. There were 22 states with NAFTA effects greater than 10 percent, and eight with negative NAFTA effects of 10 percent or more. However, this left 21 states with small NAFTA effects, split nearly evenly between positives and negatives. NAFTA led to increases in exports to Asia for most regions, although the increase for the Southeast was fairly small. NAFTA had a very small effect on exports from the Mideast to Europe, although the large positive effect for Maryland was cancelled out by the negatives for other states in the region. Similarly, New England's small negative effect would have been even more negative if Vermont had not had its 46 percent boost from NAFTA.

As with the effects of NAFTA on exports to Europe and Asia, there were interesting state and regional differences in the effects on exports to Latin America and the Caribbean. Despite a small aggregate effect, we found 21 states for which NAFTA led to large decreases in exports to Latin America, compared with only eight for which it led to large increases. For 25 states the effect was statistically significant. The regional characteristics of the effect of NAFTA on US

exports to Latin America and the Caribbean is clear from Figure 8. Large negative effects were concentrated in the states in the far North of the United States — there were decreases of 16 percent for exports from the Mideast and New England. In contrast, the large state-level increases in exports to Latin America following NAFTA were concentrated in the two southern regions.

4.3 Total state and regional exports

As discussed above, NAFTA has had many different effects on exports from the states and regions of the United States. It has not only affected the flow of trade from the United States to its NAFTA partners, but also to non-NAFTA parts of the world. An evaluation of the state, regional, and national effects of NAFTA on trade volumes would be incomplete without adding its effects on extra-NAFTA exports. The last column of Table 1c provides the aggregated estimates of the effects of NAFTA on total state exports, which are illustrated by Figure 9 and are aggregated to the regional level in the last column of Table 5.

The nearly 8 percent estimated boost in US exports from NAFTA was spread across the states and regions. Of the 12 states with estimated negative effects, only three had decreases of greater than 10 percent. These are Mississippi (-14 percent), the District of Columbia (-15 percent), and Delaware (-13 percent). Of the 39 states whose total exports increased, 27 saw increases in excess of 10 percent. The states with the largest positive effects were New Mexico (37 percent), Kentucky (35 percent), Colorado (29 percent), Indiana (26 percent), and 8 others who had their exports expand by more than 20 percent.

States either on the Canadian border or on the northern section of the Eastern Seaboard tended to have experienced small NAFTA effects. At the regional level, although the total effects of NAFTA on total exports were all positive, the increases for New England and the

Mideast were very small, with the latter being indistinguishable from zero. The estimated effects of NAFTA on the total exports for the other seven regions were all between 9 and 16 percent.

4.4 NAFTA and state growth

A review of the dynamic effects of trade liberalization by the US International Trade Commission (1997b) indicates much theoretical support for expecting trade liberalization to have a positive effect on economic growth. In the context of NAFTA, the literature suggests that those states with more positive export effects should have experienced relatively more rapid growth. To explore this hypothesis, as well as to generate some information concerning how reasonable our results are, we calculated simple correlations between state income growth between 1993 and 1998 and our estimates of the effects of NAFTA on total exports. The simple correlation of 0.38, which is statistically significant at the better than the 1 percent level, suggests that states with more pronounced NAFTA-related export effects also tended to grow faster.

In addition, we explored the connection between state income growth and our estimates of the effects of NAFTA on exports to specific regions. The simple correlation was virtually zero using the estimated export effects for both Mexico (-0.06) and Canada (0.05). A similar result was found for exports to Latin America and the Caribbean (0.12). Meanwhile, state income growth was correlated at better than the 10 percent significance level only with the estimated NAFTA effects on state exports to Europe (0.37) and Asia (0.25). Clearly, though, these results are only suggestive of the possible role that NAFTA may have played in determining state growth, and they are far from conclusive. Our simple correlations do not account for the simultaneity of exports and income, nor do they control for potential covariates that might explain changes in exports and changes in income.

Recent theoretical work suggests the possibility that international integration can affect the regional concentration of economic activities. In Krugman and Livas (1996), giant metropolises in the third world are the unintended consequence of import protection, so trade liberalization will lead to a dispersal of some activity out of metropolises.[22] In contrast, in Paluzie (2001), because of agglomeration effects, trade liberalization by a country with interregional labor mobility leads to a greater concentration of economic activity. Our results do not offer any evidence that NAFTA's effects were related to the initial pattern of economic activity. Specifically, the rank correlation between 1993 state per capita income and our estimates of the effects of NAFTA on state exports is -0.18, indicating a tendency for poorer states to have seen larger NAFTA effects. With a t-statistic of -1.29, though, this relationship is not statistically different from zero.

5 Conclusions

Our gravity model estimation generates numerous results concerning the effects of NAFTA on exports at the state level; however, our analysis also produces other noteworthy results. As expected in gravity models, we find that economic size matters — the incomes of states and destination countries are positive and statistically significant determinants of state exports. This is consistent with Erickson and Hayward (1991) and Cronovich and Gazel (1998), who find that state export flows are positively related to the GDPs of destination countries. We also find that globalization was responsible for a 3.2 percent increase in yearly state exports and that, according to our fixed effects estimates, many other factors — including distance and any number of unobservable pair-specific factors — matter as well.

[22] Wei and Wu (2001) find that urban-rural inequality was lower for Chinese cities that were more open to trade.

Existing estimates of the effect of NAFTA on aggregate US trade are rather lukewarm. Krueger (1999, 2000) finds no statistically significant effects, but concludes that the increase in trade with Mexico and Canada probably was larger than the decrease in trade with the rest of the world. Looking only at US imports, Romalis (2001) finds that the increase in imports from Mexico and Canada due to NAFTA has been at the expense of imports from the rest of the world, for a net decrease in US imports.

In contrast, we find that NAFTA had large and significant effects on US merchandise exports. We find that US exports to Mexico and Canada increased by 16 and 15 percent, respectively, while exports to Europe and Latin America decreased by 6 and 3 percent, respectively. In contrast with the standard trade creation/diversion dichotomy, we also find that NAFTA led to a 15 percent increase in exports to Asia. Overall, our results indicate that NAFTA has led to an 8 percent increase in yearly US exports.

NAFTA has also had wide-ranging state-level effects on merchandise exports. Most states saw increased total exports: 13 saw increases of 20 percent or more while another 12 saw increases between 12 and 20 percent. The effect of NAFTA on total exports was negative for 12 states, with three states seeing decreases of 10 percent or more.

This study has also generated results concerning NAFTA's effects on the relative importance of NAFTA members as recipients of state exports. As with the United States as a whole, most states saw large increases in exports to both Mexico and Canada, although there were significant differences across states. In particular, we find that, as a result of NAFTA, eight states saw large decreases in their exports to Mexico, while four states saw large decreases in their exports to Canada. As suggested by the new economic geography literature, these state-level decreases in intra-NAFTA exports highlight the importance of firm mobility in determining the effects of international integration on the pattern of state exports.

It is not only state exports to Canada and Mexico that have been affected by NAFTA, but also state exports to the non-NAFTA world. These effects varied greatly across states and destinations, and there was no consistent pattern of positive or negative effects. Also noteworthy is our finding that states' NAFTA effects have not tended to be very similar across the various export destinations.

The wide variety of state-level NAFTA effects suggests that, consistent with Coughlin and Fabel (1988) and Erickson and Hayward (1992), the distribution of states' productive resources plays a role in determining the geographic distribution of the effects of NAFTA. In addition, the fact that we found so many positive NAFTA effects (contrary to the usual negative trade diversion effects) indicates that the geographic mobility of firms has also likely been an important factor in determining the post-NAFTA pattern of exports. At this stage of our research, though, we are unable to separate the state-level NAFTA effects into their constituent parts.

In light of these results, estimation approaches such as the gravity model, that simultaneously account for the many different effects of integration, are essential to understanding how NAFTA has altered the pattern of state exports. Moreover, the great diversity of results across states and regions indicates the importance of geographic and subnational considerations in the evaluation of international integration.

POVERTY, CONCENTRATED POVERTY & URBAN AREAS

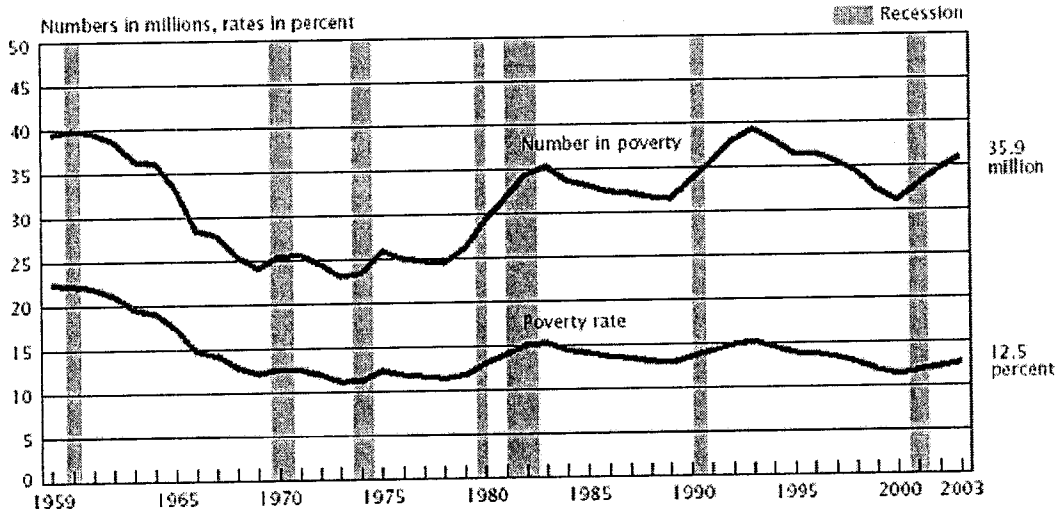
Statistics and Related issues

(All data from U.S. Census Bureau except where noted)

Recent Data on Poverty & Cities (2004 Current Population Survey)

In 2004, the Census estimated the poverty rate in the U.S. **increased to 12.7%** (from 12.5% in 2003); this represents an estimated 37 million people that were below the poverty level, up 1.1 million from 2003. **For children under 18, the poverty rate was 17.8%** (13 million), unchanged from 2003 but higher than for either those 65 and over (9.8%) or those between 18 and 65 (11.3%). **24.7% of Blacks and 21.9% of Hispanics lived in Poverty in 2004**, unchanged from 2003 but almost three times that of non-Hispanic Whites (8.3%). Poverty rates have been increasing since 2000, after declining for much of the 1990's.

Number in Poverty and Poverty Rate: 1959 to 2003



Note: The data points are placed at the midpoints of the respective years.
Source: U.S. Census Bureau, Current Population Survey, 1960 to 2004 Annual Social and Economic Supplements.

Poverty levels are usually higher in cities; **57 of the 70 cities with more than 250,000 people had poverty rates higher than the national average in 2004**. In New York City, **approximately 1 out of 5** (20.3%, 19th highest among large cities), **over 1.7 million people, lived in poverty in 2004—including 30% of all children**. Below is a list of large cities (over 250,000) with the highest poverty rates in the latest data (the city's percent African American in the 2000 census is in parenthesis).

Percent of all People below Poverty Level (2004)	Percent of Children <18 below Poverty Level (2004)
1. Detroit – 33.6% (81.6%)	1. Atlanta – 48.1% (61.4%)
2. El Paso – 28.8% (3.1%)	2. Detroit – 47.8% (81.6%)
3. Miami – 28.3% (22.3%)	3. Long Beach – 45.2% (14.9%)
4. Newark – 28.1% (53.5%)	4 (tie). Miami – 41.3% (22.3%)
5. Atlanta – 27.8% (61.4%)	4 (tie). Milwaukee –41.3% (37.3%)

Concentrated Poverty, Central Cities & Race (2000 Census)

In the 2000 Census, the Census divided all tracts into four categories based on their poverty level; Category I were tracts with a poverty rate less than 12.4%, and Category IV were tracts with poverty

rates of more than 40%. The Northeast had the highest percentage of people living in Category IV tracts, followed by the South and West. **More than 70% of non-Hispanic Whites lived in a Category I tract, compared with only 31.8% of Blacks and 35.5% of Hispanics**. Of the 8 million people living in Category IV tracts, **24.1% were non-Hispanic White, 39.9% were Black and 28.9% were Hispanic**. Concentrated poverty, marked by the number of tracts with greater than 40% poverty rates (Category IV), is concentrated in central cities—**of the 7,946 Category IV tracts, 5,988 (75%) were in central cities**, 1,041 (13%) were in suburbs and 917 (12%) in non-metropolitan areas. The number of people living in high poverty tracts actually declined by 24% between 1990 and 2000, led largely by declines in cities in the Midwest and South.[1] Neighborhood poverty levels are important, because researchers have found that residents of high poverty neighborhoods experience significantly higher rates of unemployment, food and rent hardship and poor health, and have poorer educational outcomes and access to health care.[2] New Orleans, before it was devastated by Katrina, was one of the cities most impacted by concentrated poverty as measured by the percent of its poor people living in Category IV tracts—38% of those below the poverty line, almost 50,000 people, lived in such neighborhoods.[3] Other cities with high concentrated poverty rates are below:

City	Concentrated Poverty Rate	Concentrated Poverty Rate - Blacks	Number of Category IV Tracts
1. Fresno, CA	43.5%	44.9%	22
2. New Orleans, LA	37.7%	42.6%	47
3. Louisville, KY	36.7%	53.2%	11
4. Miami, FL	36.4%	67.6%	23
5. Atlanta, GA	35.8%	41.0%	28
10. New York, NY	25.9%	33.7%	248

Issues with Poverty Measure

To count the number of people below the poverty level, the Census bureau determines a "poverty threshold". It is set at a national level and does not vary by the region, only by the age of the householder and size of the household. It is adjusted each year using the Consumer Price Index. Many believe the measure is inadequate, especially for high cost urban areas, because it is not adjusted for differences in cost of living across the country. It also was originally based on what a family spent on food in the early sixties, adjusted for inflation, and does not fully account for what households actually spend their income on today—especially costs like housing and health care. The original poverty threshold estimated that a household spent approximately one-third of their income on food, and current estimates put the figure at around 12%.[4] Using the Census definition, Mississippi, Louisiana, New Mexico had the highest poverty rates in 2004—though some argue that $19,307 (the average poverty threshold for a family of four) could go a lot farther in rural Mississippi than in the Bronx. The Public Policy Institute of California adjusted the federal measure to take into account housing costs and found that D.C., New York and California actually have the highest poverty rates using their measure.[5]

NMTC TARGETED POPULATIONS

Designation of Eligible Communities Serving Targeted Populations in the Gulf Opportunity Zone

The Internal Revenue Service (IRS) recently published a Notice providing guidance with respect to how certain Targeted Populations of individuals may be treated as Low-Income Communities eligible for investments by Community Development Entities (CDEs) under the New Markets Tax Credit (NMTC) Program.

As indicated in the Notice, certain individuals in the Hurricane Katrina Gulf Opportunity Zone, as such term is defined in the Gulf Opportunity (GO) Zone Act of 2005 (Pub. L. 109-135), are deemed to be a Targeted Population provided that the individuals were displaced from their principal residences as a result of Hurricane Katrina and/or lost their principal sources of employment as a result of Hurricane Katrina. A business that serves these individuals may be a qualified active low-income community business to the extent that:

1. The business is financed by a special set-aside of NMTC allocations that was made available to CDEs with a significant mission of recovery and redevelopment of the GO Zone, pursuant to the GO Zone Act of 2005;

2. The business is located in a population census tract in the GO Zone that contains one or more areas designated by the Federal Emergency Management Agency as flooded, having sustained extensive damage, or having sustained catastrophic damage as a result of Hurricane Katrina; and

3. The business is located in a census tract with a median family income that does not exceed 200% of the applicable median family income.

The attached spreadsheet indicates those census tracts that can potentially qualify for NMTC investments serving Targeted Populations in the GO Zone.

NOTE: The CDFI Fund does not guarantee the accuracy or completeness of the attached list. Interested parties should verify this information independently through the Federal Emergency Management Agency (FEMA) website www.fema.gov.

Louisiana

Three rural definitions based on Census Places

Rural locations are those outside Census Places with a population...

...greater than or equal to 2,500

Outside Census Places >= 2,500 people

...greater than or equal to 10,000

Outside Census Places >= 2,500 people

Census Places: 2,500 - 9,999

...greater than or equal to 50,000

Outside Census Places >= 2,500 people

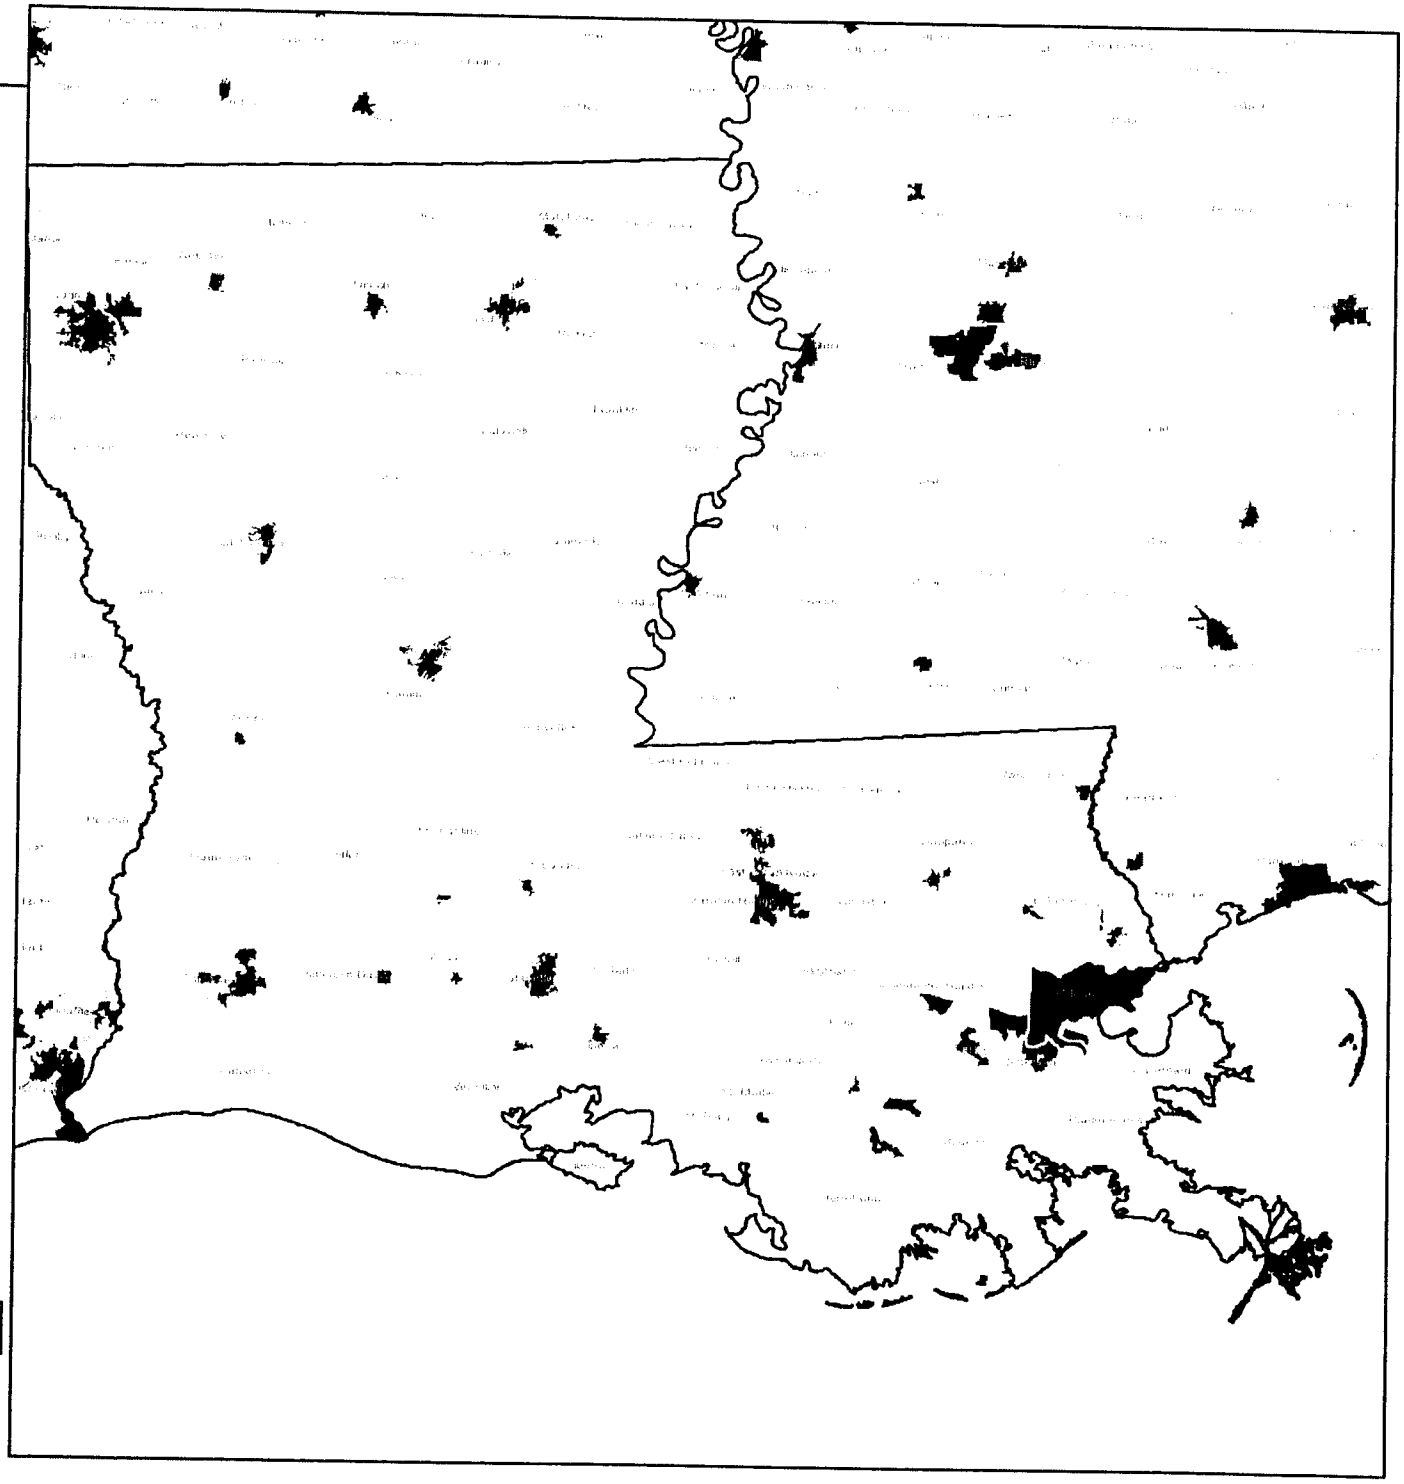
Census Places: 2,500 - 9,999

Census Places: 10,000 - 49,999

Urban locations under all three defintions:

Census Places: >= 50,000 people

For more information on definitions, see documentation



Louisiana

Three rural definitions based on Census Urban Areas

Rural locations are those outside Census Urban Areas with a population...

...greater than or equal to 2,500

Outside Census Urban Areas >= 2,500

...greater than or equal to 10,000

Outside Census Urban Areas >= 2,500

Census Urban Areas: 2,500 - 9,999

...greater than or equal to 50,000

Outside Census Urban Areas >= 2,500

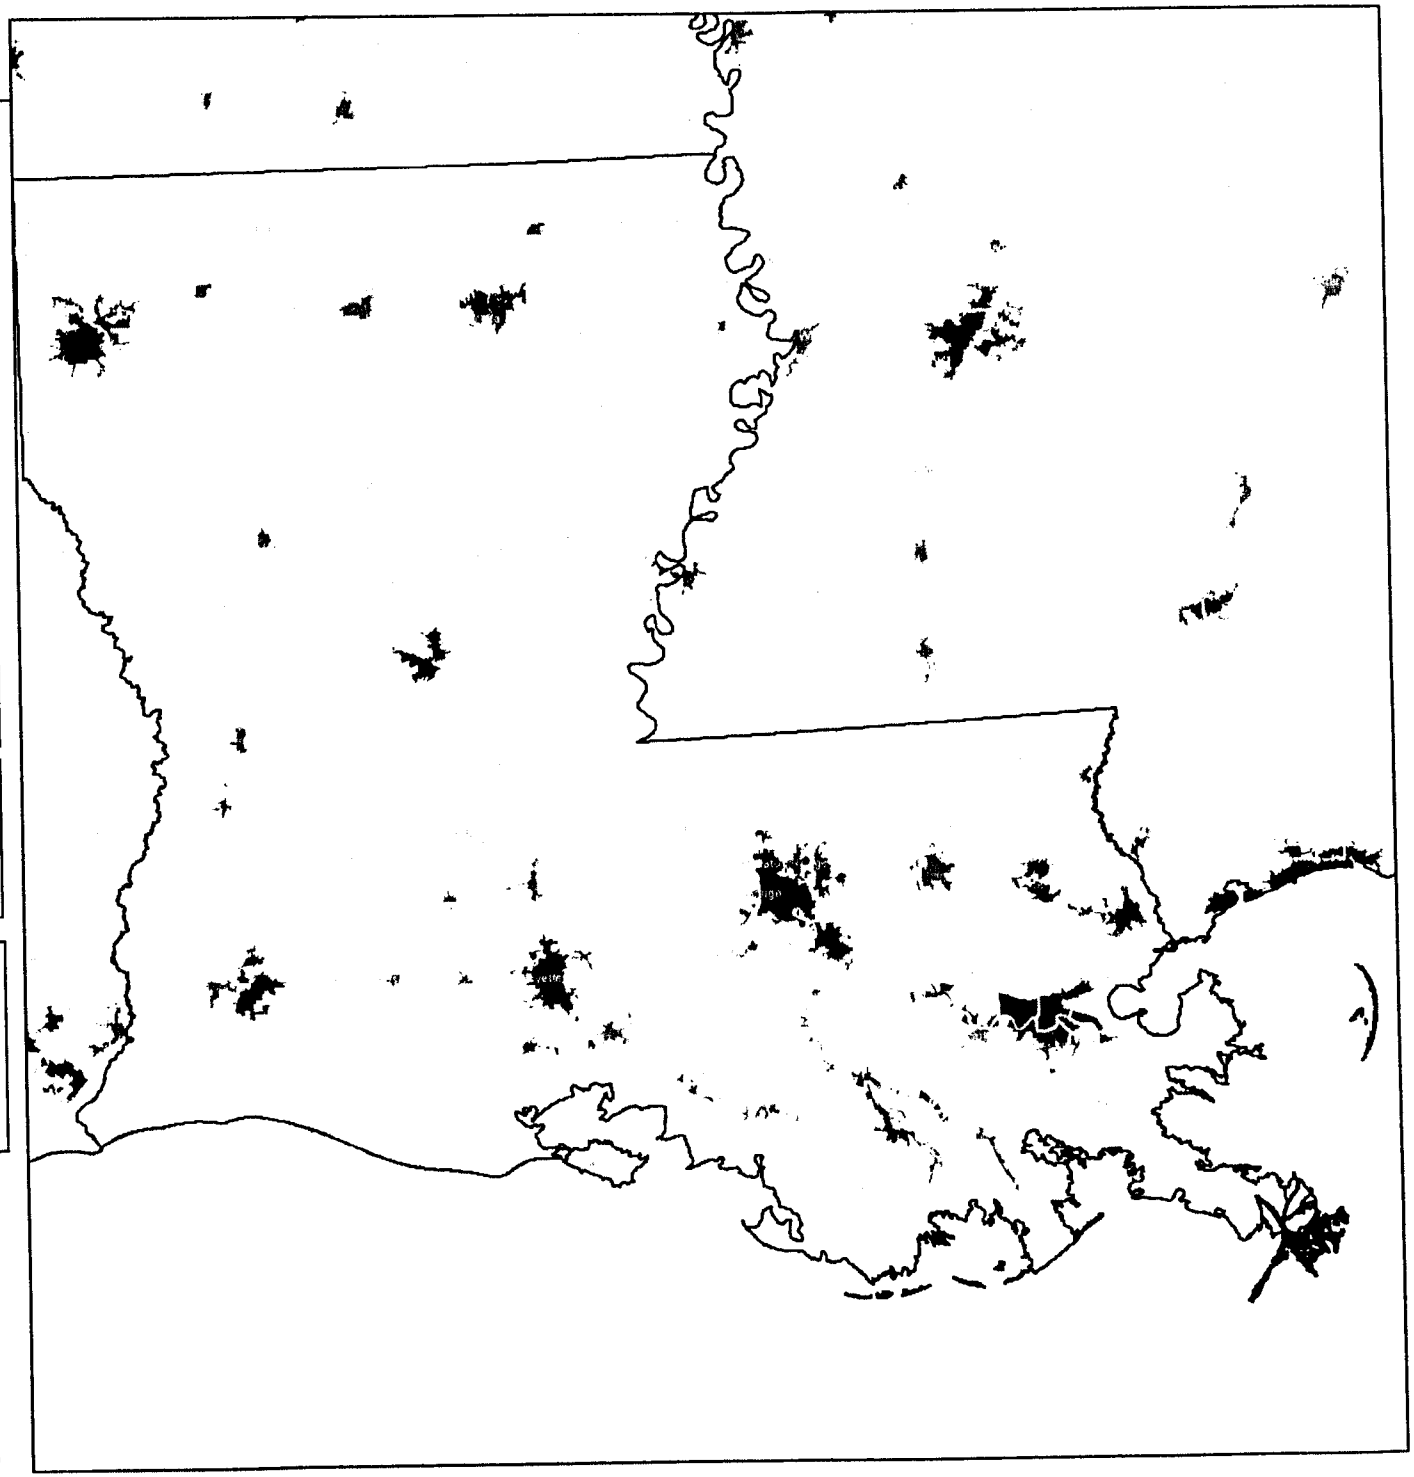
Census Urban Areas: 2,500 - 9,999

Census Urban Areas: 10,000 - 49,999

Urban locations under all three definitions:

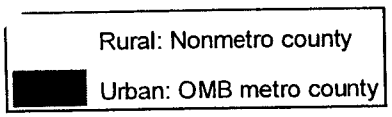
Census Urban Areas: >= 50,000

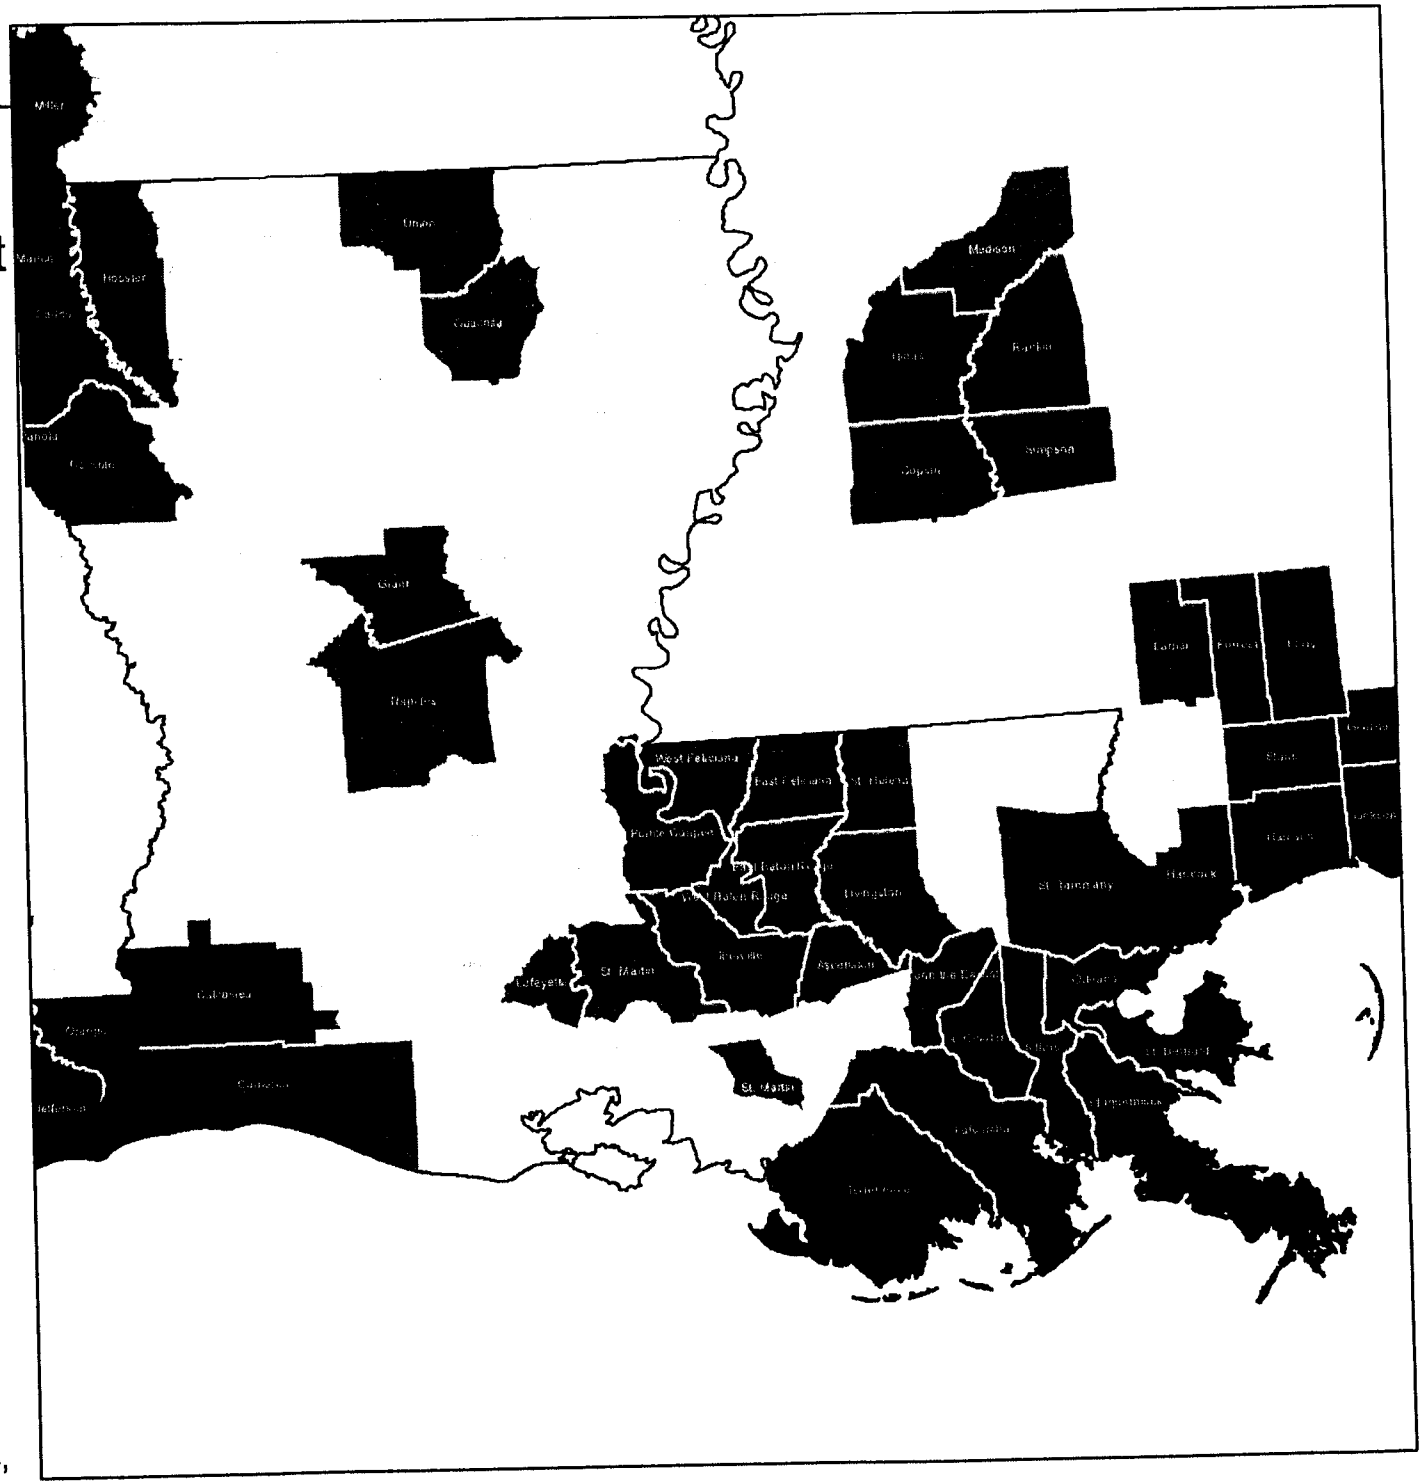
For more information on definitions, see documentation



Louisiana

Rural definition based on Office of Management and Budget (OMB) metro counties

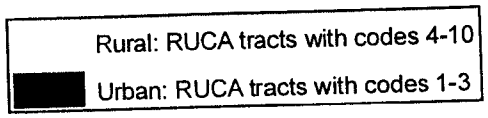


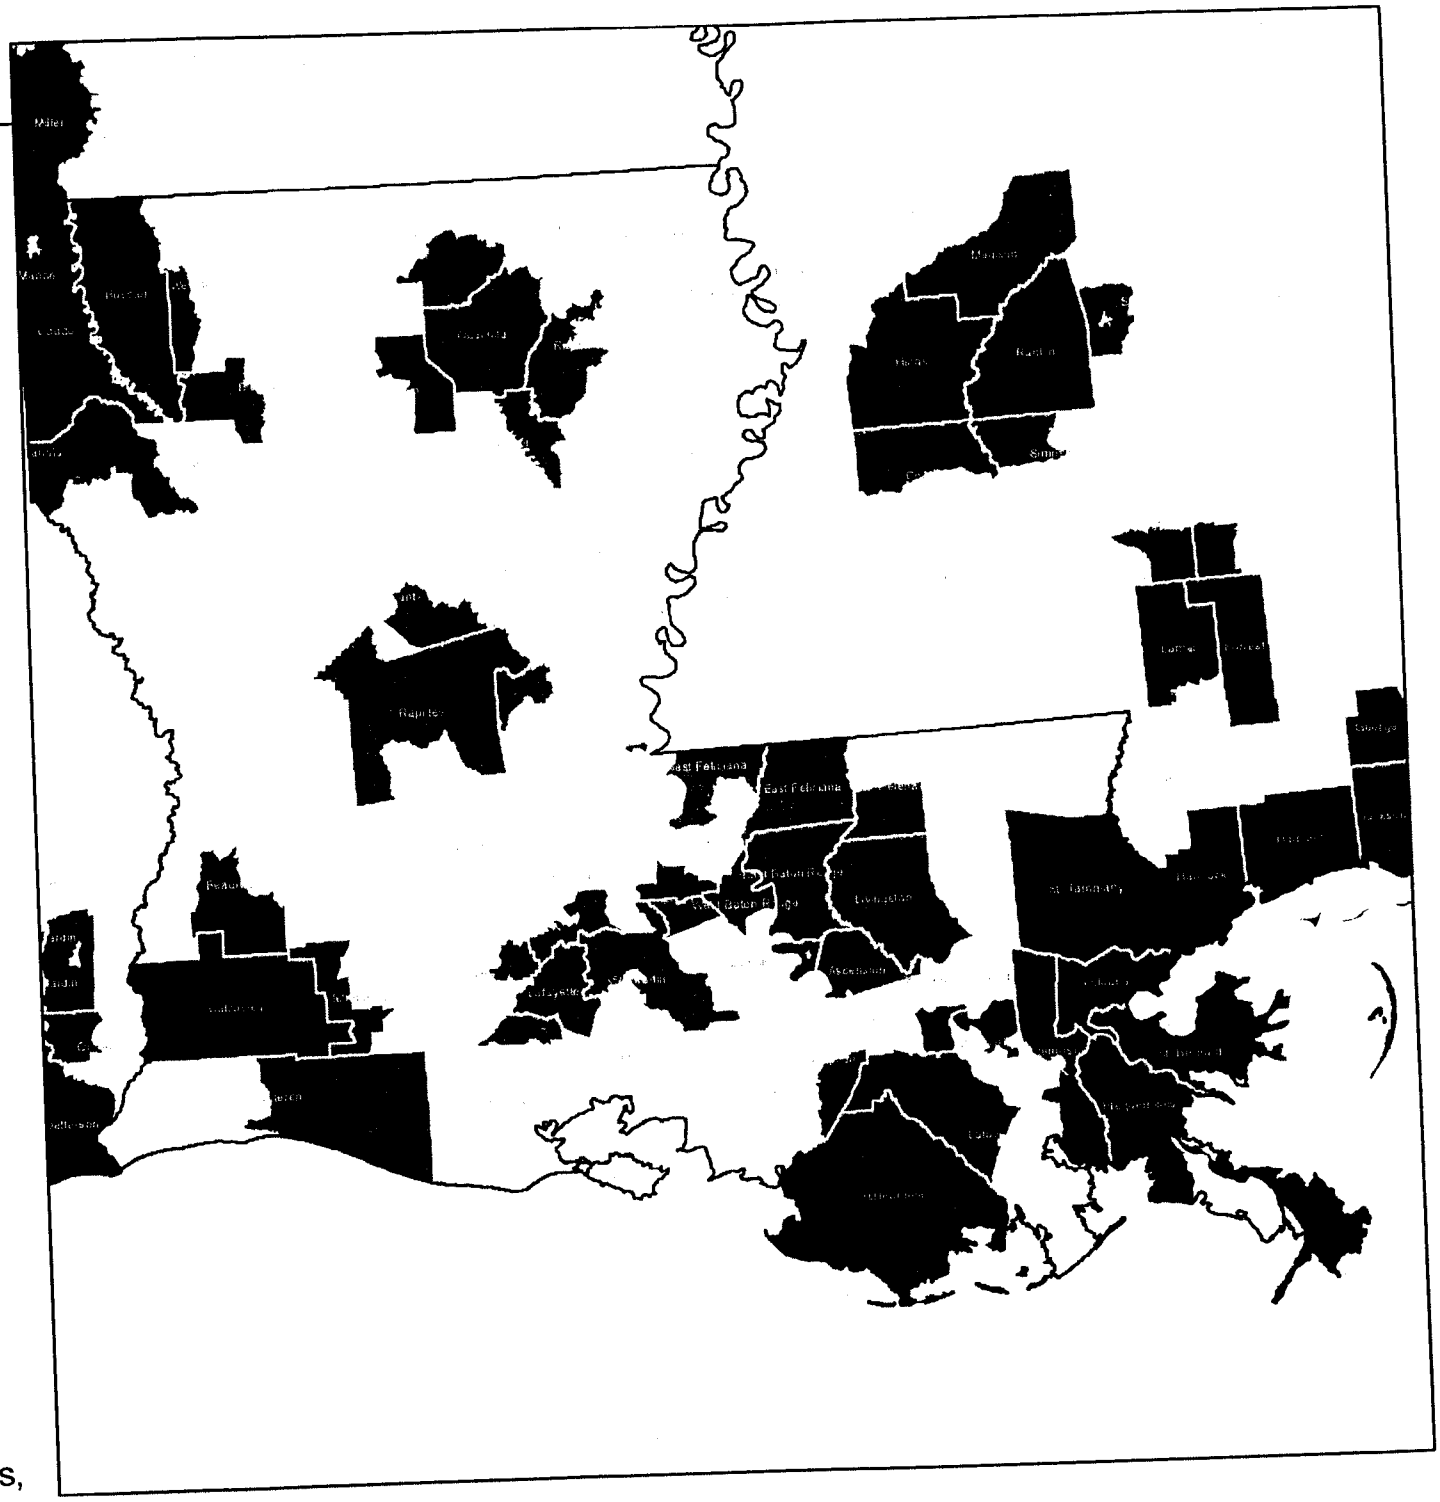


For more information on definitions, see documentation

Louisiana

Rural definition based on Economic Research Service Rural-Urban Commuting Areas (RUCA)

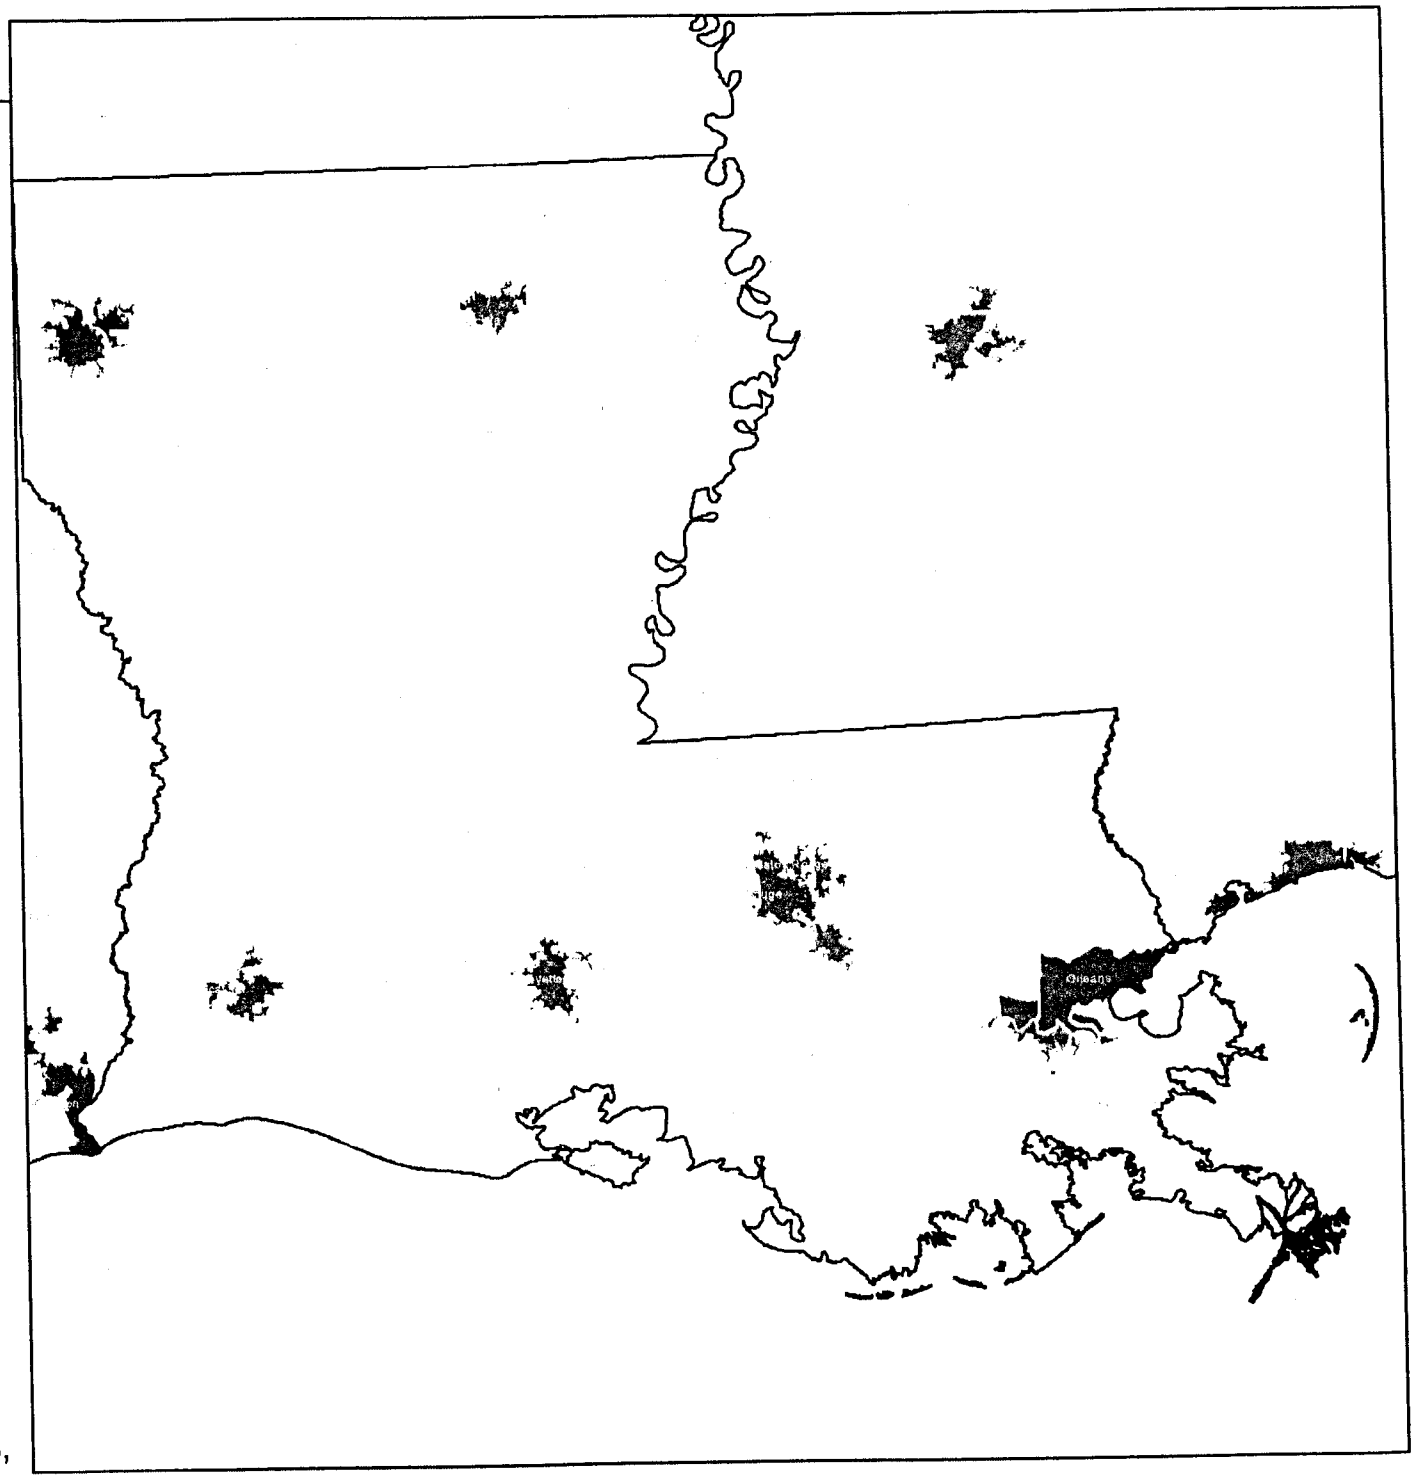




For more information on definitions, see documentation

Louisiana

The USDA Business and Industry ineligible locations are Census Places greater than 50,000 people and their adjacent and contiguous Urbanized Areas



For more information on definitions, see documentation

Mississippi

Three rural definitions based on Census Places

Rural locations are those outside Census Places with a population...

...greater than or equal to 2,500

Outside Census Places >= 2,500 people

...greater than or equal to 10,000

Outside Census Places >= 2,500 people

Census Places: 2,500 - 9,999

...greater than or equal to 50,000

Outside Census Places >= 2,500 people

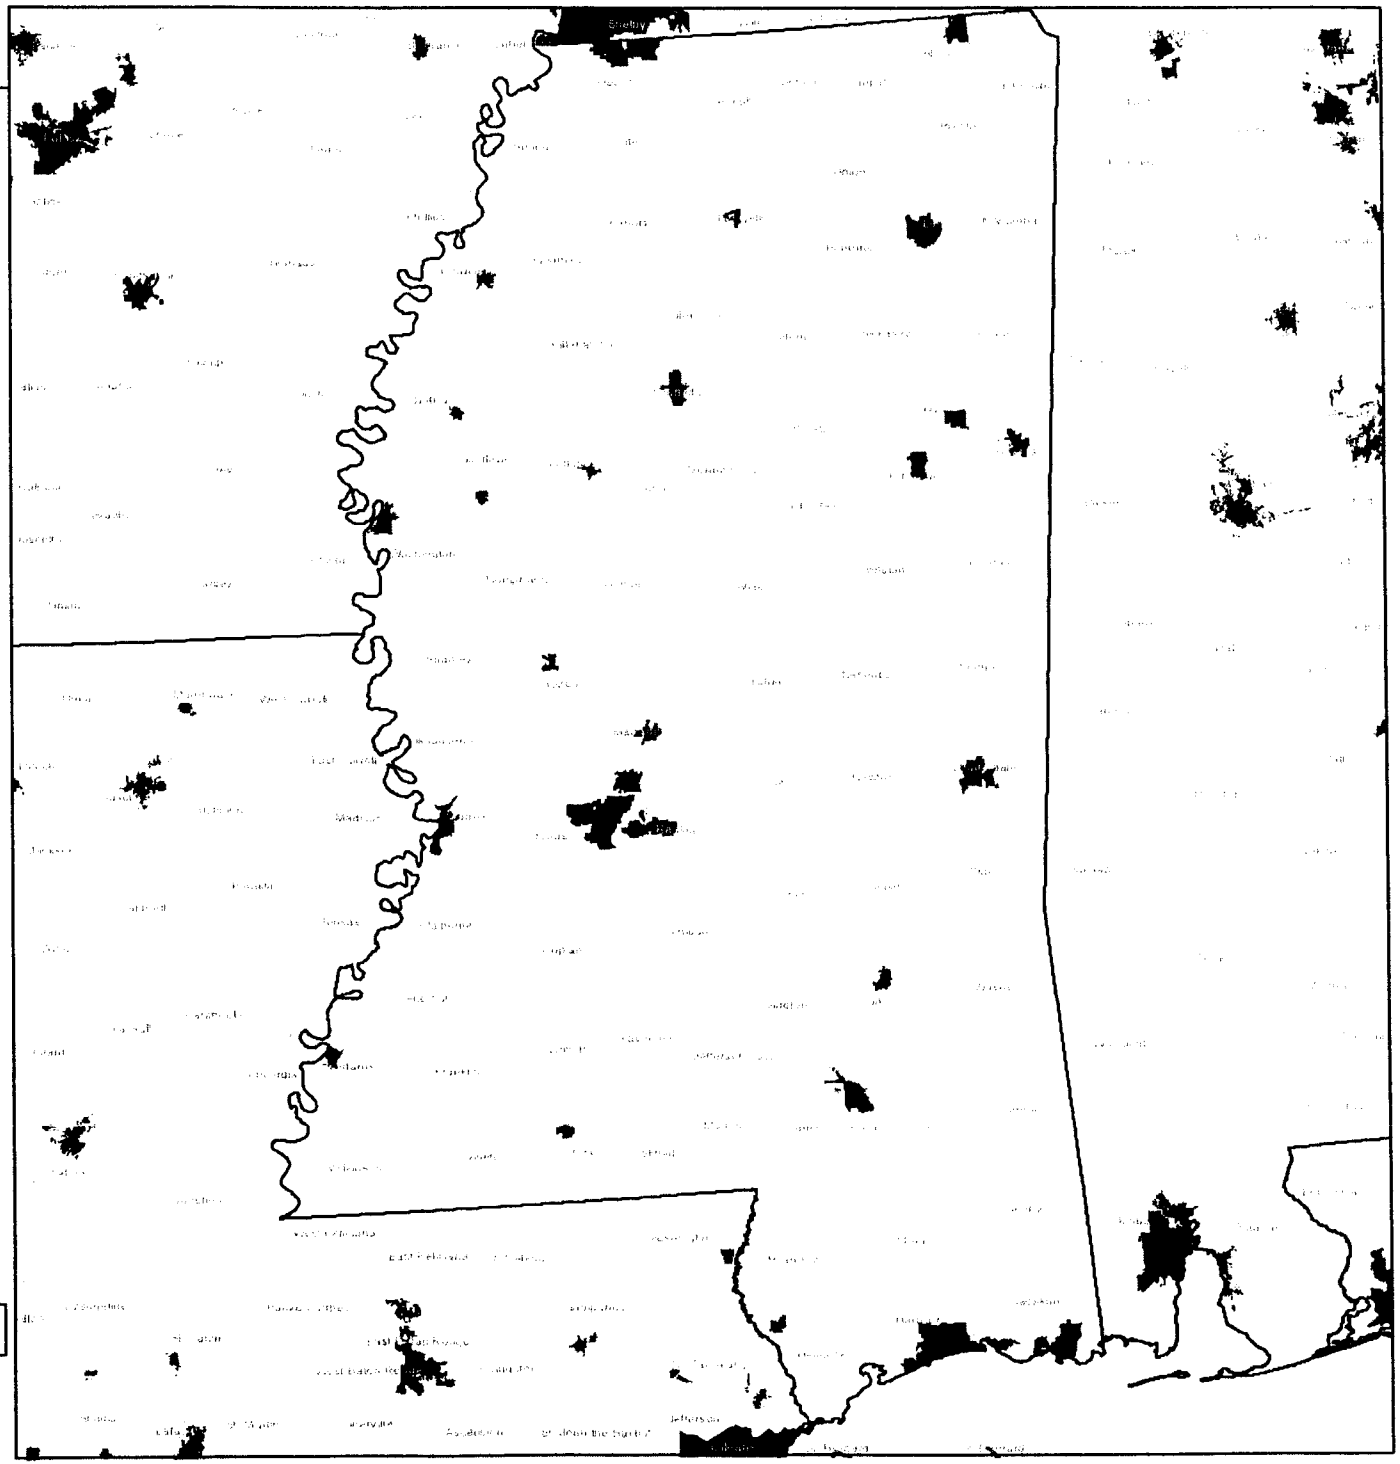
Census Places: 2,500 - 9,999

Census Places: 10,000 - 49,999

Urban locations under all three defintions:

Census Places: >= 50,000 people

For more information on definitions, see documentation



Mississippi

Three rural definitions based on Census Urban Areas

Rural locations are those outside Census Urban Areas with a population...

...greater than or equal to 2,500

Outside Census Urban Areas >= 2,500

...greater than or equal to 10,000

Outside Census Urban Areas >= 2,500

Census Urban Areas: 2,500 - 9,999

...greater than or equal to 50,000

Outside Census Urban Areas >= 2,500

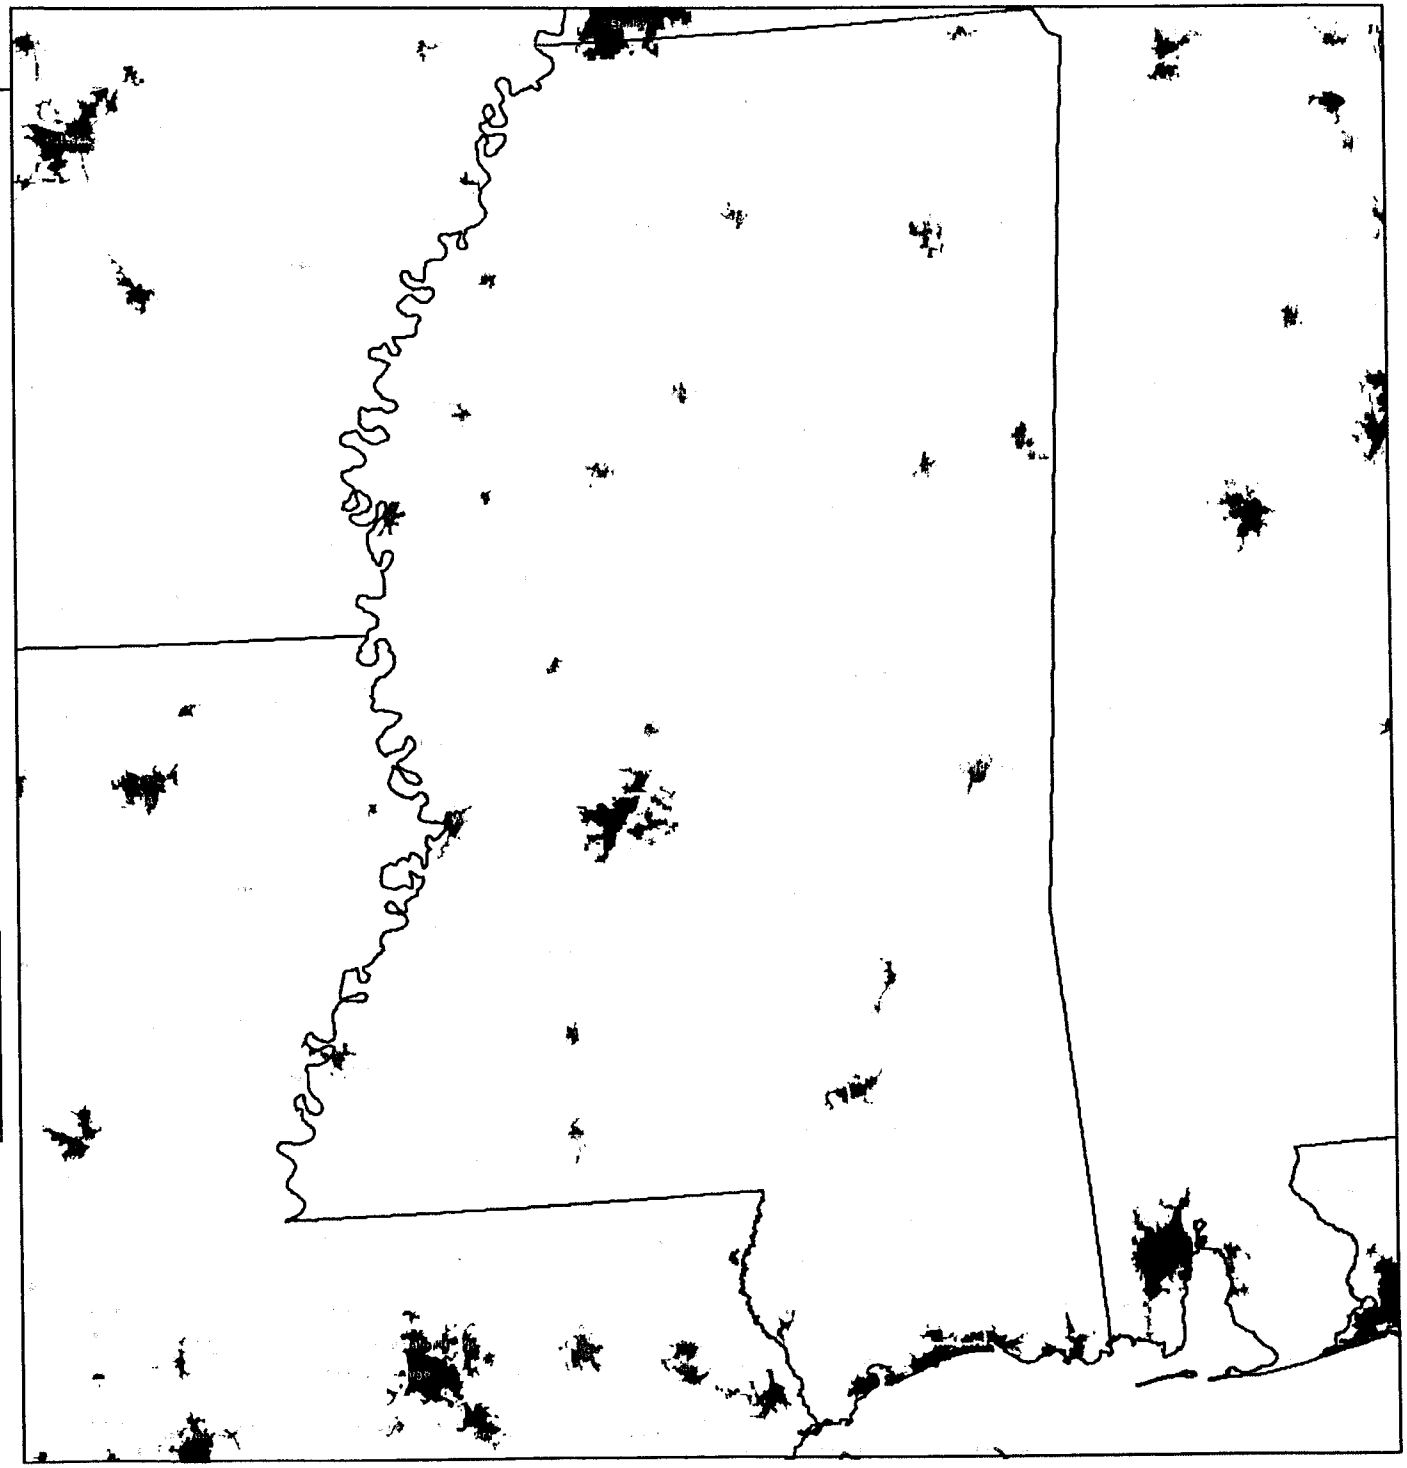
Census Urban Areas: 2,500 - 9,999

Census Urban Areas: 10,000 - 49,999

Urban locations under all three definitions:

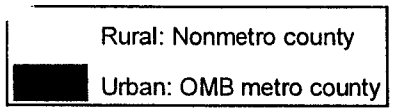
Census Urban Areas: >= 50,000

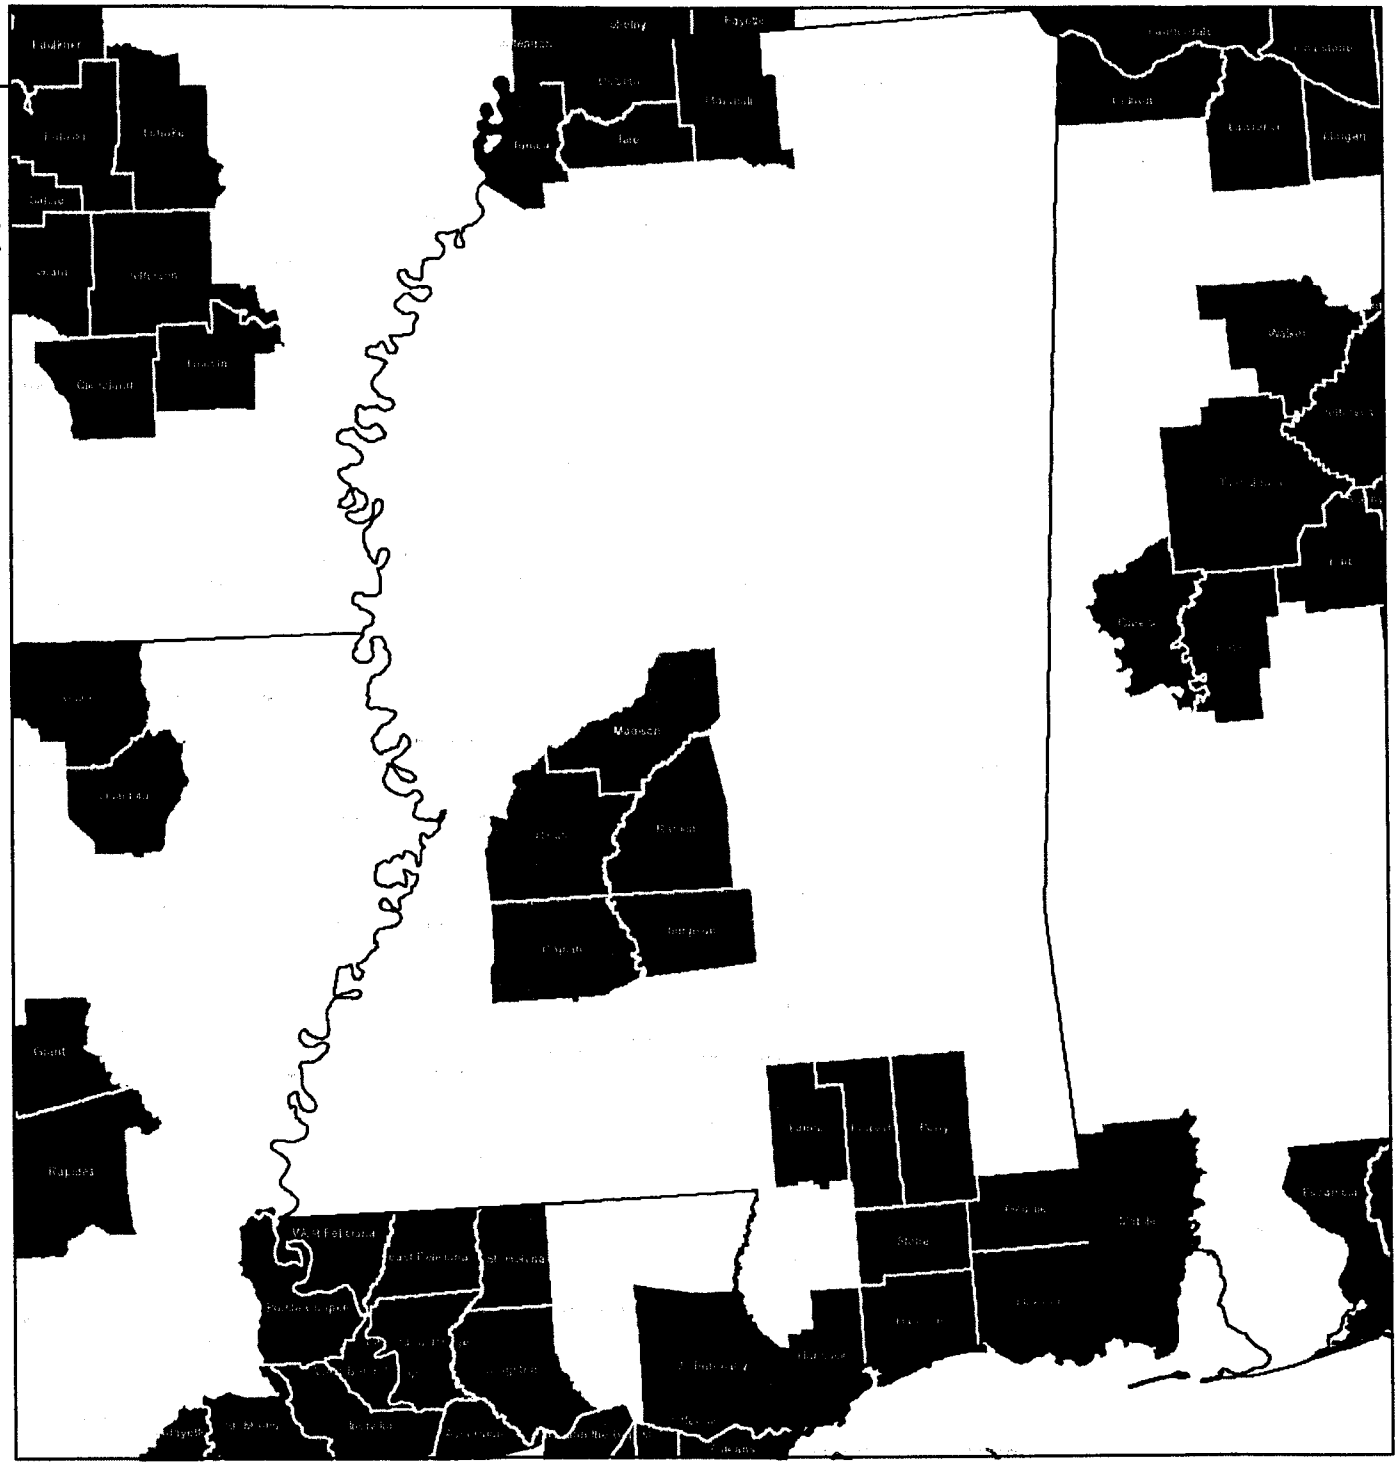
For more information on definitions, see documentation



Mississippi

Rural definition based on Office of Management and Budget (OMB) metro counties





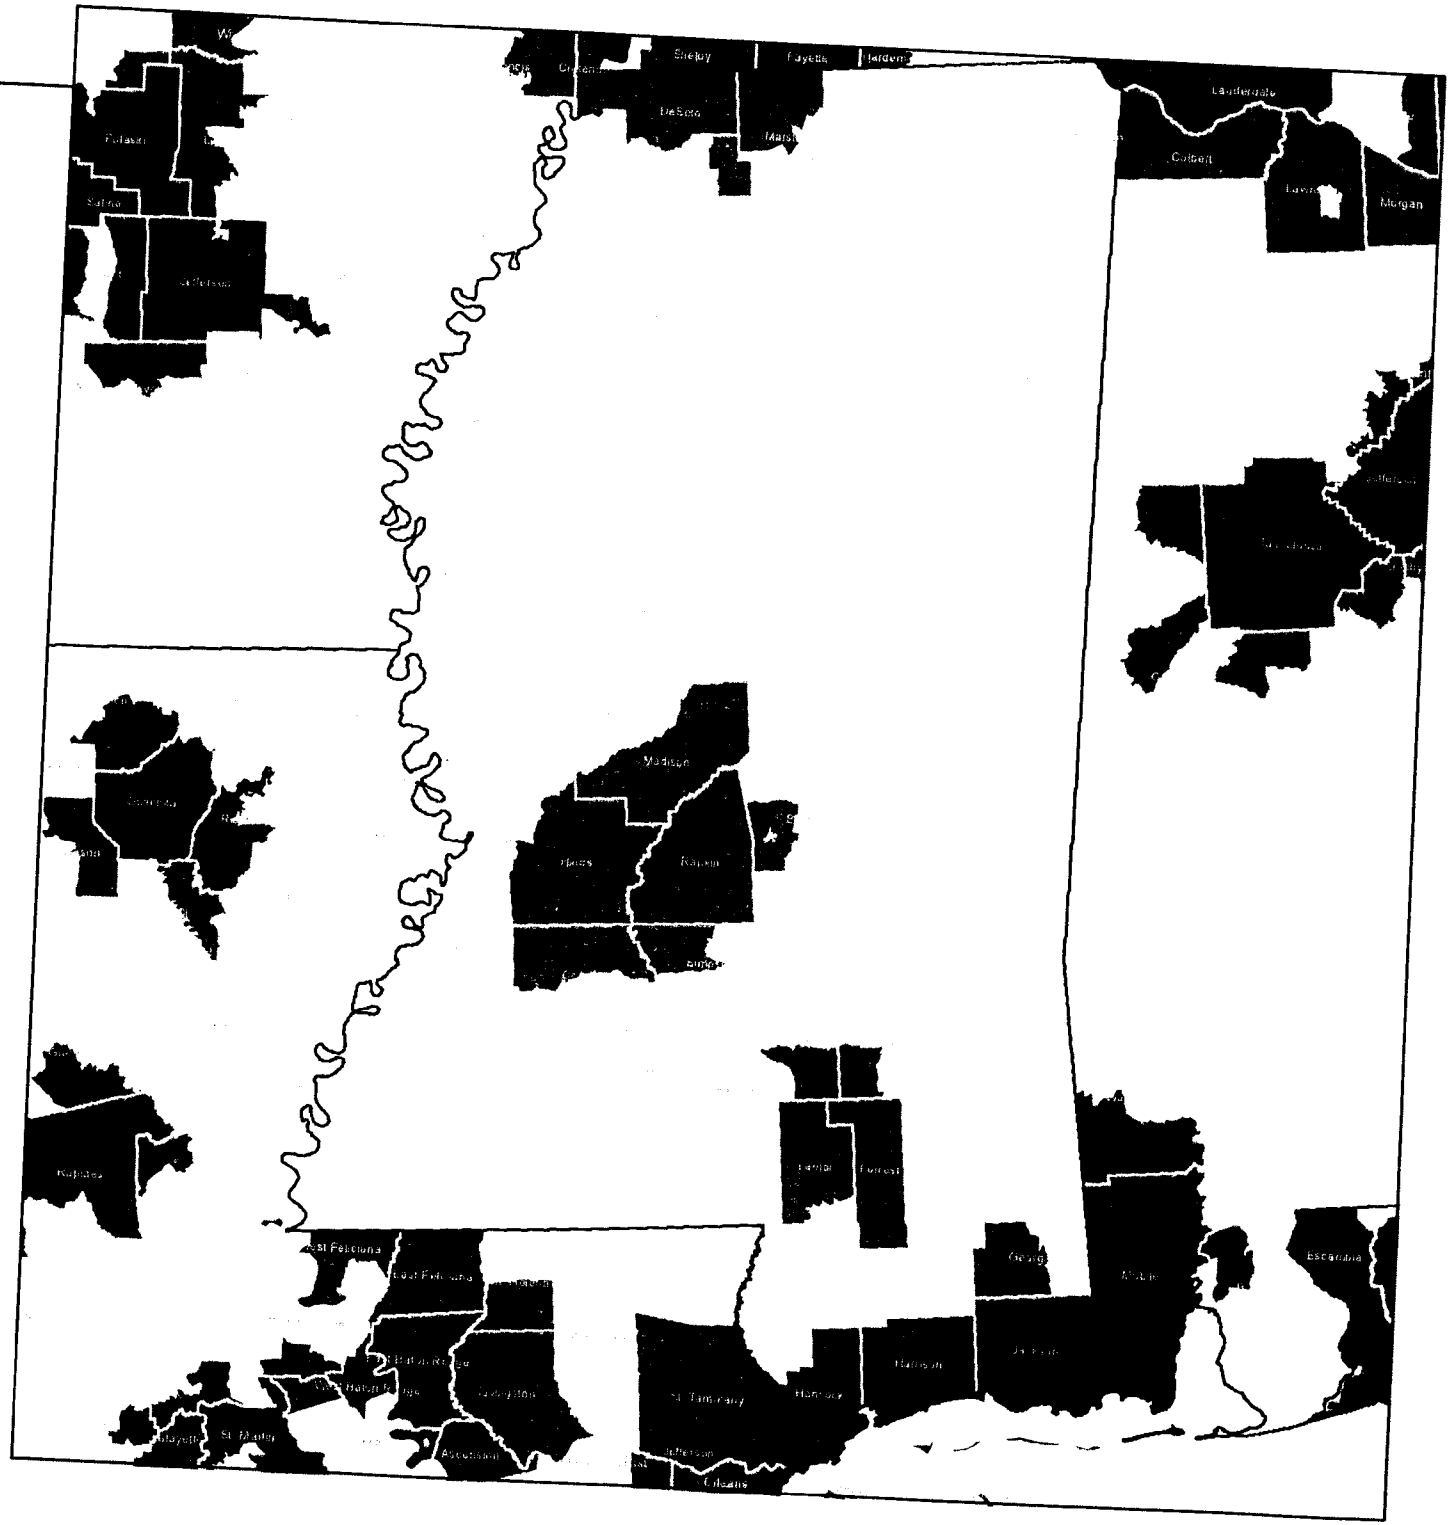
For more information on definitions, see documentation

Mississippi

Rural definition based on Economic Research Service Rural-Urban Commuting Areas (RUCA)

Rural: RUCA tracts with codes 4-10

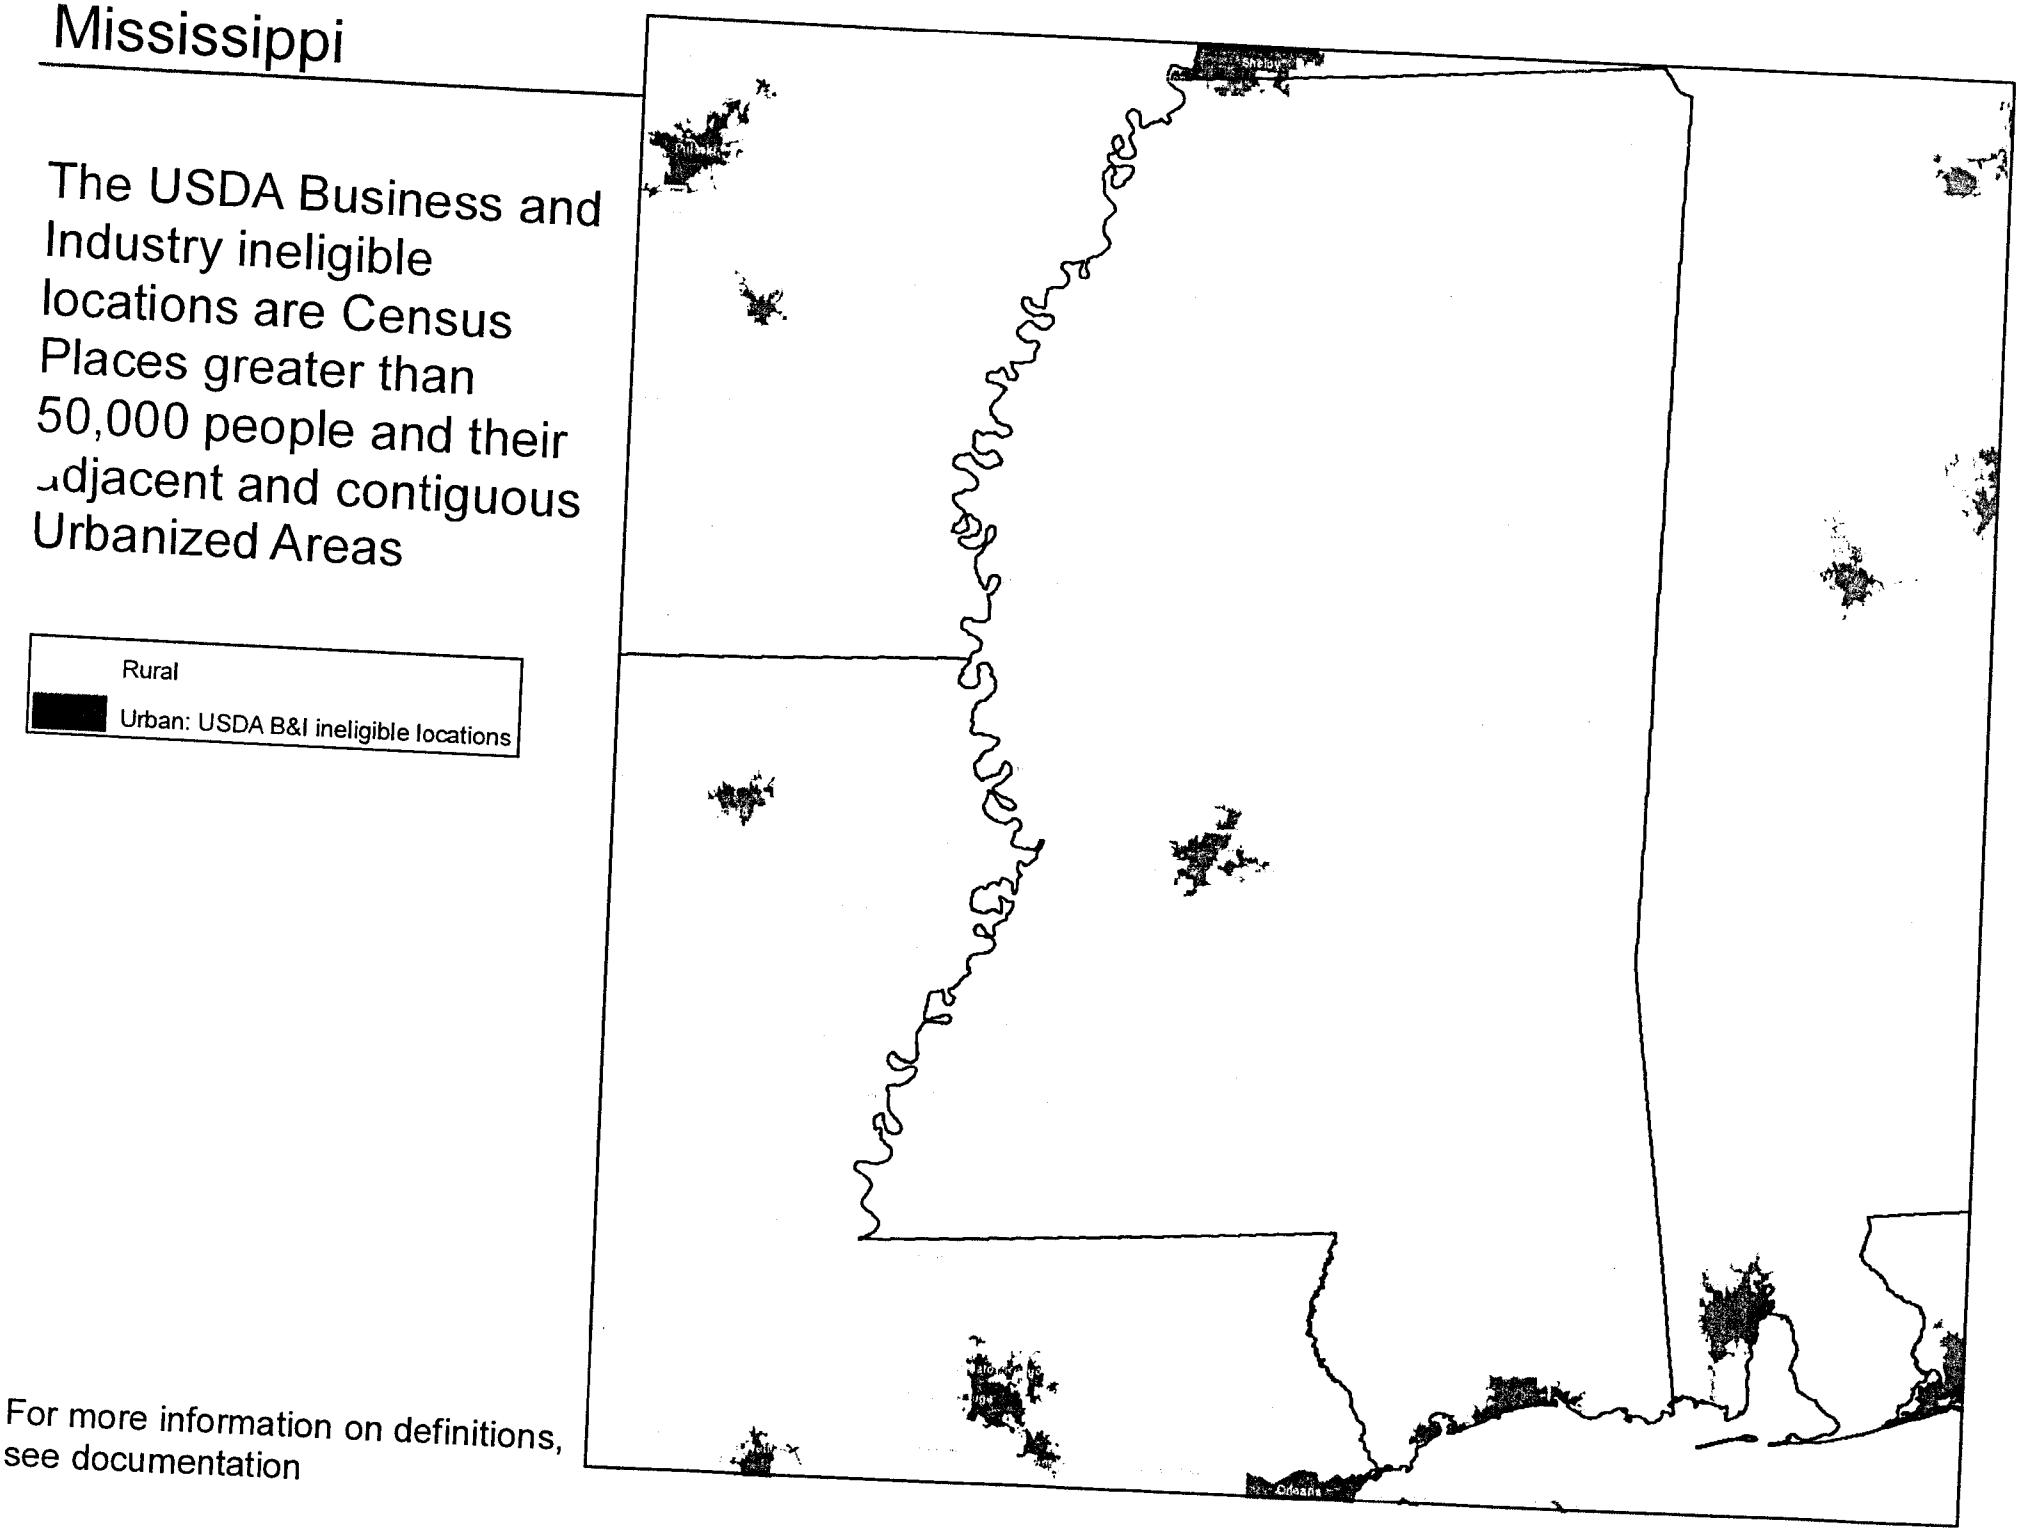
Urban: RUCA tracts with codes 1-3



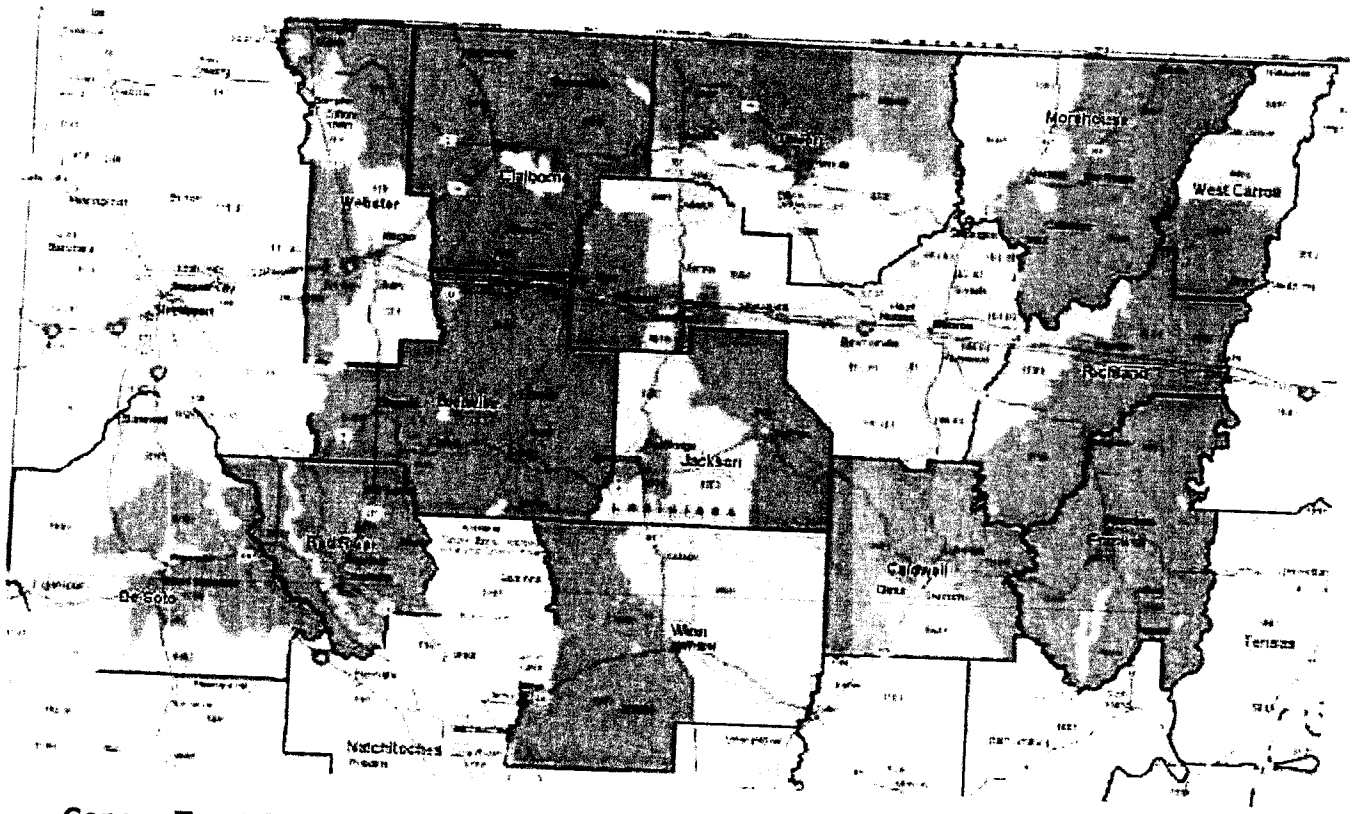
For more information on definitions, see documentation

Mississippi

The USDA Business and Industry ineligible locations are Census Places greater than 50,000 people and their adjacent and contiguous Urbanized Areas



For more information on definitions, see documentation



Census Tract 9505 of Morehouse Parish was added on June 30, 2005

Louisiana census statistical areas

From Wikipedia, the free encyclopedia

The United States Census Bureau has defined 7 Combined Statistical Areas (CSAs),[1] 8 Metropolitan Statistical Areas (MSAs),[2] and 17 Micropolitan Statistical Areas (μSAs)[3] in the State of Louisiana. The following table describes these areas with the following information:

- The name of the Combined Statistical Area (CSA), if any.[1][4]
- The population of the CSA as of 2006-07-01, as estimated by the United States Census Bureau.[5][6]
- The name of the Core Based Statistical Area (CBSA).[7][4]
- The population of the CBSA as of 2006-07-01, as estimated by the United States Census Bureau.[8][6]
- The name of the parish or county.[4]
- The population of the parish or county as of 2006-07-01, as estimated by the United States Census Bureau.[9][6]

Map of the 64 Louisiana parishes (*click to enlarge*). *See town maps near bottom.*

none

Most statistical population areas in Louisiana are named for the major towns in the area, providing a connection to Louisiana roadmaps, which have those cities and towns labeled on the maps.

Eastern Louisiana: with city/town names.

List of metropolitan areas in Mississippi

From Wikipedia, the free encyclopedia

The **State of Mississippi** has a total of five metropolitan statistical areas (MSAs) that are fully or partially located in the state. 17 of the state's 82 counties are classified by the United States Census Bureau as metropolitan. As of the 2000 census, these counties had a combined population 1,194,522 (42.0% of the state's total population). Based on a July 1, 2006 population estimate, that figure rose to 1,262,210 (43.4% of the state's total population).[1]

Population statistics

Memphis, TN-AR-MS MSA[2]	217,701	176,789	23.14
Pascagoula MSA[1]	152,405	150,564	1.22
Hattiesburg MSA	134,744	123,812	8.83

[1] The Gulfport-Biloxi and Pascagoula metropolitan areas were significantly impacted by Hurricane Katrina in 2005. Prior to the hurricane, both areas had experienced steady to moderate population growth.

[2] Population figures are for the five Mississippi counties in the Memphis MSA only.

Combined Statistical Areas

The United States Census Bureau defines a Combined Statistical Area (CSA) as an aggregate of adjacent Core Based Statistical Areas (CBSAs)[2] that are linked by commuting ties. There are three combined statistical areas in Mississippi.

- Columbus-West Point CSA
  - Columbus Micropolitan Statistical Area
    - Lowndes County
  - West Point Micropolitan Statistical Area
    - Clay County
- Gulfport-Biloxi-Pascagoula CSA

RISK FACTORS

You should be aware that an investment in the Fund involves a high degree of risk. We can make no warranty that your investment will accomplish the dual purposes of an immigrant investor -- satisfying the requirements of EB-5 to achieve permanent resident status in the United States, as well as growing the capital invested in the Fund. Prior to investing, please consider the following investment and immigration risks. We also strongly recommend that, prior to investing, you consult your personal immigration lawyer and tax consultant.

Investment Risks

The Fund's portfolio companies will be located in a contiguous and confined geographic area, and the entire area may be affected simultaneously by a regional economic downturn or by a natural disaster.

All assets of the Fund will be concentrated within the contiguous states of Louisiana and Mississippi. The value of the Fund's assets may be adversely affected by local economic conditions in Louisiana and Mississippi, and by changes in the laws and regulations of those states, including the states' tax laws. The economy of these Gulf Coast states may differ favorably or unfavorably from the U.S. economy generally. In addition, natural disasters, such as hurricanes like Katrina and Rita, may affect the general economy of the two states at the same time. The Management Company intends to mitigate this risk by investing in a wide variety of industries across the entire geographic area of Louisiana and Mississippi. There can be no assurance, however, that the Management Company can successfully diversify the Fund's exposure to common economic and geographic risks.

As a result of participation in the EB-5 program and as a result of your investment in the Fund, you will be required to pay income taxes in the United

States on your world-wide income. You should consult your personal tax advisor with respect to this obligation.

As an EB-5 participant, you will have to pay taxes in the United States on your world-wide income. As a member of the Fund, which is a limited liability company, your proportionate share of the Fund's income will be "passed-through" to you for U.S. Federal income tax purposes. You will also be required to include in income your proportionate share of the taxable income of the fund for the purposes of any state of which you are a resident. Please consult your personal tax advisor with respect to the tax consequences of an investment in the Fund. Further information about these matters is included in this private placement memorandum under the heading "Certain U.S. Federal Income Tax Considerations."

As a Class A Unit holder, you will not have voting rights except under limited circumstances.

Under the Fund's Operating Agreement, the holders of Class A Units will have limited voting rights, and will not have the right to replace the Management Company or to cause the Fund to merge, consolidate or liquidate. The only voting rights that holders of Class A Units will have would be to approve any change to the Fund's Operating Agreement that is proposed by the holder of the Class B Unit or any change that would involve a transfer of the Class B Unit by the Management Company. You will have the rights and duties normally granted to limited partners under the Uniform Limited Partnership Act.

As a Class A Unit holder, you will not have the right to transfer your Class A Unit for five years, and no market for Class A Units may ever exist.

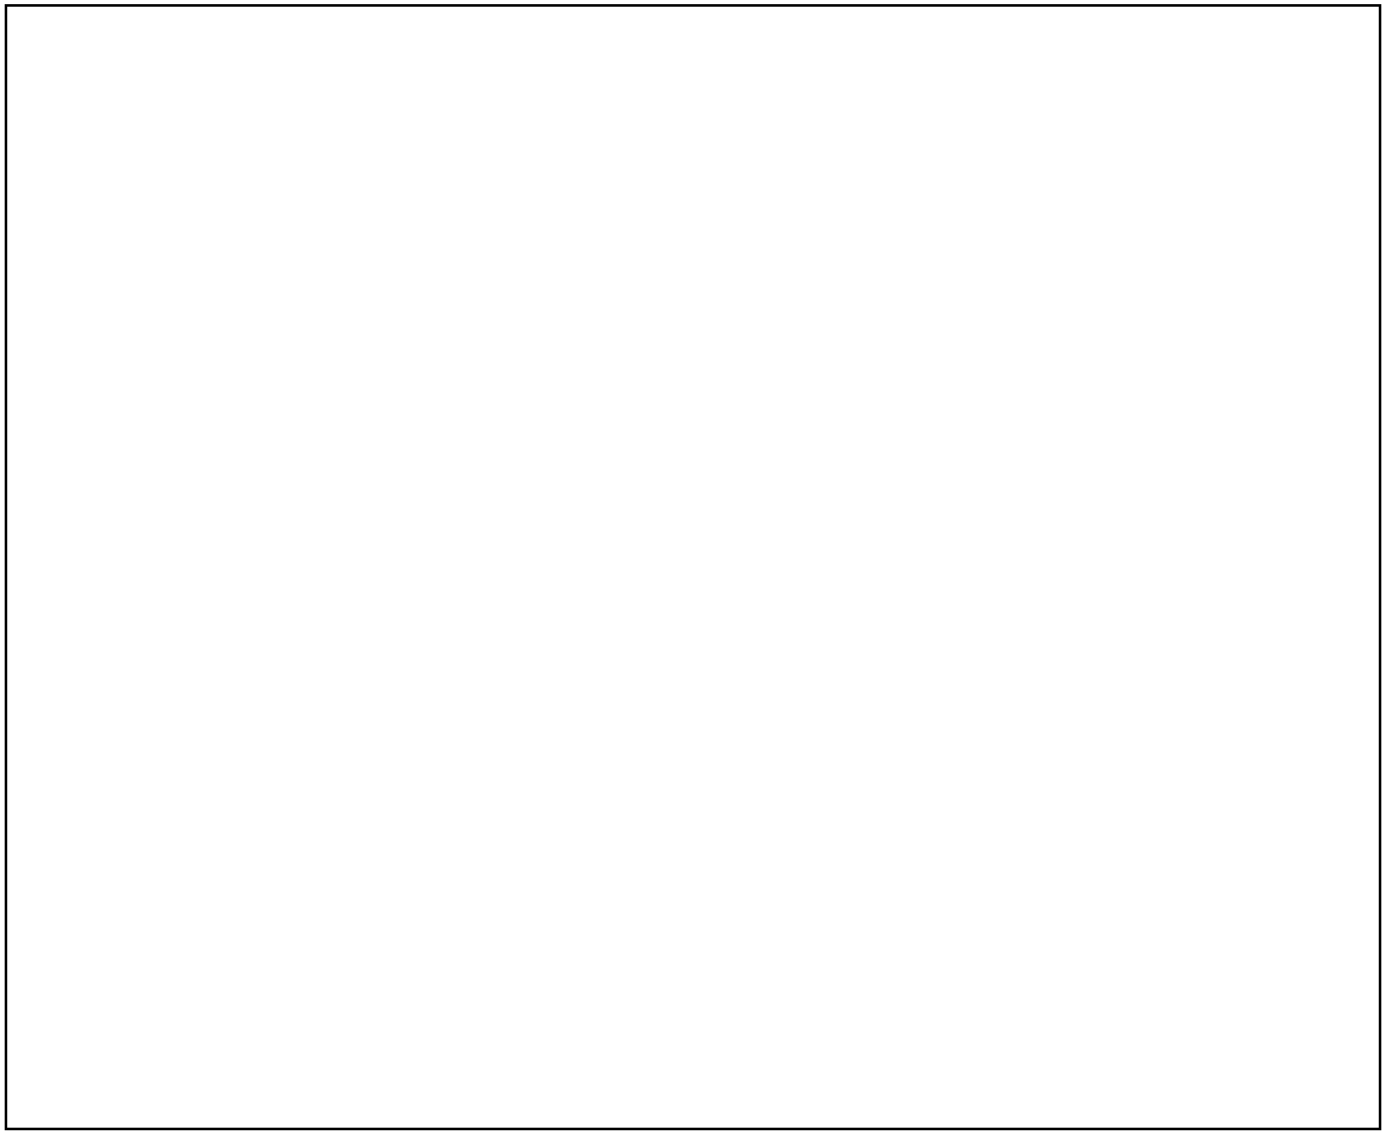
The Fund's Operating Agreement includes provisions that prohibit Class A Unit holders from any transfer of their Class A Units for five years after purchase. This provision complies with the regulatory position of the USCIS that the investment of each immigrant investor seeking residency through the EB-5 program remain "at-risk" for a least five years. The only transfers that will be honored by the Fund during the initial five years of your investment are transfers that occur as a result of death. After the first five years, the Operating Agreement provides that transfers cannot be made except with the consent of the Management Company. Even after five years, the Fund does not intend to create a market in its Class A Units, and you should assume that no trading market will ever exist. Accordingly, your interest will be extremely illiquid.

Most of the Fund's investments will be in private companies, some of which will not be mature companies. Typically, venture capital investments and investments in private companies involve substantially more risk than investments in well-established, publicly traded companies.

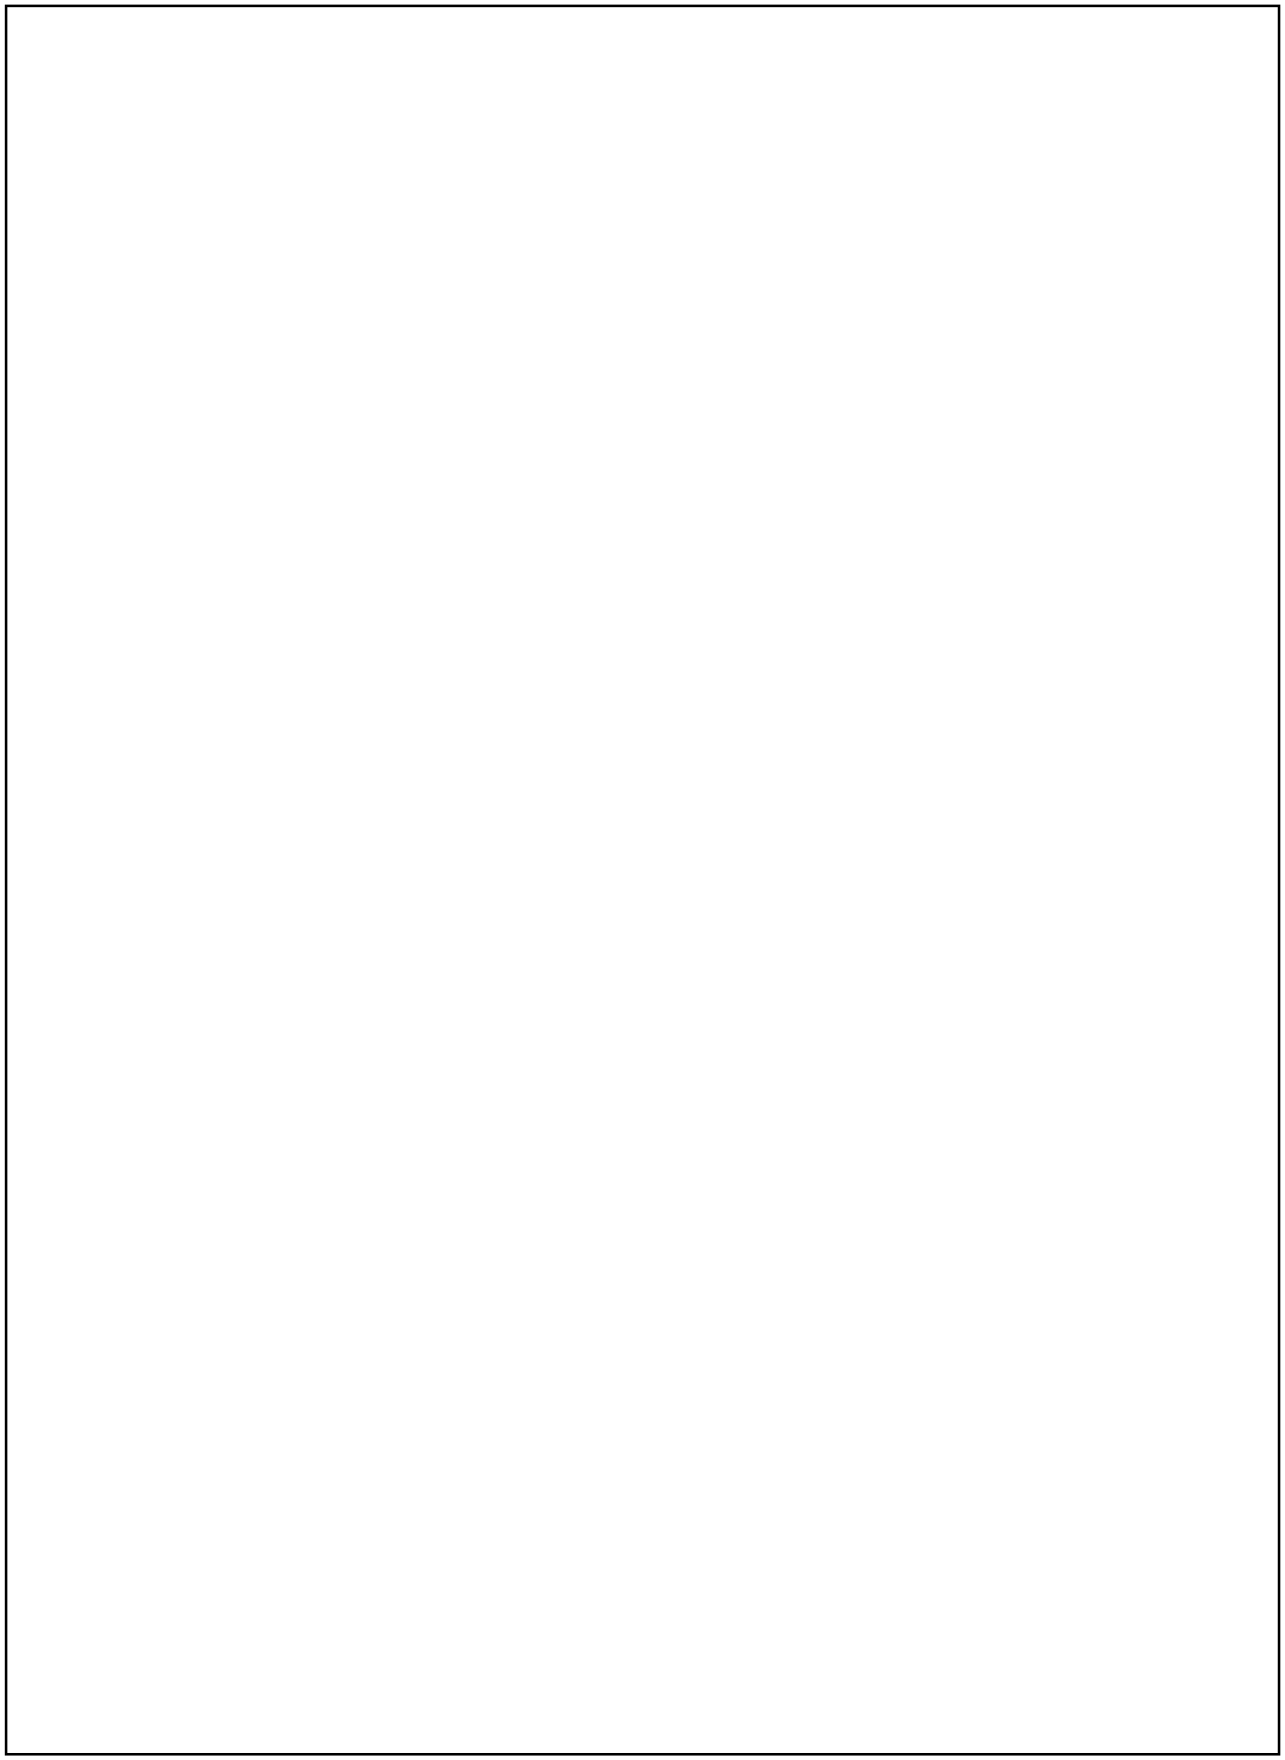
The types of debt and equity investments that the Fund anticipates making will often involve a high degree of risk. Generally, there is very little publicly available information about privately held or new companies, so the Fund will rely upon the skill

and judgment of the Management Company in choosing investments and negotiating their terms. Since there is no readily available public trading market in shares of private companies, there will be uncertainty in the Fund's ability to sell an unprofitable investment timely or liquidate a profitable investment at the best time.

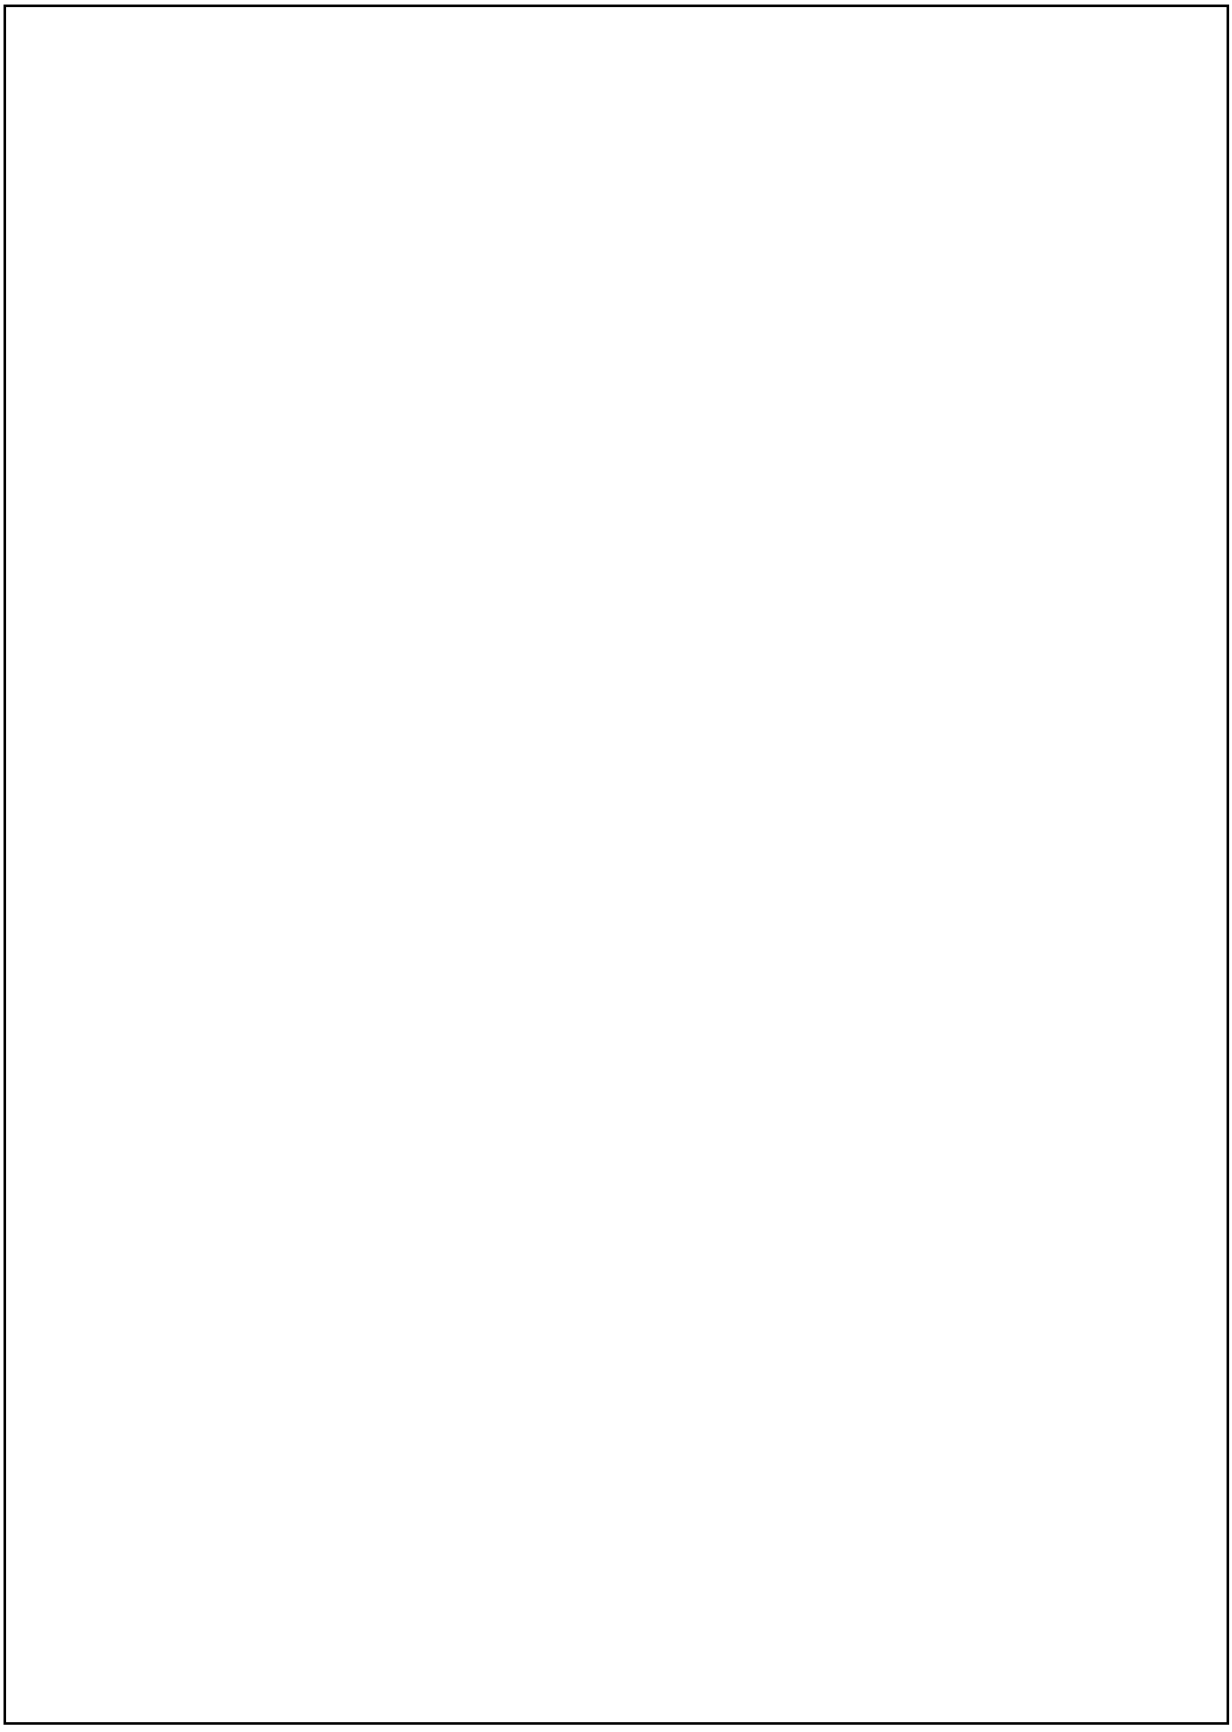
Early-stage and development stage companies often experience unexpected problems, requiring substantial amounts of financing, which may not be available through local banks or the capital markets. The percentage of such companies that survive and prosper can be small. Loans and equity investments that the Fund makes to these smaller companies present a greater risk of loss than loans to larger, more established companies. The principals of the Management Company have a long track record of investing in local companies that are early-stage, development stage and mature private companies. While the Management Company will seek to limit the Fund's exposure in this area, there can be no assurance that the Fund's portfolio companies will be successful. (b)(4)



(b)(4)



(b)(4)



(b)(4)

Immigration risks

Each purchaser of a Class A Unit must understand that the Fund, the Management Company and each of their affiliates make no representation or warranty of any kind concerning whether an investment in the Fund will meet the requirements of the EB-5 program or other U.S. immigration requirements. Each investor in a Class A Unit must further understand that there can be no assurance that an investment in the Class A Unit will result in his or her family receiving EB-5 conditional resident status or permanent resident status. Please carefully consider the following immigration risks, and discuss these and other immigration risks with your personal immigration lawyer.

As a Class A Unit holder, you will be subjected to certain general immigration risks faced by all immigrants to the United States.

The process of obtaining conditional resident status and permanent resident status involves many factors and circumstances that are not within the control of the Fund. These include the investor's past history and source of funds, immigration visa backlogs, potential changes in immigration laws and regulations (including laws and regulations specific to the EB-5 immigrant investor program) and quotas established by the United States government limiting the number of visas available to qualified individuals seeking conditional resident status under the EB-5 program. Although the Fund has been structured with the objective of providing Class A Unit holders with eligibility for conditional and permanent resident status under the EB-5 Regional Center provisions of the U.S. immigration laws, no assurance can be given that each Class A Unit holder will obtain approval of his or her particular immigrant application. Purchase of a Class A Unit does not guarantee temporary, conditional, or permanent residency in the United States. Furthermore, no assurances or advice can be given that conditional resident status will be converted to permanent resident status.

The EB-5 program and other immigration laws can be discontinued or changed at any time.

Immigration programs have long been part of the American history. However, the US Congress and/or other governmental agencies may discontinue some or all immigration programs, or the US Congress and/or other governmental agencies may change the requirements of existing or subsequent programs. Changes to and/or

elimination of immigration program(s) may adversely affect an EB-5 Immigrant Investor who invests in a Class A Unit.

The EB-5 immigrant investor program was created by the US Congress as the employment-based fifth preference immigrant visa category in 1990 for immigrants who invest in US companies and benefit the US economy. The US Congress and/or other government agencies may discontinue or change some or all of the EB-5 immigrant investor program. Changes to and/or elimination of the EB-5 immigrant investor program may adversely affect the holders of Class A Units.

The Regional Center Pilot Program under EB-5 is set to expire September 30, 2008, unless extended by Congress, and there is no assurance that the expiration of the program will not affect persons currently holding temporary residency status through an investment in a regional center.

The legislation authorizing EB-5 Regional Centers is a pilot program that was adopted in 1992 and briefly lapsed in September 2003 before Congress extended it in November 2003 for a further five-year period. The Regional Center pilot program will expire September 30, 2008 unless it is extended again by Congress. If Congress does not extend the Regional Center pilot program again, the effects on EB-5 Immigrant Investors and the Fund are uncertain.

Investment in the Class A Units is only a part of the requirement for meeting EB-5 residency status. In addition, the USCIS will require that you pass a background check.

Each immigrant investor in the United States is subjected to a thorough background check. An EB-5 Immigrant Investor's background (or that of an immediate family member) may not meet the USCIS criteria for temporary or permanent residency in the United States. For example, among other criteria, the following may be grounds for denial of immigration benefits for the immigrant, and/or other members of the immigrant's family: having a communicable disease (e.g., AIDS) or other dangerous contagious disease; having been at any time involved with, trafficking in, or taking, illegal drugs; having been convicted of certain crimes; having committed a fraud or misrepresentation to a U.S. Government official; or having violated U.S. Immigration law in the past.

It is a requirement of the EB-5 program that an immigrant investor's source of funds be proper, under U.S. immigration guidelines.

EB-5 Immigrant Investors must demonstrate to the USCIS that the funds they invest in the Class A Units were obtained through lawful means. Each EB-5 Immigrant Investor must document, to the satisfaction of the USCIS, that the source of funds is acceptable to the USCIS. The Fund, and the EB-5 Immigrant Investor's immigration attorney, may make a preliminary assessment, but the ultimate decision will be made solely by USCIS. Each EB-5 Immigrant Investor must agree to provide information and documents to the Fund, and to allow the Fund to make further investigation, concerning

the EB-5 Immigrant Investor's source of funds and the personal and business background of the EB-5 Immigrant Investor and accompanying family members.

Achieving your immigration goal of conditional and permanent resident status will require you to maintain your primary residence in the United States.

EB-5 Immigrant Investors who obtain conditional resident status or permanent resident status must intend to make the United States their primary residence. Conditional residents or permanent residents who maintain their primary residence outside the United States risk revocation of their US residence status.

Each prospective EB-5 Immigrant Investor should consult a competent immigration attorney to review the likelihood that the investor's immigration objectives will be achieved.

The foregoing risks do not purport to be a complete explanation of all the risks involved in acquiring a Class A Unit. Potential investors are urged to read this entire document and the Operating Agreement of the Fund before deciding whether to invest in the Fund.

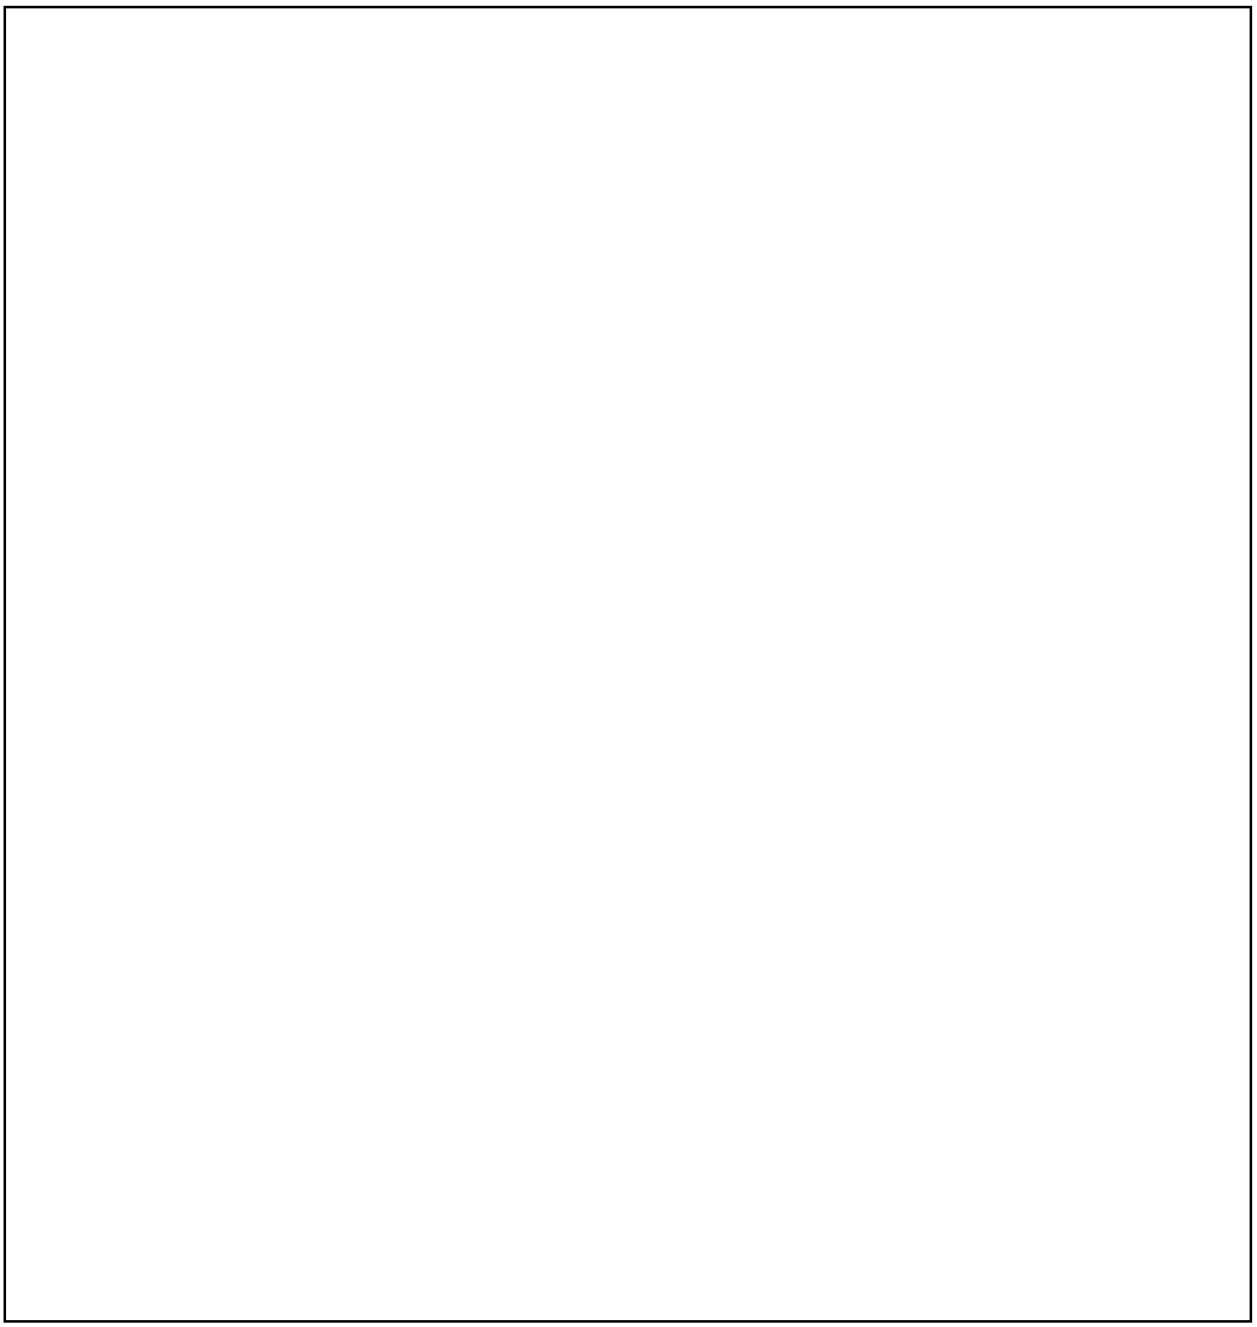
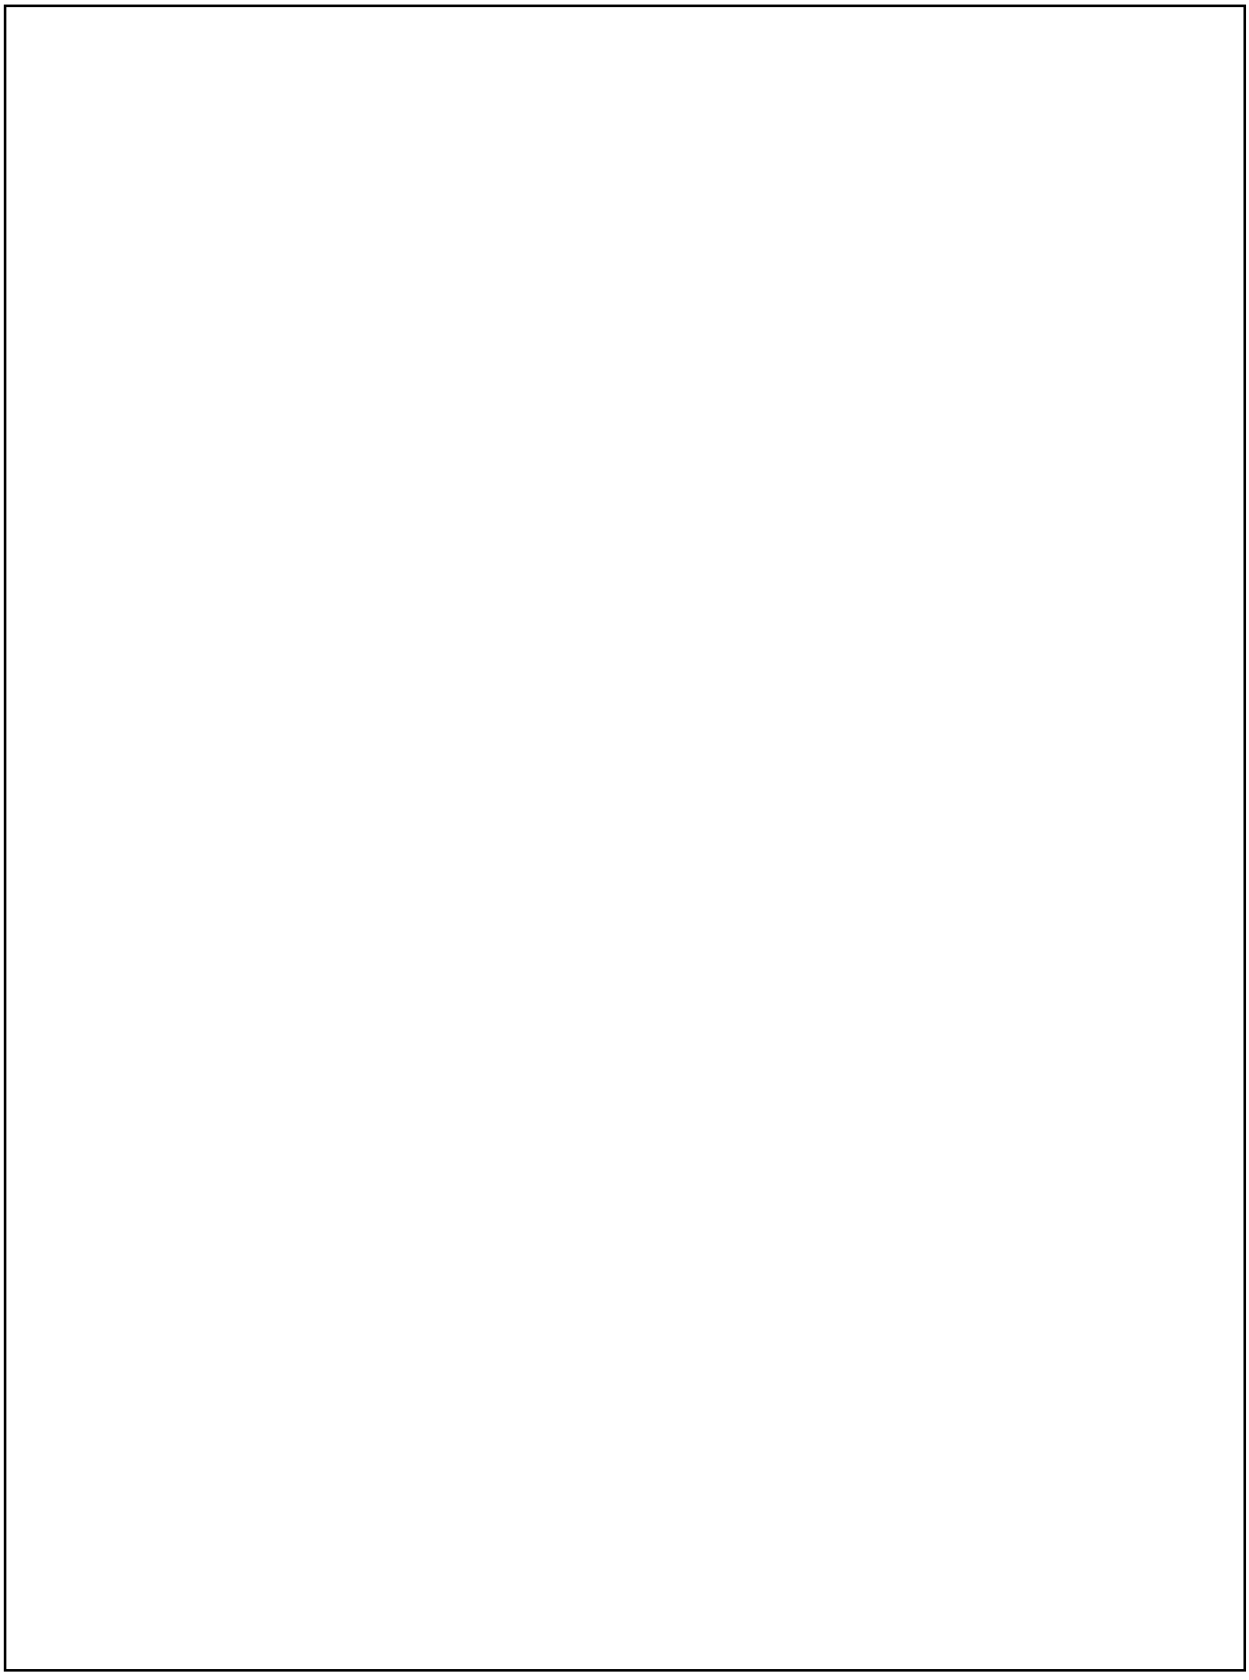
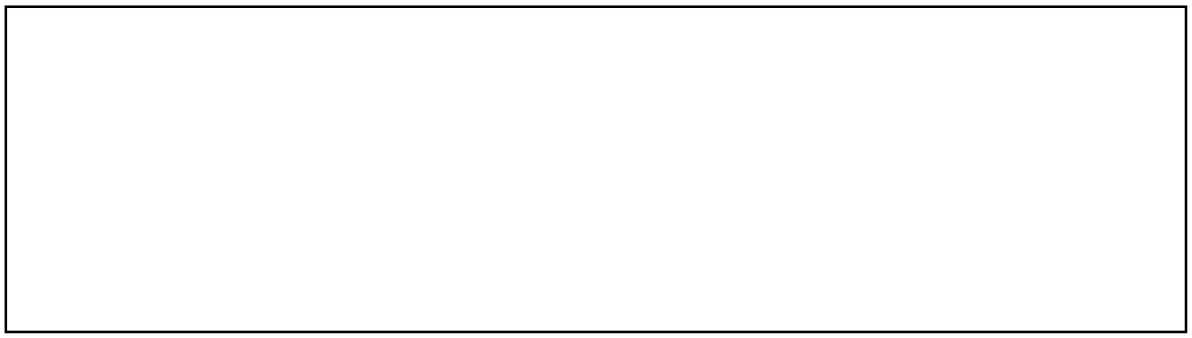
RIGHTS OF CLASS A UNIT HOLDERS

(b)(4)



(b)(4)





(b)(4)

CERTAIN U.S. FEDERAL INCOME TAX CONSIDERATIONS

The following discussion about certain U.S. federal income tax considerations that you should weigh prior to investing in a Class A Unit is merely a presentation of certain tax issues that generally apply to all investors in EB-5 funds. You should not consider this discussion to be tax advice, and you should consult with your personal tax advisor about these, and all other issues relevant to your personal decision to invest in a Class A Unit. Neither the Fund nor the Management Company is qualified to provide the tax advice you will need.

Tax status of the Fund

The Fund will be treated for U.S. federal income tax purposes as a partnership and not as an association taxable as a corporation.

Taxation of Class A and Class B unit holders on the Fund's income and loss

As a partnership for U.S. federal income tax purposes, the Fund will not itself be subject to U.S. federal income taxation. Instead, the holders of Class A and Class B Units will be required to take into account in computing their taxable income their allocable shares of the Fund's income, gains, losses, deductions and credits (collectively, "tax items") for the taxable year of the Fund ending within or with the taxable year of each unit holder. The amount of a unit holder's allocable share of Fund tax items that must be included in such unit holder's taxable income may exceed the distributions that the unit holder receives from the Fund during a taxable year. Any tax credits earned by the Fund will generally be allocated in accordance with the unit holders' shares of the losses or deductions arising from the expenditures that gave rise to the credits. Tax credits may be subject to the Code's limitations on losses and credits from passive activities as described below.

Tax treatment of sale of Class A Unit

Upon the sale or exchange of your Class A Unit, you will realize a taxable gain or loss depending upon the amount realized and your basis in the Class A Unit. Such gain or loss will be treated as a capital gain or loss if the Class A Unit is a capital asset in your hands, and will be long-term if your holding period for the Class A Unit is more than 12 months and otherwise would be short-term.

Backup withholding

The Fund may be required to withhold federal income tax at a rate of 31% ("backup withholding") from dividends and redemption proceeds paid to holders of Class A Units. This tax may be withheld from dividends if (i) the Unit holder fails to furnish the Fund with his or her correct taxpayer identification number (ii) the IRS notifies the Fund that the Unit holder has failed to report properly certain interest and dividend income to the IRS and to respond to notices to that effect, or (iii) when required to do so, the Unit holder fails to certify that he or she is not subject to backup withholding.

Redemption proceeds may be subject to withholding under the circumstances described in (i) above. Backup withholding is not an additional tax. Any amounts withheld under the backup withholding rules from payments made to a Unit holder may be credited against such Unit holder's federal income tax liability.

Notices

Unit holders will be notified annually by the Fund of the dividends, distributions and deemed distributions made by the Fund to its Class A Unit holders. Furthermore, Unit holders will be sent, if appropriate, various written notices after the close of the Fund's taxable year regarding certain dividends, distributions and deemed distributions that were paid (or that were treated as having been paid) by the Fund to its Unit holders during the preceding taxable year.

Restrictions on deductibility of operating expenses

Expenses of the Fund that relate to its investment activities (as opposed to its trade or business activities) will be considered investment expenses rather than trade or business expenses, with the result that a Class A Unit holder will be entitled to deduct his or her share of such expenses only to the extent such share, together with such unit holder's other "miscellaneous itemized deductions," exceeds 2% of such unit holder's adjusted gross income. Further, the amount in excess of that 2% floor is subject to the overall limitation on itemized deductions imposed by Section 68 of the Internal Revenue Code of 1986, as amended (the "Code"). Also, the portion of such unit holder's "miscellaneous itemized deductions" in excess of the 2% floor cannot be claimed as a deduction in computing the unit holder's alternative minimum tax.

Limitations on losses and credits from passive activities

Losses from passive trade or business activities generally may not be used to offset "portfolio income," *i.e.*, interest, dividends and royalties, or salary or other active business income. Deductions from passive activities may generally be used to offset income from passive activities. Interest deductions attributable to passive activities are treated as passive activity deductions, and not as investment interest. Thus, such interest deductions are subject to limitation under the passive activity loss rule and not under the investment interest limitation. Credits from passive activities generally are limited to the tax attributable to the income from passive activities. Passive activities include trade or business activities in which the taxpayer does not materially participate, which would include holding a Class A Unit in the Fund. Thus, a Class A Unit holder's share of the Fund's net income and net loss from its trade or business activities and rental activities will generally constitute income and loss from passive activities and will be subject to such limitation.

Losses (or credits that exceed the regular tax allocable to passive activities) from passive activities that exceed passive activity income are disallowed and can be carried forward and treated as deductions and credits from passive activities in subsequent

taxable years. Disallowed losses from an activity, except for certain dispositions to related parties, are allowed in full when the taxpayer disposes of his or her entire interest in the activity in a taxable transaction.

Other limitations on use of tax losses

Your ability to utilize any tax losses generated by the Fund, or to offset any income generated by the Fund with losses from other investments, may be limited under the "at risk" limitation in Section 465 of the Code.

Taxation of development activities and dealer property

Most of the Fund's costs and expenditures incurred with respect to any development projects, including land acquisition costs, construction costs, and interest on construction financing, would not be currently deductible, and instead must be capitalized to the cost basis in the project properties. If a property is held or developed primarily for sale to customers in the ordinary course of business ("Dealer Property"), the property generally will not be depreciable and gain on its sale will be ordinary income rather than capital gain. Ordinary income is taxed at ordinary rates up to 35.0% for individuals and corporations. The determination of whether a property is Dealer Property is a factual inquiry that takes into account all the particular facts and circumstances relating to each property. It is possible that some of the Fund's investments could be considered Dealer Property.

Adjusted tax basis for Class A Units

In general, your adjusted tax basis for U.S. federal income tax purposes in your Class A Unit will be equal to the aggregate amount of your capital contribution to the Fund ($500,000), (a) increased by your allocable share of (i) items of Fund taxable income and gain and (ii) any increase in your share of liabilities of the Fund and (b) reduced, but not below zero, by (i) your allocable share of items of the Fund's deductible expense and loss, (ii) the amount of cash or the amount of the tax basis of any property (other than cash) distributed to you by the Fund and (iii) any constructive distributions resulting from a reduction in your share of Fund liabilities.

You will generally not be subject to U.S. federal income tax on distributions from the Fund unless you receive a cash distribution in an amount that exceeds your adjusted tax basis in your Class A Unit. The amount of any such cash (or constructive distribution) in excess of your adjusted tax basis would be treated as gain from the sale or exchange of your interest in the Fund. In general, if you have held your interest for more than one year, any such gain would be long-term capital gain.

Sale or other disposition of property

In general, if the interests in real property or other assets held by the Fund constitute capital assets, any profit or loss realized by the Fund on a sale or exchange (except to the extent that such profit represents depreciation recapture taxable as ordinary income) will be treated as capital gain or loss under the Code. Capital gain that is equal

to or less than past depreciation (other than ordinary income recapture) taken on an asset will be taxed to individuals at 25%. Any additional capital gain attributable to property held more than 12 months will generally be taxed to individuals at 15%. If, however, it is determined that the assets sold constitute "Section 1231 assets" (such assets are capital assets involuntarily converted and depreciable business property held for more than 12 months), the gain or loss will not be capital gain or loss.

If the assets sold or involuntarily converted constitute Section 1231 assets, a Class A Unit holder would combine his or her distributive share of Fund gains or losses attributable to such assets with any other Section 1231 gains or losses realized by him or her in that year, and the resultant net Section 1231 gains or losses would be taxed as capital gains or constitute ordinary losses, as the case may be. This treatment may be altered depending on each unit holder's disposition of Section 1231 property over several years. In general, net Section 1231 gains are recaptured as ordinary income to the extent of net Section 1231 losses in the five preceding taxable years.

Unrelated business taxable income

Although pension plans, charities and certain other tax-exempt entities are generally exempt from U.S. federal income taxation, such entities are taxed on "unrelated business taxable income" ("UBTI"). UBTI is generally defined as the excess of income from any unrelated trade or business regularly conducted by such a tax-exempt entity (or by a partnership of which it is a partner) over the deductions attributable to such trade or business. Gain from the sale of Dealer Property is generally included in UBTI. In addition, if a pension plan, charity or other tax-exempt entity's acquisition of interests in the Fund is debt financed, or the Fund incurs "acquisition indebtedness," all or a portion of the income or gain attributable to the "debt financed property" would also be treated as UBTI. The Fund is expected to borrow to finance investments and may have gain from the sale of Dealer Property. Accordingly, the Fund expects to generate UBTI.

United States income tax considerations for foreign investors

The federal income tax treatment applicable to a nonresident alien investing in the Fund (until such investor becomes a resident of the United States) is highly complex and will vary depending on the particular circumstances of such investor and the effect of any applicable income tax treaties. Each foreign investor should consult his or her own tax advisor as to the advisability of investing in the Fund. The federal income tax treatment will generally depend on whether the Fund is deemed to be engaged in a U.S. trade or business. This determination must be made annually. The Code does not define what constitutes a U.S. trade or business; rather, this determination is based upon an examination of the facts and circumstances attending the Fund's operations and activities.

If in any year the Fund is deemed to be engaged in a U.S. trade or business, a foreigner holding a Class A Unit will also be considered to be engaged in a U.S. trade or business. Thus, the holder would be required to file a U.S. federal income tax return and would be subject to tax at graduated rates on its distributive share of net income from the Fund that was "effectively connected" with such trade or business. In determining the

Class A Unit holder's U.S. taxable income, the holder would be permitted the same deductions allowed a U.S. resident individual or corporation to the extent the deductions are effectively connected with a U.S. trade or business. However, a prerequisite to receiving the benefit of deductions is the filing of a true and accurate U.S. income tax return. If the Fund has "effectively connected" income that is allocable to a foreign investor, then the Fund must pay a federal withholding tax, presently equal to 35%, of the adjusted "effectively connected" taxable income that is allocable to that foreigner.

Under the Foreign Investment in Real Property Tax Act ("FIRPTA"), nonresident aliens are subject to withholding on dispositions of U.S. real property interests. For this purpose, U.S. real property owned by the Fund will be treated as held proportionately by its unit holders. Therefore, a foreign holder of a Class A Unit may be subject to withholding when such holder sells or exchanges his or her interest to a U.S. person. The Fund is generally required to deduct and withhold from any cash distribution an amount presently equal to 35% for U.S. tax purposes to the extent the distribution is attributable to gain from the sale of a U.S. real property that is allocable to a foreigner.

Tax Consequences of U.S. conditional or permanent resident status

If any EB-5 Immigrant Investor obtains conditional U.S. resident status (and eventual U.S. permanent resident status), such EB-5 Immigrant Investor will become a tax resident of the United States pursuant to the "green card" test of Section 7701(b) of the Code, and his or her worldwide income, whether or not derived or earned within the United States, will become subject to U.S. federal income taxes. Additionally, such EB-5 Immigrant Investor may also become subject to United States gift and estate tax laws.

Reportable transactions regulation

Treasury regulations impose special reporting rules for "reportable transactions." A reportable transaction includes, among other things, a transaction in which an advisor limits the disclosure of the tax treatment or tax structure of the transaction and receives a fee in excess of certain thresholds. The Management Company believes and intends to take the position that an investment in the Fund does not constitute a reportable transaction. If it were determined that an investment in the Fund does constitute a reportable transaction, each Class A Unit holder would be required to complete and file IRS Form 8886 with such holder's tax return for the tax year that includes the date that such holder acquired his or her Class A Unit. The Management Company reserves the right to disclose certain information about the holders of Class A Units and the Fund to the IRS on Form 8886, including the holders' capital commitments, tax identification numbers (if any), and dates of admission to the Fund, to facilitate compliance with the reportable transaction rules if necessary. In addition, the Fund may engage in certain transactions which themselves constitute reportable transactions and with respect to which both the Fund and Class A Unit holders may be required to file Form 8886. Certain states have similar reporting requirements and may impose penalties for failure to report. Prospective investors should consult their tax advisors for advice concerning compliance with the reportable transaction regulations.

State and local tax consequences

Prospective investors should also consider the state and local tax consequences of an investment in the Fund. State and local laws often differ from U.S. federal income tax laws with respect to the treatment, calculation and timing of recognition of specific tax items. The Fund will own property in Louisiana and Mississippi. Class A Unit holders may be required to file state income tax returns and pay tax in those states.

IRS Circular 230 Disclaimer

This summary was not intended or written to be used, and cannot be used, by any investor for the purpose of avoiding tax penalties that may be imposed on the investor. This summary was written to support the promotion or marketing of interests in the Fund. Each prospective investor should seek advice based on the investor's circumstances from an independent tax advisor.

PROSPECTIVE INVESTORS ARE ADVISED TO CONSULT THEIR OWN TAX ADVISERS CONCERNING FOREIGN, FEDERAL, STATE AND LOCAL TAX MATTERS, AND WITH RESPECT TO THE PARTICULAR TAX CONSEQUENCES TO THEM OF AN INVESTMENT IN THE FUND.

APPENDIX B

IMMIGRATION APPENDIX

This section provides a summary of the EB-5 immigration procedures. In addition to this section, please review the section of this document titled "Risk Factors", as well as this and other Fund documents with a highly qualified and experienced immigration attorney of your choice.

Overview of Application Process

The process of obtaining permanent resident status through the Regional Center pilot program involves three steps. The first step involves filing Form I-526, an "Immigrant Petition by Alien Entrepreneur" (the "I-526 Petition") with the United States (US) Department of Homeland Security (DHS) Citizenship and Immigration Service (USCIS, formerly Immigration and Naturalization Service (INS)). If an immigrant investor's I-526 Petition is approved, the next step involves an immigrant visa application at a U.S. Consulate in the immigrant investor's country of residence or an application for adjustment of status through the USCIS if the immigrant investor is already in the United States in a lawful immigration status. Upon review and approval of all documents submitted, the immigrant investor may be issued an immigrant visa which will permit him to be admitted as a Conditional Resident (Green Card holder), or if eligible for adjustment of status, the immigrant investor may be granted Conditional Resident status without leaving the United States. The immigrant investor's Conditional Resident status will then continue for a period of two years.

The final step in the immigration process is filing Form I-829, a "Petition by Entrepreneur to Remove Conditions" ("I-829 Petition") within ninety (90) days before the end of the two-year conditional residence period. If the I-829 Petition is approved the immigrant investor becomes a Permanent Resident of the U.S.

Reduced Investment in Targeted Employment Area

To qualify for the EB-5 immigrant investor program, U.S. immigration laws normally require each immigrant Investor to make a minimum investment of $1,000,000. However, investments in certain Targeted Employment Areas (TEA), such as a designated "rural area" or "area of high unemployment," qualify for a reduced level of minimum investment. The minimum investment amount in a Targeted Employment Area is $500,000 per immigrant investor. The Fund will conduct all its business in a Targeted Employment Area and thus qualifies for the reduced minimum investment amount of $500,000.

Indirect Job Creation in Regional Centers

To stimulate interest in the EB-5 program, which has historically been under-used, in 1992 Congress enacted an EB-5 Regional Center pilot program. The pilot program allows cities, states, and other entities to apply to the USCIS for Regional Center status. Immigrant Investors who invest in Regional Centers may include both direct and

indirect job creation in calculating job creation in the EB-5 program. By contrast, investors investing in their own companies must show that they will create 10 or more jobs directly.

USCIS has designated the states of Louisiana and Mississippi as a Regional Center, and authorized the Management Company to operate within this region.

Selection of Immigration Attorney

For the immigrant investors' convenience, the Fund has made arrangements with several experienced immigration attorneys who are available to assist the immigrant investors in filing their I-526 Petition, their applications for immigrant visas or adjustment of status, and the follow-up I-829 Petition. Immigrant investors are free to choose another immigration attorney if they so desire. The Fund strongly encourages each immigrant investor to use an immigration attorney who has experience with the EB-5 program.

I-526 Petition

The Fund will provide the immigrant investor's attorney with documents and information relevant to the Fund that the attorney will need to prepare the immigrant investor's I-526 Petition. The attorney will need to secure additional biographical data, source of funds data, and other financial and background data from the immigrant investor. Once the attorney has all the data and supporting documents necessary to complete the I-526 Petition, the attorney will submit it to the USCIS for approval. The USCIS processing of the I-526 Petition generally takes between ninety to three hundred and sixty five days to complete.

Immigrant Visa Application Outside the United States

If the USCIS approves the I-526 Immigrant Petition and the immigrant investor chooses to apply for an immigrant visa outside the United States, the USCIS notifies the US Department of State's National Visa Center that the I-526 Petition has been approved. The National Visa Center will send a notification to the U.S. Consulate in the country where the immigrant investor lives, and will send out visa application documents for the immigrant investor to complete. The immigrant investor's immigration attorney will again work with the immigrant investor to complete these forms. Once these forms are completed, they will be filed with the National Visa Center, or in some cases directly with the U.S. Consulate.

The next step involves scheduling of the immigrant investor's immigrant visa interview at the U.S. Consulate, and the completion of one final set of visa processing documents which the immigration attorney will help the immigrant investor to complete. The immigrant investor will then have an interview with a U.S. consular officer at the U.S. Consulate. If the immigrant visa application is approved, the immigrant visa generally is issued to the applicant on the day of the interview or a few days later. The processing time between USCIS approval of the I-526 Petition and immigrant visa issuance by the U.S. Consulate is generally between ninety to one hundred eighty days.

After the immigrant visa is issued, the immigrant investor must enter the U.S. within 180 days after the date of issuance of the visa to finalize the process. Upon entry into the U.S., the immigrant investor will be processed at the initial U.S. port of entry as a "Conditional Resident." A stamp will be placed in the immigrant investor's passport to prove that he or she holds "Conditional Resident" status. The immigrant investor's "green card" (it is actually blue and pink) will be sent to the immigrant investor in approximately one to four months.

Adjustment of Status Within the United States

An immigrant investor who is present in the United States in a lawful immigration status may choose to apply for adjustment of status in the United States instead of applying for an immigrant visa at a U.S. Consulate outside the United States. With certain exceptions, adjustment of status is not allowed if the immigrant investor has ever worked without authorization in the United States, remained longer than authorized in the United States, or otherwise failed to maintain lawful immigration status in the United States.

An immigrant investor who chooses to apply for adjustment of status must complete application forms similar to those required for an immigrant visa application at a U.S. Consulate. The immigrant investor's immigration attorney will work with the immigrant investor to complete these forms. The immigrant investor must wait until the USCIS approves the I-526 petition before filing the adjustment of status application with the USCIS. The immigrant investor can remain in the United States while the USCIS processes the adjustment of status application, and can obtain authorization to work in the United States approximately ninety (90) days after filing the application. The USCIS processing of the adjustment of status application generally takes between one hundred and eighty (180) to three hundred and sixty five days (365) days to complete. The immigrant investor may need to appear in person for an interview at a USCIS office in the United States, or the application may be approved without an interview. If the adjustment of status application is approved, the immigrant investor will be granted "Conditional Resident" status without leaving the United States, and the "green card" will be sent to the immigrant investor in approximately one to four months.

I-829 Petition

The immigrant investor's "Conditional Resident" status will continue for two years. During the ninety (90) day period prior to the end of this two-year period, the immigrant investor must file an I-829 Petition to convert his Conditional Resident status to Permanent Resident status. The immigrant investor's immigration attorney will again help the immigrant investor with this immigration procedure, completing the forms and gathering other information from the immigrant investor and the Fund to support the petition. The Fund will provide the attorney with documents to confirm the immigrant investor's investment in the Fund and the jobs that were created by the investment. The USCIS typically takes between ninety (90) to three hundred and sixty five (365) days to process the I-829 Petition.

In deciding whether to approve the I-829 Petition, the USCIS will review, among other things, whether the immigrant investor invested the required minimum amount of capital in the Fund, whether this capital has remained invested with the Fund, whether the Fund created the necessary number of direct or indirect jobs, and whether these job creation credits have been properly allocated to the immigrant investor. If the USCIS determines that any of these conditions have not been satisfied, the I-829 Petition may be denied and the immigrant investor's Conditional Resident status may be terminated.

Upon approval of the immigrant investor's I-829 Petition, the immigrant investor's Conditional Resident status will be converted to unrestricted Permanent Resident status.

Eligibility for United States Citizenship

Upon the fifth anniversary of the immigrant investor's obtaining Conditional Resident status, the immigrant investor may become eligible to apply for U.S. citizenship. To become eligible for U.S. citizenship, the immigrant investor must maintain his primary residence in the United States for five years, and must be physically present in the United States at least half of the days during this five-year period. There is no requirement to apply for U.S. citizenship, and the immigrant investor may choose to remain in Permanent Resident status indefinitely.

Conditional and Permanent Resident Status for Investors' Spouse and Unmarried Minor Children

Each immigrant investor may also apply for Conditional Resident status for his or her spouse and unmarried children who are under the age of 21. The application for the spouse and children can be prepared and processed concurrently with the immigrant investor's application, or they may apply later. The immigrant investor's immigration attorney will assist the immigrant investor in preparing applications for the immigrant investor's spouse and children.

The Conditional Resident status granted to an immigrant investor's spouse and children will be valid for the same two-year period as the Conditional Resident status granted to the immigrant investor. So long as the immigrant investor's children are unmarried and under the age of 21 at the time they obtain Conditional Resident status, their status will continue to be valid if they marry or reach the age of 21. The Conditional Resident status granted to an immigrant investor's spouse will continue to be valid even if the immigrant investor and spouse are later divorced.

When an immigrant investor files the I-829 Petition, the spouse and children can be included in that petition. If the I-829 Petition is approved, their Conditional Resident status is converted to Permanent Resident status. A child that has married or reached the age of 21, or a divorced spouse, remains eligible to convert Conditional Resident status to Permanent Resident status.

Mr. Morrie Berez
Chief, Adjudications Officer
Investor and Regional Center Program
Office of Program and Regulations Development
U.S. Department of Homeland Security
111 Massachusetts Ave., N.W., 3rd Fl., Ste. 3000
Washington DC 20529

Re: EB-5 Program

Dear Mr. Berez:

As we assess the state of affairs in Louisiana two years post-Katrina, we see progress on several fronts, yet there is so much that remains to be done. In particular, our state needs to increase dramatically the number of available jobs so that displaced Louisiana citizens can return to their home state. As Governor, I understand the limitations on available federal dollars and have been looking for mechanisms by which we can attract private equity into the storm affected areas, specifically for the purpose of creating the jobs necessary for our recovery.

I have studied the EB-5 immigrant investor program and commend you for the positive steps you have taken to strengthen and grow the program. It is my belief the EB-5 program can provide the private equity to cultivate the jobs the state of Louisiana needs to permit its citizens to return home. I believe this will accomplish the goals for which the regional center program was intended – using foreign investor dollars to create quality employment in targeted employment areas.

As Governor of Louisiana, I encourage the Department of Homeland Security and USCIS to allow for a regional center that serves all of the state of Louisiana. In Louisiana, when one combines the areas of high unemployment, the areas devastated by Hurricanes Katrina and Rita, and those areas designated rural areas, essentially all of the state qualifies for the program. Therefore, for purposes of the EB-5 program, I designate the state of Louisiana, in its entirety, a targeted employment area. I would further request that the Department of Homeland Security and USCIS evaluate any regional center applications from this area as quickly as possible so that investor dollars can be put to use immediately.

Sincerely,

Kathleen Babineaux Blanco

Kathleen Babineaux Blanco
Governor

Re: Proposal for Designation of Gulf Coast Funds Management (GCFM) as a USCIS recognized Regional Center under the Immigrant Investor Pilot Program

BACKGROUND:

Pursuant to Section 610 of the Appropriations Act of 1993, on January 17, 2008, Gulf Coast Funds Management (GCFM) submitted a proposal seeking approval and designation by U.S. Citizenship and Immigration Services (USCIS) of the GCFM Regional Center (GCFM-RC), with a geographic area focusing on the entirety of the states of Mississippi and Louisiana. The GCFM-RC for EB-5 Immigrant Investor purposes shall focus investment in the following three target industry economic clusters:

1. Shipbuilding;
2. Food Processing; and
3. Manufacturing.

The initial proposal contained the following evidence in support of its requested designation:

- A Job Creation Analysis and Econometric Model prepared by a professional economic analysis firm which specifically calculates but excludes construction jobs from the detailed prediction;
- A business plan reflecting the timing, scale and planned use of the alien investor capital;
- A sample Private Placement Memorandum;
- A sample Operating Agreement;
- A sample Subscription Agreement; and
- A sample Management Agreement.

DECISION:

Based on its review and analysis of your January 17, 2008 proposal, and of your response to the USCIS Request For Evidence of August 1, 2008, to which you provided a supplemental business plan, and a more in-depth and comprehensive economic and job creation analysis relating to the two-state scope and economic impacts, USCIS hereby approves and designates GCFM as a Regional Center within the Immigrant Investor Pilot Program with a geographic scope which includes the entire states of Mississippi and Louisiana.

FOCUS OF INVESTMENT ACTIVITY AND CAPITAL INVESTMENT THRESHOLD:

The USCIS-approved focus of the GCFM-RC business plan and job creation analysis and multipliers is to generate immigrant investor capital into the following target industry commercial enterprise activities within Mississippi and Louisiana:

1. Shipbuilding;
2. Food Processing; and
3. Manufacturing.

As such, aliens seeking immigrant visas through the Immigrant Investor Pilot Program may file individual petitions with USCIS for these commercial enterprises located within the GCFM-RC area comprised of the states of Mississippi and Louisiana. The geographic focus of this area contains numerous High Unemployment Targeted Employment Areas (TEA) as designated by the States of Mississippi and Louisiana, and rural TEA's as defined in 8 CFR 204.6(e). Therefore, the minimum capital investment threshold for any individual immigrant investment into an approved commercial enterprise throughout the Regional Center shall be not less than $500,000, if the investment target is located within a TEA or $1,000,000 if located outside of a TEA.

EMPLOYMENT CREATION:

Immigrant investors who file petitions for commercial enterprises located in the GCFM-RC area must fulfill all of the requirements set forth in 8 CFR 204.6, except that the petition need not show that the new commercial enterprises created ten new jobs indirectly as a result of the immigrant investor's investment. This determination has been established by way of USCIS' acceptance of the final economic analysis that is contained as part of the approved GCFM-RC proposal and its indirect job creation model and multipliers contained within the final approved GCFM-RC application package.

In addition, where job creation or preservation of existing jobs is claimed based on a multiplier rooted in underlying new "direct jobs" in support of an immigrant investor's individual I-526 petition affiliated with the GCFM-RC, then:

- To be credited with projected creation of new "direct" jobs for "qualifying employees" upon filing the I-526 petition, then the petition must be supported by a comprehensive detailed business plan and supporting financial, marketing and related data and analysis providing a reasonable basis for projecting creation of any new direct jobs for "qualifying employees" to be achieved/realized within two years pursuant to 8 CFR 204.6(j)(4)(B).

For purposes of an alien investor's filing of a subsequent I-829 petition to remove the conditions wherein the investment through the GCFM-RC in an enterprise for which the initial I-526 petition approval involved the creation of new direct jobs or the creation of new indirect jobs based on a multiplier tied to underlying new direct jobs, then to support the full number of direct and indirect new jobs being claimed at that point, an alien's subsequent I-829 petition will need to be supported by probative evidence of the number of new direct full time (35 hours per week) for qualified employees whose positions have been created as a result of the alien's investment. Such evidence may include copies of quarterly state employment tax reports, Forms W-2, Forms I-9, and any other pertinent employment records sufficient to demonstrate the number of qualified employees whose jobs were created directly.

Each individual petition, in order to demonstrate that it is associated with the GCFM-RC , in conjunction with addressing all the requirements for an individual immigrant investor petition, shall also contain as supporting evidence relating to this amended regional center designation, the following:

1. A copy of this letter for the GCFM-RC approval and designation.

2. A copy of the USCIS approved regional center narrative proposal and business plan.[1]

3. A copy of the job creation methodology required in 8 CFR 204.6(j)(4)(iii), as contained in the final regional center economic analysis which has been approved by USCIS, which reflects that investment by an individual immigrant investor will create not fewer than ten (10) full-time employment positions, either directly or indirectly, per each immigrant investor.

4. A legally executed copy of the USCIS approved:

    a. Private Placement Memorandum;
    b. Subscription Agreement;

[1]With respect to an individual I-526 individual investor petition, for any large scale high impact investor manufacturing or processing projects such as a shipyard, other large-scale manufacturing or processing plants, the detailed business plan should also address or reflect those project critical factors associated with infrastructure required to support operations on the scale proposed, in terms of roads, rail tracks and facilities, port capacity, water, sewage, electrical power capacity to meet the projected demand imposed by the envisioned facility, fire fighting services and capabilities, and environmental impact issues.

c. Operating Agreement; and
d. Management Agreement.

DESIGNEE'S RESPONSIBILITIES INHERENT IN CONDUCT OF THE GCFM-RC REGIONAL CENTER:

The law, as reflected in the regulations at 8 CFR 204.6(m)(6), requires that an approved regional center in order to maintain the validity of its approval and designation must continue to meet the statutory requirements of the Immigrant Investor Pilot Program by serving the purpose of promoting economic growth, including increased export sales (where applicable), improved regional productivity, job creation, and increased domestic capital investment. Therefore, in order for USCIS to determine whether your regional center is in compliance with the above cited regulation, and in order to continue to operate as a USCIS approved and designated regional center, your administration, oversight, and management of your regional center shall be such as to monitor all investment activities under the sponsorship of your regional center and to maintain records, data and information on a quarterly basis in order to report to USCIS upon request the following year to date information for each Federal Fiscal Year[2], commencing with the initial year as follows:

1. Provide the principal authorized official and point of contact of the regional center responsible for the normal operation, management and administration of the regional center.

2. Be prepared to explain how you are administering the regional center and how you will be actively engaged in supporting a due diligence screening of its alien investors' lawful source of capital and the alien investor's ability to fully invest the requisite amount of capital.

3. Be prepared to explain the following:

    a. How the regional center is actively engaged in the evaluation, oversight and follows up on any proposed commercial activities that will be utilized by alien investors.

    b. How the regional center is actively engaged in the ongoing monitoring, evaluation, oversight and follows up on any investor commercial activity affiliated through the regional center that will be utilized by alien investors in order to create direct and/or indirect jobs through qualifying EB-5 capital investments into commercial enterprises within the regional center.

4. Be prepared to provide:

    a. the name, date of birth, petition receipt number, and alien registration number (if one

[2] A Federal Fiscal Year runs for twelve consecutive months from October 1st to September 30th.

has been assigned by USCIS) of each principal alien investor who has made an investment and has filed an EB-5/I-526 Petition with USCIS, specifying whether:

i. the petition was filed,
ii. is pending,
iii. was approved,
iv. denied, or
v. withdrawn by the petitioner, together with the date(s) of such event.

b. The total number of visas represented in each case for the principal alien investor identified in 4.a. above, plus his/her dependents (spouse and children) for whom immigrant status is sought or has been granted.

c. The country of nationality of each alien investor who has made an investment and filed an EB-5/I-526 petition with USCIS.

d. The U.S. city and state of residence (or intended residence) of each alien investor who has made an investment and filed an EB-5/I-526 petition with USCIS.

e. For each alien investor listed in item 4.a., above, identify the following:

i. the date(s) of investment in the commercial enterprise;

ii. the amount(s) of investment in the commercial enterprise; and

iii. the date(s), nature, and amount(s) of any payment/remuneration/profit/return on investment made to the alien investor by the commercial enterprise and/or regional center from when the investment was initiated to the present.

5. Be prepared to identify/list each of the target industry categories of business activity within the geographic boundaries of your regional center that have:

a. received alien investors' capital, and in what aggregate amounts;

b. received non-EB-5 domestic capital that has been combined and invested together, specifying the separate aggregate amounts of the domestic investment capital;

c. of the total investor capital (alien and domestic) identified above in 5.a and 5.b, identify and list the following:
i. The name and address of each "direct" job creating commercial enterprise.
ii. The industry category for each indirect job creating investment activity.

6. Be prepared to provide:

a. The total aggregate number of approved EB-5 alien investor I-526 petitions per each

Federal Fiscal Year to date made through your regional center.

b. The total aggregate number of approved EB-5 alien investor I-829 petitions per each Federal Fiscal Year to date through your regional center.

7. The total aggregate sum of EB-5 alien capital invested through your regional center for each Federal Fiscal Year to date since your approval and designation.

8. The combined total aggregate of "new" direct and/or indirect jobs created by EB-5 investors through your regional center for each Federal Fiscal Year to date since your approval and designation.

9. If applicable, the total aggregate of "preserved" or saved jobs by EB-5 alien investors into troubled businesses through your regional center for each Federal Fiscal Year to date since your approval and designation.

10. If for any given Federal Fiscal Year your regional center did or does not have investors to report, then provide:

    a. a detailed written explanation for the inactivity,

    b. a specific plan which specifies the budget, timelines, milestones and critical steps to:

        i. actively promote your regional center program,

        ii. identify and recruit legitimate and viable alien investors, and

        iii. a strategy to invest into job creating enterprises and/or investment activities within the regional center.

11. Regarding your website, if any, please be prepared to provide a hard copy which represents fully what your regional center has posted on its website, as well as providing your web address. Additionally, please provide a packet containing all of your regional center's hard copy promotional materials such as brochures, flyers, press articles, advertisements, etc.

12. Finally, please be aware that it is incumbent on each USCIS approved and designated regional center, in order to remain in good standing, to notify the USCIS Foreign Trader, Investor & Regional Center Program within 15 business days at USCIS.ImmigrantInvestorProgram@dhs.gov of any change of address or occurrence of any material change in:

- the name and contact information of the responsible official and/or Point of Contact (POC) for the RC

- the management and administration of the RC,
- the RC structure,
- the RC mailing address, web site address, email address, phone and fax number,
- the scope of the RC operations and focus,
- the RC business plan,
- any new, reduced or expanded delegation of authority, MOU, agreement, contract, etc. with another party to represent or act on behalf of the RC,
- the economic focus of the RC, or
- any material change relating to your regional center's basis for its most recent designation and/or reaffirmation by USCIS.

If you have any questions concerning the GCFM-RC approval and designation under the Immigrant Investor Pilot Program, please contact the USCIS Foreign Trader, Investor and Regional Center Program by Email at USCIS.ImmigrantInvestorProgram@dhs.gov.

Sincerely,

for Barbara Q. Velarde

Re: Proposal for Designation of Gulf Coast Funds Management (GCFM) as a USCIS recognized Regional Center under the Immigrant Investor Pilot Program

BACKGROUND:

Pursuant to Section 610 of the Appropriations Act of 1993, on January 17, 2008, Gulf Coast Funds Management (GCFM) submitted a proposal seeking approval and designation by U.S. Citizenship and Immigration Services (USCIS) of the GCFM Regional Center (GCFM-RC), with a geographic area focusing on the entirety of the states of Mississippi and Louisiana. The GCFM-RC for EB-5 Immigrant Investor purposes shall focus investment in the following three target industry economic clusters:

1. Shipbuilding;
2. Food Processing; and
3. Manufacturing.

The initial proposal contained the following evidence in support of its requested designation:

- A Job Creation Analysis and Econometric Model prepared by a professional economic analysis firm which specifically calculates but excludes construction jobs from the detailed prediction;
- A business plan reflecting the timing, scale and planned use of the alien investor capital;
- A sample Private Placement Memorandum;
- A sample Operating Agreement;
- A sample Subscription Agreement; and
- A sample Management Agreement.

DECISION:

Based on its review and analysis of your January 17, 2008 proposal, and of your response to the USCIS Request For Evidence of August 1, 2008, to which you provided a supplemental business plan, and a more in-depth and comprehensive economic and job creation analysis relating to the two-state scope and economic impacts, USCIS hereby approves and designates GCFM as a Regional Center within the Immigrant Investor Pilot Program with a geographic scope which includes the entire states of Mississippi and Louisiana.

FOCUS OF INVESTMENT ACTIVITY AND CAPITAL INVESTMENT THRESHOLD:

The USCIS-approved focus of the GCFM-RC business plan and job creation analysis and multipliers is to generate immigrant investor capital into the following target industry commercial enterprise activities within Mississippi and Louisiana:

1. Shipbuilding;
2. Food Processing; and
3. Manufacturing.

As such, aliens seeking immigrant visas through the Immigrant Investor Pilot Program may file individual petitions with USCIS for these commercial enterprises located within the GCFM-RC area comprised of the states of Mississippi and Louisiana. The geographic focus of this area contains numerous High Unemployment Targeted Employment Areas (TEA) as designated by the States of Mississippi and Louisiana, and rural TEA's as defined in 8 CFR 204.6(e). Therefore, the minimum capital investment threshold for any individual immigrant investment into an approved commercial enterprise throughout the Regional Center shall be not less than $500,000, if the investment target is located within a TEA or $1,000,000 if located outside of a TEA.

EMPLOYMENT CREATION:

Immigrant investors who file petitions for commercial enterprises located in the GCFM-RC area must fulfill all of the requirements set forth in 8 CFR 204.6, except that the petition need not show that the new commercial enterprises created ten new jobs indirectly as a result of the immigrant investor's investment. This determination has been established by way of USCIS' acceptance of the final economic analysis that is contained as part of the approved GCFM-RC proposal and its indirect job creation model and multipliers contained within the final approved GCFM-RC application package.

In addition, where job creation or preservation of existing jobs is claimed based on a multiplier rooted in underlying new "direct jobs" in support of an immigrant investor's individual I-526 petition affiliated with the GCFM-RC, then:

- To be credited with projected creation of new "direct" jobs for "qualifying employees" upon filing the I-526 petition, then the petition must be supported by a comprehensive detailed business plan and supporting financial, marketing and related data and analysis providing a reasonable basis for projecting creation of any new direct jobs for "qualifying employees" to be achieved/realized within two years pursuant to 8 CFR 204.6(j)(4)(B).

For purposes of an alien investor's filing of a subsequent I-829 petition to remove the conditions wherein the investment through the GCFM-RC in an enterprise for which the initial I-526 petition approval involved the creation of new direct jobs or the creation of new indirect jobs based on a multiplier tied to underlying new direct jobs, then to support the full number of direct and indirect new jobs being claimed at that point, an alien's subsequent I-829 petition will need to be supported by probative evidence of the number of new direct full time (35 hours per week) for qualified employees whose positions have been created as a result of the alien's investment. Such evidence may include copies of quarterly state employment tax reports, Forms W-2, Forms I-9, and any other pertinent employment records sufficient to demonstrate the number of qualified employees whose jobs were created directly.

Each individual petition, in order to demonstrate that it is associated with the GCFM-RC , in conjunction with addressing all the requirements for an individual immigrant investor petition, shall also contain as supporting evidence relating to this amended regional center designation, the following:

1. A copy of this letter for the GCFM-RC approval and designation.

2. A copy of the USCIS approved regional center narrative proposal and business plan.[1]

3. A copy of the job creation methodology required in 8 CFR 204.6(j)(4)(iii), as contained in the final regional center economic analysis which has been approved by USCIS, which reflects that investment by an individual immigrant investor will create not fewer than ten (10) full-time employment positions, either directly or indirectly, per each immigrant investor.

4. A legally executed copy of the USCIS approved:

    a. Private Placement Memorandum;
    b. Subscription Agreement;

[1]With respect to an individual I-526 individual investor petition, for any large scale high impact investor manufacturing or processing projects such as a shipyard, other large-scale manufacturing or processing plants, the detailed business plan should also address or reflect those project critical factors associated with infrastructure required to support operations on the scale proposed, in terms of roads, rail tracks and facilities, port capacity, water, sewage, electrical power capacity to meet the projected demand imposed by the envisioned facility, fire fighting services and capabilities, and environmental impact issues.

c. Operating Agreement; and
d. Management Agreement.

DESIGNEE'S RESPONSIBILITIES INHERENT IN CONDUCT OF THE GCFM-RC REGIONAL CENTER:

The law, as reflected in the regulations at 8 CFR 204.6(m)(6), requires that an approved regional center in order to maintain the validity of its approval and designation must continue to meet the statutory requirements of the Immigrant Investor Pilot Program by serving the purpose of promoting economic growth, including increased export sales (where applicable), improved regional productivity, job creation, and increased domestic capital investment. Therefore, in order for USCIS to determine whether your regional center is in compliance with the above cited regulation, and in order to continue to operate as a USCIS approved and designated regional center, your administration, oversight, and management of your regional center shall be such as to monitor all investment activities under the sponsorship of your regional center and to maintain records, data and information on a quarterly basis in order to report to USCIS upon request the following year to date information for each Federal Fiscal Year[2], commencing with the initial year as follows:

1. Provide the principal authorized official and point of contact of the regional center responsible for the normal operation, management and administration of the regional center.

2. Be prepared to explain how you are administering the regional center and how you will be actively engaged in supporting a due diligence screening of its alien investors' lawful source of capital and the alien investor's ability to fully invest the requisite amount of capital.

3. Be prepared to explain the following:

    a. How the regional center is actively engaged in the evaluation, oversight and follows up on any proposed commercial activities that will be utilized by alien investors.

    b. How the regional center is actively engaged in the ongoing monitoring, evaluation, oversight and follows up on any investor commercial activity affiliated through the regional center that will be utilized by alien investors in order to create direct and/or indirect jobs through qualifying EB-5 capital investments into commercial enterprises within the regional center.

4. Be prepared to provide:

    a. the name, date of birth, petition receipt number, and alien registration number (if one

[2] A Federal Fiscal Year runs for twelve consecutive months from October 1st to September 30th.

has been assigned by USCIS) of each principal alien investor who has made an investment and has filed an EB-5/I-526 Petition with USCIS, specifying whether:

i. the petition was filed,
ii. is pending,
iii. was approved,
iv. denied, or
v. withdrawn by the petitioner, together with the date(s) of such event.

b. The total number of visas represented in each case for the principal alien investor identified in 4.a. above, plus his/her dependents (spouse and children) for whom immigrant status is sought or has been granted.

c. The country of nationality of each alien investor who has made an investment and filed an EB-5/I-526 petition with USCIS.

d. The U.S. city and state of residence (or intended residence) of each alien investor who has made an investment and filed an EB-5/I-526 petition with USCIS.

e. For each alien investor listed in item 4.a., above, identify the following:

i. the date(s) of investment in the commercial enterprise;

ii. the amount(s) of investment in the commercial enterprise; and

iii. the date(s), nature, and amount(s) of any payment/remuneration/profit/return on investment made to the alien investor by the commercial enterprise and/or regional center from when the investment was initiated to the present.

5. Be prepared to identify/list each of the target industry categories of business activity within the geographic boundaries of your regional center that have:

a. received alien investors' capital, and in what aggregate amounts;

b. received non-EB-5 domestic capital that has been combined and invested together, specifying the separate aggregate amounts of the domestic investment capital;

c. of the total investor capital (alien and domestic) identified above in 5.a and 5.b, identify and list the following:
i. The name and address of each "direct" job creating commercial enterprise.
ii. The industry category for each indirect job creating investment activity.

6. Be prepared to provide:

a. The total aggregate number of approved EB-5 alien investor I-526 petitions per each

Federal Fiscal Year to date made through your regional center.

b. The total aggregate number of approved EB-5 alien investor I-829 petitions per each Federal Fiscal Year to date through your regional center.

7. The total aggregate sum of EB-5 alien capital invested through your regional center for each Federal Fiscal Year to date since your approval and designation.

8. The combined total aggregate of "new" direct and/or indirect jobs created by EB-5 investors through your regional center for each Federal Fiscal Year to date since your approval and designation.

9. If applicable, the total aggregate of "preserved" or saved jobs by EB-5 alien investors into troubled businesses through your regional center for each Federal Fiscal Year to date since your approval and designation.

10. If for any given Federal Fiscal Year your regional center did or does not have investors to report, then provide:

    a. a detailed written explanation for the inactivity,

    b. a specific plan which specifies the budget, timelines, milestones and critical steps to:

        i. actively promote your regional center program,

        ii. identify and recruit legitimate and viable alien investors, and

        iii. a strategy to invest into job creating enterprises and/or investment activities within the regional center.

11. Regarding your website, if any, please be prepared to provide a hard copy which represents fully what your regional center has posted on its website, as well as providing your web address. Additionally, please provide a packet containing all of your regional center's hard copy promotional materials such as brochures, flyers, press articles, advertisements, etc.

12. Finally, please be aware that it is incumbent on each USCIS approved and designated regional center, in order to remain in good standing, to notify the USCIS Foreign Trader, Investor & Regional Center Program within 15 business days at USCIS.ImmigrantInvestorProgram@dhs.gov of any change of address or occurrence of any material change in:

    - the name and contact information of the responsible official and/or Point of Contact (POC) for the RC

- the management and administration of the RC,
- the RC structure,
- the RC mailing address, web site address, email address, phone and fax number,
- the scope of the RC operations and focus,
- the RC business plan,
- any new, reduced or expanded delegation of authority, MOU, agreement, contract, etc. with another party to represent or act on behalf of the RC,
- the economic focus of the RC, or
- any material change relating to your regional center's basis for its most recent designation and/or reaffirmation by USCIS.

If you have any questions concerning the GCFM-RC approval and designation under the Immigrant Investor Pilot Program, please contact the USCIS Foreign Trader, Investor and Regional Center Program by Email at USCIS.ImmigrantInvestorProgram@dhs.gov.

Re: Proposal for Designation as an EB-5 Regional Center
Response to Request for Additional Evidence (RFE)
Application: Gulf Coast Funds Management, LLC
Applicants: David Voelker and George E. Brower II

Dear Ms. Velarde:

This letter responds to the August 1, 2008 USCIS letter concerning the application of Gulf Coast Funds Management, LLC (GCFM) for approval of a two-state EB-5 regional center for the states of Mississippi and Louisiana. As background, GCFM plans to use a "fund of funds" approach, meaning EB-5 individuals will invest in a fund, which in turn will invest in a variety of projects in the two-state region. Thus, the funds invested by each participant will be pooled, as opposed to being designated for any one specific project.

Some EB-5 money from a given investor in a given fund will be invested in projects that create a lot of jobs; other EB-5 money from the same investor may be invested in projects that do not create many jobs but which offer a potentially higher rate of return. The period during which each investor is "at risk" would begin at the time the investor invests in the Gulf Coast Fund. At the time of each Gulf Coast Fund investor's I-829 filing, the Fund will allocate its investments in portfolio companies and the jobs created by its portfolio companies to each investor, on a first-come, first-served basis.

The USCIS letter detailed nine areas where further information was sought. This letter and

attachments fulfills all of the requests in the August 1, 2008 letter.

A summary of the August 1 letter and completion status of each response follow:

Request No. 1: A letter from the respective governors of Louisiana and Mississippi on official letterhead identifying the agency of each state that has been named to determine and designate areas of high unemployment as Targeted Employment Areas.

Provided in response:

Mississippi Determination Letter – **completed and transmitted by email on August 6; also attached here as Exhibit 1.**

Louisiana Determination Letter – **completed and transmitted on August 13; also attached here as Exhibit 2.**

Request No. 2: A letter on official letterhead from each state recognizing any areas as high unemployment areas that are located within metropolitan statistical areas or cities with populations of 20,000 or more with unemployment rates of 150% or higher of the national average.

Provided in response:

Mississippi Letter – **completed and transmitted by email on August 6; also attached here as Exhibit 3.**

Louisiana – **completed and transmitted by email on August 13; also attached here as Exhibit 4.**

Request No. 3: The economic analysis used for each of the three examples presented with regard to indirect and induced jobs provided is not sufficiently detailed to apply to the other 10 industry categories cited in the proposal and does not appear to include all the multipliers for each of the 13 categories. Please supplement the economic analysis with this information as well as for all of the proposed industry clusters.

Provided in response:

Revised economic impact analysis – **completed and transmitted by email on August 12; also attached here as Exhibit 5.**

Request No. 4: Please submit a detailed description of the past, current and future promotional activities and/or plan to market and promote the Regional Center and recruit investors along with a budget to accomplish the plan.

Provided in response:

Updated Marketing Plan and Budget – **completed and transmitted on August 6; also attached here as Exhibit 6.**

Request No. 5: Page 11 in Tab 10, Table 7, 4 shows Jobs Produced on the Gulf Coast by ALL PROJECTS [redacted] jobs in all projects and [redacted] throughout the economy) with no delineation of category or industry/economic clusters. Are the [redacted] jobs projected by "all projects" double counted within "total jobs created in the economy"? (b)(4)

Provided in response:

Clarification on target industry economic clusters to show that the jobs are not double counted - **completed and transmitted as part of the revised economic analysis on August 12; also attached here as Exhibit 5.**

Request No. 6: Tab 10, Appendix A. In mapping by NAICS categories is not clear as to all 13 categories of target industry economic clusters and requires a clearer one-to-one crosswalk for each---categories 4, 8, 9, and 11 are not clearly cross-walked, "Agribusiness" under jobs created code is not within the listing of the 13 target industry economic clusters cited in the proposal. Please submit a revised copy of this table that more clearly delineates a one-to-one correlation for each of the 13 industry categories to the relevant NAICS codes.

Provided in response:

Clarification on target industry economic clusters - **completed and transmitted as part of the revised economic analysis on August 12; also attached here as Exhibit 5.**

Request No. 7: At Tab 10, Appendix B (RIMS-II Multipliers by NAICS categories by Area & Economics Sector. Are the "Final Demand" Multipliers and "Direct Effect" Multipliers cited based per [redacted] dollars of investment? Please verify whether the derived multipliers are per each [redacted] of capital invested. (b)(4)

Provided in response:

Clarification on multipliers including capital invested - **completed and transmitted as part of the revised economic analysis on August 12; also attached here as Exhibit 5.**

Request No. 8: Absent the proposal's level of analysis and even general data necessary to measure or sufficiently validate whether the economic, demographic and employment impact projections for this ambitious geographic area are reasonably accurate and reliable, a more complete data and analysis which definitively addresses the major disparities across urban communities, as well as the agricultural and rural areas, for both states is required.

Provided in response:

Two-state economic report supporting full two-state regional center as discussed on 8/5 conference call – **completed and transmitted as pages 28-41 of the revised economic analysis on August 12; also attached here as Exhibit 5.**

Request No. 9: PLEASE NOTE: The application narrative clearly states that the proposed Regional Center initially will focus principally on the hurricane-impacted areas and communities nearest to the Gulf Coast areas within the two states. As such, to facilitate a more expedited ability to favorably consider the geographic area of a proposed Gulf Coast Funds Management Regional Center,

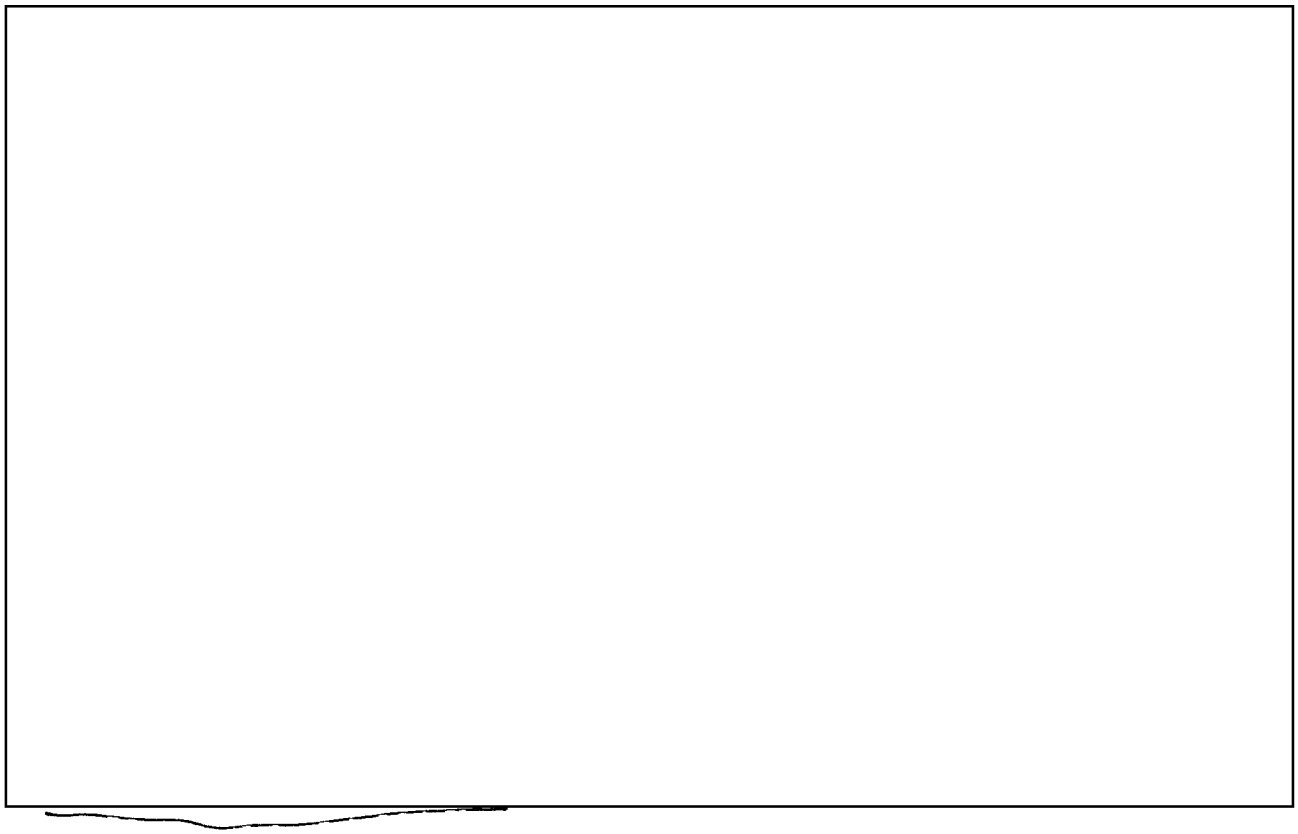
a. **it would be prudent to revise the proposed geographic boundaries for the requested regional center to focus clearly on the gulf coast areas across the southern portion of both states as alluded to in one part of your narrative proposal, or**

b. **You may choose instead to revise your application to submit two applications for a separate regional center in each state – one focusing on Louisiana and a second focusing on Mississippi.**

Provided in response:

Two-state economic report supporting full two-state regional center as discussed on 8/5 conference call – **completed and transmitted as pages 28-41 of the revised economic analysis on August 12; also attached here as Exhibit 5.**

(b)(4)



(b)(4)

Conclusion

GCFM looks forward to your early approval of its regional center application. Please contact me [redacted] or 607-273-4200 [redacted] or Taylor Beery [redacted] or [redacted] if you have any questions.

(b)(6)

Sincerely

[redacted]

Stephen Yale-Loehr

Re: State Agency Designation

Dear Ms. Velarde:

This letter responds to the comment letter dated August 1, 2008 of the U.S.C.I.S. with respect to the application of Gulf Coast Funds Management, LLC for approval of a two-state EB-5 regional center for the states of Mississippi and Louisiana. U.S.C.I.S. requested a letter from the respective Governors of Louisiana and Mississippi, on official letterhead identifying the agency of each state which has been named to determine and designate areas of high unemployment as Targeted Employment Areas.

Through this letter, I am identifying the Louisiana Workforce Commission as responsible for the determination and designation of areas of high unemployment as Target Employment Areas for the purposes of fulfilling this requirement for U.S.C.I.S. and the EB-5 Regional Center Program.

Sincerely,

Bobby Jindal
Governor of Louisiana

Re: State Agency Designation

Dear Ms. Velarde:

The Mississippi Department of Employment Security certifies that the following areas are Targeted Employment Areas within the State of Mississippi. Targeted Employment Areas are defined as "an area, which at the time of investment, is a rural area or an area which has experienced unemployment of at least 150 per cent of the national average rate".

High unemployment areas were determined using the 2007 national not seasonally adjusted unemployment rate of 4.6%; 150 per cent of 4.6% is 6.9%. High unemployment areas are any particular geographic or political subdivision located within a Metropolitan Statistical Area (MSA) or within a city or town having a population of 20,000 or more within such state. Our designation for areas of high unemployment was initially at the county level for the State's MSA counties using 2007 annual averages calculated using the Handbook method as provided by the Bureau of Labor Statistics. For MSA counties with rates below the 6.9% threshold, areas were then analyzed at the Census Tract level. Employment and Unemployment ratios for Census 2000 by census tract were computed and applied to the county level 2007 annual average in order to create labor force estimates along with unemployment rates at the census tract level. In addition cities with populations in excess of 20,000 were reviewed to determine those with unemployment rates in excess of 6.9%.

Rural areas are defined as civil jurisdictions not located within any standard Metropolitan Statistical Area as designated by the Office of Management and Budget, or within any city or town having a population of 20,000 or more based on the most recent decennial census of the United States.

The following attachments contain designated High Unemployment Areas and Rural Areas for the State of Mississippi. If you have any questions or need clarification please contact Wayne Gasson, (601) 321-6239.

Sincerely,

Tommye Dale Favre

RE: **State Agency Designation**

Dear Ms. Velarde:

The Louisiana Workforce Commission certifies that the following areas are Targeted Employment Areas within the State of Louisiana. Targeted Employment Areas are defined as "an area, which at the time of investment, is a rural area or an area which has experienced unemployment of at least 150 per cent of the national average rate."

High unemployment areas were determined using the 2007 national not seasonally adjusted unemployment rate of 4.6% times 150%, or 6.9%. High unemployment areas are any particular geographic or political subdivision located within a Metropolitan Statistical Area (MSA) or within a city or town having a population of 20,000 or more within such state. Our designation for areas of high unemployment was initially at the parish level for the State's MSA parishes using 2007 annual averages. For MSA parishes with rates below the 6.9% threshold, areas were then analyzed at the Census Tract level. Employment and Unemployment ratios for Census 2000 by census tract were computed and applied to the parish level 2007 annual average in order to create labor force estimates as well as unemployment rates at the census tract level. In addition, cities with populations in excess of 20,000 were reviewed to determine those with unemployment rates in excess of 6.9%.

Rural areas are defined as civil jurisdictions not located within any standard MSA as designated by the Office of Management and Budget, or within any city or town having a population of 20,000 or more based upon the most recent decennial census of the United States.

The following attachments contain designated High Unemployment Areas and Rural Areas for the State of Louisiana. If you have any questions, please contact Dino DeMarte at (225) 342-3141.

Sincerely,

Tim Barfield, Executive Director

Appendix A. Using the IMPLAN model

The IMPLAN model is a regional input/model developed and maintained by the Minnesota IMPLAN group, headquartered in Minneapolis. The basic model was originally developed by the USDA Forest Service in cooperation with the Federal Emergency Management Agency and the USDI Bureau of Land Management.

The IMPLAN model has certain similarities with the RIMS (Regional Input/Output Modeling system) model developed by the Department of Commerce, but is generally thought to contain several superior features besides its greater ease and flexibility of use. These improvements can be summarized as follows:

1. The Commerce Department is not permitted to publish data in any category where there are less than three organizations in a given economic area. IMPLAN has developed an algorithm to fill in the missing numbers.

2. IMPLAN has introduced improved methods of accounting for flows of goods and services among counties.

3. IMPLAN permits aggregation of any subset of industries for calculation and tabular purposes. This is useful when results are desired for, say, 1-digit industries instead of the 509 industries actually found in the input/output table.

4. As seen in the tables throughout this text, IMPLAN estimates three separate effects, labeled "direct", "indirect" and "induced". The direct effects are those entered by the user. The other two columns represent the multiplier effects, but they are usually combined in other input/output models. Briefly, the indirect effect represents purchases made by businesses when their sales rise. For example, a restaurant might order more food produced or sold in the region, or an automobile plant might order more steel. The induced effect represents the additional household spending because income has risen. For example, casino workers would spend their paychecks on various goods and services, some of which are produced in the region. In general, then, the larger the region under consideration, the larger the multipliers would be.

The following material, taken from the IMPLAN manual, describes the input/output process in more detail.

Input/output analysis is a means of examining relationships within an economy, both between businesses and between businesses and final consumers. It captures all of the monetary market transactions for consumption in a given time period. The resulting mathematical formulae allow examination of the effects of a change in one or several economic activities on an entire economy.

A descriptive model includes information about local economic interactions known as regional economic accounts. These tables describe a local economy in terms of the flow of dollars from purchasers to producers within the region. The initial IMPLAN data details all purchases, including imported goods and services. When regional economic accounts are created, imports to the region are removed from the initial data, allowing examination of local inter-industry transactions and final purchases.

The regional economic accounts are used to construct local level multipliers. Multipliers describe the response of the economy to a stimulus (a change in demand or production). The multipliers represent the Predictive Model.

Purchases for final use (final demand) drive an input/output model. Industries producing goods and services for consumption purchase goods and services from other producers. These other producers, in turn, purchase goods

and services. These indirect purchases (or indirect effects) continue until leakages from the region (imports, wages, profits, etc.) stop the cycle.

The indirect effects and the effects of increased household spending (induced effects) can be mathematically derived as sets of multipliers. The derivation is called the Leontief inverse. The resulting sets of multipliers describe the change of output for each industry caused by a one dollar change in final demand for any given industry.

Appendix B. Resume of Dr. Michael K. Evans

CURRENT AND PREVIOUS POSITIONS

• Chairman, *Evans, Carroll & Associates, Inc.*, 1980-present (previously Evans Economics)

Economic consulting firm specializing in economic impact studies of development projects and new construction, models of state and local tax receipts, impact of current and proposed government legislation; and construction of econometric models for individual industries and companies.

• Chief Economist, *American Economics Group*, 2000-present. American Economics Group is a subsidiary of *Sourcecorp*, now a private company, but previously a nationally traded Nasdaq corporation.

Built a comprehensive state modeling system that provides economic analysis for a variety of consulting projects (see below).

• Professor of Economics, Department of Managerial Economics and Decision Sciences (MEDS), Kellogg Graduate School of Management, Northwestern University, 1996-99.

Taught courses in macroeconomics and business forecasting. Wrote textbooks for both courses.

• Winner of Blue Chip Economic Indicator Award for most accurate macroeconomic forecasts during the past four years, November 1999

• Founder and President, *Chase Econometric Associates*, 1970-1980

• Assistant and Associate Professor of Economics, Wharton School, University of Pennsylvania, 1964-69. Co-developer of the Wharton Model with Professor Lawrence R. Klein

Visiting Professor, Radford University, (Radford, VA), 1987

Chairman of Institute for International Economic Competitiveness

Visiting Lecturer, Hebrew University (Jerusalem), 1966-67

Built econometric model of the Israeli economy

Ph. D. in Economics, Brown University. Dissertation, "A Postwar Quarterly Model of the United States Economy, 1948-1962". A. B. in Mathematical Economics, Brown University

PREVIOUS ACTIVITIES AND EDUCATION

- Contributing Editor, *Industry Week*

Wrote a column in each issue on economic and financial trends as they impact the manufacturing sector.

- Editor, *The Evans Report*

Weekly newsletter discussing economic trends and financial markets.

- Consultant, *National Printing Equipment and Supply Association*

Prepares quarterly forecasts of shipments of printing equipment and graphic arts supplies by product line, based on an econometric model constructed for NPES. Also prepares analysis and forecasts of exports and imports by principal product line.

- Consultant, *APICS -- The Educational Society for Resource Management*,

In 1993, designed and developed the *APICS Business Outlook Index*, which uses survey data collected by the Evans Group to measure current production, production plans, shipments, employment, new orders, unfilled orders, inventory stocks, and the comparison of the actual to desired inventory/sales ratio to predict short-term changes in manufacturing sector activity. The results of this survey appeared every month in *APICS: The Performance Advantage*

Consultant, *American Hardware Manufacturing Association*

Wrote a separate weekly edition of the Evans Report analyzing recent trends in the hardware and housing industries, including forecasts of the hardware industry based on an econometric model developed for AHMA.

Board of Economists, *Los Angeles Times*

Wrote column every 6 weeks (5 other economists on the Board)

Columnist, *United Press International*

Wrote twice-weekly column, "Dollars and Trends"

Consultant, Senate Finance Committee,

Built the first large-scale supply-side model of the U. S. economy

Consultant, Environmental Protection Agency and Council on Environmental Quality, 1973-1977

Estimated inflationary impact of government regulations

Consultant, National Aeronautics and Space Administration

Estimate impact of R&D spending on productivity growth

Consultant, U. S. Treasury

Estimated impact of investment tax credit and accelerated depreciation on capital spending by industry

Consultant, U. S. Department of Agriculture

Built large-scale econometric model of agricultural sector of U. S. economy

Consultant, Organization of Economic Cooperation and Development

Built econometric model of the French economy

SAMPLE OF RECENT CONSULTING PROJECTS

A. Economic Impact of New Markets Tax Credits and EB-5 Foreign Investor Programs

- Prepared economic impact calculations for a proposed EB-5 regional center and casino in Natchez, Mississippi

- Prepared economic impact calculations for a proposed EB-5 regional center in rural Colorado involving a Timber-to-Homes project, in which diseased and dead trees would be harvested, the lumber would be processed, and a new town of AltaColorado would be built in the Rocky Mountains near Leadville.

- Prepared economic impact calculations for proposed EB-5 regional centers in New York City and Northeastern New Jersey.

- Calculated the economic impact of a rehabilitated office building in Albuquerque, New Mexico, including the increase in high quality jobs.

- Calculated the economic impact of a rehabilitated skilled nursing center in East Los Angeles, California, including the impact on nearby census tracts.

- Calculated the economic impact of development of warehouse and light industrial manufacturing space in Las Vegas, Nevada.

- Calculated the economic impact of rehabilitation and expansion of a vacation and health spa in Sharon Springs, New York

- Calculated economic impact of revitalizing an old resort hotel and adding new facilities for Lake Geneva, WI.

- Calculated the employment and tax effects for a portfolio of projects undertaken under the New Market capital program.

- Calculated generic employment changes for proposed EB-5 project for an Inland Port in Palm Beach County, FL

- Calculated the economic impact of construction of El Monte Village in El Monte, CA.

- Built an input/output model of Guam to be used to calculate economic impact of EB-5 projects. Used this model to estimate impact of various proposed projects.

- Calculated the economic impact of moving the Social Security Administration building in Birmingham, AL, and revitalizing the surrounding neighborhood.

- Calculated the economic impact of rehabbing and expanding the Everett Mall in Everett, WA.

- Determined the economic impact of building a new medical center in Charleston, SC

- Calculated economic impact of expanding Sugarbush resort in Vermont. Study included expansion of existing facilities and addition of new facilities.

- Calculated economic impact for new market tax credit program in Portsmouth, N.H. Study included both overall economic impact, and the increase in employment and income and the decrease in the unemployment rate and incidence of poverty in individual census tracts.

- Calculated the economic benefits of EB-5 programs for foreign investors for a mixed-use construction project, including a hotel, retail stores, apartments, and a sports stadium in the Washington, D. C. metropolitan area

- Calculated the economic benefits of EB-5 programs for foreign investors for a mixed-used retail shopping center in the New York City metropolitan area.

- Calculated the economic benefits of EB-5 programs for foreign investors for proposed shopping centers in five separate counties in Southern California, including differential impacts of building the shopping centers in different counties.

B. Projects for State and Local Governments

- Determined whether the Washington, D.C. water and sewer authority should accept a high bid for a new waste disposal system. Decision to reject could save the authority over $200 million.

- Developed an econometric model for the state of Pennsylvania to determine how changes in the personal income tax, corporate income tax, sales tax, property tax, and real estate transfer tax would affect tax receipts and economic activity.

- Built an econometric model to determine the "tax gap" caused by Internet sales for the state of Minnesota.

- Determined appropriate levels of shelter grants individual counties in New York State, and for utility allowances in New York City. Reviewed and prepared testimony in ongoing court cases in these areas.

- Calculated the economic impact of the revitalization of downtown Milwaukee, Wisconsin.

C. Economic Impact of Casino Gaming

- Built an econometric model to predict the growth of the gaming industry over the next decade, and the economic impact of that industry on employment and tax revenues at the Federal and state levels.

- Estimated the economic impact of Indian casino gaming nationally and for the State of Wisconsin.

- Determined the economic impact of the Oneida Indian gaming casino on the Green Bay metropolitan area.

• Estimated the negative economic impact on the Milwaukee area if a new Indian gaming casino were to be built in Kenosha, Wisconsin.

D. Economic Impact of Smoking Bans and Higher Taxes

• Testified on economic impact of smoking bans in Canada; certified as an expert witness by the Court.

• Examined the impact of smoking bans on restaurant sales in several different locations in the U.S. to determine how much sales changed when these bans were imposed, and the differential effects depending on whether these bans were partial or total.

• Determined the cross-border effects on retail sales from differential rates in cigarette, gasoline, and alcohol excise taxes

• Determined the economic impact of higher cigarette taxes on minority group employment.

• Estimated the economic impact and loss of Federal and state tax revenues when higher cigarette prices lead to increased smuggling.

E. Consulting Projects for Travel and Tourism

• Built an econometric model to predict tourism trips and revenues for the major regions of the U.S. economy.

• Constructed econometric models to predict tourism in Las Vegas and Orlando.

• Using the IMPLAN model, predicted economic impact of tourism and travel expenditures for all counties in Pennsylvania.

F. Other Private Sector Consulting Projects

• Calculated the economic impact of proposed EPA bans on fluoropolymer production.

• Estimated the size and economic importance of the fluoropolymer industry, and calculated economic impact of shutting down domestic production.

• Built an econometric model to examine how U.S. tax and regulatory policies help determine whether the gold mining industry will invest in the U.S. or other

countries. Testified in front of Congress to help defeat legislation inimical to the mining industry.

• Built an econometric model to predict consumer bankruptcies, based on recent growth in consumer credit outstanding, the overall economic environment, and recent changes in credit regulations

• Estimated the economic impact of the ethanol subsidy on the U.S. economy and Farm Belt States, including the impact on the balance of payments, employment, and tax receipts. Testified before Congress to help pass legislation to extent subsidies to the ethanol industry.

• Built an econometric model to determine the impact of updating and improving the system of locks on the Upper Mississippi River on corn prices and exports, farm income, and the overall economy.

Re: Gulf Coast Funds Management: EB-5 regional center application: Updated information

Dear Mr. Berez:

As you know, we at Gulf Coast Funds Management (GCFM) have applied to be designated as an EB-5 regional center to serve the entire states of Louisiana and Mississippi in an effort to capture the needs of this area and establish a sustainable and successful regional center. This letter updates our application on two key issues: (1) including both Louisiana and Mississippi as one regional center; and (2) designating the entire states of Louisiana and Mississippi as targeted employment areas for EB-5 purposes. Please add this letter and the attachments to our application.

1. Louisiana and Mississippi as one regional center

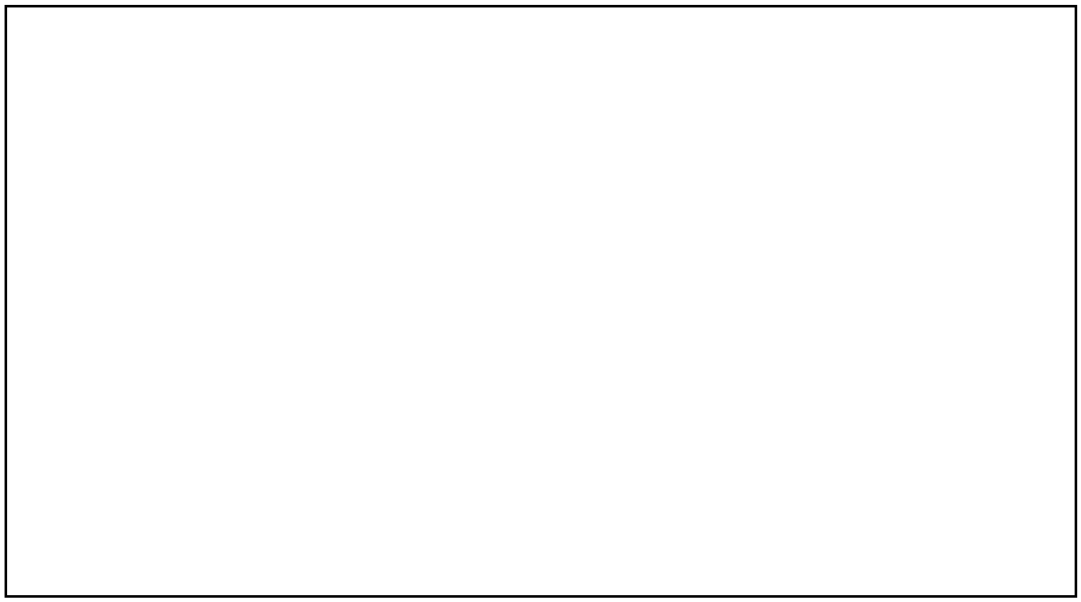
We believe that a regional center must reflect the realities of this region primarily: shared industries and jobs across all parts of Mississippi and Louisiana and a regional approach to recovery and economic development. When new jobs are created in Louisiana or Mississippi, the indirect job creation shows up across the two-state area. The computer programs that count job creation for the EB-5 program will not pick up jobs unless they are in the regional center. Because of the economic ties between Louisiana and Mississippi, we will miss true job creation unless the regional center is drawn big enough to pick up job creation across the state line. The states themselves carry so many similarities, as the attached economic report discusses, but almost all of the industries where GCFM will invest are shared, on an almost even basis across the board, between both states, particularly from the perspective of job creation. The partnership between the states in these industries makes it almost impossible to talk about investing in one state without impacting numerous areas of the other.

Further, following Katrina, it is now clear to the business and political leaders and citizens of both states that our best strategy for economic development is to approach projects as a single region. Following Katrina, our governors now work closely together; our state Congressional delegations do the same. The attached joint letter from the Governors of Louisiana and Mississippi demonstrates the interdependence between these two states particularly in the industries where GCFM will work to put immigrant investor dollars to work to create much needed jobs.

There is general agreement that jobs created in one state cause jobs to be created in the other state. For example, the Gulfport airport serves New Orleans and the North shore of Lake Pontchartrain; the New Orleans airport serves the Gulfport tourism market. Local banks, law firms, accounting firms and other service companies have become regional, with offices in both states serving clients whose operations traverse both states. Creating a two-state regional center merely follows the regional approach that most businesses are already taking.

Here are a few examples why Louisiana and Mississippi should be designated as one EB-5 regional center:

(b)(4)



2. Designating the entire states of Louisiana and Mississippi as targeted employment areas for EB-5 purposes

Attached is a copy of a study by the Department of Labor concerning the impact of Hurricane Katrina on the employment base of the affected area. The study supports our position that the entire area affected by Hurricane Katrina continues to be a targeted employment area for EB-5 purposes, insofar as residents are unable to return until approximately 90,000 new jobs are created within the area. These residents remain under- or un-employed where they are living, and they want very much to return to their homes. It is the lack of jobs, rather than any other factor, that inhibits recovery of Louisiana and Mississippi today. For this reason, as well as the fact that the entire two-state area has historically suffered from high unemployment, our application requests the authorization to count all of the jobs we are able to help create at new companies to be headquartered anywhere within the region, at the $500,000 level.

We look forward to your early reply to our application. Please contact me at 504- 582-2244 if you have any questions.

Sincerely,

(b)(6)

Joint letter from both Mississippi senators

June 19, 2008

The Honorable Michael Chertoff
Secretary
U.S. Department of Homeland Security
Washington DC 20536

Dear Secretary Chertoff:

In February we independently wrote to you regarding the EB-5 program and our support for a regional center that includes both Louisiana and Mississippi. Further, we expressed our support for Gulf Coast Funds Management Regional Center (GCFM), a specific applicant looking to serve both states. We have been informed that the United States Citizenship and Immigration Services (USCIS) expressed concerns to GCFM about combining the entire states of Louisiana and Mississippi into one regional center. Further, we understand that currently, foreign investors in an EB-5 regional center can invest at the $500,000 level only if the specific project is located in a targeted employment area (TEA). We support an EB-5 regional center that can serve the entirety of both Mississippi and Louisiana by investing across all areas of both states.

We understand the emphasis and the intent of the program to capture job creation that results from EB-5 investments, but we believe this can best be done if both states are combined in the regional center. The economies of the two states are similar and the industries where GCFM will invest are shared between both states, particularly from the perspective of job creation. When new jobs in these industries are created in Louisiana or Mississippi, indirect job creation is likely to occur across the two-state area.

Regarding the restriction on regional centers to only invest at the $500,000 level in areas that are rural or meet the TEA definition of unemployment (150% times the national average), we believe that the situation in Mississippi and Louisiana is uniquely affected by the storms of 2005, and GCFM should be granted an exception to invest at the $500,000 level in all areas of both states. The New Orleans metropolitan statistical area lost about 22 percent of its permanent jobs (over 120,000 jobs) as a result of Hurricane Katrina, and the hurricane had a similar impact on the Gulfport-Biloxi and Pascagoula metropolitan statistical areas. These areas are "targeted employment areas" because only capital investment that creates new jobs can bring full recovery and allow all of our people to come home.

Given these issues, we request your support for the approval of the GCFM regional center in a manner that allows it to fulfill the objectives of the EB-5 program and put funds to work to create needed jobs in Louisiana and Mississippi. We hope this approval can be granted quickly, within the next 30 days, and will allow Gulf Coast Funds Management to invest, at the individual $500,000 level, in all areas across Louisiana and Mississippi. We believe the unique circumstances of ongoing recovery from the storms of 2005 and the partnership shared by Louisiana and Mississippi across key industries create a clear cause to proceed in this manner with the GCFM application.

Sincerely,

Bobby Jindal
Governor of Louisiana

Haley Barbour
Governor of Mississippi

United States Senate

WASHINGTON, DC 20510

June 20, 2008

The Honorable Michael Chertoff
Secretary
U.S. Department Of Homeland Security
Naval Security Station
3801 Nebraska Ave., NW
Washington, D.C. 20528-0001

Dear Secretary Chertoff,

We support the creation of an EB-5 regional center for the combined states of Mississippi and Louisiana. It is our understanding that the Department of Homeland Security is currently considering an application for such a designation.

As you know, both Mississippi and Louisiana have faced countless hardships during our recovery from Hurricanes Katrina and Rita. By encouraging investment and creating jobs, we can expedite our recovery and lay the foundation for long-term and substantial economic growth. The designation of an EB-5 regional center that covers both Mississippi and Louisiana will help promote economic growth by creating new jobs and increasing domestic capital investment throughout the Gulf Coast.

We hope that the Department of Homeland Security will approve the application for the creation of a regional center for Mississippi and Louisiana. Please do not hesitate to contact us if you have any further questions.

Sincerely,

U.S. Senator Roger Wicker

U.S. Senator Thad Cochran

Important Connections between the States of Louisiana and Mississippi

THE UNIVERSITY *of*
NEW ORLEANS

DIVISION OF BUSINESS ECONOMIC RESEARCH
Your Independent Source for Research Solutions

Strong Economic Connections

There is a strong connection or community of interest between Mississippi (MS) and Louisiana (LA). Because of this connection, it makes sense to combine the two states for analysis of the economic impact of any new project. If the states were studied separately, important spillover impacts from one state to the other would be understated.

The most straightforward way to see the importance is to look at the difference in impact using BEA RIMS II for a project in MS. If only MS is included in the analysis, three effects are missed. The first is that people in LA work in MS. The second is that the firm in MS purchases some of its inputs from LA (indirect effect). Finally, people who work for the firm in MS and those who work for the LA suppliers spend at least part their earnings in LA (induced effect). By combining the two states, cross-commuting, indirect and induced effects of the project can be appropriately included.

One indicator of the importance of studying LA and MS together is that 13.1% of all (176,846) non-resident income tax filers in LA are from MS, and these MS residents pay 13.1% of the income tax collected ($177.8 million) from non-residents. Examples of commuting to work across state lines include LA residents working at the Stennis facility in MS and MS residents being employed by the Michoud facility in LA. To determine the extent of cross-commuting between the states, the 2000 Census Journey to Work statistics were used. According to these statistics, 1.4% of all workers in LA commute from MS to work; 0.5% of all workers in MS commute from LA to work.

Another example of this important connection is the commodity flows from MS to LA. In total, 6,388 tons or $6.1 billion worth of commodities are shipped from MS to LA. Much of this material is shipped out of LA ports. (The flows from LA to MS are much smaller, 43 tons or $287 million.)

The total impact of these three effects can be clearly seen using BEA RIMS II multipliers. When a project that creates 2,000 shipbuilding jobs in MS is evaluated using MS only multipliers the total impact of the project is $590.2 million. When the two states are combined, the impact calculated using appropriate RIMS II multipliers increases to $614.2 million. This increase is due to the fact that the RIMS II multipliers consider the spillover impacts between the two states, while the analysis for MS in isolation treats all leakages the same. No distinction is made between all leakages and those spilling over to neighboring LA. Further, to consider the indirect effect of projects across Louisiana and Mississippi, we can evaluate a specific proposed project to fund a shipyard in Mississippi for Bollinger Shipyards, Inc. (Bollinger). Bollinger, who is contemplating a project in Natchez, Mississippi, is heavily reliant on inputs from across Louisiana. Since 2003 Bollinger has spent over $625 million in Louisiana on inputs including labor, manufacturing, turn-key services, subcontractors, and distributors.

In fact, the current IMPLAN model specification does not capture the spillovers from one state to another, when the states are combined for analysis. Because of the importance of these spillovers, a future version of the model is planned to correct for this error.

Socio-Economic Similarities between the Two States

Although the total populations of the states are different (4.3 million people in LA compared to 2.9 million people in MS), the statistical characteristics of the populations of the two states are quite similar. For example, poverty is almost the same in the two states. In 2006, the poverty rate in LA was 19.0%; in MS, it was 21.1%. These figures compare to a poverty rate of just 13.3% for the US. For children in poverty, the rates were also comparable, 27.8% in LA, and 29.5% in MS. The national rate for children in poverty is just 4.6%. In addition, 2.6% of households in each state are on cash public assistance. This rate is similar to that of the US (2.4%). The percentage of all people who are in prison is 0.86% in LA and 0.72% in MS. These rates are higher than the US, where just 0.54% is in prison.

Both states suffer from major health issues. Infant mortality is 10% in each state. The US rate is much lower (7%). Adult obesity is prevalent, 27.1% in LA and 31.4% in MS. These figures are both high in comparison with the US (20.1%). Diabetes is common in each state, 9.2% in LA and 10.9% in MS. Again the US figure is lower (7.5%). The percentage of the population that smokes cigarettes is also similar, 23.4% in LA and 25.1% in MS. In the US as a whole, 20.1% smoke cigarettes. Per year, mortality from cardiovascular diseases is 316.1 per 100,000 persons in LA and 364.2 in MS. For the US, this rate is 293.7 per 100,000 persons. Cancer occurs at an annual rate of 209.3 per 100,000 persons in LA and 206.3 in MS. In the US, cancer occurs at a lower annual rate of 188.6 per 100,000 persons. Mortality each year from stroke is high in both states (55.2 per 100,000 persons in LA compared to 56.8 in MS). The US figure is somewhat lower, 51.2 per 100,000 people.

Unemployment in both states is higher than that of the US (6.4%). The unemployment rate is 7.7% in LA and 8.9% in MS. Employment relative to total population tells an analogous story. In LA 43.1% of all people are employed; in MS, 41.5% are employed. For the US, the ratio of employment to population is 47.3%.

In 2006, 25.2% and 27.1% of residents had not completed high school in LA and MS, respectively. In contrast, just 19.6% of US residents have not finished high school. Only 18.7% in LA and 16.9% in MS have completed college. In the US, a much greater percentage (24.4%) of people has completed college.

Median household income is $39,337 in LA and $34,473 in MS. The US median household income is much higher ($48,451). Family income is somewhat higher than household income, $48,261 in LA and $42,805 in MS. Median family income for the US is also higher ($58,526) than that of LA and MS. The median housing value is somewhat higher in LA ($114,700) than in MS ($88,600). Both values are much lower than the median housing value for the US ($185,200). Typical (median) utility cost is very similar in the two states ($632 in LA and $601 in MS). These figures are only about two-thirds of utility cost for the US as a whole ($901).

The racial composition is also similar in the two states. In LA 62.7% is white; in MS, 59.3% is white. Whites comprise 66.2% of the US population. Blacks or African Americans make up the largest segment of the minority population in each state, 31.5% in LA, and 37.3% in MS. African Americans make up just 12.2% of the US population; Hispanics comprise a larger fraction (14.8%) of the national population.

The states are similar in size: LA is comprised of 51,885 square miles; MS has 48,434. LA is somewhat more urban, with eight MSAs; MS has just five MSAs.

Comparable Structures of the States' Economies

Table 1: Fraction of Total Employment by Sector

	4.2%	2.9%	1.8%
	8.9%	8.1%	7.9%
	8.6%	15.3%	11.6%
	3.5%	3.2%	3.4%
	12.4%	11.8%	11.5%
	5.0%	5.4%	5.0%
	1.7%	1.5%	2.5%
	6.0%	5.1%	7.2%
	8.1%	6.0%	10.1%
	21.9%	22.2%	20.8%
	9.1%	8.4%	8.6%
	5.2%	4.7%	4.8%
	5.5%	5.3%	4.7%

Both LA and MS have a greater percentage of their employment in Agriculture, forestry, fishing and hunting, and mining than does the US. LA has 4.2% of all jobs in this sector, while MS has 2.9%; the US has just 1.8% of its jobs in this sector. Construction jobs are somewhat higher as a fraction of all jobs in LA (8.9%) than in MS (8.1%), and both are fractions are higher than in the US. Public administration makes up a larger share of jobs in LA (5.5%) and MS (5.3%) than in the US (4.7%). Educational services, and health care and social assistance jobs comprise a larger fraction of employment in LA (21.9%) and MS (22.2%) than in the US (20.8%). Manufacturing has traditionally been a smaller sector for LA than the US. In this case, MS has a greater percent of its jobs in Manufacturing (15.3%) than does the country (11.6%) and in LA.

Professional, scientific, and management, and administrative and waste management services jobs make up a smaller share of the LA (8.1%) and MS (6.0%) economies than of the US economy (10.1%). In the Information sector, both LA (1.7%) and MS have a smaller employment share (1.5%) than the US (2.5%) Finance and insurance, and real estate and rental and leasing jobs make up a smaller fraction of all jobs in LA (6.0%) and in MS (5.1%) than in the nation (7.2%).

issues in Labor Statistics

Summary 07-01 / May 2007 • U.S. Department of Labor • U.S. Bureau of Labor Statistics

Recovery After Hurricane Katrina: Employment in the Gulf Coast Area

On August 29, 2005, Hurricane Katrina struck the Gulf Coast of the United States, causing tragic loss of life and catastrophic damage in local communities. The destruction of property and infrastructure resulted in large numbers of workers and their families being displaced. The devastating impact of this storm still resonates in the nation; however, substantial recovery in employment was evident by the third quarter of 2006 in many of the areas most heavily affected by Hurricane Katrina.

The effects of this storm on employment totals in the Quarterly Census of Employment and Wages (QCEW) were first apparent in data for September 2005. In the Gulf Coast, Hurricane Katrina caused the most extensive job losses in two large parishes in Louisiana—Jefferson and Orleans—and one large county in Mississippi—Harrison. In addition to these areas, three parishes and two counties also suffered significant employment losses as a result of the storm: Plaquemines, St. Bernard, and St. Tammany Parishes in Louisiana, and Hancock and Jackson Counties in Mississippi. These eight areas were heavily affected by Hurricane Katrina and sustained the largest job losses within the Gulf Coast region. The destruction from high winds, storm surges, and flooding contributed to their combined loss of 127,900 jobs between August 2005 and August 2006. Damage in the Mississippi counties was largely due to hurricane-related winds and storm surges. In the Louisiana parishes, damage was primarily from flooding, especially in Jefferson, Orleans, and St. Bernard. One year after the storm, the combined employment level in these eight communities recovered to 82 percent of the pre-Katrina level.

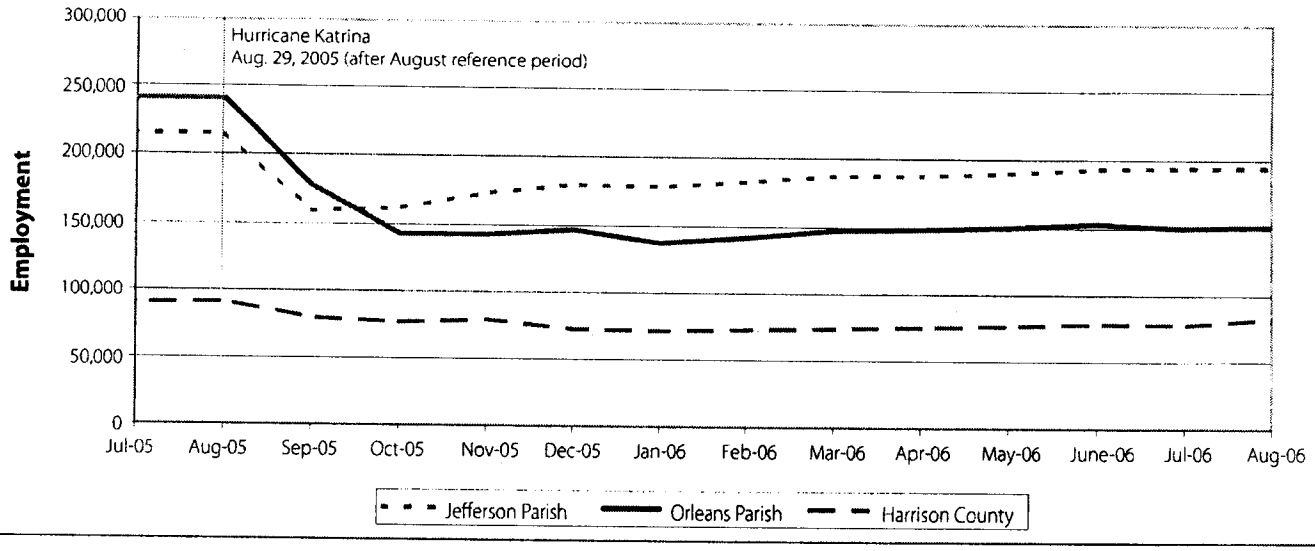
Among the three large areas, the recovery of jobs has been weakest in Orleans Parish, where August employment was down by 88,300 between 2005 and 2006. As of August 2006, employment had recovered to only 63 percent of its pre-Katrina level. Jefferson Parish rebounded more quickly and has experienced a much stronger recovery. As a result, by October 2005, Jefferson replaced Orleans as Louisiana's largest coastal parish and became the second largest parish in the state in terms of employment. In August 2005, the level of employment in Jefferson Parish was only 89 percent of the level in Orleans. A year later, employment in Jefferson was 28 percent greater than in Orleans.

August 2006 employment has recovered to 91 percent of the pre-Katrina level in Jefferson Parish and to 90 percent in Harrison County. Despite their significant recovery following the storm, employment levels in Jefferson Parish and Harrison County remained lower through August 2006; Jefferson was down 19,800 jobs and Harrison was down 8,900.

August employment in the five smaller communities of the Gulf Coast where employment was

Continued on back

Employment in large areas heavily affected by Hurricane Katrina



heavily impacted by Hurricane Katrina lost an aggregate 10,900 jobs over the year. Recovery was strong in this combined area, where total employment recovered to 93.4 percent of the pre-Katrina level. St. Tammany Parish, La., experienced a noteworthy recovery, with August 2006 employment growing by 2,200 jobs over the year and exceeding pre-Katrina levels by three percent. St. Bernard Parish, however, lost 9,300 jobs between August 2005 and August 2006, when employment was only 47 percent of the pre-Katrina level. Recovery in St. Bernard, like Orleans, has been considerably hindered by the damage from widespread flooding.

These data were obtained by the Quarterly Census of Employment and Wages in the Bureau of Labor Statistics. Data presented here are for all workers covered by State and Federal unemployment insurance programs. Large counties or parishes refer to those with employment levels of 75,000 or more in 2005. Additonal charts are available online at **www.bls.gov/katrina/smallareas.pdf.** For additional information, contact Robert Viégas, an economist in the Division of Administrative Statistics and Labor Turnover, Office of Employment and Unemployment Statistics. E-mail: viegas.robert@bls.gov. Telephone: 202-691-5162.

Information in this summary will be made available to sensory-impaired individuals upon request. Voice phone: (202) 691-5200. Federal Relay Service: 1-800-877-8339. This report is in the public domain and may be reproduced without permission.

Employment in areas heavily affected by Hurricane Katrina

Parish/County	August 2005 employment (in thousands)	August 2006 employment (in thousands)	August 2006 employment as percent of pre-Katrina employment	Change in employment, August 2005 to August 2006 (in thousands)
Louisiana Parishes (5)	555.9	439.9	79.1	-116.0
Jefferson	214.3	194.5	90.8	-19.8
Orleans	240.5	152.2	63.3	-88.3

Stephen Yale-Loehr
RE: Gulf Coast Funds Management (GCFM)
202 East State Street, Suite 700
Ithaca, NY 14850

AUG 0 1 2008

Application: Gulf Coast Funds Management's Request for Designation as a Regional Center
Applicants: David Voelker and George E. Brower II
Proposed Industry Focus:

1. Organic Chemical manufacturing (principally ethanol manufacturing)
2. Inorganic Chemical manufacturing
3. Petrochemical and other manufacturing
4. Petroleum refining
5. Shipbuilding
6. Medical research and development
7. Commercial real estate development
8. Commercial and industrial construction[1]
9. Hospital, hospice and other medical services
10. Oil and Gas services and manufacturing
11. Water transportation (ports and rivers)
12. Tourism and Hospitality
13. Agribusiness

RE: Proposal for Designation as a Regional Center under the Immigrant Investor Pilot Program.

REQUEST FOR ADDITIONAL EVIDENCE

This office is unable to complete processing of your request without further information. **Please read and comply with those items requested below, then resubmit the evidence requested to the address listed below, including this letter, within 87 days.**

If your submission is more than several pages, please use acco-fasteners to attach the documents at the top of each page.

[1] Direct construction jobs may not be credited as job creation because they are considered to be temporary and seasonal in nature. However, construction capital induced "indirect" jobs based on a USCIS-approved economic analysis and job creation econometric model may be credited.

USCIS Foreign Trader, Investor & Regional Center Program
Office of Service Center Operations, Business & Trade Services
20 Massachusetts Avenue, NW **(Room 2123)**
Washington, DC 20529

What is the Immigrant Investor Pilot Program?

The Immigrant Investor Pilot Program ("Pilot Program") was created by Section 610 of Public Law 102-395 (October 6, 1992). This is different in certain ways from the basic EB-5 investor program.

The Pilot Program began in accordance with a Congressional mandate aimed at stimulating economic activity and creating jobs for U.S. workers, while simultaneously affording eligible aliens the opportunity to become lawful permanent residents. Through this innovative program, foreign investors are encouraged to invest funds in an economic unit known as a "Regional Center."

A Regional Center is defined as any economic unit, public or private, engaged in the promotion of economic growth, improved regional productivity, job creation and increased domestic capital investment.

Initial evidence requirements.

PLEASE NOTE: for your proposal submission and supporting evidence for the items listed above, please use acco-fasteners to attach the documents at the top of each page, and individually tab the written materials/responses which you submit for each of the applicable items listed above. Also, please submit your response in duplicate.

Translations

Any document containing a foreign language submitted to USCIS shall be accompanied by a full English translation that the translator has certified as complete and accurate, and by the translator's certification that he or she is competent to translate from the foreign language into English.

Copies

Unless specifically required that an original document be filed with an application or petition, an ordinary legible photocopy may be submitted. Original documents submitted when not required will remain part of the record, even if the submission was not required.

Address Changes

If you change your address, you may change your address by sending an email notification to: USCIS.ImmigrantInvestorProgram@dhs.gov

The USCIS appreciates and fully understands the vital importance and need for sources of Immigrant Investor capital to assist in both the recovery and the economic development within both Louisiana and Mississippi. Please do not hesitate to contact Mr. Maurice (Morrie) Berez, Program Manager for the USCIS Foreign Trader and Regional Center should you have any questions or have a need for guidance to quickly resolve any of the nine (9) items cited in this RFE.

Sincerely,

Barbara Q. Velarde

4. Using the IMPLAN Model to Calculate National Multipliers

The IMPLAN model is a regional input/model developed and maintained by the Minnesota IMPLAN group, headquartered in Minneapolis. The basic model was originally developed by the USDA Forest Service in cooperation with the Federal Emergency Management Agency and the USDI Bureau of Land Management.

The IMPLAN model has certain similarities with the RIMS (Regional Input/Output Modeling system) model developed by the Department of Commerce, but is generally thought to contain several superior features besides its greater ease and flexibility of use. These improvements can be summarized as follows:

1. The Commerce Department is not permitted to publish data in any category where there are less than three organizations in a given economic area. IMPLAN has developed an algorithm to fill in the missing numbers.

2. IMPLAN has introduced improved methods of accounting for flows of goods and services among counties.

3. IMPLAN permits aggregation of any subset of industries for calculation and tabular purposes. This is useful when results are desired for, say, 1-digit industries instead of the 509 industries actually found in the input/output table.

4. As seen in the tables throughout this text, IMPLAN estimates three separate effects, labeled "direct", "indirect" and "induced". The direct effects are those entered by the user. The other two columns represent the multiplier effects, but they are usually combined in other input/output models. Briefly, the indirect effect represents purchases made by businesses when their sales rise. For example, a restaurant might order more food produced or sold in the region, or an automobile plant might order more steel. The induced effect represents the additional household spending because income has risen. For example, casino workers would spend their paychecks on various goods and services, some of which are produced in the region. In general, then, the larger the region under consideration, the larger the multipliers would be.

The following material, taken from the IMPLAN manual, describes the input/output process in more detail.

Input/output analysis is a means of examining relationships within an economy, both between businesses and between businesses and final consumers. It captures all of the monetary market transactions for consumption in a given time period. The resulting mathematical formulae allow examination of

the effects of a change in one or several economic activities on an entire economy.

A descriptive model includes information about local economic interactions known as regional economic accounts. These tables describe a local economy in terms of the flow of dollars from purchasers to producers within the region. The initial IMPLAN data details all purchases, including imported goods and services. When regional economic accounts are created, imports to the region are removed from the initial data, allowing examination of local inter-industry transactions and final purchases.

The regional economic accounts are used to construct local level multipliers. Multipliers describe the response of the economy to a stimulus (a change in demand or production). The multipliers represent the Predictive Model.

Purchases for final use (final demand) drive an input/output model. Industries producing goods and services for consumption purchase goods and services from other producers. These other producers, in turn, purchase goods and services. These indirect purchases (or indirect effects) continue until leakages from the region (imports, wages, profits, etc.) stop the cycle.

The indirect effects and the effects of increased household spending (induced effects) can be mathematically derived as sets of multipliers. The derivation is called the Leontief inverse. The resulting sets of multipliers describe the change of output for each industry caused by a one dollar change in final demand for any given industry.

The input/output analysis framework is similar to a financial accounting framework that tracks purchases of and expenditures on goods and services in dollars. Input/output accounting traces the flow of dollars between businesses and between businesses and final consumers. An input/output accounting framework can be illustrated using classic financial accounting T-accounts, which include receipts (income) and expenditures (expenses) on each side of a "T", as shown below.

Final Consumption (or final demand) drives input/output models. Industries respond to meet demand directly or indirectly, by supplying goods and services to industries responding directly. Each industry that produces goods and services generates demands for other goods and services, and so on. Multipliers describe these iterations.

There are three different multipliers developed for predictive modeling: Type I, Type II, and Type SAM. We start with the transactions table and derive a coefficient by dividing each industry column by the column total. This coefficient matrix is also known as the ***A Matrix***.

Appendix B. Resume of Dr. Michael K. Evans

CURRENT AND PREVIOUS POSITIONS

• Chairman, *Evans, Carroll & Associates, Inc.*, 1980-present (previously Evans Economics)

Economic consulting firm specializing in EB-5 immigration analysis, economic impact studies of development projects and new construction, models of state and local tax receipts, impact of current and proposed government legislation, and construction of econometric models for individual industries and companies.

• Chief Economist, *American Economics Group*, 2000-present.

Built a comprehensive state modeling system that provides economic analysis for a variety of consulting projects (see below).

• Clinical Professor of Economics, Department of Managerial Economics and Decision Sciences (MEDS), Kellogg Graduate School of Management, Northwestern University, 1996-99.

Taught courses in macroeconomics and business forecasting. Wrote textbooks for both courses.

• Winner of Blue Chip Economic Indicator Award for most accurate macroeconomic forecasts during the past four years, November 1999

• Founder and President, *Chase Econometric Associates*, 1970-1980

• Assistant and Associate Professor of Economics, Wharton School, University of Pennsylvania, 1964-69. Co-developer of the original Wharton Model.

• Visiting Professor, Radford University, (Radford, VA), 1987

Chairman of Institute for International Economic Competitiveness

• Visiting Lecturer, Hebrew University (Jerusalem), 1966-67

Built econometric model of the Israeli economy

Ph. D. in Economics, Brown University. Dissertation, "A Postwar Quarterly Model of the United States Economy, 1948-1962". A. B. in Mathematical Economics, Brown University

PREVIOUS ACTIVITIES AND EDUCATION

- Contributing Editor, *Industry Week*

Wrote a column in each issue on economic and financial trends as they impact the mfg sector.

- Editor, *The Evans Report*

Weekly newsletter discussing economic trends and financial markets. Pioneered the concept of the Monthly Tracking Model to incorporate recent economic releases into the overall economic forecast, including methods to predict these economic data.

- Consultant, *National Printing Equipment and Supply Association*

Prepares quarterly forecasts of shipments of printing equipment and graphic arts supplies by product line, based on an econometric model constructed for NPES. Also prepares analysis and forecasts of exports and imports by principal product line.

- Consultant, *APICS -- The Educational Society for Resource Management*,

In 1993, designed and developed the *APICS Business Outlook Index*, which uses survey data collected by the Evans Group to measure current production, production plans, shipments, employment, new orders, unfilled orders, inventory stocks, and the comparison of the actual to desired inventory/sales ratio to predict short-term changes in mfg sector activity. The results of this survey appeared every month in *APICS: The Performance Advantage*

- Consultant, *American Hardware Mfg Association*

Wrote a separate weekly edition of the Evans Report analyzing recent trends in the hardware and housing industries, including forecasts of the hardware industry based on an econometric model developed for AHMA.

- Board of Economists, *Los Angeles Times*

Wrote column every 6 weeks (5 other economists on the Board)

- Columnist, *United Press International*

  Wrote twice-weekly column, "Dollars and Trends"

- Consultant, Senate Finance Committee,

  Built the first large-scale supply-side model of the U. S. economy

- Consultant, Environmental Protection Agency and Council on Environmental Quality

  Estimated inflationary impact of government regulations

- Consultant, National Aeronautics and Space Administration

  Estimate impact of R&D spending on productivity growth

- Consultant, U. S. Treasury

  Estimated impact of investment tax credit and accelerated depreciation on capital spending by industry

- Consultant, U. S. Department of Agriculture

  Built large-scale econometric model of agricultural sector of U. S. economy

- Consultant, Organization of Economic Cooperation and Development

  Built econometric model of the French economy

SAMPLE OF RECENT CONSULTING PROJECTS

A. Economic Impact of EB-5 Immigrant Investor Programs and New Markets Tax Credits

- Calculated the number of jobs created for a film production company in New York City.

- Calculated economic impact of small-scale rooftop solar panels in various counties in California.

- Calculated economic impact of 7 different types of proposed businesses for a proposed regional center in the Bay Area of California.

- Determined the economic impact of a new biological research park, office building, and logistics center in Wooster, Ohio.

- Calculated the economic effect of a mixed-use urban renewal project in Cleveland, Ohio.

- Calculated economic impact of 14 different types of proposed businesses for a proposed EB-5 regional center that would include the entire state of Florida.

- Calculated economic impact of dairy farm and cheese processing plant in Northern California.

- Determined economic impact of a shipyard, food processing plant, and semiconductor plant for a proposed regional center in Louisiana and Mississippi.

- Calculated the economic impact of a new gaming casino in Natchez, Mississippi.

- Calculated the economic impact of a retail shopping center in suburban Los Angeles County.

- Prepared an economic impact analysis for the "timber to homes" project for a proposed regional center in Colorado.

- Calculated the economic impact for a proposed regional center in Baltimore, Maryland that would include the rebuilding of depressed areas in East Baltimore and along the riverfront.

- Prepared the economic analysis for a proposed EB-5 regional center for the entire state of Florida that included impact calculations for 14 different types of industries.

- Prepared the economic analysis for a proposed EB-5 regional center in the San Francisco Bay area that included calculations for 10 different types of industries.

- Prepared economic impact calculations for proposed EB-5 regional centers in New York City and Northeastern New Jersey.

- Calculated the economic impact of a rehabilitated office building in Albuquerque, New Mexico, including the increase in high quality jobs.

- Calculated the economic impact of a rehabilitated skilled nursing center in East Los Angeles, California, including the impact on nearby census tracts.

- Calculated the economic impact of development of warehouse and light industrial mfg space in Las Vegas, Nevada.

- Calculated the economic impact of rehabilitation and expansion of a vacation and health spa in Sharon Springs, New York

- Calculated economic impact of revitalizing an old resort hotel and adding new facilities for Lake Geneva, WI.

- Calculated the employment and tax effects for a portfolio of projects undertaken under the New Market capital program.

- Calculated generic employment changes for proposed EB-5 project for an Inland Port in Palm Beach County, FL

- Calculated the economic impact of construction of El Monte Village in El Monte, CA.

- Built an input/output model of Guam to be used to calculate economic impact of EB-5 projects. Used this model to estimate impact of various proposed projects.

- Calculated the economic impact of moving the Social Security Administration building in Birmingham, AL, and revitalizing the surrounding neighborhood.

- Calculated the economic impact of rehabbing and expanding the Everett Mall in Everett, WA.

- Determined the economic impact of building a new medical center in Charleston, SC

- Calculated economic impact of expanding Sugarbush resort in Vermont. Study included expansion of existing facilities and addition of new facilities.

- Calculated economic impact for new market tax credit program in Portsmouth, N.H. Study included both overall economic impact, and the increase in employment and income and the decrease in the unemployment rate and incidence of poverty in individual census tracts.

- Calculated the economic benefits of EB-5 programs for foreign investors for a mixed-use construction project, including a hotel, retail stores, apartments, and a sports stadium in the Washington, D. C. metropolitan area

- Calculated the economic benefits of EB-5 programs for foreign investors for a mixed-used retail shopping center in the New York City metropolitan area.

- Calculated the economic benefits of EB-5 programs for foreign investors for proposed shopping centers in five separate counties in Southern California, including differential impacts of building the shopping centers in different counties.

B. Projects for State and Local Governments

- Constructed an econometric model for the State of New York and determined the change in employment, labor income, and tax revenues for 43 different tax changes proposed by the Governor's office.

- Constructed a detailed econometric model for the State of Pennsylvania to determine the economic impact of the complete panoply of state taxes levied; the model contains over 1,000 equations. In cooperation with American Economics Group, the model was developed to simulate the effect of changes in any state tax rate on households and businesses by income deciles, household status, age of individuals, size of households, and many other demographic variables. The change in business taxes can also be simulated for detailed industry classifications.

- Determined whether the Washington, D.C. water and sewer authority should accept a high bid for a new waste disposal system. Decision to reject has saved the authority over $200 million, as construction prices turned down sharply as predicted.

- Built an econometric model to determine the "tax gap" caused by Internet sales for the state of Minnesota.

- Determined appropriate levels of shelter grants individual counties in New York State, and for utility allowances in New York City. Reviewed and prepared testimony in ongoing court cases in these areas.

• Calculated the economic impact of the revitalization of downtown Milwaukee, Wisconsin.

C. Economic Impact of Casino Gaming

• Built an econometric model to predict the growth of the gaming industry over the next decade, and the economic impact of that industry on employment and tax revenues at the Federal and state levels.

• Estimated the economic impact of Indian casino gaming nationally and for the State of Wisconsin.

• Determined the economic impact of the Oneida Indian gaming casino on the Green Bay metropolitan area.

• Estimated the negative economic impact on the Milwaukee area if a new Indian gaming casino were to be built in Kenosha, Wisconsin.

D. Economic Impact of Smoking Bans and Higher Taxes

• Testified on economic impact of smoking bans in Canada; certified as an expert witness by the Court.

• Examined the impact of smoking bans on restaurant sales in several different locations in the U.S. to determine how much sales changed when these bans were imposed, and the differential effects depending on whether these bans were partial or total.

• Determined the cross-border effects on retail sales from differential rates in cigarette, gasoline, and alcohol excise taxes

• Determined the economic impact of higher cigarette taxes on minority group employment.

• Estimated the economic impact and loss of Federal and state tax revenues when higher cigarette prices lead to increased smuggling.

E. Consulting Projects for Travel and Tourism

• Built an econometric model to predict tourism trips and revenues for the major regions of the U.S. economy.

• Constructed econometric models to predict tourism in Las Vegas and Orlando.

• Using the IMPLAN model, predicted economic impact of tourism and travel expenditures for all counties in Pennsylvania.

F. Other Private Sector Consulting Projects

• Calculated the economic impact of proposed EPA bans on fluoropolymer production.

• Estimated the size and economic importance of the fluoropolymer industry, and calculated economic impact of shutting down domestic production.

• Built an econometric model to examine how U.S. tax and regulatory policies help determine whether the gold mining industry would invest in the U.S. or other countries. Testified before Congress to help defeat legislation inimical to the mining industry.

• Built an econometric model to predict consumer bankruptcies, based on recent growth in consumer credit outstanding, the overall economic environment, and recent changes in credit regulations

• Estimated the economic impact of the ethanol subsidy on the U.S. economy and Farm Belt States, including the impact on the balance of payments, employment, and tax receipts. Testified before Congress to help pass legislation to extent subsidies to the ethanol industry.

• Built an econometric model to determine the impact of updating and improving the system of locks on the Upper Mississippi River on corn prices and exports, farm income, and the overall economy.

Business Expansion Plan

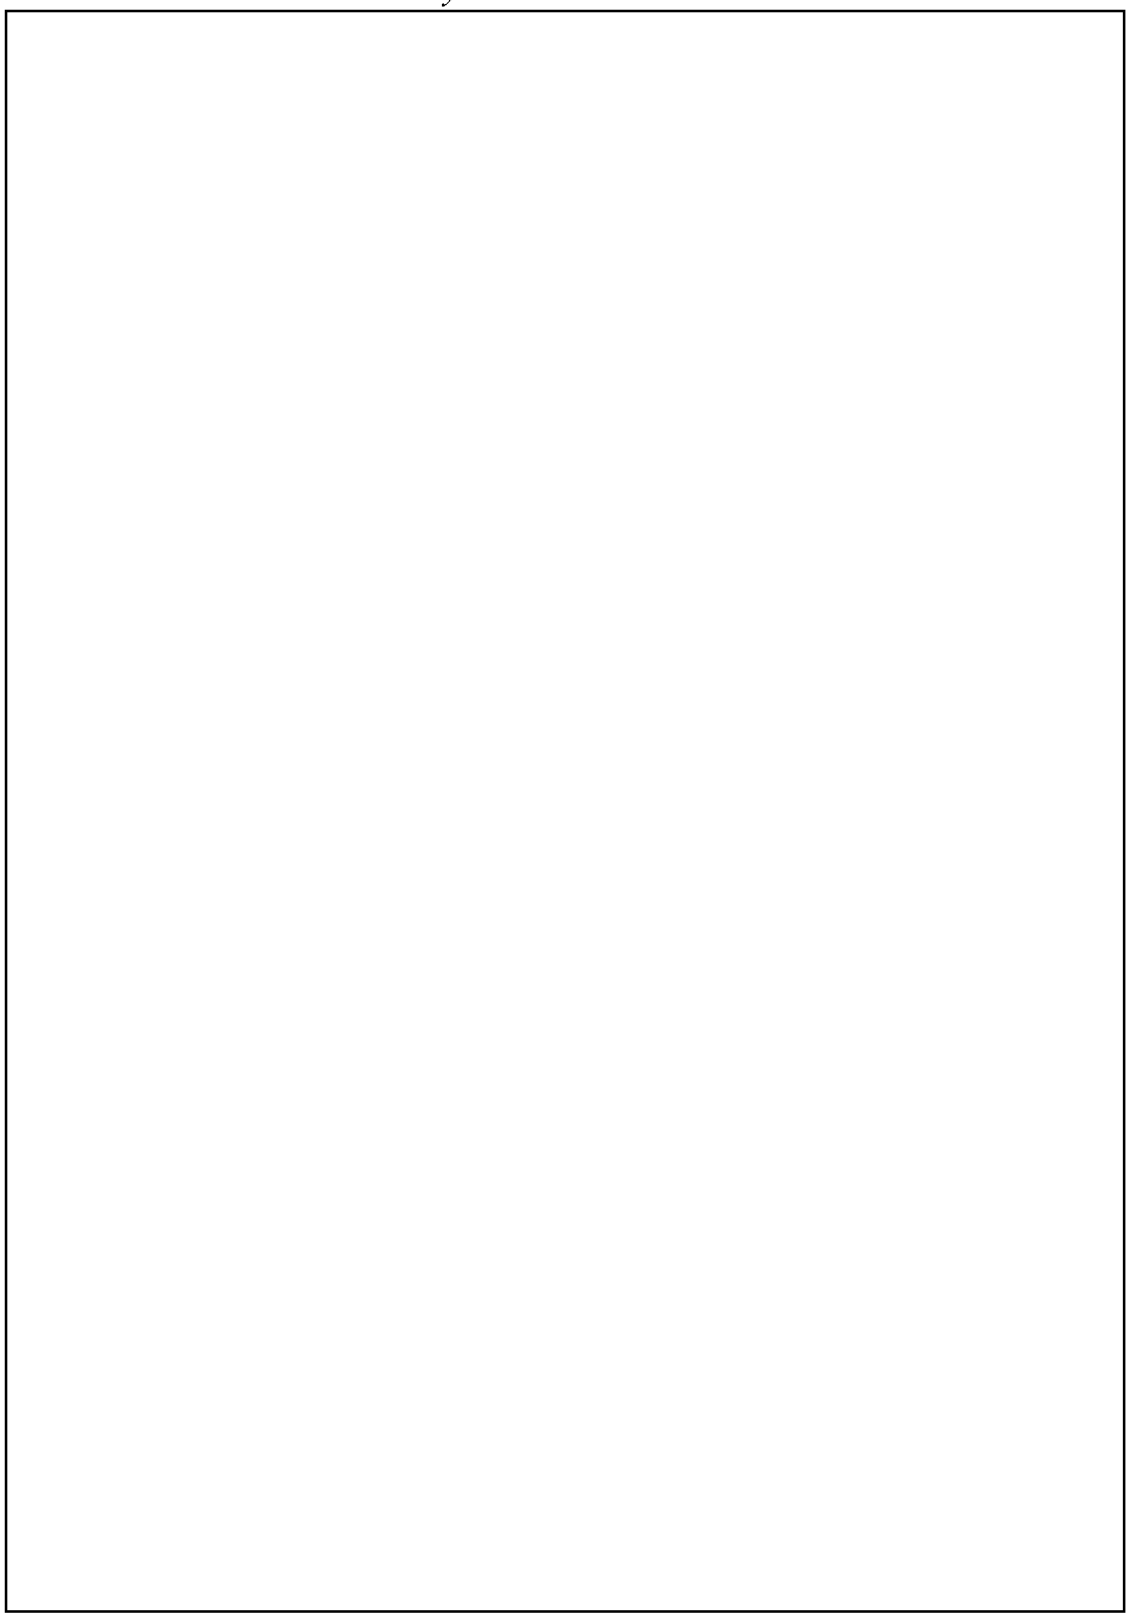
Date: December 7, 2009

A NOTE ABOUT CONFIDENTIALITY

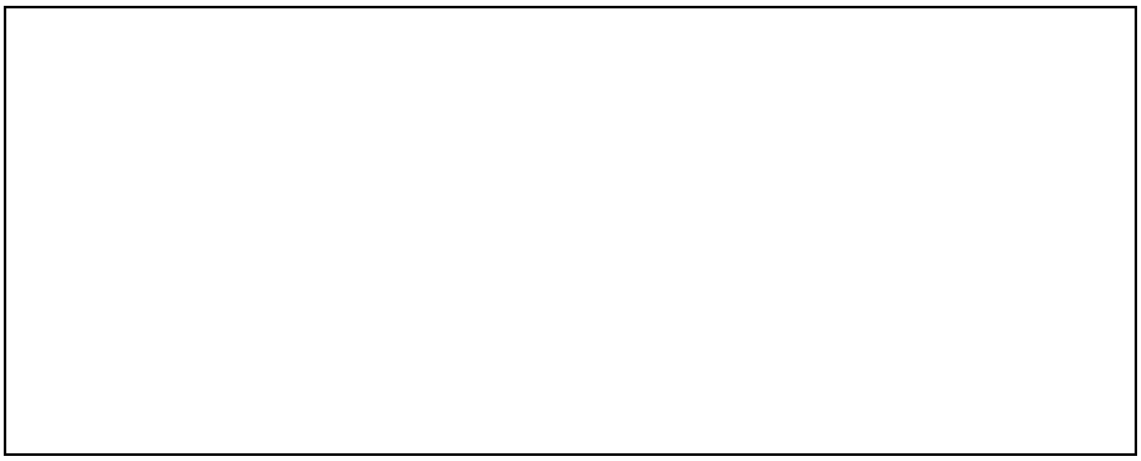
The contents of this business plan are highly proprietary, and should not be shared with any person other than officials of the U.S. Department of Homeland Security and USCIS who require this plan in order to analyze the application of Gulf Coast Funds Management LLC for an EB-5 regional center to expand coverage in the Commonwealth of Virginia.

(b)(4) Gulf Coast Funds Management Regional Center Business Expansion Plan

1.0 Executive Summary



2.0 Company Summary



3.0 The EB-5 Immigrant Investor Program

The management company will manage EB-5 investment funds. The EB-5 immigrant investor program is described as follows by the United States Department of Homeland Security:

Immigration through Investment Overview

Under section 203(b)(5) of the Immigration and Nationality Act (INA), 8 U.S.C. 81153(6)(5), 10,000 immigrant visas per year are available to qualified individuals seeking permanent resident status on the basis of their engagement in a new commercial enterprise.

Of the 10,000 investor visas (i.e., EB-5 visas) available annually, 3,000 are set aside for those who apply under a pilot program involving a USCIS-designated Regional Center. A regional center is an entity, organization or agency that has been approved as such by the USCIS; focuses on a specific geographic area within the United States; and seeks to promote economic growth through increased export sales, improved regional productivity, creation of new jobs, and increased domestic capital investment.

"Alien investors" must demonstrate that a "qualified investment" (see below) is being made in a new commercial enterprise or approved Regional Center; and, show, using reasonable methodologies, that 10 or more jobs are actually created either directly or indirectly from the new commercial enterprise through revenues generated from increased exports, improved regional productivity, job creation, or increased domestic capital investment resulting from the pilot program.

Eligibility

Permanent resident status based on EB-5 eligibility is available to investors, either alone or coming with their spouses and unmarried children under 21 years of age. Eligible aliens are those who have invested – or are actively in

the process of investing – the required amount of capital into a new commercial enterprise that they have established. They must further demonstrate that this investment will benefit the U.S. economy and create the requisite number of full-time jobs within the U.S.

In general, "eligible individuals" include those:

1. Who establish a new commercial enterprise by: creating an original business; or purchasing an existing business and simultaneously or subsequently restructuring / reorganizing the business such that a new commercial enterprise results; or expanding an existing business by 140 percent of the pre-investment number of jobs or net worth, or retaining all existing jobs in a troubled business that has lost 20 percent of its net worth over the past 12 to 24 months; and

2. Who have invested – or who are actively in the process of investing – in a new commercial enterprise: at least $1,000,000; or at least $500,000 where the investment is being made in a "targeted employment area," which is an area that has experiences unemployment of at least 150 percent of the national average rate or a rural area as designated by OMB; and

3. Whose engagement in a new commercial enterprise will benefit the United States economy and: create full-time employment for not fewer than 10 qualified individuals; or maintain the number of existing employees at no less than the pre-investment level for a period of at least two years, where the capital investment is being made in a "troubled business," which is a business that has been in existences for at least two year and that has lost 20 percent of its net worth over the past 12 to 24 months.

RISK FACTORS

(b)(4)

(b)(4)

Immigration risks

The investor himself and herself must meet the requirements under the EB-5 program. Each purchaser of a Unit must understand that the Fund, the management company and each of their affiliates make no representation or warranty of any kind concerning whether an investment in the Fund will meet the requirements of the EB-5 program or other U.S. immigration requirements. Each investor in a Unit must further understand that there can be no assurance that an investment in the Unit will result in his or her family receiving an EB-5 visa, conditional resident status or permanent resident status. Please carefully consider the following immigration risks, and discuss these and other immigration risks with your personal immigration lawyer.

As a Unit holder, you will be subjected to certain general immigration risks faced by all immigrants to the United States.

The process of obtaining conditional resident status and permanent resident status involves many factors and circumstances that are not within the control of the Fund. These include the investor's past history and source of funds, immigration visa backlogs, potential changes in immigration laws and regulations (including laws and regulations specific to the EB-5 immigrant investor program) and quotas established by the United States government limiting the number of visas available to qualified individuals seeking conditional resident status under the EB-5 program. Although the Fund has been structured with the objective of providing Unit holders with eligibility for conditional and permanent resident status under the EB-5 regional center provisions of the U.S. immigration laws, no assurance can be given that each Unit holder will obtain approval of his or her particular immigrant application. Purchase of a Unit does not guarantee conditional or permanent residency in the United States. Furthermore, no assurances or advice can be given that conditional resident status will be converted to permanent resident status.

An investment in a Unit is only a part of the requirement for meeting EB-5 residency status. In addition, the USCIS will require that you pass a background check.

Each immigrant investor in the United States is subjected to a thorough background check. An EB-5 immigrant investor's background (or that of an immediate family member) may not meet the USCIS criteria for temporary or permanent residency in the United States. For example, among other criteria, the following may be grounds for denial of immigration benefits for the immigrant, and/or other members of the immigrant's family: having a communicable disease (e.g., AIDS) or other dangerous contagious disease; having been at any time involved with, trafficking in, or taking, illegal drugs; having been convicted of certain crimes; having committed a fraud or misrepresentation to a U.S. Government official; or having violated U.S. immigration law in the past.

As a result of participation in the EB-5 program and as a result of your investment in the Fund, you must pay income taxes in the United States on your world-wide income. You should consult your personal tax advisor about this obligation.

As an EB-5 participant, you will have to pay taxes in the United States on your world-wide income. As a member of the Fund, which is a limited liability company, your proportionate share of the Fund's income will be "passed-through" to you for U.S. Federal income tax purposes. You will also be required to include in income your proportionate share of the taxable income of the Fund for the purposes of any state of which you are a resident. Please consult your personal tax advisor about the tax consequences of an investment in the Fund. Further information about these matters is included in this private placement memorandum under the heading "Certain U.S. Federal Income Tax Considerations," beginning on page 32.

(b)(4)

(b)(4)

[redacted]

The EB-5 regional center program is a U.S. government program that is highly regulated and that requires frequent interaction between the Fund and government officials.

The EB-5 regional center program was created by Congress, which has accorded broad regulatory powers to the Department of Homeland Security and in particular to the United States Citizenship and Immigration Service (USCIS). Currently, all EB-5 related filings are reviewed by USCIS adjudicators in the USCIS California service center. While the Fund will strive to coordinate with USCIS to achieve our investors' immigration goal, there can be no assurance that USCIS adjudicators will take a consistent position on issues arising under the program, and there can be no assurance that USCIS regulations will not change in the future. Since the laws, regulations and bureaucratic interpretations applicable to the Fund's investments are subject to change at any time, there can be no assurance that the Fund will not be required to substantially change its investment policies in the future. The EB-5 program could be discontinued or altered by Congress at any time.

It is a requirement of the EB-5 program that an immigrant investor's source of funds be proper, under U.S. immigration guidelines.

EB-5 immigrant investors must demonstrate to the USCIS that the funds they invest in the Units were obtained through lawful means. Each EB-5 immigrant investor must document, to the satisfaction of the USCIS and the U.S. State Department, that the source of funds is acceptable. The Fund, and the EB-5 immigrant investor's immigration attorney, may make a preliminary assessment, but the ultimate decision will be made solely by USCIS and the U.S. State Department. Each EB-5 immigrant investor must agree to provide information and documents to the Fund, and to allow the Fund to make further investigation, concerning the EB-5 immigrant investor's source of funds and the personal and business background of the EB-5 immigrant investor and accompanying family members.

Achieving your immigration goal of conditional and permanent resident status will require you to maintain your primary residence in the United States.

EB-5 immigrant investors who obtain conditional resident status or permanent resident status must intend to make the United States their primary residence. Conditional residents or permanent residents who maintain their primary residence outside the United States risk revocation of their U.S. residence status. Each prospective EB-5 immigrant investor should consult a competent immigration attorney to review the likelihood that the investor's immigration objectives will be achieved.

SAMPLE

USE OF PROCEEDS

(b)(4)

SAMPLE

MANAGEMENT OF GTA

The following is a description of the business backgrounds of the executive officers of GTA:

Terry McAuliffe, Chairman

Mr. McAuliffe is the Chairman of GTA. He has been a long time investor and promoter of affordable green energy projects. It is at his direction that GTA has set its goal to truly meet a higher standard among our peers stating that "no green technology is green unless it is affordable to average consumers."

Before joining GTA, Mr. McAuliffe has been a longtime business leader and successful entrepreneur for nearly four decades. He has successfully started over two dozen companies in the fields of banking, real estate, securities, marketing, renewable energy and insurance. At the age of 14, Mr. McAuliffe started his first business, McAuliffe Driveway Maintenance, where he sealed residential driveways and commercial parking lots in his local community of Syracuse, New York. In January 1988, when he was only 30 years old, Mr. McAuliffe became the youngest chairman of a federally chartered bank in the history of the United States.

Mr. McAuliffe also served as Chairman of American Heritage Homes, one of Florida's largest homebuilding companies, as well as President of American Capitol Management Company, a major developer of real estate projects. He has been an active investor in the alternative energy field for over a decade.

In addition to his successful business career, he is a longtime political leader for the Democratic Party in the United States. He started his political career in the 1980 Presidential reelection campaign of President Jimmy Carter, and at the age of 22 became the national finance director for that campaign. He then served as National Finance Chairman of the Gephardt for President committee, National Finance Chairman and the National Co-Chairman of the Clinton-Gore re-election committee. In 1993, he was named by President Clinton as Ambassador and Commissioner General of the Korean International Exposition. He was Chairman of the 53rd Presidential Inaugural Committee and Chairman of the White House Millennium Celebration. In 2000, he chaired the Democratic National Convention in Los Angeles. He was elected Chairman of the Democratic National Committee from 2001 to 2005. He is widely credited with rebuilding, reenergizing and revitalizing the Democratic Party. As Chairman of the DNC, he shattered all Party records by raising over $535 million. He also served as Chairman of the 2008 Hillary Clinton Presidential campaign. In 2009, he unsuccessfully ran for Governor of the State of Virginia.

Chairman McAuliffe received a Juris Doctor degree from Georgetown University School of Law and a bachelors degree from The Catholic University of America in Washington, D.C.

SAMPLE

THE EB-5 PROGRAM

Overview

In 1990, the U. S. Congress created the employment based 5th preference (EB-5) immigrant investor visa program. The EB-5 program offers 10,000 immigrant visas a year to qualified investors who wish to obtain residence in the United States by investing in businesses that will benefit the economy and create jobs. The EB-5 Immigrant Investor Regional Center Pilot Program ("The Pilot Program") was created by Congress in 1992 and sets aside 3,000 of the 10,000 EB-5 visas each year for people who invest in designated "regional centers."

Once a qualifying investment has been made in a regional center, an investor files a Form I-526 Immigrant Petition by Alien Entrepreneur, ("Form I-526") with the USCIS. After the USCIS approves I-526 petition, an investor files an adjustment of status application if he or she is already in the U.S. in valid non-immigrant status or ii) applies for an interview and entry visa at a U.S. embassy or consulate abroad ("consular processing"). When an adjustment of status application is approved, a conditional residence status of two years will be given to the investor. If the investor pursues consular processing, upon approval the investor and his or her family will be issued an EB-5 entry visa to the U.S. Once they enter the U.S., the two-year conditional residence status starts.

At the end of the two-year conditional resident period the investor must show that his or her investment has been sustained and the projects invested in by the regional center have created at least ten jobs for each investor. Assuming the investor provides that evidence, the USCIS will remove the conditional residence status, and the investor will receive his or her permanent residency status.

The Immigration Process

The Fund's primary role in the immigration process is to sell interests in the Fund to immigrant investors (which allow the investors to file Form I-526) and invest the investors' capital in a manner that is consistent with the EB-5 program and leads to the creation of at least ten jobs for each Unit holder in the Fund. If GTA's proposed business plan succeeds, our independent economist's report indicates that GTA will create enough jobs to meet the EB-5 program requirements for every investor in the Fund. The rest of the immigration process will be led by the immigrant investor and his or her independent immigration counsel. The management company will maintain a current record of jobs created by the Fund's investment activities. The management company will assist each Unit holder by providing information about job creation to the USCIS in the manner required by the EB-5 program. Upon the initial conditional residency filing, the Fund will certify to the USCIS with respect to the projected number of jobs that will be created. Two years after an immigrant investor is granted conditional resident status, the investor must file with the USCIS Form I-829, Petition by Entrepreneur to Remove Conditions ("Form I-829") to convert his or her status to permanent residency. At that

SAMPLE

time, the Fund will allocate to each Unit holder ten jobs from those jobs created and maintained by GTA.

Frequently Asked Questions

The following are some frequently asked questions about the EB-5 program, along with answers to the questions:

How much do I need to invest to receive conditional and ultimately permanent residency status for myself and my family members?
If you invest in a regional center, like ours, you need to invest $500,000 if the investment is made in a high unemployment or rural area. There are also other fees such as legal fees for your immigration and tax counsel and application fees paid to USCIS.

What is the region covered by the Gulf Coast Funds Management regional center?
Our regional center covers the entire Commonwealth of Virginia.

Do I have to live in Virginia to participate in this program?
No. You do not have to live in Virginia. You do not even have to ever visit the region.

When will I have to pay $555,000?
When you are ready to file your application for the I-526, you would send us $500,000 and wire $55,000 to the placement agent.

What do I have to do to get my visa application approved?
Normally, you will get an American immigration lawyer to help you in the visa application process. If you do not have an immigration lawyer, the Placement Agent suggests that you use David Lu, Esq., an immigration lawyer with whom we work with on a regular basis. The lawyer will help you file a Form I-526. With your Form I-526, you will have to submit proof that the source of your $500,000 investment is lawful.

Once the USCIS approves your Form I-526 you will need to adjust your status if you are already living in the U.S. in non-immigrant status or you will have to schedule an interview at a U.S. embassy or consulate abroad. In either case, you will have to submit the same type of documentation that other visa applicants to the United States are required to submit. Here is a general description, from the U.S. government's web site, of certain requirements for receiving a visa:

> **VISA INELIGIBILITY / WAIVER**
> The immigration laws of the United States, in order to protect the health, welfare, and security of the U.S., prohibit the issuance of a visa to certain applicants. Examples of applicants who must be refused visas are those who: have a communicable disease, or have a dangerous physical or mental disorder; have committed serious criminal acts; are terrorists, subversives, members of a totalitarian party, or former Nazi war criminals; have used illegal means to enter the U.S.; or are ineligible for citizenship. Some former exchange visitors must live abroad for two years. Physicians who intend to practice medicine must pass

SAMPLE

a qualifying exam before receiving immigrant visas. If found to be ineligible, the consular officer will advise the applicant of any waivers.

OTHER IMPORTANT INFORMATION

Documents for Visa Application

All applicants must submit certain personal documents such as passports, birth certificates, police certificates, and other civil documents, as well as evidence that they will not become public charges in the United States. The consular officer will inform visa applicants of the documents needed as their applications are processed.

Medical Examinations

Before the issuance of an immigrant visa, every applicant, regardless of age, must undergo a medical examination. The examination will be conducted by a physician designated by the consular officer. Examination costs must be borne by the applicant, in addition to the visa fees.

Visa Fees

The cost of each immigrant visa application may vary for additional visa fees apply. For up to date immigration visa fee costs, please consult your immigration attorney or please visit the USCIS fee schedule web page.

How will my money be invested?

Your money will be invested in our regional center Fund, which will immediately re-invest your money in GTA. To meet the immigration goals of the EB-5 regional center program, GTA must create at least 10 new jobs (both direct and indirect or induced jobs) for every $500,000 we invest.

How will the investment in GTA be structured?

All of the proceeds of this offering will be invested in convertible preferred stock of GTA. We will receive one share of convertible preferred stock for each $500,000 we invest in GTA. Investors will be charged a $55,000 administrative fee by the placement agent when the Unit is purchased. The placement agent will use this administrative fee to pay legal and other administrative fees associated with marketing the Units world-wide. Five years after each such investment, each share of convertible preferred stock will be automatically converted into shares of common stock of GTA having an estimated fair market value of $555,000.

When will my visa become permanent?

Two years after you receive your conditional resident status, you must apply for permanent residency. At that time, we will supply documents for your Form I-829 petition to show that your money has been invested in the region and that the Fund's investment has created at least ten jobs. Once your application is approved, you will

SAMPLE

become a permanent resident of the United States, and may soon apply for full citizenship if you desire.

(b)(4)

SAMPLE

CERTAIN U.S. FEDERAL INCOME TAX CONSIDERATIONS

The following discussion about certain U.S. federal income tax and other tax considerations that you should weigh prior to investing in a Unit is merely a presentation of certain tax issues that generally apply to all investors in EB-5 funds. You should not consider this discussion to be tax advice, applicable to your particular situation or a full discussion of all material United States, state, local and foreign tax consequences of an investment in the Fund or your status as U.S. tax resident or non-resident and you should consult with your personal tax advisor about these, and all other issues relevant to your personal decision to invest in a Unit. Neither the Fund nor the management company is qualified to provide the tax advice you will need. You cannot use this summary for the purpose of avoiding United States federal tax penalties.

The following discussion is based upon the Internal Revenue Code of 1986 (the "Code"), the applicable Treasury Regulations promulgated or proposed under the Code (the "Regulations"), current positions of the IRS contained in published revenue rulings and revenue procedures, current administrative positions of the IRS, and existing judicial decisions, as in effect on the date of this Memorandum, all of which are subject to change or modification, with or without retroactive effect, at any time.

No assurance can be given as to the future status of federal income tax laws or other tax laws as they pertain to limited liability companies of the type described herein. It is likely that changes to the Code will be proposed in the future. The effect of such proposals on the Fund and on an investment therein cannot be analyzed. Accordingly, potential investors are urged to consider on-going developments regarding changes in the federal income tax law and other tax laws and to consult their own advisors in assessing the risks associated with an investment in the Fund.

Classification of the Fund

The Fund will be treated as a partnership for federal income tax purposes under the "check the box" Regulations. Under these regulations, an unincorporated domestic entity, such as the Fund, with at least two members will be taxed as a partnership if no election is made to be taxed as a corporation. Accordingly, the discussion herein relating to partnerships and partners generally will be applicable to Unit holders in the Fund.

Partnership Taxation in General

Under the Code, a partnership pays no federal income tax, although it may be required to withhold and pay taxes on behalf of certain of its partners. Rather, each partner reports on his federal income tax return his distributive share of all items of income, gain, loss, deduction, credit and tax preference of the partnership, whether or not the partnership makes any actual distribution to the partner during the taxable year. Thus, it is possible that distributions from the Fund will not be sufficient to pay tax liabilities with respect to the tax income and gain allocated to a Unit holder and that the only source of payment of such tax liabilities would be from the Unit holder's funds from sources

other than the Fund.

The extent to which a Unit holder may utilize Fund losses in any tax year is limited to the adjusted tax basis of his interest in the Fund at the end of the Fund tax year (See "Basis of Units"). In addition, a Unit holder may not deduct Fund losses in excess of the amount the Unit holder is considered "at risk" with respect to the Fund under Code Section 465 (See "At Risk Limitations"). A Unit holder generally may use his distributive share of any partnership losses allowable after applying the foregoing loss limitation only to offset his income from other passive sources (see "Passive Activity Loss Limitations").

Basis of the Units

A Unit holder's initial tax basis for his Units will be the amount of money he contributes to the Fund.

A Unit holder's basis is his Units increased by (a) his share of the non-recourse liabilities of the Fund, and (b) his share of profits. The adjusted tax basis of his Units will be decreased, but not below zero, by (1) distributions to the Unit holder by the Fund; (ii) reductions in his share of the non-recourse obligations of the Fund; (iii) his share of the losses of the Fund; and (iv) his share of Fund expenditures not chargeable to his capital account.

Under Regulation Section 1.752-1(a)(2), a partnership liability is a non-recourse liability to the extent that no partner or related person (for the purpose of Regulation Section 1.752-4(b)) bears any economic risk of loss. A partnership liability generally is not considered non-recourse to the extent that any partner guarantees the payment of such liability. If a Unit holder or a "related" person guarantees all or a portion of the non-recourse liabilities of the Fund, the other Unit holders' tax basis in their Units will not include such guaranteed portion of the Fund's non-recourse liabilities.

Similarly, if a partner or a person related to a partner loans funds to a partnership and the other partners are not personally liable for the repayment of the loan, only the lending partners may include that loan in the basis of their partnership interests. For example, if a Unit holder or one of his affiliates makes a loan to the Fund, the other Unit holders would not include any portion of such a loan in the basis of their Units.

The Fund may be a "tiered" partnership if it owns interests in other entities taxed as partnerships for federal income tax purposes. With respect to "tiered" partnerships, the Regulations provide that the "upper-tier" partnership's share of the liabilities of the "lower-tier" partnership will be treated as liabilities of the upper-tier partnership for purposes of applying Code Section 752 to the partners of the upper-tier partnership (Regulation Section 1.752-4(a)).

If a Unit holder's basis in his Units is reduced to zero, the amount of any distributions (including any deemed distributions due to a reduction in Fund non-recourse

liabilities) in excess of his share of the Fund's taxable income for the year will be treated as capital gain, except to the extent that ordinary income treatment is required for his *pro rata* share of depreciation recapture.

A partner may not deduct his share of losses of a partnership to the extent such losses exceed the partner's basis for his interest in the partnership. Any losses that are not currently deductible by a partner due to this limitation may be deducted when and to the extent the partner's basis is increased (for example, by the allocation of partnership income). The ability of a partner to claim his share of partnership losses will also depend on the impact of the "at risk" rules of Code Section 465 (see "At Risk Limitations") and the passive activity loss limitation rules of Code Section 469 (see "Passive Activity Loss Limitations").

Allocations of Profits and Losses

Under Code Section 704, a partner's distributive share of the income, gain, loss, deduction, or credit of a partnership is determined by reference to the partnership agreement, unless the allocation contained in the agreement does not have "substantial economic effect," in which case the allocation is determined by reference to the partners' interests in the partnership, taking into account all facts and circumstances.

Although it is intended that the Fund's allocations will be in accordance with the Unit holders' interests in the Fund, it is possible that the Internal Revenue Service will challenge the Fund's tax allocations and attempt to reallocate tax items among the Unit holders. Any such reallocations of tax items may have adverse tax and financial consequences to a Unit holder.

"At Risk" Limitations

Code Section 465 limits the amount of losses that a partner can deduct in a particular year to the amount that such partner is considered "at risk" at the close of the partnership's taxable year. Generally, a taxpayer is considered "at risk" to the extent of (i) the amount of money and the adjusted basis of property he contributes to an activity, plus (ii) any amounts borrowed with respect to an activity for which the taxpayer is personally liable or for which the taxpayer has pledged property (other than property used in the activity) as security. A taxpayer will generally not be considered "at risk" with respect to amounts protected against loss through non-recourse financing, guarantees, stop loss agreements or similar arrangements.

A taxpayer generally is not considered to be "at risk" for non-recourse obligations. Losses not deductible by reason of the "at risk" rules may be carried forward indefinitely and deducted at such time as the taxpayer becomes "at risk" to a greater extent with respect to the activity.

DRAFT

Passive Activity Loss Limitations

Code Section 469 generally provides that losses attributable to "passive activities" may be used only to offset income from passive activities. Code Section 469 applies to individuals, estates, trusts, personal service corporations (corporations providing services that are substantially performed by owner-employees), and closely-held corporations (corporations having 5 or fewer shareholders who own more than 50% in value of the stock).

Code Section 469 defines a "passive activity" as (i) the conduct of a trade or business in which the taxpayer does not materially participate or (ii) any rental activity (without regard to participation). Under Code Section 469, the interest of a limited partner in a limited partnership is not considered an interest with respect to which a person materially participates, except as provided in regulations. Accordingly, a Unit holder's investment in the Fund will be a passive activity, and any Fund losses allocated to the Unit holders will constitute passive losses.

Under Code Section 469, passive losses generally may be used only to offset passive income until the taxable year in which the taxpayer disposes of his interest in the activity producing the passive losses.

Passive income is defined as the income from passive activities. Passive income does not include (i) income received as salary or wages; (ii) income derived from a trade or business in which the taxpayer materially participates ("active income"); (iii) interest, dividends, annuities or royalties ("portfolio income") not derived in the ordinary course of business; (iv) gain or loss from the disposition of property used in the ordinary course of business producing portfolio income; or (v) gain or loss from the disposition of property held for investment which is not considered to be an interest in a passive activity.

Passive losses that are not deductible in a particular year may be carried forward indefinitely and used to offset passive income in subsequent years. In addition, upon a fully taxable disposition of a taxpayer's entire interest in the passive activity (other than to a related party), any unused passive losses from the activity for the year that have been carried forward, and the loss, if any, on the disposition, may be applied first to offset any income from that activity for the year (including the gain, if any, from the disposition); second, to offset any other passive income for the year; and third, any remaining unused passive losses from the activity may be used to offset the taxpayer's active and portfolio income.

Based on the foregoing, a Unit holder may use any Fund losses allocated to him only to offset his passive income. If the Fund losses are not fully deductible in the year incurred, they may be applied against passive income (that is not portfolio income) in future years. If any unused losses from the Fund remain when the Unit holder disposes of his entire interest in the Fund, these losses may be used in full at such time, first against passive income, and then against any other income of the Unit holder.

The foregoing analysis assumes that the Fund constitutes a single "activity" for purposes of Code Section 469. If the Fund consisted of more than one activity, the passive activity loss limitations would apply separately to each such activity.

The Regulations provide flexibility in grouping a taxpayer's trade or business activities and rental activities for purposes of applying the passive activity rules. In this respect, one or more trade or business activities or rental activities may be treated as a single activity if the activities constitute an appropriate economic unit for the measurement of gain or loss for the purposes of Code Section 469. However, generally rental activities may not be grouped with a trade or business activity. Further, a taxpayer that owns an interest as a limited partner or limited entrepreneur (e.g., a member of an LLC who does not actively participate in the management of the LLC) may not group the following activities with any other activity: (i) holding, producing or distributing motion picture films or video tapes, (ii) farming, (iii) leasing personal property, (iv) exploring for or exploiting oil and gas resources, and (v) exploring for or exploiting geothermal deposits. A partnership must group its activities under the rules of the Regulations and once the partnership groups its activities, the partner may group those activities with each other, with activities conducted directly by the partner, and with activities conducted through other C corporations subject to Code Section 469, S corporations and partnerships, except that a partner may not treat activities grouped together by any 469 entity as separate activities.

Whether or not the Fund's activities are aggregated into a single activity should not affect a Unit holder's ability to offset passive losses from one Fund activity against passive income of another Fund activity. However, any previously suspended passive losses from a particular activity that is part of a single activity will not become deductible against non-passive income upon a disposition of that particular activity alone, but only upon a taxable disposition by the Fund of all of its interest in the single activity, or the Unit holder's disposition of his Units. Further, the Fund's debt investments or equity investments in C corporations may produce interest income or dividend income, respectively, that is classified as portfolio income for purposes of Code Section 469, and the Fund's other equity investments may produce losses classified as passive under Code Section 469, and in this situation a Unit holder's share of passive losses may not be utilizable to offset his share of portfolio income.

Distributions

Distributions (which include any deemed distribution arising from a reduction, by repayment or otherwise, in Fund liabilities) made to a Unit holder generally do not result in any recognition of gain for federal income tax purposes to the extent the amount of cash or debt reduction does not exceed the basis of the Unit holder's Units. A Unit holder's adjusted tax basis in his Units is reduced by the amount of the distribution. Distributions of cash (including reductions in liabilities) by the Fund in excess of a Unit holder's adjusted tax basis in his Units will result in the recognition of gain to the extent of such excess. Such gain is considered gain from the sale or exchange of the Units by

the Unit holder and in certain cases may be treated in part as ordinary income because of the depreciation recapture provisions. (see "Sale or Disposition of Units").

Sale or Disposition of Units

Upon a sale of a Unit, a Unit holder will realize gain or loss in an amount equal to the difference between the amount realized and his adjusted tax basis in the Unit. Under Code Section 751(a), any gain realized by a selling partner is taxed as ordinary income to the extent of the partner's *pro rata* share of "ordinary income assets" of the partnership. The balance of gain, if any, or the loss is treated as a capital gain or loss. In determining the amount received upon the sale or exchange of a Unit, a Unit holder must include, among other things, his allocable share of the outstanding amount of the indebtedness to which the Fund's property is subject. Therefore, it is possible that the gain realized on the sale of a Unit may exceed the cash proceeds of such sale. As a result, in some cases, the income taxes payable with respect to such gain may exceed such cash proceeds.

Certain Deductions to Be Claimed

Organization, Start-Up and Syndication Costs. Under the Code, neither a partnership nor its partners may deduct amounts paid or incurred in the promotion and sale of the interests in the partnership ("syndication" expenses), including those amounts paid as commissions, professional fees, and printing costs. These expenses must be capitalized and may not be amortized. Under the Regulations, the following expenses constitute non-deductible syndication expenses which must be capitalized and not amortized: (i) brokerage fees; (ii) registration fees; (iii) legal fees for securities advice and advice pertaining to the adequacy of tax disclosures in the offering memorandum for securities law purposes; (iv) accounting fees for the preparation of representations to be included in the offering memorandum; and (v) costs of printing the offering memorandum.

However, to the extent a partnership pays or incurs organizational expenses incidental to the creation of the partnership or start-up expenditures with respect to an active trade or business, the partnership generally may elect to capitalize such expenditures and amortize them ratably over a period of not less than 180 months, commencing in the month in which the partnership begins business. Organizational expenses include (i) legal fees for services incidental to the organization of the partnership, such as the negotiation and preparation of a partnership agreement; (ii) accounting fees for services incidental to the organization of the partnership, and (iii) filing fees. On the other hand, organizational expenses do not include (i) expenses incurred in connection with the acquisition of partnership assets or the transfer of assets to the partnership; (ii) syndication expenses; and (iii) certain other expenses. Start-up expenditures include (i) certain expenses related to the investigation of the creation or acquisition of an active trade or business; and (ii) expenses paid or incurred pursuant to the creation of an active trade or business, which expenses would be deductible if they were incurred after the commencement of the particular business operation to which they relate.

The Fund has incurred organizational expenses which it will elect to amortize over 180 months. Additionally, the Fund has incurred or may incur start-up expenditures which the Fund, if it is eligible to do so, intends to amortize over a 180 month period. Any costs incurred by the Fund associated with offering of the Units will be capitalized by the Fund as non-deductible syndication costs.

Other Limitations on Deductions. Other limitations may apply to reduce or eliminate the deductibility by a Unit holder of his share of the Fund's expenses, including fees paid to the management company. For example, to the extent deductions of the Fund are deemed not to be incurred in connection with a business, they will be treated as miscellaneous itemized deductions that, in the case of Unit holders, are deductible only to the extent that, when taken together with other similar deductions, they exceed 2% of the Unit holder's adjusted gross income. Also, miscellaneous itemized deductions are not deductible by a Unit holder in computing the Unit holder's alternative minimum tax.

Certain Tax Consequences to Non-United States Investors

Foreign Individuals Potentially Subject to U.S. Tax on Their Worldwide Income. Individuals who are not citizens of the United States but who are treated as "residents" of the United States for federal income tax purposes are subject to United States federal income tax on their worldwide income, including but not limited to their income from the Fund. For this purpose, an individual who is a lawful permanent resident of the United States (e.g., a holder of a "green card") generally will be treated as a resident. In addition, an individual who is not a lawful permanent resident under the immigration laws may nevertheless be a "resident" for tax purposes based upon a "substantial presence" in the United States as defined under Code Section 7701(b). For example, under that Code Section, an individual may be a "resident" if the individual is physically present in the United States on all or any part of a certain number of days, determined under a formula, within a three-year testing period. An individual present in the United States under certain types of temporary visas (e.g., teachers or students) may be excepted from the "substantial presence" test, but the determination whether an individual is a resident can be a complex determination. Potential investors who are foreign individuals should consult with their own tax advisors to be certain of their tax status under United States law.

Taxation of Non-U.S. Individuals Not Treated as Tax Residents. Potential investors who are neither citizens nor residents (as determined for tax purposes) of the United States ("Non-U.S. Investors") are subject to additional tax rules. Generally, Non-U.S. Investors are taxable on certain United States source passive investment income ("FDAP"), including dividends, interest and rents, at a flat rate of 30% on the gross amount of such income, without reduction for any expenses or other tax deductions, and that tax is satisfied by withholding of tax on payments of such amounts to the Non-U.S. Investors. In the case of a partnership, the partnership generally will be required to withhold based on the share of its FDAP allocable to its Non-U.S. Investors. The 30% tax on the gross amount of FDAP may be reduced or eliminated if the Non-U.S. Investor

is a resident of a country with which the United States has a bilateral income tax treaty, provide that the Non-U.S. Investor submits timely certification of his entitlement to treaty relief. Certain other exceptions apply which may reduce or eliminate the tax on certain types of FDAP, including interest income. Non-U.S. Investors generally are not subject to tax on capital gains unless either (1) the gains are attributable to a United States trade or business or (2) the Non-U.S. Investor is an individual who is present in the United States for more than 183 days during the taxable year in which the gains are realized.

The 30% taxation of FDAP will not apply to any income that is effectively connected with the active conduct of a trade or business within the United States. The net income from such a trade or business within the United States realized by a Non-U.S. Investor will be subject to tax at the regular graduated income tax rates applicable to resident individuals. Such income currently will be subject to income tax withholding, generally at a rate of 35%. A Non-U.S. Investor who realizes any such income will be required to file a United States federal income tax return with respect to the taxable year in which the income is realized.

A Non-U.S. Investor in the Fund who is allocated a share of passive income (including capital gain) or active trade or business income realized by the Fund will be subject to tax under the above rules as if such Non-U.S. Investor had realized such income directly. Any withholding of federal income taxes by the Fund attributable to a Non-U.S. Investor will be treated as a distribution to that particular Unit holder.

THE FOREGOING IS NOT A COMPLETE DISCUSSION OF ALL OF THE FEDERAL INCOME TAX CONSEQUENCES TO A NON-U.S. INVESTOR; THERE ARE STATE AND LOCAL TAX AND ESTATE TAX CONSEQUENCES TO BE CONSIDERED. ALSO, FOREIGN TAXES MAY BE IMPOSED ON A NON-U.S. INVESTOR'S INCOME FROM THE FUND. INVESTORS ARE STRONGLY ADVISED TO CONSULT WITH THEIR TAX ADVISORS WITH RESPECT TO THE TAX CONSEQUENCES OF AN INVESTMENT IN THE FUND.

Compliance Matters

Tax Returns/Audits. The Fund will furnish annually (and in certain circumstances, periodically) to each of the Unit holders sufficient information from the Fund's tax return for the Unit holders to prepare their own federal income tax returns.

The tax treatment of items of partnership income, loss, deduction, and credit will be determined at the partnership level. In addition, all partners are required, on their individual federal income tax returns, to treat partnership items in a manner that is consistent with the treatment of such items on the partnership's return.

The tax matters partner for the Fund will be the management company. The tax matters partner is required to, among other things, keep the other partners informed of all administrative and judicial proceedings and represent the Fund in such proceedings. The

SAMPLE

tax matters partner is authorized to obtain judicial review of any proposed readjustment of partnership items. Although every partner with an interest in the outcome is allowed to participate in an action filed by the tax matters partner, the outcome of that proceeding will bind all partners. If the tax matters partner fails to seek judicial review of a proposed adjustment of partnership items, other partners may seek such review, provided that there can be only one judicial proceeding with respect to a partnership. The foregoing procedures may adversely affect a Unit holder's ability to deal with adjustments to his income tax return resulting from adjustments made with respect to the Fund.

If any of the tax returns of the Fund are audited, it is possible that substantial legal and accounting fees will have to be paid to substantiate the position of the Fund, and such fees would reduce the cash otherwise available to meet Fund obligations or for distribution to the Unit holders. Such an audit may result in adjustments to each Unit holder's income tax return. An audit of the Fund's tax returns may also result in an audit of non-partnership items on each Unit holder's income tax returns, which in turn could result in adjustments to such items. The costs incurred by a Unit holder in connection with an IRS audit of his income tax return will be borne solely by that Unit holder.

State and Local Taxes

In addition to federal income taxes, the Fund and the Unit holders may be subject to other taxes imposed by various jurisdictions, such as state and local income taxes. Although a detailed analysis of these various taxes is not presented here, investors should consider the potential state and local tax consequences of an investment in the Fund. For example, a Unit holder's distributive share of all or a portion of Fund income, gains, losses and deductions, profits and losses, may be required to be included in determining his income subject to tax under the laws of the state or locality in which he is a resident, as well as jurisdictions in which the Fund does business.

For example, with respect to Unit holders who are not residents of the Commonwealth of Virginia, if the Fund has Virginia source income allocated to such Unit holders, the Fund will be required to file composite returns and make composite payments of tax on behalf of all of its Unit holders who are not residents of Virginia. The current rate of the Virginia composite tax is [_____]% and any composite payment on behalf of a non-resident Unit holder will be treated by the Fund as a distribution to the non-resident Unit holder.

The Commonwealth of Virginia also requires a partnership to withhold income tax on a non-resident partner's allocable share of Virginia source income. The Fund will withhold at the required withholding rate (currently [_____]%) of Virginia source income allocable to Unit holders who are not residents of Virginia. Any such withholding will be treated by the Fund as a distribution to the non-resident Unit holder. The withholding by a partnership does not relieve the non-resident partner of his obligation to file a Virginia income tax return. A partnership is allowed to file a composite return on behalf of non-resident partners who have no activity in Virginia other than that from the partnership. If a composite filing is allowable with respect to a

non-resident partner and the composite return is properly filed and all taxes, including applicable interest and penalty is paid, the individual non-resident partner is relieved of his separate individual filing requirement. If the Fund elects to file a composite return on behalf of any non-resident Unit holders, the composite tax payment attributable to the non-resident will be treated as a distribution by the Fund to that non-resident Unit holder.

The Fund intends to supply the Unit holders with information regarding their income, if any, derived from various jurisdictions in which the Fund does business. Unit holders are urged to consult with their own tax advisors regarding state and local tax laws.

U.S. Federal Estate and Gift Taxation

U.S. residents generally are subject to federal estate taxes on their taxable estates at death which includes the value at the time of a decedent's death of all of his property, real or personal, tangible or intangible, wherever situated. Additionally, U.S. residents are subject to gift taxes on the transfer of any property by gift. U.S. estate taxes can also apply to a Non-U.S. Investor to tax that part of his gross estate which at the time of his death is situated in the United States. For example, shares of stock in a domestic U.S. corporation owned by a non-resident alien are treated as property situated in the United States for purposes of this provision. Further, the IRS has ruled that a partner's interest in a partnership is situated where the partnership's business is carried on for purposes of applying the U.S.-United Kingdom Estate Tax Convention. Thus, a Unit in the Fund held by a Non-U.S. Investor could possibly be subject to U.S. estate tax on the death of the Non-U.S. Investor.

Additionally, state and local taxing jurisdictions may also impose state, inheritance and/or gift taxes on their residents or on property deemed situated within their respective jurisdictions.

4. Using the IMPLAN Model to Calculate National Multipliers

The IMPLAN model is a regional input/model developed and maintained by the Minnesota IMPLAN group, headquartered in Minneapolis. The basic model was originally developed by the USDA Forest Service in cooperation with the Federal Emergency Management Agency and the USDI Bureau of Land Management.

The IMPLAN model has certain similarities with the RIMS (Regional Input/Output Modeling system) model developed by the Department of Commerce, but is generally thought to contain several superior features besides its greater ease and flexibility of use. These improvements can be summarized as follows:

1. The Commerce Department is not permitted to publish data in any category where there are less than three organizations in a given economic area. IMPLAN has developed an algorithm to fill in the missing numbers.

2. IMPLAN has introduced improved methods of accounting for flows of goods and services among counties.

3. IMPLAN permits aggregation of any subset of industries for calculation and tabular purposes. This is useful when results are desired for, say, 1-digit industries instead of the 509 industries actually found in the input/output table.

4. As seen in the tables throughout this text, IMPLAN estimates three separate effects, labeled "direct", "indirect" and "induced". The direct effects are those entered by the user. The other two columns represent the multiplier effects, but they are usually combined in other input/output models. Briefly, the indirect effect represents purchases made by businesses when their sales rise. For example, a restaurant might order more food produced or sold in the region, or an automobile plant might order more steel. The induced effect represents the additional household spending because income has risen. For example, casino workers would spend their paychecks on various goods and services, some of which are produced in the region. In general, then, the larger the region under consideration, the larger the multipliers would be.

The following material, taken from the IMPLAN manual, describes the input/output process in more detail.

Input/output analysis is a means of examining relationships within an economy, both between businesses and between businesses and final consumers. It captures all of the monetary market transactions for consumption in a given time period. The resulting mathematical formulae allow examination of

the effects of a change in one or several economic activities on an entire economy.

A descriptive model includes information about local economic interactions known as regional economic accounts. These tables describe a local economy in terms of the flow of dollars from purchasers to producers within the region. The initial IMPLAN data details all purchases, including imported goods and services. When regional economic accounts are created, imports to the region are removed from the initial data, allowing examination of local inter-industry transactions and final purchases.

The regional economic accounts are used to construct local level multipliers. Multipliers describe the response of the economy to a stimulus (a change in demand or production). The multipliers represent the Predictive Model.

Purchases for final use (final demand) drive an input/output model. Industries producing goods and services for consumption purchase goods and services from other producers. These other producers, in turn, purchase goods and services. These indirect purchases (or indirect effects) continue until leakages from the region (imports, wages, profits, etc.) stop the cycle.

The indirect effects and the effects of increased household spending (induced effects) can be mathematically derived as sets of multipliers. The derivation is called the Leontief inverse. The resulting sets of multipliers describe the change of output for each industry caused by a one dollar change in final demand for any given industry.

The input/output analysis framework is similar to a financial accounting framework that tracks purchases of and expenditures on goods and services in dollars. Input/output accounting traces the flow of dollars between businesses and between businesses and final consumers. An input/output accounting framework can be illustrated using classic financial accounting T-accounts, which include receipts (income) and expenditures (expenses) on each side of a "T", as shown below.

Final Consumption (or final demand) drives input/output models. Industries respond to meet demand directly or indirectly, by supplying goods and services to industries responding directly. Each industry that produces goods and services generates demands for other goods and services, and so on. Multipliers describe these iterations.

There are three different multipliers developed for predictive modeling: Type I, Type II, and Type SAM. We start with the transactions table and derive a coefficient by dividing each industry column by the column total. This coefficient matrix is also known as the ***A Matrix***.

Appendix B. Resume of Dr. Michael K. Evans

CURRENT AND PREVIOUS POSITIONS

• Chairman, *Evans, Carroll & Associates, Inc.*, 1980-present (previously Evans Economics)

Economic consulting firm specializing in EB-5 immigration analysis, economic impact studies of development projects and new construction, models of state and local tax receipts, impact of current and proposed government legislation, and construction of econometric models for individual industries and companies.

• Chief Economist, *American Economics Group*, 2000-present.

Built a comprehensive state modeling system that provides economic analysis for a variety of consulting projects (see below).

• Clinical Professor of Economics, Department of Managerial Economics and Decision Sciences (MEDS), Kellogg Graduate School of Management, Northwestern University, 1996-99.

Taught courses in macroeconomics and business forecasting. Wrote textbooks for both courses.

• Winner of Blue Chip Economic Indicator Award for most accurate macroeconomic forecasts during the past four years, November 1999

• Founder and President, *Chase Econometric Associates*, 1970-1980

• Assistant and Associate Professor of Economics, Wharton School, University of Pennsylvania, 1964-69. Co-developer of the original Wharton Model.

• Visiting Professor, Radford University, (Radford, VA), 1987

Chairman of Institute for International Economic Competitiveness

• Visiting Lecturer, Hebrew University (Jerusalem), 1966-67

Built econometric model of the Israeli economy

Ph. D. in Economics, Brown University. Dissertation, "A Postwar Quarterly Model of the United States Economy, 1948-1962". A. B. in Mathematical Economics, Brown University

PREVIOUS ACTIVITIES AND EDUCATION

- Contributing Editor, *Industry Week*

Wrote a column in each issue on economic and financial trends as they impact the mfg sector.

- Editor, *The Evans Report*

Weekly newsletter discussing economic trends and financial markets. Pioneered the concept of the Monthly Tracking Model to incorporate recent economic releases into the overall economic forecast, including methods to predict these economic data.

- Consultant, *National Printing Equipment and Supply Association*

Prepares quarterly forecasts of shipments of printing equipment and graphic arts supplies by product line, based on an econometric model constructed for NPES. Also prepares analysis and forecasts of exports and imports by principal product line.

- Consultant, *APICS -- The Educational Society for Resource Management*,

In 1993, designed and developed the *APICS Business Outlook Index*, which uses survey data collected by the Evans Group to measure current production, production plans, shipments, employment, new orders, unfilled orders, inventory stocks, and the comparison of the actual to desired inventory/sales ratio to predict short-term changes in mfg sector activity. The results of this survey appeared every month in *APICS: The Performance Advantage*

- Consultant, *American Hardware Mfg Association*

Wrote a separate weekly edition of the Evans Report analyzing recent trends in the hardware and housing industries, including forecasts of the hardware industry based on an econometric model developed for AHMA.

- Board of Economists, *Los Angeles Times*

Wrote column every 6 weeks (5 other economists on the Board)

- Columnist, *United Press International*

  Wrote twice-weekly column, "Dollars and Trends"

- Consultant, Senate Finance Committee,

  Built the first large-scale supply-side model of the U. S. economy

- Consultant, Environmental Protection Agency and Council on Environmental Quality

  Estimated inflationary impact of government regulations

- Consultant, National Aeronautics and Space Administration

  Estimate impact of R&D spending on productivity growth

- Consultant, U. S. Treasury

  Estimated impact of investment tax credit and accelerated depreciation on capital spending by industry

- Consultant. U. S. Department of Agriculture

  Built large-scale econometric model of agricultural sector of U. S. economy

- Consultant, Organization of Economic Cooperation and Development

  Built econometric model of the French economy

SAMPLE OF RECENT CONSULTING PROJECTS

A. Economic Impact of EB-5 Immigrant Investor Programs and New Markets Tax Credits

- Calculated the number of jobs created for a film production company in New York City.

- Calculated economic impact of small-scale rooftop solar panels in various counties in California.

- Calculated economic impact of 7 different types of proposed businesses for a proposed regional center in the Bay Area of California.

- Determined the economic impact of a new biological research park, office building, and logistics center in Wooster, Ohio.

- Calculated the economic effect of a mixed-use urban renewal project in Cleveland, Ohio.

- Calculated economic impact of 14 different types of proposed businesses for a proposed EB-5 regional center that would include the entire state of Florida.

- Calculated economic impact of dairy farm and cheese processing plant in Northern California.

- Determined economic impact of a shipyard, food processing plant, and semiconductor plant for a proposed regional center in Louisiana and Mississippi.

- Calculated the economic impact of a new gaming casino in Natchez, Mississippi.

- Calculated the economic impact of a retail shopping center in suburban Los Angeles County.

- Prepared an economic impact analysis for the "timber to homes" project for a proposed regional center in Colorado.

- Calculated the economic impact for a proposed regional center in Baltimore, Maryland that would include the rebuilding of depressed areas in East Baltimore and along the riverfront.

- Prepared the economic analysis for a proposed EB-5 regional center for the entire state of Florida that included impact calculations for 14 different types of industries.

- Prepared the economic analysis for a proposed EB-5 regional center in the San Francisco Bay area that included calculations for 10 different types of industries.

- Prepared economic impact calculations for proposed EB-5 regional centers in New York City and Northeastern New Jersey.

- Calculated the economic impact of a rehabilitated office building in Albuquerque, New Mexico, including the increase in high quality jobs.

- Calculated the economic impact of a rehabilitated skilled nursing center in East Los Angeles, California, including the impact on nearby census tracts.

- Calculated the economic impact of development of warehouse and light industrial mfg space in Las Vegas, Nevada.

- Calculated the economic impact of rehabilitation and expansion of a vacation and health spa in Sharon Springs, New York

- Calculated economic impact of revitalizing an old resort hotel and adding new facilities for Lake Geneva, WI.

- Calculated the employment and tax effects for a portfolio of projects undertaken under the New Market capital program.

- Calculated generic employment changes for proposed EB-5 project for an Inland Port in Palm Beach County, FL

- Calculated the economic impact of construction of El Monte Village in El Monte, CA.

- Built an input/output model of Guam to be used to calculate economic impact of EB-5 projects. Used this model to estimate impact of various proposed projects.

- Calculated the economic impact of moving the Social Security Administration building in Birmingham, AL, and revitalizing the surrounding neighborhood.

- Calculated the economic impact of rehabbing and expanding the Everett Mall in Everett, WA.

- Determined the economic impact of building a new medical center in Charleston, SC

- Calculated economic impact of expanding Sugarbush resort in Vermont. Study included expansion of existing facilities and addition of new facilities.

• Calculated economic impact for new market tax credit program in Portsmouth, N.H. Study included both overall economic impact, and the increase in employment and income and the decrease in the unemployment rate and incidence of poverty in individual census tracts.

• Calculated the economic benefits of EB-5 programs for foreign investors for a mixed-use construction project, including a hotel, retail stores, apartments, and a sports stadium in the Washington, D. C. metropolitan area

• Calculated the economic benefits of EB-5 programs for foreign investors for a mixed-used retail shopping center in the New York City metropolitan area.

• Calculated the economic benefits of EB-5 programs for foreign investors for proposed shopping centers in five separate counties in Southern California, including differential impacts of building the shopping centers in different counties.

B. Projects for State and Local Governments

• Constructed an econometric model for the State of New York and determined the change in employment, labor income, and tax revenues for 43 different tax changes proposed by the Governor's office.

• Constructed a detailed econometric model for the State of Pennsylvania to determine the economic impact of the complete panoply of state taxes levied; the model contains over 1,000 equations. In cooperation with American Economics Group, the model was developed to simulate the effect of changes in any state tax rate on households and businesses by income deciles, household status, age of individuals, size of households, and many other demographic variables. The change in business taxes can also be simulated for detailed industry classifications.

• Determined whether the Washington, D.C. water and sewer authority should accept a high bid for a new waste disposal system. Decision to reject has saved the authority over $200 million, as construction prices turned down sharply as predicted.

• Built an econometric model to determine the "tax gap" caused by Internet sales for the state of Minnesota.

• Determined appropriate levels of shelter grants individual counties in New York State, and for utility allowances in New York City. Reviewed and prepared testimony in ongoing court cases in these areas.

• Calculated the economic impact of the revitalization of downtown Milwaukee, Wisconsin.

C. Economic Impact of Casino Gaming

• Built an econometric model to predict the growth of the gaming industry over the next decade, and the economic impact of that industry on employment and tax revenues at the Federal and state levels.

• Estimated the economic impact of Indian casino gaming nationally and for the State of Wisconsin.

• Determined the economic impact of the Oneida Indian gaming casino on the Green Bay metropolitan area.

• Estimated the negative economic impact on the Milwaukee area if a new Indian gaming casino were to be built in Kenosha, Wisconsin.

D. Economic Impact of Smoking Bans and Higher Taxes

• Testified on economic impact of smoking bans in Canada; certified as an expert witness by the Court.

• Examined the impact of smoking bans on restaurant sales in several different locations in the U.S. to determine how much sales changed when these bans were imposed, and the differential effects depending on whether these bans were partial or total.

• Determined the cross-border effects on retail sales from differential rates in cigarette, gasoline, and alcohol excise taxes

• Determined the economic impact of higher cigarette taxes on minority group employment.

• Estimated the economic impact and loss of Federal and state tax revenues when higher cigarette prices lead to increased smuggling.

E. Consulting Projects for Travel and Tourism

• Built an econometric model to predict tourism trips and revenues for the major regions of the U.S. economy.

• Constructed econometric models to predict tourism in Las Vegas and Orlando.

• Using the IMPLAN model, predicted economic impact of tourism and travel expenditures for all counties in Pennsylvania.

F. Other Private Sector Consulting Projects

• Calculated the economic impact of proposed EPA bans on fluoropolymer production.

• Estimated the size and economic importance of the fluoropolymer industry, and calculated economic impact of shutting down domestic production.

• Built an econometric model to examine how U.S. tax and regulatory policies help determine whether the gold mining industry would invest in the U.S. or other countries. Testified before Congress to help defeat legislation inimical to the mining industry.

• Built an econometric model to predict consumer bankruptcies, based on recent growth in consumer credit outstanding, the overall economic environment, and recent changes in credit regulations

• Estimated the economic impact of the ethanol subsidy on the U.S. economy and Farm Belt States, including the impact on the balance of payments, employment, and tax receipts. Testified before Congress to help pass legislation to extent subsidies to the ethanol industry.

• Built an econometric model to determine the impact of updating and improving the system of locks on the Upper Mississippi River on corn prices and exports, farm income, and the overall economy.

Re: Amendment of GCFM Application to include Virginia Tobacco Regions

Dear Ms. Velarde:

Gulf Coast Funds Management, LLC (GCFM), an approved Regional Center pursuant to Section 610 of the Appropriations Act of 1993, respectfully requests to include additional geographical areas covering the tobacco-dependent localities in the Commonwealth of Virginia for the following industries: manufacturing, education and training, research and development, and wholesale trade (international). The tobacco region consists of 41 localities in the South Central and Southwest regions of Virginia ("Tobacco Region", see attached *Exhibit A*), which was established to revitalize tobacco-dependent communities.

Communities and citizens throughout the Tobacco Region continue to experience significant economic distress as a direct consequence of historical dependence on tobacco production, textile and furniture manufacturing and coal production.

The credit crisis and difficult economy have resulted in more severe job losses in the Tobacco Region, where unemployment rates have historically been higher than other regions in Virginia. The Virginia Employment Commission has designated many areas within the Tobacco Region as Targeted Employment Areas, thus enabling them to benefit from the Immigrant Investor Pilot Program to accelerate the economic recovery and transformation in those areas.

The proposed expansion of GCFM's geographic coverage area is derived from the existing hybrid automobile manufacturing plan administered (the "Project") by GCFM through Gulf Coast Automotive Investment Fund A-1 (GCAIF A-1). The Project has moved forward with great speed and tremendous support from state and local governments due to its significant potential job creation. The company, GreenTech Automotive, Inc.

GULF COAST FUNDS MANAGEMENT
650 Poydras St. Ste. 2830,
New Orleans, LA 70130

TELEPHONE: (504) 582-2244
FACSISMILE: (504) 582-2240

("GTA", formerly known as Hybrid Kinetic Automotive Corp) has recently revealed publicly its four prototype cars to be built in the United States, and broken ground on the construction of its manufacturing facilities in Tunica County, Mississippi. In the meantime, GTA has agreed to allocate part of its manufacturing operations, such as engine and transmission production, to the Tobacco Region, contingent on USCIS approval of this amendment application.

GCFM's request to amend its application to expand its geography to cover the Tobacco Regions in Virginia is based on the previously approved hybrid automobile manufacturing project managed by the same company, and merely re-allocates a portion of GTA's original planned production to Virginia. Therefore, the methodology for job multipliers described in the original independent economic study, which was approved by USCIS, should be applicable to the manufacturing facilities to be built in the Tobacco Region, and the overall impact would stay intact.

The EB-5 program is an effective way to attract private investment into the Tobacco Region, which would not only create many new jobs, but also provide much-needed diversification to the region's economy. The Virginia State government has thus far expressed strong support for the Project.

Therefore, GCFM respectfully requests the expansion of its geographic coverage area to include the entire Tobacco Region in Virginia, and the support of GTA in achieving its goal of manufacturing and distributing hybrid motor vehicles in the US.

COMMONWEALTH of VIRGINIA

Office of the Governor

Timothy M. Kaine
Governor

December 4, 2009

The Honorable Janet Napolitano, Secretary
Department of Homeland Security
Washington, DC 20536

Re: EB-5 Regional Center Amendment Application for Virginia Tobacco Regions

Dear Secretary Napolitano,

As we assess the employment statistics in Virginia during these difficult economic times, we see a continuing need to create jobs, particularly in the historically tobacco-dependent regions across southside Virginia.

I am writing in support of Gulf Coast Funds Management LLC's request that the Department of Homeland Security and the United States Citizenship and Immigration Services allow them to expand their coverage to include tobacco-dependent localities in Virginia for the following industries: manufacturing, education and training, research and development, assembling, and international trade.

In Virginia, the credit crisis and difficult economy have caused unemployment to rise over the last two years, particularly in the tobacco regions. I support GCFM's amendment application and encourage the Department of Homeland Security and USCIS to allow this expansion.

Prompt consideration of their application will allow us to move as quickly as possible in generating funds for new investment in this region.

Sincerely,

Timothy M. Kaine

Re: State Agency Designation

Dear Ms. Velarde:

This letter is to identify the agency in Virginia which has been named to determine and designate areas of high unemployment as Targeted Employment Areas with respect to the application of Gulf Coast Funds Management, LLC for approval of expansion in the Commonwealth of Virginia.

Through this letter I am identifying the Virginia Employment Commission as responsible for the determination and designation of areas of high unemployment or rural areas as Targeted Employment Areas for the purposes of fulfilling this requirement for USCIS and the EB-5 Regional Center Program.

Sincerely,

Timothy M. Kaine

Re: Targeted Employment Area Designation in Virginia

Dear Ms. Velarde:

The Virginia Employment Commission certifies that the following areas are Targeted Employment Areas (TEA) within the Commonwealth of Virginia. Targeted Employment Areas are defined as areas, which at the time of investment, are rural areas, or areas which have experienced unemployment of at least 150 percent of the national average rate within Virginia.

High unemployment areas were determined using the 2008 national not seasonally adjusted unemployment rate of 5.8 percent; 150 percent of 5.8 percent is 8.7 percent. High unemployment areas are any particular geographical or political subdivision located within a Metropolitan Statistical Area (MSA), or within a city or town having a population of 20,000, or more, within such state. Many of the high unemployment areas are tobacco-dependent regions, which are established under *Code of Virginia*, Section 3.1-1107, and defined as civil jurisdictions in Southwest and Southside Virginia, where they are historical tobacco production regions and are experiencing the highest unemployment rates within the Commonwealth of Virginia. In order to decrease the high unemployment rate while transforming into a less tobacco-dependent economy, these areas are designated as TEA to seek enhanced economic recovery and development.

Rural areas are defined as civil jurisdictions not located within any standard MSA as designated by the Office of Management and Budget, or within any city or town having a population of 20,000, or more, based on the most recent decennial census of the United States.

The following attachment contains designated Target Employment Areas for the Commonwealth of Virginia. If you have any questions or need clarification, please contact Donald Lillywhite, Economic Information Services Director, at (804) 786-5670.

Sincerely,

Dolores A. Esser

Re: Targeted Employment Area Designation in Virginia

Dear Ms. Chapline:

This letter is follow-up to a December 15, 2009, communication to Barbara Velarde of the USCIS Foreign Trade Investor Program concerning Targeted Employment Areas (TEA). The Virginia Employment Commission certifies that Sussex County, Virginia, is a TEA within the Commonwealth of Virginia. Targeted Employment Areas are defined as areas, which at the time of investment, are rural areas, or areas which have experienced unemployment of at least 150 percent of the national average rate within Virginia.

High unemployment areas were determined using the 2008 national not seasonally adjusted unemployment rate of 5.8 percent; 150 percent of 5.8 percent is 8.7 percent. High unemployment areas are any particular geographical or political subdivision located within a Metropolitan Statistical Area (MSA), or within a city or town having a population of 20,000, or more, within such state. Many of the high unemployment areas are tobacco-dependent regions, which are established under *Code of Virginia*, Section 3.1-1107, and defined as civil jurisdictions in Southwest and Southside Virginia, where they are historical tobacco production regions and are experiencing the highest unemployment rates within the Commonwealth of Virginia. In order to decrease the high unemployment rate while transforming into a less tobacco-dependent economy, these areas are designated as TEA to seek enhanced economic recovery and development.

Rural areas are defined as civil jurisdictions not located within any standard MSA as designated by the Office of Management and Budget, or within any city or town having a population of 20,000, or more, based on the most recent decennial census of the United States.

Sincerely,

Dolores A. Esser
Commissioner

Re: Amendment of GCFM Application to include Virginia Tobacco Regions

Dear Ms. Velarde:

Gulf Coast Funds Management, LLC (GCFM), an approved Regional Center pursuant to Section 610 of the Appropriations Act of 1993, respectfully requests to include additional geographical areas covering the tobacco-dependent localities in the Commonwealth of Virginia for the following industries: manufacturing, education and training, research and development, and wholesale trade (international). The tobacco region consists of 41 localities in the South Central and Southwest regions of Virginia ("Tobacco Region", see attached *Exhibit A*), which was established to revitalize tobacco-dependent communities.

Communities and citizens throughout the Tobacco Region continue to experience significant economic distress as a direct consequence of historical dependence on tobacco production, textile and furniture manufacturing and coal production.

The credit crisis and difficult economy have resulted in more severe job losses in the Tobacco Region, where unemployment rates have historically been higher than other regions in Virginia. The Virginia Employment Commission has designated many areas within the Tobacco Region as Targeted Employment Areas, thus enabling them to benefit from the Immigrant Investor Pilot Program to accelerate the economic recovery and transformation in those areas.

The proposed expansion of GCFM's geographic coverage area is derived from the existing hybrid automobile manufacturing plan administered (the "Project") by GCFM through Gulf Coast Automotive Investment Fund A-1 (GCAIF A-1). The Project has moved forward with great speed and tremendous support from state and local governments due to its significant potential job creation. The company, GreenTech Automotive, Inc.

GULF COAST FUNDS MANAGEMENT
650 Poydras St. Ste. 2830,
New Orleans, LA 70130

TELEPHONE: (504) 582-2244
FACSISMILE: (504) 582-2240

("GTA", formerly known as Hybrid Kinetic Automotive Corp) has recently revealed publicly its four prototype cars to be built in the United States, and broken ground on the construction of its manufacturing facilities in Tunica County, Mississippi. In the meantime, GTA has agreed to allocate part of its manufacturing operations, such as engine and transmission production, to the Tobacco Region, contingent on USCIS approval of this amendment application.

GCFM's request to amend its application to expand its geography to cover the Tobacco Regions in Virginia is based on the previously approved hybrid automobile manufacturing project managed by the same company, and merely re-allocates a portion of GTA's original planned production to Virginia. Therefore, the methodology for job multipliers described in the original independent economic study, which was approved by USCIS, should be applicable to the manufacturing facilities to be built in the Tobacco Region, and the overall impact would stay intact.

The EB-5 program is an effective way to attract private investment into the Tobacco Region, which would not only create many new jobs, but also provide much-needed diversification to the region's economy. The Virginia State government has thus far expressed strong support for the Project.

Therefore, GCFM respectfully requests the expansion of its geographic coverage area to include the entire Tobacco Region in Virginia, and the support of GTA in achieving its goal of manufacturing and distributing hybrid motor vehicles in the US.

Re: EB-5 Regional Center Amendment Application for Virginia Tobacco Regions

Dear Secretary Napolitano,

As we assess the employment statistics in Virginia during these difficult economic times, we see a continuing need to create jobs, particularly in the historically tobacco-dependent regions across southside Virginia.

I am writing in support of Gulf Coast Funds Management LLC's request that the Department of Homeland Security and the United States Citizenship and Immigration Services allow them to expand their coverage to include tobacco-dependent localities in Virginia for the following industries: manufacturing, education and training, research and development, assembling, and international trade.

In Virginia, the credit crisis and difficult economy have caused unemployment to rise over the last two years, particularly in the tobacco regions. I support GCFM's amendment application and encourage the Department of Homeland Security and USCIS to allow this expansion.

Prompt consideration of their application will allow us to move as quickly as possible in generating funds for new investment in this region.

Sincerely,

Timothy M. Kaine

Re: Targeted Employment Area Designation in Virginia

Dear Ms. Velarde:

The Virginia Employment Commission certifies that the following areas are Targeted Employment Areas (TEA) within the Commonwealth of Virginia. Targeted Employment Areas are defined as areas, which at the time of investment, are rural areas, or areas which have experienced unemployment of at least 150 percent of the national average rate within Virginia.

High unemployment areas were determined using the 2008 national not seasonally adjusted unemployment rate of 5.8 percent; 150 percent of 5.8 percent is 8.7 percent. High unemployment areas are any particular geographical or political subdivision located within a Metropolitan Statistical Area (MSA), or within a city or town having a population of 20,000, or more, within such state. Many of the high unemployment areas are tobacco-dependent regions, which are established under *Code of Virginia*, Section 3.1-1107, and defined as civil jurisdictions in Southwest and Southside Virginia, where they are historical tobacco production regions and are experiencing the highest unemployment rates within the Commonwealth of Virginia. In order to decrease the high unemployment rate while transforming into a less tobacco-dependent economy, these areas are designated as TEA to seek enhanced economic recovery and development.

Rural areas are defined as civil jurisdictions not located within any standard MSA as designated by the Office of Management and Budget, or within any city or town having a population of 20,000, or more, based on the most recent decennial census of the United States.

The following attachment contains designated Target Employment Areas for the Commonwealth of Virginia. If you have any questions or need clarification, please contact Donald Lillywhite, Economic Information Services Director, at (804) 786-5670.

Re: Targeted Employment Area Designation in Virginia

Dear Ms. Chapline:

This letter is follow-up to a December 15, 2009, communication to Barbara Velarde of the USCIS Foreign Trade Investor Program concerning Targeted Employment Areas (TEA). The Virginia Employment Commission certifies that Sussex County, Virginia, is a TEA within the Commonwealth of Virginia. Targeted Employment Areas are defined as areas, which at the time of investment, are rural areas, or areas which have experienced unemployment of at least 150 percent of the national average rate within Virginia.

High unemployment areas were determined using the 2008 national not seasonally adjusted unemployment rate of 5.8 percent; 150 percent of 5.8 percent is 8.7 percent. High unemployment areas are any particular geographical or political subdivision located within a Metropolitan Statistical Area (MSA), or within a city or town having a population of 20,000, or more, within such state. Many of the high unemployment areas are tobacco-dependent regions, which are established under *Code of Virginia*, Section 3.1-1107, and defined as civil jurisdictions in Southwest and Southside Virginia, where they are historical tobacco production regions and are experiencing the highest unemployment rates within the Commonwealth of Virginia. In order to decrease the high unemployment rate while transforming into a less tobacco-dependent economy, these areas are designated as TEA to seek enhanced economic recovery and development.

Rural areas are defined as civil jurisdictions not located within any standard MSA as designated by the Office of Management and Budget, or within any city or town having a population of 20,000, or more, based on the most recent decennial census of the United States.

Sincerely,

Dolores A. Esser
Commissioner

Business Expansion Plan

Date: December 7, 2009

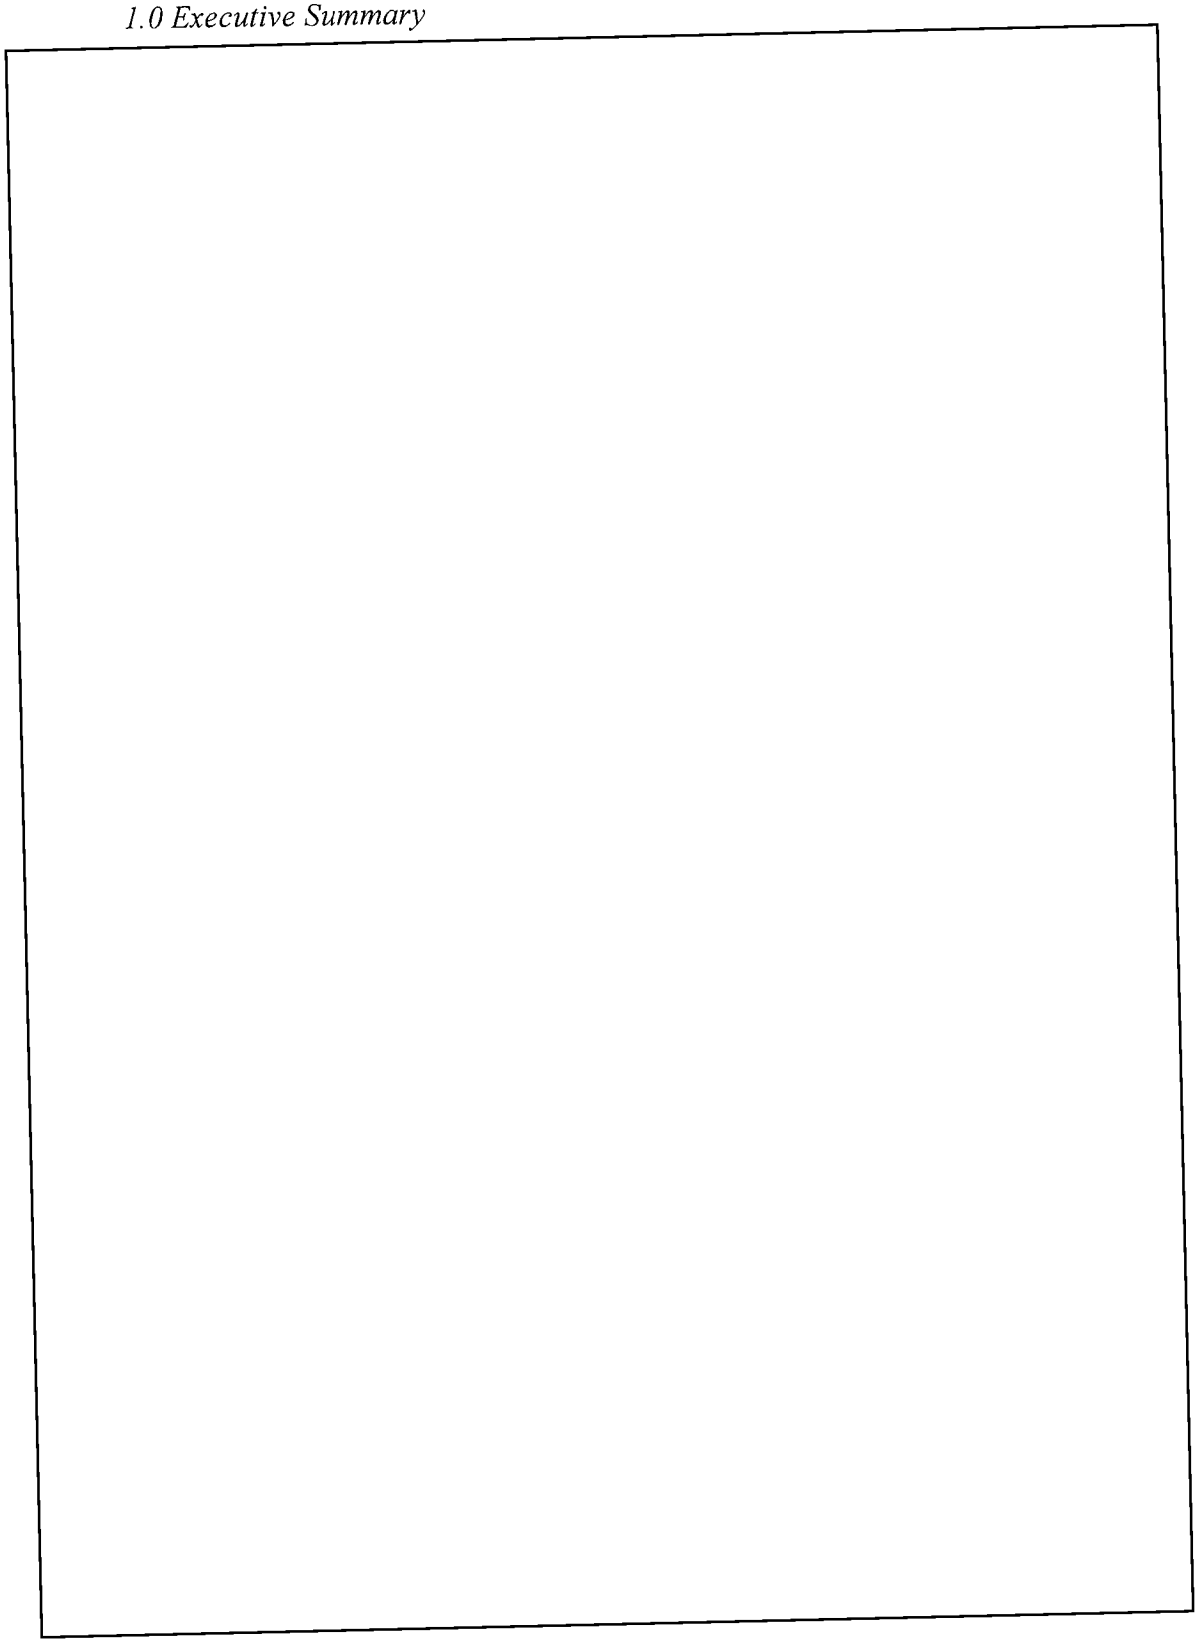
A NOTE ABOUT CONFIDENTIALITY

The contents of this business plan are highly proprietary, and should not be shared with any person other than officials of the U.S. Department of Homeland Security and USCIS who require this plan in order to analyze the application of Gulf Coast Funds Management LLC for an EB-5 regional center to expand coverage in the Commonwealth of Virginia.

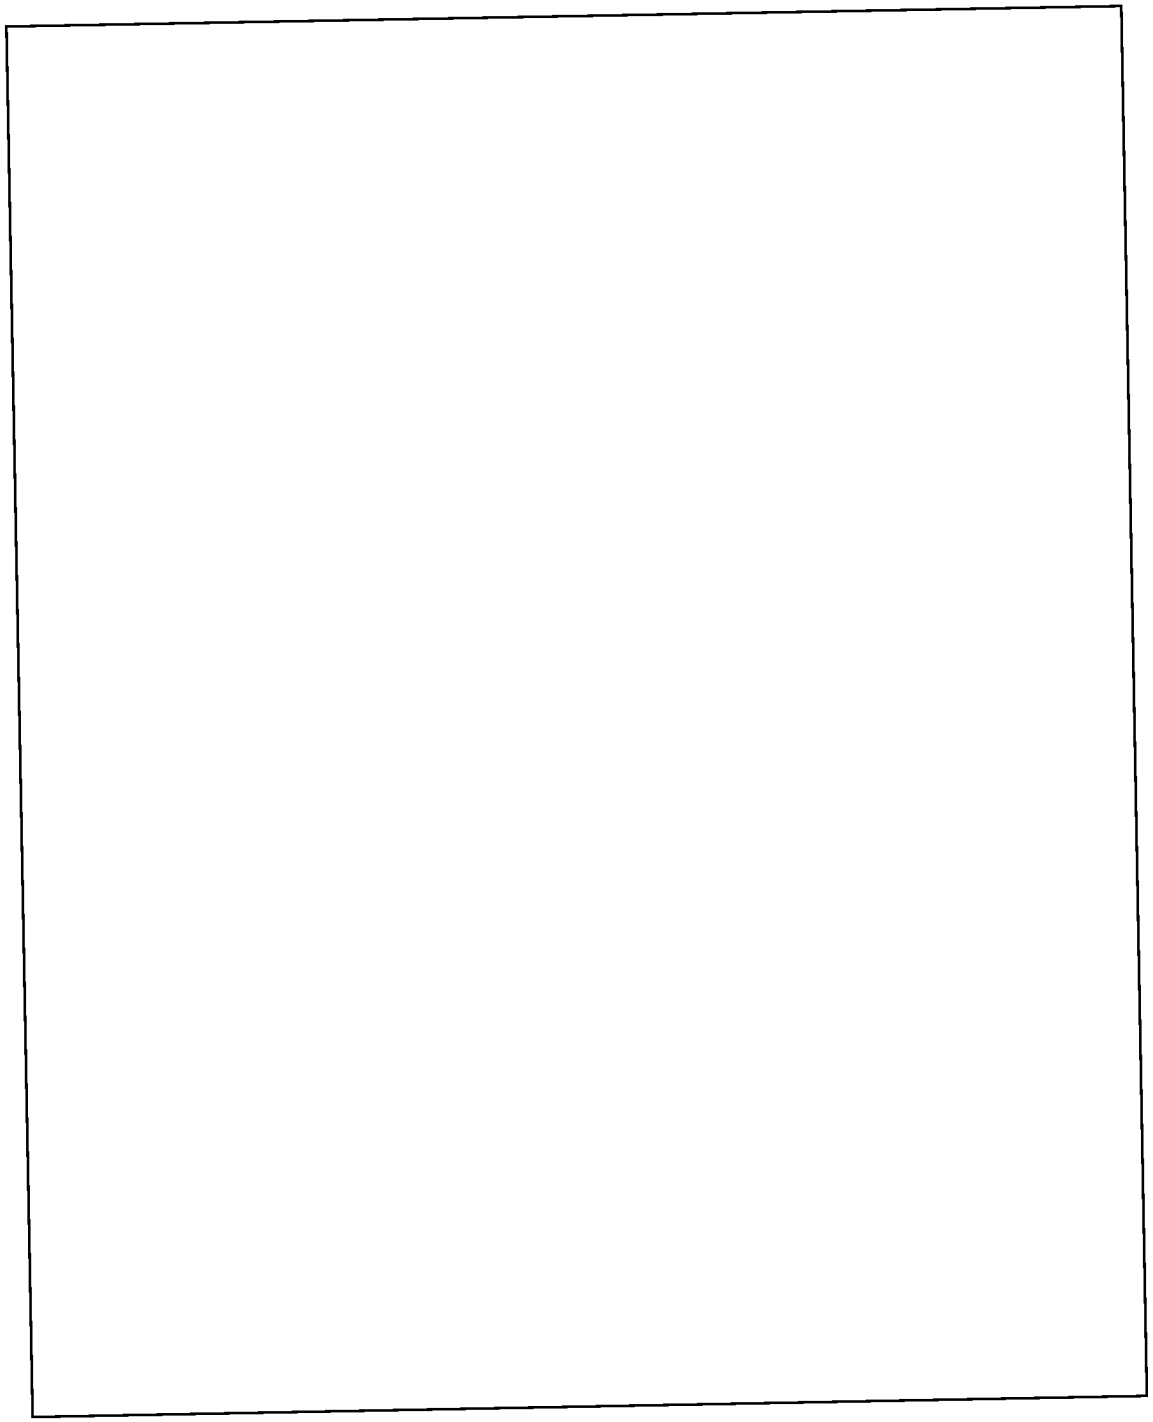
(b)(4)

Gulf Coast Funds Management Regional Center Business Expansion Plan

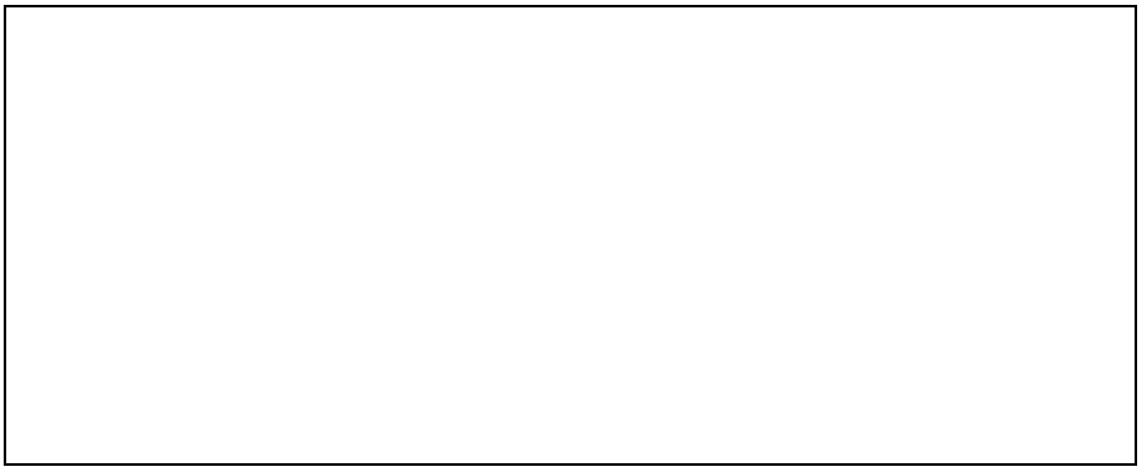
1.0 Executive Summary



(b)(4)



2.0 Company Summary



3.0 The EB-5 Immigrant Investor Program

The management company will manage EB-5 investment funds. The EB-5 immigrant investor program is described as follows by the United States Department of Homeland Security:

Immigration through Investment Overview

Under section 203(b)(5) of the Immigration and Nationality Act (INA), 8 U.S.C. 81153(6)(5), 10,000 immigrant visas per year are available to qualified individuals seeking permanent resident status on the basis of their engagement in a new commercial enterprise.

Of the 10,000 investor visas (i.e., EB-5 visas) available annually, 3,000 are set aside for those who apply under a pilot program involving a USCIS-designated Regional Center. A regional center is an entity, organization or agency that has been approved as such by the USCIS; focuses on a specific geographic area within the United States; and seeks to promote economic growth through increased export sales, improved regional productivity, creation of new jobs, and increased domestic capital investment.

"Alien investors" must demonstrate that a "qualified investment" (see below) is being made in a new commercial enterprise or approved Regional Center; and, show, using reasonable methodologies, that 10 or more jobs are actually created either directly or indirectly from the new commercial enterprise through revenues generated from increased exports, improved regional productivity, job creation, or increased domestic capital investment resulting from the pilot program.

Eligibility

Permanent resident status based on EB-5 eligibility is available to investors, either alone or coming with their spouses and unmarried children under 21 years of age. Eligible aliens are those who have invested – or are actively in

the process of investing – the required amount of capital into a new commercial enterprise that they have established. They must further demonstrate that this investment will benefit the U.S. economy and create the requisite number of full-time jobs within the U.S.

In general, "eligible individuals" include those:

1. Who establish a new commercial enterprise by: creating an original business; or purchasing an existing business and simultaneously or subsequently restructuring / reorganizing the business such that a new commercial enterprise results; or expanding an existing business by 140 percent of the pre-investment number of jobs or net worth, or retaining all existing jobs in a troubled business that has lost 20 percent of its net worth over the past 12 to 24 months; and

2. Who have invested – or who are actively in the process of investing – in a new commercial enterprise: at least $1,000,000; or at least $500,000 where the investment is being made in a "targeted employment area," which is an area that has experiences unemployment of at least 150 percent of the national average rate or a rural area as designated by OMB; and

3. Whose engagement in a new commercial enterprise will benefit the United States economy and: create full-time employment for not fewer than 10 qualified individuals; or maintain the number of existing employees at no less than the pre-investment level for a period of at least two years, where the capital investment is being made in a "troubled business," which is a business that has been in existences for at least two year and that has lost 20 percent of its net worth over the past 12 to 24 months.

RISK FACTORS

(b)(4)

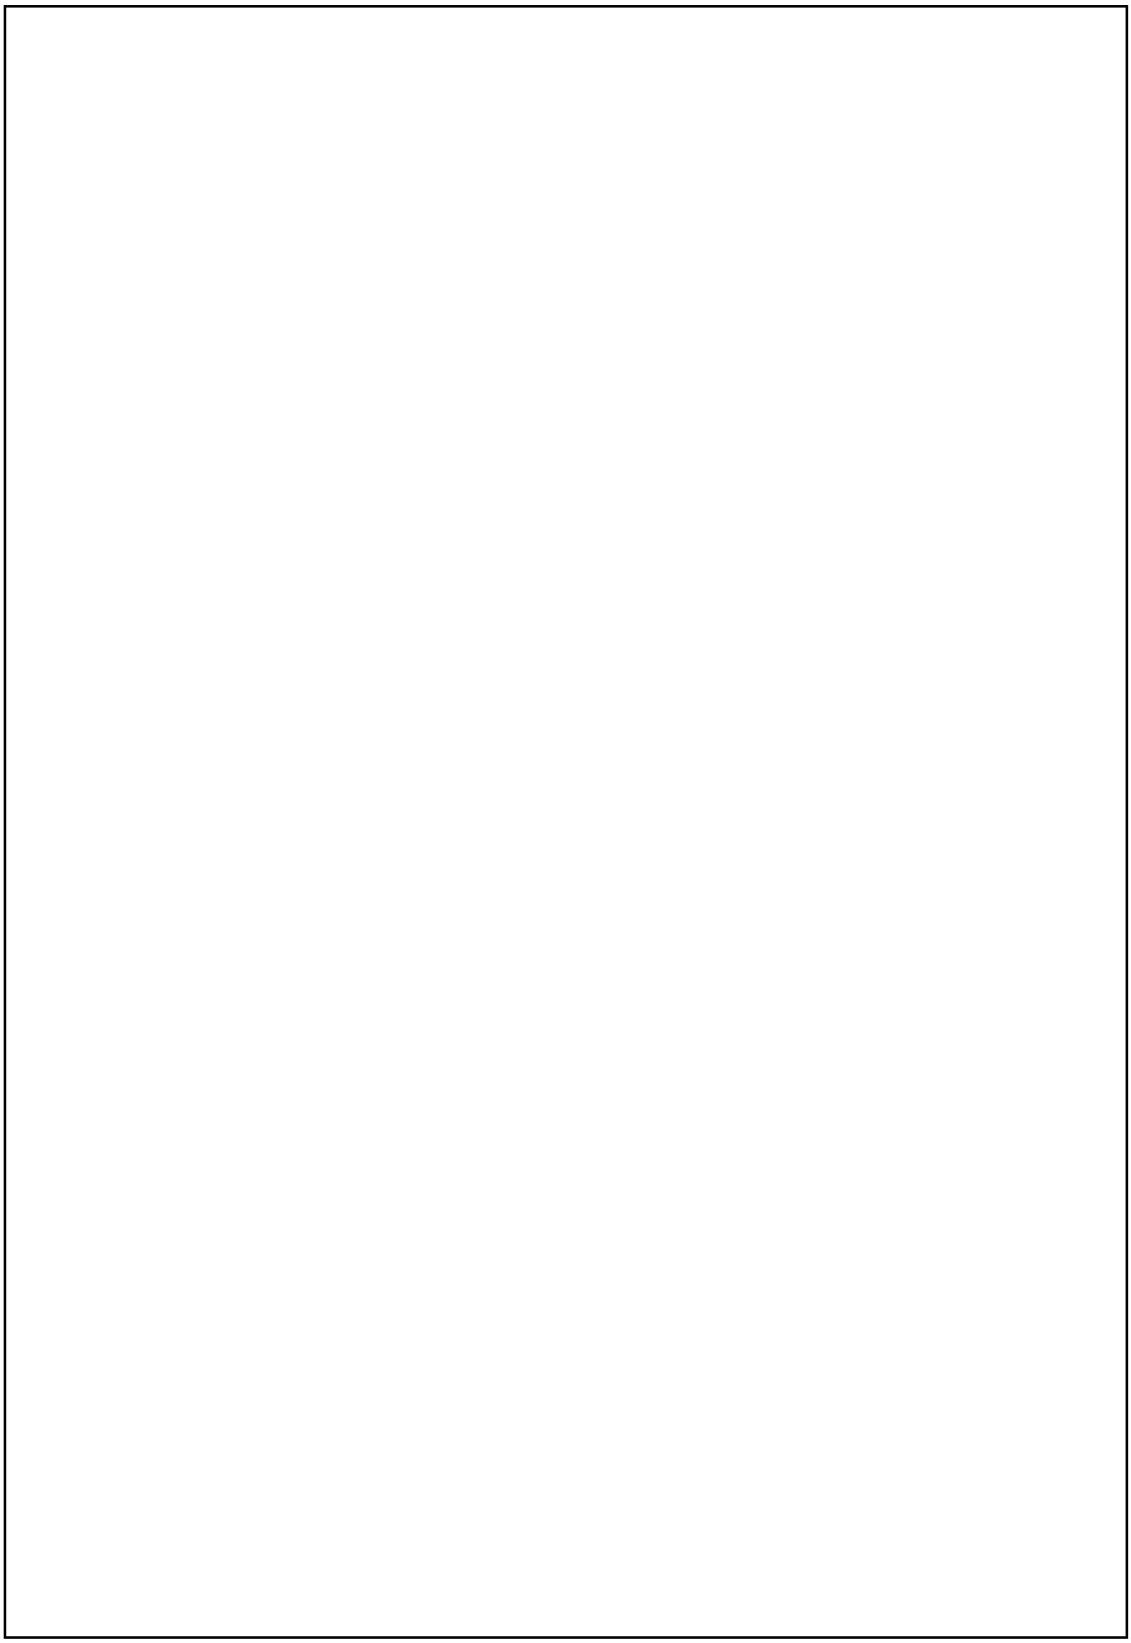
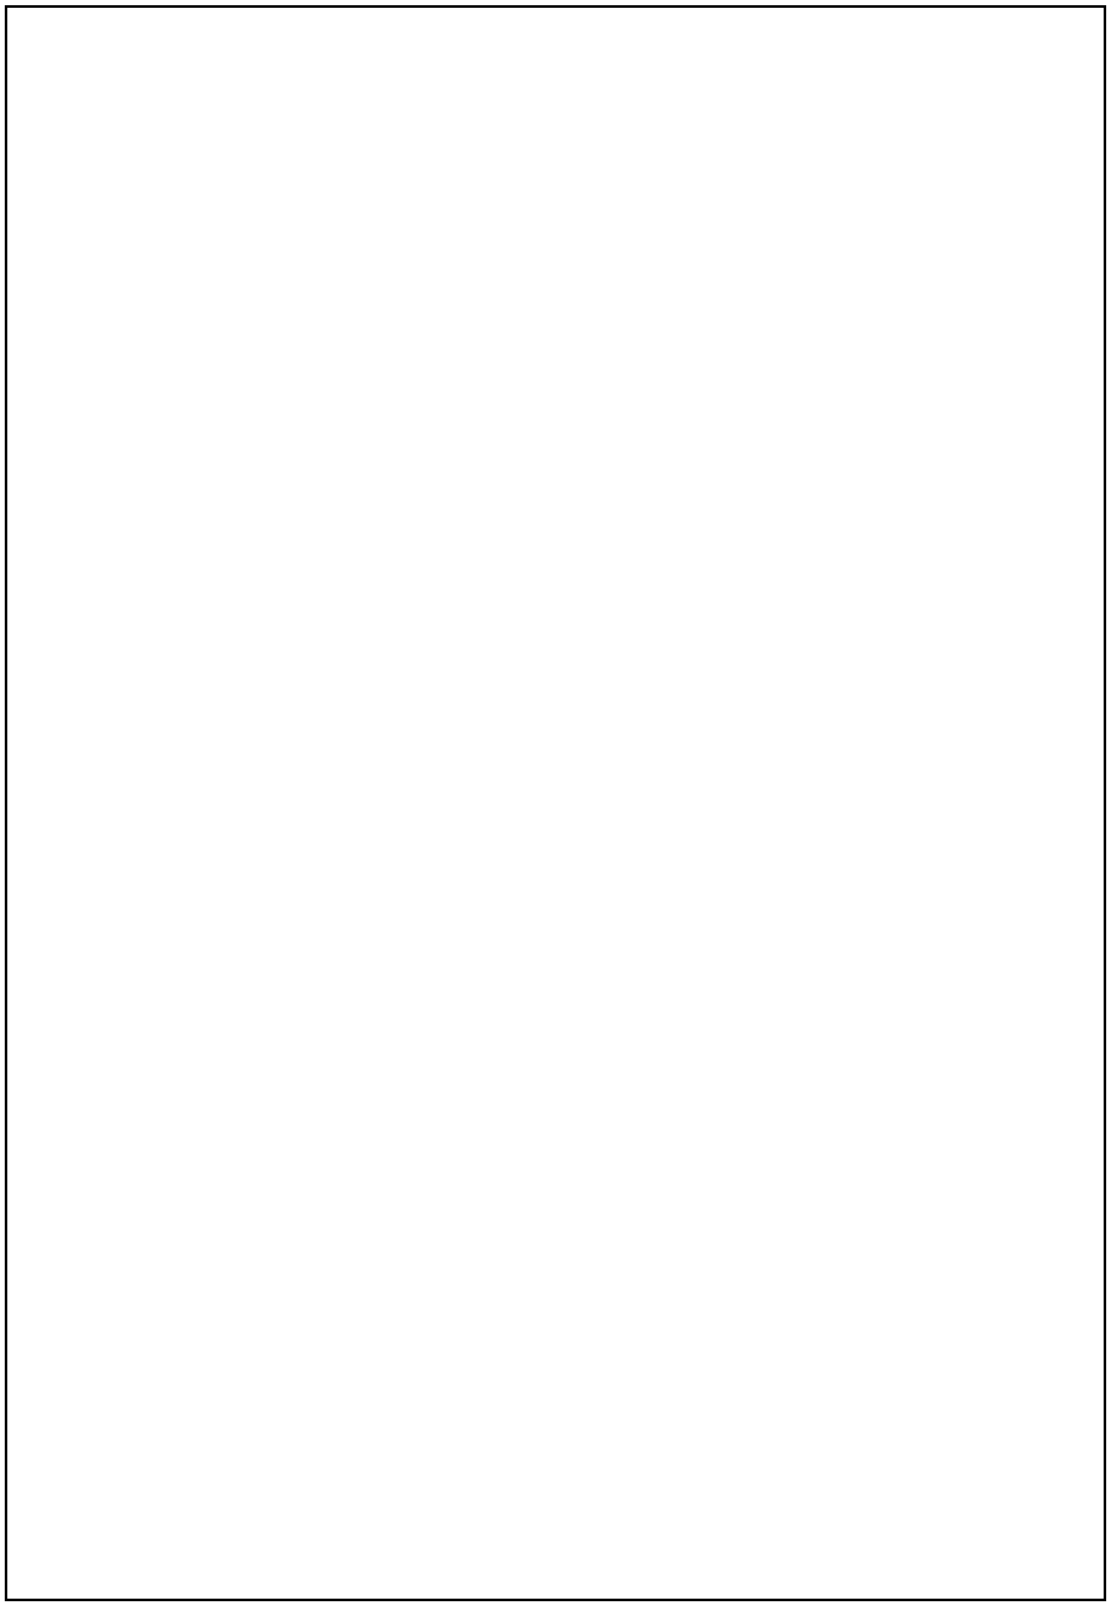
(b)(4)





(b)(4)

Immigration risks

The investor himself and herself must meet the requirements under the EB-5 program. Each purchaser of a Unit must understand that the Fund, the management company and each of their affiliates make no representation or warranty of any kind concerning whether an investment in the Fund will meet the requirements of the EB-5 program or other U.S. immigration requirements. Each investor in a Unit must further understand that there can be no assurance that an investment in the Unit will result in his or her family receiving an EB-5 visa, conditional resident status or permanent resident status. Please carefully consider the following immigration risks, and discuss these and other immigration risks with your personal immigration lawyer.

As a Unit holder, you will be subjected to certain general immigration risks faced by all immigrants to the United States.

The process of obtaining conditional resident status and permanent resident status involves many factors and circumstances that are not within the control of the Fund. These include the investor's past history and source of funds, immigration visa backlogs, potential changes in immigration laws and regulations (including laws and regulations specific to the EB-5 immigrant investor program) and quotas established by the United States government limiting the number of visas available to qualified individuals seeking conditional resident status under the EB-5 program. Although the Fund has been structured with the objective of providing Unit holders with eligibility for conditional and permanent resident status under the EB-5 regional center provisions of the U.S. immigration laws, no assurance can be given that each Unit holder will obtain approval of his or her particular immigrant application. Purchase of a Unit does not guarantee conditional or permanent residency in the United States. Furthermore, no assurances or advice can be given that conditional resident status will be converted to permanent resident status.

An investment in a Unit is only a part of the requirement for meeting EB-5 residency status. In addition, the USCIS will require that you pass a background check.

Each immigrant investor in the United States is subjected to a thorough background check. An EB-5 immigrant investor's background (or that of an immediate family member) may not meet the USCIS criteria for temporary or permanent residency in the United States. For example, among other criteria, the following may be grounds for denial of immigration benefits for the immigrant, and/or other members of the immigrant's family: having a communicable disease (e.g., AIDS) or other dangerous contagious disease; having been at any time involved with, trafficking in, or taking, illegal drugs; having been convicted of certain crimes; having committed a fraud or misrepresentation to a U.S. Government official; or having violated U.S. immigration law in the past.

As a result of participation in the EB-5 program and as a result of your investment in the Fund, you must pay income taxes in the United States on your world-wide income. You should consult your personal tax advisor about this obligation.

As an EB-5 participant, you will have to pay taxes in the United States on your world-wide income. As a member of the Fund, which is a limited liability company, your proportionate share of the Fund's income will be "passed-through" to you for U.S. Federal income tax purposes. You will also be required to include in income your proportionate share of the taxable income of the Fund for the purposes of any state of which you are a resident. Please consult your personal tax advisor about the tax consequences of an investment in the Fund. Further information about these matters is included in this private placement memorandum under the heading "Certain U.S. Federal Income Tax Considerations," beginning on page 32.

(b)(4)

(b)(4)

The EB-5 regional center program is a U.S. government program that is highly regulated and that requires frequent interaction between the Fund and government officials.

The EB-5 regional center program was created by Congress, which has accorded broad regulatory powers to the Department of Homeland Security and in particular to the United States Citizenship and Immigration Service (USCIS). Currently, all EB-5 related filings are reviewed by USCIS adjudicators in the USCIS California service center. While the Fund will strive to coordinate with USCIS to achieve our investors' immigration goal, there can be no assurance that USCIS adjudicators will take a consistent position on issues arising under the program, and there can be no assurance that USCIS regulations will not change in the future. Since the laws, regulations and bureaucratic interpretations applicable to the Fund's investments are subject to change at any time, there can be no assurance that the Fund will not be required to substantially change its investment policies in the future. The EB-5 program could be discontinued or altered by Congress at any time.

It is a requirement of the EB-5 program that an immigrant investor's source of funds be proper, under U.S. immigration guidelines.

EB-5 immigrant investors must demonstrate to the USCIS that the funds they invest in the Units were obtained through lawful means. Each EB-5 immigrant investor must document, to the satisfaction of the USCIS and the U.S. State Department, that the source of funds is acceptable. The Fund, and the EB-5 immigrant investor's immigration attorney, may make a preliminary assessment, but the ultimate decision will be made solely by USCIS and the U.S. State Department. Each EB-5 immigrant investor must agree to provide information and documents to the Fund, and to allow the Fund to make further investigation, concerning the EB-5 immigrant investor's source of funds and the personal and business background of the EB-5 immigrant investor and accompanying family members.

Achieving your immigration goal of conditional and permanent resident status will require you to maintain your primary residence in the United States.

EB-5 immigrant investors who obtain conditional resident status or permanent resident status must intend to make the United States their primary residence. Conditional residents or permanent residents who maintain their primary residence outside the United States risk revocation of their U.S. residence status. Each prospective EB-5 immigrant investor should consult a competent immigration attorney to review the likelihood that the investor's immigration objectives will be achieved.

USE OF PROCEEDS

SAMPLE

MANAGEMENT OF GTA

The following is a description of the business backgrounds of the executive officers of GTA:

Terry McAuliffe, Chairman

Mr. McAuliffe is the Chairman of GTA. He has been a long time investor and promoter of affordable green energy projects. It is at his direction that GTA has set its goal to truly meet a higher standard among our peers stating that "no green technology is green unless it is affordable to average consumers."

Before joining GTA, Mr. McAuliffe has been a longtime business leader and successful entrepreneur for nearly four decades. He has successfully started over two dozen companies in the fields of banking, real estate, securities, marketing, renewable energy and insurance. At the age of 14, Mr. McAuliffe started his first business, McAuliffe Driveway Maintenance, where he sealed residential driveways and commercial parking lots in his local community of Syracuse, New York. In January 1988, when he was only 30 years old, Mr. McAuliffe became the youngest chairman of a federally chartered bank in the history of the United States.

Mr. McAuliffe also served as Chairman of American Heritage Homes, one of Florida's largest homebuilding companies, as well as President of American Capitol Management Company, a major developer of real estate projects. He has been an active investor in the alternative energy field for over a decade.

In addition to his successful business career, he is a longtime political leader for the Democratic Party in the United States. He started his political career in the 1980 Presidential reelection campaign of President Jimmy Carter, and at the age of 22 became the national finance director for that campaign. He then served as National Finance Chairman of the Gephardt for President committee, National Finance Chairman and the National Co-Chairman of the Clinton-Gore re-election committee. In 1993, he was named by President Clinton as Ambassador and Commissioner General of the Korean International Exposition. He was Chairman of the 53rd Presidential Inaugural Committee and Chairman of the White House Millennium Celebration. In 2000, he chaired the Democratic National Convention in Los Angeles. He was elected Chairman of the Democratic National Committee from 2001 to 2005. He is widely credited with rebuilding, reenergizing and revitalizing the Democratic Party. As Chairman of the DNC, he shattered all Party records by raising over $535 million. He also served as Chairman of the 2008 Hillary Clinton Presidential campaign. In 2009, he unsuccessfully ran for Governor of the State of Virginia.

Chairman McAuliffe received a Juris Doctor degree from Georgetown University School of Law and a bachelors degree from The Catholic University of America in Washington, D.C.

SAMPLE

THE EB-5 PROGRAM

Overview

In 1990, the U. S. Congress created the employment based 5th preference (EB-5) immigrant investor visa program. The EB-5 program offers 10,000 immigrant visas a year to qualified investors who wish to obtain residence in the United States by investing in businesses that will benefit the economy and create jobs. The EB-5 Immigrant Investor Regional Center Pilot Program ("The Pilot Program") was created by Congress in 1992 and sets aside 3,000 of the 10,000 EB-5 visas each year for people who invest in designated "regional centers."

Once a qualifying investment has been made in a regional center, an investor files a Form I-526 Immigrant Petition by Alien Entrepreneur, ("Form I-526") with the USCIS. After the USCIS approves I-526 petition, an investor files an adjustment of status application if he or she is already in the U.S. in valid non-immigrant status or ii) applies for an interview and entry visa at a U.S. embassy or consulate abroad ("consular processing"). When an adjustment of status application is approved, a conditional residence status of two years will be given to the investor. If the investor pursues consular processing, upon approval the investor and his or her family will be issued an EB-5 entry visa to the U.S. Once they enter the U.S., the two-year conditional residence status starts.

At the end of the two-year conditional resident period the investor must show that his or her investment has been sustained and the projects invested in by the regional center have created at least ten jobs for each investor. Assuming the investor provides that evidence, the USCIS will remove the conditional residence status, and the investor will receive his or her permanent residency status.

The Immigration Process

The Fund's primary role in the immigration process is to sell interests in the Fund to immigrant investors (which allow the investors to file Form I-526) and invest the investors' capital in a manner that is consistent with the EB-5 program and leads to the creation of at least ten jobs for each Unit holder in the Fund. If GTA's proposed business plan succeeds, our independent economist's report indicates that GTA will create enough jobs to meet the EB-5 program requirements for every investor in the Fund. The rest of the immigration process will be led by the immigrant investor and his or her independent immigration counsel. The management company will maintain a current record of jobs created by the Fund's investment activities. The management company will assist each Unit holder by providing information about job creation to the USCIS in the manner required by the EB-5 program. Upon the initial conditional residency filing, the Fund will certify to the USCIS with respect to the projected number of jobs that will be created. Two years after an immigrant investor is granted conditional resident status, the investor must file with the USCIS Form I-829, Petition by Entrepreneur to Remove Conditions ("Form I-829") to convert his or her status to permanent residency. At that

SAMPLE

time, the Fund will allocate to each Unit holder ten jobs from those jobs created and maintained by GTA.

Frequently Asked Questions

The following are some frequently asked questions about the EB-5 program, along with answers to the questions:

How much do I need to invest to receive conditional and ultimately permanent residency status for myself and my family members?
If you invest in a regional center, like ours, you need to invest $500,000 if the investment is made in a high unemployment or rural area. There are also other fees such as legal fees for your immigration and tax counsel and application fees paid to USCIS.

What is the region covered by the Gulf Coast Funds Management regional center?
Our regional center covers the entire Commonwealth of Virginia.

Do I have to live in Virginia to participate in this program?
No. You do not have to live in Virginia. You do not even have to ever visit the region.

(b)(4)

What do I have to do to get my visa application approved?
Normally, you will get an American immigration lawyer to help you in the visa application process. If you do not have an immigration lawyer, the Placement Agent suggests that you use David Lu, Esq., an immigration lawyer with whom we work with on a regular basis. The lawyer will help you file a Form I-526. With your Form I-526, you will have to submit proof that the source of your $500,000 investment is lawful.

Once the USCIS approves your Form I-526 you will need to adjust your status if you are already living in the U.S. in non-immigrant status or you will have to schedule an interview at a U.S. embassy or consulate abroad. In either case, you will have to submit the same type of documentation that other visa applicants to the United States are required to submit. Here is a general description, from the U.S. government's web site, of certain requirements for receiving a visa:

VISA INELIGIBILITY / WAIVER
The immigration laws of the United States, in order to protect the health, welfare, and security of the U.S., prohibit the issuance of a visa to certain applicants. Examples of applicants who must be refused visas are those who: have a communicable disease, or have a dangerous physical or mental disorder; have committed serious criminal acts; are terrorists, subversives, members of a totalitarian party, or former Nazi war criminals; have used illegal means to enter the U.S.; or are ineligible for citizenship. Some former exchange visitors must live abroad for two years. Physicians who intend to practice medicine must pass

a qualifying exam before receiving immigrant visas. If found to be ineligible, the consular officer will advise the applicant of any waivers.

OTHER IMPORTANT INFORMATION

Documents for Visa Application
All applicants must submit certain personal documents such as passports, birth certificates, police certificates, and other civil documents, as well as evidence that they will not become public charges in the United States. The consular officer will inform visa applicants of the documents needed as their applications are processed.

Medical Examinations
Before the issuance of an immigrant visa, every applicant, regardless of age, must undergo a medical examination. The examination will be conducted by a physician designated by the consular officer. Examination costs must be borne by the applicant, in addition to the visa fees.

Visa Fees
The cost of each immigrant visa application may vary for additional visa fees apply. For up to date immigration visa fee costs, please consult your immigration attorney or please visit the USCIS fee schedule web page.

Source: www.uscis.gov

(b)(4)

When will my visa become permanent?
Two years after you receive your conditional resident status, you must apply for permanent residency. At that time, we will supply documents for your Form I-829 petition to show that your money has been invested in the region and that the Fund's investment has created at least ten jobs. Once your application is approved, you will

become a permanent resident of the United States, and may soon apply for full citizenship if you desire.

(b)(4)

SAMPLE

CERTAIN U.S. FEDERAL INCOME TAX CONSIDERATIONS

The following discussion about certain U.S. federal income tax and other tax considerations that you should weigh prior to investing in a Unit is merely a presentation of certain tax issues that generally apply to all investors in EB-5 funds. You should not consider this discussion to be tax advice, applicable to your particular situation or a full discussion of all material United States, state, local and foreign tax consequences of an investment in the Fund or your status as U.S. tax resident or non-resident and you should consult with your personal tax advisor about these, and all other issues relevant to your personal decision to invest in a Unit. Neither the Fund nor the management company is qualified to provide the tax advice you will need. You cannot use this summary for the purpose of avoiding United States federal tax penalties.

The following discussion is based upon the Internal Revenue Code of 1986 (the "Code"), the applicable Treasury Regulations promulgated or proposed under the Code (the "Regulations"), current positions of the IRS contained in published revenue rulings and revenue procedures, current administrative positions of the IRS, and existing judicial decisions, as in effect on the date of this Memorandum, all of which are subject to change or modification, with or without retroactive effect, at any time.

No assurance can be given as to the future status of federal income tax laws or other tax laws as they pertain to limited liability companies of the type described herein. It is likely that changes to the Code will be proposed in the future. The effect of such proposals on the Fund and on an investment therein cannot be analyzed. Accordingly, potential investors are urged to consider on-going developments regarding changes in the federal income tax law and other tax laws and to consult their own advisors in assessing the risks associated with an investment in the Fund.

Classification of the Fund

The Fund will be treated as a partnership for federal income tax purposes under the "check the box" Regulations. Under these regulations, an unincorporated domestic entity, such as the Fund, with at least two members will be taxed as a partnership if no election is made to be taxed as a corporation. Accordingly, the discussion herein relating to partnerships and partners generally will be applicable to Unit holders in the Fund.

Partnership Taxation in General

Under the Code, a partnership pays no federal income tax, although it may be required to withhold and pay taxes on behalf of certain of its partners. Rather, each partner reports on his federal income tax return his distributive share of all items of income, gain, loss, deduction, credit and tax preference of the partnership, whether or not the partnership makes any actual distribution to the partner during the taxable year. Thus, it is possible that distributions from the Fund will not be sufficient to pay tax liabilities with respect to the tax income and gain allocated to a Unit holder and that the only source of payment of such tax liabilities would be from the Unit holder's funds from sources

SAMPLE

other than the Fund.

The extent to which a Unit holder may utilize Fund losses in any tax year is limited to the adjusted tax basis of his interest in the Fund at the end of the Fund tax year (See "Basis of Units"). In addition, a Unit holder may not deduct Fund losses in excess of the amount the Unit holder is considered "at risk" with respect to the Fund under Code Section 465 (See "At Risk Limitations"). A Unit holder generally may use his distributive share of any partnership losses allowable after applying the foregoing loss limitation only to offset his income from other passive sources (see "Passive Activity Loss Limitations").

Basis of the Units

A Unit holder's initial tax basis for his Units will be the amount of money he contributes to the Fund.

A Unit holder's basis is his Units increased by (a) his share of the non-recourse liabilities of the Fund, and (b) his share of profits. The adjusted tax basis of his Units will be decreased, but not below zero, by (1) distributions to the Unit holder by the Fund; (ii) reductions in his share of the non-recourse obligations of the Fund; (iii) his share of the losses of the Fund; and (iv) his share of Fund expenditures not chargeable to his capital account.

Under Regulation Section 1.752-1(a)(2), a partnership liability is a non-recourse liability to the extent that no partner or related person (for the purpose of Regulation Section 1.752-4(b)) bears any economic risk of loss. A partnership liability generally is not considered non-recourse to the extent that any partner guarantees the payment of such liability. If a Unit holder or a "related" person guarantees all or a portion of the non-recourse liabilities of the Fund, the other Unit holders' tax basis in their Units will not include such guaranteed portion of the Fund's non-recourse liabilities.

Similarly, if a partner or a person related to a partner loans funds to a partnership and the other partners are not personally liable for the repayment of the loan, only the lending partners may include that loan in the basis of their partnership interests. For example, if a Unit holder or one of his affiliates makes a loan to the Fund, the other Unit holders would not include any portion of such a loan in the basis of their Units.

The Fund may be a "tiered" partnership if it owns interests in other entities taxed as partnerships for federal income tax purposes. With respect to "tiered" partnerships, the Regulations provide that the "upper-tier" partnership's share of the liabilities of the "lower-tier" partnership will be treated as liabilities of the upper-tier partnership for purposes of applying Code Section 752 to the partners of the upper-tier partnership (Regulation Section 1.752-4(a)).

If a Unit holder's basis in his Units is reduced to zero, the amount of any distributions (including any deemed distributions due to a reduction in Fund non-recourse

SAMPLE

liabilities) in excess of his share of the Fund's taxable income for the year will be treated as capital gain, except to the extent that ordinary income treatment is required for his *pro rata* share of depreciation recapture.

A partner may not deduct his share of losses of a partnership to the extent such losses exceed the partner's basis for his interest in the partnership. Any losses that are not currently deductible by a partner due to this limitation may be deducted when and to the extent the partner's basis is increased (for example, by the allocation of partnership income). The ability of a partner to claim his share of partnership losses will also depend on the impact of the "at risk" rules of Code Section 465 (see "At Risk Limitations") and the passive activity loss limitation rules of Code Section 469 (see "Passive Activity Loss Limitations").

Allocations of Profits and Losses

Under Code Section 704, a partner's distributive share of the income, gain, loss, deduction, or credit of a partnership is determined by reference to the partnership agreement, unless the allocation contained in the agreement does not have "substantial economic effect," in which case the allocation is determined by reference to the partners' interests in the partnership, taking into account all facts and circumstances.

Although it is intended that the Fund's allocations will be in accordance with the Unit holders' interests in the Fund, it is possible that the Internal Revenue Service will challenge the Fund's tax allocations and attempt to reallocate tax items among the Unit holders. Any such reallocations of tax items may have adverse tax and financial consequences to a Unit holder.

"At Risk" Limitations

Code Section 465 limits the amount of losses that a partner can deduct in a particular year to the amount that such partner is considered "at risk" at the close of the partnership's taxable year. Generally, a taxpayer is considered "at risk" to the extent of (i) the amount of money and the adjusted basis of property he contributes to an activity, plus (ii) any amounts borrowed with respect to an activity for which the taxpayer is personally liable or for which the taxpayer has pledged property (other than property used in the activity) as security. A taxpayer will generally not be considered "at risk" with respect to amounts protected against loss through non-recourse financing, guarantees, stop loss agreements or similar arrangements.

A taxpayer generally is not considered to be "at risk" for non-recourse obligations. Losses not deductible by reason of the "at risk" rules may be carried forward indefinitely and deducted at such time as the taxpayer becomes "at risk" to a greater extent with respect to the activity.

SAMPLE

Passive Activity Loss Limitations

Code Section 469 generally provides that losses attributable to "passive activities" may be used only to offset income from passive activities. Code Section 469 applies to individuals, estates, trusts, personal service corporations (corporations providing services that are substantially performed by owner-employees), and closely-held corporations (corporations having 5 or fewer shareholders who own more than 50% in value of the stock).

Code Section 469 defines a "passive activity" as (i) the conduct of a trade or business in which the taxpayer does not materially participate or (ii) any rental activity (without regard to participation). Under Code Section 469, the interest of a limited partner in a limited partnership is not considered an interest with respect to which a person materially participates, except as provided in regulations. Accordingly, a Unit holder's investment in the Fund will be a passive activity, and any Fund losses allocated to the Unit holders will constitute passive losses.

Under Code Section 469, passive losses generally may be used only to offset passive income until the taxable year in which the taxpayer disposes of his interest in the activity producing the passive losses.

Passive income is defined as the income from passive activities. Passive income does not include (i) income received as salary or wages; (ii) income derived from a trade or business in which the taxpayer materially participates ("active income"); (iii) interest, dividends, annuities or royalties ("portfolio income") not derived in the ordinary course of business; (iv) gain or loss from the disposition of property used in the ordinary course of business producing portfolio income; or (v) gain or loss from the disposition of property held for investment which is not considered to be an interest in a passive activity.

Passive losses that are not deductible in a particular year may be carried forward indefinitely and used to offset passive income in subsequent years. In addition, upon a fully taxable disposition of a taxpayer's entire interest in the passive activity (other than to a related party), any unused passive losses from the activity for the year that have been carried forward, and the loss, if any, on the disposition, may be applied first to offset any income from that activity for the year (including the gain, if any, from the disposition); second, to offset any other passive income for the year; and third, any remaining unused passive losses from the activity may be used to offset the taxpayer's active and portfolio income.

Based on the foregoing, a Unit holder may use any Fund losses allocated to him only to offset his passive income. If the Fund losses are not fully deductible in the year incurred, they may be applied against passive income (that is not portfolio income) in future years. If any unused losses from the Fund remain when the Unit holder disposes of his entire interest in the Fund, these losses may be used in full at such time, first against passive income, and then against any other income of the Unit holder.

DRAFT

The foregoing analysis assumes that the Fund constitutes a single "activity" for purposes of Code Section 469. If the Fund consisted of more than one activity, the passive activity loss limitations would apply separately to each such activity.

The Regulations provide flexibility in grouping a taxpayer's trade or business activities and rental activities for purposes of applying the passive activity rules. In this respect, one or more trade or business activities or rental activities may be treated as a single activity if the activities constitute an appropriate economic unit for the measurement of gain or loss for the purposes of Code Section 469. However, generally rental activities may not be grouped with a trade or business activity. Further, a taxpayer that owns an interest as a limited partner or limited entrepreneur (e.g., a member of an LLC who does not actively participate in the management of the LLC) may not group the following activities with any other activity: (i) holding, producing or distributing motion picture films or video tapes, (ii) farming, (iii) leasing personal property, (iv) exploring for or exploiting oil and gas resources, and (v) exploring for or exploiting geothermal deposits. A partnership must group its activities under the rules of the Regulations and once the partnership groups its activities, the partner may group those activities with each other, with activities conducted directly by the partner, and with activities conducted through other C corporations subject to Code Section 469, S corporations and partnerships, except that a partner may not treat activities grouped together by any 469 entity as separate activities.

Whether or not the Fund's activities are aggregated into a single activity should not affect a Unit holder's ability to offset passive losses from one Fund activity against passive income of another Fund activity. However, any previously suspended passive losses from a particular activity that is part of a single activity will not become deductible against non-passive income upon a disposition of that particular activity alone, but only upon a taxable disposition by the Fund of all of its interest in the single activity, or the Unit holder's disposition of his Units. Further, the Fund's debt investments or equity investments in C corporations may produce interest income or dividend income, respectively, that is classified as portfolio income for purposes of Code Section 469, and the Fund's other equity investments may produce losses classified as passive under Code Section 469, and in this situation a Unit holder's share of passive losses may not be utilizable to offset his share of portfolio income.

Distributions

Distributions (which include any deemed distribution arising from a reduction, by repayment or otherwise, in Fund liabilities) made to a Unit holder generally do not result in any recognition of gain for federal income tax purposes to the extent the amount of cash or debt reduction does not exceed the basis of the Unit holder's Units. A Unit holder's adjusted tax basis in his Units is reduced by the amount of the distribution. Distributions of cash (including reductions in liabilities) by the Fund in excess of a Unit holder's adjusted tax basis in his Units will result in the recognition of gain to the extent of such excess. Such gain is considered gain from the sale or exchange of the Units by

the Unit holder and in certain cases may be treated in part as ordinary income because of the depreciation recapture provisions. (see "Sale or Disposition of Units").

Sale or Disposition of Units

Upon a sale of a Unit, a Unit holder will realize gain or loss in an amount equal to the difference between the amount realized and his adjusted tax basis in the Unit. Under Code Section 751(a), any gain realized by a selling partner is taxed as ordinary income to the extent of the partner's *pro rata* share of "ordinary income assets" of the partnership. The balance of gain, if any, or the loss is treated as a capital gain or loss. In determining the amount received upon the sale or exchange of a Unit, a Unit holder must include, among other things, his allocable share of the outstanding amount of the indebtedness to which the Fund's property is subject. Therefore, it is possible that the gain realized on the sale of a Unit may exceed the cash proceeds of such sale. As a result, in some cases, the income taxes payable with respect to such gain may exceed such cash proceeds.

Certain Deductions to Be Claimed

Organization, Start-Up and Syndication Costs. Under the Code, neither a partnership nor its partners may deduct amounts paid or incurred in the promotion and sale of the interests in the partnership ("syndication" expenses), including those amounts paid as commissions, professional fees, and printing costs. These expenses must be capitalized and may not be amortized. Under the Regulations, the following expenses constitute non-deductible syndication expenses which must be capitalized and not amortized: (i) brokerage fees; (ii) registration fees; (iii) legal fees for securities advice and advice pertaining to the adequacy of tax disclosures in the offering memorandum for securities law purposes; (iv) accounting fees for the preparation of representations to be included in the offering memorandum; and (v) costs of printing the offering memorandum.

However, to the extent a partnership pays or incurs organizational expenses incidental to the creation of the partnership or start-up expenditures with respect to an active trade or business, the partnership generally may elect to capitalize such expenditures and amortize them ratably over a period of not less than 180 months, commencing in the month in which the partnership begins business. Organizational expenses include (i) legal fees for services incidental to the organization of the partnership, such as the negotiation and preparation of a partnership agreement; (ii) accounting fees for services incidental to the organization of the partnership, and (iii) filing fees. On the other hand, organizational expenses do not include (i) expenses incurred in connection with the acquisition of partnership assets or the transfer of assets to the partnership; (ii) syndication expenses; and (iii) certain other expenses. Start-up expenditures include (i) certain expenses related to the investigation of the creation or acquisition of an active trade or business; and (ii) expenses paid or incurred pursuant to the creation of an active trade or business, which expenses would be deductible if they were incurred after the commencement of the particular business operation to which they relate.

The Fund has incurred organizational expenses which it will elect to amortize over 180 months. Additionally, the Fund has incurred or may incur start-up expenditures which the Fund, if it is eligible to do so, intends to amortize over a 180 month period. Any costs incurred by the Fund associated with offering of the Units will be capitalized by the Fund as non-deductible syndication costs.

Other Limitations on Deductions. Other limitations may apply to reduce or eliminate the deductibility by a Unit holder of his share of the Fund's expenses, including fees paid to the management company. For example, to the extent deductions of the Fund are deemed not to be incurred in connection with a business, they will be treated as miscellaneous itemized deductions that, in the case of Unit holders, are deductible only to the extent that, when taken together with other similar deductions, they exceed 2% of the Unit holder's adjusted gross income. Also, miscellaneous itemized deductions are not deductible by a Unit holder in computing the Unit holder's alternative minimum tax.

Certain Tax Consequences to Non-United States Investors

Foreign Individuals Potentially Subject to U.S. Tax on Their Worldwide Income. Individuals who are not citizens of the United States but who are treated as "residents" of the United States for federal income tax purposes are subject to United States federal income tax on their worldwide income, including but not limited to their income from the Fund. For this purpose, an individual who is a lawful permanent resident of the United States (e.g., a holder of a "green card") generally will be treated as a resident. In addition, an individual who is not a lawful permanent resident under the immigration laws may nevertheless be a "resident" for tax purposes based upon a "substantial presence" in the United States as defined under Code Section 7701(b). For example, under that Code Section, an individual may be a "resident" if the individual is physically present in the United States on all or any part of a certain number of days, determined under a formula, within a three-year testing period. An individual present in the United States under certain types of temporary visas (e.g., teachers or students) may be excepted from the "substantial presence" test, but the determination whether an individual is a resident can be a complex determination. Potential investors who are foreign individuals should consult with their own tax advisors to be certain of their tax status under United States law.

Taxation of Non-U.S. Individuals Not Treated as Tax Residents. Potential investors who are neither citizens nor residents (as determined for tax purposes) of the United States ("Non-U.S. Investors") are subject to additional tax rules. Generally, Non-U.S. Investors are taxable on certain United States source passive investment income ("FDAP"), including dividends, interest and rents, at a flat rate of 30% on the gross amount of such income, without reduction for any expenses or other tax deductions, and that tax is satisfied by withholding of tax on payments of such amounts to the Non-U.S. Investors. In the case of a partnership, the partnership generally will be required to withhold based on the share of its FDAP allocable to its Non-U.S. Investors. The 30% tax on the gross amount of FDAP may be reduced or eliminated if the Non-U.S. Investor

is a resident of a country with which the United States has a bilateral income tax treaty, provide that the Non-U.S. Investor submits timely certification of his entitlement to treaty relief. Certain other exceptions apply which may reduce or eliminate the tax on certain types of FDAP, including interest income. Non-U.S. Investors generally are not subject to tax on capital gains unless either (1) the gains are attributable to a United States trade or business or (2) the Non-U.S. Investor is an individual who is present in the United States for more than 183 days during the taxable year in which the gains are realized.

The 30% taxation of FDAP will not apply to any income that is effectively connected with the active conduct of a trade or business within the United States. The net income from such a trade or business within the United States realized by a Non-U.S. Investor will be subject to tax at the regular graduated income tax rates applicable to resident individuals. Such income currently will be subject to income tax withholding, generally at a rate of 35%. A Non-U.S. Investor who realizes any such income will be required to file a United States federal income tax return with respect to the taxable year in which the income is realized.

A Non-U.S. Investor in the Fund who is allocated a share of passive income (including capital gain) or active trade or business income realized by the Fund will be subject to tax under the above rules as if such Non-U.S. Investor had realized such income directly. Any withholding of federal income taxes by the Fund attributable to a Non-U.S. Investor will be treated as a distribution to that particular Unit holder.

THE FOREGOING IS NOT A COMPLETE DISCUSSION OF ALL OF THE FEDERAL INCOME TAX CONSEQUENCES TO A NON-U.S. INVESTOR; THERE ARE STATE AND LOCAL TAX AND ESTATE TAX CONSEQUENCES TO BE CONSIDERED. ALSO, FOREIGN TAXES MAY BE IMPOSED ON A NON-U.S. INVESTOR'S INCOME FROM THE FUND. INVESTORS ARE STRONGLY ADVISED TO CONSULT WITH THEIR TAX ADVISORS WITH RESPECT TO THE TAX CONSEQUENCES OF AN INVESTMENT IN THE FUND.

Compliance Matters

Tax Returns/Audits. The Fund will furnish annually (and in certain circumstances, periodically) to each of the Unit holders sufficient information from the Fund's tax return for the Unit holders to prepare their own federal income tax returns.

The tax treatment of items of partnership income, loss, deduction, and credit will be determined at the partnership level. In addition, all partners are required, on their individual federal income tax returns, to treat partnership items in a manner that is consistent with the treatment of such items on the partnership's return.

The tax matters partner for the Fund will be the management company. The tax matters partner is required to, among other things, keep the other partners informed of all administrative and judicial proceedings and represent the Fund in such proceedings. The

tax matters partner is authorized to obtain judicial review of any proposed readjustment of partnership items. Although every partner with an interest in the outcome is allowed to participate in an action filed by the tax matters partner, the outcome of that proceeding will bind all partners. If the tax matters partner fails to seek judicial review of a proposed adjustment of partnership items, other partners may seek such review, provided that there can be only one judicial proceeding with respect to a partnership. The foregoing procedures may adversely affect a Unit holder's ability to deal with adjustments to his income tax return resulting from adjustments made with respect to the Fund.

If any of the tax returns of the Fund are audited, it is possible that substantial legal and accounting fees will have to be paid to substantiate the position of the Fund, and such fees would reduce the cash otherwise available to meet Fund obligations or for distribution to the Unit holders. Such an audit may result in adjustments to each Unit holder's income tax return. An audit of the Fund's tax returns may also result in an audit of non-partnership items on each Unit holder's income tax returns, which in turn could result in adjustments to such items. The costs incurred by a Unit holder in connection with an IRS audit of his income tax return will be borne solely by that Unit holder.

State and Local Taxes

In addition to federal income taxes, the Fund and the Unit holders may be subject to other taxes imposed by various jurisdictions, such as state and local income taxes. Although a detailed analysis of these various taxes is not presented here, investors should consider the potential state and local tax consequences of an investment in the Fund. For example, a Unit holder's distributive share of all or a portion of Fund income, gains, losses and deductions, profits and losses, may be required to be included in determining his income subject to tax under the laws of the state or locality in which he is a resident, as well as jurisdictions in which the Fund does business.

For example, with respect to Unit holders who are not residents of the Commonwealth of Virginia, if the Fund has Virginia source income allocated to such Unit holders, the Fund will be required to file composite returns and make composite payments of tax on behalf of all of its Unit holders who are not residents of Virginia. The current rate of the Virginia composite tax is [_____]% and any composite payment on behalf of a non-resident Unit holder will be treated by the Fund as a distribution to the non-resident Unit holder.

The Commonwealth of Virginia also requires a partnership to withhold income tax on a non-resident partner's allocable share of Virginia source income. The Fund will withhold at the required withholding rate (currently [_____]%) of Virginia source income allocable to Unit holders who are not residents of Virginia. Any such withholding will be treated by the Fund as a distribution to the non-resident Unit holder. The withholding by a partnership does not relieve the non-resident partner of his obligation to file a Virginia income tax return. A partnership is allowed to file a composite return on behalf of non-resident partners who have no activity in Virginia other than that from the partnership. If a composite filing is allowable with respect to a

SAMPLE

non-resident partner and the composite return is properly filed and all taxes, including applicable interest and penalty is paid, the individual non-resident partner is relieved of his separate individual filing requirement. If the Fund elects to file a composite return on behalf of any non-resident Unit holders, the composite tax payment attributable to the non-resident will be treated as a distribution by the Fund to that non-resident Unit holder.

The Fund intends to supply the Unit holders with information regarding their income, if any, derived from various jurisdictions in which the Fund does business. Unit holders are urged to consult with their own tax advisors regarding state and local tax laws.

U.S. Federal Estate and Gift Taxation

U.S. residents generally are subject to federal estate taxes on their taxable estates at death which includes the value at the time of a decedent's death of all of his property, real or personal, tangible or intangible, wherever situated. Additionally, U.S. residents are subject to gift taxes on the transfer of any property by gift. U.S. estate taxes can also apply to a Non-U.S. Investor to tax that part of his gross estate which at the time of his death is situated in the United States. For example, shares of stock in a domestic U.S. corporation owned by a non-resident alien are treated as property situated in the United States for purposes of this provision. Further, the IRS has ruled that a partner's interest in a partnership is situated where the partnership's business is carried on for purposes of applying the U.S.-United Kingdom Estate Tax Convention. Thus, a Unit in the Fund held by a Non-U.S. Investor could possibly be subject to U.S. estate tax on the death of the Non-U.S. Investor.

Additionally, state and local taxing jurisdictions may also impose state, inheritance and/or gift taxes on their residents or on property deemed situated within their respective jurisdictions.

4. Using the IMPLAN Model to Calculate National Multipliers

The IMPLAN model is a regional input/model developed and maintained by the Minnesota IMPLAN group, headquartered in Minneapolis. The basic model was originally developed by the USDA Forest Service in cooperation with the Federal Emergency Management Agency and the USDI Bureau of Land Management.

The IMPLAN model has certain similarities with the RIMS (Regional Input/Output Modeling system) model developed by the Department of Commerce, but is generally thought to contain several superior features besides its greater ease and flexibility of use. These improvements can be summarized as follows:

1. The Commerce Department is not permitted to publish data in any category where there are less than three organizations in a given economic area. IMPLAN has developed an algorithm to fill in the missing numbers.

2. IMPLAN has introduced improved methods of accounting for flows of goods and services among counties.

3. IMPLAN permits aggregation of any subset of industries for calculation and tabular purposes. This is useful when results are desired for, say, 1-digit industries instead of the 509 industries actually found in the input/output table.

4. As seen in the tables throughout this text, IMPLAN estimates three separate effects, labeled "direct", "indirect" and "induced". The direct effects are those entered by the user. The other two columns represent the multiplier effects, but they are usually combined in other input/output models. Briefly, the indirect effect represents purchases made by businesses when their sales rise. For example, a restaurant might order more food produced or sold in the region, or an automobile plant might order more steel. The induced effect represents the additional household spending because income has risen. For example, casino workers would spend their paychecks on various goods and services, some of which are produced in the region. In general, then, the larger the region under consideration, the larger the multipliers would be.

The following material, taken from the IMPLAN manual, describes the input/output process in more detail.

Input/output analysis is a means of examining relationships within an economy, both between businesses and between businesses and final consumers. It captures all of the monetary market transactions for consumption in a given time period. The resulting mathematical formulae allow examination of

the effects of a change in one or several economic activities on an entire economy.

A descriptive model includes information about local economic interactions known as regional economic accounts. These tables describe a local economy in terms of the flow of dollars from purchasers to producers within the region. The initial IMPLAN data details all purchases, including imported goods and services. When regional economic accounts are created, imports to the region are removed from the initial data, allowing examination of local inter-industry transactions and final purchases.

The regional economic accounts are used to construct local level multipliers. Multipliers describe the response of the economy to a stimulus (a change in demand or production). The multipliers represent the Predictive Model.

Purchases for final use (final demand) drive an input/output model. Industries producing goods and services for consumption purchase goods and services from other producers. These other producers, in turn, purchase goods and services. These indirect purchases (or indirect effects) continue until leakages from the region (imports, wages, profits, etc.) stop the cycle.

The indirect effects and the effects of increased household spending (induced effects) can be mathematically derived as sets of multipliers. The derivation is called the Leontief inverse. The resulting sets of multipliers describe the change of output for each industry caused by a one dollar change in final demand for any given industry.

The input/output analysis framework is similar to a financial accounting framework that tracks purchases of and expenditures on goods and services in dollars. Input/output accounting traces the flow of dollars between businesses and between businesses and final consumers. An input/output accounting framework can be illustrated using classic financial accounting T-accounts, which include receipts (income) and expenditures (expenses) on each side of a "T", as shown below.

Final Consumption (or final demand) drives input/output models. Industries respond to meet demand directly or indirectly, by supplying goods and services to industries responding directly. Each industry that produces goods and services generates demands for other goods and services, and so on. Multipliers describe these iterations.

There are three different multipliers developed for predictive modeling: Type I, Type II, and Type SAM. We start with the transactions table and derive a coefficient by dividing each industry column by the column total. This coefficient matrix is also known as the ***A Matrix***.

Appendix B. Resume of Dr. Michael K. Evans

CURRENT AND PREVIOUS POSITIONS

• Chairman, *Evans, Carroll & Associates, Inc.*, 1980-present (previously Evans Economics)

Economic consulting firm specializing in EB-5 immigration analysis, economic impact studies of development projects and new construction, models of state and local tax receipts, impact of current and proposed government legislation, and construction of econometric models for individual industries and companies.

• Chief Economist, *American Economics Group*, 2000-present.

Built a comprehensive state modeling system that provides economic analysis for a variety of consulting projects (see below).

• Clinical Professor of Economics, Department of Managerial Economics and Decision Sciences (MEDS), Kellogg Graduate School of Management, Northwestern University, 1996-99.

Taught courses in macroeconomics and business forecasting. Wrote textbooks for both courses.

• Winner of Blue Chip Economic Indicator Award for most accurate macroeconomic forecasts during the past four years, November 1999

• Founder and President, *Chase Econometric Associates*, 1970-1980

• Assistant and Associate Professor of Economics, Wharton School, University of Pennsylvania, 1964-69. Co-developer of the original Wharton Model.

• Visiting Professor, Radford University, (Radford, VA), 1987

Chairman of Institute for International Economic Competitiveness

• Visiting Lecturer, Hebrew University (Jerusalem), 1966-67

Built econometric model of the Israeli economy

Ph. D. in Economics, Brown University. Dissertation, "A Postwar Quarterly Model of the United States Economy, 1948-1962". A. B. in Mathematical Economics, Brown University

PREVIOUS ACTIVITIES AND EDUCATION

- Contributing Editor, *Industry Week*

Wrote a column in each issue on economic and financial trends as they impact the mfg sector.

- Editor, *The Evans Report*

Weekly newsletter discussing economic trends and financial markets. Pioneered the concept of the Monthly Tracking Model to incorporate recent economic releases into the overall economic forecast, including methods to predict these economic data.

- Consultant, *National Printing Equipment and Supply Association*

Prepares quarterly forecasts of shipments of printing equipment and graphic arts supplies by product line, based on an econometric model constructed for NPES. Also prepares analysis and forecasts of exports and imports by principal product line.

- Consultant, *APICS -- The Educational Society for Resource Management*,

In 1993, designed and developed the *APICS Business Outlook Index*, which uses survey data collected by the Evans Group to measure current production, production plans, shipments, employment, new orders, unfilled orders, inventory stocks, and the comparison of the actual to desired inventory/sales ratio to predict short-term changes in mfg sector activity. The results of this survey appeared every month in *APICS: The Performance Advantage*

- Consultant, *American Hardware Mfg Association*

Wrote a separate weekly edition of the Evans Report analyzing recent trends in the hardware and housing industries, including forecasts of the hardware industry based on an econometric model developed for AHMA.

- Board of Economists, *Los Angeles Times*

Wrote column every 6 weeks (5 other economists on the Board)

- Columnist, *United Press International*

  Wrote twice-weekly column, "Dollars and Trends"

- Consultant, Senate Finance Committee,

  Built the first large-scale supply-side model of the U. S. economy

- Consultant, Environmental Protection Agency and Council on Environmental Quality

  Estimated inflationary impact of government regulations

- Consultant, National Aeronautics and Space Administration

  Estimate impact of R&D spending on productivity growth

- Consultant, U. S. Treasury

  Estimated impact of investment tax credit and accelerated depreciation on capital spending by industry

- Consultant, U. S. Department of Agriculture

  Built large-scale econometric model of agricultural sector of U. S. economy

- Consultant, Organization of Economic Cooperation and Development

  Built econometric model of the French economy

SAMPLE OF RECENT CONSULTING PROJECTS

A. Economic Impact of EB-5 Immigrant Investor Programs and New Markets Tax Credits

- Calculated the number of jobs created for a film production company in New York City.

- Calculated economic impact of small-scale rooftop solar panels in various counties in California.

- Calculated economic impact of 7 different types of proposed businesses for a proposed regional center in the Bay Area of California.

- Determined the economic impact of a new biological research park, office building, and logistics center in Wooster, Ohio.

- Calculated the economic effect of a mixed-use urban renewal project in Cleveland, Ohio.

- Calculated economic impact of 14 different types of proposed businesses for a proposed EB-5 regional center that would include the entire state of Florida.

- Calculated economic impact of dairy farm and cheese processing plant in Northern California.

- Determined economic impact of a shipyard, food processing plant, and semiconductor plant for a proposed regional center in Louisiana and Mississippi.

- Calculated the economic impact of a new gaming casino in Natchez, Mississippi.

- Calculated the economic impact of a retail shopping center in suburban Los Angeles County.

- Prepared an economic impact analysis for the "timber to homes" project for a proposed regional center in Colorado.

- Calculated the economic impact for a proposed regional center in Baltimore, Maryland that would include the rebuilding of depressed areas in East Baltimore and along the riverfront.

- Prepared the economic analysis for a proposed EB-5 regional center for the entire state of Florida that included impact calculations for 14 different types of industries.

- Prepared the economic analysis for a proposed EB-5 regional center in the San Francisco Bay area that included calculations for 10 different types of industries.

- Prepared economic impact calculations for proposed EB-5 regional centers in New York City and Northeastern New Jersey.

- Calculated the economic impact of a rehabilitated office building in Albuquerque, New Mexico, including the increase in high quality jobs.

- Calculated the economic impact of a rehabilitated skilled nursing center in East Los Angeles, California, including the impact on nearby census tracts.

- Calculated the economic impact of development of warehouse and light industrial mfg space in Las Vegas, Nevada.

- Calculated the economic impact of rehabilitation and expansion of a vacation and health spa in Sharon Springs, New York

- Calculated economic impact of revitalizing an old resort hotel and adding new facilities for Lake Geneva, WI.

- Calculated the employment and tax effects for a portfolio of projects undertaken under the New Market capital program.

- Calculated generic employment changes for proposed EB-5 project for an Inland Port in Palm Beach County, FL

- Calculated the economic impact of construction of El Monte Village in El Monte, CA.

- Built an input/output model of Guam to be used to calculate economic impact of EB-5 projects. Used this model to estimate impact of various proposed projects.

- Calculated the economic impact of moving the Social Security Administration building in Birmingham, AL, and revitalizing the surrounding neighborhood.

- Calculated the economic impact of rehabbing and expanding the Everett Mall in Everett, WA.

- Determined the economic impact of building a new medical center in Charleston, SC

- Calculated economic impact of expanding Sugarbush resort in Vermont. Study included expansion of existing facilities and addition of new facilities.

• Calculated economic impact for new market tax credit program in Portsmouth, N.H. Study included both overall economic impact, and the increase in employment and income and the decrease in the unemployment rate and incidence of poverty in individual census tracts.

• Calculated the economic benefits of EB-5 programs for foreign investors for a mixed-use construction project, including a hotel, retail stores, apartments, and a sports stadium in the Washington, D. C. metropolitan area

• Calculated the economic benefits of EB-5 programs for foreign investors for a mixed-used retail shopping center in the New York City metropolitan area.

• Calculated the economic benefits of EB-5 programs for foreign investors for proposed shopping centers in five separate counties in Southern California, including differential impacts of building the shopping centers in different counties.

B. Projects for State and Local Governments

• Constructed an econometric model for the State of New York and determined the change in employment, labor income, and tax revenues for 43 different tax changes proposed by the Governor's office.

• Constructed a detailed econometric model for the State of Pennsylvania to determine the economic impact of the complete panoply of state taxes levied; the model contains over 1,000 equations. In cooperation with American Economics Group, the model was developed to simulate the effect of changes in any state tax rate on households and businesses by income deciles, household status, age of individuals, size of households, and many other demographic variables. The change in business taxes can also be simulated for detailed industry classifications.

• Determined whether the Washington, D.C. water and sewer authority should accept a high bid for a new waste disposal system. Decision to reject has saved the authority over $200 million, as construction prices turned down sharply as predicted.

• Built an econometric model to determine the "tax gap" caused by Internet sales for the state of Minnesota.

• Determined appropriate levels of shelter grants individual counties in New York State, and for utility allowances in New York City. Reviewed and prepared testimony in ongoing court cases in these areas.

• Calculated the economic impact of the revitalization of downtown Milwaukee, Wisconsin.

C. Economic Impact of Casino Gaming

• Built an econometric model to predict the growth of the gaming industry over the next decade, and the economic impact of that industry on employment and tax revenues at the Federal and state levels.

• Estimated the economic impact of Indian casino gaming nationally and for the State of Wisconsin.

• Determined the economic impact of the Oneida Indian gaming casino on the Green Bay metropolitan area.

• Estimated the negative economic impact on the Milwaukee area if a new Indian gaming casino were to be built in Kenosha, Wisconsin.

D. Economic Impact of Smoking Bans and Higher Taxes

• Testified on economic impact of smoking bans in Canada; certified as an expert witness by the Court.

• Examined the impact of smoking bans on restaurant sales in several different locations in the U.S. to determine how much sales changed when these bans were imposed, and the differential effects depending on whether these bans were partial or total.

• Determined the cross-border effects on retail sales from differential rates in cigarette, gasoline, and alcohol excise taxes

• Determined the economic impact of higher cigarette taxes on minority group employment.

• Estimated the economic impact and loss of Federal and state tax revenues when higher cigarette prices lead to increased smuggling.

E. Consulting Projects for Travel and Tourism

• Built an econometric model to predict tourism trips and revenues for the major regions of the U.S. economy.

• Constructed econometric models to predict tourism in Las Vegas and Orlando.

• Using the IMPLAN model, predicted economic impact of tourism and travel expenditures for all counties in Pennsylvania.

F. Other Private Sector Consulting Projects

• Calculated the economic impact of proposed EPA bans on fluoropolymer production.

• Estimated the size and economic importance of the fluoropolymer industry, and calculated economic impact of shutting down domestic production.

• Built an econometric model to examine how U.S. tax and regulatory policies help determine whether the gold mining industry would invest in the U.S. or other countries. Testified before Congress to help defeat legislation inimical to the mining industry.

• Built an econometric model to predict consumer bankruptcies, based on recent growth in consumer credit outstanding, the overall economic environment, and recent changes in credit regulations

• Estimated the economic impact of the ethanol subsidy on the U.S. economy and Farm Belt States, including the impact on the balance of payments, employment, and tax receipts. Testified before Congress to help pass legislation to extent subsidies to the ethanol industry.

• Built an econometric model to determine the impact of updating and improving the system of locks on the Upper Mississippi River on corn prices and exports, farm income, and the overall economy.

Re: Amendment of GCFM Application to include Virginia Tobacco Regions

Dear Ms. Velarde:

Gulf Coast Funds Management, LLC (GCFM), an approved Regional Center pursuant to Section 610 of the Appropriations Act of 1993, respectfully requests to include additional geographical areas covering the tobacco-dependent localities in the Commonwealth of Virginia for the following industries: manufacturing, education and training, research and development, and wholesale trade (international). The tobacco region consists of 41 localities in the South Central and Southwest regions of Virginia ("Tobacco Region", see attached *Exhibit A*), which was established to revitalize tobacco-dependent communities.

Communities and citizens throughout the Tobacco Region continue to experience significant economic distress as a direct consequence of historical dependence on tobacco production, textile and furniture manufacturing and coal production.

The credit crisis and difficult economy have resulted in more severe job losses in the Tobacco Region, where unemployment rates have historically been higher than other regions in Virginia. The Virginia Employment Commission has designated many areas within the Tobacco Region as Targeted Employment Areas, thus enabling them to benefit from the Immigrant Investor Pilot Program to accelerate the economic recovery and transformation in those areas.

The proposed expansion of GCFM's geographic coverage area is derived from the existing hybrid automobile manufacturing plan administered (the "Project") by GCFM through Gulf Coast Automotive Investment Fund A-1 (GCAIF A-1). The Project has moved forward with great speed and tremendous support from state and local governments due to its significant potential job creation. The company, GreenTech Automotive, Inc.

G. .F COAST FUNDS MANAGEME.
650 Poydras St. Ste. 2830,
New Orleans, LA 70130

TELEPHONE: (504) 582-2244
FACSISMILE: (504) 582-2240

("GTA", formerly known as Hybrid Kinetic Automotive Corp) has recently revealed publicly its four prototype cars to be built in the United States, and broken ground on the construction of its manufacturing facilities in Tunica County, Mississippi. In the meantime, GTA has agreed to allocate part of its manufacturing operations, such as engine and transmission production, to the Tobacco Region, contingent on USCIS approval of this amendment application.

GCFM's request to amend its application to expand its geography to cover the Tobacco Regions in Virginia is based on the previously approved hybrid automobile manufacturing project managed by the same company, and merely re-allocates a portion of GTA's original planned production to Virginia. Therefore, the methodology for job multipliers described in the original independent economic study, which was approved by USCIS, should be applicable to the manufacturing facilities to be built in the Tobacco Region, and the overall impact would stay intact.

The EB-5 program is an effective way to attract private investment into the Tobacco Region, which would not only create many new jobs, but also provide much-needed diversification to the region's economy. The Virginia State government has thus far expressed strong support for the Project.

Therefore, GCFM respectfully requests the expansion of its geographic coverage area to include the entire Tobacco Region in Virginia, and the support of GTA in achieving its goal of manufacturing and distributing hybrid motor vehicles in the US.

COMMONWEALTH of VIRGINIA

Office of the Governor

Timothy M. Kaine
Governor

December 4, 2009

The Honorable Janet Napolitano, Secretary
Department of Homeland Security
Washington, DC 20536

Re: EB-5 Regional Center Amendment Application for Virginia Tobacco Regions

Dear Secretary Napolitano,

As we assess the employment statistics in Virginia during these difficult economic times, we see a continuing need to create jobs, particularly in the historically tobacco-dependent regions across southside Virginia.

I am writing in support of Gulf Coast Funds Management LLC's request that the Department of Homeland Security and the United States Citizenship and Immigration Services allow them to expand their coverage to include tobacco-dependent localities in Virginia for the following industries: manufacturing, education and training, research and development, assembling, and international trade.

In Virginia, the credit crisis and difficult economy have caused unemployment to rise over the last two years, particularly in the tobacco regions. I support GCFM's amendment application and encourage the Department of Homeland Security and USCIS to allow this expansion.

Prompt consideration of their application will allow us to move as quickly as possible in generating funds for new investment in this region.

Sincerely,

Timothy M. Kaine

Re: State Agency Designation

Dear Ms. Velarde:

This letter is to identify the agency in Virginia which has been named to determine and designate areas of high unemployment as Targeted Employment Areas with respect to the application of Gulf Coast Funds Management, LLC for approval of expansion in the Commonwealth of Virginia.

Through this letter I am identifying the Virginia Employment Commission as responsible for the determination and designation of areas of high unemployment or rural areas as Targeted Employment Areas for the purposes of fulfilling this requirement for USCIS and the EB-5 Regional Center Program.

Sincerely,

Timothy M. Kaine

Re: Targeted Employment Area Designation in Virginia

Dear Ms. Velarde:

The Virginia Employment Commission certifies that the following areas are Targeted Employment Areas (TEA) within the Commonwealth of Virginia. Targeted Employment Areas are defined as areas, which at the time of investment, are rural areas, or areas which have experienced unemployment of at least 150 percent of the national average rate within Virginia.

High unemployment areas were determined using the 2008 national not seasonally adjusted unemployment rate of 5.8 percent; 150 percent of 5.8 percent is 8.7 percent. High unemployment areas are any particular geographical or political subdivision located within a Metropolitan Statistical Area (MSA), or within a city or town having a population of 20,000, or more, within such state. Many of the high unemployment areas are tobacco-dependent regions, which are established under *Code of Virginia*, Section 3.1-1107, and defined as civil jurisdictions in Southwest and Southside Virginia, where they are historical tobacco production regions and are experiencing the highest unemployment rates within the Commonwealth of Virginia. In order to decrease the high unemployment rate while transforming into a less tobacco-dependent economy, these areas are designated as TEA to seek enhanced economic recovery and development.

Rural areas are defined as civil jurisdictions not located within any standard MSA as designated by the Office of Management and Budget, or within any city or town having a population of 20,000, or more, based on the most recent decennial census of the United States.

The following attachment contains designated Target Employment Areas for the Commonwealth of Virginia. If you have any questions or need clarification, please contact Donald Lillywhite, Economic Information Services Director, at (804) 786-5670.

Sincerely,

Dolores Esser
Commissioner

Re: Targeted Employment Area Designation in Virginia

Dear Ms. Chapline:

This letter is follow-up to a December 15, 2009, communication to Barbara Velarde of the USCIS Foreign Trade Investor Program concerning Targeted Employment Areas (TEA). The Virginia Employment Commission certifies that Sussex County, Virginia, is a TEA within the Commonwealth of Virginia. Targeted Employment Areas are defined as areas, which at the time of investment, are rural areas, or areas which have experienced unemployment of at least 150 percent of the national average rate within Virginia.

High unemployment areas were determined using the 2008 national not seasonally adjusted unemployment rate of 5.8 percent; 150 percent of 5.8 percent is 8.7 percent. High unemployment areas are any particular geographical or political subdivision located within a Metropolitan Statistical Area (MSA), or within a city or town having a population of 20,000, or more, within such state. Many of the high unemployment areas are tobacco-dependent regions, which are established under *Code of Virginia*, Section 3.1-1107, and defined as civil jurisdictions in Southwest and Southside Virginia, where they are historical tobacco production regions and are experiencing the highest unemployment rates within the Commonwealth of Virginia. In order to decrease the high unemployment rate while transforming into a less tobacco-dependent economy, these areas are designated as TEA to seek enhanced economic recovery and development.

Rural areas are defined as civil jurisdictions not located within any standard MSA as designated by the Office of Management and Budget, or within any city or town having a population of 20,000, or more, based on the most recent decennial census of the United States.

Sincerely,

Dolores A. Esser
Commissioner

Business Expansion Plan

Date: December 7, 2009

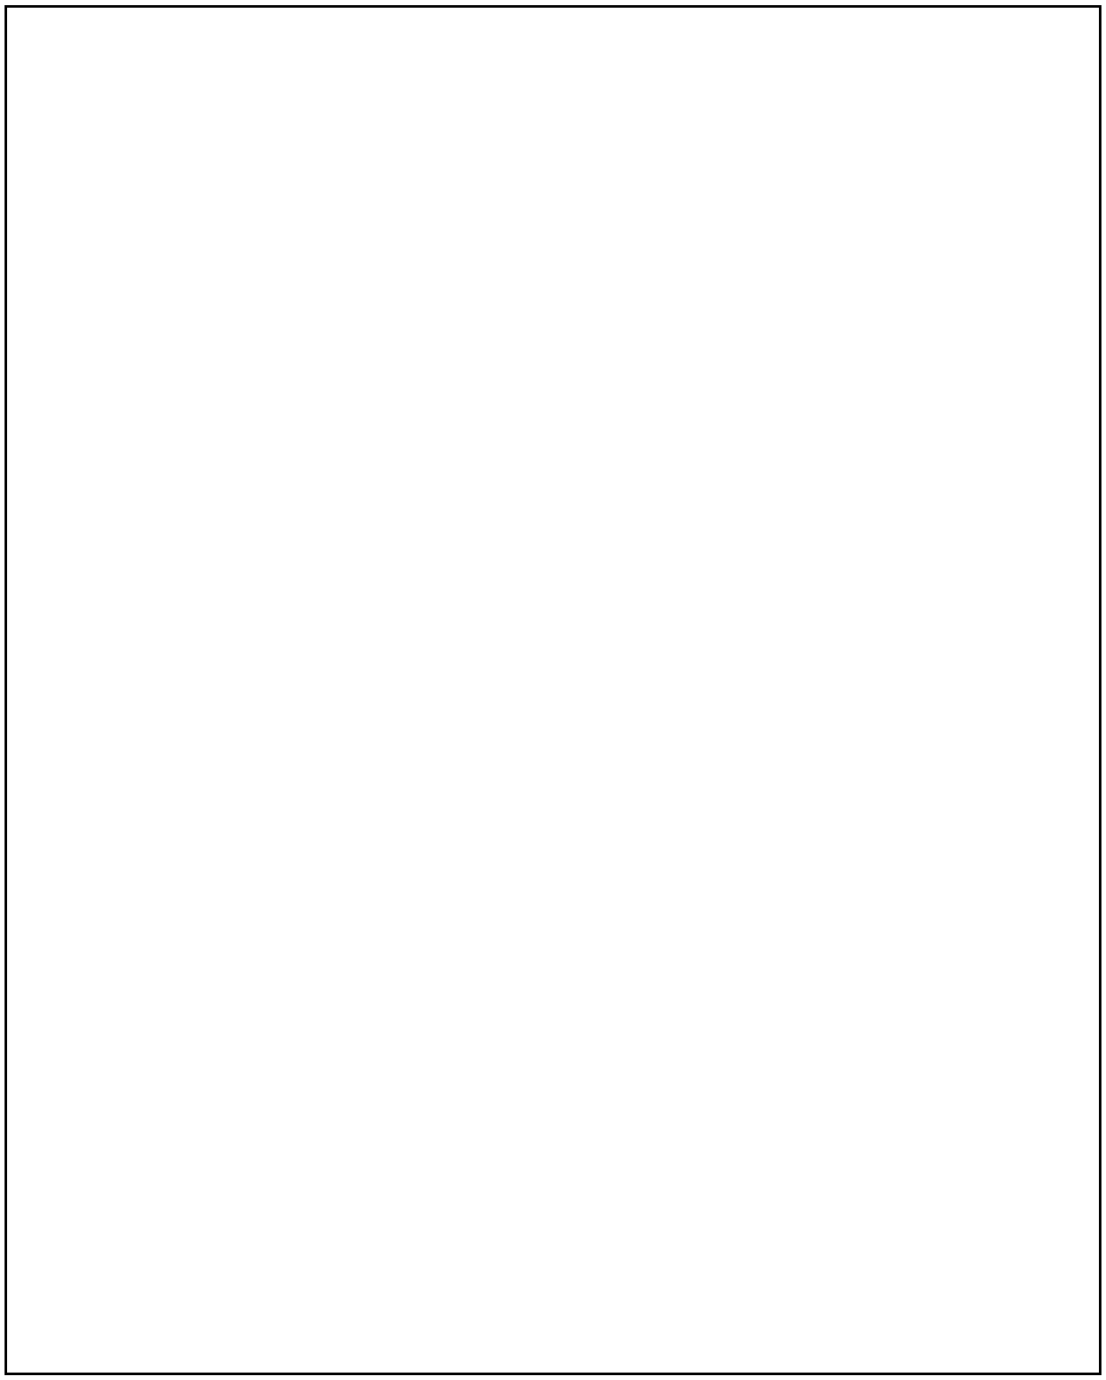
A NOTE ABOUT CONFIDENTIALITY

The contents of this business plan are highly proprietary, and should not be shared with any person other than officials of the U.S. Department of Homeland Security and USCIS who require this plan in order to analyze the application of Gulf Coast Funds Management LLC for an EB-5 regional center to expand coverage in the Commonwealth of Virginia.

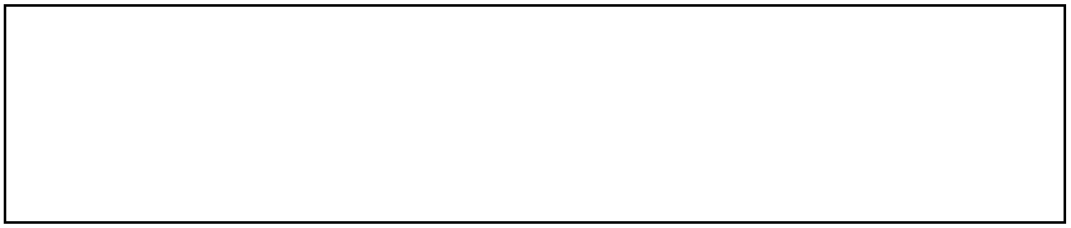
(b)(4)

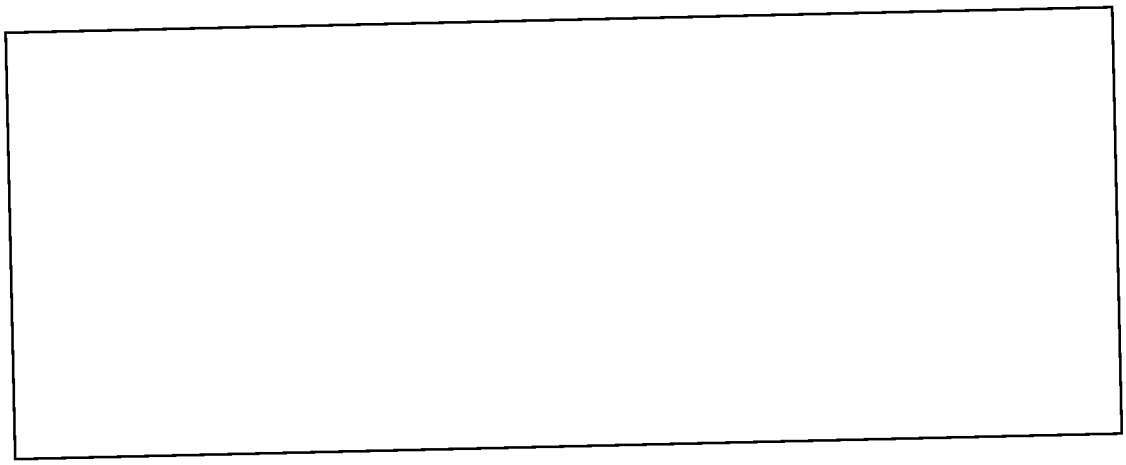
Gulf Coast Funds Management Regional Center Business Expansion Plan

1.0 Executive Summary



2.0 Company Summary





(b)(4)

3.0 The EB-5 Immigrant Investor Program

The management company will manage EB-5 investment funds. The EB-5 immigrant investor program is described as follows by the United States Department of Homeland Security:

Immigration through Investment Overview

Under section 203(b)(5) of the Immigration and Nationality Act (INA), 8 U.S.C. 81153(6)(5), 10,000 immigrant visas per year are available to qualified individuals seeking permanent resident status on the basis of their engagement in a new commercial enterprise.

Of the 10,000 investor visas (i.e., EB-5 visas) available annually, 3,000 are set aside for those who apply under a pilot program involving a USCIS-designated Regional Center. A regional center is an entity, organization or agency that has been approved as such by the USCIS; focuses on a specific geographic area within the United States; and seeks to promote economic growth through increased export sales, improved regional productivity, creation of new jobs, and increased domestic capital investment.

"Alien investors" must demonstrate that a "qualified investment" (see below) is being made in a new commercial enterprise or approved Regional Center; and, show, using reasonable methodologies, that 10 or more jobs are actually created either directly or indirectly from the new commercial enterprise through revenues generated from increased exports, improved regional productivity, job creation, or increased domestic capital investment resulting from the pilot program.

Eligibility

Permanent resident status based on EB-5 eligibility is available to investors, either alone or coming with their spouses and unmarried children under 21 years of age. Eligible aliens are those who have invested – or are actively in

the process of investing – the required amount of capital into a new commercial enterprise that they have established. They must further demonstrate that this investment will benefit the U.S. economy and create the requisite number of full-time jobs within the U.S.

In general, "eligible individuals" include those:

1. Who establish a new commercial enterprise by: creating an original business; or purchasing an existing business and simultaneously or subsequently restructuring / reorganizing the business such that a new commercial enterprise results; or expanding an existing business by 140 percent of the pre-investment number of jobs or net worth, or retaining all existing jobs in a troubled business that has lost 20 percent of its net worth over the past 12 to 24 months; and

2. Who have invested – or who are actively in the process of investing – in a new commercial enterprise: at least $1,000,000; or at least $500,000 where the investment is being made in a "targeted employment area," which is an area that has experiences unemployment of at least 150 percent of the national average rate or a rural area as designated by OMB; and

3. Whose engagement in a new commercial enterprise will benefit the United States economy and: create full-time employment for not fewer than 10 qualified individuals; or maintain the number of existing employees at no less than the pre-investment level for a period of at least two years, where the capital investment is being made in a "troubled business," which is a business that has been in existences for at least two year and that has lost 20 percent of its net worth over the past 12 to 24 months.

RISK FACTORS

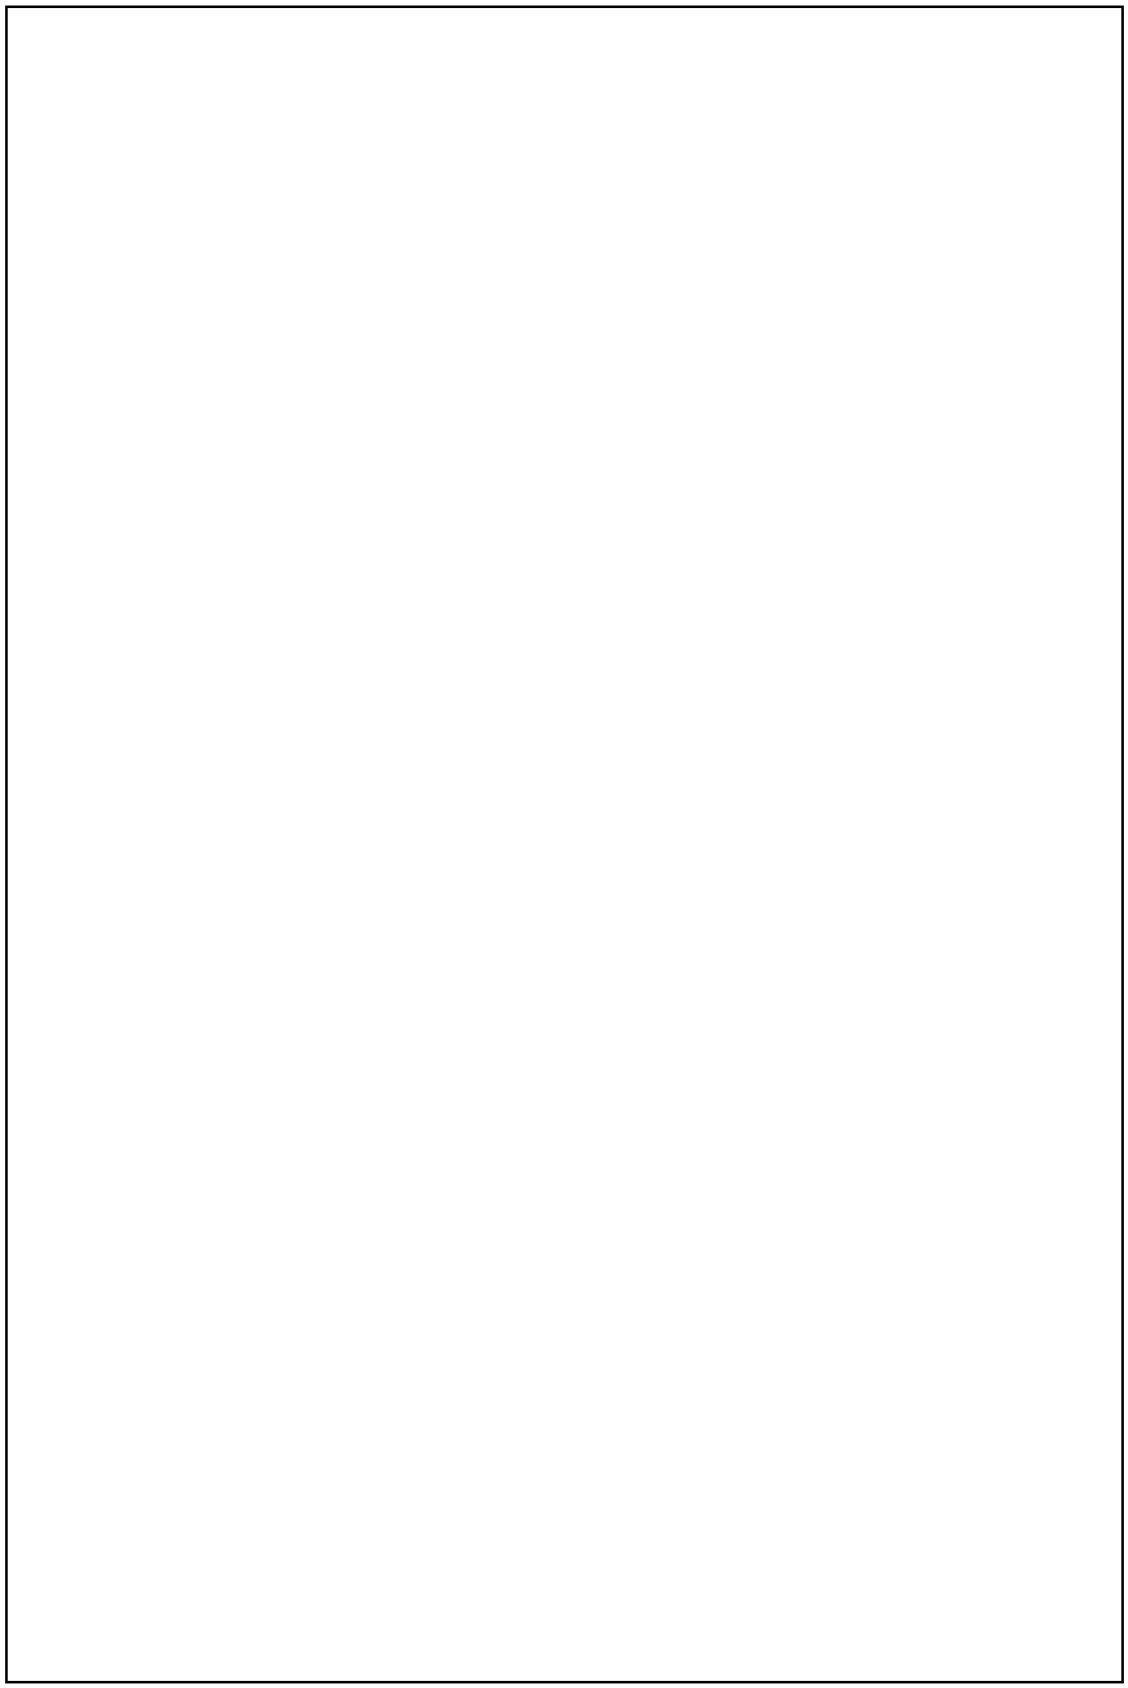
(b)(4)



(b)(4)

Immigration risks

The investor himself and herself must meet the requirements under the EB-5 program. Each purchaser of a Unit must understand that the Fund, the management company and each of their affiliates make no representation or warranty of any kind concerning whether an investment in the Fund will meet the requirements of the EB-5 program or other U.S. immigration requirements. Each investor in a Unit must further understand that there can be no assurance that an investment in the Unit will result in his or her family receiving an EB-5 visa, conditional resident status or permanent resident status. Please carefully consider the following immigration risks, and discuss these and other immigration risks with your personal immigration lawyer.

As a Unit holder, you will be subjected to certain general immigration risks faced by all immigrants to the United States.

The process of obtaining conditional resident status and permanent resident status involves many factors and circumstances that are not within the control of the Fund. These include the investor's past history and source of funds, immigration visa backlogs, potential changes in immigration laws and regulations (including laws and regulations specific to the EB-5 immigrant investor program) and quotas established by the United States government limiting the number of visas available to qualified individuals seeking conditional resident status under the EB-5 program. Although the Fund has been structured with the objective of providing Unit holders with eligibility for conditional and permanent resident status under the EB-5 regional center provisions of the U.S. immigration laws, no assurance can be given that each Unit holder will obtain approval of his or her particular immigrant application. Purchase of a Unit does not guarantee conditional or permanent residency in the United States. Furthermore, no assurances or advice can be given that conditional resident status will be converted to permanent resident status.

An investment in a Unit is only a part of the requirement for meeting EB-5 residency status. In addition, the USCIS will require that you pass a background check.

Each immigrant investor in the United States is subjected to a thorough background check. An EB-5 immigrant investor's background (or that of an immediate family member) may not meet the USCIS criteria for temporary or permanent residency in the United States. For example, among other criteria, the following may be grounds for denial of immigration benefits for the immigrant, and/or other members of the immigrant's family: having a communicable disease (e.g., AIDS) or other dangerous contagious disease; having been at any time involved with, trafficking in, or taking, illegal drugs; having been convicted of certain crimes; having committed a fraud or misrepresentation to a U.S. Government official; or having violated U.S. immigration law in the past.

As a result of participation in the EB-5 program and as a result of your investment in the Fund, you must pay income taxes in the United States on your world-wide income. You should consult your personal tax advisor about this obligation.

As an EB-5 participant, you will have to pay taxes in the United States on your world-wide income. As a member of the Fund, which is a limited liability company, your proportionate share of the Fund's income will be "passed-through" to you for U.S. Federal income tax purposes. You will also be required to include in income your proportionate share of the taxable income of the Fund for the purposes of any state of which you are a resident. Please consult your personal tax advisor about the tax consequences of an investment in the Fund. Further information about these matters is included in this private placement memorandum under the heading "Certain U.S. Federal Income Tax Considerations," beginning on page 32.

As a Unit holder, you will have no rights to receive a dividend and limited voting rights.

The GTA preferred stock that the Fund will invest in is not expected to pay any dividends. Therefore, the Fund will probably never have any funds with which to pay any dividends. Under the Fund's operating agreement, while the holders of Units will have certain voting rights, they will not have the right to replace the management company.

As a Unit holder, you will not have the right to transfer your Unit for five years, and no market for Units is likely ever to exist.

The Fund's operating agreement includes provisions that prohibit Unit holders from any transfer of their Units for five years after purchase. The only transfers that will be honored by the Fund during the initial five years of your investment are transfers that occur as a result of death. After five years, your Unit will automatically convert into common stock of GTA having an estimated fair market value of $555,000. If GTA'

CANCELED

common stock is not publicly traded at that time, your investment will continue to be extremely illiquid.

The EB-5 regional center program is a U.S. government program that is highly regulated and that requires frequent interaction between the Fund and government officials.

The EB-5 regional center program was created by Congress, which has accorded broad regulatory powers to the Department of Homeland Security and in particular to the United States Citizenship and Immigration Service (USCIS). Currently, all EB-5 related filings are reviewed by USCIS adjudicators in the USCIS California service center. While the Fund will strive to coordinate with USCIS to achieve our investors' immigration goal, there can be no assurance that USCIS adjudicators will take a consistent position on issues arising under the program, and there can be no assurance that USCIS regulations will not change in the future. Since the laws, regulations and bureaucratic interpretations applicable to the Fund's investments are subject to change at any time, there can be no assurance that the Fund will not be required to substantially change its investment policies in the future. The EB-5 program could be discontinued or altered by Congress at any time.

It is a requirement of the EB-5 program that an immigrant investor's source of funds be proper, under U.S. immigration guidelines.

EB-5 immigrant investors must demonstrate to the USCIS that the funds they invest in the Units were obtained through lawful means. Each EB-5 immigrant investor must document, to the satisfaction of the USCIS and the U.S. State Department, that the source of funds is acceptable. The Fund, and the EB-5 immigrant investor's immigration attorney, may make a preliminary assessment, but the ultimate decision will be made solely by USCIS and the U.S. State Department. Each EB-5 immigrant investor must agree to provide information and documents to the Fund, and to allow the Fund to make further investigation, concerning the EB-5 immigrant investor's source of funds and the personal and business background of the EB-5 immigrant investor and accompanying family members.

Achieving your immigration goal of conditional and permanent resident status will require you to maintain your primary residence in the United States.

EB-5 immigrant investors who obtain conditional resident status or permanent resident status must intend to make the United States their primary residence. Conditional residents or permanent residents who maintain their primary residence outside the United States risk revocation of their U.S. residence status. Each prospective EB-5 immigrant investor should consult a competent immigration attorney to review the likelihood that the investor's immigration objectives will be achieved.

MANAGEMENT OF GTA

The following is a description of the business backgrounds of the executive officers of GTA:

Terry McAuliffe, Chairman

Mr. McAuliffe is the Chairman of GTA. He has been a long time investor and promoter of affordable green energy projects. It is at his direction that GTA has set its goal to truly meet a higher standard among our peers stating that "no green technology is green unless it is affordable to average consumers."

Before joining GTA, Mr. McAuliffe has been a longtime business leader and successful entrepreneur for nearly four decades. He has successfully started over two dozen companies in the fields of banking, real estate, securities, marketing, renewable energy and insurance. At the age of 14, Mr. McAuliffe started his first business, McAuliffe Driveway Maintenance, where he sealed residential driveways and commercial parking lots in his local community of Syracuse, New York. In January 1988, when he was only 30 years old, Mr. McAuliffe became the youngest chairman of a federally chartered bank in the history of the United States.

Mr. McAuliffe also served as Chairman of American Heritage Homes, one of Florida's largest homebuilding companies, as well as President of American Capitol Management Company, a major developer of real estate projects. He has been an active investor in the alternative energy field for over a decade.

In addition to his successful business career, he is a longtime political leader for the Democratic Party in the United States. He started his political career in the 1980 Presidential reelection campaign of President Jimmy Carter, and at the age of 22 became the national finance director for that campaign. He then served as National Finance Chairman of the Gephardt for President committee, National Finance Chairman and the National Co-Chairman of the Clinton-Gore re-election committee. In 1993, he was named by President Clinton as Ambassador and Commissioner General of the Korean International Exposition. He was Chairman of the 53rd Presidential Inaugural Committee and Chairman of the White House Millennium Celebration. In 2000, he chaired the Democratic National Convention in Los Angeles. He was elected Chairman of the Democratic National Committee from 2001 to 2005. He is widely credited with rebuilding, reenergizing and revitalizing the Democratic Party. As Chairman of the DNC, he shattered all Party records by raising over $535 million. He also served as Chairman of the 2008 Hillary Clinton Presidential campaign. In 2009, he unsuccessfully ran for Governor of the State of Virginia.

Chairman McAuliffe received a Juris Doctor degree from Georgetown University School of Law and a bachelors degree from The Catholic University of America in Washington, D.C.

THE EB-5 PROGRAM

Overview

In 1990, the U. S. Congress created the employment based 5th preference (EB-5) immigrant investor visa program. The EB-5 program offers 10,000 immigrant visas a year to qualified investors who wish to obtain residence in the United States by investing in businesses that will benefit the economy and create jobs. The EB-5 Immigrant Investor Regional Center Pilot Program ("The Pilot Program") was created by Congress in 1992 and sets aside 3,000 of the 10,000 EB-5 visas each year for people who invest in designated "regional centers."

Once a qualifying investment has been made in a regional center, an investor files a Form I-526 Immigrant Petition by Alien Entrepreneur, ("Form I-526") with the USCIS. After the USCIS approves I-526 petition, an investor files an adjustment of status application if he or she is already in the U.S. in valid non-immigrant status or ii) applies for an interview and entry visa at a U.S. embassy or consulate abroad ("consular processing"). When an adjustment of status application is approved, a conditional residence status of two years will be given to the investor. If the investor pursues consular processing, upon approval the investor and his or her family will be issued an EB-5 entry visa to the U.S. Once they enter the U.S., the two-year conditional residence status starts.

At the end of the two-year conditional resident period the investor must show that his or her investment has been sustained and the projects invested in by the regional center have created at least ten jobs for each investor. Assuming the investor provides that evidence, the USCIS will remove the conditional residence status, and the investor will receive his or her permanent residency status.

The Immigration Process

The Fund's primary role in the immigration process is to sell interests in the Fund to immigrant investors (which allow the investors to file Form I-526) and invest the investors' capital in a manner that is consistent with the EB-5 program and leads to the creation of at least ten jobs for each Unit holder in the Fund. If GTA's proposed business plan succeeds, our independent economist's report indicates that GTA will create enough jobs to meet the EB-5 program requirements for every investor in the Fund. The rest of the immigration process will be led by the immigrant investor and his or her independent immigration counsel. The management company will maintain a current record of jobs created by the Fund's investment activities. The management company will assist each Unit holder by providing information about job creation to the USCIS in the manner required by the EB-5 program. Upon the initial conditional residency filing, the Fund will certify to the USCIS with respect to the projected number of jobs that will be created. Two years after an immigrant investor is granted conditional resident status, the investor must file with the USCIS Form I-829, Petition by Entrepreneur to Remove Conditions ("Form I-829") to convert his or her status to permanent residency. At that

DRAFT

time, the Fund will allocate to each Unit holder ten jobs from those jobs created and maintained by GTA.

Frequently Asked Questions

The following are some frequently asked questions about the EB-5 program, along with answers to the questions:

How much do I need to invest to receive conditional and ultimately permanent residency status for myself and my family members?
If you invest in a regional center, like ours, you need to invest $500,000 if the investment is made in a high unemployment or rural area. There are also other fees such as legal fees for your immigration and tax counsel and application fees paid to USCIS.

What is the region covered by the Gulf Coast Funds Management regional center?
Our regional center covers the entire Commonwealth of Virginia.

Do I have to live in Virginia to participate in this program?
No. You do not have to live in Virginia. You do not even have to ever visit the region.

(b)(4)

What do I have to do to get my visa application approved?
Normally, you will get an American immigration lawyer to help you in the visa application process. If you do not have an immigration lawyer, the Placement Agent suggests that you use David Lu, Esq., an immigration lawyer with whom we work with on a regular basis. The lawyer will help you file a Form I-526. With your Form I-526, you will have to submit proof that the source of your $500,000 investment is lawful.

Once the USCIS approves your Form I-526 you will need to adjust your status if you are already living in the U.S. in non-immigrant status or you will have to schedule an interview at a U.S. embassy or consulate abroad. In either case, you will have to submit the same type of documentation that other visa applicants to the United States are required to submit. Here is a general description, from the U.S. government's web site, of certain requirements for receiving a visa:

VISA INELIGIBILITY / WAIVER
The immigration laws of the United States, in order to protect the health, welfare, and security of the U.S., prohibit the issuance of a visa to certain applicants. Examples of applicants who must be refused visas are those who: have a communicable disease, or have a dangerous physical or mental disorder; have committed serious criminal acts; are terrorists, subversives, members of a totalitarian party, or former Nazi war criminals; have used illegal means to enter the U.S.; or are ineligible for citizenship. Some former exchange visitors must live abroad for two years. Physicians who intend to practice medicine must pass

a qualifying exam before receiving immigrant visas. If found to be ineligible, the consular officer will advise the applicant of any waivers.

OTHER IMPORTANT INFORMATION

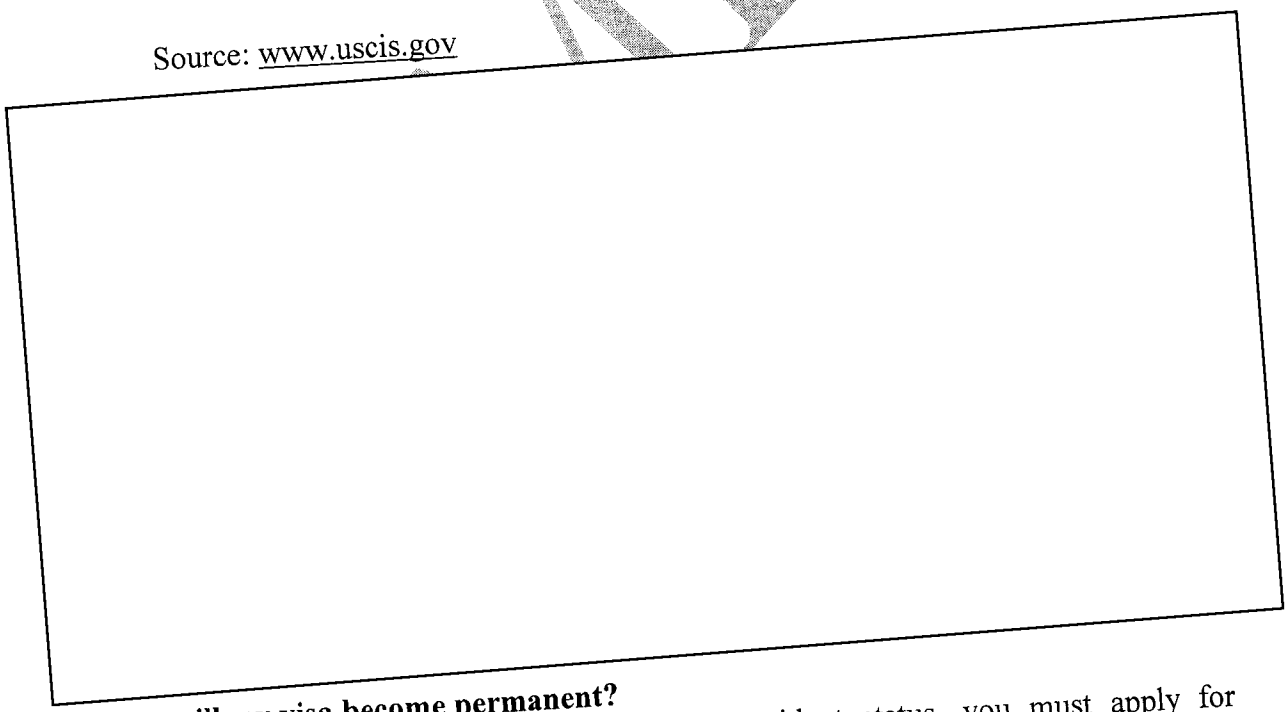
Documents for Visa Application
All applicants must submit certain personal documents such as passports, birth certificates, police certificates, and other civil documents, as well as evidence that they will not become public charges in the United States. The consular officer will inform visa applicants of the documents needed as their applications are processed.

Medical Examinations
Before the issuance of an immigrant visa, every applicant, regardless of age, must undergo a medical examination. The examination will be conducted by a physician designated by the consular officer. Examination costs must be borne by the applicant, in addition to the visa fees.

Visa Fees
The cost of each immigrant visa application may vary for additional visa fees apply. For up to date immigration visa fee costs, please consult your immigration attorney or please visit the USCIS fee schedule web page.

(b)(4)

Source: www.uscis.gov



When will my visa become permanent?
Two years after you receive your conditional resident status, you must apply for permanent residency. At that time, we will supply documents for your Form I-829 petition to show that your money has been invested in the region and that the Fund's investment has created at least ten jobs. Once your application is approved, you will

become a permanent resident of the United States, and may soon apply for full citizenship if you desire.

SAMPLE

CERTAIN U.S. FEDERAL INCOME TAX CONSIDERATIONS

The following discussion about certain U.S. federal income tax and other tax considerations that you should weigh prior to investing in a Unit is merely a presentation of certain tax issues that generally apply to all investors in EB-5 funds. You should not consider this discussion to be tax advice, applicable to your particular situation or a full discussion of all material United States, state, local and foreign tax consequences of an investment in the Fund or your status as U.S. tax resident or non-resident and you should consult with your personal tax advisor about these, and all other issues relevant to your personal decision to invest in a Unit. Neither the Fund nor the management company is qualified to provide the tax advice you will need. You cannot use this summary for the purpose of avoiding United States federal tax penalties.

The following discussion is based upon the Internal Revenue Code of 1986 (the "Code"), the applicable Treasury Regulations promulgated or proposed under the Code (the "Regulations"), current positions of the IRS contained in published revenue rulings and revenue procedures, current administrative positions of the IRS, and existing judicial decisions, as in effect on the date of this Memorandum, all of which are subject to change or modification, with or without retroactive effect, at any time.

No assurance can be given as to the future status of federal income tax laws or other tax laws as they pertain to limited liability companies of the type described herein. It is likely that changes to the Code will be proposed in the future. The effect of such proposals on the Fund and on an investment therein cannot be analyzed. Accordingly, potential investors are urged to consider on-going developments regarding changes in the federal income tax law and other tax laws and to consult their own advisors in assessing the risks associated with an investment in the Fund.

Classification of the Fund

The Fund will be treated as a partnership for federal income tax purposes under the "check the box" Regulations. Under these regulations, an unincorporated domestic entity, such as the Fund, with at least two members will be taxed as a partnership if no election is made to be taxed as a corporation. Accordingly, the discussion herein relating to partnerships and partners generally will be applicable to Unit holders in the Fund.

Partnership Taxation in General

Under the Code, a partnership pays no federal income tax, although it may be required to withhold and pay taxes on behalf of certain of its partners. Rather, each partner reports on his federal income tax return his distributive share of all items of income, gain, loss, deduction, credit and tax preference of the partnership, whether or not the partnership makes any actual distribution to the partner during the taxable year. Thus, it is possible that distributions from the Fund will not be sufficient to pay tax liabilities with respect to the tax income and gain allocated to a Unit holder and that the only source of payment of such tax liabilities would be from the Unit holder's funds from sources

other than the Fund.

The extent to which a Unit holder may utilize Fund losses in any tax year is limited to the adjusted tax basis of his interest in the Fund at the end of the Fund tax year (See "Basis of Units"). In addition, a Unit holder may not deduct Fund losses in excess of the amount the Unit holder is considered "at risk" with respect to the Fund under Code Section 465 (See "At Risk Limitations"). A Unit holder generally may use his distributive share of any partnership losses allowable after applying the foregoing loss limitation only to offset his income from other passive sources (see "Passive Activity Loss Limitations").

Basis of the Units

A Unit holder's initial tax basis for his Units will be the amount of money he contributes to the Fund.

A Unit holder's basis is his Units increased by (a) his share of the non-recourse liabilities of the Fund, and (b) his share of profits. The adjusted tax basis of his Units will be decreased, but not below zero, by (1) distributions to the Unit holder by the Fund; (ii) reductions in his share of the non-recourse obligations of the Fund; (iii) his share of the losses of the Fund; and (iv) his share of Fund expenditures not chargeable to his capital account.

Under Regulation Section 1.752-1(a)(2), a partnership liability is a non-recourse liability to the extent that no partner or related person (for the purpose of Regulation Section 1.752-4(b)) bears any economic risk of loss. A partnership liability generally is not considered non-recourse to the extent that any partner guarantees the payment of such liability. If a Unit holder or a "related" person guarantees all or a portion of the non-recourse liabilities of the Fund, the other Unit holders' tax basis in their Units will not include such guaranteed portion of the Fund's non-recourse liabilities.

Similarly, if a partner or a person related to a partner loans funds to a partnership and the other partners are not personally liable for the repayment of the loan, only the lending partners may include that loan in the basis of their partnership interests. For example, if a Unit holder or one of his affiliates makes a loan to the Fund, the other Unit holders would not include any portion of such a loan in the basis of their Units.

The Fund may be a "tiered" partnership if it owns interests in other entities taxed as partnerships for federal income tax purposes. With respect to "tiered" partnerships, the Regulations provide that the "upper-tier" partnership's share of the liabilities of the "lower-tier" partnership will be treated as liabilities of the upper-tier partnership for purposes of applying Code Section 752 to the partners of the upper-tier partnership (Regulation Section 1.752-4(a)).

If a Unit holder's basis in his Units is reduced to zero, the amount of any distributions (including any deemed distributions due to a reduction in Fund non-recourse

liabilities) in excess of his share of the Fund's taxable income for the year will be treated as capital gain, except to the extent that ordinary income treatment is required for his *pro rata* share of depreciation recapture.

A partner may not deduct his share of losses of a partnership to the extent such losses exceed the partner's basis for his interest in the partnership. Any losses that are not currently deductible by a partner due to this limitation may be deducted when and to the extent the partner's basis is increased (for example, by the allocation of partnership income). The ability of a partner to claim his share of partnership losses will also depend on the impact of the "at risk" rules of Code Section 465 (see "At Risk Limitations") and the passive activity loss limitation rules of Code Section 469 (see "Passive Activity Loss Limitations").

Allocations of Profits and Losses

Under Code Section 704, a partner's distributive share of the income, gain, loss, deduction, or credit of a partnership is determined by reference to the partnership agreement, unless the allocation contained in the agreement does not have "substantial economic effect," in which case the allocation is determined by reference to the partners' interests in the partnership, taking into account all facts and circumstances.

Although it is intended that the Fund's allocations will be in accordance with the Unit holders' interests in the Fund, it is possible that the Internal Revenue Service will challenge the Fund's tax allocations and attempt to reallocate tax items among the Unit holders. Any such reallocations of tax items may have adverse tax and financial consequences to a Unit holder.

"At Risk" Limitations

Code Section 465 limits the amount of losses that a partner can deduct in a particular year to the amount that such partner is considered "at risk" at the close of the partnership's taxable year. Generally, a taxpayer is considered "at risk" to the extent of (i) the amount of money and the adjusted basis of property he contributes to an activity, plus (ii) any amounts borrowed with respect to an activity for which the taxpayer is personally liable or for which the taxpayer has pledged property (other than property used in the activity) as security. A taxpayer will generally not be considered "at risk" with respect to amounts protected against loss through non-recourse financing, guarantees, stop loss agreements or similar arrangements.

A taxpayer generally is not considered to be "at risk" for non-recourse obligations. Losses not deductible by reason of the "at risk" rules may be carried forward indefinitely and deducted at such time as the taxpayer becomes "at risk" to a greater extent with respect to the activity.

DRAFT

Passive Activity Loss Limitations

Code Section 469 generally provides that losses attributable to "passive activities" may be used only to offset income from passive activities. Code Section 469 applies to individuals, estates, trusts, personal service corporations (corporations providing services that are substantially performed by owner-employees), and closely-held corporations (corporations having 5 or fewer shareholders who own more than 50% in value of the stock).

Code Section 469 defines a "passive activity" as (i) the conduct of a trade or business in which the taxpayer does not materially participate or (ii) any rental activity (without regard to participation). Under Code Section 469, the interest of a limited partner in a limited partnership is not considered an interest with respect to which a person materially participates, except as provided in regulations. Accordingly, a Unit holder's investment in the Fund will be a passive activity, and any Fund losses allocated to the Unit holders will constitute passive losses.

Under Code Section 469, passive losses generally may be used only to offset passive income until the taxable year in which the taxpayer disposes of his interest in the activity producing the passive losses.

Passive income is defined as the income from passive activities. Passive income does not include (i) income received as salary or wages; (ii) income derived from a trade or business in which the taxpayer materially participates ("active income"); (iii) interest, dividends, annuities or royalties ("portfolio income") not derived in the ordinary course of business; (iv) gain or loss from the disposition of property used in the ordinary course of business producing portfolio income; or (v) gain or loss from the disposition of property held for investment which is not considered to be an interest in a passive activity.

Passive losses that are not deductible in a particular year may be carried forward indefinitely and used to offset passive income in subsequent years. In addition, upon a fully taxable disposition of a taxpayer's entire interest in the passive activity (other than to a related party), any unused passive losses from the activity for the year that have been carried forward, and the loss, if any, on the disposition, may be applied first to offset any income from that activity for the year (including the gain, if any, from the disposition); second, to offset any other passive income for the year; and third, any remaining unused passive losses from the activity may be used to offset the taxpayer's active and portfolio income.

Based on the foregoing, a Unit holder may use any Fund losses allocated to him only to offset his passive income. If the Fund losses are not fully deductible in the year incurred, they may be applied against passive income (that is not portfolio income) in future years. If any unused losses from the Fund remain when the Unit holder disposes of his entire interest in the Fund, these losses may be used in full at such time, first against passive income, and then against any other income of the Unit holder.

Strictly Confidential and Proprietary

The foregoing analysis assumes that the Fund constitutes a single "activity" for purposes of Code Section 469. If the Fund consisted of more than one activity, the passive activity loss limitations would apply separately to each such activity.

The Regulations provide flexibility in grouping a taxpayer's trade or business activities and rental activities for purposes of applying the passive activity rules. In this respect, one or more trade or business activities or rental activities may be treated as a single activity if the activities constitute an appropriate economic unit for the measurement of gain or loss for the purposes of Code Section 469. However, generally rental activities may not be grouped with a trade or business activity. Further, a taxpayer that owns an interest as a limited partner or limited entrepreneur (e.g., a member of an LLC who does not actively participate in the management of the LLC) may not group the following activities with any other activity: (i) holding, producing or distributing motion picture films or video tapes, (ii) farming, (iii) leasing personal property, (iv) exploring for or exploiting oil and gas resources, and (v) exploring for or exploiting geothermal deposits. A partnership must group its activities under the rules of the Regulations and once the partnership groups its activities, the partner may group those activities with each other, with activities conducted directly by the partner, and with activities conducted through other C corporations subject to Code Section 469, S corporations and partnerships, except that a partner may not treat activities grouped together by any 469 entity as separate activities.

Whether or not the Fund's activities are aggregated into a single activity should not affect a Unit holder's ability to offset passive losses from one Fund activity against passive income of another Fund activity. However, any previously suspended passive losses from a particular activity that is part of a single activity will not become deductible against non-passive income upon a disposition of that particular activity alone, but only upon a taxable disposition by the Fund of all of its interest in the single activity, or the Unit holder's disposition of his Units. Further, the Fund's debt investments or equity investments in C corporations may produce interest income or dividend income, respectively, that is classified as portfolio income for purposes of Code Section 469, and the Fund's other equity investments may produce losses classified as passive under Code Section 469, and in this situation a Unit holder's share of passive losses may not be utilizable to offset his share of portfolio income.

Distributions

Distributions (which include any deemed distribution arising from a reduction, by repayment or otherwise, in Fund liabilities) made to a Unit holder generally do not result in any recognition of gain for federal income tax purposes to the extent the amount of cash or debt reduction does not exceed the basis of the Unit holder's Units. A Unit holder's adjusted tax basis in his Units is reduced by the amount of the distribution. Distributions of cash (including reductions in liabilities) by the Fund in excess of a Unit holder's adjusted tax basis in his Units will result in the recognition of gain to the extent of such excess. Such gain is considered gain from the sale or exchange of the Units by

Strictly Confidential and Proprietary

the Unit holder and in certain cases may be treated in part as ordinary income because of the depreciation recapture provisions. (see "Sale or Disposition of Units").

Sale or Disposition of Units

Upon a sale of a Unit, a Unit holder will realize gain or loss in an amount equal to the difference between the amount realized and his adjusted tax basis in the Unit. Under Code Section 751(a), any gain realized by a selling partner is taxed as ordinary income to the extent of the partner's *pro rata* share of "ordinary income assets" of the partnership. The balance of gain, if any, or the loss is treated as a capital gain or loss. In determining the amount received upon the sale or exchange of a Unit, a Unit holder must include, among other things, his allocable share of the outstanding amount of the indebtedness to which the Fund's property is subject. Therefore, it is possible that the gain realized on the sale of a Unit may exceed the cash proceeds of such sale. As a result, in some cases, the income taxes payable with respect to such gain may exceed such cash proceeds.

Certain Deductions to Be Claimed

Organization, Start-Up and Syndication Costs. Under the Code, neither a partnership nor its partners may deduct amounts paid or incurred in the promotion and sale of the interests in the partnership ("syndication" expenses), including those amounts paid as commissions, professional fees, and printing costs. These expenses must be capitalized and may not be amortized. Under the Regulations, the following expenses constitute non-deductible syndication expenses which must be capitalized and not amortized: (i) brokerage fees; (ii) registration fees; (iii) legal fees for securities advice and advice pertaining to the adequacy of tax disclosures in the offering memorandum for securities law purposes; (iv) accounting fees for the preparation of representations to be included in the offering memorandum; and (v) costs of printing the offering memorandum.

However, to the extent a partnership pays or incurs organizational expenses incidental to the creation of the partnership or start-up expenditures with respect to an active trade or business, the partnership generally may elect to capitalize such expenditures and amortize them ratably over a period of not less than 180 months, commencing in the month in which the partnership begins business. Organizational expenses include (i) legal fees for services incidental to the organization of the partnership, such as the negotiation and preparation of a partnership agreement; (ii) accounting fees for services incidental to the organization of the partnership, and (iii) filing fees. On the other hand, organizational expenses do not include (i) expenses incurred in connection with the acquisition of partnership assets or the transfer of assets to the partnership; (ii) syndication expenses; and (iii) certain other expenses. Start-up expenditures include (i) certain expenses related to the investigation of the creation or acquisition of an active trade or business; and (ii) expenses paid or incurred pursuant to the creation of an active trade or business, which expenses would be deductible if they were incurred after the commencement of the particular business operation to which they relate.

The Fund has incurred organizational expenses which it will elect to amortize over 180 months. Additionally, the Fund has incurred or may incur start-up expenditures which the Fund, if it is eligible to do so, intends to amortize over a 180 month period. Any costs incurred by the Fund associated with offering of the Units will be capitalized by the Fund as non-deductible syndication costs.

Other Limitations on Deductions. Other limitations may apply to reduce or eliminate the deductibility by a Unit holder of his share of the Fund's expenses, including fees paid to the management company. For example, to the extent deductions of the Fund are deemed not to be incurred in connection with a business, they will be treated as miscellaneous itemized deductions that, in the case of Unit holders, are deductible only to the extent that, when taken together with other similar deductions, they exceed 2% of the Unit holder's adjusted gross income. Also, miscellaneous itemized deductions are not deductible by a Unit holder in computing the Unit holder's alternative minimum tax.

Certain Tax Consequences to Non-United States Investors

Foreign Individuals Potentially Subject to U.S. Tax on Their Worldwide Income. Individuals who are not citizens of the United States but who are treated as "residents" of the United States for federal income tax purposes are subject to United States federal income tax on their worldwide income, including but not limited to their income from the Fund. For this purpose, an individual who is a lawful permanent resident of the United States (e.g., a holder of a "green card") generally will be treated as a resident. In addition, an individual who is not a lawful permanent resident under the immigration laws may nevertheless be a "resident" for tax purposes based upon a "substantial presence" in the United States as defined under Code Section 7701(b). For example, under that Code Section, an individual may be a "resident" if the individual is physically present in the United States on all or any part of a certain number of days, determined under a formula, within a three-year testing period. An individual present in the United States under certain types of temporary visas (e.g., teachers or students) may be excepted from the "substantial presence" test, but the determination whether an individual is a resident can be a complex determination. Potential investors who are foreign individuals should consult with their own tax advisors to be certain of their tax status under United States law.

Taxation of Non-U.S. Individuals Not Treated as Tax Residents. Potential investors who are neither citizens nor residents (as determined for tax purposes) of the United States ("Non-U.S. Investors") are subject to additional tax rules. Generally, Non-U.S. Investors are taxable on certain United States source passive investment income ("FDAP"), including dividends, interest and rents, at a flat rate of 30% on the gross amount of such income, without reduction for any expenses or other tax deductions, and that tax is satisfied by withholding of tax on payments of such amounts to the Non-U.S. Investors. In the case of a partnership, the partnership generally will be required to withhold based on the share of its FDAP allocable to its Non-U.S. Investors. The 30% tax on the gross amount of FDAP may be reduced or eliminated if the Non-U.S. Investor

is a resident of a country with which the United States has a bilateral income tax treaty, provide that the Non-U.S. Investor submits timely certification of his entitlement to treaty relief. Certain other exceptions apply which may reduce or eliminate the tax on certain types of FDAP, including interest income. Non-U.S. Investors generally are not subject to tax on capital gains unless either (1) the gains are attributable to a United States trade or business or (2) the Non-U.S. Investor is an individual who is present in the United States for more than 183 days during the taxable year in which the gains are realized.

The 30% taxation of FDAP will not apply to any income that is effectively connected with the active conduct of a trade or business within the United States. The net income from such a trade or business within the United States realized by a Non-U.S. Investor will be subject to tax at the regular graduated income tax rates applicable to resident individuals. Such income currently will be subject to income tax withholding, generally at a rate of 35%. A Non-U.S. Investor who realizes any such income will be required to file a United States federal income tax return with respect to the taxable year in which the income is realized.

A Non-U.S. Investor in the Fund who is allocated a share of passive income (including capital gain) or active trade or business income realized by the Fund will be subject to tax under the above rules as if such Non-U.S. Investor had realized such income directly. Any withholding of federal income taxes by the Fund attributable to a Non-U.S. Investor will be treated as a distribution to that particular Unit holder.

THE FOREGOING IS NOT A COMPLETE DISCUSSION OF ALL OF THE FEDERAL INCOME TAX CONSEQUENCES TO A NON-U.S. INVESTOR; THERE ARE STATE AND LOCAL TAX AND ESTATE TAX CONSEQUENCES TO BE CONSIDERED. ALSO, FOREIGN TAXES MAY BE IMPOSED ON A NON-U.S. INVESTOR'S INCOME FROM THE FUND. INVESTORS ARE STRONGLY ADVISED TO CONSULT WITH THEIR TAX ADVISORS WITH RESPECT TO THE TAX CONSEQUENCES OF AN INVESTMENT IN THE FUND.

Compliance Matters

Tax Returns/Audits. The Fund will furnish annually (and in certain circumstances, periodically) to each of the Unit holders sufficient information from the Fund's tax return for the Unit holders to prepare their own federal income tax returns.

The tax treatment of items of partnership income, loss, deduction, and credit will be determined at the partnership level. In addition, all partners are required, on their individual federal income tax returns, to treat partnership items in a manner that is consistent with the treatment of such items on the partnership's return.

The tax matters partner for the Fund will be the management company. The tax matters partner is required to, among other things, keep the other partners informed of all administrative and judicial proceedings and represent the Fund in such proceedings. The

tax matters partner is authorized to obtain judicial review of any proposed readjustment of partnership items. Although every partner with an interest in the outcome is allowed to participate in an action filed by the tax matters partner, the outcome of that proceeding will bind all partners. If the tax matters partner fails to seek judicial review of a proposed adjustment of partnership items, other partners may seek such review, provided that there can be only one judicial proceeding with respect to a partnership. The foregoing procedures may adversely affect a Unit holder's ability to deal with adjustments to his income tax return resulting from adjustments made with respect to the Fund.

If any of the tax returns of the Fund are audited, it is possible that substantial legal and accounting fees will have to be paid to substantiate the position of the Fund, and such fees would reduce the cash otherwise available to meet Fund obligations or for distribution to the Unit holders. Such an audit may result in adjustments to each Unit holder's income tax return. An audit of the Fund's tax returns may also result in an audit of non-partnership items on each Unit holder's income tax returns, which in turn could result in adjustments to such items. The costs incurred by a Unit holder in connection with an IRS audit of his income tax return will be borne solely by that Unit holder.

State and Local Taxes

In addition to federal income taxes, the Fund and the Unit holders may be subject to other taxes imposed by various jurisdictions, such as state and local income taxes. Although a detailed analysis of these various taxes is not presented here, investors should consider the potential state and local tax consequences of an investment in the Fund. For example, a Unit holder's distributive share of all or a portion of Fund income, gains, losses and deductions, profits and losses, may be required to be included in determining his income subject to tax under the laws of the state or locality in which he is a resident, as well as jurisdictions in which the Fund does business.

For example, with respect to Unit holders who are not residents of the Commonwealth of Virginia, if the Fund has Virginia source income allocated to such Unit holders, the Fund will be required to file composite returns and make composite payments of tax on behalf of all of its Unit holders who are not residents of Virginia. The current rate of the Virginia composite tax is [_____]% and any composite payment on behalf of a non-resident Unit holder will be treated by the Fund as a distribution to the non-resident Unit holder.

The Commonwealth of Virginia also requires a partnership to withhold income tax on a non-resident partner's allocable share of Virginia source income. The Fund will withhold at the required withholding rate (currently [_____]%) of Virginia source income allocable to Unit holders who are not residents of Virginia. Any such withholding will be treated by the Fund as a distribution to the non-resident Unit holder. The withholding by a partnership does not relieve the non-resident partner of his obligation to file a Virginia income tax return. A partnership is allowed to file a composite return on behalf of non-resident partners who have no activity in Virginia other than that from the partnership. If a composite filing is allowable with respect to a

DRAFT

non-resident partner and the composite return is properly filed and all taxes, including applicable interest and penalty is paid, the individual non-resident partner is relieved of his separate individual filing requirement. If the Fund elects to file a composite return on behalf of any non-resident Unit holders, the composite tax payment attributable to the non-resident will be treated as a distribution by the Fund to that non-resident Unit holder.

The Fund intends to supply the Unit holders with information regarding their income, if any, derived from various jurisdictions in which the Fund does business. Unit holders are urged to consult with their own tax advisors regarding state and local tax laws.

U.S. Federal Estate and Gift Taxation

U.S. residents generally are subject to federal estate taxes on their taxable estates at death which includes the value at the time of a decedent's death of all of his property, real or personal, tangible or intangible, wherever situated. Additionally, U.S. residents are subject to gift taxes on the transfer of any property by gift. U.S. estate taxes can also apply to a Non-U.S. Investor to tax that part of his gross estate which at the time of his death is situated in the United States. For example, shares of stock in a domestic U.S. corporation owned by a non-resident alien are treated as property situated in the United States for purposes of this provision. Further, the IRS has ruled that a partner's interest in a partnership is situated where the partnership's business is carried on for purposes of applying the U.S.-United Kingdom Estate Tax Convention. Thus, a Unit in the Fund held by a Non-U.S. Investor could possibly be subject to U.S. estate tax on the death of the Non-U.S. Investor.

Additionally, state and local taxing jurisdictions may also impose state, inheritance and/or gift taxes on their residents or on property deemed situated within their respective jurisdictions.

4. Using the IMPLAN Model to Calculate National Multipliers

The IMPLAN model is a regional input/model developed and maintained by the Minnesota IMPLAN group, headquartered in Minneapolis. The basic model was originally developed by the USDA Forest Service in cooperation with the Federal Emergency Management Agency and the USDI Bureau of Land Management.

The IMPLAN model has certain similarities with the RIMS (Regional Input/Output Modeling system) model developed by the Department of Commerce, but is generally thought to contain several superior features besides its greater ease and flexibility of use. These improvements can be summarized as follows:

1. The Commerce Department is not permitted to publish data in any category where there are less than three organizations in a given economic area. IMPLAN has developed an algorithm to fill in the missing numbers.

2. IMPLAN has introduced improved methods of accounting for flows of goods and services among counties.

3. IMPLAN permits aggregation of any subset of industries for calculation and tabular purposes. This is useful when results are desired for, say, 1-digit industries instead of the 509 industries actually found in the input/output table.

4. As seen in the tables throughout this text, IMPLAN estimates three separate effects, labeled "direct", "indirect" and "induced". The direct effects are those entered by the user. The other two columns represent the multiplier effects, but they are usually combined in other input/output models. Briefly, the indirect effect represents purchases made by businesses when their sales rise. For example, a restaurant might order more food produced or sold in the region, or an automobile plant might order more steel. The induced effect represents the additional household spending because income has risen. For example, casino workers would spend their paychecks on various goods and services, some of which are produced in the region. In general, then, the larger the region under consideration, the larger the multipliers would be.

The following material, taken from the IMPLAN manual, describes the input/output process in more detail.

Input/output analysis is a means of examining relationships within an economy, both between businesses and between businesses and final consumers. It captures all of the monetary market transactions for consumption in a given time period. The resulting mathematical formulae allow examination of

the effects of a change in one or several economic activities on an entire economy.

A descriptive model includes information about local economic interactions known as regional economic accounts. These tables describe a local economy in terms of the flow of dollars from purchasers to producers within the region. The initial IMPLAN data details all purchases, including imported goods and services. When regional economic accounts are created, imports to the region are removed from the initial data, allowing examination of local inter-industry transactions and final purchases.

The regional economic accounts are used to construct local level multipliers. Multipliers describe the response of the economy to a stimulus (a change in demand or production). The multipliers represent the Predictive Model.

Purchases for final use (final demand) drive an input/output model. Industries producing goods and services for consumption purchase goods and services from other producers. These other producers, in turn, purchase goods and services. These indirect purchases (or indirect effects) continue until leakages from the region (imports, wages, profits, etc.) stop the cycle.

The indirect effects and the effects of increased household spending (induced effects) can be mathematically derived as sets of multipliers. The derivation is called the Leontief inverse. The resulting sets of multipliers describe the change of output for each industry caused by a one dollar change in final demand for any given industry.

The input/output analysis framework is similar to a financial accounting framework that tracks purchases of and expenditures on goods and services in dollars. Input/output accounting traces the flow of dollars between businesses and between businesses and final consumers. An input/output accounting framework can be illustrated using classic financial accounting T-accounts, which include receipts (income) and expenditures (expenses) on each side of a "T", as shown below.

Final Consumption (or final demand) drives input/output models. Industries respond to meet demand directly or indirectly, by supplying goods and services to industries responding directly. Each industry that produces goods and services generates demands for other goods and services, and so on. Multipliers describe these iterations.

There are three different multipliers developed for predictive modeling: Type I, Type II, and Type SAM. We start with the transactions table and derive a coefficient by dividing each industry column by the column total. This coefficient matrix is also known as the ***A Matrix***.

Appendix B. Resume of Dr. Michael K. Evans

CURRENT AND PREVIOUS POSITIONS

• Chairman, *Evans, Carroll & Associates, Inc.*, 1980-present (previously Evans Economics)

Economic consulting firm specializing in EB-5 immigration analysis, economic impact studies of development projects and new construction, models of state and local tax receipts, impact of current and proposed government legislation, and construction of econometric models for individual industries and companies.

• Chief Economist, *American Economics Group*, 2000-present.

Built a comprehensive state modeling system that provides economic analysis for a variety of consulting projects (see below).

• Clinical Professor of Economics, Department of Managerial Economics and Decision Sciences (MEDS), Kellogg Graduate School of Management, Northwestern University, 1996-99.

Taught courses in macroeconomics and business forecasting. Wrote textbooks for both courses.

• Winner of Blue Chip Economic Indicator Award for most accurate macroeconomic forecasts during the past four years, November 1999

• Founder and President, *Chase Econometric Associates*, 1970-1980

• Assistant and Associate Professor of Economics, Wharton School, University of Pennsylvania, 1964-69. Co-developer of the original Wharton Model.

• Visiting Professor, Radford University, (Radford, VA), 1987

Chairman of Institute for International Economic Competitiveness

• Visiting Lecturer, Hebrew University (Jerusalem), 1966-67

Built econometric model of the Israeli economy

Ph. D. in Economics, Brown University. Dissertation, "A Postwar Quarterly Model of the United States Economy, 1948-1962". A. B. in Mathematical Economics, Brown University

PREVIOUS ACTIVITIES AND EDUCATION

- Contributing Editor, *Industry Week*

Wrote a column in each issue on economic and financial trends as they impact the mfg sector.

- Editor, *The Evans Report*

Weekly newsletter discussing economic trends and financial markets. Pioneered the concept of the Monthly Tracking Model to incorporate recent economic releases into the overall economic forecast, including methods to predict these economic data.

- Consultant, *National Printing Equipment and Supply Association*

Prepares quarterly forecasts of shipments of printing equipment and graphic arts supplies by product line, based on an econometric model constructed for NPES. Also prepares analysis and forecasts of exports and imports by principal product line.

- Consultant, *APICS -- The Educational Society for Resource Management,*

In 1993, designed and developed the *APICS Business Outlook Index*, which uses survey data collected by the Evans Group to measure current production, production plans, shipments, employment, new orders, unfilled orders, inventory stocks, and the comparison of the actual to desired inventory/sales ratio to predict short-term changes in mfg sector activity. The results of this survey appeared every month in *APICS: The Performance Advantage*

- Consultant, *American Hardware Mfg Association*

Wrote a separate weekly edition of the Evans Report analyzing recent trends in the hardware and housing industries, including forecasts of the hardware industry based on an econometric model developed for AHMA.

- Board of Economists, *Los Angeles Times*

Wrote column every 6 weeks (5 other economists on the Board)

- Columnist, *United Press International*

  Wrote twice-weekly column, "Dollars and Trends"

- Consultant, Senate Finance Committee,

  Built the first large-scale supply-side model of the U. S. economy

- Consultant, Environmental Protection Agency and Council on Environmental Quality

  Estimated inflationary impact of government regulations

- Consultant, National Aeronautics and Space Administration

  Estimate impact of R&D spending on productivity growth

- Consultant, U. S. Treasury

  Estimated impact of investment tax credit and accelerated depreciation on capital spending by industry

- Consultant, U. S. Department of Agriculture

  Built large-scale econometric model of agricultural sector of U. S. economy

- Consultant, Organization of Economic Cooperation and Development

  Built econometric model of the French economy

SAMPLE OF RECENT CONSULTING PROJECTS

A. Economic Impact of EB-5 Immigrant Investor Programs and New Markets Tax Credits

- Calculated the number of jobs created for a film production company in New York City.

- Calculated economic impact of small-scale rooftop solar panels in various counties in California.

- Calculated economic impact of 7 different types of proposed businesses for a proposed regional center in the Bay Area of California.

- Determined the economic impact of a new biological research park, office building, and logistics center in Wooster, Ohio.

- Calculated the economic effect of a mixed-use urban renewal project in Cleveland, Ohio.

- Calculated economic impact of 14 different types of proposed businesses for a proposed EB-5 regional center that would include the entire state of Florida.

- Calculated economic impact of dairy farm and cheese processing plant in Northern California.

- Determined economic impact of a shipyard, food processing plant, and semiconductor plant for a proposed regional center in Louisiana and Mississippi.

- Calculated the economic impact of a new gaming casino in Natchez, Mississippi.

- Calculated the economic impact of a retail shopping center in suburban Los Angeles County.

- Prepared an economic impact analysis for the "timber to homes" project for a proposed regional center in Colorado.

- Calculated the economic impact for a proposed regional center in Baltimore, Maryland that would include the rebuilding of depressed areas in East Baltimore and along the riverfront.

- Prepared the economic analysis for a proposed EB-5 regional center for the entire state of Florida that included impact calculations for 14 different types of industries.

- Prepared the economic analysis for a proposed EB-5 regional center in the San Francisco Bay area that included calculations for 10 different types of industries.

- Prepared economic impact calculations for proposed EB-5 regional centers in New York City and Northeastern New Jersey.

- Calculated the economic impact of a rehabilitated office building in Albuquerque, New Mexico, including the increase in high quality jobs.

- Calculated the economic impact of a rehabilitated skilled nursing center in East Los Angeles, California, including the impact on nearby census tracts.

- Calculated the economic impact of development of warehouse and light industrial mfg space in Las Vegas, Nevada.

- Calculated the economic impact of rehabilitation and expansion of a vacation and health spa in Sharon Springs, New York

- Calculated economic impact of revitalizing an old resort hotel and adding new facilities for Lake Geneva, WI.

- Calculated the employment and tax effects for a portfolio of projects undertaken under the New Market capital program.

- Calculated generic employment changes for proposed EB-5 project for an Inland Port in Palm Beach County, FL

- Calculated the economic impact of construction of El Monte Village in El Monte, CA.

- Built an input/output model of Guam to be used to calculate economic impact of EB-5 projects. Used this model to estimate impact of various proposed projects.

- Calculated the economic impact of moving the Social Security Administration building in Birmingham, AL, and revitalizing the surrounding neighborhood.

- Calculated the economic impact of rehabbing and expanding the Everett Mall in Everett, WA.

- Determined the economic impact of building a new medical center in Charleston, SC

- Calculated economic impact of expanding Sugarbush resort in Vermont. Study included expansion of existing facilities and addition of new facilities.

• Calculated economic impact for new market tax credit program in Portsmouth, N.H. Study included both overall economic impact, and the increase in employment and income and the decrease in the unemployment rate and incidence of poverty in individual census tracts.

• Calculated the economic benefits of EB-5 programs for foreign investors for a mixed-use construction project, including a hotel, retail stores, apartments, and a sports stadium in the Washington, D. C. metropolitan area

• Calculated the economic benefits of EB-5 programs for foreign investors for a mixed-used retail shopping center in the New York City metropolitan area.

• Calculated the economic benefits of EB-5 programs for foreign investors for proposed shopping centers in five separate counties in Southern California, including differential impacts of building the shopping centers in different counties.

B. Projects for State and Local Governments

• Constructed an econometric model for the State of New York and determined the change in employment, labor income, and tax revenues for 43 different tax changes proposed by the Governor's office.

• Constructed a detailed econometric model for the State of Pennsylvania to determine the economic impact of the complete panoply of state taxes levied; the model contains over 1,000 equations. In cooperation with American Economics Group, the model was developed to simulate the effect of changes in any state tax rate on households and businesses by income deciles, household status, age of individuals, size of households, and many other demographic variables. The change in business taxes can also be simulated for detailed industry classifications.

• Determined whether the Washington, D.C. water and sewer authority should accept a high bid for a new waste disposal system. Decision to reject has saved the authority over $200 million, as construction prices turned down sharply as predicted.

• Built an econometric model to determine the "tax gap" caused by Internet sales for the state of Minnesota.

• Determined appropriate levels of shelter grants individual counties in New York State, and for utility allowances in New York City. Reviewed and prepared testimony in ongoing court cases in these areas.

• Calculated the economic impact of the revitalization of downtown Milwaukee, Wisconsin.

C. Economic Impact of Casino Gaming

• Built an econometric model to predict the growth of the gaming industry over the next decade, and the economic impact of that industry on employment and tax revenues at the Federal and state levels.

• Estimated the economic impact of Indian casino gaming nationally and for the State of Wisconsin.

• Determined the economic impact of the Oneida Indian gaming casino on the Green Bay metropolitan area.

• Estimated the negative economic impact on the Milwaukee area if a new Indian gaming casino were to be built in Kenosha, Wisconsin.

D. Economic Impact of Smoking Bans and Higher Taxes

• Testified on economic impact of smoking bans in Canada; certified as an expert witness by the Court.

• Examined the impact of smoking bans on restaurant sales in several different locations in the U.S. to determine how much sales changed when these bans were imposed, and the differential effects depending on whether these bans were partial or total.

• Determined the cross-border effects on retail sales from differential rates in cigarette, gasoline, and alcohol excise taxes

• Determined the economic impact of higher cigarette taxes on minority group employment.

• Estimated the economic impact and loss of Federal and state tax revenues when higher cigarette prices lead to increased smuggling.

E. Consulting Projects for Travel and Tourism

• Built an econometric model to predict tourism trips and revenues for the major regions of the U.S. economy.

• Constructed econometric models to predict tourism in Las Vegas and Orlando.

• Using the IMPLAN model, predicted economic impact of tourism and travel expenditures for all counties in Pennsylvania.

F. Other Private Sector Consulting Projects

• Calculated the economic impact of proposed EPA bans on fluoropolymer production.

• Estimated the size and economic importance of the fluoropolymer industry, and calculated economic impact of shutting down domestic production.

• Built an econometric model to examine how U.S. tax and regulatory policies help determine whether the gold mining industry would invest in the U.S. or other countries. Testified before Congress to help defeat legislation inimical to the mining industry.

• Built an econometric model to predict consumer bankruptcies, based on recent growth in consumer credit outstanding, the overall economic environment, and recent changes in credit regulations

• Estimated the economic impact of the ethanol subsidy on the U.S. economy and Farm Belt States, including the impact on the balance of payments, employment, and tax receipts. Testified before Congress to help pass legislation to extent subsidies to the ethanol industry.

• Built an econometric model to determine the impact of updating and improving the system of locks on the Upper Mississippi River on corn prices and exports, farm income, and the overall economy.

COMMONWEALTH OF VIRGINIA
STATE CORPORATION COMMISSION

ARTICLES OF INCORPORATION
OF A VIRGINIA STOCK CORPORATION

The undersigned, pursuant to Chapter 9 of Title 13.1 of the Code of Virginia, state(s) as follows:

Article 1.
The name of the corporation is:

WM GreenTech Automotive Corp.

Article 2.
The number (and classes, if any) of shares the corporation is authorized to issue is (are):

Number of shares authorized	Class
5,000,000,000	Common Shares

Article 3.
A. The name of the corporation's initial registered agent is:

Charles Xiaolin Wang

B. An individual who is a resident of Virginia and an initial director of the corporation.

1. a. The corporation's initial registered office address, which is the business office of the initial registered agent, is:

1356 Beverly Road, Suite 200
McLean, VA 22101

b. The registered office is physically located in the **county of Fairfax**

2. The initial directors are:

Name	Address
Terry McAuliffe	
Charles Xiaolin Wang	
Gary Yi Tang

Regional Center

Business Expansion Plan

Date: December 7, 2009

A NOTE ABOUT CONFIDENTIALITY

The contents of this business plan are highly proprietary, and should not be shared with any person other than officials of the U.S. Department of Homeland Security and USCIS who require this plan in order to analyze the application of Gulf Coast Funds Management LLC for an EB-5 regional center to expand coverage in the Commonwealth of Virginia.

(b)(4)

Gulf Coast Funds Management Regional Center Business Expansion Plan

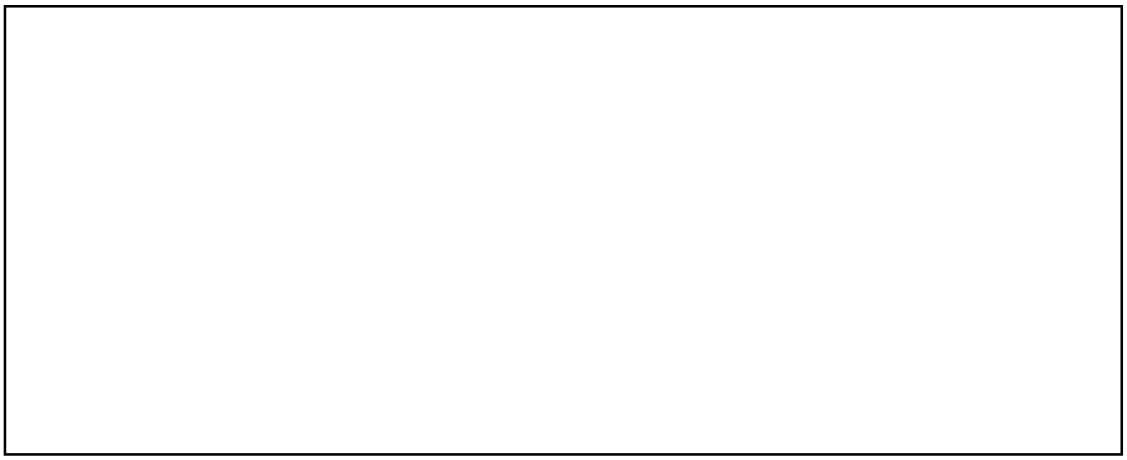
1.0 Executive Summary

(b)(4)

[redacted]

2.0 Company Summary

[redacted]



3.0 The EB-5 Immigrant Investor Program

The management company will manage EB-5 investment funds. The EB-5 immigrant investor program is described as follows by the United States Department of Homeland Security:

Immigration through Investment Overview

Under section 203(b)(5) of the Immigration and Nationality Act (INA), 8 U.S.C. 81153(6)(5), 10,000 immigrant visas per year are available to qualified individuals seeking permanent resident status on the basis of their engagement in a new commercial enterprise.

Of the 10,000 investor visas (i.e., EB-5 visas) available annually, 3,000 are set aside for those who apply under a pilot program involving a USCIS-designated Regional Center. A regional center is an entity, organization or agency that has been approved as such by the USCIS; focuses on a specific geographic area within the United States; and seeks to promote economic growth through increased export sales, improved regional productivity, creation of new jobs, and increased domestic capital investment.

"Alien investors" must demonstrate that a "qualified investment" (see below) is being made in a new commercial enterprise or approved Regional Center; and, show, using reasonable methodologies, that 10 or more jobs are actually created either directly or indirectly from the new commercial enterprise through revenues generated from increased exports, improved regional productivity, job creation, or increased domestic capital investment resulting from the pilot program.

Eligibility

Permanent resident status based on EB-5 eligibility is available to investors, either alone or coming with their spouses and unmarried children under 21 years of age. Eligible aliens are those who have invested – or are actively in

the process of investing – the required amount of capital into a new commercial enterprise that they have established. They must further demonstrate that this investment will benefit the U.S. economy and create the requisite number of full-time jobs within the U.S.

In general, "eligible individuals" include those:

1. Who establish a new commercial enterprise by: creating an original business; or purchasing an existing business and simultaneously or subsequently restructuring / reorganizing the business such that a new commercial enterprise results; or expanding an existing business by 140 percent of the pre-investment number of jobs or net worth, or retaining all existing jobs in a troubled business that has lost 20 percent of its net worth over the past 12 to 24 months; and

2. Who have invested – or who are actively in the process of investing – in a new commercial enterprise: at least $1,000,000; or at least $500,000 where the investment is being made in a "targeted employment area," which is an area that has experiences unemployment of at least 150 percent of the national average rate or a rural area as designated by OMB; and

3. Whose engagement in a new commercial enterprise will benefit the United States economy and: create full-time employment for not fewer than 10 qualified individuals; or maintain the number of existing employees at no less than the pre-investment level for a period of at least two years, where the capital investment is being made in a "troubled business," which is a business that has been in existences for at least two year and that has lost 20 percent of its net worth over the past 12 to 24 months.

RISK FACTORS

(b)(4)

(b)(4)

Immigration risks

The investor himself and herself must meet the requirements under the EB-5 program. Each purchaser of a Unit must understand that the Fund, the management company and each of their affiliates make no representation or warranty of any kind concerning whether an investment in the Fund will meet the requirements of the EB-5 program or other U.S. immigration requirements. Each investor in a Unit must further understand that there can be no assurance that an investment in the Unit will result in his or her family receiving an EB-5 visa, conditional resident status or permanent resident status. Please carefully consider the following immigration risks, and discuss these and other immigration risks with your personal immigration lawyer.

As a Unit holder, you will be subjected to certain general immigration risks faced by all immigrants to the United States.

The process of obtaining conditional resident status and permanent resident status involves many factors and circumstances that are not within the control of the Fund. These include the investor's past history and source of funds, immigration visa backlogs, potential changes in immigration laws and regulations (including laws and regulations specific to the EB-5 immigrant investor program) and quotas established by the United States government limiting the number of visas available to qualified individuals seeking conditional resident status under the EB-5 program. Although the Fund has been structured with the objective of providing Unit holders with eligibility for conditional and permanent resident status under the EB-5 regional center provisions of the U.S. immigration laws, no assurance can be given that each Unit holder will obtain approval of his or her particular immigrant application. Purchase of a Unit does not guarantee conditional or permanent residency in the United States. Furthermore, no assurances or advice can be given that conditional resident status will be converted to permanent resident status.

An investment in a Unit is only a part of the requirement for meeting EB-5 residency status. In addition, the USCIS will require that you pass a background check.

Each immigrant investor in the United States is subjected to a thorough background check. An EB-5 immigrant investor's background (or that of an immediate family member) may not meet the USCIS criteria for temporary or permanent residency in the United States. For example, among other criteria, the following may be grounds for denial of immigration benefits for the immigrant, and/or other members of the immigrant's family: having a communicable disease (e.g., AIDS) or other dangerous contagious disease; having been at any time involved with, trafficking in, or taking, illegal drugs; having been convicted of certain crimes; having committed a fraud or misrepresentation to a U.S. Government official; or having violated U.S. immigration law in the past.

As a result of participation in the EB-5 program and as a result of your investment in the Fund, you must pay income taxes in the United States on your world-wide income. You should consult your personal tax advisor about this obligation.

As an EB-5 participant, you will have to pay taxes in the United States on your world-wide income. As a member of the Fund, which is a limited liability company, your proportionate share of the Fund's income will be "passed-through" to you for U.S. Federal income tax purposes. You will also be required to include in income your proportionate share of the taxable income of the Fund for the purposes of any state of which you are a resident. Please consult your personal tax advisor about the tax consequences of an investment in the Fund. Further information about these matters is included in this private placement memorandum under the heading "Certain U.S. Federal Income Tax Considerations," beginning on page 32.

(b)(4)

The EB-5 regional center program is a U.S. government program that is highly regulated and that requires frequent interaction between the Fund and government officials.

The EB-5 regional center program was created by Congress, which has accorded broad regulatory powers to the Department of Homeland Security and in particular to the United States Citizenship and Immigration Service (USCIS). Currently, all EB-5 related filings are reviewed by USCIS adjudicators in the USCIS California service center. While the Fund will strive to coordinate with USCIS to achieve our investors' immigration goal, there can be no assurance that USCIS adjudicators will take a consistent position on issues arising under the program, and there can be no assurance that USCIS regulations will not change in the future. Since the laws, regulations and bureaucratic interpretations applicable to the Fund's investments are subject to change at any time, there can be no assurance that the Fund will not be required to substantially change its investment policies in the future. The EB-5 program could be discontinued or altered by Congress at any time.

It is a requirement of the EB-5 program that an immigrant investor's source of funds be proper, under U.S. immigration guidelines.

EB-5 immigrant investors must demonstrate to the USCIS that the funds they invest in the Units were obtained through lawful means. Each EB-5 immigrant investor must document, to the satisfaction of the USCIS and the U.S. State Department, that the source of funds is acceptable. The Fund, and the EB-5 immigrant investor's immigration attorney, may make a preliminary assessment, but the ultimate decision will be made solely by USCIS and the U.S. State Department. Each EB-5 immigrant investor must agree to provide information and documents to the Fund, and to allow the Fund to make further investigation, concerning the EB-5 immigrant investor's source of funds and the personal and business background of the EB-5 immigrant investor and accompanying family members.

Achieving your immigration goal of conditional and permanent resident status will require you to maintain your primary residence in the United States.

EB-5 immigrant investors who obtain conditional resident status or permanent resident status must intend to make the United States their primary residence. Conditional residents or permanent residents who maintain their primary residence outside the United States risk revocation of their U.S. residence status. Each prospective EB-5 immigrant investor should consult a competent immigration attorney to review the likelihood that the investor's immigration objectives will be achieved.

USE OF PROCEEDS

(b)(4)

SAMPLE

MANAGEMENT OF GTA

The following is a description of the business backgrounds of the executive officers of GTA:

Terry McAuliffe, Chairman

Mr. McAuliffe is the Chairman of GTA. He has been a long time investor and promoter of affordable green energy projects. It is at his direction that GTA has set its goal to truly meet a higher standard among our peers stating that "no green technology is green unless it is affordable to average consumers."

Before joining GTA, Mr. McAuliffe has been a longtime business leader and successful entrepreneur for nearly four decades. He has successfully started over two dozen companies in the fields of banking, real estate, securities, marketing, renewable energy and insurance. At the age of 14, Mr. McAuliffe started his first business, McAuliffe Driveway Maintenance, where he sealed residential driveways and commercial parking lots in his local community of Syracuse, New York. In January 1988, when he was only 30 years old, Mr. McAuliffe became the youngest chairman of a federally chartered bank in the history of the United States.

Mr. McAuliffe also served as Chairman of American Heritage Homes, one of Florida's largest homebuilding companies, as well as President of American Capitol Management Company, a major developer of real estate projects. He has been an active investor in the alternative energy field for over a decade.

In addition to his successful business career, he is a longtime political leader for the Democratic Party in the United States. He started his political career in the 1980 Presidential reelection campaign of President Jimmy Carter, and at the age of 22 became the national finance director for that campaign. He then served as National Finance Chairman of the Gephardt for President committee, National Finance Chairman and the National Co-Chairman of the Clinton-Gore re-election committee. In 1993, he was named by President Clinton as Ambassador and Commissioner General of the Korean International Exposition. He was Chairman of the 53rd Presidential Inaugural Committee and Chairman of the White House Millennium Celebration. In 2000, he chaired the Democratic National Convention in Los Angeles. He was elected Chairman of the Democratic National Committee from 2001 to 2005. He is widely credited with rebuilding, reenergizing and revitalizing the Democratic Party. As Chairman of the DNC, he shattered all Party records by raising over $535 million. He also served as Chairman of the 2008 Hillary Clinton Presidential campaign. In 2009, he unsuccessfully ran for Governor of the State of Virginia.

Chairman McAuliffe received a Juris Doctor degree from Georgetown University School of Law and a bachelors degree from The Catholic University of America in Washington, D.C.

THE EB-5 PROGRAM

Overview

In 1990, the U. S. Congress created the employment based 5th preference (EB-5) immigrant investor visa program. The EB-5 program offers 10,000 immigrant visas a year to qualified investors who wish to obtain residence in the United States by investing in businesses that will benefit the economy and create jobs. The EB-5 Immigrant Investor Regional Center Pilot Program ("The Pilot Program") was created by Congress in 1992 and sets aside 3,000 of the 10,000 EB-5 visas each year for people who invest in designated "regional centers."

Once a qualifying investment has been made in a regional center, an investor files a Form I-526 Immigrant Petition by Alien Entrepreneur, ("Form I-526") with the USCIS. After the USCIS approves I-526 petition, an investor files an adjustment of status application if he or she is already in the U.S. in valid non-immigrant status or ii) applies for an interview and entry visa at a U.S. embassy or consulate abroad ("consular processing"). When an adjustment of status application is approved, a conditional residence status of two years will be given to the investor. If the investor pursues consular processing, upon approval the investor and his or her family will be issued an EB-5 entry visa to the U.S. Once they enter the U.S., the two-year conditional residence status starts.

At the end of the two-year conditional resident period the investor must show that his or her investment has been sustained and the projects invested in by the regional center have created at least ten jobs for each investor. Assuming the investor provides that evidence, the USCIS will remove the conditional residence status, and the investor will receive his or her permanent residency status.

The Immigration Process

The Fund's primary role in the immigration process is to sell interests in the Fund to immigrant investors (which allow the investors to file Form I-526) and invest the investors' capital in a manner that is consistent with the EB-5 program and leads to the creation of at least ten jobs for each Unit holder in the Fund. If GTA's proposed business plan succeeds, our independent economist's report indicates that GTA will create enough jobs to meet the EB-5 program requirements for every investor in the Fund. The rest of the immigration process will be led by the immigrant investor and his or her independent immigration counsel. The management company will maintain a current record of jobs created by the Fund's investment activities. The management company will assist each Unit holder by providing information about job creation to the USCIS in the manner required by the EB-5 program. Upon the initial conditional residency filing, the Fund will certify to the USCIS with respect to the projected number of jobs that will be created. Two years after an immigrant investor is granted conditional resident status, the investor must file with the USCIS Form I-829, Petition by Entrepreneur to Remove Conditions ("Form I-829") to convert his or her status to permanent residency. At that

DRAFT

time, the Fund will allocate to each Unit holder ten jobs from those jobs created and maintained by GTA.

Frequently Asked Questions

The following are some frequently asked questions about the EB-5 program, along with answers to the questions:

How much do I need to invest to receive conditional and ultimately permanent residency status for myself and my family members?
If you invest in a regional center, like ours, you need to invest $500,000 if the investment is made in a high unemployment or rural area. There are also other fees such as legal fees for your immigration and tax counsel and application fees paid to USCIS.

What is the region covered by the Gulf Coast Funds Management regional center?
Our regional center covers the entire Commonwealth of Virginia.

Do I have to live in Virginia to participate in this program?
No. You do not have to live in Virginia. You do not even have to ever visit the region.

(b)(4)

What do I have to do to get my visa application approved?
Normally, you will get an American immigration lawyer to help you in the visa application process. If you do not have an immigration lawyer, the Placement Agent suggests that you use David Lu, Esq., an immigration lawyer with whom we work with on a regular basis. The lawyer will help you file a Form I-526. With your Form I-526, you will have to submit proof that the source of your $500,000 investment is lawful.

Once the USCIS approves your Form I-526 you will need to adjust your status if you are already living in the U.S. in non-immigrant status or you will have to schedule an interview at a U.S. embassy or consulate abroad. In either case, you will have to submit the same type of documentation that other visa applicants to the United States are required to submit. Here is a general description, from the U.S. government's web site, of certain requirements for receiving a visa:

> **VISA INELIGIBILITY / WAIVER**
> The immigration laws of the United States, in order to protect the health, welfare, and security of the U.S., prohibit the issuance of a visa to certain applicants. Examples of applicants who must be refused visas are those who: have a communicable disease, or have a dangerous physical or mental disorder; have committed serious criminal acts; are terrorists, subversives, members of a totalitarian party, or former Nazi war criminals; have used illegal means to enter the U.S.; or are ineligible for citizenship. Some former exchange visitors must live abroad for two years. Physicians who intend to practice medicine must pass

a qualifying exam before receiving immigrant visas. If found to be ineligible, the consular officer will advise the applicant of any waivers.

OTHER IMPORTANT INFORMATION

Documents for Visa Application
All applicants must submit certain personal documents such as passports, birth certificates, police certificates, and other civil documents, as well as evidence that they will not become public charges in the United States. The consular officer will inform visa applicants of the documents needed as their applications are processed.

Medical Examinations
Before the issuance of an immigrant visa, every applicant, regardless of age, must undergo a medical examination. The examination will be conducted by a physician designated by the consular officer. Examination costs must be borne by the applicant, in addition to the visa fees.

Visa Fees
The cost of each immigrant visa application may vary for additional visa fees apply. For up to date immigration visa fee costs, please consult your immigration attorney or please visit the USCIS fee schedule web page.

Source: www.uscis.gov

(b)(4)

When will my visa become permanent?
Two years after you receive your conditional resident status, you must apply for permanent residency. At that time, we will supply documents for your Form I-829 petition to show that your money has been invested in the region and that the Fund's investment has created at least ten jobs. Once your application is approved, you will

become a permanent resident of the United States, and may soon apply for full citizenship if you desire.

CERTAIN U.S. FEDERAL INCOME TAX CONSIDERATIONS

The following discussion about certain U.S. federal income tax and other tax considerations that you should weigh prior to investing in a Unit is merely a presentation of certain tax issues that generally apply to all investors in EB-5 funds. You should not consider this discussion to be tax advice, applicable to your particular situation or a full discussion of all material United States, state, local and foreign tax consequences of an investment in the Fund or your status as U.S. tax resident or non-resident and you should consult with your personal tax advisor about these, and all other issues relevant to your personal decision to invest in a Unit. Neither the Fund nor the management company is qualified to provide the tax advice you will need. You cannot use this summary for the purpose of avoiding United States federal tax penalties.

The following discussion is based upon the Internal Revenue Code of 1986 (the "Code"), the applicable Treasury Regulations promulgated or proposed under the Code (the "Regulations"), current positions of the IRS contained in published revenue rulings and revenue procedures, current administrative positions of the IRS, and existing judicial decisions, as in effect on the date of this Memorandum, all of which are subject to change or modification, with or without retroactive effect, at any time.

No assurance can be given as to the future status of federal income tax laws or other tax laws as they pertain to limited liability companies of the type described herein. It is likely that changes to the Code will be proposed in the future. The effect of such proposals on the Fund and on an investment therein cannot be analyzed. Accordingly, potential investors are urged to consider on-going developments regarding changes in the federal income tax law and other tax laws and to consult their own advisors in assessing the risks associated with an investment in the Fund.

Classification of the Fund

The Fund will be treated as a partnership for federal income tax purposes under the "check the box" Regulations. Under these regulations, an unincorporated domestic entity, such as the Fund, with at least two members will be taxed as a partnership if no election is made to be taxed as a corporation. Accordingly, the discussion herein relating to partnerships and partners generally will be applicable to Unit holders in the Fund.

Partnership Taxation in General

Under the Code, a partnership pays no federal income tax, although it may be required to withhold and pay taxes on behalf of certain of its partners. Rather, each partner reports on his federal income tax return his distributive share of all items of income, gain, loss, deduction, credit and tax preference of the partnership, whether or not the partnership makes any actual distribution to the partner during the taxable year. Thus, it is possible that distributions from the Fund will not be sufficient to pay tax liabilities with respect to the tax income and gain allocated to a Unit holder and that the only source of payment of such tax liabilities would be from the Unit holder's funds from sources

other than the Fund.

The extent to which a Unit holder may utilize Fund losses in any tax year is limited to the adjusted tax basis of his interest in the Fund at the end of the Fund tax year (See "Basis of Units"). In addition, a Unit holder may not deduct Fund losses in excess of the amount the Unit holder is considered "at risk" with respect to the Fund under Code Section 465 (See "At Risk Limitations"). A Unit holder generally may use his distributive share of any partnership losses allowable after applying the foregoing loss limitation only to offset his income from other passive sources (see "Passive Activity Loss Limitations").

Basis of the Units

A Unit holder's initial tax basis for his Units will be the amount of money he contributes to the Fund.

A Unit holder's basis is his Units increased by (a) his share of the non-recourse liabilities of the Fund, and (b) his share of profits. The adjusted tax basis of his Units will be decreased, but not below zero, by (1) distributions to the Unit holder by the Fund; (ii) reductions in his share of the non-recourse obligations of the Fund; (iii) his share of the losses of the Fund; and (iv) his share of Fund expenditures not chargeable to his capital account.

Under Regulation Section 1.752-1(a)(2), a partnership liability is a non-recourse liability to the extent that no partner or related person (for the purpose of Regulation Section 1.752-4(b)) bears any economic risk of loss. A partnership liability generally is not considered non-recourse to the extent that any partner guarantees the payment of such liability. If a Unit holder or a "related" person guarantees all or a portion of the non-recourse liabilities of the Fund, the other Unit holders' tax basis in their Units will not include such guaranteed portion of the Fund's non-recourse liabilities.

Similarly, if a partner or a person related to a partner loans funds to a partnership and the other partners are not personally liable for the repayment of the loan, only the lending partners may include that loan in the basis of their partnership interests. For example, if a Unit holder or one of his affiliates makes a loan to the Fund, the other Unit holders would not include any portion of such a loan in the basis of their Units.

The Fund may be a "tiered" partnership if it owns interests in other entities taxed as partnerships for federal income tax purposes. With respect to "tiered" partnerships, the Regulations provide that the "upper-tier" partnership's share of the liabilities of the "lower-tier" partnership will be treated as liabilities of the upper-tier partnership for purposes of applying Code Section 752 to the partners of the upper-tier partnership (Regulation Section 1.752-4(a)).

If a Unit holder's basis in his Units is reduced to zero, the amount of any distributions (including any deemed distributions due to a reduction in Fund non-recourse

liabilities) in excess of his share of the Fund's taxable income for the year will be treated as capital gain, except to the extent that ordinary income treatment is required for his *pro rata* share of depreciation recapture.

A partner may not deduct his share of losses of a partnership to the extent such losses exceed the partner's basis for his interest in the partnership. Any losses that are not currently deductible by a partner due to this limitation may be deducted when and to the extent the partner's basis is increased (for example, by the allocation of partnership income). The ability of a partner to claim his share of partnership losses will also depend on the impact of the "at risk" rules of Code Section 465 (see "At Risk Limitations") and the passive activity loss limitation rules of Code Section 469 (see "Passive Activity Loss Limitations").

Allocations of Profits and Losses

Under Code Section 704, a partner's distributive share of the income, gain, loss, deduction, or credit of a partnership is determined by reference to the partnership agreement, unless the allocation contained in the agreement does not have "substantial economic effect," in which case the allocation is determined by reference to the partners' interests in the partnership, taking into account all facts and circumstances.

Although it is intended that the Fund's allocations will be in accordance with the Unit holders' interests in the Fund, it is possible that the Internal Revenue Service will challenge the Fund's tax allocations and attempt to reallocate tax items among the Unit holders. Any such reallocations of tax items may have adverse tax and financial consequences to a Unit holder.

"At Risk" Limitations

Code Section 465 limits the amount of losses that a partner can deduct in a particular year to the amount that such partner is considered "at risk" at the close of the partnership's taxable year. Generally, a taxpayer is considered "at risk" to the extent of (i) the amount of money and the adjusted basis of property he contributes to an activity, plus (ii) any amounts borrowed with respect to an activity for which the taxpayer is personally liable or for which the taxpayer has pledged property (other than property used in the activity) as security. A taxpayer will generally not be considered "at risk" with respect to amounts protected against loss through non-recourse financing, guarantees, stop loss agreements or similar arrangements.

A taxpayer generally is not considered to be "at risk" for non-recourse obligations. Losses not deductible by reason of the "at risk" rules may be carried forward indefinitely and deducted at such time as the taxpayer becomes "at risk" to a greater extent with respect to the activity.

SAMPLE

Passive Activity Loss Limitations

Code Section 469 generally provides that losses attributable to "passive activities" may be used only to offset income from passive activities. Code Section 469 applies to individuals, estates, trusts, personal service corporations (corporations providing services that are substantially performed by owner-employees), and closely-held corporations (corporations having 5 or fewer shareholders who own more than 50% in value of the stock).

Code Section 469 defines a "passive activity" as (i) the conduct of a trade or business in which the taxpayer does not materially participate or (ii) any rental activity (without regard to participation). Under Code Section 469, the interest of a limited partner in a limited partnership is not considered an interest with respect to which a person materially participates, except as provided in regulations. Accordingly, a Unit holder's investment in the Fund will be a passive activity, and any Fund losses allocated to the Unit holders will constitute passive losses.

Under Code Section 469, passive losses generally may be used only to offset passive income until the taxable year in which the taxpayer disposes of his interest in the activity producing the passive losses.

Passive income is defined as the income from passive activities. Passive income does not include (i) income received as salary or wages; (ii) income derived from a trade or business in which the taxpayer materially participates ("active income"); (iii) interest, dividends, annuities or royalties ("portfolio income") not derived in the ordinary course of business; (iv) gain or loss from the disposition of property used in the ordinary course of business producing portfolio income; or (v) gain or loss from the disposition of property held for investment which is not considered to be an interest in a passive activity.

Passive losses that are not deductible in a particular year may be carried forward indefinitely and used to offset passive income in subsequent years. In addition, upon a fully taxable disposition of a taxpayer's entire interest in the passive activity (other than to a related party), any unused passive losses from the activity for the year that have been carried forward, and the loss, if any, on the disposition, may be applied first to offset any income from that activity for the year (including the gain, if any, from the disposition); second, to offset any other passive income for the year; and third, any remaining unused passive losses from the activity may be used to offset the taxpayer's active and portfolio income.

Based on the foregoing, a Unit holder may use any Fund losses allocated to him only to offset his passive income. If the Fund losses are not fully deductible in the year incurred, they may be applied against passive income (that is not portfolio income) in future years. If any unused losses from the Fund remain when the Unit holder disposes of his entire interest in the Fund, these losses may be used in full at such time, first against passive income, and then against any other income of the Unit holder.

The foregoing analysis assumes that the Fund constitutes a single "activity" for purposes of Code Section 469. If the Fund consisted of more than one activity, the passive activity loss limitations would apply separately to each such activity.

The Regulations provide flexibility in grouping a taxpayer's trade or business activities and rental activities for purposes of applying the passive activity rules. In this respect, one or more trade or business activities or rental activities may be treated as a single activity if the activities constitute an appropriate economic unit for the measurement of gain or loss for the purposes of Code Section 469. However, generally rental activities may not be grouped with a trade or business activity. Further, a taxpayer that owns an interest as a limited partner or limited entrepreneur (e.g., a member of an LLC who does not actively participate in the management of the LLC) may not group the following activities with any other activity: (i) holding, producing or distributing motion picture films or video tapes, (ii) farming, (iii) leasing personal property, (iv) exploring for or exploiting oil and gas resources, and (v) exploring for or exploiting geothermal deposits. A partnership must group its activities under the rules of the Regulations and once the partnership groups its activities, the partner may group those activities with each other, with activities conducted directly by the partner, and with activities conducted through other C corporations subject to Code Section 469, S corporations and partnerships, except that a partner may not treat activities grouped together by any 469 entity as separate activities.

Whether or not the Fund's activities are aggregated into a single activity should not affect a Unit holder's ability to offset passive losses from one Fund activity against passive income of another Fund activity. However, any previously suspended passive losses from a particular activity that is part of a single activity will not become deductible against non-passive income upon a disposition of that particular activity alone, but only upon a taxable disposition by the Fund of all of its interest in the single activity, or the Unit holder's disposition of his Units. Further, the Fund's debt investments or equity investments in C corporations may produce interest income or dividend income, respectively, that is classified as portfolio income for purposes of Code Section 469, and the Fund's other equity investments may produce losses classified as passive under Code Section 469, and in this situation a Unit holder's share of passive losses may not be utilizable to offset his share of portfolio income.

Distributions

Distributions (which include any deemed distribution arising from a reduction, by repayment or otherwise, in Fund liabilities) made to a Unit holder generally do not result in any recognition of gain for federal income tax purposes to the extent the amount of cash or debt reduction does not exceed the basis of the Unit holder's Units. A Unit holder's adjusted tax basis in his Units is reduced by the amount of the distribution. Distributions of cash (including reductions in liabilities) by the Fund in excess of a Unit holder's adjusted tax basis in his Units will result in the recognition of gain to the extent of such excess. Such gain is considered gain from the sale or exchange of the Units by

the Unit holder and in certain cases may be treated in part as ordinary income because of the depreciation recapture provisions. (see "Sale or Disposition of Units").

Sale or Disposition of Units

Upon a sale of a Unit, a Unit holder will realize gain or loss in an amount equal to the difference between the amount realized and his adjusted tax basis in the Unit. Under Code Section 751(a), any gain realized by a selling partner is taxed as ordinary income to the extent of the partner's *pro rata* share of "ordinary income assets" of the partnership. The balance of gain, if any, or the loss is treated as a capital gain or loss. In determining the amount received upon the sale or exchange of a Unit, a Unit holder must include, among other things, his allocable share of the outstanding amount of the indebtedness to which the Fund's property is subject. Therefore, it is possible that the gain realized on the sale of a Unit may exceed the cash proceeds of such sale. As a result, in some cases, the income taxes payable with respect to such gain may exceed such cash proceeds.

Certain Deductions to Be Claimed

Organization, Start-Up and Syndication Costs. Under the Code, neither a partnership nor its partners may deduct amounts paid or incurred in the promotion and sale of the interests in the partnership ("syndication" expenses), including those amounts paid as commissions, professional fees, and printing costs. These expenses must be capitalized and may not be amortized. Under the Regulations, the following expenses constitute non-deductible syndication expenses which must be capitalized and not amortized: (i) brokerage fees; (ii) registration fees; (iii) legal fees for securities advice and advice pertaining to the adequacy of tax disclosures in the offering memorandum for securities law purposes; (iv) accounting fees for the preparation of representations to be included in the offering memorandum; and (v) costs of printing the offering memorandum.

However, to the extent a partnership pays or incurs organizational expenses incidental to the creation of the partnership or start-up expenditures with respect to an active trade or business, the partnership generally may elect to capitalize such expenditures and amortize them ratably over a period of not less than 180 months, commencing in the month in which the partnership begins business. Organizational expenses include (i) legal fees for services incidental to the organization of the partnership, such as the negotiation and preparation of a partnership agreement; (ii) accounting fees for services incidental to the organization of the partnership, and (iii) filing fees. On the other hand, organizational expenses do not include (i) expenses incurred in connection with the acquisition of partnership assets or the transfer of assets to the partnership; (ii) syndication expenses; and (iii) certain other expenses. Start-up expenditures include (i) certain expenses related to the investigation of the creation or acquisition of an active trade or business; and (ii) expenses paid or incurred pursuant to the creation of an active trade or business, which expenses would be deductible if they were incurred after the commencement of the particular business operation to which they relate.

The Fund has incurred organizational expenses which it will elect to amortize over 180 months. Additionally, the Fund has incurred or may incur start-up expenditures which the Fund, if it is eligible to do so, intends to amortize over a 180 month period. Any costs incurred by the Fund associated with offering of the Units will be capitalized by the Fund as non-deductible syndication costs.

Other Limitations on Deductions. Other limitations may apply to reduce or eliminate the deductibility by a Unit holder of his share of the Fund's expenses, including fees paid to the management company. For example, to the extent deductions of the Fund are deemed not to be incurred in connection with a business, they will be treated as miscellaneous itemized deductions that, in the case of Unit holders, are deductible only to the extent that, when taken together with other similar deductions, they exceed 2% of the Unit holder's adjusted gross income. Also, miscellaneous itemized deductions are not deductible by a Unit holder in computing the Unit holder's alternative minimum tax.

Certain Tax Consequences to Non-United States Investors

Foreign Individuals Potentially Subject to U.S. Tax on Their Worldwide Income. Individuals who are not citizens of the United States but who are treated as "residents" of the United States for federal income tax purposes are subject to United States federal income tax on their worldwide income, including but not limited to their income from the Fund. For this purpose, an individual who is a lawful permanent resident of the United States (e.g., a holder of a "green card") generally will be treated as a resident. In addition, an individual who is not a lawful permanent resident under the immigration laws may nevertheless be a "resident" for tax purposes based upon a "substantial presence" in the United States as defined under Code Section 7701(b). For example, under that Code Section, an individual may be a "resident" if the individual is physically present in the United States on all or any part of a certain number of days, determined under a formula, within a three-year testing period. An individual present in the United States under certain types of temporary visas (e.g., teachers or students) may be excepted from the "substantial presence" test, but the determination whether an individual is a resident can be a complex determination. Potential investors who are foreign individuals should consult with their own tax advisors to be certain of their tax status under United States law.

Taxation of Non-U.S. Individuals Not Treated as Tax Residents. Potential investors who are neither citizens nor residents (as determined for tax purposes) of the United States ("Non-U.S. Investors") are subject to additional tax rules. Generally, Non-U.S. Investors are taxable on certain United States source passive investment income ("FDAP"), including dividends, interest and rents, at a flat rate of 30% on the gross amount of such income, without reduction for any expenses or other tax deductions, and that tax is satisfied by withholding of tax on payments of such amounts to the Non-U.S. Investors. In the case of a partnership, the partnership generally will be required to withhold based on the share of its FDAP allocable to its Non-U.S. Investors. The 30% tax on the gross amount of FDAP may be reduced or eliminated if the Non-U.S. Investor

is a resident of a country with which the United States has a bilateral income tax treaty, provide that the Non-U.S. Investor submits timely certification of his entitlement to treaty relief. Certain other exceptions apply which may reduce or eliminate the tax on certain types of FDAP, including interest income. Non-U.S. Investors generally are not subject to tax on capital gains unless either (1) the gains are attributable to a United States trade or business or (2) the Non-U.S. Investor is an individual who is present in the United States for more than 183 days during the taxable year in which the gains are realized.

The 30% taxation of FDAP will not apply to any income that is effectively connected with the active conduct of a trade or business within the United States. The net income from such a trade or business within the United States realized by a Non-U.S. Investor will be subject to tax at the regular graduated income tax rates applicable to resident individuals. Such income currently will be subject to income tax withholding, generally at a rate of 35%. A Non-U.S. Investor who realizes any such income will be required to file a United States federal income tax return with respect to the taxable year in which the income is realized.

A Non-U.S. Investor in the Fund who is allocated a share of passive income (including capital gain) or active trade or business income realized by the Fund will be subject to tax under the above rules as if such Non-U.S. Investor had realized such income directly. Any withholding of federal income taxes by the Fund attributable to a Non-U.S. Investor will be treated as a distribution to that particular Unit holder.

THE FOREGOING IS NOT A COMPLETE DISCUSSION OF ALL OF THE FEDERAL INCOME TAX CONSEQUENCES TO A NON-U.S. INVESTOR; THERE ARE STATE AND LOCAL TAX AND ESTATE TAX CONSEQUENCES TO BE CONSIDERED. ALSO, FOREIGN TAXES MAY BE IMPOSED ON A NON-U.S. INVESTOR'S INCOME FROM THE FUND. INVESTORS ARE STRONGLY ADVISED TO CONSULT WITH THEIR TAX ADVISORS WITH RESPECT TO THE TAX CONSEQUENCES OF AN INVESTMENT IN THE FUND.

Compliance Matters

Tax Returns/Audits. The Fund will furnish annually (and in certain circumstances, periodically) to each of the Unit holders sufficient information from the Fund's tax return for the Unit holders to prepare their own federal income tax returns.

The tax treatment of items of partnership income, loss, deduction, and credit will be determined at the partnership level. In addition, all partners are required, on their individual federal income tax returns, to treat partnership items in a manner that is consistent with the treatment of such items on the partnership's return.

The tax matters partner for the Fund will be the management company. The tax matters partner is required to, among other things, keep the other partners informed of all administrative and judicial proceedings and represent the Fund in such proceedings. The

SAMPLE

tax matters partner is authorized to obtain judicial review of any proposed readjustment of partnership items. Although every partner with an interest in the outcome is allowed to participate in an action filed by the tax matters partner, the outcome of that proceeding will bind all partners. If the tax matters partner fails to seek judicial review of a proposed adjustment of partnership items, other partners may seek such review, provided that there can be only one judicial proceeding with respect to a partnership. The foregoing procedures may adversely affect a Unit holder's ability to deal with adjustments to his income tax return resulting from adjustments made with respect to the Fund.

If any of the tax returns of the Fund are audited, it is possible that substantial legal and accounting fees will have to be paid to substantiate the position of the Fund, and such fees would reduce the cash otherwise available to meet Fund obligations or for distribution to the Unit holders. Such an audit may result in adjustments to each Unit holder's income tax return. An audit of the Fund's tax returns may also result in an audit of non-partnership items on each Unit holder's income tax returns, which in turn could result in adjustments to such items. The costs incurred by a Unit holder in connection with an IRS audit of his income tax return will be borne solely by that Unit holder.

State and Local Taxes

In addition to federal income taxes, the Fund and the Unit holders may be subject to other taxes imposed by various jurisdictions, such as state and local income taxes. Although a detailed analysis of these various taxes is not presented here, investors should consider the potential state and local tax consequences of an investment in the Fund. For example, a Unit holder's distributive share of all or a portion of Fund income, gains, losses and deductions, profits and losses, may be required to be included in determining his income subject to tax under the laws of the state or locality in which he is a resident, as well as jurisdictions in which the Fund does business.

For example, with respect to Unit holders who are not residents of the Commonwealth of Virginia, if the Fund has Virginia source income allocated to such Unit holders, the Fund will be required to file composite returns and make composite payments of tax on behalf of all of its Unit holders who are not residents of Virginia. The current rate of the Virginia composite tax is [_____]% and any composite payment on behalf of a non-resident Unit holder will be treated by the Fund as a distribution to the non-resident Unit holder.

The Commonwealth of Virginia also requires a partnership to withhold income tax on a non-resident partner's allocable share of Virginia source income. The Fund will withhold at the required withholding rate (currently [_____]%) of Virginia source income allocable to Unit holders who are not residents of Virginia. Any such withholding will be treated by the Fund as a distribution to the non-resident Unit holder. The withholding by a partnership does not relieve the non-resident partner of his obligation to file a Virginia income tax return. A partnership is allowed to file a composite return on behalf of non-resident partners who have no activity in Virginia other than that from the partnership. If a composite filing is allowable with respect to a

SAMPLE

non-resident partner and the composite return is properly filed and all taxes, including applicable interest and penalty is paid, the individual non-resident partner is relieved of his separate individual filing requirement. If the Fund elects to file a composite return on behalf of any non-resident Unit holders, the composite tax payment attributable to the non-resident will be treated as a distribution by the Fund to that non-resident Unit holder.

The Fund intends to supply the Unit holders with information regarding their income, if any, derived from various jurisdictions in which the Fund does business. Unit holders are urged to consult with their own tax advisors regarding state and local tax laws.

U.S. Federal Estate and Gift Taxation

U.S. residents generally are subject to federal estate taxes on their taxable estates at death which includes the value at the time of a decedent's death of all of his property, real or personal, tangible or intangible, wherever situated. Additionally, U.S. residents are subject to gift taxes on the transfer of any property by gift. U.S. estate taxes can also apply to a Non-U.S. Investor to tax that part of his gross estate which at the time of his death is situated in the United States. For example, shares of stock in a domestic U.S. corporation owned by a non-resident alien are treated as property situated in the United States for purposes of this provision. Further, the IRS has ruled that a partner's interest in a partnership is situated where the partnership's business is carried on for purposes of applying the U.S.-United Kingdom Estate Tax Convention. Thus, a Unit in the Fund held by a Non-U.S. Investor could possibly be subject to U.S. estate tax on the death of the Non-U.S. Investor.

Additionally, state and local taxing jurisdictions may also impose state, inheritance and/or gift taxes on their residents or on property deemed situated within their respective jurisdictions.

- ***Please save this notice for your records. Please enclose a copy if you have to write us or a U. S. Consulate about this case, or if you file another application based on this decision.***
- ***You will be notified separately about any other applications or petitions you have filed.***

Additional Information

GENERAL.

The filing of an application or petition does not in itself allow a person to enter the United States and does not confer any other right or benefit.

INQUIRIES.

You should contact the office listed on the reverse side of this notice if you have questions about the notice, or questions about the status of your application or petition. *We recommend you call.* However, if you write us, please enclose a copy of this notice with your letter.

APPROVAL OF NONIMMIGRANT PETITION.

Approval of a nonimmigrant petition means that the person for whom it was filed has been found eligible for the requested classification. If this notice indicated we are notifying a U.S. Consulate about the approval for the purpose of visa issuance, and you or the person you filed for have questions about visa issuance, please contact the appropriate U.S. Consulate directly.

APPROVAL OF AN IMMIGRANT PETITION.

Approval of an immigrant petition does not convey any right or status. The approved petition simply establishes a basis upon which the person you filed for can apply for an immigrant or fiance(e) visa or for adjustment of status.

A person is not guaranteed issuance of a visa or a grant of adjustment simply because this petition is approved. Those processes look at additional criteria.

If this notice indicates we have approved the immigrant petition you filed, and have forwarded it to the Department of State Immigrant Visa Processing Center, that office will contact the person you filed the petition for directly with information about visa issuance.

In addition to the information on the reverse of this notice, the instructions for the petition you filed provide additional information about processing after approval of the petition.

For more information about whether a person who is already in the U.S. can apply for adjustment of status, please see Form I-485, *Application to Register Permanent Residence or Adjust Status*.

DECISION

Your request for an Amendment to your Designation as a Regional Center has been denied for the following reason(s):

See Attachment

If you desire to appeal this decision, you may do so. Your notice of appeal must be filed with this office at the address at the top of this page within 30 days of the date of this notice (33 days if this notice was mailed to you). Your appeal must be filed on Form I-290B. A fee of $585.00 is required, payable to U. S. Citizenship and Immigration Services with a check or money order from a bank or other institution located in the United States. If no appeal is filed within the time allowed, this decision will be the final decision in this matter.

In support of your appeal, you may submit a brief or other written statement for consideration by the reviewing authority. You may, if necessary, request additional time to submit a brief. Any brief, written statement, or other evidence not filed with Form I-290B, or any request for additional time for the submission of a brief or other material must be sent directly to:

U. S. Citizenship and Immigration Services
Administrative Appeals Office MS 2090
Washington, D.C. 20529-2090.

Any request for additional time for the submission of a brief or other statement must be made directly to the Administrative Appeals Office (AAO), and must be accompanied by a written explanation for the need for additional time. An extension of time to file the appeal may not be granted. **The appeal <u>may not</u> be filed directly with the AAO. The appeal must be filed at the address at the top of this page.**

Sincerely,

Christina Poulos
Director, California Service Center

Enclosure: Form I-290B

This Notice is in reference to the Regional Center Proposal Amendment that was filed with U. S. Citizenship and Immigration Services (USCIS), California Service Center, on January 15, 2010, seeking to amend their designation as a Regional Center pursuant to Pilot Immigration Program under Section 610 of P.L. 102-395 and as amended by P.L. 107-273.

The geographical area of a Regional Center must be contiguous and clearly delineated.

Section 610(a) of P.L. 102-395 as amended by P.L. 107-273 describes the statutory basis for eligibility as a Regional Center

a) Of the visas otherwise available under section 203(b)(5) of the Immigration and Nationality Act (8 U.S.C. 1153(b)(5)), the Secretary of State, together with the Attorney General, shall set aside visas for a pilot program to implement the provisions of such section. Such pilot program shall involve a regional center in the United States, designated by the Secretary of Homeland Security on the basis of a general proposal, for the promotion of economic growth, including increased export sales, improved regional productivity, job creation, and increased domestic capital investment. A regional center shall have jurisdiction over a limited geographic area, which shall be described in the proposal and consistent with the purpose of concentrating pooled investment in defined economic zones. The establishment of a regional center may be based on general predictions, contained in the proposal, concerning the kinds of commercial enterprises that will receive capital from aliens, the jobs that will be created directly or indirectly as a result of such capital investments and the other positive economic effects such capital investments will have...

8 CFR 204.6(m)(3)(i) requires that a proposal be submitted which:

> Clearly describes how the regional center focuses on a geographical region of the United States, and how it will promote economic growth through improved regional productivity, job creation, and increased domestic capital investment;

On January 15, 2010, the Regional Center submitted this amendment to its approved Regional Center requesting to add the " Virginia Tobacco Region," 41 localities in South Central and Southwest Virginia, to their approved geographical area.

The initial Regional Center Proposal for Gulf Coast Funds Management Regional Center, GCFM, was approved on August 18, 2008. A subsequent amendment expanding the investment funds available to investors was approved on July 13, 2009. The approved geographic scope of GCFM includes the States of Mississippi and Louisiana, a straight line distance of over 900 miles from Virginia. If USCIS approved this jurisdictional change, then the Regional Center would no longer be contiguous and would not be limited to a single geographic area but rather it would be two distinct geographic areas.

Thus, the proposed areas for the Regional Center do not qualify as "a limited geographic area". Therefore, this Regional Center Proposal Amendment is denied.

This denial is without prejudice for filing a new Regional Center Proposal for the area encompassing the Virginia localities identified in this amendment, if such new proposal is accompanied by all the required evidence for a New Regional Center.

RULES AND ADMINISTRATION

January 12, 2010

The Honorable Janet Napolitano
Secretary
U.S. Department of Homeland Security
Washington, DC 20528

Dear Secretary Napolitano:

I write to express my support for the creation of an EB-5 regional center to serve the tobacco regions in the Commonwealth of Virginia. It is my understanding that the U.S. Citizenship and Immigration Service (USCIS) within the Department of Homeland Security is currently considering an amended application submitted by Gulf Coast Funds Management, LLC (GCFM) for a regional center designation.

The tobacco regions in the Commonwealth of Virginia, which already experience high unemployment rates, have been hit particularly hard during the current economic recession. The designation of an EB-5 regional center is important in order to help generate capital investment in local economies in these regions and create new jobs in industries that are less tobacco dependent. I believe the designation would go a long way to expedite economic recovery in the tobacco regions and across the Commonwealth of Virginia.

It is my hope that the USCIS will approve GCFM's amended application to create an EB-5 regional center to serve the tobacco regions in the Commonwealth of Virginia. Please do not hesitate to contact me with any questions or concerns.

Sincerely,

Mark R Warner

Re: Amendment of GCFM Application to include Virginia Tobacco Regions

Dear Ms. Velarde:

Gulf Coast Funds Management, LLC (GCFM), an approved Regional Center pursuant to Section 610 of the Appropriations Act of 1993, respectfully requests to include additional geographical areas covering the tobacco-dependent localities in the Commonwealth of Virginia for the following industries: manufacturing, education and training, research and development, and wholesale trade (international). The tobacco region consists of 41 localities in the South Central and Southwest regions of Virginia ("Tobacco Region", see attached *Exhibit A*), which was established to revitalize tobacco-dependent communities.

Communities and citizens throughout the Tobacco Region continue to experience significant economic distress as a direct consequence of historical dependence on tobacco production, textile and furniture manufacturing and coal production.

The credit crisis and difficult economy have resulted in more severe job losses in the Tobacco Region, where unemployment rates have historically been higher than other regions in Virginia. The Virginia Employment Commission has designated many areas within the Tobacco Region as Targeted Employment Areas, thus enabling them to benefit from the Immigrant Investor Pilot Program to accelerate the economic recovery and transformation in those areas.

The proposed expansion of GCFM's geographic coverage area is derived from the existing hybrid automobile manufacturing plan administered (the "Project") by GCFM through Gulf Coast Automotive Investment Fund A-1 (GCAIF A-1). The Project has moved forward with great speed and tremendous support from state and local governments due to its significant potential job creation. The company, GreenTech Automotive, Inc.

G F COAST FUNDS MANAGEMI T
650 Poydras St. Ste. 2830,
New Orleans, LA 70130

TELEPHONE: (504) 582-2244
FACSISMILE: (504) 582-2240

("GTA", formerly known as Hybrid Kinetic Automotive Corp) has recently revealed publicly its four prototype cars to be built in the United States, and broken ground on the construction of its manufacturing facilities in Tunica County, Mississippi. In the meantime, GTA has agreed to allocate part of its manufacturing operations, such as engine and transmission production, to the Tobacco Region, contingent on USCIS approval of this amendment application.

GCFM's request to amend its application to expand its geography to cover the Tobacco Regions in Virginia is based on the previously approved hybrid automobile manufacturing project managed by the same company, and merely re-allocates a portion of GTA's original planned production to Virginia. Therefore, the methodology for job multipliers described in the original independent economic study, which was approved by USCIS, should be applicable to the manufacturing facilities to be built in the Tobacco Region, and the overall impact would stay intact.

The EB-5 program is an effective way to attract private investment into the Tobacco Region, which would not only create many new jobs, but also provide much-needed diversification to the region's economy. The Virginia State government has thus far expressed strong support for the Project.

Therefore, GCFM respectfully requests the expansion of its geographic coverage area to include the entire Tobacco Region in Virginia, and the support of GTA in achieving its goal of manufacturing and distributing hybrid motor vehicles in the US.

The Honorable Janet Napolitano, Secretary
Department of Homeland Security
Washington, DC 20536

Re: EB-5 Regional Center Amendment Application for Virginia Tobacco Regions

Dear Secretary Napolitano,

As we assess the employment statistics in Virginia during these difficult economic times, we see a continuing need to create jobs, particularly in the historically tobacco-dependent regions across southside Virginia.

I am writing in support of Gulf Coast Funds Management LLC's request that the Department of Homeland Security and the United States Citizenship and Immigration Services allow them to expand their coverage to include tobacco-dependent localities in Virginia for the following industries: manufacturing, education and training, research and development, assembling, and international trade.

In Virginia, the credit crisis and difficult economy have caused unemployment to rise over the last two years, particularly in the tobacco regions. I support GCFM's amendment application and encourage the Department of Homeland Security and USCIS to allow this expansion.

Prompt consideration of their application will allow us to move as quickly as possible in generating funds for new investment in this region.

Sincerely,

Timothy M. Kaine

Re: Targeted Employment Area Designation in Virginia

Dear Ms. Velarde:

The Virginia Employment Commission certifies that the following areas are Targeted Employment Areas (TEA) within the Commonwealth of Virginia. Targeted Employment Areas are defined as areas, which at the time of investment, are rural areas, or areas which have experienced unemployment of at least 150 percent of the national average rate within Virginia.

High unemployment areas were determined using the 2008 national not seasonally adjusted unemployment rate of 5.8 percent; 150 percent of 5.8 percent is 8.7 percent. High unemployment areas are any particular geographical or political subdivision located within a Metropolitan Statistical Area (MSA), or within a city or town having a population of 20,000, or more, within such state. Many of the high unemployment areas are tobacco-dependent regions, which are established under *Code of Virginia*, Section 3.1-1107, and defined as civil jurisdictions in Southwest and Southside Virginia, where they are historical tobacco production regions and are experiencing the highest unemployment rates within the Commonwealth of Virginia. In order to decrease the high unemployment rate while transforming into a less tobacco-dependent economy, these areas are designated as TEA to seek enhanced economic recovery and development.

Rural areas are defined as civil jurisdictions not located within any standard MSA as designated by the Office of Management and Budget, or within any city or town having a population of 20,000, or more, based on the most recent decennial census of the United States.

The following attachment contains designated Target Employment Areas for the Commonwealth of Virginia. If you have any questions or need clarification, please contact Donald Lillywhite, Economic Information Services Director, at (804) 786-5670.

Re: Targeted Employment Area Designation in Virginia

Dear Ms. Chapline:

This letter is follow-up to a December 15, 2009, communication to Barbara Velarde of the USCIS Foreign Trade Investor Program concerning Targeted Employment Areas (TEA). The Virginia Employment Commission certifies that Sussex County, Virginia, is a TEA within the Commonwealth of Virginia. Targeted Employment Areas are defined as areas, which at the time of investment, are rural areas, or areas which have experienced unemployment of at least 150 percent of the national average rate within Virginia.

High unemployment areas were determined using the 2008 national not seasonally adjusted unemployment rate of 5.8 percent; 150 percent of 5.8 percent is 8.7 percent. High unemployment areas are any particular geographical or political subdivision located within a Metropolitan Statistical Area (MSA), or within a city or town having a population of 20,000, or more, within such state. Many of the high unemployment areas are tobacco-dependent regions, which are established under *Code of Virginia*, Section 3.1-1107, and defined as civil jurisdictions in Southwest and Southside Virginia, where they are historical tobacco production regions and are experiencing the highest unemployment rates within the Commonwealth of Virginia. In order to decrease the high unemployment rate while transforming into a less tobacco-dependent economy, these areas are designated as TEA to seek enhanced economic recovery and development.

Rural areas are defined as civil jurisdictions not located within any standard MSA as designated by the Office of Management and Budget, or within any city or town having a population of 20,000, or more, based on the most recent decennial census of the United States.

Sincerely,

Dolores A. Esser

RULES AND ADMINISTRATION

January 12, 2010

The Honorable Janet Napolitano
Secretary
U.S. Department of Homeland Security
Washington, DC 20528

Dear Secretary Napolitano:

I write to express my support for the creation of an EB-5 regional center to serve the tobacco regions in the Commonwealth of Virginia. It is my understanding that the U.S. Citizenship and Immigration Service (USCIS) within the Department of Homeland Security is currently considering an amended application submitted by Gulf Coast Funds Management, LLC (GCFM) for a regional center designation.

The tobacco regions in the Commonwealth of Virginia, which already experience high unemployment rates, have been hit particularly hard during the current economic recession. The designation of an EB-5 regional center is important in order to help generate capital investment in local economies in these regions and create new jobs in industries that are less tobacco dependent. I believe the designation would go a long way to expedite economic recovery in the tobacco regions and across the Commonwealth of Virginia.

It is my hope that the USCIS will approve GCFM's amended application to create an EB-5 regional center to serve the tobacco regions in the Commonwealth of Virginia. Please do not hesitate to contact me with any questions or concerns.

Sincerely,

Mark R Warner

Mark Warner
U.S. Senator

Business Expansion Plan

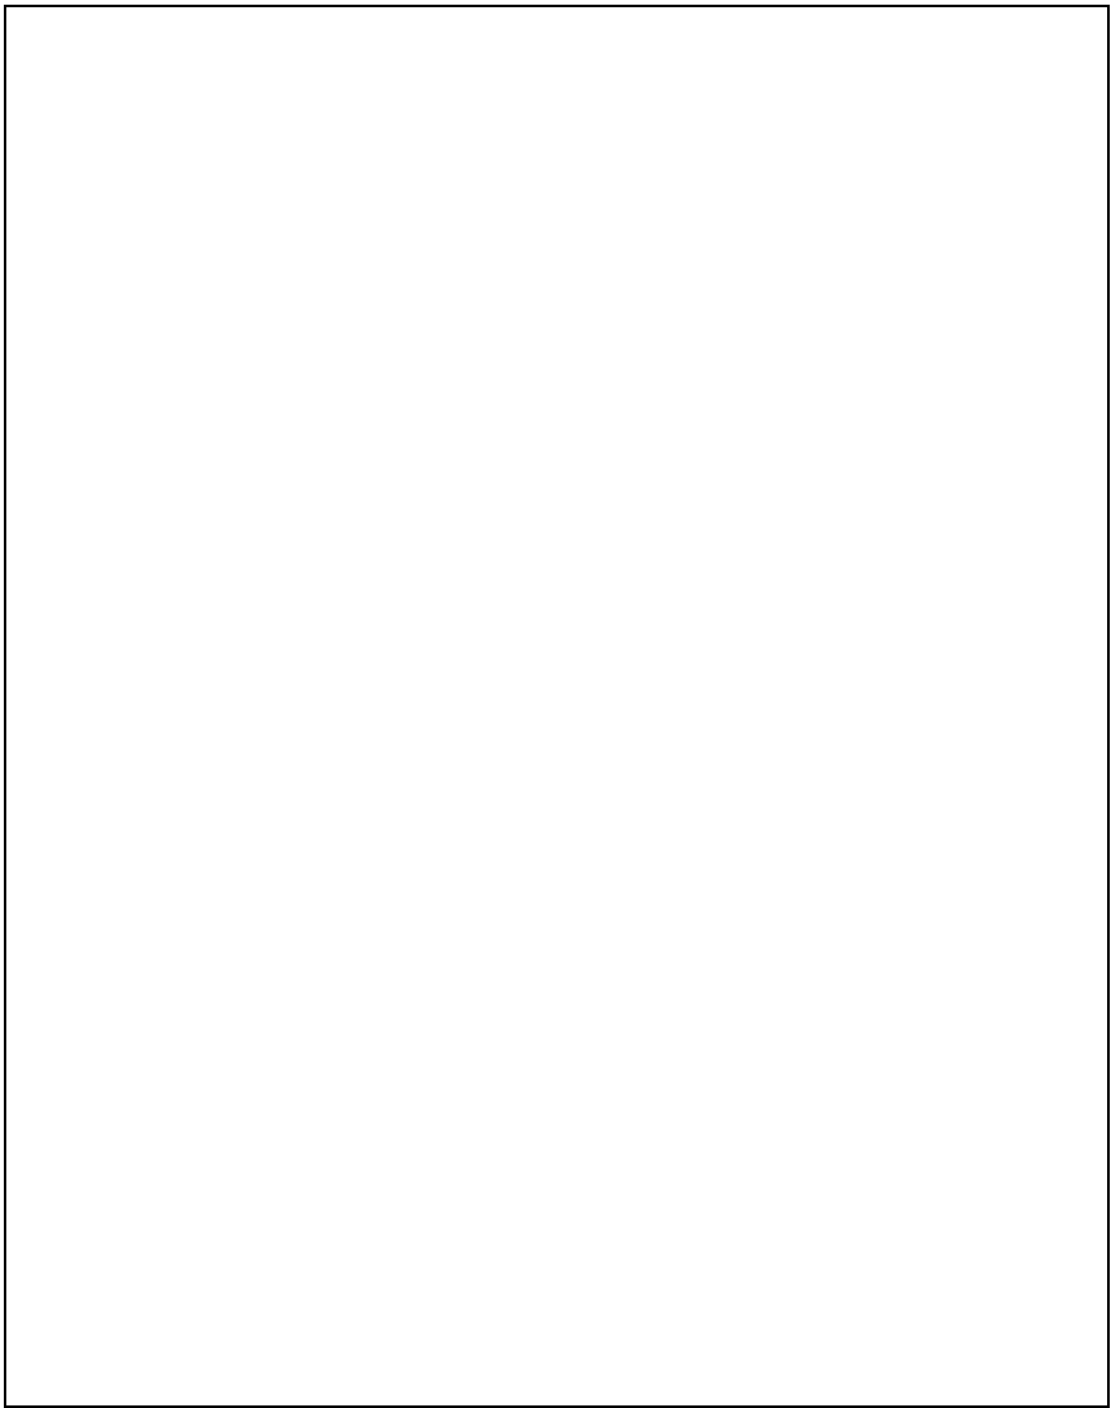
Date: December 7, 2009

A NOTE ABOUT CONFIDENTIALITY

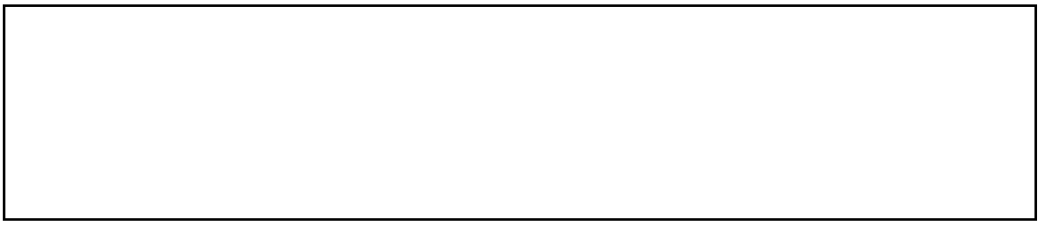
The contents of this business plan are highly proprietary, and should not be shared with any person other than officials of the U.S. Department of Homeland Security and USCIS who require this plan in order to analyze the application of Gulf Coast Funds Management LLC for an EB-5 regional center to expand coverage in the Commonwealth of Virginia.

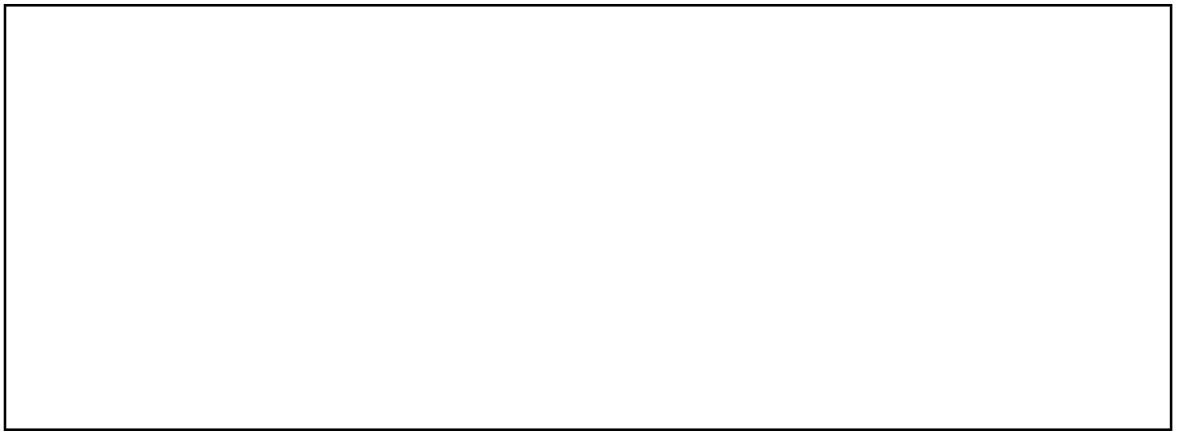
Gulf Coast Funds Management Regional Center Business Expansion Plan

1.0 Executive Summary



2.0 Company Summary





3.0 The EB-5 Immigrant Investor Program

The management company will manage EB-5 investment funds. The EB-5 immigrant investor program is described as follows by the United States Department of Homeland Security:

Immigration through Investment Overview

Under section 203(b)(5) of the Immigration and Nationality Act (INA), 8 U.S.C. 81153(6)(5), 10,000 immigrant visas per year are available to qualified individuals seeking permanent resident status on the basis of their engagement in a new commercial enterprise.

Of the 10,000 investor visas (i.e., EB-5 visas) available annually, 3,000 are set aside for those who apply under a pilot program involving a USCIS-designated Regional Center. A regional center is an entity, organization or agency that has been approved as such by the USCIS; focuses on a specific geographic area within the United States; and seeks to promote economic growth through increased export sales, improved regional productivity, creation of new jobs, and increased domestic capital investment.

"Alien investors" must demonstrate that a "qualified investment" (see below) is being made in a new commercial enterprise or approved Regional Center; and, show, using reasonable methodologies, that 10 or more jobs are actually created either directly or indirectly from the new commercial enterprise through revenues generated from increased exports, improved regional productivity, job creation, or increased domestic capital investment resulting from the pilot program.

Eligibility

Permanent resident status based on EB-5 eligibility is available to investors, either alone or coming with their spouses and unmarried children under 21 years of age. Eligible aliens are those who have invested – or are actively in

the process of investing – the required amount of capital into a new commercial enterprise that they have established. They must further demonstrate that this investment will benefit the U.S. economy and create the requisite number of full-time jobs within the U.S.

In general, "eligible individuals" include those:

1. Who establish a new commercial enterprise by: creating an original business; or purchasing an existing business and simultaneously or subsequently restructuring / reorganizing the business such that a new commercial enterprise results; or expanding an existing business by 140 percent of the pre-investment number of jobs or net worth, or retaining all existing jobs in a troubled business that has lost 20 percent of its net worth over the past 12 to 24 months; and

2. Who have invested – or who are actively in the process of investing – in a new commercial enterprise: at least $1,000,000; or at least $500,000 where the investment is being made in a "targeted employment area," which is an area that has experiences unemployment of at least 150 percent of the national average rate or a rural area as designated by OMB; and

3. Whose engagement in a new commercial enterprise will benefit the United States economy and: create full-time employment for not fewer than 10 qualified individuals; or maintain the number of existing employees at no less than the pre-investment level for a period of at least two years, where the capital investment is being made in a "troubled business," which is a business that has been in existences for at least two year and that has lost 20 percent of its net worth over the past 12 to 24 months.

Immigration risks

The investor himself and herself must meet the requirements under the EB-5 program. Each purchaser of a Unit must understand that the Fund, the management company and each of their affiliates make no representation or warranty of any kind concerning whether an investment in the Fund will meet the requirements of the EB-5 program or other U.S. immigration requirements. Each investor in a Unit must further understand that there can be no assurance that an investment in the Unit will result in his or her family receiving an EB-5 visa, conditional resident status or permanent resident status. Please carefully consider the following immigration risks, and discuss these and other immigration risks with your personal immigration lawyer.

As a Unit holder, you will be subjected to certain general immigration risks faced by all immigrants to the United States.

The process of obtaining conditional resident status and permanent resident status involves many factors and circumstances that are not within the control of the Fund. These include the investor's past history and source of funds, immigration visa backlogs, potential changes in immigration laws and regulations (including laws and regulations specific to the EB-5 immigrant investor program) and quotas established by the United States government limiting the number of visas available to qualified individuals seeking conditional resident status under the EB-5 program. Although the Fund has been structured with the objective of providing Unit holders with eligibility for conditional and permanent resident status under the EB-5 regional center provisions of the U.S. immigration laws, no assurance can be given that each Unit holder will obtain approval of his or her particular immigrant application. Purchase of a Unit does not guarantee conditional or permanent residency in the United States. Furthermore, no assurances or advice can be given that conditional resident status will be converted to permanent resident status.

An investment in a Unit is only a part of the requirement for meeting EB-5 residency status. In addition, the USCIS will require that you pass a background check.

Each immigrant investor in the United States is subjected to a thorough background check. An EB-5 immigrant investor's background (or that of an immediate family member) may not meet the USCIS criteria for temporary or permanent residency in the United States. For example, among other criteria, the following may be grounds for denial of immigration benefits for the immigrant, and/or other members of the immigrant's family: having a communicable disease (e.g., AIDS) or other dangerous contagious disease; having been at any time involved with, trafficking in, or taking, illegal drugs; having been convicted of certain crimes; having committed a fraud or misrepresentation to a U.S. Government official; or having violated U.S. immigration law in the past.

As a result of participation in the EB-5 program and as a result of your investment in the Fund, you must pay income taxes in the United States on your world-wide income. You should consult your personal tax advisor about this obligation.

As an EB-5 participant, you will have to pay taxes in the United States on your world-wide income. As a member of the Fund, which is a limited liability company, your proportionate share of the Fund's income will be "passed-through" to you for U.S. Federal income tax purposes. You will also be required to include in income your proportionate share of the taxable income of the Fund for the purposes of any state of which you are a resident. Please consult your personal tax advisor about the tax consequences of an investment in the Fund. Further information about these matters is included in this private placement memorandum under the heading "Certain U.S. Federal Income Tax Considerations," beginning on page 32.

(b)(4)

The EB-5 regional center program is a U.S. government program that is highly regulated and that requires frequent interaction between the Fund and government officials.

The EB-5 regional center program was created by Congress, which has accorded broad regulatory powers to the Department of Homeland Security and in particular to the United States Citizenship and Immigration Service (USCIS). Currently, all EB-5 related filings are reviewed by USCIS adjudicators in the USCIS California service center. While the Fund will strive to coordinate with USCIS to achieve our investors' immigration goal, there can be no assurance that USCIS adjudicators will take a consistent position on issues arising under the program, and there can be no assurance that USCIS regulations will not change in the future. Since the laws, regulations and bureaucratic interpretations applicable to the Fund's investments are subject to change at any time, there can be no assurance that the Fund will not be required to substantially change its investment policies in the future. The EB-5 program could be discontinued or altered by Congress at any time.

It is a requirement of the EB-5 program that an immigrant investor's source of funds be proper, under U.S. immigration guidelines.

EB-5 immigrant investors must demonstrate to the USCIS that the funds they invest in the Units were obtained through lawful means. Each EB-5 immigrant investor must document, to the satisfaction of the USCIS and the U.S. State Department, that the source of funds is acceptable. The Fund, and the EB-5 immigrant investor's immigration attorney, may make a preliminary assessment, but the ultimate decision will be made solely by USCIS and the U.S. State Department. Each EB-5 immigrant investor must agree to provide information and documents to the Fund, and to allow the Fund to make further investigation, concerning the EB-5 immigrant investor's source of funds and the personal and business background of the EB-5 immigrant investor and accompanying family members.

Achieving your immigration goal of conditional and permanent resident status will require you to maintain your primary residence in the United States.

EB-5 immigrant investors who obtain conditional resident status or permanent resident status must intend to make the United States their primary residence. Conditional residents or permanent residents who maintain their primary residence outside the United States risk revocation of their U.S. residence status. Each prospective EB-5 immigrant investor should consult a competent immigration attorney to review the likelihood that the investor's immigration objectives will be achieved.

SAMP

(b)(4)

USE OF PROCEEDS

SAMPLE

MANAGEMENT OF GTA

The following is a description of the business backgrounds of the executive officers of GTA:

Terry McAuliffe, Chairman

Mr. McAuliffe is the Chairman of GTA. He has been a long time investor and promoter of affordable green energy projects. It is at his direction that GTA has set its goal to truly meet a higher standard among our peers stating that "no green technology is green unless it is affordable to average consumers."

Before joining GTA, Mr. McAuliffe has been a longtime business leader and successful entrepreneur for nearly four decades. He has successfully started over two dozen companies in the fields of banking, real estate, securities, marketing, renewable energy and insurance. At the age of 14, Mr. McAuliffe started his first business, McAuliffe Driveway Maintenance, where he sealed residential driveways and commercial parking lots in his local community of Syracuse, New York. In January 1988, when he was only 30 years old, Mr. McAuliffe became the youngest chairman of a federally chartered bank in the history of the United States.

Mr. McAuliffe also served as Chairman of American Heritage Homes, one of Florida's largest homebuilding companies, as well as President of American Capitol Management Company, a major developer of real estate projects. He has been an active investor in the alternative energy field for over a decade.

In addition to his successful business career, he is a longtime political leader for the Democratic Party in the United States. He started his political career in the 1980 Presidential reelection campaign of President Jimmy Carter, and at the age of 22 became the national finance director for that campaign. He then served as National Finance Chairman of the Gephardt for President committee, National Finance Chairman and the National Co-Chairman of the Clinton-Gore re-election committee. In 1993, he was named by President Clinton as Ambassador and Commissioner General of the Korean International Exposition. He was Chairman of the 53rd Presidential Inaugural Committee and Chairman of the White House Millennium Celebration. In 2000, he chaired the Democratic National Convention in Los Angeles. He was elected Chairman of the Democratic National Committee from 2001 to 2005. He is widely credited with rebuilding, reenergizing and revitalizing the Democratic Party. As Chairman of the DNC, he shattered all Party records by raising over $535 million. He also served as Chairman of the 2008 Hillary Clinton Presidential campaign. In 2009, he unsuccessfully ran for Governor of the State of Virginia.

Chairman McAuliffe received a Juris Doctor degree from Georgetown University School of Law and a bachelors degree from The Catholic University of America in Washington, D.C.

SAMPLE

THE EB-5 PROGRAM

Overview

In 1990, the U. S. Congress created the employment based 5th preference (EB-5) immigrant investor visa program. The EB-5 program offers 10,000 immigrant visas a year to qualified investors who wish to obtain residence in the United States by investing in businesses that will benefit the economy and create jobs. The EB-5 Immigrant Investor Regional Center Pilot Program ("The Pilot Program") was created by Congress in 1992 and sets aside 3,000 of the 10,000 EB-5 visas each year for people who invest in designated "regional centers."

Once a qualifying investment has been made in a regional center, an investor files a Form I-526 Immigrant Petition by Alien Entrepreneur, ("Form I-526") with the USCIS. After the USCIS approves I-526 petition, an investor files an adjustment of status application if he or she is already in the U.S. in valid non-immigrant status or ii) applies for an interview and entry visa at a U.S. embassy or consulate abroad ("consular processing"). When an adjustment of status application is approved, a conditional residence status of two years will be given to the investor. If the investor pursues consular processing, upon approval the investor and his or her family will be issued an EB-5 entry visa to the U.S. Once they enter the U.S., the two-year conditional residence status starts.

At the end of the two-year conditional resident period the investor must show that his or her investment has been sustained and the projects invested in by the regional center have created at least ten jobs for each investor. Assuming the investor provides that evidence, the USCIS will remove the conditional residence status, and the investor will receive his or her permanent residency status.

The Immigration Process

The Fund's primary role in the immigration process is to sell interests in the Fund to immigrant investors (which allow the investors to file Form I-526) and invest the investors' capital in a manner that is consistent with the EB-5 program and leads to the creation of at least ten jobs for each Unit holder in the Fund. If GTA's proposed business plan succeeds, our independent economist's report indicates that GTA will create enough jobs to meet the EB-5 program requirements for every investor in the Fund. The rest of the immigration process will be led by the immigrant investor and his or her independent immigration counsel. The management company will maintain a current record of jobs created by the Fund's investment activities. The management company will assist each Unit holder by providing information about job creation to the USCIS in the manner required by the EB-5 program. Upon the initial conditional residency filing, the Fund will certify to the USCIS with respect to the projected number of jobs that will be created. Two years after an immigrant investor is granted conditional resident status, the investor must file with the USCIS Form I-829, Petition by Entrepreneur to Remove Conditions ("Form I-829") to convert his or her status to permanent residency. At that

DRAFT

time, the Fund will allocate to each Unit holder ten jobs from those jobs created and maintained by GTA.

Frequently Asked Questions

The following are some frequently asked questions about the EB-5 program, along with answers to the questions:

How much do I need to invest to receive conditional and ultimately permanent residency status for myself and my family members?
If you invest in a regional center, like ours, you need to invest $500,000 if the investment is made in a high unemployment or rural area. There are also other fees such as legal fees for your immigration and tax counsel and application fees paid to USCIS.

What is the region covered by the Gulf Coast Funds Management regional center?
Our regional center covers the entire Commonwealth of Virginia.

Do I have to live in Virginia to participate in this program?
No. You do not have to live in Virginia. You do not even have to ever visit the region.

(b)(4)

What do I have to do to get my visa application approved?
Normally, you will get an American immigration lawyer to help you in the visa application process. If you do not have an immigration lawyer, the Placement Agent suggests that you use David Lu, Esq., an immigration lawyer with whom we work with on a regular basis. The lawyer will help you file a Form I-526. With your Form I-526, you will have to submit proof that the source of your $500,000 investment is lawful.

Once the USCIS approves your Form I-526 you will need to adjust your status if you are already living in the U.S. in non-immigrant status or you will have to schedule an interview at a U.S. embassy or consulate abroad. In either case, you will have to submit the same type of documentation that other visa applicants to the United States are required to submit. Here is a general description, from the U.S. government's web site, of certain requirements for receiving a visa:

VISA INELIGIBILITY / WAIVER
The immigration laws of the United States, in order to protect the health, welfare, and security of the U.S., prohibit the issuance of a visa to certain applicants. Examples of applicants who must be refused visas are those who: have a communicable disease, or have a dangerous physical or mental disorder; have committed serious criminal acts; are terrorists, subversives, members of a totalitarian party, or former Nazi war criminals; have used illegal means to enter the U.S.; or are ineligible for citizenship. Some former exchange visitors must live abroad for two years. Physicians who intend to practice medicine must pass

a qualifying exam before receiving immigrant visas. If found to be ineligible, the consular officer will advise the applicant of any waivers.

OTHER IMPORTANT INFORMATION

Documents for Visa Application

All applicants must submit certain personal documents such as passports, birth certificates, police certificates, and other civil documents, as well as evidence that they will not become public charges in the United States. The consular officer will inform visa applicants of the documents needed as their applications are processed.

Medical Examinations

Before the issuance of an immigrant visa, every applicant, regardless of age, must undergo a medical examination. The examination will be conducted by a physician designated by the consular officer. Examination costs must be borne by the applicant, in addition to the visa fees.

Visa Fees

The cost of each immigrant visa application may vary for additional visa fees apply. For up to date immigration visa fee costs, please consult your immigration attorney or please visit the USCIS fee schedule web page.

Source: www.uscis.gov

(b)(4)

When will my visa become permanent?

Two years after you receive your conditional resident status, you must apply for permanent residency. At that time, we will supply documents for your Form I-829 petition to show that your money has been invested in the region and that the Fund's investment has created at least ten jobs. Once your application is approved, you will

become a permanent resident of the United States, and may soon apply for full citizenship if you desire.

(b)(4)

(b)(4)

SAMPLE

CERTAIN U.S. FEDERAL INCOME TAX CONSIDERATIONS

The following discussion about certain U.S. federal income tax and other tax considerations that you should weigh prior to investing in a Unit is merely a presentation of certain tax issues that generally apply to all investors in EB-5 funds. You should not consider this discussion to be tax advice, applicable to your particular situation or a full discussion of all material United States, state, local and foreign tax consequences of an investment in the Fund or your status as U.S. tax resident or non-resident and you should consult with your personal tax advisor about these, and all other issues relevant to your personal decision to invest in a Unit. Neither the Fund nor the management company is qualified to provide the tax advice you will need. You cannot use this summary for the purpose of avoiding United States federal tax penalties.

The following discussion is based upon the Internal Revenue Code of 1986 (the "Code"), the applicable Treasury Regulations promulgated or proposed under the Code (the "Regulations"), current positions of the IRS contained in published revenue rulings and revenue procedures, current administrative positions of the IRS, and existing judicial decisions, as in effect on the date of this Memorandum, all of which are subject to change or modification, with or without retroactive effect, at any time.

No assurance can be given as to the future status of federal income tax laws or other tax laws as they pertain to limited liability companies of the type described herein. It is likely that changes to the Code will be proposed in the future. The effect of such proposals on the Fund and on an investment therein cannot be analyzed. Accordingly, potential investors are urged to consider on-going developments regarding changes in the federal income tax law and other tax laws and to consult their own advisors in assessing the risks associated with an investment in the Fund.

Classification of the Fund

The Fund will be treated as a partnership for federal income tax purposes under the "check the box" Regulations. Under these regulations, an unincorporated domestic entity, such as the Fund, with at least two members will be taxed as a partnership if no election is made to be taxed as a corporation. Accordingly, the discussion herein relating to partnerships and partners generally will be applicable to Unit holders in the Fund.

Partnership Taxation in General

Under the Code, a partnership pays no federal income tax, although it may be required to withhold and pay taxes on behalf of certain of its partners. Rather, each partner reports on his federal income tax return his distributive share of all items of income, gain, loss, deduction, credit and tax preference of the partnership, whether or not the partnership makes any actual distribution to the partner during the taxable year. Thus, it is possible that distributions from the Fund will not be sufficient to pay tax liabilities with respect to the tax income and gain allocated to a Unit holder and that the only source of payment of such tax liabilities would be from the Unit holder's funds from sources

other than the Fund.

The extent to which a Unit holder may utilize Fund losses in any tax year is limited to the adjusted tax basis of his interest in the Fund at the end of the Fund tax year (See "Basis of Units"). In addition, a Unit holder may not deduct Fund losses in excess of the amount the Unit holder is considered "at risk" with respect to the Fund under Code Section 465 (See "At Risk Limitations"). A Unit holder generally may use his distributive share of any partnership losses allowable after applying the foregoing loss limitation only to offset his income from other passive sources (see "Passive Activity Loss Limitations").

Basis of the Units

A Unit holder's initial tax basis for his Units will be the amount of money he contributes to the Fund.

A Unit holder's basis is his Units increased by (a) his share of the non-recourse liabilities of the Fund, and (b) his share of profits. The adjusted tax basis of his Units will be decreased, but not below zero, by (1) distributions to the Unit holder by the Fund; (ii) reductions in his share of the non-recourse obligations of the Fund; (iii) his share of the losses of the Fund; and (iv) his share of Fund expenditures not chargeable to his capital account.

Under Regulation Section 1.752-1(a)(2), a partnership liability is a non-recourse liability to the extent that no partner or related person (for the purpose of Regulation Section 1.752-4(b)) bears any economic risk of loss. A partnership liability generally is not considered non-recourse to the extent that any partner guarantees the payment of such liability. If a Unit holder or a "related" person guarantees all or a portion of the non-recourse liabilities of the Fund, the other Unit holders' tax basis in their Units will not include such guaranteed portion of the Fund's non-recourse liabilities.

Similarly, if a partner or a person related to a partner loans funds to a partnership and the other partners are not personally liable for the repayment of the loan, only the lending partners may include that loan in the basis of their partnership interests. For example, if a Unit holder or one of his affiliates makes a loan to the Fund, the other Unit holders would not include any portion of such a loan in the basis of their Units.

The Fund may be a "tiered" partnership if it owns interests in other entities taxed as partnerships for federal income tax purposes. With respect to "tiered" partnerships, the Regulations provide that the "upper-tier" partnership's share of the liabilities of the "lower-tier" partnership will be treated as liabilities of the upper-tier partnership for purposes of applying Code Section 752 to the partners of the upper-tier partnership (Regulation Section 1.752-4(a)).

If a Unit holder's basis in his Units is reduced to zero, the amount of any distributions (including any deemed distributions due to a reduction in Fund non-recourse

liabilities) in excess of his share of the Fund's taxable income for the year will be treated as capital gain, except to the extent that ordinary income treatment is required for his *pro rata* share of depreciation recapture.

A partner may not deduct his share of losses of a partnership to the extent such losses exceed the partner's basis for his interest in the partnership. Any losses that are not currently deductible by a partner due to this limitation may be deducted when and to the extent the partner's basis is increased (for example, by the allocation of partnership income). The ability of a partner to claim his share of partnership losses will also depend on the impact of the "at risk" rules of Code Section 465 (see "At Risk Limitations") and the passive activity loss limitation rules of Code Section 469 (see "Passive Activity Loss Limitations").

Allocations of Profits and Losses

Under Code Section 704, a partner's distributive share of the income, gain, loss, deduction, or credit of a partnership is determined by reference to the partnership agreement, unless the allocation contained in the agreement does not have "substantial economic effect," in which case the allocation is determined by reference to the partners' interests in the partnership, taking into account all facts and circumstances.

Although it is intended that the Fund's allocations will be in accordance with the Unit holders' interests in the Fund, it is possible that the Internal Revenue Service will challenge the Fund's tax allocations and attempt to reallocate tax items among the Unit holders. Any such reallocations of tax items may have adverse tax and financial consequences to a Unit holder.

"At Risk" Limitations

Code Section 465 limits the amount of losses that a partner can deduct in a particular year to the amount that such partner is considered "at risk" at the close of the partnership's taxable year. Generally, a taxpayer is considered "at risk" to the extent of (i) the amount of money and the adjusted basis of property he contributes to an activity, plus (ii) any amounts borrowed with respect to an activity for which the taxpayer is personally liable or for which the taxpayer has pledged property (other than property used in the activity) as security. A taxpayer will generally not be considered "at risk" with respect to amounts protected against loss through non-recourse financing, guarantees, stop loss agreements or similar arrangements.

A taxpayer generally is not considered to be "at risk" for non-recourse obligations. Losses not deductible by reason of the "at risk" rules may be carried forward indefinitely and deducted at such time as the taxpayer becomes "at risk" to a greater extent with respect to the activity.

Passive Activity Loss Limitations

Code Section 469 generally provides that losses attributable to "passive activities" may be used only to offset income from passive activities. Code Section 469 applies to individuals, estates, trusts, personal service corporations (corporations providing services that are substantially performed by owner-employees), and closely-held corporations (corporations having 5 or fewer shareholders who own more than 50% in value of the stock).

Code Section 469 defines a "passive activity" as (i) the conduct of a trade or business in which the taxpayer does not materially participate or (ii) any rental activity (without regard to participation). Under Code Section 469, the interest of a limited partner in a limited partnership is not considered an interest with respect to which a person materially participates, except as provided in regulations. Accordingly, a Unit holder's investment in the Fund will be a passive activity, and any Fund losses allocated to the Unit holders will constitute passive losses.

Under Code Section 469, passive losses generally may be used only to offset passive income until the taxable year in which the taxpayer disposes of his interest in the activity producing the passive losses.

Passive income is defined as the income from passive activities. Passive income does not include (i) income received as salary or wages; (ii) income derived from a trade or business in which the taxpayer materially participates ("active income"); (iii) interest, dividends, annuities or royalties ("portfolio income") not derived in the ordinary course of business; (iv) gain or loss from the disposition of property used in the ordinary course of business producing portfolio income; or (v) gain or loss from the disposition of property held for investment which is not considered to be an interest in a passive activity.

Passive losses that are not deductible in a particular year may be carried forward indefinitely and used to offset passive income in subsequent years. In addition, upon a fully taxable disposition of a taxpayer's entire interest in the passive activity (other than to a related party), any unused passive losses from the activity for the year that have been carried forward, and the loss, if any, on the disposition, may be applied first to offset any income from that activity for the year (including the gain, if any, from the disposition); second, to offset any other passive income for the year; and third, any remaining unused passive losses from the activity may be used to offset the taxpayer's active and portfolio income.

Based on the foregoing, a Unit holder may use any Fund losses allocated to him only to offset his passive income. If the Fund losses are not fully deductible in the year incurred, they may be applied against passive income (that is not portfolio income) in future years. If any unused losses from the Fund remain when the Unit holder disposes of his entire interest in the Fund, these losses may be used in full at such time, first against passive income, and then against any other income of the Unit holder.

The foregoing analysis assumes that the Fund constitutes a single "activity" for purposes of Code Section 469. If the Fund consisted of more than one activity, the passive activity loss limitations would apply separately to each such activity.

The Regulations provide flexibility in grouping a taxpayer's trade or business activities and rental activities for purposes of applying the passive activity rules. In this respect, one or more trade or business activities or rental activities may be treated as a single activity if the activities constitute an appropriate economic unit for the measurement of gain or loss for the purposes of Code Section 469. However, generally rental activities may not be grouped with a trade or business activity. Further, a taxpayer that owns an interest as a limited partner or limited entrepreneur (e.g., a member of an LLC who does not actively participate in the management of the LLC) may not group the following activities with any other activity: (i) holding, producing or distributing motion picture films or video tapes, (ii) farming, (iii) leasing personal property, (iv) exploring for or exploiting oil and gas resources, and (v) exploring for or exploiting geothermal deposits. A partnership must group its activities under the rules of the Regulations and once the partnership groups its activities, the partner may group those activities with each other, with activities conducted directly by the partner, and with activities conducted through other C corporations subject to Code Section 469, S corporations and partnerships, except that a partner may not treat activities grouped together by any 469 entity as separate activities.

Whether or not the Fund's activities are aggregated into a single activity should not affect a Unit holder's ability to offset passive losses from one Fund activity against passive income of another Fund activity. However, any previously suspended passive losses from a particular activity that is part of a single activity will not become deductible against non-passive income upon a disposition of that particular activity alone, but only upon a taxable disposition by the Fund of all of its interest in the single activity, or the Unit holder's disposition of his Units. Further, the Fund's debt investments or equity investments in C corporations may produce interest income or dividend income, respectively, that is classified as portfolio income for purposes of Code Section 469, and the Fund's other equity investments may produce losses classified as passive under Code Section 469, and in this situation a Unit holder's share of passive losses may not be utilizable to offset his share of portfolio income.

Distributions

Distributions (which include any deemed distribution arising from a reduction, by repayment or otherwise, in Fund liabilities) made to a Unit holder generally do not result in any recognition of gain for federal income tax purposes to the extent the amount of cash or debt reduction does not exceed the basis of the Unit holder's Units. A Unit holder's adjusted tax basis in his Units is reduced by the amount of the distribution. Distributions of cash (including reductions in liabilities) by the Fund in excess of a Unit holder's adjusted tax basis in his Units will result in the recognition of gain to the extent of such excess. Such gain is considered gain from the sale or exchange of the Units by

the Unit holder and in certain cases may be treated in part as ordinary income because of the depreciation recapture provisions. (see "Sale or Disposition of Units").

Sale or Disposition of Units

Upon a sale of a Unit, a Unit holder will realize gain or loss in an amount equal to the difference between the amount realized and his adjusted tax basis in the Unit. Under Code Section 751(a), any gain realized by a selling partner is taxed as ordinary income to the extent of the partner's *pro rata* share of "ordinary income assets" of the partnership. The balance of gain, if any, or the loss is treated as a capital gain or loss. In determining the amount received upon the sale or exchange of a Unit, a Unit holder must include, among other things, his allocable share of the outstanding amount of the indebtedness to which the Fund's property is subject. Therefore, it is possible that the gain realized on the sale of a Unit may exceed the cash proceeds of such sale. As a result, in some cases, the income taxes payable with respect to such gain may exceed such cash proceeds.

Certain Deductions to Be Claimed

Organization, Start-Up and Syndication Costs. Under the Code, neither a partnership nor its partners may deduct amounts paid or incurred in the promotion and sale of the interests in the partnership ("syndication" expenses), including those amounts paid as commissions, professional fees, and printing costs. These expenses must be capitalized and may not be amortized. Under the Regulations, the following expenses constitute non-deductible syndication expenses which must be capitalized and not amortized: (i) brokerage fees; (ii) registration fees; (iii) legal fees for securities advice and advice pertaining to the adequacy of tax disclosures in the offering memorandum for securities law purposes; (iv) accounting fees for the preparation of representations to be included in the offering memorandum; and (v) costs of printing the offering memorandum.

However, to the extent a partnership pays or incurs organizational expenses incidental to the creation of the partnership or start-up expenditures with respect to an active trade or business, the partnership generally may elect to capitalize such expenditures and amortize them ratably over a period of not less than 180 months, commencing in the month in which the partnership begins business. Organizational expenses include (i) legal fees for services incidental to the organization of the partnership, such as the negotiation and preparation of a partnership agreement; (ii) accounting fees for services incidental to the organization of the partnership, and (iii) filing fees. On the other hand, organizational expenses do not include (i) expenses incurred in connection with the acquisition of partnership assets or the transfer of assets to the partnership; (ii) syndication expenses; and (iii) certain other expenses. Start-up expenditures include (i) certain expenses related to the investigation of the creation or acquisition of an active trade or business; and (ii) expenses paid or incurred pursuant to the creation of an active trade or business, which expenses would be deductible if they were incurred after the commencement of the particular business operation to which they relate.

The Fund has incurred organizational expenses which it will elect to amortize over 180 months. Additionally, the Fund has incurred or may incur start-up expenditures which the Fund, if it is eligible to do so, intends to amortize over a 180 month period. Any costs incurred by the Fund associated with offering of the Units will be capitalized by the Fund as non-deductible syndication costs.

Other Limitations on Deductions. Other limitations may apply to reduce or eliminate the deductibility by a Unit holder of his share of the Fund's expenses, including fees paid to the management company. For example, to the extent deductions of the Fund are deemed not to be incurred in connection with a business, they will be treated as miscellaneous itemized deductions that, in the case of Unit holders, are deductible only to the extent that, when taken together with other similar deductions, they exceed 2% of the Unit holder's adjusted gross income. Also, miscellaneous itemized deductions are not deductible by a Unit holder in computing the Unit holder's alternative minimum tax.

Certain Tax Consequences to Non-United States Investors

Foreign Individuals Potentially Subject to U.S. Tax on Their Worldwide Income. Individuals who are not citizens of the United States but who are treated as "residents" of the United States for federal income tax purposes are subject to United States federal income tax on their worldwide income, including but not limited to their income from the Fund. For this purpose, an individual who is a lawful permanent resident of the United States (e.g., a holder of a "green card") generally will be treated as a resident. In addition, an individual who is not a lawful permanent resident under the immigration laws may nevertheless be a "resident" for tax purposes based upon a "substantial presence" in the United States as defined under Code Section 7701(b). For example, under that Code Section, an individual may be a "resident" if the individual is physically present in the United States on all or any part of a certain number of days, determined under a formula, within a three-year testing period. An individual present in the United States under certain types of temporary visas (e.g., teachers or students) may be excepted from the "substantial presence" test, but the determination whether an individual is a resident can be a complex determination. Potential investors who are foreign individuals should consult with their own tax advisors to be certain of their tax status under United States law.

Taxation of Non-U.S. Individuals Not Treated as Tax Residents. Potential investors who are neither citizens nor residents (as determined for tax purposes) of the United States ("Non-U.S. Investors") are subject to additional tax rules. Generally, Non-U.S. Investors are taxable on certain United States source passive investment income ("FDAP"), including dividends, interest and rents, at a flat rate of 30% on the gross amount of such income, without reduction for any expenses or other tax deductions, and that tax is satisfied by withholding of tax on payments of such amounts to the Non-U.S. Investors. In the case of a partnership, the partnership generally will be required to withhold based on the share of its FDAP allocable to its Non-U.S. Investors. The 30% tax on the gross amount of FDAP may be reduced or eliminated if the Non-U.S. Investor

is a resident of a country with which the United States has a bilateral income tax treaty, provide that the Non-U.S. Investor submits timely certification of his entitlement to treaty relief. Certain other exceptions apply which may reduce or eliminate the tax on certain types of FDAP, including interest income. Non-U.S. Investors generally are not subject to tax on capital gains unless either (1) the gains are attributable to a United States trade or business or (2) the Non-U.S. Investor is an individual who is present in the United States for more than 183 days during the taxable year in which the gains are realized.

The 30% taxation of FDAP will not apply to any income that is effectively connected with the active conduct of a trade or business within the United States. The net income from such a trade or business within the United States realized by a Non-U.S. Investor will be subject to tax at the regular graduated income tax rates applicable to resident individuals. Such income currently will be subject to income tax withholding, generally at a rate of 35%. A Non-U.S. Investor who realizes any such income will be required to file a United States federal income tax return with respect to the taxable year in which the income is realized.

A Non-U.S. Investor in the Fund who is allocated a share of passive income (including capital gain) or active trade or business income realized by the Fund will be subject to tax under the above rules as if such Non-U.S. Investor had realized such income directly. Any withholding of federal income taxes by the Fund attributable to a Non-U.S. Investor will be treated as a distribution to that particular Unit holder.

THE FOREGOING IS NOT A COMPLETE DISCUSSION OF ALL OF THE FEDERAL INCOME TAX CONSEQUENCES TO A NON-U.S. INVESTOR; THERE ARE STATE AND LOCAL TAX AND ESTATE TAX CONSEQUENCES TO BE CONSIDERED. ALSO, FOREIGN TAXES MAY BE IMPOSED ON A NON-U.S. INVESTOR'S INCOME FROM THE FUND. INVESTORS ARE STRONGLY ADVISED TO CONSULT WITH THEIR TAX ADVISORS WITH RESPECT TO THE TAX CONSEQUENCES OF AN INVESTMENT IN THE FUND.

Compliance Matters

Tax Returns/Audits. The Fund will furnish annually (and in certain circumstances, periodically) to each of the Unit holders sufficient information from the Fund's tax return for the Unit holders to prepare their own federal income tax returns.

The tax treatment of items of partnership income, loss, deduction, and credit will be determined at the partnership level. In addition, all partners are required, on their individual federal income tax returns, to treat partnership items in a manner that is consistent with the treatment of such items on the partnership's return.

The tax matters partner for the Fund will be the management company. The tax matters partner is required to, among other things, keep the other partners informed of all administrative and judicial proceedings and represent the Fund in such proceedings. The

tax matters partner is authorized to obtain judicial review of any proposed readjustment of partnership items. Although every partner with an interest in the outcome is allowed to participate in an action filed by the tax matters partner, the outcome of that proceeding will bind all partners. If the tax matters partner fails to seek judicial review of a proposed adjustment of partnership items, other partners may seek such review, provided that there can be only one judicial proceeding with respect to a partnership. The foregoing procedures may adversely affect a Unit holder's ability to deal with adjustments to his income tax return resulting from adjustments made with respect to the Fund.

If any of the tax returns of the Fund are audited, it is possible that substantial legal and accounting fees will have to be paid to substantiate the position of the Fund, and such fees would reduce the cash otherwise available to meet Fund obligations or for distribution to the Unit holders. Such an audit may result in adjustments to each Unit holder's income tax return. An audit of the Fund's tax returns may also result in an audit of non-partnership items on each Unit holder's income tax returns, which in turn could result in adjustments to such items. The costs incurred by a Unit holder in connection with an IRS audit of his income tax return will be borne solely by that Unit holder.

State and Local Taxes

In addition to federal income taxes, the Fund and the Unit holders may be subject to other taxes imposed by various jurisdictions, such as state and local income taxes. Although a detailed analysis of these various taxes is not presented here, investors should consider the potential state and local tax consequences of an investment in the Fund. For example, a Unit holder's distributive share of all or a portion of Fund income, gains, losses and deductions, profits and losses, may be required to be included in determining his income subject to tax under the laws of the state or locality in which he is a resident, as well as jurisdictions in which the Fund does business.

For example, with respect to Unit holders who are not residents of the Commonwealth of Virginia, if the Fund has Virginia source income allocated to such Unit holders, the Fund will be required to file composite returns and make composite payments of tax on behalf of all of its Unit holders who are not residents of Virginia. The current rate of the Virginia composite tax is [_____]% and any composite payment on behalf of a non-resident Unit holder will be treated by the Fund as a distribution to the non-resident Unit holder.

The Commonwealth of Virginia also requires a partnership to withhold income tax on a non-resident partner's allocable share of Virginia source income. The Fund will withhold at the required withholding rate (currently [_____]%) of Virginia source income allocable to Unit holders who are not residents of Virginia. Any such withholding will be treated by the Fund as a distribution to the non-resident Unit holder. The withholding by a partnership does not relieve the non-resident partner of his obligation to file a Virginia income tax return. A partnership is allowed to file a composite return on behalf of non-resident partners who have no activity in Virginia other than that from the partnership. If a composite filing is allowable with respect to a

non-resident partner and the composite return is properly filed and all taxes, including applicable interest and penalty is paid, the individual non-resident partner is relieved of his separate individual filing requirement. If the Fund elects to file a composite return on behalf of any non-resident Unit holders, the composite tax payment attributable to the non-resident will be treated as a distribution by the Fund to that non-resident Unit holder.

The Fund intends to supply the Unit holders with information regarding their income, if any, derived from various jurisdictions in which the Fund does business. Unit holders are urged to consult with their own tax advisors regarding state and local tax laws.

U.S. Federal Estate and Gift Taxation

U.S. residents generally are subject to federal estate taxes on their taxable estates at death which includes the value at the time of a decedent's death of all of his property, real or personal, tangible or intangible, wherever situated. Additionally, U.S. residents are subject to gift taxes on the transfer of any property by gift. U.S. estate taxes can also apply to a Non-U.S. Investor to tax that part of his gross estate which at the time of his death is situated in the United States. For example, shares of stock in a domestic U.S. corporation owned by a non-resident alien are treated as property situated in the United States for purposes of this provision. Further, the IRS has ruled that a partner's interest in a partnership is situated where the partnership's business is carried on for purposes of applying the U.S.-United Kingdom Estate Tax Convention. Thus, a Unit in the Fund held by a Non-U.S. Investor could possibly be subject to U.S. estate tax on the death of the Non-U.S. Investor.

Additionally, state and local taxing jurisdictions may also impose state, inheritance and/or gift taxes on their residents or on property deemed situated within their respective jurisdictions.

4. Using the IMPLAN Model to Calculate National Multipliers

The IMPLAN model is a regional input/model developed and maintained by the Minnesota IMPLAN group, headquartered in Minneapolis. The basic model was originally developed by the USDA Forest Service in cooperation with the Federal Emergency Management Agency and the USDI Bureau of Land Management.

The IMPLAN model has certain similarities with the RIMS (Regional Input/Output Modeling system) model developed by the Department of Commerce, but is generally thought to contain several superior features besides its greater ease and flexibility of use. These improvements can be summarized as follows:

1. The Commerce Department is not permitted to publish data in any category where there are less than three organizations in a given economic area. IMPLAN has developed an algorithm to fill in the missing numbers.

2. IMPLAN has introduced improved methods of accounting for flows of goods and services among counties.

3. IMPLAN permits aggregation of any subset of industries for calculation and tabular purposes. This is useful when results are desired for, say, 1-digit industries instead of the 509 industries actually found in the input/output table.

4. As seen in the tables throughout this text, IMPLAN estimates three separate effects, labeled "direct", "indirect" and "induced". The direct effects are those entered by the user. The other two columns represent the multiplier effects, but they are usually combined in other input/output models. Briefly, the indirect effect represents purchases made by businesses when their sales rise. For example, a restaurant might order more food produced or sold in the region, or an automobile plant might order more steel. The induced effect represents the additional household spending because income has risen. For example, casino workers would spend their paychecks on various goods and services, some of which are produced in the region. In general, then, the larger the region under consideration, the larger the multipliers would be.

The following material, taken from the IMPLAN manual, describes the input/output process in more detail.

Input/output analysis is a means of examining relationships within an economy, both between businesses and between businesses and final consumers. It captures all of the monetary market transactions for consumption in a given time period. The resulting mathematical formulae allow examination of

the effects of a change in one or several economic activities on an entire economy.

A descriptive model includes information about local economic interactions known as regional economic accounts. These tables describe a local economy in terms of the flow of dollars from purchasers to producers within the region. The initial IMPLAN data details all purchases, including imported goods and services. When regional economic accounts are created, imports to the region are removed from the initial data, allowing examination of local inter-industry transactions and final purchases.

The regional economic accounts are used to construct local level multipliers. Multipliers describe the response of the economy to a stimulus (a change in demand or production). The multipliers represent the Predictive Model.

Purchases for final use (final demand) drive an input/output model. Industries producing goods and services for consumption purchase goods and services from other producers. These other producers, in turn, purchase goods and services. These indirect purchases (or indirect effects) continue until leakages from the region (imports, wages, profits, etc.) stop the cycle.

The indirect effects and the effects of increased household spending (induced effects) can be mathematically derived as sets of multipliers. The derivation is called the Leontief inverse. The resulting sets of multipliers describe the change of output for each industry caused by a one dollar change in final demand for any given industry.

The input/output analysis framework is similar to a financial accounting framework that tracks purchases of and expenditures on goods and services in dollars. Input/output accounting traces the flow of dollars between businesses and between businesses and final consumers. An input/output accounting framework can be illustrated using classic financial accounting T-accounts, which include receipts (income) and expenditures (expenses) on each side of a "T", as shown below.

Final Consumption (or final demand) drives input/output models. Industries respond to meet demand directly or indirectly, by supplying goods and services to industries responding directly. Each industry that produces goods and services generates demands for other goods and services, and so on. Multipliers describe these iterations.

There are three different multipliers developed for predictive modeling: Type I, Type II, and Type SAM. We start with the transactions table and derive a coefficient by dividing each industry column by the column total. This coefficient matrix is also known as the ***A Matrix***.

Appendix B. Resume of Dr. Michael K. Evans

CURRENT AND PREVIOUS POSITIONS

• Chairman, *Evans, Carroll & Associates, Inc.*, 1980-present (previously Evans Economics)

Economic consulting firm specializing in EB-5 immigration analysis, economic impact studies of development projects and new construction, models of state and local tax receipts, impact of current and proposed government legislation, and construction of econometric models for individual industries and companies.

• Chief Economist, *American Economics Group*, 2000-present.

Built a comprehensive state modeling system that provides economic analysis for a variety of consulting projects (see below).

• Clinical Professor of Economics, Department of Managerial Economics and Decision Sciences (MEDS), Kellogg Graduate School of Management, Northwestern University, 1996-99.

Taught courses in macroeconomics and business forecasting. Wrote textbooks for both courses.

• Winner of Blue Chip Economic Indicator Award for most accurate macroeconomic forecasts during the past four years, November 1999

• Founder and President, *Chase Econometric Associates*, 1970-1980

• Assistant and Associate Professor of Economics, Wharton School, University of Pennsylvania, 1964-69. Co-developer of the original Wharton Model.

• Visiting Professor, Radford University, (Radford, VA), 1987

Chairman of Institute for International Economic Competitiveness

• Visiting Lecturer, Hebrew University (Jerusalem), 1966-67

Built econometric model of the Israeli economy

Ph. D. in Economics, Brown University. Dissertation, "A Postwar Quarterly Model of the United States Economy, 1948-1962". A. B. in Mathematical Economics, Brown University

PREVIOUS ACTIVITIES AND EDUCATION

- Contributing Editor, *Industry Week*

Wrote a column in each issue on economic and financial trends as they impact the mfg sector.

- Editor, *The Evans Report*

Weekly newsletter discussing economic trends and financial markets. Pioneered the concept of the Monthly Tracking Model to incorporate recent economic releases into the overall economic forecast, including methods to predict these economic data.

- Consultant, *National Printing Equipment and Supply Association*

Prepares quarterly forecasts of shipments of printing equipment and graphic arts supplies by product line, based on an econometric model constructed for NPES. Also prepares analysis and forecasts of exports and imports by principal product line.

- Consultant, *APICS -- The Educational Society for Resource Management*,

In 1993, designed and developed the *APICS Business Outlook Index*, which uses survey data collected by the Evans Group to measure current production, production plans, shipments, employment, new orders, unfilled orders, inventory stocks, and the comparison of the actual to desired inventory/sales ratio to predict short-term changes in mfg sector activity. The results of this survey appeared every month in *APICS: The Performance Advantage*

- Consultant, *American Hardware Mfg Association*

Wrote a separate weekly edition of the Evans Report analyzing recent trends in the hardware and housing industries, including forecasts of the hardware industry based on an econometric model developed for AHMA.

- Board of Economists, *Los Angeles Times*

Wrote column every 6 weeks (5 other economists on the Board)

- Columnist, *United Press International*

  Wrote twice-weekly column, "Dollars and Trends"

- Consultant, Senate Finance Committee,

  Built the first large-scale supply-side model of the U. S. economy

- Consultant, Environmental Protection Agency and Council on Environmental Quality

  Estimated inflationary impact of government regulations

- Consultant, National Aeronautics and Space Administration

  Estimate impact of R&D spending on productivity growth

- Consultant, U. S. Treasury

  Estimated impact of investment tax credit and accelerated depreciation on capital spending by industry

- Consultant, U. S. Department of Agriculture

  Built large-scale econometric model of agricultural sector of U. S. economy

- Consultant, Organization of Economic Cooperation and Development

  Built econometric model of the French economy

SAMPLE OF RECENT CONSULTING PROJECTS

A. Economic Impact of EB-5 Immigrant Investor Programs and New Markets Tax Credits

- Calculated the number of jobs created for a film production company in New York City.

- Calculated economic impact of small-scale rooftop solar panels in various counties in California.

- Calculated economic impact of 7 different types of proposed businesses for a proposed regional center in the Bay Area of California.

- Determined the economic impact of a new biological research park, office building, and logistics center in Wooster, Ohio.

- Calculated the economic effect of a mixed-use urban renewal project in Cleveland, Ohio.

- Calculated economic impact of 14 different types of proposed businesses for a proposed EB-5 regional center that would include the entire state of Florida.

- Calculated economic impact of dairy farm and cheese processing plant in Northern California.

- Determined economic impact of a shipyard, food processing plant, and semiconductor plant for a proposed regional center in Louisiana and Mississippi.

- Calculated the economic impact of a new gaming casino in Natchez, Mississippi.

- Calculated the economic impact of a retail shopping center in suburban Los Angeles County.

- Prepared an economic impact analysis for the "timber to homes" project for a proposed regional center in Colorado.

- Calculated the economic impact for a proposed regional center in Baltimore, Maryland that would include the rebuilding of depressed areas in East Baltimore and along the riverfront.

- Prepared the economic analysis for a proposed EB-5 regional center for the entire state of Florida that included impact calculations for 14 different types of industries.

- Prepared the economic analysis for a proposed EB-5 regional center in the San Francisco Bay area that included calculations for 10 different types of industries.

- Prepared economic impact calculations for proposed EB-5 regional centers in New York City and Northeastern New Jersey.

- Calculated the economic impact of a rehabilitated office building in Albuquerque, New Mexico, including the increase in high quality jobs.

- Calculated the economic impact of a rehabilitated skilled nursing center in East Los Angeles, California, including the impact on nearby census tracts.

- Calculated the economic impact of development of warehouse and light industrial mfg space in Las Vegas, Nevada.

- Calculated the economic impact of rehabilitation and expansion of a vacation and health spa in Sharon Springs, New York

- Calculated economic impact of revitalizing an old resort hotel and adding new facilities for Lake Geneva, WI.

- Calculated the employment and tax effects for a portfolio of projects undertaken under the New Market capital program.

- Calculated generic employment changes for proposed EB-5 project for an Inland Port in Palm Beach County, FL

- Calculated the economic impact of construction of El Monte Village in El Monte, CA.

- Built an input/output model of Guam to be used to calculate economic impact of EB-5 projects. Used this model to estimate impact of various proposed projects.

- Calculated the economic impact of moving the Social Security Administration building in Birmingham, AL, and revitalizing the surrounding neighborhood.

- Calculated the economic impact of rehabbing and expanding the Everett Mall in Everett, WA.

- Determined the economic impact of building a new medical center in Charleston, SC

- Calculated economic impact of expanding Sugarbush resort in Vermont. Study included expansion of existing facilities and addition of new facilities.

• Calculated economic impact for new market tax credit program in Portsmouth, N.H. Study included both overall economic impact, and the increase in employment and income and the decrease in the unemployment rate and incidence of poverty in individual census tracts.

• Calculated the economic benefits of EB-5 programs for foreign investors for a mixed-use construction project, including a hotel, retail stores, apartments, and a sports stadium in the Washington, D. C. metropolitan area

• Calculated the economic benefits of EB-5 programs for foreign investors for a mixed-used retail shopping center in the New York City metropolitan area.

• Calculated the economic benefits of EB-5 programs for foreign investors for proposed shopping centers in five separate counties in Southern California, including differential impacts of building the shopping centers in different counties.

B. Projects for State and Local Governments

• Constructed an econometric model for the State of New York and determined the change in employment, labor income, and tax revenues for 43 different tax changes proposed by the Governor's office.

• Constructed a detailed econometric model for the State of Pennsylvania to determine the economic impact of the complete panoply of state taxes levied; the model contains over 1,000 equations. In cooperation with American Economics Group, the model was developed to simulate the effect of changes in any state tax rate on households and businesses by income deciles, household status, age of individuals, size of households, and many other demographic variables. The change in business taxes can also be simulated for detailed industry classifications.

• Determined whether the Washington, D.C. water and sewer authority should accept a high bid for a new waste disposal system. Decision to reject has saved the authority over $200 million, as construction prices turned down sharply as predicted.

• Built an econometric model to determine the "tax gap" caused by Internet sales for the state of Minnesota.

• Determined appropriate levels of shelter grants individual counties in New York State, and for utility allowances in New York City. Reviewed and prepared testimony in ongoing court cases in these areas.

• Calculated the economic impact of the revitalization of downtown Milwaukee, Wisconsin.

C. Economic Impact of Casino Gaming

• Built an econometric model to predict the growth of the gaming industry over the next decade, and the economic impact of that industry on employment and tax revenues at the Federal and state levels.

• Estimated the economic impact of Indian casino gaming nationally and for the State of Wisconsin.

• Determined the economic impact of the Oneida Indian gaming casino on the Green Bay metropolitan area.

• Estimated the negative economic impact on the Milwaukee area if a new Indian gaming casino were to be built in Kenosha, Wisconsin.

D. Economic Impact of Smoking Bans and Higher Taxes

• Testified on economic impact of smoking bans in Canada; certified as an expert witness by the Court.

• Examined the impact of smoking bans on restaurant sales in several different locations in the U.S. to determine how much sales changed when these bans were imposed, and the differential effects depending on whether these bans were partial or total.

• Determined the cross-border effects on retail sales from differential rates in cigarette, gasoline, and alcohol excise taxes

• Determined the economic impact of higher cigarette taxes on minority group employment.

• Estimated the economic impact and loss of Federal and state tax revenues when higher cigarette prices lead to increased smuggling.

E. Consulting Projects for Travel and Tourism

• Built an econometric model to predict tourism trips and revenues for the major regions of the U.S. economy.

• Constructed econometric models to predict tourism in Las Vegas and Orlando.

• Using the IMPLAN model, predicted economic impact of tourism and travel expenditures for all counties in Pennsylvania.

F. Other Private Sector Consulting Projects

• Calculated the economic impact of proposed EPA bans on fluoropolymer production.

• Estimated the size and economic importance of the fluoropolymer industry, and calculated economic impact of shutting down domestic production.

• Built an econometric model to examine how U.S. tax and regulatory policies help determine whether the gold mining industry would invest in the U.S. or other countries. Testified before Congress to help defeat legislation inimical to the mining industry.

• Built an econometric model to predict consumer bankruptcies, based on recent growth in consumer credit outstanding, the overall economic environment, and recent changes in credit regulations

• Estimated the economic impact of the ethanol subsidy on the U.S. economy and Farm Belt States, including the impact on the balance of payments, employment, and tax receipts. Testified before Congress to help pass legislation to extent subsidies to the ethanol industry.

• Built an econometric model to determine the impact of updating and improving the system of locks on the Upper Mississippi River on corn prices and exports, farm income, and the overall economy.

Re: Amendment of GCFM Application to include Virginia Tobacco Regions

Dear Ms. Velarde:

Gulf Coast Funds Management, LLC (GCFM), an approved Regional Center pursuant to Section 610 of the Appropriations Act of 1993, respectfully requests to include additional geographical areas covering the tobacco-dependent localities in the Commonwealth of Virginia for the following industries: manufacturing, education and training, research and development, and wholesale trade (international). The tobacco region consists of 41 localities in the South Central and Southwest regions of Virginia ("Tobacco Region", see attached *Exhibit A*), which was established to revitalize tobacco-dependent communities.

Communities and citizens throughout the Tobacco Region continue to experience significant economic distress as a direct consequence of historical dependence on tobacco production, textile and furniture manufacturing and coal production.

The credit crisis and difficult economy have resulted in more severe job losses in the Tobacco Region, where unemployment rates have historically been higher than other regions in Virginia. The Virginia Employment Commission has designated many areas within the Tobacco Region as Targeted Employment Areas, thus enabling them to benefit from the Immigrant Investor Pilot Program to accelerate the economic recovery and transformation in those areas.

The proposed expansion of GCFM's geographic coverage area is derived from the existing hybrid automobile manufacturing plan administered (the "Project") by GCFM through Gulf Coast Automotive Investment Fund A-1 (GCAIF A-1). The Project has moved forward with great speed and tremendous support from state and local governments due to its significant potential job creation. The company, GreenTech Automotive, Inc.

JLF COAST FUNDS MANAGEMENT
650 Poydras St. Ste. 2830,
New Orleans, LA 70130

TELEPHONE: (504) 582-2244
FACSISMILE: (504) 582-2240

("GTA", formerly known as Hybrid Kinetic Automotive Corp) has recently revealed publicly its four prototype cars to be built in the United States, and broken ground on the construction of its manufacturing facilities in Tunica County, Mississippi. In the meantime, GTA has agreed to allocate part of its manufacturing operations, such as engine and transmission production, to the Tobacco Region, contingent on USCIS approval of this amendment application.

GCFM's request to amend its application to expand its geography to cover the Tobacco Regions in Virginia is based on the previously approved hybrid automobile manufacturing project managed by the same company, and merely re-allocates a portion of GTA's original planned production to Virginia. Therefore, the methodology for job multipliers described in the original independent economic study, which was approved by USCIS, should be applicable to the manufacturing facilities to be built in the Tobacco Region, and the overall impact would stay intact.

The EB-5 program is an effective way to attract private investment into the Tobacco Region, which would not only create many new jobs, but also provide much-needed diversification to the region's economy. The Virginia State government has thus far expressed strong support for the Project.

Therefore, GCFM respectfully requests the expansion of its geographic coverage area to include the entire Tobacco Region in Virginia, and the support of GTA in achieving its goal of manufacturing and distributing hybrid motor vehicles in the US.

Office of the Governor

Timothy M. Kaine
Governor

December 4, 2009

The Honorable Janet Napolitano, Secretary
Department of Homeland Security
Washington, DC 20536

Re: EB-5 Regional Center Amendment Application for Virginia Tobacco Regions

Dear Secretary Napolitano,

As we assess the employment statistics in Virginia during these difficult economic times, we see a continuing need to create jobs, particularly in the historically tobacco-dependent regions across southside Virginia.

I am writing in support of Gulf Coast Funds Management LLC's request that the Department of Homeland Security and the United States Citizenship and Immigration Services allow them to expand their coverage to include tobacco-dependent localities in Virginia for the following industries: manufacturing, education and training, research and development, assembling, and international trade.

In Virginia, the credit crisis and difficult economy have caused unemployment to rise over the last two years, particularly in the tobacco regions. I support GCFM's amendment application and encourage the Department of Homeland Security and USCIS to allow this expansion.

Prompt consideration of their application will allow us to move as quickly as possible in generating funds for new investment in this region.

Sincerely,

Timothy M. Kaine

Re: State Agency Designation

Dear Ms. Velarde:

This letter is to identify the agency in Virginia which has been named to determine and designate areas of high unemployment as Targeted Employment Areas with respect to the application of Gulf Coast Funds Management, LLC for approval of expansion in the Commonwealth of Virginia.

Through this letter I am identifying the Virginia Employment Commission as responsible for the determination and designation of areas of high unemployment or rural areas as Targeted Employment Areas for the purposes of fulfilling this requirement for USCIS and the EB-5 Regional Center Program.

Sincerely,

Timothy M. Kaine

Re: Targeted Employment Area Designation in Virginia

Dear Ms. Velarde:

The Virginia Employment Commission certifies that the following areas are Targeted Employment Areas (TEA) within the Commonwealth of Virginia. Targeted Employment Areas are defined as areas, which at the time of investment, are rural areas, or areas which have experienced unemployment of at least 150 percent of the national average rate within Virginia.

High unemployment areas were determined using the 2008 national not seasonally adjusted unemployment rate of 5.8 percent; 150 percent of 5.8 percent is 8.7 percent. High unemployment areas are any particular geographical or political subdivision located within a Metropolitan Statistical Area (MSA), or within a city or town having a population of 20,000, or more, within such state. Many of the high unemployment areas are tobacco-dependent regions, which are established under *Code of Virginia*, Section 3.1-1107, and defined as civil jurisdictions in Southwest and Southside Virginia, where they are historical tobacco production regions and are experiencing the highest unemployment rates within the Commonwealth of Virginia. In order to decrease the high unemployment rate while transforming into a less tobacco-dependent economy, these areas are designated as TEA to seek enhanced economic recovery and development.

Rural areas are defined as civil jurisdictions not located within any standard MSA as designated by the Office of Management and Budget, or within any city or town having a population of 20,000, or more, based on the most recent decennial census of the United States.

The following attachment contains designated Target Employment Areas for the Commonwealth of Virginia. If you have any questions or need clarification, please contact Donald Lillywhite, Economic Information Services Director, at (804) 786-5670.

Re: Targeted Employment Area Designation in Virginia

Dear Ms. Chapline:

This letter is follow-up to a December 15, 2009, communication to Barbara Velarde of the USCIS Foreign Trade Investor Program concerning Targeted Employment Areas (TEA). The Virginia Employment Commission certifies that Sussex County, Virginia, is a TEA within the Commonwealth of Virginia. Targeted Employment Areas are defined as areas, which at the time of investment, are rural areas, or areas which have experienced unemployment of at least 150 percent of the national average rate within Virginia.

High unemployment areas were determined using the 2008 national not seasonally adjusted unemployment rate of 5.8 percent; 150 percent of 5.8 percent is 8.7 percent. High unemployment areas are any particular geographical or political subdivision located within a Metropolitan Statistical Area (MSA), or within a city or town having a population of 20,000, or more, within such state. Many of the high unemployment areas are tobacco-dependent regions, which are established under *Code of Virginia*, Section 3.1-1107, and defined as civil jurisdictions in Southwest and Southside Virginia, where they are historical tobacco production regions and are experiencing the highest unemployment rates within the Commonwealth of Virginia. In order to decrease the high unemployment rate while transforming into a less tobacco-dependent economy, these areas are designated as TEA to seek enhanced economic recovery and development.

Rural areas are defined as civil jurisdictions not located within any standard MSA as designated by the Office of Management and Budget, or within any city or town having a population of 20,000, or more, based on the most recent decennial census of the United States.

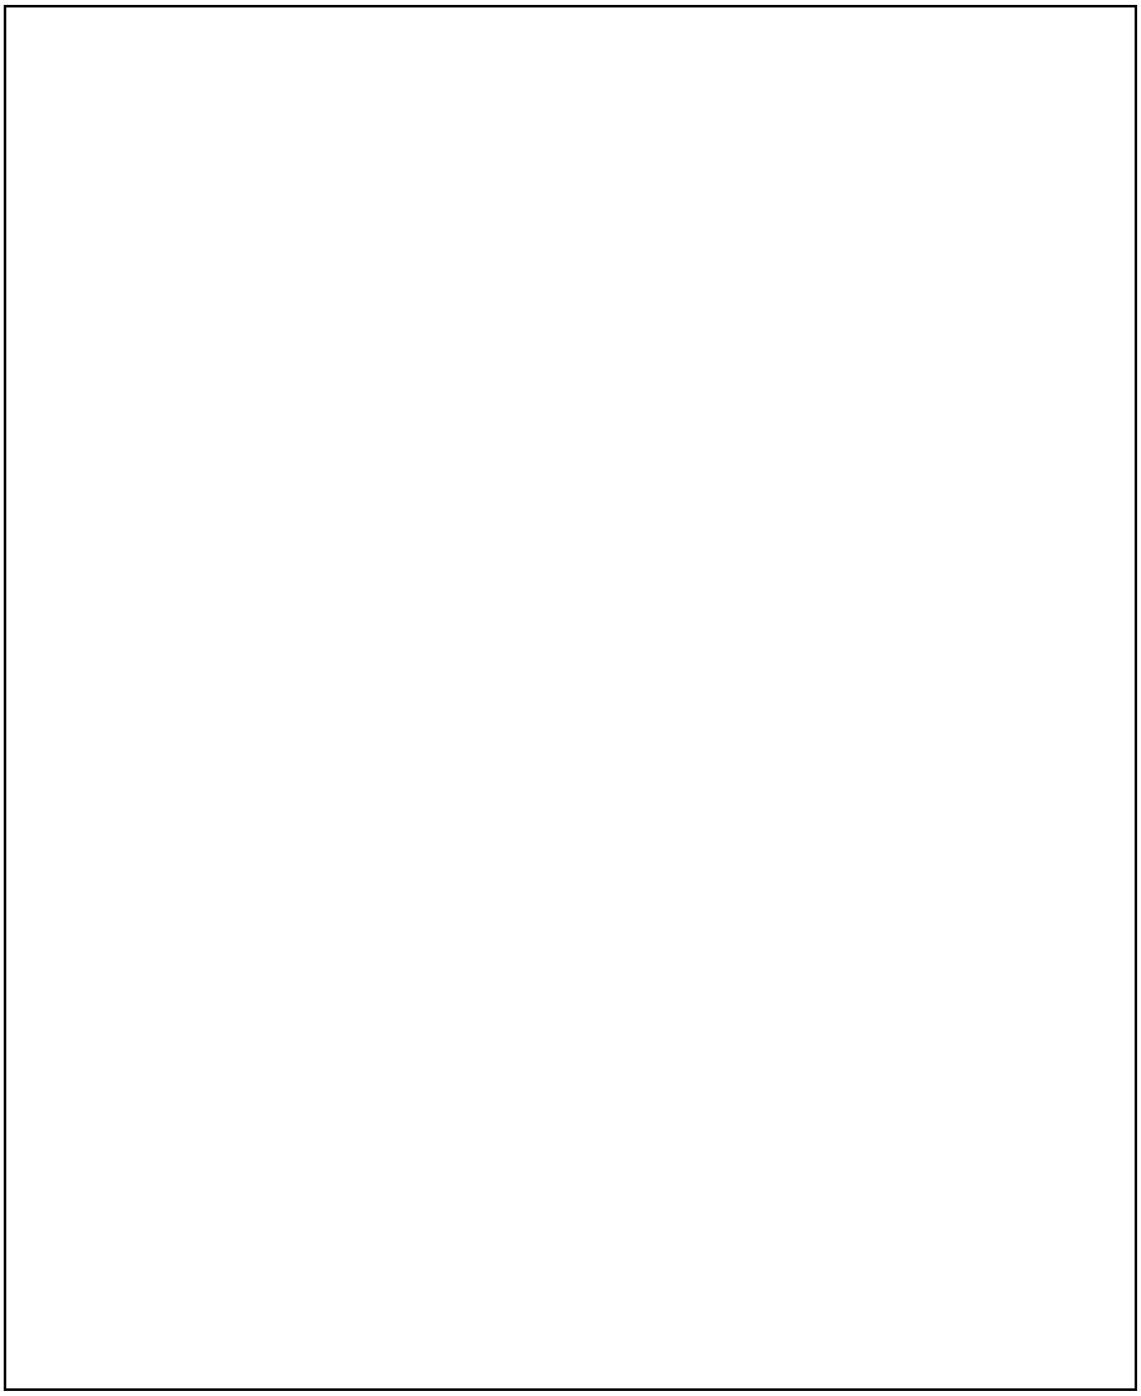
A NOTE ABOUT CONFIDENTIALITY

The contents of this business plan are highly proprietary, and should not be shared with any person other than officials of the U.S. Department of Homeland Security and USCIS who require this plan in order to analyze the application of Gulf Coast Funds Management LLC for an EB-5 regional center to expand coverage in the Commonwealth of Virginia.

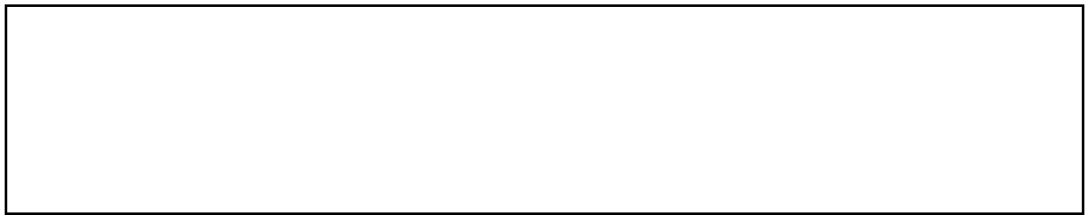
(b)(4)

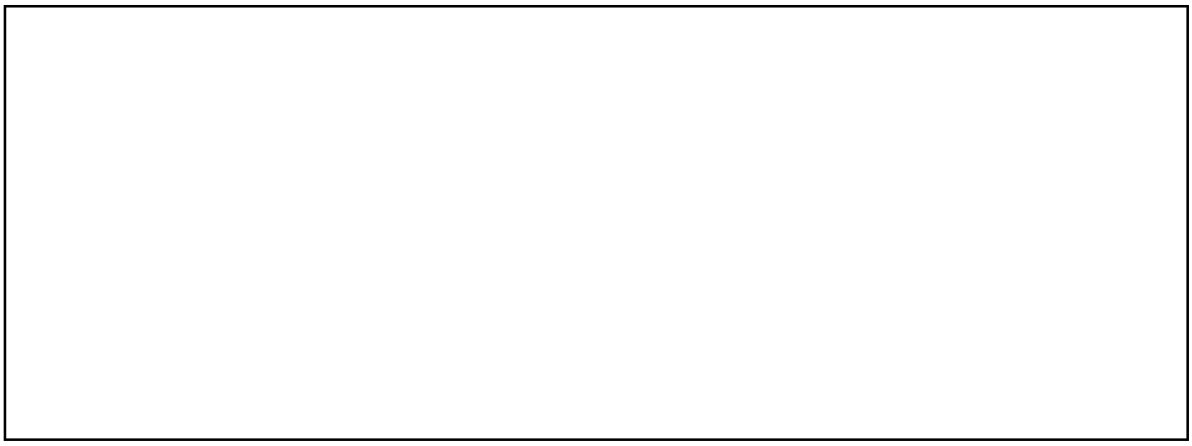
Gulf Coast Funds Management Regional Center Business Expansion Plan

1.0 Executive Summary



2 0 Company Summary





3.0 The EB-5 Immigrant Investor Program

The management company will manage EB-5 investment funds. The EB-5 immigrant investor program is described as follows by the United States Department of Homeland Security:

Immigration through Investment Overview

Under section 203(b)(5) of the Immigration and Nationality Act (INA), 8 U.S.C. 81153(6)(5), 10,000 immigrant visas per year are available to qualified individuals seeking permanent resident status on the basis of their engagement in a new commercial enterprise.

Of the 10,000 investor visas (i.e., EB-5 visas) available annually, 3,000 are set aside for those who apply under a pilot program involving a USCIS-designated Regional Center. A regional center is an entity, organization or agency that has been approved as such by the USCIS; focuses on a specific geographic area within the United States; and seeks to promote economic growth through increased export sales, improved regional productivity, creation of new jobs, and increased domestic capital investment.

"Alien investors" must demonstrate that a "qualified investment" (see below) is being made in a new commercial enterprise or approved Regional Center; and, show, using reasonable methodologies, that 10 or more jobs are actually created either directly or indirectly from the new commercial enterprise through revenues generated from increased exports, improved regional productivity, job creation, or increased domestic capital investment resulting from the pilot program.

Eligibility

Permanent resident status based on EB-5 eligibility is available to investors, either alone or coming with their spouses and unmarried children under 21 years of age. Eligible aliens are those who have invested – or are actively in

the process of investing – the required amount of capital into a new commercial enterprise that they have established. They must further demonstrate that this investment will benefit the U.S. economy and create the requisite number of full-time jobs within the U.S.

In general, "eligible individuals" include those:

1. Who establish a new commercial enterprise by: creating an original business; or purchasing an existing business and simultaneously or subsequently restructuring / reorganizing the business such that a new commercial enterprise results; or expanding an existing business by 140 percent of the pre-investment number of jobs or net worth, or retaining all existing jobs in a troubled business that has lost 20 percent of its net worth over the past 12 to 24 months; and

2. Who have invested – or who are actively in the process of investing – in a new commercial enterprise: at least $1,000,000; or at least $500,000 where the investment is being made in a "targeted employment area," which is an area that has experiences unemployment of at least 150 percent of the national average rate or a rural area as designated by OMB; and

3. Whose engagement in a new commercial enterprise will benefit the United States economy and: create full-time employment for not fewer than 10 qualified individuals; or maintain the number of existing employees at no less than the pre-investment level for a period of at least two years, where the capital investment is being made in a "troubled business," which is a business that has been in existences for at least two year and that has lost 20 percent of its net worth over the past 12 to 24 months.

RISK FACTORS

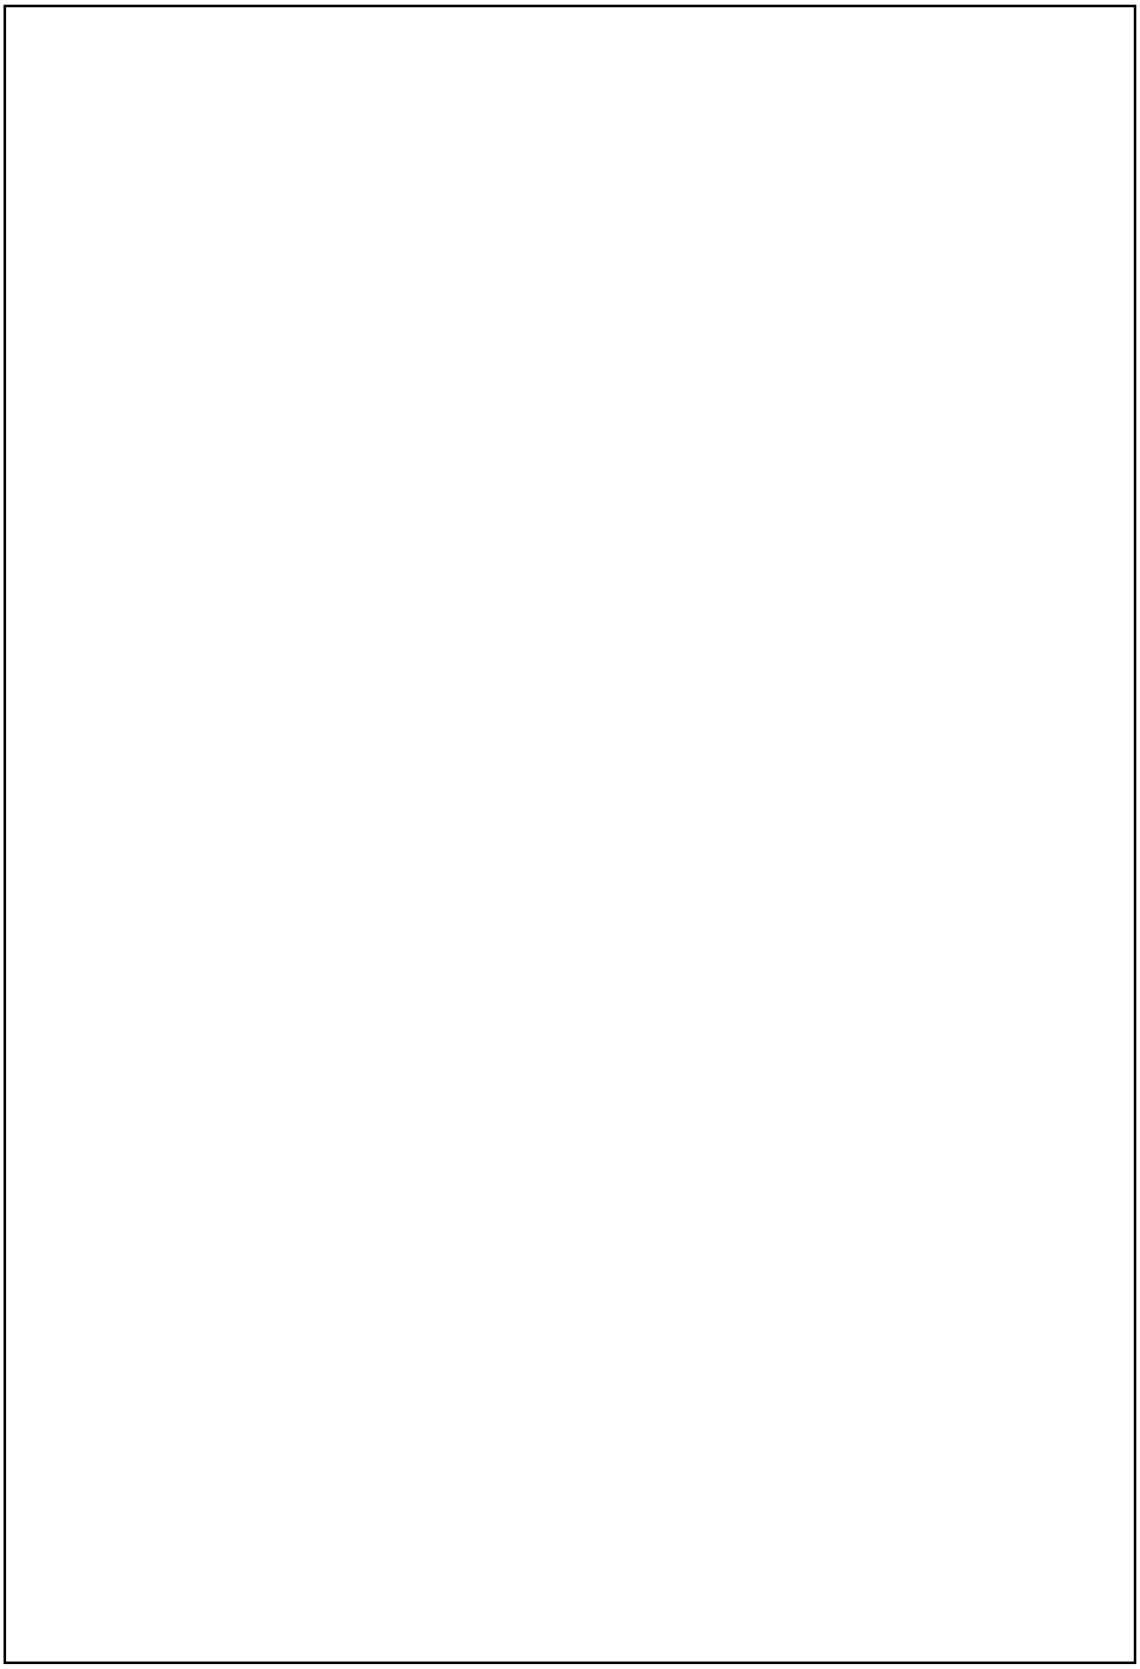
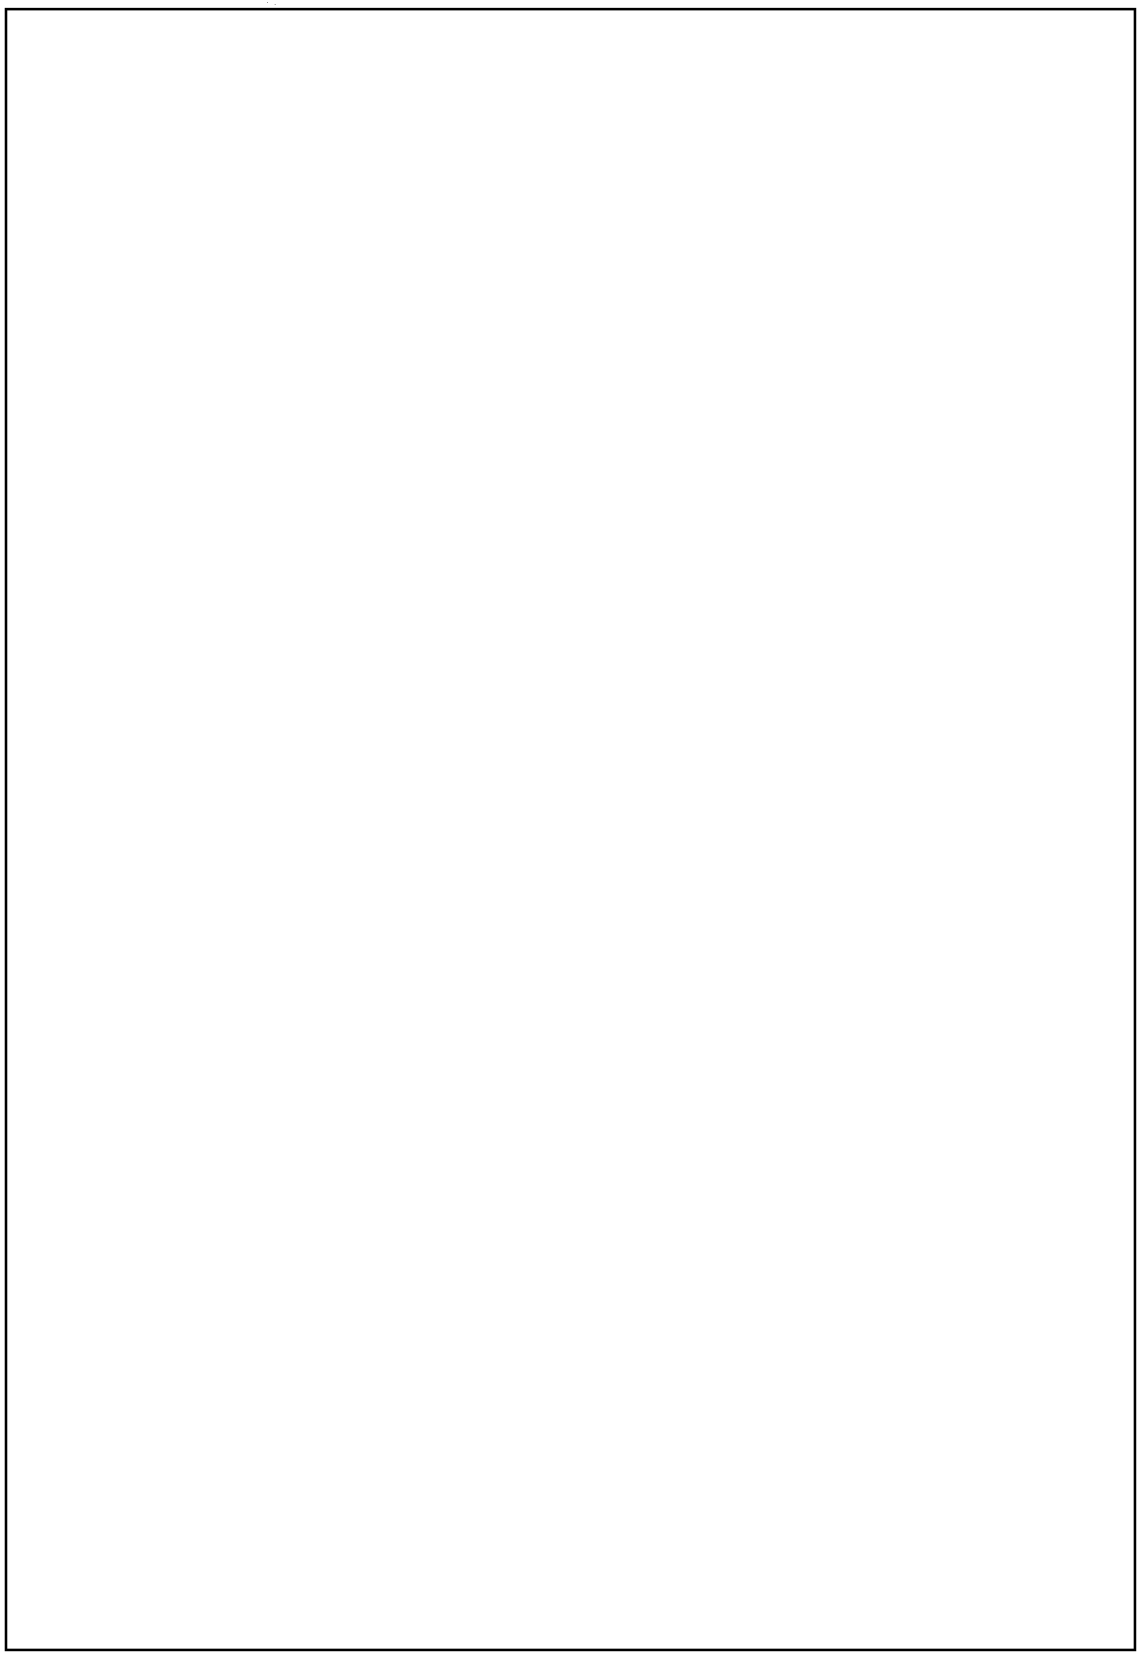
(b)(4)

(b)(4)





(b)(4)

(b)(4)

(b)(4)

(b)(4)

Immigration risks

The investor himself and herself must meet the requirements under the EB-5 program. Each purchaser of a Unit must understand that the Fund, the management company and each of their affiliates make no representation or warranty of any kind concerning whether an investment in the Fund will meet the requirements of the EB-5 program or other U.S. immigration requirements. Each investor in a Unit must further understand that there can be no assurance that an investment in the Unit will result in his or her family receiving an EB-5 visa, conditional resident status or permanent resident status. Please carefully consider the following immigration risks, and discuss these and other immigration risks with your personal immigration lawyer.

As a Unit holder, you will be subjected to certain general immigration risks faced by all immigrants to the United States.

The process of obtaining conditional resident status and permanent resident status involves many factors and circumstances that are not within the control of the Fund. These include the investor's past history and source of funds, immigration visa backlogs, potential changes in immigration laws and regulations (including laws and regulations specific to the EB-5 immigrant investor program) and quotas established by the United States government limiting the number of visas available to qualified individuals seeking conditional resident status under the EB-5 program. Although the Fund has been structured with the objective of providing Unit holders with eligibility for conditional and permanent resident status under the EB-5 regional center provisions of the U.S. immigration laws, no assurance can be given that each Unit holder will obtain approval of his or her particular immigrant application. Purchase of a Unit does not guarantee conditional or permanent residency in the United States. Furthermore, no assurances or advice can be given that conditional resident status will be converted to permanent resident status.

An investment in a Unit is only a part of the requirement for meeting EB-5 residency status. In addition, the USCIS will require that you pass a background check.

Each immigrant investor in the United States is subjected to a thorough background check. An EB-5 immigrant investor's background (or that of an immediate family member) may not meet the USCIS criteria for temporary or permanent residency in the United States. For example, among other criteria, the following may be grounds for denial of immigration benefits for the immigrant, and/or other members of the immigrant's family: having a communicable disease (e.g., AIDS) or other dangerous contagious disease; having been at any time involved with, trafficking in, or taking, illegal drugs; having been convicted of certain crimes; having committed a fraud or misrepresentation to a U.S. Government official; or having violated U.S. immigration law in the past.

As a result of participation in the EB-5 program and as a result of your investment in the Fund, you must pay income taxes in the United States on your world-wide income. You should consult your personal tax advisor about this obligation.

As an EB-5 participant, you will have to pay taxes in the United States on your world-wide income. As a member of the Fund, which is a limited liability company, your proportionate share of the Fund's income will be "passed-through" to you for U.S. Federal income tax purposes. You will also be required to include in income your proportionate share of the taxable income of the Fund for the purposes of any state of which you are a resident. Please consult your personal tax advisor about the tax consequences of an investment in the Fund. Further information about these matters is included in this private placement memorandum under the heading "Certain U.S. Federal Income Tax Considerations," beginning on page 32.

(b)(4)

(b)(4)

The EB-5 regional center program is a U.S. government program that is highly regulated and that requires frequent interaction between the Fund and government officials.

The EB-5 regional center program was created by Congress, which has accorded broad regulatory powers to the Department of Homeland Security and in particular to the United States Citizenship and Immigration Service (USCIS). Currently, all EB-5 related filings are reviewed by USCIS adjudicators in the USCIS California service center. While the Fund will strive to coordinate with USCIS to achieve our investors' immigration goal, there can be no assurance that USCIS adjudicators will take a consistent position on issues arising under the program, and there can be no assurance that USCIS regulations will not change in the future. Since the laws, regulations and bureaucratic interpretations applicable to the Fund's investments are subject to change at any time, there can be no assurance that the Fund will not be required to substantially change its investment policies in the future. The EB-5 program could be discontinued or altered by Congress at any time.

It is a requirement of the EB-5 program that an immigrant investor's source of funds be proper, under U.S. immigration guidelines.

EB-5 immigrant investors must demonstrate to the USCIS that the funds they invest in the Units were obtained through lawful means. Each EB-5 immigrant investor must document, to the satisfaction of the USCIS and the U.S. State Department, that the source of funds is acceptable. The Fund, and the EB-5 immigrant investor's immigration attorney, may make a preliminary assessment, but the ultimate decision will be made solely by USCIS and the U.S. State Department. Each EB-5 immigrant investor must agree to provide information and documents to the Fund, and to allow the Fund to make further investigation, concerning the EB-5 immigrant investor's source of funds and the personal and business background of the EB-5 immigrant investor and accompanying family members.

Achieving your immigration goal of conditional and permanent resident status will require you to maintain your primary residence in the United States.

EB-5 immigrant investors who obtain conditional resident status or permanent resident status must intend to make the United States their primary residence. Conditional residents or permanent residents who maintain their primary residence outside the United States risk revocation of their U.S. residence status. Each prospective EB-5 immigrant investor should consult a competent immigration attorney to review the likelihood that the investor's immigration objectives will be achieved.

SAMPLE

MANAGEMENT OF GTA

The following is a description of the business backgrounds of the executive officers of GTA:

Terry McAuliffe, Chairman

Mr. McAuliffe is the Chairman of GTA. He has been a long time investor and promoter of affordable green energy projects. It is at his direction that GTA has set its goal to truly meet a higher standard among our peers stating that "no green technology is green unless it is affordable to average consumers."

Before joining GTA, Mr. McAuliffe has been a longtime business leader and successful entrepreneur for nearly four decades. He has successfully started over two dozen companies in the fields of banking, real estate, securities, marketing, renewable energy and insurance. At the age of 14, Mr. McAuliffe started his first business, McAuliffe Driveway Maintenance, where he sealed residential driveways and commercial parking lots in his local community of Syracuse, New York. In January 1988, when he was only 30 years old, Mr. McAuliffe became the youngest chairman of a federally chartered bank in the history of the United States.

Mr. McAuliffe also served as Chairman of American Heritage Homes, one of Florida's largest homebuilding companies, as well as President of American Capitol Management Company, a major developer of real estate projects. He has been an active investor in the alternative energy field for over a decade.

In addition to his successful business career, he is a longtime political leader for the Democratic Party in the United States. He started his political career in the 1980 Presidential reelection campaign of President Jimmy Carter, and at the age of 22 became the national finance director for that campaign. He then served as National Finance Chairman of the Gephardt for President committee, National Finance Chairman and the National Co-Chairman of the Clinton-Gore re-election committee. In 1993, he was named by President Clinton as Ambassador and Commissioner General of the Korean International Exposition. He was Chairman of the 53rd Presidential Inaugural Committee and Chairman of the White House Millennium Celebration. In 2000, he chaired the Democratic National Convention in Los Angeles. He was elected Chairman of the Democratic National Committee from 2001 to 2005. He is widely credited with rebuilding, reenergizing and revitalizing the Democratic Party. As Chairman of the DNC, he shattered all Party records by raising over $535 million. He also served as Chairman of the 2008 Hillary Clinton Presidential campaign. In 2009, he unsuccessfully ran for Governor of the State of Virginia.

Chairman McAuliffe received a Juris Doctor degree from Georgetown University School of Law and a bachelors degree from The Catholic University of America in Washington, D.C.

4. Using the IMPLAN Model to Calculate National Multipliers

The IMPLAN model is a regional input/model developed and maintained by the Minnesota IMPLAN group, headquartered in Minneapolis. The basic model was originally developed by the USDA Forest Service in cooperation with the Federal Emergency Management Agency and the USDI Bureau of Land Management.

The IMPLAN model has certain similarities with the RIMS (Regional Input/Output Modeling system) model developed by the Department of Commerce, but is generally thought to contain several superior features besides its greater ease and flexibility of use. These improvements can be summarized as follows:

1. The Commerce Department is not permitted to publish data in any category where there are less than three organizations in a given economic area. IMPLAN has developed an algorithm to fill in the missing numbers.

2. IMPLAN has introduced improved methods of accounting for flows of goods and services among counties.

3. IMPLAN permits aggregation of any subset of industries for calculation and tabular purposes. This is useful when results are desired for, say, 1-digit industries instead of the 509 industries actually found in the input/output table.

4. As seen in the tables throughout this text, IMPLAN estimates three separate effects, labeled "direct", "indirect" and "induced". The direct effects are those entered by the user. The other two columns represent the multiplier effects, but they are usually combined in other input/output models. Briefly, the indirect effect represents purchases made by businesses when their sales rise. For example, a restaurant might order more food produced or sold in the region, or an automobile plant might order more steel. The induced effect represents the additional household spending because income has risen. For example, casino workers would spend their paychecks on various goods and services, some of which are produced in the region. In general, then, the larger the region under consideration, the larger the multipliers would be.

The following material, taken from the IMPLAN manual, describes the input/output process in more detail.

Input/output analysis is a means of examining relationships within an economy, both between businesses and between businesses and final consumers. It captures all of the monetary market transactions for consumption in a given time period. The resulting mathematical formulae allow examination of

the effects of a change in one or several economic activities on an entire economy.

A descriptive model includes information about local economic interactions known as regional economic accounts. These tables describe a local economy in terms of the flow of dollars from purchasers to producers within the region. The initial IMPLAN data details all purchases, including imported goods and services. When regional economic accounts are created, imports to the region are removed from the initial data, allowing examination of local inter-industry transactions and final purchases.

The regional economic accounts are used to construct local level multipliers. Multipliers describe the response of the economy to a stimulus (a change in demand or production). The multipliers represent the Predictive Model.

Purchases for final use (final demand) drive an input/output model. Industries producing goods and services for consumption purchase goods and services from other producers. These other producers, in turn, purchase goods and services. These indirect purchases (or indirect effects) continue until leakages from the region (imports, wages, profits, etc.) stop the cycle.

The indirect effects and the effects of increased household spending (induced effects) can be mathematically derived as sets of multipliers. The derivation is called the Leontief inverse. The resulting sets of multipliers describe the change of output for each industry caused by a one dollar change in final demand for any given industry.

The input/output analysis framework is similar to a financial accounting framework that tracks purchases of and expenditures on goods and services in dollars. Input/output accounting traces the flow of dollars between businesses and between businesses and final consumers. An input/output accounting framework can be illustrated using classic financial accounting T-accounts, which include receipts (income) and expenditures (expenses) on each side of a "T", as shown below.

Final Consumption (or final demand) drives input/output models. Industries respond to meet demand directly or indirectly, by supplying goods and services to industries responding directly. Each industry that produces goods and services generates demands for other goods and services, and so on. Multipliers describe these iterations.

There are three different multipliers developed for predictive modeling: Type I, Type II, and Type SAM. We start with the transactions table and derive a coefficient by dividing each industry column by the column total. This coefficient matrix is also known as the ***A Matrix***.

Appendix B. Resume of Dr. Michael K. Evans

CURRENT AND PREVIOUS POSITIONS

• Chairman, *Evans, Carroll & Associates, Inc.*, 1980-present (previously Evans Economics)

Economic consulting firm specializing in EB-5 immigration analysis, economic impact studies of development projects and new construction, models of state and local tax receipts, impact of current and proposed government legislation, and construction of econometric models for individual industries and companies.

• Chief Economist, *American Economics Group*, 2000-present.

Built a comprehensive state modeling system that provides economic analysis for a variety of consulting projects (see below).

• Clinical Professor of Economics, Department of Managerial Economics and Decision Sciences (MEDS), Kellogg Graduate School of Management, Northwestern University, 1996-99.

Taught courses in macroeconomics and business forecasting. Wrote textbooks for both courses.

• Winner of Blue Chip Economic Indicator Award for most accurate macroeconomic forecasts during the past four years, November 1999

• Founder and President, *Chase Econometric Associates*, 1970-1980

• Assistant and Associate Professor of Economics, Wharton School, University of Pennsylvania, 1964-69. Co-developer of the original Wharton Model.

• Visiting Professor, Radford University, (Radford, VA), 1987

Chairman of Institute for International Economic Competitiveness

• Visiting Lecturer, Hebrew University (Jerusalem), 1966-67

Built econometric model of the Israeli economy

Ph. D. in Economics, Brown University. Dissertation, "A Postwar Quarterly Model of the United States Economy, 1948-1962". A. B. in Mathematical Economics, Brown University

PREVIOUS ACTIVITIES AND EDUCATION

- Contributing Editor, *Industry Week*

Wrote a column in each issue on economic and financial trends as they impact the mfg sector.

- Editor, *The Evans Report*

Weekly newsletter discussing economic trends and financial markets. Pioneered the concept of the Monthly Tracking Model to incorporate recent economic releases into the overall economic forecast, including methods to predict these economic data.

- Consultant, *National Printing Equipment and Supply Association*

Prepares quarterly forecasts of shipments of printing equipment and graphic arts supplies by product line, based on an econometric model constructed for NPES. Also prepares analysis and forecasts of exports and imports by principal product line.

- Consultant, *APICS -- The Educational Society for Resource Management*,

In 1993, designed and developed the *APICS Business Outlook Index*, which uses survey data collected by the Evans Group to measure current production, production plans, shipments, employment, new orders, unfilled orders, inventory stocks, and the comparison of the actual to desired inventory/sales ratio to predict short-term changes in mfg sector activity. The results of this survey appeared every month in *APICS: The Performance Advantage*

- Consultant, *American Hardware Mfg Association*

Wrote a separate weekly edition of the Evans Report analyzing recent trends in the hardware and housing industries, including forecasts of the hardware industry based on an econometric model developed for AHMA.

- Board of Economists, *Los Angeles Times*

Wrote column every 6 weeks (5 other economists on the Board)

- Columnist, *United Press International*

  Wrote twice-weekly column, "Dollars and Trends"

- Consultant, Senate Finance Committee,

  Built the first large-scale supply-side model of the U. S. economy

- Consultant, Environmental Protection Agency and Council on Environmental Quality

  Estimated inflationary impact of government regulations

- Consultant, National Aeronautics and Space Administration

  Estimate impact of R&D spending on productivity growth

- Consultant, U. S. Treasury

  Estimated impact of investment tax credit and accelerated depreciation on capital spending by industry

- Consultant, U. S. Department of Agriculture

  Built large-scale econometric model of agricultural sector of U. S. economy

- Consultant, Organization of Economic Cooperation and Development

  Built econometric model of the French economy

SAMPLE OF RECENT CONSULTING PROJECTS

A. Economic Impact of EB-5 Immigrant Investor Programs and New Markets Tax Credits

- Calculated the number of jobs created for a film production company in New York City.

- Calculated economic impact of small-scale rooftop solar panels in various counties in California.

- Calculated economic impact of 7 different types of proposed businesses for a proposed regional center in the Bay Area of California.

- Determined the economic impact of a new biological research park, office building, and logistics center in Wooster, Ohio.

- Calculated the economic effect of a mixed-use urban renewal project in Cleveland, Ohio.

- Calculated economic impact of 14 different types of proposed businesses for a proposed EB-5 regional center that would include the entire state of Florida.

- Calculated economic impact of dairy farm and cheese processing plant in Northern California.

- Determined economic impact of a shipyard, food processing plant, and semiconductor plant for a proposed regional center in Louisiana and Mississippi.

- Calculated the economic impact of a new gaming casino in Natchez, Mississippi.

- Calculated the economic impact of a retail shopping center in suburban Los Angeles County.

- Prepared an economic impact analysis for the "timber to homes" project for a proposed regional center in Colorado.

- Calculated the economic impact for a proposed regional center in Baltimore, Maryland that would include the rebuilding of depressed areas in East Baltimore and along the riverfront.

- Prepared the economic analysis for a proposed EB-5 regional center for the entire state of Florida that included impact calculations for 14 different types of industries.

- Prepared the economic analysis for a proposed EB-5 regional center in the San Francisco Bay area that included calculations for 10 different types of industries.

- Prepared economic impact calculations for proposed EB-5 regional centers in New York City and Northeastern New Jersey.

- Calculated the economic impact of a rehabilitated office building in Albuquerque, New Mexico, including the increase in high quality jobs.

- Calculated the economic impact of a rehabilitated skilled nursing center in East Los Angeles, California, including the impact on nearby census tracts.

- Calculated the economic impact of development of warehouse and light industrial mfg space in Las Vegas, Nevada.

- Calculated the economic impact of rehabilitation and expansion of a vacation and health spa in Sharon Springs, New York

- Calculated economic impact of revitalizing an old resort hotel and adding new facilities for Lake Geneva, WI.

- Calculated the employment and tax effects for a portfolio of projects undertaken under the New Market capital program.

- Calculated generic employment changes for proposed EB-5 project for an Inland Port in Palm Beach County, FL

- Calculated the economic impact of construction of El Monte Village in El Monte, CA.

- Built an input/output model of Guam to be used to calculate economic impact of EB-5 projects. Used this model to estimate impact of various proposed projects.

- Calculated the economic impact of moving the Social Security Administration building in Birmingham, AL, and revitalizing the surrounding neighborhood.

- Calculated the economic impact of rehabbing and expanding the Everett Mall in Everett, WA.

- Determined the economic impact of building a new medical center in Charleston, SC

- Calculated economic impact of expanding Sugarbush resort in Vermont. Study included expansion of existing facilities and addition of new facilities.

• Calculated economic impact for new market tax credit program in Portsmouth, N.H. Study included both overall economic impact, and the increase in employment and income and the decrease in the unemployment rate and incidence of poverty in individual census tracts.

• Calculated the economic benefits of EB-5 programs for foreign investors for a mixed-use construction project, including a hotel, retail stores, apartments, and a sports stadium in the Washington, D. C. metropolitan area

• Calculated the economic benefits of EB-5 programs for foreign investors for a mixed-used retail shopping center in the New York City metropolitan area.

• Calculated the economic benefits of EB-5 programs for foreign investors for proposed shopping centers in five separate counties in Southern California, including differential impacts of building the shopping centers in different counties.

B. Projects for State and Local Governments

• Constructed an econometric model for the State of New York and determined the change in employment, labor income, and tax revenues for 43 different tax changes proposed by the Governor's office.

• Constructed a detailed econometric model for the State of Pennsylvania to determine the economic impact of the complete panoply of state taxes levied; the model contains over 1,000 equations. In cooperation with American Economics Group, the model was developed to simulate the effect of changes in any state tax rate on households and businesses by income deciles, household status, age of individuals, size of households, and many other demographic variables. The change in business taxes can also be simulated for detailed industry classifications.

• Determined whether the Washington, D.C. water and sewer authority should accept a high bid for a new waste disposal system. Decision to reject has saved the authority over $200 million, as construction prices turned down sharply as predicted.

• Built an econometric model to determine the "tax gap" caused by Internet sales for the state of Minnesota.

• Determined appropriate levels of shelter grants individual counties in New York State, and for utility allowances in New York City. Reviewed and prepared testimony in ongoing court cases in these areas.

• Calculated the economic impact of the revitalization of downtown Milwaukee, Wisconsin.

C. Economic Impact of Casino Gaming

• Built an econometric model to predict the growth of the gaming industry over the next decade, and the economic impact of that industry on employment and tax revenues at the Federal and state levels.

• Estimated the economic impact of Indian casino gaming nationally and for the State of Wisconsin.

• Determined the economic impact of the Oneida Indian gaming casino on the Green Bay metropolitan area.

• Estimated the negative economic impact on the Milwaukee area if a new Indian gaming casino were to be built in Kenosha, Wisconsin.

D. Economic Impact of Smoking Bans and Higher Taxes

• Testified on economic impact of smoking bans in Canada; certified as an expert witness by the Court.

• Examined the impact of smoking bans on restaurant sales in several different locations in the U.S. to determine how much sales changed when these bans were imposed, and the differential effects depending on whether these bans were partial or total.

• Determined the cross-border effects on retail sales from differential rates in cigarette, gasoline, and alcohol excise taxes

• Determined the economic impact of higher cigarette taxes on minority group employment.

• Estimated the economic impact and loss of Federal and state tax revenues when higher cigarette prices lead to increased smuggling.

E. Consulting Projects for Travel and Tourism

• Built an econometric model to predict tourism trips and revenues for the major regions of the U.S. economy.

• Constructed econometric models to predict tourism in Las Vegas and Orlando.

• Using the IMPLAN model, predicted economic impact of tourism and travel expenditures for all counties in Pennsylvania.

F. Other Private Sector Consulting Projects

• Calculated the economic impact of proposed EPA bans on fluoropolymer production.

• Estimated the size and economic importance of the fluoropolymer industry, and calculated economic impact of shutting down domestic production.

• Built an econometric model to examine how U.S. tax and regulatory policies help determine whether the gold mining industry would invest in the U.S. or other countries. Testified before Congress to help defeat legislation inimical to the mining industry.

• Built an econometric model to predict consumer bankruptcies, based on recent growth in consumer credit outstanding, the overall economic environment, and recent changes in credit regulations

• Estimated the economic impact of the ethanol subsidy on the U.S. economy and Farm Belt States, including the impact on the balance of payments, employment, and tax receipts. Testified before Congress to help pass legislation to extent subsidies to the ethanol industry.

• Built an econometric model to determine the impact of updating and improving the system of locks on the Upper Mississippi River on corn prices and exports, farm income, and the overall economy.

STATE CORPORATION COMMISSION

ARTICLES OF INCORPORATION
OF A VIRGINIA STOCK CORPORATION

The undersigned, pursuant to Chapter 9 of Title 13.1 of the Code of Virginia, state(s) as follows:

Article 1.
The name of the corporation is:

WM GreenTech Automotive Corp.

Article 2.
The number (and classes, if any) of shares the corporation is authorized to issue is (are):

Number of shares authorized	Class

(b)(4)

Article 3.
A. The name of the corporation's initial registered agent is:

Charles Xiaolin Wang

B. An individual who is a resident of Virginia and an initial director of the corporation.

1. a. The corporation's initial registered office address, which is the business office of the initial registered agent, is:

1356 Beverly Road, Suite 200
McLean, VA 22101

b. The registered office is physically located in the **county of Fairfax**

2. The initial directors are:

Name	Address
Terry McAuliffe	
Charles Xiaolin Wang	
Gary Yi Tang	

3. Incor

(b)(6)

Charles Xiaolin Wang

COMMONWEALTH OF VIRGINIA
STATE CORPORATION COMMISSION

AT RICHMOND, OCTOBER 9, 2009

The State Corporation Commission has found the accompanying articles submitted on behalf of

WM GreenTech Automotive Corp.

to comply with the requirements of law, and confirms payment of all required fees. Therefore, it is ORDERED that this

CERTIFICATE OF INCORPORATION

be issued and admitted to record with the articles of incorporation in the Office of the Clerk of the Commission, effective October 9, 2009.

The corporation is granted the authority conferred on it by law in accordance with the articles, subject to the conditions and restrictions imposed by law.

Re: WAC1024250498 (Motion)
W09001430/RCW1031910314 (Regional Center Proposal)

NOTICE OF DECISION

The applicant filed Regional Center Proposal, pursuant to section 610(a) of the Pilot Immigration Program, on February 22, 2010. On August 11, 2010, U.S. Citizenship and Immigration Services (USCIS) denied the application for the reason(s) discussed in that decision. On September 10, 2010, the Regional Center filed a Motion to Reopen and Reconsider the adverse decision.

8 C.F.R. 103.5 states:

> (2) Requirements for motion to reopen. A motion to reopen must state the new facts to be proved in the reopened proceeding and be supported by affidavits or other documentary evidence.
>
> (3) Requirements for motion to reconsider. A motion to reconsider must state the reasons for reconsideration and be supported by any pertinent precedent decisions to establish that the decision was based on an incorrect application of law or Service policy. A motion to reconsider a decision on an application or petition must, when filed, also establish that the decision was incorrect based on the evidence of record at the time of the initial decision.

8 C.F.R. 103.5(a)(4) states, in part:

> . . . A motion that does not meet applicable requirements shall be dismissed. . .

The Regional Center has not stated reasons for reconsideration that are supported by precedent decisions or other binding decisions showing that the USCIS decision was based on an incorrect application of law. As such, the Motion to Reconsider is denied.

However, because the Regional Center has provided new evidence that directly addresses eligibility for the benefit, the case will be re-opened. In accordance with 8 C.F.R. 103.5(a), the motion is granted. The previous decision is vacated and the proposal is reopened. However, after further review, the proposal will be denied and certified to the Office of Administrative Appeals for their action. Please see the enclosed denial notice.

Rosemary Langley Melville
Director

Enclosure: Denial notice
cc: Dawn Lurie, Esq.

This Notice is in reference to the request by Gulf Coast Funds Management, LLC. to Amend its Regional Center Proposal. That amendment was filed on February 22, 2010, with the California Service Center, and denied on August 11, 2010. On September 10, 2010, Gulf Coast Funds Management, LLC ("GCFM") filed a motion requesting that USCIS reopen and reconsider the decision to deny the amendment request. As noted on the motion decision, USCIS has granted the motion to reopen but denied the motion to reconsider. This decision will be certified to the Office of Administrative Appeals for their review.

Background:

On August 18, 2008, USCIS approved and designated GCFM as a Regional Center under the Immigrant Investor Pilot Program ("Pilot Program"). Currently the focus of the GCFM-RC business plan and job creation analysis and multipliers is to generate immigrant investor capital into the following target industry commercial enterprise activities within Mississippi and Louisiana:

1. Shipbuilding;

2. Food Processing; and

3. Manufacturing.

As such, aliens seeking immigrant visas through the Immigrant Investor Pilot Program may file individual petitions with USCIS for these commercial enterprises located within the GCFM-RC area comprised of the states of Mississippi and Louisiana. The Gulf Coast Funds Management Regional Center requested USCIS to amend its designation as a Regional Center for the purpose of expanding their industrial scope to include: manufacturing; education and training; research and development; and wholesale trade. The Center also requested permission to add the State of Tennessee and the Tobacco dependent counties of the Commonwealth of Virginia to the current focus area of the States of Mississippi and Louisiana.

As part of the requested amendment GCFM is seeking authorization to offer capital investment opportunities to immigrant investors in order to invest in limited liability companies (LLCs) as the new commercial enterprise, the first one being GTA Automotive Investment Fund I, LLC (GTAAIF I)[1]. Through GTAAIF I the Regional Center plans to offer investment "Units" only to non-resident investors with a subscription price of $555,000, $500,000 of which will be the EB-5 investment capital investment. According to page two of GTAAIF I's sample Offering Memorandum, $55,000 of the subscription price will be transferred from GTAAIF I to the prospective job-creating entities, WM GreenTech Automotive Corp. (WMGTA) or GreenTech Automotive, Inc. (GTAI) as an administrative fee which will be used to "pay legal and other administrative fees associated with marketing the Units world-wide." According to the Business Expansion Plan, dated February 1, 2010, GTAI was incorporated in Mississippi, and WMGTA was incorporated in Virginia. The business plan refers to the corporations as "GTA", collectively.
The investment units are to be used by GTAAIF to purchase shares of preferred stock in either WMGTA or GTAI, to construct and operate a hybrid car automotive plant, predominantly building the parts in the Virginia plant (WMGTA) and then assembling the parts in the Mississippi plant (GTAI). A transportation hub/warehouse will be constructed and will operate in Shelby County, TN, which is in close proximity to the MS plant.

[1] A review of the GCFM website shows that GCFM is currently promoting investments in GTAI through an entity called Gulf Coast Automotive Fund A-1, which is within the geographic area (MS & LA) which is the GCFM's current geographic scope. http://www.gulfcoastfunds.com/investmentfunds/automotivefund/index.html

The request to amend the proposal was denied because the amendment failed to show that its focus will be on the newly defined geographical area in its entirety. The amendment was also denied because the impact prediction required under 8 C.F.R. 204.6(m)(3)(iii) did not establish the impact of the future Regional Center's activities on either the national or regional level. Based upon a review of the entire record, including the documentation and arguments submitted in support of the motion, the Regional Center still has failed to demonstrate that it will in fact focus on the entire geographic area of the regional center.

Description of how the Regional Center will focus on the geographical area

Section 610 of the Departments of Commerce, Justice and State, the Judiciary, and Related Agencies Appropriations Act of 1993, Pub. L. 102-395, as amended, provides:

> (a) Of the visas otherwise available under section 203(b)(5) of the Immigration and Nationality Act (8 U.S.C. 1153(b)(5)), the Secretary of State, together with the Secretary of Homeland Security, shall set aside visas for a pilot program to implement the provisions of such section. Such pilot program shall involve a regional center in the United States, designated by the Secretary of Homeland Security on the basis of a general proposal, for the promotion of economic growth, including increased export sales, improved regional productivity, job creation, or increased domestic capital investment. **A regional center shall have jurisdiction over a limited geographic area, which shall be described in the proposal and consistent with the purpose of concentrating pooled investment in defined economic zones.** The establishment of a regional center may be based on general predictions, contained in the proposal, concerning the kinds of commercial enterprises that will receive capital from aliens, the jobs that will be created directly or indirectly as a result of such capital investments, and the other positive economic effects such capital investments will have.

8 CFR 204.6(m)(3) states, in pertinent part:

> (3) Requirements for regional centers. Each regional center wishing to participate in the Immigrant Investor Pilot Program shall submit a proposal to the Assistant Commissioner for Adjudications, which:
>
> (i) Clearly describes how the regional center **focuses on a geographical region** of the United States, and how it will promote economic growth through increased export sales [if any], improved regional productivity, job creation, and increased domestic capital investment; (emphasis added).

(Emphasis added)

8 CFR 204.6(e) defines a Regional Center as follows:

Regional center

means any **economic unit**, public or private, which is involved with the promotion of economic growth, including increased export sales, improved regional productivity, job creation, and increased domestic capital investment.

(Emphasis added)

As indicated above, the statute provides that "a regional center shall have jurisdiction over a limited geographic area, which shall be described in the proposal and consistent with the purpose of concentrating pooled investment in defined economic zones." The regulation at 8 C.F.R. § 204.6(m)(3) also provides that each regional center must describe "how the regional center focuses on a geographical region of the United States." Further, the regulation at 8 CFR 204.6(e) defines a Regional Center as an economic unit. The geographical limitation of the regional center was also emphasized in Matter of Izummi, 22 I&N Dec. 169,174 (Comm'r. 1998). Thus, the evidence to demonstrate that the requirement at 8 CFR 204.6(m)(3)(i) has been met must be based on a single geographic region as defined in the proposal or amendment and must demonstrate also that the proposed geographical area functions as an economic unit.

The evidence of record discusses Sussex County Virginia, which is part of the Richmond Metropolitan Statistical Area ("MSA"), Shelby County Tennessee, part of the Memphis MSA and Tunica County Mississippi, which is also part of the Memphis MSA. It is significant that Shelby County Tennessee is nearly 900 miles from Sussex County Virginia and that the July 2010 analysis did not provide any narrative or documentary evidence to show that the large geographic area between these very distant counties will be the focus of the Regional Center's activities to any degree. Thus, the focus, as shown in the July 2010 analysis, of the Regional Center appears not to be on one geographic area, but on two distinct and unrelated areas; the Memphis MSA and the Richmond MSA.

It is the responsibility of the Regional Center to show that its activities will focus on the requested geographic region, and not simply on isolated and unrelated areas within the region. It appears that the addition of sections of the Commonwealth of Virginia and the entire State of Tennessee is being requested as an expanded geographic scope to the GCFM because the various components of the prospective automotive manufacturing project lend themselves to locations in Sussex County, VA (deep-sea port access, less humidity than MS, and trained technicians, etc.), Shelby County, TN (rail transportation hub, etc.), and Tunica County, MS (transportation, business-friendly environment, etc.) The prospective location of these manufacturing & transportation centers may be desirable from a production and distribution standpoint, but the amendment does not show how the GCFM is going to focus on the entire region as an economic unit, other than to link these locations together so that the geographic area of the Regional Center will be considered contiguous for EB-5 purposes.

For the foregoing reasons, GCFM has not demonstrated that the current and prospective activities of the Regional Center will focus on the proposed geographic area in a manner consistent with the statutory requirement that at a Regional Center have jurisdiction over a limited geographic area with the purpose of concentrating pooled investment in defined economic zones.

The Individual Alien's Investment Funds must be placed "at risk" - Redemption Agreement

Section 610(c) of the Departments of Commerce, Justice and State, the Judiciary, and Related Agencies Appropriations Act of 1993, as amended, allows aliens admitted under the pilot program described in this section to establish reasonable methodologies for determining the number of jobs created by the pilot program, including jobs which are estimated to have been created indirectly through revenues generated from increased exports, improved regional productivity, job creation, or increased domestic capital investment resulting from the pilot program. 8 CFR 204.6(m)(3)(ii) requires that a Regional Center proposal must provide in verifiable detail how jobs will be created indirectly. It is also noted in 8 CFR 204.6(m)(1) in pertinent part that *except as provided herein, aliens seeking to obtain immigration benefits under this paragraph continue to be subject to all conditions and restrictions set forth in section 203(b)(5) of the Act and this section.*

8 C.F.R. 204.6(j)(2) states in part:

> To show that the petitioner has invested or is actively in the process of investing the required amount of capital, the petition must be accompanied by evidence that the petitioner has placed the required amount of capital at risk for the purpose of generating a return on the capital placed at risk.

In Matter of Izummi, 22 I&N Dec. 169 (Assoc. Comm., 1998), the Service found that an alien "may not enter into a redemption agreement with the new commercial enterprise at any time prior to completing all of his cash payments" or "enter into a redemption agreement prior to the end of the two year period of conditional residence."

For an alien's money to be truly at risk, the alien cannot enter into a partnership knowing in advance that s/he already has a willing buyer for his/her shares in the partnership. Nor is the investment at risk if the alien can be assured s/he will receive a certain price for his/her shares in the partnership. An investment assumes that a risk exists. The alien must go into the investment not knowing for sure if s/he will be able to sell that interest at all after obtaining unconditional permanent resident status; and if the alien is successful in selling the interest, the sale price will be determined in an open market. This way, the alien risks both gain and loss.

(b)(4)

In light of the above, it appears that the plan for the return of the immigrant investors' capital involves a de facto redemption agreement.

The Regional Center activities must be consistent with the purpose of concentrating pooled investments.

Section 610(a) of P.L. 102-395 as amended by P.L. 107-273 describes the statutory basis for eligibility as a Regional Center

a) Of the visas otherwise available under section 203(b)(5) of the Immigration and Nationality Act (8 U.S.C. 1153(b)(5)), the Secretary of State, together with the Attorney General, shall set aside visas

> for a pilot program to implement the provisions of such section. Such pilot program shall involve a regional center in the United States, designated by the Secretary of Homeland Security on the basis of a general proposal, for the promotion of economic growth, including increased export sales, improved regional productivity, job creation, and increased domestic capital investment. A regional center shall have jurisdiction over a limited geographic area, which shall be described in the proposal and consistent with the purpose of concentrating pooled investment in defined economic zones. The establishment of a regional center may be based on general predictions, contained in the proposal, concerning the kinds of commercial enterprises that will receive capital from aliens, the jobs that will be created directly or indirectly as a result of such capital investments and the other positive economic effects such capital investments will have...

(b)(4) Thus, section 610(a) of the Pilot Immigration program requires that the regional center proposal be consistent with the purpose of concentrating pooled investments.

Immigrant Investor Engagement in the Management of the New Commercial Enterprise

8 CFR 204.6(j)(5) states:

> To show that the petitioner is or will be engaged in the management of the new commercial enterprise, either through the exercise of day-to-day managerial control or through policy formulation, as opposed to maintaining a purely passive role in regard to the investment, the petition must be accompanied by:
>
> (i) A statement of the position title that the petitioner has or will have in the new enterprise and a complete description of the position's duties;
>
> (ii) Evidence that the petitioner is a corporate officer or a member of the corporate board of directors; or
>
> (iii) If the new enterprise is a partnership, either limited or general, evidence that the petitioner is engaged in either direct management or policy making activities. For purposes of this section, if the petitioner is a limited partner and the limited partnership agreement provides the petitioner with certain rights, powers, and duties normally granted to limited partners under the Uniform Limited Partnership Act, the petitioner will be considered sufficiently engaged in the management of the new commercial enterprise.

GCFM has structured the new commercial enterprise that will serve as the vehicle for the immigrant investors' capital investment as LLCs. The regulation at 8 CFR 204.6(j)(5) does not specifically address the level of engagement that an immigrant investor must have in the management of the LLCs. However, in

practice, USCIS has recognized that as long at an EB-5 immigrant investor has been granted the normal rights and responsibilities provided for under the jurisdiction of the LLC's organization that this eligibility requirement will be met. The following is noted on page 6 of the sample GTA Automotive Investment Fund 1, LLC Operating Agreement, Article VI (6.3(b)):

> This Section 6.3 supersedes any authority granted to the members pursuant to the Law.

This provision in the sample operating agreement seems to imply that immigrant investors will not be granted the normal rights and responsibilities provided for under the law in the jurisdiction of the LLC's organization, and thus this provision may not be EB-5 compliant. Additionally, the other provisions within the operating agreement do not appear to provide the immigrant investor with rights and responsibilities that are comparable to those referenced in 8 CFR 204.6(j)(5)(iii).

Therefore this amendment is again denied for the reasons cited above. However, because of the complexity of the issues involved, this decision is certified to the AAO in accordance with 8 CFR 103.4.

Re: Engagement Agreement/Legal Services Agreement

Dear Ms. Wei:

We are pleased to be assisting you with your immigration matters. Greenberg Traurig, LLP is looking forward to providing you with the highest quality legal services. The purpose of this letter is to confirm the terms of our representation.

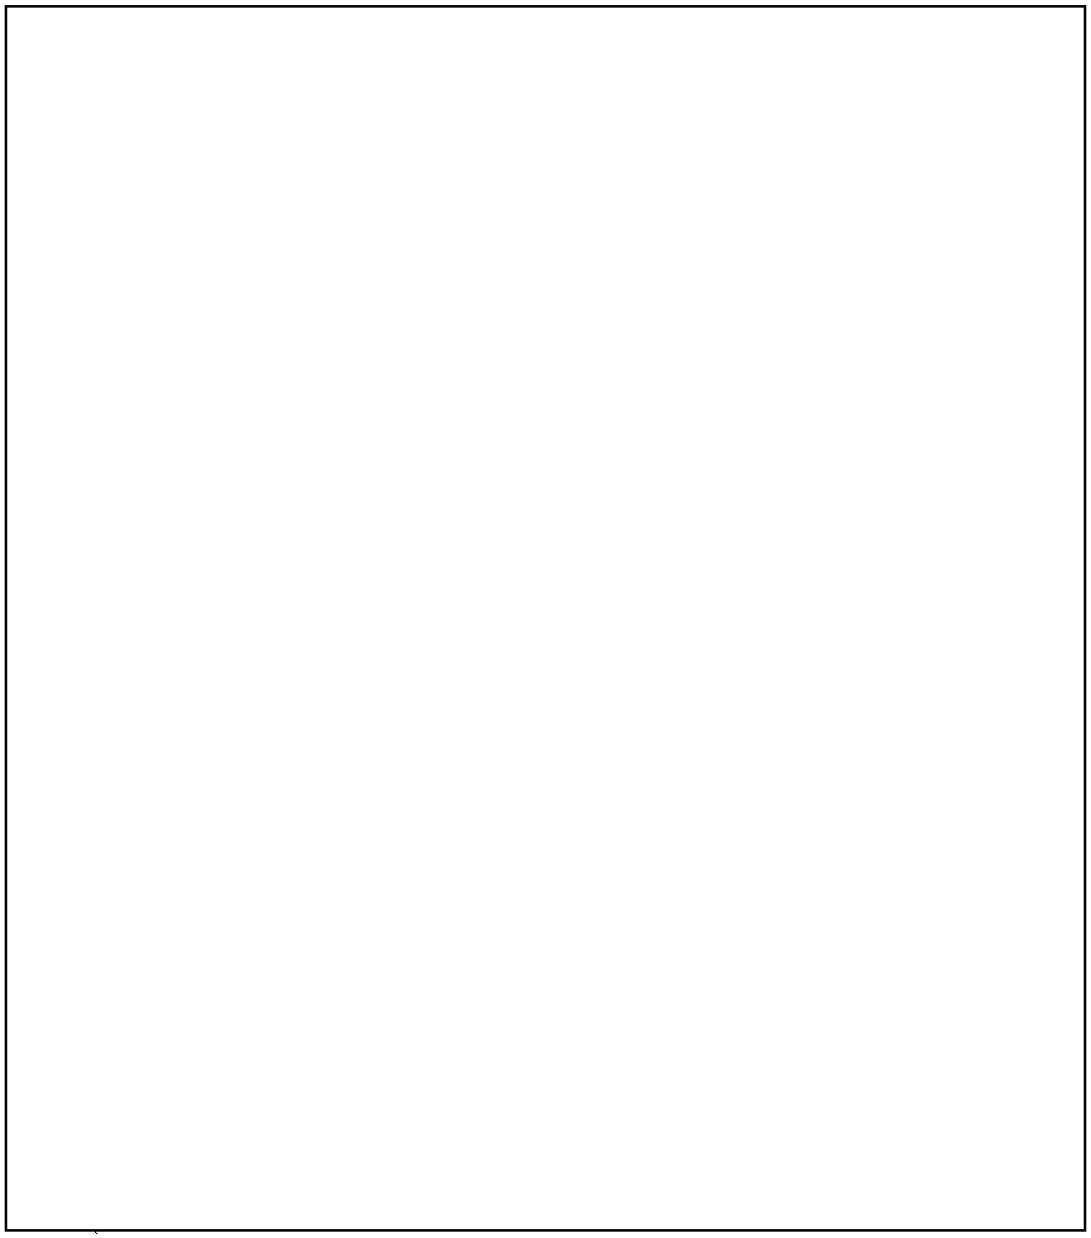
THIS AGREEMENT is made December 22, 2010, between Greenberg Traurig, LLP, hereinafter called the "Firm," and "Gulf Coast Funds Management LLC" hereinafter called "Client."

The parties agree as follows:

(b)(4)

[redacted]

(b)(4)



Miscellaneous. If Client requests a copy of the immigration file before that file has been destroyed, Client understands and agrees that there will be a fee of at least $100 to retrieve the file from storage, copy the file and send the file to the client. Client authorizes the Firm to destroy the file in this matter ten (10) years after the Firm closes the file. **Client acknowledges receipt of a copy of this agreement and hereby states that client is fully aware of the billing and payment policies as summarized** herein.

If you have any questions please contact Dawn M. Lurie at (703) 903.7527. To ensure that I have correctly set forth our understanding, and that you agree to the above stated

terms and conditions of our representation, please sign this letter and return it to me. Please mail the complete signed agreement to:

Dawn M. Lurie
Greenberg Traurig, LLP
1750 Tysons Blvd., Suite 1200
McLean, VA 22102

We appreciate your confidence in selecting us as your attorneys and look forward to working with you.

Sincerely,

Dawn M. Lurie
Shareholder

Part 3. Basis for the Appeal or Motion

Motion to Reopen: The motion must state new facts and must be supported by affidavits and/or documentary evidence.

Motion to Reconsider: The motion must be supported by citations to appropriate statutes, regulations or precedent decisions.

Appeal: Provide a statement explaining any erroneous conclusion of law or fact in the decision being appealed.

On February 17, 2010, GCFM filed an amendment application to expand the geographic scope and add logistics to its EB-5 regional center (Amendment Application). The Amendment Application, which contained several exhibits and a lengthy cover letter, requested certification to include the additional geographical areas of the State of Tennessee and the tobacco-dependent localities of the Commonwealth of Virginia and the industry sector of logistics. The amendment was and is intended to further Project Mastiff, an energy efficient vehicle manufacturing project that has components in three locations: a parts manufacturing facility located in Sussex County, Virginia; an assembly facility located in Tunica County, Mississippi; and a warehousing facility located in Shelby County, Tennessee (individually the Parts Facility, Manufacturing Facility, and Warehouse Facility; together, Project Mastiff). Each location depends on and is connected to the services and supplies provided by the other locations.

The CSC issued a request for evidence (RFE) on May 13, 2010. GCFM timely replied on July 21, 2010. The CSC denied GCFM's application on August 11, 2010 (CSC Amendment Denial). The CSC apparently based its denial on three issues:

1) Failure to show promotion of economic growth, including increased export sales, improved regional productivity, job creation, and increased domestic capital investment;

2) Failure to predict impact of the amendment on the regional or national economy; and

3) Failure to provide an update on the ship building and food processing industries, which were previously approved.

GCFM asserts that the denial was vague in its reasoning and that to the extent GCFM could discern the specific bases for denial, the CSC erred in its application by misinterpreting the prior economic reports (an original economic report dated March 2009 (attached as Exhibit 2) and a revised economic report dated July 2010 (attached as Exhibit 3), together called Original Economic Reports). To properly address these issues, GCFM has commissioned an updated economic report dated September 2010 (September 2010 Economic Report) that adds new information to the Original Economic Reports. See Exhibit 4.

Dr. Michael Evans of Evans, Carroll & Associates, Inc. prepared both the September 2010 Report and the Original Economic Reports. Dr. Evans has drafted more than 60 economic reports for EB-5 projects and regional center applications, perhaps more than any other economist. Dr. Evans is thus well aware of how to apply standard economic methodologies to EB-5 projects. Dr. Evans' resume is

Part 4. Signature of Person Filing the Appeal/Motion or His or Her Authorized Representative

Sig		Printed Name	Date *(mm/dd/yyyy)*
	(b)(6)	Stephen Yale-Loehr	09/09/2010

Make sure your appeal or motion is complete before filing.

Addendum to I-290B, Page 2, Part 3

attached at the end of the September 2010 Report. The September 2010 Report does not alter the original data concerning the national impact of Project Mastiff. Rather, it merely adds data addressing the state and regional impact of Project Mastiff.

As the denial solely concerns economic issues, GCFM respectfully requests that the EB-5 economist at USCIS headquarters review these motions and attached exhibits.

In re Denial of Request for Amendment to an Approved EB-5 Regional Center for **Gulf Coast Funds Management, LLC**

Re: Gulf Coast Funds Management Regional Center (W09001430)

Before the Director, California Service Center, U.S. Citizenship and Immigration Services
24000 Avila Rd.
2nd Floor, Room 2312
Laguna Niguel, CA 92607

MOTION TO REOPEN AND MOTION TO RECONSIDER AUGUST 11, 2010 DECISION OF CALIFORNIA SERVICE CENTER

Gulf Coast Funds Management, LLC (GCFM), by and through its undersigned counsel, respectfully asks the Director to grant this combined motion to reopen and motion to reconsider the August 11, 2010 decision of the California Service Center (CSC) that denied GCFM's amendment application to expand its geographic scope and add the industry sector of logistics to its approved EB-5 regional center. In support of these motions, GCFM represents as follows and submits the new evidence described below. These motions comport with the requirements of 8 C.F.R. § 103.5(a) and are timely filed. The relevant filing fee is attached, as is my G-28 form (Exhibit 1). This regional center amendment application is not the subject of any judicial proceeding.

Note: This is NOT also an appeal to the Administrative Appeals Office (AAO). If the motions to reopen and/or reconsider are denied, do NOT forward the file to the AAO.

Summary of the Facts and Argument

On February 17, 2010, GCFM filed an amendment application to expand the geographic scope and add logistics to its EB-5 regional center (Amendment Application). The Amendment Application, which contained several exhibits and a lengthy cover letter, requested certification to include the additional geographical areas of the State of Tennessee and the tobacco-dependent localities of the Commonwealth of Virginia and the industry sector of logistics. The amendment was and is intended to further Project Mastiff, an energy efficient vehicle manufacturing project that has components in three locations: a parts manufacturing facility located in Sussex County, Virginia; an assembly facility located in Tunica County, Mississippi; and a warehousing facility located in Shelby County, Tennessee (individually the Parts Facility, Manufacturing Facility, and Warehouse Facility; together, Project Mastiff).

Each location depends on and is connected to the services and supplies provided by the other locations. The Virginia site will receive and produce parts and supplies that will ultimately be installed in the final vehicles. Specifically, it will produce the power train and hybridization systems. These systems will be shipped to the Tennessee facility, where they will be combined with other domestic and international parts and transported to the Tunica, Mississippi site. In

Mississippi, all components will be inspected, further assembled, and incorporated into the electric and hybrid vehicles. The vehicles will then be transported back to the Tennessee location for distribution to U.S. and international distributors and dealers.

The CSC issued a request for evidence (RFE) on May 13, 2010. GCFM timely replied on July 21, 2010. The CSC denied GCFM's application on August 11, 2010 (CSC Amendment Denial).

The CSC apparently based its denial on three issues:

1) Failure to show promotion of economic growth, including increased export sales, improved regional productivity, job creation, and increased domestic capital investment;

2) Failure to predict impact of the amendment on the regional or national economy; and

3) Failure to provide an update on the ship building and food processing industries, which were previously approved.

GCFM asserts that the denial was vague in its reasoning and that to the extent GCFM could discern the specific bases for denial, the CSC erred in its application by misapplying the relevant regulation or misinterpreting the prior economic reports (an original economic report dated March 2009 (attached as Exhibit 2) and a revised economic report dated July 2010 (attached as Exhibit 3), together called Original Economic Reports). To properly address these issues, GCFM has commissioned an updated economic report dated September 2010 (September 2010 Economic Report) that adds new information to the Original Economic Reports. See Exhibit 4.

Dr. Michael Evans of Evans, Carroll & Associates, Inc. prepared both the September 2010 Report and the Original Economic Reports. Dr. Evans has drafted more than 60 economic reports for EB-5 projects and regional center applications, perhaps more than any other economist. Dr. Evans is thus well aware of how to apply standard economic methodologies to EB-5 projects. Dr. Evans' resume is attached at the end of the September 2010 Report.

The September 2010 Report does not alter the original data concerning the national impact of Project Mastiff. Rather, it merely adds data addressing the state and regional impact of Project Mastiff. For ease of review, all references below are to the September 2010 Report.

As the denial solely concerns economic issues, GCFM respectfully requests that the EB-5 economist at USCIS headquarters review these motions and attached exhibits.

GCFM addresses each issue in turn below.

Specific Arguments for Reversal

Issue 1: The CSC Amendment Denial asserted:

> *The economic analysis submitted in response to the USCIS RFE discusses potential economic growth for three counties: Sussex County VA, Tunica County MS, and Shelby County TN, from a demographic viewpoint. Data was presented per county in regards to employment, households, household income, median age, median income, and other geographic and economic data. However, data and discussion was not provided for the Regional Center as a whole. Further, information relating to economic growth, regional productivity, job creation and capital investment was not presented for the four-state region. The Regional Center has not demonstrated that its focus on the 4-state proposed geographic area will promote economic growth, job creation and capital investment throughout the region.*

CSC Amendment Denial at 3.

GCFM's Reply: The Original Economic Reports submitted by GCFM discussed the potential national economic impacts of Project Mastiff and its three components. Demographic data was presented on each county merely to provide an overview of the population of each county and context for the Original Economic Reports. The September 2010 Report now includes the same types of demographic data for each of the four states within the regional center. See pages 46-53 of the September 2010 Report.

As described in the answer to Issue 2 below, the September 2010 Report contains additional analyses of the potential job creation, gain in output, and increase in household earnings resulting from each of the Project Mastiff components in the states of Mississippi, Virginia, and Tennessee. See pages 85-103 of the September 2010 Report and response to Issue 2 below. The September 2010 Report also aggregates the data from each state analysis to provide an overview of the economic growth, regional productivity, and job creation on the combined 4-state regional center geographic area. See pages 7-8 of the September 2010 Report.

The Original Economic Reports, as well as the September 2010 Report, also describe the capital investment amounts that will be required for Project Mastiff and the ship building and food processing plants that had been previously approved. The anticipated capital investment in Project Mastiff is [redacted] with approximately [redacted] allocated to hard costs such as equipment and inventory and [redacted] allocated to soft costs such as land and ancillary facilities. See page 41-42 of the September 2010 Report for an allocation of the funds among the three facilities. GCFM expects that EB-5 investors will finance onl[redacted]

of the total cost. An additional [redacted] in capital will be invested into the ship building industry and a total of [redacted] into various food processing facilities. See pages 75-85 of the September 2010 Report.

(b)(4)

Issue 2: The CSC Application Denial asserted:

(b)(4)

The impact analysis appears to be based on a combination of national data and data for the three counties listed above. The executive summary for the impact analysis of the new automotive company indicates that the impact calculations are based on national multipliers so job creation for the three counties would be higher than if local multipliers were used. It also indicates that the report used 2019 estimated production levels. The report calculated a total job creation of [redacted] jobs but did not specify the geographic area covered by these calculations, that is, nationally, the region, or the 3-local counties. The report also calculated the annual gain in output of [redacted] in 2009 dollars or an estimated gain of [redacted] in 2019 dollars. Again, the geographic area was not specified, but it appears that these are national figures since the analyses include a national network of new automotive dealers. The report at Tables 1A, 1B, 2A and 2B, compares the county's most current demographic and economic statistics with the US statistics. Tables 7-16 predict employment growth including construction but the report does not discuss increase in household earnings, increase in demand for business services, utilities, and maintenance and repair.

CSC Amendment Denial at 3-4.

GCFM's Reply: The Original Economic Reports analyzed the economic and job creation impacts of the Parts Facility, Manufacturing Facility, and Warehouse Facility using national multipliers due to the far-reaching scope and complexity of Project Mastiff. Project Mastiff will boost output and employment on a national level by purchasing assembled domestic parts from around the country, conducting research and development activities on site, creating new dealer and compressed natural gas (CNG) networks, and creating an increased demand for large scale transportation. See pages 28-29 of the September 2010 Report for a detailed explanation of the reasons for application of national multipliers in this context.

In addition, the use of national multipliers complies with 8 C.F.R. § 204.6(m)(3)(iv), which provides that regional center proposals (and therefore also amendments) must contain "a detailed prediction regarding the manner in which the regional center will have a positive impact on the regional **or** national economy in general as reflected by such factors as increased household earnings, greater demand for business services, utilities, maintenance and repair, and construction both within and without the regional center." (Emphasis added.) The Original Economic Reports properly described the national effects on each of these sectors. This description is located at pages 8-10 of the September 2010 Report. See also pages 54-75 of the September 2010 Report for a detailed analysis of Project Mastiff's impact on job creation, output, and household income.

Further, USCIS has previously approved the use of national multipliers for Project Mastiff, as GCFM submitted a prior version of Dr. Evans' economic report, dated July 2009, as part of its request for an amendment in April 2009. See Exhibit 3. USCIS approved the amendment request on July 13, 2009. A copy of that approval is attached as Exhibit 5.

8 C.F.R. § 204.6(m)(3)(iv) clearly allows use of either regional or national impact analysis. Because the CSC Application Denial appeared to focus on the lack of regional analysis, out of an abundance of caution GCFM asked Dr. Evans to add information about the effects of Project Mastiff on the relevant state and regional economies. To that effect, the September 2010 Report adds content to the Original Economic Reports by analyzing the economic impact of the Parts Facility, the Manufacturing Facility, and the Warehouse Facility in Virginia, Mississippi, and Tennessee, respectively. See pages 85-104 of the September 2010 Report.

Issue 3: The CSC Application Denial asserted:

> *Additionally, the amendment does not include an impact update on the ship building and food processing industries, industries which the regional center has been previously approved.*

CSC Amendment Denial at 4.

GCFM's Reply: GCFM did not provide an update on the ship building and food processing industries in Louisiana or Mississippi because GCFM has no current plans to operate a project in those industries at this time. GCFM is focused on Project Mastiff. For the same reason, GCFM did not provide an analysis of the potential effects of locating a ship building facility or food processing plant in the expanded regional center geographic area as part of its amendment application because it does not currently intend to locate either type of project in Tennessee or Virginia. If GCFM later decides to locate one or both of these facilities in another state, it will submit an amendment application together with an updated economic report showing the economic impact of the facility at a new location.

Nevertheless, the September 2010 Report includes an analysis of a ship building facility and food processing plants in Louisiana. This analysis has been updated using the latest version of IMPLAN. See pages 75-85 of the September 2010 Report.

Requested Relief

GCFM's proposed geographic and industry expansion amendment furthers the job creation goals

that Congress intended when it created the EB-5 Pilot Program. The issues of promoting economic growth within the GCFM's geographical area and the economic impact GCFM will have on both the 4-state region and nationally have been addressed in the attached revised economic report, even though the relevant regulation does not require both regional and national impact analysis.

For the reasons stated above, GCFM respectfully requests that the Director grant this Motion to Reconsider and Motion to Reopen, reverse the CSC's Application Denial, and approve GCFM's amendment application.

THE EB-5 PROGRAM

Overview

In 1990, the U. S. Congress created the employment based 5th preference (EB-5) immigrant investor visa program. The EB-5 program offers 10,000 immigrant visas a year to qualified investors who wish to obtain residence in the United States by investing in businesses that will benefit the economy and create jobs. The EB-5 Immigrant Investor Regional Center Pilot Program ("The Pilot Program") was created by Congress in 1992 and sets aside 3,000 of the 10,000 EB-5 visas each year for people who invest in designated "regional centers."

Once a qualifying investment has been made in a regional center, an investor files a Form I-526 Immigrant Petition by Alien Entrepreneur, ("Form I-526") with the USCIS. After the USCIS approves I-526 petition, an investor files an adjustment of status application if he or she is already in the U.S. in valid non-immigrant status or ii) applies for an interview and entry visa at a U.S. embassy or consulate abroad ("consular processing"). When an adjustment of status application is approved, a conditional residence status of two years will be given to the investor. If the investor pursues consular processing, upon approval the investor and his or her family will be issued an EB-5 entry visa to the U.S. Once they enter the U.S., the two-year conditional residence status starts.

At the end of the two-year conditional resident period the investor must show that his or her investment has been sustained and the projects invested in by the regional center have created at least ten jobs for each investor. Assuming the investor provides that evidence, the USCIS will remove the conditional residence status, and the investor will receive his or her permanent residency status.

The Immigration Process

The Fund's primary role in the immigration process is to sell interests in the Fund to immigrant investors (which allow the investors to file Form I-526) and invest the investors' capital in a manner that is consistent with the EB-5 program and leads to the creation of at least ten jobs for each Unit holder in the Fund. If GTA's proposed business plan succeeds, our independent economist's report indicates that GTA will create enough jobs to meet the EB-5 program requirements for every investor in the Fund. The rest of the immigration process will be led by the immigrant investor and his or her independent immigration counsel. The management company will maintain a current record of jobs created by the Fund's investment activities. The management company will assist each Unit holder by providing information about job creation to the USCIS in the manner required by the EB-5 program. Upon the initial conditional residency filing, the Fund will certify to the USCIS with respect to the projected number of jobs that will be created. Two years after an immigrant investor is granted conditional resident status, the investor must file with the USCIS Form I-829, Petition by Entrepreneur to Remove Conditions ("Form I-829") to convert his or her status to permanent residency. At that

DRAFT

time, the Fund will allocate to each Unit holder ten jobs from those jobs created and maintained by GTA.

Frequently Asked Questions

The following are some frequently asked questions about the EB-5 program, along with answers to the questions:

How much do I need to invest to receive conditional and ultimately permanent residency status for myself and my family members?
If you invest in a regional center, like ours, you need to invest $500,000 if the investment is made in a high unemployment or rural area. There are also other fees such as legal fees for your immigration and tax counsel and application fees paid to USCIS.

What is the region covered by the Gulf Coast Funds Management regional center?
Our regional center covers the entire Commonwealth of Virginia.

Do I have to live in Virginia to participate in this program?
No. You do not have to live in Virginia. You do not even have to ever visit the region.

(b)(4)

What do I have to do to get my visa application approved?
Normally, you will get an American immigration lawyer to help you in the visa application process. If you do not have an immigration lawyer, the Placement Agent suggests that you use David Lu, Esq., an immigration lawyer with whom we work with on a regular basis. The lawyer will help you file a Form I-526. With your Form I-526, you will have to submit proof that the source of your $500,000 investment is lawful.

Once the USCIS approves your Form I-526 you will need to adjust your status if you are already living in the U.S. in non-immigrant status or you will have to schedule an interview at a U.S. embassy or consulate abroad. In either case, you will have to submit the same type of documentation that other visa applicants to the United States are required to submit. Here is a general description, from the U.S. government's web site, of certain requirements for receiving a visa:

> **VISA INELIGIBILITY / WAIVER**
> The immigration laws of the United States, in order to protect the health, welfare, and security of the U.S., prohibit the issuance of a visa to certain applicants. Examples of applicants who must be refused visas are those who: have a communicable disease, or have a dangerous physical or mental disorder; have committed serious criminal acts; are terrorists, subversives, members of a totalitarian party, or former Nazi war criminals; have used illegal means to enter the U.S.; or are ineligible for citizenship. Some former exchange visitors must live abroad for two years. Physicians who intend to practice medicine must pass

a qualifying exam before receiving immigrant visas. If found to be ineligible, the consular officer will advise the applicant of any waivers.

OTHER IMPORTANT INFORMATION

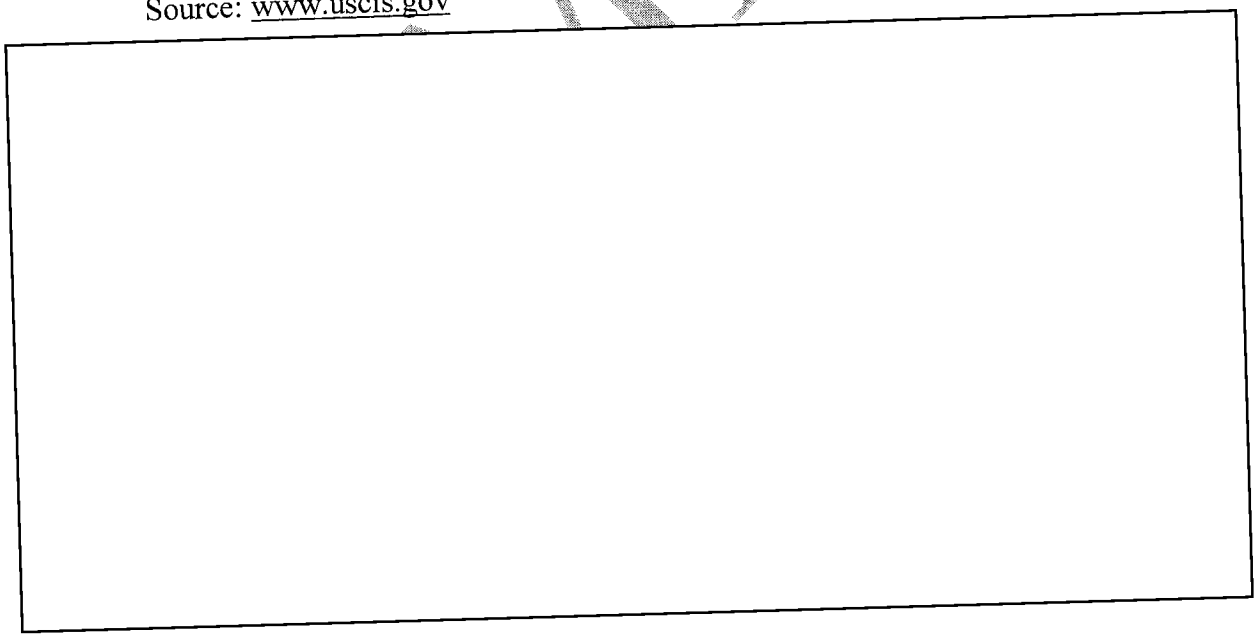
Documents for Visa Application
All applicants must submit certain personal documents such as passports, birth certificates, police certificates, and other civil documents, as well as evidence that they will not become public charges in the United States. The consular officer will inform visa applicants of the documents needed as their applications are processed.

Medical Examinations
Before the issuance of an immigrant visa, every applicant, regardless of age, must undergo a medical examination. The examination will be conducted by a physician designated by the consular officer. Examination costs must be borne by the applicant, in addition to the visa fees.

Visa Fees
The cost of each immigrant visa application may vary for additional visa fees apply. For up to date immigration visa fee costs, please consult your immigration attorney or please visit the USCIS fee schedule web page.

(b)(4)

Source: www.uscis.gov



When will my visa become permanent?
Two years after you receive your conditional resident status, you must apply for permanent residency. At that time, we will supply documents for your Form I-829 petition to show that your money has been invested in the region and that the Fund's investment has created at least ten jobs. Once your application is approved, you will

become a permanent resident of the United States, and may soon apply for full citizenship if you desire.

(b)(4)

CERTAIN U.S. FEDERAL INCOME TAX CONSIDERATIONS

The following discussion about certain U.S. federal income tax and other tax considerations that you should weigh prior to investing in a Unit is merely a presentation of certain tax issues that generally apply to all investors in EB-5 funds. You should not consider this discussion to be tax advice, applicable to your particular situation or a full discussion of all material United States, state, local and foreign tax consequences of an investment in the Fund or your status as U.S. tax resident or non-resident and you should consult with your personal tax advisor about these, and all other issues relevant to your personal decision to invest in a Unit. Neither the Fund nor the management company is qualified to provide the tax advice you will need. You cannot use this summary for the purpose of avoiding United States federal tax penalties.

The following discussion is based upon the Internal Revenue Code of 1986 (the "Code"), the applicable Treasury Regulations promulgated or proposed under the Code (the "Regulations"), current positions of the IRS contained in published revenue rulings and revenue procedures, current administrative positions of the IRS, and existing judicial decisions, as in effect on the date of this Memorandum, all of which are subject to change or modification, with or without retroactive effect, at any time.

No assurance can be given as to the future status of federal income tax laws or other tax laws as they pertain to limited liability companies of the type described herein. It is likely that changes to the Code will be proposed in the future. The effect of such proposals on the Fund and on an investment therein cannot be analyzed. Accordingly, potential investors are urged to consider on-going developments regarding changes in the federal income tax law and other tax laws and to consult their own advisors in assessing the risks associated with an investment in the Fund.

Classification of the Fund

The Fund will be treated as a partnership for federal income tax purposes under the "check the box" Regulations. Under these regulations, an unincorporated domestic entity, such as the Fund, with at least two members will be taxed as a partnership if no election is made to be taxed as a corporation. Accordingly, the discussion herein relating to partnerships and partners generally will be applicable to Unit holders in the Fund.

Partnership Taxation in General

Under the Code, a partnership pays no federal income tax, although it may be required to withhold and pay taxes on behalf of certain of its partners. Rather, each partner reports on his federal income tax return his distributive share of all items of income, gain, loss, deduction, credit and tax preference of the partnership, whether or not the partnership makes any actual distribution to the partner during the taxable year. Thus, it is possible that distributions from the Fund will not be sufficient to pay tax liabilities with respect to the tax income and gain allocated to a Unit holder and that the only source of payment of such tax liabilities would be from the Unit holder's funds from sources

other than the Fund.

The extent to which a Unit holder may utilize Fund losses in any tax year is limited to the adjusted tax basis of his interest in the Fund at the end of the Fund tax year (See "Basis of Units"). In addition, a Unit holder may not deduct Fund losses in excess of the amount the Unit holder is considered "at risk" with respect to the Fund under Code Section 465 (See "At Risk Limitations"). A Unit holder generally may use his distributive share of any partnership losses allowable after applying the foregoing loss limitation only to offset his income from other passive sources (see "Passive Activity Loss Limitations").

Basis of the Units

A Unit holder's initial tax basis for his Units will be the amount of money he contributes to the Fund.

A Unit holder's basis is his Units increased by (a) his share of the non-recourse liabilities of the Fund, and (b) his share of profits. The adjusted tax basis of his Units will be decreased, but not below zero, by (1) distributions to the Unit holder by the Fund; (ii) reductions in his share of the non-recourse obligations of the Fund; (iii) his share of the losses of the Fund; and (iv) his share of Fund expenditures not chargeable to his capital account.

Under Regulation Section 1.752-1(a)(2), a partnership liability is a non-recourse liability to the extent that no partner or related person (for the purpose of Regulation Section 1.752-4(b)) bears any economic risk of loss. A partnership liability generally is not considered non-recourse to the extent that any partner guarantees the payment of such liability. If a Unit holder or a "related" person guarantees all or a portion of the non-recourse liabilities of the Fund, the other Unit holders' tax basis in their Units will not include such guaranteed portion of the Fund's non-recourse liabilities.

Similarly, if a partner or a person related to a partner loans funds to a partnership and the other partners are not personally liable for the repayment of the loan, only the lending partners may include that loan in the basis of their partnership interests. For example, if a Unit holder or one of his affiliates makes a loan to the Fund, the other Unit holders would not include any portion of such a loan in the basis of their Units.

The Fund may be a "tiered" partnership if it owns interests in other entities taxed as partnerships for federal income tax purposes. With respect to "tiered" partnerships, the Regulations provide that the "upper-tier" partnership's share of the liabilities of the "lower-tier" partnership will be treated as liabilities of the upper-tier partnership for purposes of applying Code Section 752 to the partners of the upper-tier partnership (Regulation Section 1.752-4(a)).

If a Unit holder's basis in his Units is reduced to zero, the amount of any distributions (including any deemed distributions due to a reduction in Fund non-recourse

liabilities) in excess of his share of the Fund's taxable income for the year will be treated as capital gain, except to the extent that ordinary income treatment is required for his *pro rata* share of depreciation recapture.

A partner may not deduct his share of losses of a partnership to the extent such losses exceed the partner's basis for his interest in the partnership. Any losses that are not currently deductible by a partner due to this limitation may be deducted when and to the extent the partner's basis is increased (for example, by the allocation of partnership income). The ability of a partner to claim his share of partnership losses will also depend on the impact of the "at risk" rules of Code Section 465 (see "At Risk Limitations") and the passive activity loss limitation rules of Code Section 469 (see "Passive Activity Loss Limitations").

Allocations of Profits and Losses

Under Code Section 704, a partner's distributive share of the income, gain, loss, deduction, or credit of a partnership is determined by reference to the partnership agreement, unless the allocation contained in the agreement does not have "substantial economic effect," in which case the allocation is determined by reference to the partners' interests in the partnership, taking into account all facts and circumstances.

Although it is intended that the Fund's allocations will be in accordance with the Unit holders' interests in the Fund, it is possible that the Internal Revenue Service will challenge the Fund's tax allocations and attempt to reallocate tax items among the Unit holders. Any such reallocations of tax items may have adverse tax and financial consequences to a Unit holder.

"At Risk" Limitations

Code Section 465 limits the amount of losses that a partner can deduct in a particular year to the amount that such partner is considered "at risk" at the close of the partnership's taxable year. Generally, a taxpayer is considered "at risk" to the extent of (i) the amount of money and the adjusted basis of property he contributes to an activity, plus (ii) any amounts borrowed with respect to an activity for which the taxpayer is personally liable or for which the taxpayer has pledged property (other than property used in the activity) as security. A taxpayer will generally not be considered "at risk" with respect to amounts protected against loss through non-recourse financing, guarantees, stop loss agreements or similar arrangements.

A taxpayer generally is not considered to be "at risk" for non-recourse obligations. Losses not deductible by reason of the "at risk" rules may be carried forward indefinitely and deducted at such time as the taxpayer becomes "at risk" to a greater extent with respect to the activity.

DRAFT

Passive Activity Loss Limitations

Code Section 469 generally provides that losses attributable to "passive activities" may be used only to offset income from passive activities. Code Section 469 applies to individuals, estates, trusts, personal service corporations (corporations providing services that are substantially performed by owner-employees), and closely-held corporations (corporations having 5 or fewer shareholders who own more than 50% in value of the stock).

Code Section 469 defines a "passive activity" as (i) the conduct of a trade or business in which the taxpayer does not materially participate or (ii) any rental activity (without regard to participation). Under Code Section 469, the interest of a limited partner in a limited partnership is not considered an interest with respect to which a person materially participates, except as provided in regulations. Accordingly, a Unit holder's investment in the Fund will be a passive activity, and any Fund losses allocated to the Unit holders will constitute passive losses.

Under Code Section 469, passive losses generally may be used only to offset passive income until the taxable year in which the taxpayer disposes of his interest in the activity producing the passive losses.

Passive income is defined as the income from passive activities. Passive income does not include (i) income received as salary or wages; (ii) income derived from a trade or business in which the taxpayer materially participates ("active income"); (iii) interest, dividends, annuities or royalties ("portfolio income") not derived in the ordinary course of business; (iv) gain or loss from the disposition of property used in the ordinary course of business producing portfolio income; or (v) gain or loss from the disposition of property held for investment which is not considered to be an interest in a passive activity.

Passive losses that are not deductible in a particular year may be carried forward indefinitely and used to offset passive income in subsequent years. In addition, upon a fully taxable disposition of a taxpayer's entire interest in the passive activity (other than to a related party), any unused passive losses from the activity for the year that have been carried forward, and the loss, if any, on the disposition, may be applied first to offset any income from that activity for the year (including the gain, if any, from the disposition); second, to offset any other passive income for the year; and third, any remaining unused passive losses from the activity may be used to offset the taxpayer's active and portfolio income.

Based on the foregoing, a Unit holder may use any Fund losses allocated to him only to offset his passive income. If the Fund losses are not fully deductible in the year incurred, they may be applied against passive income (that is not portfolio income) in future years. If any unused losses from the Fund remain when the Unit holder disposes of his entire interest in the Fund, these losses may be used in full at such time, first against passive income, and then against any other income of the Unit holder.

The foregoing analysis assumes that the Fund constitutes a single "activity" for purposes of Code Section 469. If the Fund consisted of more than one activity, the passive activity loss limitations would apply separately to each such activity.

The Regulations provide flexibility in grouping a taxpayer's trade or business activities and rental activities for purposes of applying the passive activity rules. In this respect, one or more trade or business activities or rental activities may be treated as a single activity if the activities constitute an appropriate economic unit for the measurement of gain or loss for the purposes of Code Section 469. However, generally rental activities may not be grouped with a trade or business activity. Further, a taxpayer that owns an interest as a limited partner or limited entrepreneur (e.g., a member of an LLC who does not actively participate in the management of the LLC) may not group the following activities with any other activity: (i) holding, producing or distributing motion picture films or video tapes, (ii) farming, (iii) leasing personal property, (iv) exploring for or exploiting oil and gas resources, and (v) exploring for or exploiting geothermal deposits. A partnership must group its activities under the rules of the Regulations and once the partnership groups its activities, the partner may group those activities with each other, with activities conducted directly by the partner, and with activities conducted through other C corporations subject to Code Section 469, S corporations and partnerships, except that a partner may not treat activities grouped together by any 469 entity as separate activities.

Whether or not the Fund's activities are aggregated into a single activity should not affect a Unit holder's ability to offset passive losses from one Fund activity against passive income of another Fund activity. However, any previously suspended passive losses from a particular activity that is part of a single activity will not become deductible against non-passive income upon a disposition of that particular activity alone, but only upon a taxable disposition by the Fund of all of its interest in the single activity, or the Unit holder's disposition of his Units. Further, the Fund's debt investments or equity investments in C corporations may produce interest income or dividend income, respectively, that is classified as portfolio income for purposes of Code Section 469, and the Fund's other equity investments may produce losses classified as passive under Code Section 469, and in this situation a Unit holder's share of passive losses may not be utilizable to offset his share of portfolio income.

Distributions

Distributions (which include any deemed distribution arising from a reduction, by repayment or otherwise, in Fund liabilities) made to a Unit holder generally do not result in any recognition of gain for federal income tax purposes to the extent the amount of cash or debt reduction does not exceed the basis of the Unit holder's Units. A Unit holder's adjusted tax basis in his Units is reduced by the amount of the distribution. Distributions of cash (including reductions in liabilities) by the Fund in excess of a Unit holder's adjusted tax basis in his Units will result in the recognition of gain to the extent of such excess. Such gain is considered gain from the sale or exchange of the Units by

Strictly Confidential and Proprietary

the Unit holder and in certain cases may be treated in part as ordinary income because of the depreciation recapture provisions. (see "Sale or Disposition of Units").

Sale or Disposition of Units

Upon a sale of a Unit, a Unit holder will realize gain or loss in an amount equal to the difference between the amount realized and his adjusted tax basis in the Unit. Under Code Section 751(a), any gain realized by a selling partner is taxed as ordinary income to the extent of the partner's *pro rata* share of "ordinary income assets" of the partnership. The balance of gain, if any, or the loss is treated as a capital gain or loss. In determining the amount received upon the sale or exchange of a Unit, a Unit holder must include, among other things, his allocable share of the outstanding amount of the indebtedness to which the Fund's property is subject. Therefore, it is possible that the gain realized on the sale of a Unit may exceed the cash proceeds of such sale. As a result, in some cases, the income taxes payable with respect to such gain may exceed such cash proceeds.

Certain Deductions to Be Claimed

Organization, Start-Up and Syndication Costs. Under the Code, neither a partnership nor its partners may deduct amounts paid or incurred in the promotion and sale of the interests in the partnership ("syndication" expenses), including those amounts paid as commissions, professional fees, and printing costs. These expenses must be capitalized and may not be amortized. Under the Regulations, the following expenses constitute non-deductible syndication expenses which must be capitalized and not amortized: (i) brokerage fees; (ii) registration fees; (iii) legal fees for securities advice and advice pertaining to the adequacy of tax disclosures in the offering memorandum for securities law purposes; (iv) accounting fees for the preparation of representations to be included in the offering memorandum; and (v) costs of printing the offering memorandum.

However, to the extent a partnership pays or incurs organizational expenses incidental to the creation of the partnership or start-up expenditures with respect to an active trade or business, the partnership generally may elect to capitalize such expenditures and amortize them ratably over a period of not less than 180 months, commencing in the month in which the partnership begins business. Organizational expenses include (i) legal fees for services incidental to the organization of the partnership, such as the negotiation and preparation of a partnership agreement; (ii) accounting fees for services incidental to the organization of the partnership, and (iii) filing fees. On the other hand, organizational expenses do not include (i) expenses incurred in connection with the acquisition of partnership assets or the transfer of assets to the partnership; (ii) syndication expenses; and (iii) certain other expenses. Start-up expenditures include (i) certain expenses related to the investigation of the creation or acquisition of an active trade or business; and (ii) expenses paid or incurred pursuant to the creation of an active trade or business, which expenses would be deductible if they were incurred after the commencement of the particular business operation to which they relate.

The Fund has incurred organizational expenses which it will elect to amortize over 180 months. Additionally, the Fund has incurred or may incur start-up expenditures which the Fund, if it is eligible to do so, intends to amortize over a 180 month period. Any costs incurred by the Fund associated with offering of the Units will be capitalized by the Fund as non-deductible syndication costs.

Other Limitations on Deductions. Other limitations may apply to reduce or eliminate the deductibility by a Unit holder of his share of the Fund's expenses, including fees paid to the management company. For example, to the extent deductions of the Fund are deemed not to be incurred in connection with a business, they will be treated as miscellaneous itemized deductions that, in the case of Unit holders, are deductible only to the extent that, when taken together with other similar deductions, they exceed 2% of the Unit holder's adjusted gross income. Also, miscellaneous itemized deductions are not deductible by a Unit holder in computing the Unit holder's alternative minimum tax.

Certain Tax Consequences to Non-United States Investors

Foreign Individuals Potentially Subject to U.S. Tax on Their Worldwide Income. Individuals who are not citizens of the United States but who are treated as "residents" of the United States for federal income tax purposes are subject to United States federal income tax on their worldwide income, including but not limited to their income from the Fund. For this purpose, an individual who is a lawful permanent resident of the United States (e.g., a holder of a "green card") generally will be treated as a resident. In addition, an individual who is not a lawful permanent resident under the immigration laws may nevertheless be a "resident" for tax purposes based upon a "substantial presence" in the United States as defined under Code Section 7701(b). For example, under that Code Section, an individual may be a "resident" if the individual is physically present in the United States on all or any part of a certain number of days, determined under a formula, within a three-year testing period. An individual present in the United States under certain types of temporary visas (e.g., teachers or students) may be excepted from the "substantial presence" test, but the determination whether an individual is a resident can be a complex determination. Potential investors who are foreign individuals should consult with their own tax advisors to be certain of their tax status under United States law.

Taxation of Non-U.S. Individuals Not Treated as Tax Residents. Potential investors who are neither citizens nor residents (as determined for tax purposes) of the United States ("Non-U.S. Investors") are subject to additional tax rules. Generally, Non-U.S. Investors are taxable on certain United States source passive investment income ("FDAP"), including dividends, interest and rents, at a flat rate of 30% on the gross amount of such income, without reduction for any expenses or other tax deductions, and that tax is satisfied by withholding of tax on payments of such amounts to the Non-U.S. Investors. In the case of a partnership, the partnership generally will be required to withhold based on the share of its FDAP allocable to its Non-U.S. Investors. The 30% tax on the gross amount of FDAP may be reduced or eliminated if the Non-U.S. Investor

is a resident of a country with which the United States has a bilateral income tax treaty, provide that the Non-U.S. Investor submits timely certification of his entitlement to treaty relief. Certain other exceptions apply which may reduce or eliminate the tax on certain types of FDAP, including interest income. Non-U.S. Investors generally are not subject to tax on capital gains unless either (1) the gains are attributable to a United States trade or business or (2) the Non-U.S. Investor is an individual who is present in the United States for more than 183 days during the taxable year in which the gains are realized.

The 30% taxation of FDAP will not apply to any income that is effectively connected with the active conduct of a trade or business within the United States. The net income from such a trade or business within the United States realized by a Non-U.S. Investor will be subject to tax at the regular graduated income tax rates applicable to resident individuals. Such income currently will be subject to income tax withholding, generally at a rate of 35%. A Non-U.S. Investor who realizes any such income will be required to file a United States federal income tax return with respect to the taxable year in which the income is realized.

A Non-U.S. Investor in the Fund who is allocated a share of passive income (including capital gain) or active trade or business income realized by the Fund will be subject to tax under the above rules as if such Non-U.S. Investor had realized such income directly. Any withholding of federal income taxes by the Fund attributable to a Non-U.S. Investor will be treated as a distribution to that particular Unit holder.

THE FOREGOING IS NOT A COMPLETE DISCUSSION OF ALL OF THE FEDERAL INCOME TAX CONSEQUENCES TO A NON-U.S. INVESTOR; THERE ARE STATE AND LOCAL TAX AND ESTATE TAX CONSEQUENCES TO BE CONSIDERED. ALSO, FOREIGN TAXES MAY BE IMPOSED ON A NON-U.S. INVESTOR'S INCOME FROM THE FUND. INVESTORS ARE STRONGLY ADVISED TO CONSULT WITH THEIR TAX ADVISORS WITH RESPECT TO THE TAX CONSEQUENCES OF AN INVESTMENT IN THE FUND.

Compliance Matters

Tax Returns/Audits. The Fund will furnish annually (and in certain circumstances, periodically) to each of the Unit holders sufficient information from the Fund's tax return for the Unit holders to prepare their own federal income tax returns.

The tax treatment of items of partnership income, loss, deduction, and credit will be determined at the partnership level. In addition, all partners are required, on their individual federal income tax returns, to treat partnership items in a manner that is consistent with the treatment of such items on the partnership's return.

The tax matters partner for the Fund will be the management company. The tax matters partner is required to, among other things, keep the other partners informed of all administrative and judicial proceedings and represent the Fund in such proceedings. The

SAMPLE

tax matters partner is authorized to obtain judicial review of any proposed readjustment of partnership items. Although every partner with an interest in the outcome is allowed to participate in an action filed by the tax matters partner, the outcome of that proceeding will bind all partners. If the tax matters partner fails to seek judicial review of a proposed adjustment of partnership items, other partners may seek such review, provided that there can be only one judicial proceeding with respect to a partnership. The foregoing procedures may adversely affect a Unit holder's ability to deal with adjustments to his income tax return resulting from adjustments made with respect to the Fund.

If any of the tax returns of the Fund are audited, it is possible that substantial legal and accounting fees will have to be paid to substantiate the position of the Fund, and such fees would reduce the cash otherwise available to meet Fund obligations or for distribution to the Unit holders. Such an audit may result in adjustments to each Unit holder's income tax return. An audit of the Fund's tax returns may also result in an audit of non-partnership items on each Unit holder's income tax returns, which in turn could result in adjustments to such items. The costs incurred by a Unit holder in connection with an IRS audit of his income tax return will be borne solely by that Unit holder.

State and Local Taxes

In addition to federal income taxes, the Fund and the Unit holders may be subject to other taxes imposed by various jurisdictions, such as state and local income taxes. Although a detailed analysis of these various taxes is not presented here, investors should consider the potential state and local tax consequences of an investment in the Fund. For example, a Unit holder's distributive share of all or a portion of Fund income, gains, losses and deductions, profits and losses, may be required to be included in determining his income subject to tax under the laws of the state or locality in which he is a resident, as well as jurisdictions in which the Fund does business.

For example, with respect to Unit holders who are not residents of the Commonwealth of Virginia, if the Fund has Virginia source income allocated to such Unit holders, the Fund will be required to file composite returns and make composite payments of tax on behalf of all of its Unit holders who are not residents of Virginia. The current rate of the Virginia composite tax is [_____]% and any composite payment on behalf of a non-resident Unit holder will be treated by the Fund as a distribution to the non-resident Unit holder.

The Commonwealth of Virginia also requires a partnership to withhold income tax on a non-resident partner's allocable share of Virginia source income. The Fund will withhold at the required withholding rate (currently [_____]%) of Virginia source income allocable to Unit holders who are not residents of Virginia. Any such withholding will be treated by the Fund as a distribution to the non-resident Unit holder. The withholding by a partnership does not relieve the non-resident partner of his obligation to file a Virginia income tax return. A partnership is allowed to file a composite return on behalf of non-resident partners who have no activity in Virginia other than that from the partnership. If a composite filing is allowable with respect to a

CAMPEN

non-resident partner and the composite return is properly filed and all taxes, including applicable interest and penalty is paid, the individual non-resident partner is relieved of his separate individual filing requirement. If the Fund elects to file a composite return on behalf of any non-resident Unit holders, the composite tax payment attributable to the non-resident will be treated as a distribution by the Fund to that non-resident Unit holder.

The Fund intends to supply the Unit holders with information regarding their income, if any, derived from various jurisdictions in which the Fund does business. Unit holders are urged to consult with their own tax advisors regarding state and local tax laws.

U.S. Federal Estate and Gift Taxation

U.S. residents generally are subject to federal estate taxes on their taxable estates at death which includes the value at the time of a decedent's death of all of his property, real or personal, tangible or intangible, wherever situated. Additionally, U.S. residents are subject to gift taxes on the transfer of any property by gift. U.S. estate taxes can also apply to a Non-U.S. Investor to tax that part of his gross estate which at the time of his death is situated in the United States. For example, shares of stock in a domestic U.S. corporation owned by a non-resident alien are treated as property situated in the United States for purposes of this provision. Further, the IRS has ruled that a partner's interest in a partnership is situated where the partnership's business is carried on for purposes of applying the U.S.-United Kingdom Estate Tax Convention. Thus, a Unit in the Fund held by a Non-U.S. Investor could possibly be subject to U.S. estate tax on the death of the Non-U.S. Investor.

Additionally, state and local taxing jurisdictions may also impose state, inheritance and/or gift taxes on their residents or on property deemed situated within their respective jurisdictions.

3. Brief Description of Hybrid Motor Vehicle Project

4. Using the IMPLAN Model to Calculate National Multipliers

The IMPLAN model is a regional input/model developed and maintained by the Minnesota IMPLAN group, headquartered in Minneapolis. The basic model was originally developed by the USDA Forest Service in cooperation with the Federal Emergency Management Agency and the USDI Bureau of Land Management.

The IMPLAN model has certain similarities with the RIMS (Regional Input/Output Modeling system) model developed by the Department of Commerce, but is generally thought to contain several superior features besides its greater ease and flexibility of use. These improvements can be summarized as follows:

1. The Commerce Department is not permitted to publish data in any category where there are less than three organizations in a given economic area. IMPLAN has developed an algorithm to fill in the missing numbers.

2. IMPLAN has introduced improved methods of accounting for flows of goods and services among counties.

3. IMPLAN permits aggregation of any subset of industries for calculation and tabular purposes. This is useful when results are desired for, say, 1-digit industries instead of the 509 industries actually found in the input/output table.

4. As seen in the tables throughout this text, IMPLAN estimates three separate effects, labeled "direct", "indirect" and "induced". The direct effects are those entered by the user. The other two columns represent the multiplier effects, but they are usually combined in other input/output models. Briefly, the indirect effect represents purchases made by businesses when their sales rise. For example, a restaurant might order more food produced or sold in the region, or an automobile plant might order more steel. The induced effect represents the additional household spending because income has risen. For example, casino workers would spend their paychecks on various goods and services, some of which are produced in the region. In general, then, the larger the region under consideration, the larger the multipliers would be.

The following material, taken from the IMPLAN manual, describes the input/output process in more detail.

Input/output analysis is a means of examining relationships within an economy, both between businesses and between businesses and final consumers. It captures all of the monetary market transactions for consumption in a given time period. The resulting mathematical formulae allow examination of

the effects of a change in one or several economic activities on an entire economy.

A descriptive model includes information about local economic interactions known as regional economic accounts. These tables describe a local economy in terms of the flow of dollars from purchasers to producers within the region. The initial IMPLAN data details all purchases, including imported goods and services. When regional economic accounts are created, imports to the region are removed from the initial data, allowing examination of local inter-industry transactions and final purchases.

The regional economic accounts are used to construct local level multipliers. Multipliers describe the response of the economy to a stimulus (a change in demand or production). The multipliers represent the Predictive Model.

Purchases for final use (final demand) drive an input/output model. Industries producing goods and services for consumption purchase goods and services from other producers. These other producers, in turn, purchase goods and services. These indirect purchases (or indirect effects) continue until leakages from the region (imports, wages, profits, etc.) stop the cycle.

The indirect effects and the effects of increased household spending (induced effects) can be mathematically derived as sets of multipliers. The derivation is called the Leontief inverse. The resulting sets of multipliers describe the change of output for each industry caused by a one dollar change in final demand for any given industry.

The input/output analysis framework is similar to a financial accounting framework that tracks purchases of and expenditures on goods and services in dollars. Input/output accounting traces the flow of dollars between businesses and between businesses and final consumers. An input/output accounting framework can be illustrated using classic financial accounting T-accounts, which include receipts (income) and expenditures (expenses) on each side of a "T", as shown below.

Final Consumption (or final demand) drives input/output models. Industries respond to meet demand directly or indirectly, by supplying goods and services to industries responding directly. Each industry that produces goods and services generates demands for other goods and services, and so on. Multipliers describe these iterations.

There are three different multipliers developed for predictive modeling: Type I, Type II, and Type SAM. We start with the transactions table and derive a coefficient by dividing each industry column by the column total. This coefficient matrix is also known as the ***A Matrix***.

Appendix B. Resume of Dr. Michael K. Evans

CURRENT AND PREVIOUS POSITIONS

• Chairman, *Evans, Carroll & Associates, Inc.*, 1980-present (previously Evans Economics)

Economic consulting firm specializing in EB-5 immigration analysis, economic impact studies of development projects and new construction, models of state and local tax receipts, impact of current and proposed government legislation, and construction of econometric models for individual industries and companies.

• Chief Economist, *American Economics Group*, 2000-present.

Built a comprehensive state modeling system that provides economic analysis for a variety of consulting projects (see below).

• Clinical Professor of Economics, Department of Managerial Economics and Decision Sciences (MEDS), Kellogg Graduate School of Management, Northwestern University, 1996-99.

Taught courses in macroeconomics and business forecasting. Wrote textbooks for both courses.

• Winner of Blue Chip Economic Indicator Award for most accurate macroeconomic forecasts during the past four years, November 1999

• Founder and President, *Chase Econometric Associates*, 1970-1980

• Assistant and Associate Professor of Economics, Wharton School, University of Pennsylvania, 1964-69. Co-developer of the original Wharton Model.

• Visiting Professor, Radford University, (Radford, VA), 1987

Chairman of Institute for International Economic Competitiveness

• Visiting Lecturer, Hebrew University (Jerusalem), 1966-67

Built econometric model of the Israeli economy

Ph. D. in Economics, Brown University. Dissertation, "A Postwar Quarterly Model of the United States Economy, 1948-1962". A. B. in Mathematical Economics, Brown University

PREVIOUS ACTIVITIES AND EDUCATION

- Contributing Editor, *Industry Week*

Wrote a column in each issue on economic and financial trends as they impact the mfg sector.

- Editor, *The Evans Report*

Weekly newsletter discussing economic trends and financial markets. Pioneered the concept of the Monthly Tracking Model to incorporate recent economic releases into the overall economic forecast, including methods to predict these economic data.

- Consultant, *National Printing Equipment and Supply Association*

Prepares quarterly forecasts of shipments of printing equipment and graphic arts supplies by product line, based on an econometric model constructed for NPES. Also prepares analysis and forecasts of exports and imports by principal product line.

- Consultant, *APICS -- The Educational Society for Resource Management*,

In 1993, designed and developed the *APICS Business Outlook Index*, which uses survey data collected by the Evans Group to measure current production, production plans, shipments, employment, new orders, unfilled orders, inventory stocks, and the comparison of the actual to desired inventory/sales ratio to predict short-term changes in mfg sector activity. The results of this survey appeared every month in *APICS: The Performance Advantage*

- Consultant, *American Hardware Mfg Association*

Wrote a separate weekly edition of the Evans Report analyzing recent trends in the hardware and housing industries, including forecasts of the hardware industry based on an econometric model developed for AHMA.

- Board of Economists, *Los Angeles Times*

Wrote column every 6 weeks (5 other economists on the Board)

- Columnist, *United Press International*

  Wrote twice-weekly column, "Dollars and Trends"

- Consultant, Senate Finance Committee,

  Built the first large-scale supply-side model of the U. S. economy

- Consultant, Environmental Protection Agency and Council on Environmental Quality

  Estimated inflationary impact of government regulations

- Consultant, National Aeronautics and Space Administration

  Estimate impact of R&D spending on productivity growth

- Consultant, U. S. Treasury

  Estimated impact of investment tax credit and accelerated depreciation on capital spending by industry

- Consultant, U. S. Department of Agriculture

  Built large-scale econometric model of agricultural sector of U. S. economy

- Consultant, Organization of Economic Cooperation and Development

  Built econometric model of the French economy

SAMPLE OF RECENT CONSULTING PROJECTS

A. Economic Impact of EB-5 Immigrant Investor Programs and New Markets Tax Credits

- Calculated the number of jobs created for a film production company in New York City.

- Calculated economic impact of small-scale rooftop solar panels in various counties in California.

- Calculated economic impact of 7 different types of proposed businesses for a proposed regional center in the Bay Area of California.

- Determined the economic impact of a new biological research park, office building, and logistics center in Wooster, Ohio.

- Calculated the economic effect of a mixed-use urban renewal project in Cleveland, Ohio.

- Calculated economic impact of 14 different types of proposed businesses for a proposed EB-5 regional center that would include the entire state of Florida.

- Calculated economic impact of dairy farm and cheese processing plant in Northern California.

- Determined economic impact of a shipyard, food processing plant, and semiconductor plant for a proposed regional center in Louisiana and Mississippi.

- Calculated the economic impact of a new gaming casino in Natchez, Mississippi.

- Calculated the economic impact of a retail shopping center in suburban Los Angeles County.

- Prepared an economic impact analysis for the "timber to homes" project for a proposed regional center in Colorado.

- Calculated the economic impact for a proposed regional center in Baltimore, Maryland that would include the rebuilding of depressed areas in East Baltimore and along the riverfront.

- Prepared the economic analysis for a proposed EB-5 regional center for the entire state of Florida that included impact calculations for 14 different types of industries.

- Prepared the economic analysis for a proposed EB-5 regional center in the San Francisco Bay area that included calculations for 10 different types of industries.

- Prepared economic impact calculations for proposed EB-5 regional centers in New York City and Northeastern New Jersey.

- Calculated the economic impact of a rehabilitated office building in Albuquerque, New Mexico, including the increase in high quality jobs.

- Calculated the economic impact of a rehabilitated skilled nursing center in East Los Angeles, California, including the impact on nearby census tracts.

- Calculated the economic impact of development of warehouse and light industrial mfg space in Las Vegas, Nevada.

- Calculated the economic impact of rehabilitation and expansion of a vacation and health spa in Sharon Springs, New York

- Calculated economic impact of revitalizing an old resort hotel and adding new facilities for Lake Geneva, WI.

- Calculated the employment and tax effects for a portfolio of projects undertaken under the New Market capital program.

- Calculated generic employment changes for proposed EB-5 project for an Inland Port in Palm Beach County, FL

- Calculated the economic impact of construction of El Monte Village in El Monte, CA.

- Built an input/output model of Guam to be used to calculate economic impact of EB-5 projects. Used this model to estimate impact of various proposed projects.

- Calculated the economic impact of moving the Social Security Administration building in Birmingham, AL, and revitalizing the surrounding neighborhood.

- Calculated the economic impact of rehabbing and expanding the Everett Mall in Everett, WA.

- Determined the economic impact of building a new medical center in Charleston, SC

- Calculated economic impact of expanding Sugarbush resort in Vermont. Study included expansion of existing facilities and addition of new facilities.

• Calculated economic impact for new market tax credit program in Portsmouth, N.H. Study included both overall economic impact, and the increase in employment and income and the decrease in the unemployment rate and incidence of poverty in individual census tracts.

• Calculated the economic benefits of EB-5 programs for foreign investors for a mixed-use construction project, including a hotel, retail stores, apartments, and a sports stadium in the Washington, D. C. metropolitan area

• Calculated the economic benefits of EB-5 programs for foreign investors for a mixed-used retail shopping center in the New York City metropolitan area.

• Calculated the economic benefits of EB-5 programs for foreign investors for proposed shopping centers in five separate counties in Southern California, including differential impacts of building the shopping centers in different counties.

B. Projects for State and Local Governments

• Constructed an econometric model for the State of New York and determined the change in employment, labor income, and tax revenues for 43 different tax changes proposed by the Governor's office.

• Constructed a detailed econometric model for the State of Pennsylvania to determine the economic impact of the complete panoply of state taxes levied; the model contains over 1,000 equations. In cooperation with American Economics Group, the model was developed to simulate the effect of changes in any state tax rate on households and businesses by income deciles, household status, age of individuals, size of households, and many other demographic variables. The change in business taxes can also be simulated for detailed industry classifications.

• Determined whether the Washington, D.C. water and sewer authority should accept a high bid for a new waste disposal system. Decision to reject has saved the authority over $200 million, as construction prices turned down sharply as predicted.

• Built an econometric model to determine the "tax gap" caused by Internet sales for the state of Minnesota.

• Determined appropriate levels of shelter grants individual counties in New York State, and for utility allowances in New York City. Reviewed and prepared testimony in ongoing court cases in these areas.

• Calculated the economic impact of the revitalization of downtown Milwaukee, Wisconsin.

C. Economic Impact of Casino Gaming

• Built an econometric model to predict the growth of the gaming industry over the next decade, and the economic impact of that industry on employment and tax revenues at the Federal and state levels.

• Estimated the economic impact of Indian casino gaming nationally and for the State of Wisconsin.

• Determined the economic impact of the Oneida Indian gaming casino on the Green Bay metropolitan area.

• Estimated the negative economic impact on the Milwaukee area if a new Indian gaming casino were to be built in Kenosha, Wisconsin.

D. Economic Impact of Smoking Bans and Higher Taxes

• Testified on economic impact of smoking bans in Canada; certified as an expert witness by the Court.

• Examined the impact of smoking bans on restaurant sales in several different locations in the U.S. to determine how much sales changed when these bans were imposed, and the differential effects depending on whether these bans were partial or total.

• Determined the cross-border effects on retail sales from differential rates in cigarette, gasoline, and alcohol excise taxes

• Determined the economic impact of higher cigarette taxes on minority group employment.

• Estimated the economic impact and loss of Federal and state tax revenues when higher cigarette prices lead to increased smuggling.

E. Consulting Projects for Travel and Tourism

• Built an econometric model to predict tourism trips and revenues for the major regions of the U.S. economy.

• Constructed econometric models to predict tourism in Las Vegas and Orlando.

• Using the IMPLAN model, predicted economic impact of tourism and travel expenditures for all counties in Pennsylvania.

F. Other Private Sector Consulting Projects

• Calculated the economic impact of proposed EPA bans on fluoropolymer production.

• Estimated the size and economic importance of the fluoropolymer industry, and calculated economic impact of shutting down domestic production.

• Built an econometric model to examine how U.S. tax and regulatory policies help determine whether the gold mining industry would invest in the U.S. or other countries. Testified before Congress to help defeat legislation inimical to the mining industry.

• Built an econometric model to predict consumer bankruptcies, based on recent growth in consumer credit outstanding, the overall economic environment, and recent changes in credit regulations

• Estimated the economic impact of the ethanol subsidy on the U.S. economy and Farm Belt States, including the impact on the balance of payments, employment, and tax receipts. Testified before Congress to help pass legislation to extent subsidies to the ethanol industry.

• Built an econometric model to determine the impact of updating and improving the system of locks on the Upper Mississippi River on corn prices and exports, farm income, and the overall economy.

4. Using the IMPLAN Model to Calculate National Multipliers

The IMPLAN model is a regional input/model developed and maintained by the Minnesota IMPLAN group, headquartered in Minneapolis. The basic model was originally developed by the USDA Forest Service in cooperation with the Federal Emergency Management Agency and the USDI Bureau of Land Management.

The IMPLAN model has certain similarities with the RIMS (Regional Input/Output Modeling system) model developed by the Department of Commerce, but is generally thought to contain several superior features besides its greater ease and flexibility of use. These improvements can be summarized as follows:

1. The Commerce Department is not permitted to publish data in any category where there are less than three organizations in a given economic area. IMPLAN has developed an algorithm to fill in the missing numbers.

2. IMPLAN has introduced improved methods of accounting for flows of goods and services among counties.

3. IMPLAN permits aggregation of any subset of industries for calculation and tabular purposes. This is useful when results are desired for, say, 1-digit industries instead of the 509 industries actually found in the input/output table.

4. As seen in the tables throughout this text, IMPLAN estimates three separate effects, labeled "direct", "indirect" and "induced". The direct effects are those entered by the user. The other two columns represent the multiplier effects, but they are usually combined in other input/output models. Briefly, the indirect effect represents purchases made by businesses when their sales rise. For example, a restaurant might order more food produced or sold in the region, or an automobile plant might order more steel. The induced effect represents the additional household spending because income has risen. For example, casino workers would spend their paychecks on various goods and services, some of which are produced in the region. In general, then, the larger the region under consideration, the larger the multipliers would be.

The following material, taken from the IMPLAN manual, describes the input/output process in more detail.

Input/output analysis is a means of examining relationships within an economy, both between businesses and between businesses and final

consumers. It captures all of the monetary market transactions for consumption in a given time period. The resulting mathematical formulae allow examination of the effects of a change in one or several economic activities on an entire economy.

A descriptive model includes information about local economic interactions known as regional economic accounts. These tables describe a local economy in terms of the flow of dollars from purchasers to producers within the region. The initial IMPLAN data details all purchases, including imported goods and services. When regional economic accounts are created, imports to the region are removed from the initial data, allowing examination of local inter-industry transactions and final purchases.

The regional economic accounts are used to construct local level multipliers. Multipliers describe the response of the economy to a stimulus (a change in demand or production). The multipliers represent the Predictive Model.

Purchases for final use (final demand) drive an input/output model. Industries producing goods and services for consumption purchase goods and services from other producers. These other producers, in turn, purchase goods and services. These indirect purchases (or indirect effects) continue until leakages from the region (imports, wages, profits, etc.) stop the cycle.

The indirect effects and the effects of increased household spending (induced effects) can be mathematically derived as sets of multipliers. The derivation is called the Leontief inverse. The resulting sets of multipliers describe the change of output for each industry caused by a one dollar change in final demand for any given industry.

The input/output analysis framework is similar to a financial accounting framework that tracks purchases of and expenditures on goods and services in dollars. Input/output accounting traces the flow of dollars between businesses and between businesses and final consumers. An input/output accounting framework can be illustrated using classic financial accounting T-accounts, which include receipts (income) and expenditures (expenses) on each side of a "T", as shown below.

Final Consumption (or final demand) drives input/output models. Industries respond to meet demand directly or indirectly, by supplying goods and services to industries responding directly. Each industry that produces goods and services generates demands for other goods and services, and so on. Multipliers describe these iterations.

There are three different multipliers developed for predictive modeling: Type I, Type II, and Type SAM. We start with the transactions table and derive a

coefficient by dividing each industry column by the column total. This coefficient matrix is also known as the ***A Matrix***.

SAMPLE OF RECENT CONSULTING PROJECTS

For more information on these projects, see www.evanseb5.com

A. Economic Impact of EB-5 Immigrant Investor Programs and New Markets Tax Credits

- Calculated economic impact of operating new world headquarters for company manufacturing high-tech medical devices to cure prostate cancer in Lancaster County, SC.

- Calculated economic impact of opening World Trade Center building in Youngstown, Ohio.

- Calculated the economic impact of renovating and operating an older office building in Sacramento, CA.

- Determined economic impact for alternative energy production with solar panels, including an alternative energy institute and new company for financing these investments, in southern and central CA.

- Calculated economic impact of opening and operating a resort and casino in the Chinatown section of Las Vegas, NV

- Determined the economic impact of manufacturing power train components for alternative energy vehicles in the Detroit metropolitan area.

- Calculated the economic impact of opening two strip shopping centers in the Tampa, FL metropolitan area.

- Calculated the economic impact of renovating several office buildings in San Francisco, opening a hotel in Alameda County, and a food court in San Francisco.

- Calculated the economic impact of operating a solar farm in Fresno County, CA.

- Calculated the economic impact of developing office buildings, retail stores, restaurants, and assisted living centers in seven counties in Northwest NV.

- Calculated the economic impact of developing a hotel , retail stores, assisted living facilities, and industrial/warehouse "flex" space in Clark County, NV.

- Determined the economic impact of developing a beachfront resort area complex in Broward County, FL.

- Calculated the economic impact of operating a telephone call center in Dallas, TX.

- Determined that a hotel in midtown Manhattan would be included in a Targeted Employment Area for New York City.

- Calculated the economic impact of a hotel, retail stores, restaurants, assisted living facilities, office space, and industrial/warehouse "flex" space in Riverside County, CA.

- Calculated the economic impact of renovating an operating an older hotel in Miami, FL.

- Determined the economic impact of opening and operating a slot-machine casino in Hanover, MD, as part of a proposed EB-5 regional center for the Baltimore metropolitan area.

- Calculated the economic impact of renovating and expanding a restaurant on Martha's Vineyard, MA, as part of an EB-5 regional center in that state.

- Determined the economic impact of assembling and installing solar panels for residences in the state of LA.

- Determined a Targeted Employment Area for Dallas, TX as part of a proposed EB-5 regional center for the Dallas area. APPROVED

- Calculated the economic impact for various mixed used projects for a proposed regional center for the entire State of Texas, including shopping centers, office buildings, restaurants, assisted living centers, medical technology facilities, and other personal and business services.

- Calculated the economic impact for the construction and operation of several fast-food restaurants in 10 counties in central California.

- Calculated the economic impact for the renovation and expansion of a shopping mall in Greenville, SC.

- Calculated the economic impact of buying existing apartment buildings at deep discount prices, renovating and operating them, in 21 counties in FL.

- Calculated the economic impact of building and operating an institute for proton cancer therapy for a proposed EB-5 regional center in Brooklyn, NY.

- Calculated the economic impact of building and operating a mixed-use facility with medical offices, hotels, and apartments for a proposed EB-5 regional center in Queens, NY.

- Determined a Targeted Employment Area for Philadelphia, PA as part of a proposed EB-5 regional center for the Philadelphia area.

- Calculated the economic impact of a proposed office building and mixed-use facility for an EB-5 regional center in Dallas, Texas

- Calculated the economic impact for various mixed-use projects for a proposed EB-5 regional center in the greater New York City area, including an extended stay hotel, urgent care center, financial lending firm for alternative assets, retail stores, apartments, office space, warehouses, industrial "flex" space, entertainment centers, restaurants, conference and convention centers, nursing home and assisted living facilities, medical offices, medical technology facilities, and high-tech manufacturing.

- Calculated the economic impact of "green" hotels in 10 counties in Central California. APPROVED

- Calculated the economic impact of generic projects in manufacturing, financial services, health services, hotels, and restaurants for a proposed regional center for the state of Florida.

- Calculated the economic impact of 12 different types of economic activity for an expansion of the Palm Beach Regional Center to five contiguous counties.

- Calculated the economic impact of a new auto parts plant in Alabama to supply parts to Kia automobiles.

- Calculated the economic impact of opening fast-food restaurants in Miami-Dade and Broward counties in FL.

- Calculated the economic impact of a mixed-use commercial center in Flushing, Queens County, NY.

- Calculated the economic impact of revitalizing and renovating part of the Brooklyn Navy Yard for "green" manufacturing facilities.

- Calculated the economic impact of 12 different types of economic activity for various counties in Charlotte and Sarasota counties, FL APPROVED

- Calculated the economic impact of four new manufacturing and distribution companies in Palm Beach County, FL. APPROVED

- Calculated the economic impact of developing a resort area and building residences in rural Tennessee.

- Calculated the economic impact of developing and operating a resort area in Southern Arizona.

- Calculated the economic impact of revitalizing the depressed East Side of Cleveland, Ohio, with new commercial and industrial buildings. APPROVED

- Determined the nationwide economic impact of a $1 billion investment in Mississippi for a new hybrid motor vehicle plant.

- Determined the economic impact of expanding a shipyard in Southeastern Louisiana. APPROVED

- Calculated the economic impact of a new shopping center in Buena Vista, California, and two other generic shopping centers in Los Angeles and San Bernardino counties. APPROVED

- Calculated the economic impact of enhancing resort areas in eight rural counties in Colorado. APPROVED

- Calculated the economic impact of the rehabilitation of Fitzsimons Village in Aurora, Colorado, by adding an office building with medical labs, hotel, shopping center, and residences. APPROVED

- Determined the economic impact of a mixed-use commercial center for the Kansas City metropolitan area.

- Calculated the number of jobs created for a film production company in New York City.

- Calculated economic impact of small-scale rooftop solar panels in various counties in California.

- Calculated economic impact of 7 different types of proposed businesses for a proposed regional center in the Bay Area of California. APPROVED

- Determined the economic impact of a new biological research park, office building, and logistics center in Wooster, Ohio. APPROVED

- Calculated the economic effect of a mixed-use urban renewal project in Cleveland, Ohio. APPROVED

- Calculated economic impact of dairy farm and cheese processing plant in Northern California.

- Determined economic impact of a shipyard, food processing plant, and semiconductor plant for a proposed regional center in Louisiana and Mississippi.

APPROVED

- Calculated the economic impact of a new gaming casino in Natchez, Mississippi. APPROVED

- Developed an Input/Output Model for Guam, which was then used to calculate the economic impact of several generic projects. APPROVED

- Calculated the economic impact of a retail shopping center in suburban Los Angeles County. APPROVED

- Prepared an economic impact analysis for the "timber to homes" project for a proposed regional center in Colorado. APPROVED

- Calculated the economic impact for a proposed regional center in Baltimore, Maryland that would include the rebuilding of depressed areas in East Baltimore and along the riverfront.

- Prepared the economic analysis for a proposed EB-5 regional center for the entire state of Florida that included impact calculations for 14 different types of industries. APPROVED

- Prepared the economic analysis for a proposed EB-5 regional center in the San Francisco Bay area that included calculations for 10 different types of industries. APPROVED

- Prepared economic impact calculations for proposed EB-5 regional centers in New York City and Northeastern New Jersey. APPROVED

- Calculated the economic impact of a rehabilitated office building in Albuquerque, New Mexico, including the increase in high quality jobs.

- Calculated the economic impact of a rehabilitated skilled nursing center in East Los Angeles, California, including the impact on nearby census tracts.

- Calculated the economic impact of development of warehouse and light industrial manufacturing space in Las Vegas, Nevada. APPROVED

- Calculated the economic impact of rehabilitation and expansion of a vacation and health spa in Sharon Springs, New York

- Calculated economic impact of revitalizing an old resort hotel and adding new facilities for Lake Geneva, WI. APPROVED

- Calculated the employment and tax effects for a portfolio of projects undertaken under the New Market capital program.

- Calculated generic employment changes for proposed EB-5 project for an Inland Port in Palm Beach County, FL APPROVED

- Calculated the economic impact of construction of El Monte Village in El Monte, CA. APPROVED

- Built an input/output model of Guam to be used to calculate economic impact of EB-5 projects. Used this model to estimate impact of various proposed projects. APPROVED

- Calculated the economic impact of moving the Social Security Administration building in Birmingham, AL, and revitalizing the surrounding neighborhood.

- Calculated the economic impact of rehabbing and expanding the Everett Mall in Everett, WA.

- Determined the economic impact of building a new medical center in Charleston, SC

- Calculated economic impact of expanding Sugarbush resort in VT. Study included expansion of existing facilities and addition of new facilities. APPROVED

- Calculated economic impact for new market tax credit program in Portsmouth, N.H. Study included both overall economic impact, and the increase in employment and income and the decrease in the unemployment rate and incidence of poverty in individual census tracts.

- Calculated the economic benefits of EB-5 programs for foreign investors for a mixed-use construction project, including a hotel, retail stores, apartments, and a sports stadium in the Washington, D. C. metropolitan area APPROVED

- Calculated the economic benefits of EB-5 programs for foreign investors for a mixed-used retail shopping center in the New York City metropolitan area. APPROVED

- Calculated the economic benefits of EB-5 programs for foreign investors for proposed shopping centers in five separate counties in Southern California, including differential impacts of building the shopping centers in different counties. APPROVED

B. Projects for State and Local Governments

- Constructed an econometric model for the State of New York and determined the change in employment, labor income, and tax revenues for 43 different tax changes proposed by the Governor's office.

- Constructed a detailed econometric model for the State of Pennsylvania to determine the economic impact of the complete panoply of state taxes levied; the model contains over 1,000 equations. In cooperation with American Economics Group, the model was developed to simulate the effect of changes in any state tax rate on households and businesses by income deciles, household status, age of individuals, size of households, and many other demographic variables. The change in business taxes can also be simulated for detailed industry classifications.

- Determined whether the Washington, D.C. water and sewer authority should accept a high bid for a new waste disposal system. Decision to reject has saved the authority over $200 million, as construction prices turned down sharply as predicted.

- Built an econometric model to determine the "tax gap" caused by Internet sales for the state of Minnesota.

- Determined appropriate levels of shelter grants individual counties in New York State, and for utility allowances in New York City. Reviewed and prepared testimony in ongoing court cases in these areas.

- Calculated the economic impact of the revitalization of downtown Milwaukee, Wisconsin.

C. Economic Impact of Casino Gaming

- Built an econometric model to predict the growth of the gaming industry over the next decade, and the economic impact of that industry on employment and tax revenues at the Federal and state levels.

- Estimated the economic impact of Indian casino gaming nationally and for the State of Wisconsin.

- Determined the economic impact of the Oneida Indian gaming casino on the Green Bay metropolitan area.

- Estimated the negative economic impact on the Milwaukee area if a new Indian gaming casino were to be built in Kenosha, Wisconsin.

D. Economic Impact of Smoking Bans and Higher Taxes

- Testified on economic impact of smoking bans in Canada; certified as an expert witness by the Court.

- Examined the impact of smoking bans on restaurant sales in several different locations in the U.S. to determine how much sales changed when these bans were imposed, and the differential effects depending on whether these bans were partial or total.

- Determined the cross-border effects on retail sales from differential rates in cigarette, gasoline, and alcohol excise taxes

- Determined the economic impact of higher cigarette taxes on minority group employment.

- Estimated the economic impact and loss of Federal and state tax revenues when higher cigarette prices lead to increased smuggling.

E. Consulting Projects for Travel and Tourism

- Built an econometric model to predict tourism trips and revenues for the major regions of the U.S. economy.

- Constructed econometric models to predict tourism in Las Vegas and Orlando.

- Using the IMPLAN model, predicted economic impact of tourism and travel expenditures for all counties in Pennsylvania.

F. Other Private Sector Consulting Projects

- Calculated the economic impact of proposed EPA bans on fluoropolymer production.

- Estimated the size and economic importance of the fluoropolymer industry, and calculated economic impact of shutting down domestic production.

- Built an econometric model to examine how U.S. tax and regulatory policies help determine whether the gold mining industry would invest in the U.S. or other countries. Testified before Congress to help defeat legislation inimical to the mining industry.

- Built an econometric model to predict consumer bankruptcies, based on recent growth in consumer credit outstanding, the overall economic environment, and recent changes in credit regulations

• Estimated the economic impact of the ethanol subsidy on the U.S. economy and Farm Belt States, including the impact on the balance of payments, employment, and tax receipts. Testified before Congress to help pass legislation to extent subsidies to the ethanol industry.

• Built an econometric model to determine the impact of updating and improving the system of locks on the Upper Mississippi River on corn prices and exports, farm income, and the overall economy.

Part 2. Using the IMPLAN Model on a Regional and National Basis

5. Guide to Using the IMPLAN model for USCIS Adjudicators

Evans, Carroll & Associates, Inc. has used the IMPLAN model in approximately 60 studies to determine the economic impact of EB-5 and similar programs. This section explains in more detail how the IMPLAN model works, and why it is a valid approach for determining the economic impact for EB-5 regional centers.

The IMPLAN model calculates job creation for each category of economic activity. This model has been used in many earlier applications approved by USCIS and is one of the two recognized models (the other one is RIMS II) that are generally used in these applications.

IMPLAN (and other input/output models) are based on the concept of a production function, which determines the quantities of inputs that are required to produce a unit of output. The basic data are collected by the Commerce Department from a variety of sources, such as the Annual Survey of Manufacturers and various annual surveys of the service sector. The data are benchmarked to the Economic Census figures once every five years and then updated annually. These figures comprise a national input/output model.

The regional coefficients are then modified to take into account the proportion of goods and services required to produce one unit of output that are produced locally. These regional coefficients are based on data from the Economic Census.

For a manufacturing plant, for example, the raw materials required are measured by the input/output coefficients. Using the data for output per employee, these figures are then converted into new jobs created for indirect employees. The regional coefficients are then used to determine what proportion of these employees work in facilities in the local area. All these coefficients are imbedded in the IMPLAN model. The results shown in the tables contained in Sections (20) – (23) of this report are the end product of entering the inputs for direct jobs and solving the model for the indicated region; in these sections, only state multipliers are used. The calculations for national multipliers are shown in separate sections.

For a service industry such as a hotel, office building, life sciences laboratory, retail store, or restaurant, the same concept is employed, except in this case most of the indirect jobs are also in a service occupation. In order for these businesses to function, they must hire lawyers, accountants, computer programmers, and administrators. They deposit their funds in banks and other

financial institutions, creating new jobs in those industries. The buildings must be leased and the business must be insured, creating new jobs in those industries. Once again, the new jobs created are based on the regional coefficients of the IMPLAN model.

An input/output model is not a forecasting model that takes into account varying economic conditions. Instead, input/output models are designed to be static models. At any given time – based on production data gathered by the Department of Commerce – it is ascertained that a given quantity of inputs are used to determine a unit of output. These coefficients are assumed to be the same regardless of whether there is a boom or a recession. For example, it takes the same amount of coal, scrap iron, limestone, machinery, and labor to produce a ton of steel regardless of the underlying business cycle conditions.

Input/output models have been used in thousands of applications to determine the economic impact of a given investment of a specific project; sometimes these are regional models, sometimes they are national models.

The use of input/output models in general, and IMPLAN in particular, represent the standard and accepted way of determining the increase in i) employment and ii) the economic impact of regional center projects. In addition to employment, economic impact is measured by increases in output and labor income (sometimes referred to as household earnings) that will be generated by a given increase in direct jobs or expenditures for a given project. Output and labor income capture all of the factors listed in 8 C.F.R. Section 204.6(m)(3)(iv) such as "increased household earnings, greater demand for business services, utilities, maintenance and repair, and construction."

The calculation of the employment multipliers is accomplished as follows:

Appendix B. Resume of Dr. Michael K. Evans

CURRENT AND PREVIOUS POSITIONS

• Chairman, *Evans, Carroll & Associates, Inc.*, 1980-present (previously Evans Economics)

Economic consulting firm specializing in EB-5 immigration analysis, economic impact studies of development projects and new construction, models of state and local tax receipts, impact of current and proposed government legislation, and construction of econometric models for individual industries and companies.

• Chief Economist, *American Economics Group*, 2000-present.

Built a comprehensive state modeling system that provides economic analysis for a variety of consulting projects (see below).

• Clinical Professor of Economics, Department of Managerial Economics and Decision Sciences (MEDS), Kellogg Graduate School of Management, Northwestern University, 1996-99.

Taught courses in macroeconomics and business forecasting. Wrote textbooks for both courses.

• Winner of Blue Chip Economic Indicator Award for most accurate macroeconomic forecasts during the past four years, November 1999

• Founder and President, *Chase Econometric Associates*, 1970-1980

• Assistant and Associate Professor of Economics, Wharton School, University of Pennsylvania, 1964-69. Co-developer of the original Wharton Model.

• Visiting Professor, Radford University, (Radford, VA), 1987

Chairman of Institute for International Economic Competitiveness

• Visiting Lecturer, Hebrew University (Jerusalem), 1966-67

Built econometric model of the Israeli economy

Ph. D. in Economics, Brown University. Dissertation, "A Postwar Quarterly Model of the United States Economy, 1948-1962". A. B. in Mathematical Economics, Brown University

PREVIOUS ACTIVITIES AND EDUCATION

- Contributing Editor, *Industry Week*

Wrote a column in each issue on economic and financial trends as they impact the mfg sector.

- Editor, *The Evans Report*

Weekly newsletter discussing economic trends and financial markets. Pioneered the concept of the Monthly Tracking Model to incorporate recent economic releases into the overall economic forecast, including methods to predict these economic data.

- Consultant, *National Printing Equipment and Supply Association*

Prepares quarterly forecasts of shipments of printing equipment and graphic arts supplies by product line, based on an econometric model constructed for NPES. Also prepares analysis and forecasts of exports and imports by principal product line.

- Consultant, *APICS -- The Educational Society for Resource Management*,

In 1993, designed and developed the *APICS Business Outlook Index*, which uses survey data collected by the Evans Group to measure current production, production plans, shipments, employment, new orders, unfilled orders, inventory stocks, and the comparison of the actual to desired inventory/sales ratio to predict short-term changes in mfg sector activity. The results of this survey appeared every month in *APICS: The Performance Advantage*

- Consultant, *American Hardware Mfg Association*

Wrote a separate weekly edition of the Evans Report analyzing recent trends in the hardware and housing industries, including forecasts of the hardware industry based on an econometric model developed for AHMA.

- Board of Economists, *Los Angeles Times*

Wrote column every 6 weeks (5 other economists on the Board)

- Columnist, *United Press International*

Wrote twice-weekly column, "Dollars and Trends"

- Consultant, Senate Finance Committee,

  Built the first large-scale supply-side model of the U. S. economy

- Consultant, Environmental Protection Agency and Council on Environmental Quality

  Estimated inflationary impact of government regulations

- Consultant, National Aeronautics and Space Administration

  Estimate impact of R&D spending on productivity growth

- Consultant, U. S. Treasury

  Estimated impact of investment tax credit and accelerated depreciation on capital spending by industry

- Consultant, U. S. Department of Agriculture

  Built large-scale econometric model of agricultural sector of U. S. economy

- Consultant, Organization of Economic Cooperation and Development

  Built econometric model of the French economy

SAMPLE OF RECENT CONSULTING PROJECTS

For more information on these projects, see www.evanseb5.com

A. Economic Impact of EB-5 Immigrant Investor Programs and New Markets Tax Credits

- Calculated economic impact of operating new world headquarters for company manufacturing high-tech medical devices to cure prostate cancer in Lancaster County, SC.

- Calculated economic impact of opening World Trade Center building in Youngstown, Ohio.

- Calculated the economic impact of renovating and operating an older office building in Sacramento, CA.

- Determined economic impact for alternative energy production with solar panels, including an alternative energy institute and new company for financing these investments, in southern and central CA.

- Calculated economic impact of opening and operating a resort and casino in the Chinatown section of Las Vegas, NV

- Determined the economic impact of manufacturing power train components for alternative energy vehicles in the Detroit metropolitan area.

- Calculated the economic impact of opening two strip shopping centers in the Tampa, FL metropolitan area.

- Calculated the economic impact of renovating several office buildings in San Francisco, opening a hotel in Alameda County, and a food court in San Francisco.

- Calculated the economic impact of operating a solar farm in Fresno County, CA.

- Calculated the economic impact of developing office buildings, retail stores, restaurants, and assisted living centers in seven counties in Northwest NV.

- Calculated the economic impact of developing a hotel , retail stores, assisted living facilities, and industrial/warehouse "flex" space in Clark County, NV.

- Determined the economic impact of developing a beachfront resort area complex in Broward County, FL.

- Calculated the economic impact of operating a telephone call center in Dallas, TX.

- Determined that a hotel in midtown Manhattan would be included in a Targeted Employment Area for New York City.

- Calculated the economic impact of a hotel, retail stores, restaurants, assisted living facilities, office space, and industrial/warehouse "flex" space in Riverside County, CA.

- Calculated the economic impact of renovating an operating an older hotel in Miami, FL.

- Determined the economic impact of opening and operating a slot-machine casino in Hanover, MD, as part of a proposed EB-5 regional center for the Baltimore metropolitan area.

- Calculated the economic impact of renovating and expanding a restaurant on Martha's Vineyard, MA, as part of an EB-5 regional center in that state.

- Determined the economic impact of assembling and installing solar panels for residences in the state of LA.

- Determined a Targeted Employment Area for Dallas, TX as part of a proposed EB-5 regional center for the Dallas area. APPROVED

- Calculated the economic impact for various mixed used projects for a proposed regional center for the entire State of Texas, including shopping centers, office buildings, restaurants, assisted living centers, medical technology facilities, and other personal and business services.

- Calculated the economic impact for the construction and operation of several fast-food restaurants in 10 counties in central California.

- Calculated the economic impact for the renovation and expansion of a shopping mall in Greenville, SC.

- Calculated the economic impact of buying existing apartment buildings at deep discount prices, renovating and operating them, in 21 counties in FL.

- Calculated the economic impact of building and operating an institute for proton cancer therapy for a proposed EB-5 regional center in Brooklyn, NY.

- Calculated the economic impact of building and operating a mixed-use facility with medical offices, hotels, and apartments for a proposed EB-5 regional center in Queens, NY.

- Determined a Targeted Employment Area for Philadelphia, PA as part of a proposed EB-5 regional center for the Philadelphia area.

- Calculated the economic impact of a proposed office building and mixed-use facility for an EB-5 regional center in Dallas, Texas

- Calculated the economic impact for various mixed-use projects for a proposed EB-5 regional center in the greater New York City area, including an extended stay hotel, urgent care center, financial lending firm for alternative assets, retail stores, apartments, office space, warehouses, industrial "flex" space, entertainment centers, restaurants, conference and convention centers, nursing home and assisted living facilities, medical offices, medical technology facilities, and high-tech manufacturing.

- Calculated the economic impact of "green" hotels in 10 counties in Central California. APPROVED

- Calculated the economic impact of generic projects in manufacturing, financial services, health services, hotels, and restaurants for a proposed regional center for the state of Florida.

- Calculated the economic impact of 12 different types of economic activity for an expansion of the Palm Beach Regional Center to five contiguous counties.

- Calculated the economic impact of a new auto parts plant in Alabama to supply parts to Kia automobiles.

- Calculated the economic impact of opening fast-food restaurants in Miami-Dade and Broward counties in FL.

- Calculated the economic impact of a mixed-use commercial center in Flushing, Queens County, NY.

- Calculated the economic impact of revitalizing and renovating part of the Brooklyn Navy Yard for "green" manufacturing facilities.

- Calculated the economic impact of 12 different types of economic activity for various counties in Charlotte and Sarasota counties, FL APPROVED

- Calculated the economic impact of four new manufacturing and distribution companies in Palm Beach County, FL. APPROVED

- Calculated the economic impact of developing a resort area and building residences in rural Tennessee.

- Calculated the economic impact of developing and operating a resort area in Southern Arizona.

- Calculated the economic impact of revitalizing the depressed East Side of Cleveland, Ohio, with new commercial and industrial buildings. APPROVED

- Determined the nationwide economic impact of a $1 billion investment in Mississippi for a new hybrid motor vehicle plant.

- Determined the economic impact of expanding a shipyard in Southeastern Louisiana. APPROVED

- Calculated the economic impact of a new shopping center in Buena Vista, California, and two other generic shopping centers in Los Angeles and San Bernardino counties. APPROVED

- Calculated the economic impact of enhancing resort areas in eight rural counties in Colorado. APPROVED

- Calculated the economic impact of the rehabilitation of Fitzsimons Village in Aurora, Colorado, by adding an office building with medical labs, hotel, shopping center, and residences. APPROVED

- Determined the economic impact of a mixed-use commercial center for the Kansas City metropolitan area.

- Calculated the number of jobs created for a film production company in New York City.

- Calculated economic impact of small-scale rooftop solar panels in various counties in California.

- Calculated economic impact of 7 different types of proposed businesses for a proposed regional center in the Bay Area of California. APPROVED

- Determined the economic impact of a new biological research park, office building, and logistics center in Wooster, Ohio. APPROVED

- Calculated the economic effect of a mixed-use urban renewal project in Cleveland, Ohio. APPROVED

- Calculated economic impact of dairy farm and cheese processing plant in Northern California.

- Determined economic impact of a shipyard, food processing plant, and semiconductor plant for a proposed regional center in Louisiana and Mississippi.

APPROVED

- Calculated the economic impact of a new gaming casino in Natchez, Mississippi. APPROVED

- Developed an Input/Output Model for Guam, which was then used to calculate the economic impact of several generic projects. APPROVED

- Calculated the economic impact of a retail shopping center in suburban Los Angeles County. APPROVED

- Prepared an economic impact analysis for the "timber to homes" project for a proposed regional center in Colorado. APPROVED

- Calculated the economic impact for a proposed regional center in Baltimore, Maryland that would include the rebuilding of depressed areas in East Baltimore and along the riverfront.

- Prepared the economic analysis for a proposed EB-5 regional center for the entire state of Florida that included impact calculations for 14 different types of industries. APPROVED

- Prepared the economic analysis for a proposed EB-5 regional center in the San Francisco Bay area that included calculations for 10 different types of industries. APPROVED

- Prepared economic impact calculations for proposed EB-5 regional centers in New York City and Northeastern New Jersey. APPROVED

- Calculated the economic impact of a rehabilitated office building in Albuquerque, New Mexico, including the increase in high quality jobs.

- Calculated the economic impact of a rehabilitated skilled nursing center in East Los Angeles, California, including the impact on nearby census tracts.

- Calculated the economic impact of development of warehouse and light industrial manufacturing space in Las Vegas, Nevada. APPROVED

- Calculated the economic impact of rehabilitation and expansion of a vacation and health spa in Sharon Springs, New York

- Calculated economic impact of revitalizing an old resort hotel and adding new facilities for Lake Geneva, WI. APPROVED

- Calculated the employment and tax effects for a portfolio of projects undertaken under the New Market capital program.

- Calculated generic employment changes for proposed EB-5 project for an Inland Port in Palm Beach County, FL APPROVED

- Calculated the economic impact of construction of El Monte Village in El Monte, CA. APPROVED

- Built an input/output model of Guam to be used to calculate economic impact of EB-5 projects. Used this model to estimate impact of various proposed projects. APPROVED

- Calculated the economic impact of moving the Social Security Administration building in Birmingham, AL, and revitalizing the surrounding neighborhood.

- Calculated the economic impact of rehabbing and expanding the Everett Mall in Everett, WA.

- Determined the economic impact of building a new medical center in Charleston, SC

- Calculated economic impact of expanding Sugarbush resort in VT. Study included expansion of existing facilities and addition of new facilities. APPROVED

- Calculated economic impact for new market tax credit program in Portsmouth, N.H. Study included both overall economic impact, and the increase in employment and income and the decrease in the unemployment rate and incidence of poverty in individual census tracts.

- Calculated the economic benefits of EB-5 programs for foreign investors for a mixed-use construction project, including a hotel, retail stores, apartments, and a sports stadium in the Washington, D. C. metropolitan area APPROVED

- Calculated the economic benefits of EB-5 programs for foreign investors for a mixed-used retail shopping center in the New York City metropolitan area. APPROVED

- Calculated the economic benefits of EB-5 programs for foreign investors for proposed shopping centers in five separate counties in Southern California, including differential impacts of building the shopping centers in different counties. APPROVED

B. Projects for State and Local Governments

• Constructed an econometric model for the State of New York and determined the change in employment, labor income, and tax revenues for 43 different tax changes proposed by the Governor's office.

• Constructed a detailed econometric model for the State of Pennsylvania to determine the economic impact of the complete panoply of state taxes levied; the model contains over 1,000 equations. In cooperation with American Economics Group, the model was developed to simulate the effect of changes in any state tax rate on households and businesses by income deciles, household status, age of individuals, size of households, and many other demographic variables. The change in business taxes can also be simulated for detailed industry classifications.

• Determined whether the Washington, D.C. water and sewer authority should accept a high bid for a new waste disposal system. Decision to reject has saved the authority over $200 million, as construction prices turned down sharply as predicted.

• Built an econometric model to determine the "tax gap" caused by Internet sales for the state of Minnesota.

• Determined appropriate levels of shelter grants individual counties in New York State, and for utility allowances in New York City. Reviewed and prepared testimony in ongoing court cases in these areas.

• Calculated the economic impact of the revitalization of downtown Milwaukee, Wisconsin.

C. Economic Impact of Casino Gaming

• Built an econometric model to predict the growth of the gaming industry over the next decade, and the economic impact of that industry on employment and tax revenues at the Federal and state levels.

• Estimated the economic impact of Indian casino gaming nationally and for the State of Wisconsin.

• Determined the economic impact of the Oneida Indian gaming casino on the Green Bay metropolitan area.

• Estimated the negative economic impact on the Milwaukee area if a new Indian gaming casino were to be built in Kenosha, Wisconsin.

D. Economic Impact of Smoking Bans and Higher Taxes

• Testified on economic impact of smoking bans in Canada; certified as an expert witness by the Court.

• Examined the impact of smoking bans on restaurant sales in several different locations in the U.S. to determine how much sales changed when these bans were imposed, and the differential effects depending on whether these bans were partial or total.

• Determined the cross-border effects on retail sales from differential rates in cigarette, gasoline, and alcohol excise taxes

• Determined the economic impact of higher cigarette taxes on minority group employment.

• Estimated the economic impact and loss of Federal and state tax revenues when higher cigarette prices lead to increased smuggling.

E. Consulting Projects for Travel and Tourism

• Built an econometric model to predict tourism trips and revenues for the major regions of the U.S. economy.

• Constructed econometric models to predict tourism in Las Vegas and Orlando.

• Using the IMPLAN model, predicted economic impact of tourism and travel expenditures for all counties in Pennsylvania.

F. Other Private Sector Consulting Projects

• Calculated the economic impact of proposed EPA bans on fluoropolymer production.

• Estimated the size and economic importance of the fluoropolymer industry, and calculated economic impact of shutting down domestic production.

• Built an econometric model to examine how U.S. tax and regulatory policies help determine whether the gold mining industry would invest in the U.S. or other countries. Testified before Congress to help defeat legislation inimical to the mining industry.

• Built an econometric model to predict consumer bankruptcies, based on recent growth in consumer credit outstanding, the overall economic environment, and recent changes in credit regulations

• Estimated the economic impact of the ethanol subsidy on the U.S. economy and Farm Belt States, including the impact on the balance of payments, employment, and tax receipts. Testified before Congress to help pass legislation to extent subsidies to the ethanol industry.

• Built an econometric model to determine the impact of updating and improving the system of locks on the Upper Mississippi River on corn prices and exports, farm income, and the overall economy.

Re: Amendment to a Regional Center under the Immigrant Investor Pilot Program

BACKGROUND:

Pursuant to Section 610 of the Appropriations Act of 1993, on January 17, 2008, GCFM submitted a proposal for the designation of Gulf Coast Funds Management Regional Center which focuses on the entirety of the states of Mississippi and Louisiana. The industry focus is primarily as follows:

1. Shipbuilding,
2. Food Processing Plants, and
3. Manufacturing Plants.

The initial proposal contained the following evidence in support of its requested designation:

- A Job Creation Analysis and Econometric Model prepared by a professional economic analysis firm which specifically calculates but excludes construction jobs from the detailed prediction;
- A business plan reflecting the timing, scale and planned use of the alien investor capital;
- A Private Placement Memorandum;
- An Operating Agreement;
- A Subscription Agreement; and
- A Management Agreement.

The initial regional center proposal for GCFM was approved by USCIS on August 18, 2008.

On May 7, 2009, petitioner submitted an amendment to its approved regional center requesting the establishment of two additional investment GCFM funds. The amendment is approved. The separate IMPLAN investment funds have been added below.

1. Gulf Coast Automotive Investment Fund A-1 (GCAIF A-1)

Gulf Coast Automotive Investment Fund A-1 entails the construction and subsequent operation of a manufacturing facility where hybrid automobiles will be designed and manufactured. The facility will consist of multiple buildings including a factory, machine shop, office building, museum and residential housing. When fully operational, the facility is expected to be able to produce up to one million vehicles per year.

2. Gulf Coast Fund I (GCF)

(b)(4) Gulf Coast Fund I entails the construction and subsequent operation a shipyard in Houma, Louisiana where [redacted] new ships will be built. The shipyard complex will consist of four buildings, an underground foundation, footings, drainage, utilities, electrical platforms, a parking lot, warehouse and a sewage plant.

DECISION:

Based on its review and analysis of your proposal, and of your response to the USCIS Request For Evidence to which you provided a satisfactory response, USCIS hereby approves and designates GCFM as a Regional Center within the Immigrant Investor Pilot Program to include two additional, separate capital investment funds. GCFM shall continue to have a geographic scope that includes the entire states of both Mississippi and Louisiana as a Regional Center.

FOCUS OF INVESTMENT ACTIVITY AND CAPITAL INVESTMENT THRESHOLD:

The USCIS-approved focus of the GCFM business plan and job creation analysis and multipliers is to generate immigrant investor capital into the following commercial enterprise activities within Mississippi and Louisiana:

1. Shipbuilding,
2. Food Processing Plants, and
3. Manufacturing Plants.

As such, aliens seeking immigrant visas through the Immigrant Investor Pilot Program may file individual petitions with USCIS for these commercial enterprises located within the GCFM area comprised of the states of Mississippi and Louisiana. The geographic focus of this area contains numerous High Unemployment Targeted Employment Areas (TEAs) as designated by the States of Mississippi and Louisiana and rural TEA's as defined in 8 CFR 204.6(e). Therefore, the minimum capital investment threshold for any individual immigrant investment into an approved commercial enterprise throughout the Regional Center shall be not less than $ 500,000 if inside a TEA, or $1,000,000 if outside a TEA.

EMPLOYMENT CREATION:

Alien entrepreneurs who file petitions for commercial enterprises located in the GCFM area must fulfill all of the requirements set forth in 8 CFR 204.6, except that the petition need not show that the new commercial enterprises created ten new jobs indirectly as a result of the alien entrepreneur's investment. This determination has been established by way of USCIS' acceptance of the final economic analysis that is contained as part of the approved GCFM proposal and its indirect job creation model and multipliers contained within the final approved GCFM application package. In addition, where job creation or preservation of existing jobs is claimed based on a multiplier rooted in underlying new "direct jobs" in support of an immigrant investor's individual I-526 petition affiliated with the GCFM, then:

- To be credited with projected creation of new "direct" jobs for "qualifying employees" upon filing the I-526 petition, then the petition must be supported by a comprehensive detailed business plan and supporting financial, marketing and related data and analysis providing a reasonable basis for projecting creation of any new direct jobs for "qualifying employees" to be achieved/realized within two years pursuant to 8 CFR 204.6(j)(4)(B).

An alien investor's I-829 petition to remove the conditions which was based on an I-526 petition approval that involved the creation of new direct jobs or the creation of new indirect jobs based on a multiplier tied to underlying new direct jobs needs to be properly supported by evidence of job creation. To support the full number of direct and indirect new jobs being claimed in connection with removal of conditions, the petition will need to be supported by probative evidence of the number of new direct full time (35 hours per week) jobs for qualified employees whose positions have been created as a result of the alien's investment. Such evidence may include copies of quarterly state employment tax reports, Forms W-2, Forms I-9, and any other pertinent employment records sufficient to demonstrate the number of qualified employees whose jobs were created directly.

Each individual petition, in order to demonstrate that it is associated with the GCFM , in conjunction with addressing all the requirements for an individual alien entrepreneur petition, shall also contain as supporting evidence relating to this amended regional center designation, the following:

1. A copy of this letter for the GCFM amendment approval and designation.

2. A copy of the approved regional center narrative proposal and business plan.

3. A copy of the job creation methodology required in 8 CFR 204.6(j)(4)(iii), as contained in the regional center economic analysis which has been approved by USCIS, which reflects that investment by an individual alien investor of at least $500,000 into the Transit Village or any other similar project will create full-time employment positions, either directly or indirectly, for not fewer than ten qualified employees per alien investor.

4. A legally executed copy of:

    a. the Private Placement Memorandum;
    b. the Subscription Agreement; and
    c. the Operating Agreement.

DESIGNEE'S RESPONSIBILITIES INHERENT IN CONDUCT OF THE GCFM REGIONAL CENTER:

The law, as reflected in the regulations at 8 CFR 204.6(m)(6), requires that an approved regional center, in order to maintain the validity of its approval and designation, must continue to meet the statutory requirements of the Immigrant Investor Pilot Program by serving the purpose of promoting economic growth, including increased export sales (where applicable), improved regional productivity, job creation, and increased domestic capital investment. Therefore, in order for USCIS to determine whether your regional center is in compliance with the above cited regulation, and in order to continue to operate as a USCIS approved and designated regional center, your administration, oversight, and management of your regional center shall be such as to monitor all investment activities under the sponsorship of your regional center and to maintain records, data and information on a quarterly basis in order to report to USCIS upon request the following year to date information for each Federal Fiscal Year[1], commencing with the initial year as follows:

1. Provide the principal authorized official and point of contact of the regional center responsible for the normal operation, management and administration of the regional center.

2. Be prepared to explain how you are administering the regional center and how you will be actively engaged in supporting a due diligence screening of its alien investors' lawful source of capital and the alien investor's ability to fully invest the requisite amount of capital.

3. Be prepared to explain the following:

    a. How the regional center is actively engaged in the evaluation, oversight and follows up on any proposed commercial activities that will be utilized by alien investors.

    b. How the regional center is actively engaged in the ongoing monitoring, evaluation, oversight and follows up on any investor commercial activity affiliated through the regional center that will be utilized by alien investors in order to create direct and/or indirect jobs through qualifying EB-5 capital investments into commercial enterprises within the regional center.

[1] A Federal Fiscal Year runs for twelve consecutive months from October 1st to September 30th.

4. Be prepared to provide:

    a. the name, date of birth, petition receipt number, and alien registration number (if one has been assigned by USCIS) of each principal alien investor who has made an investment and has filed an EB-5/I-526 Petition with USCIS, specifying whether:
        i. the petition was filed,
        ii. is pending,
        iii. was approved,
        iv. denied, or
        v. withdrawn by the petitioner, together with the date(s) of such event.

    b. The total number of visas represented in each case for the principal alien investor identified in 4.a. above, plus his/her dependents (spouse and children) for whom immigrant status is sought or has been granted.

    c. The country of nationality of each alien investor who has made an investment and filed an EB-5/I-526 petition with USCIS.

    d. The U.S. city and state of residence (or intended residence) of each alien investor who has made an investment and filed an EB-5/I-526 petition with USCIS.

    e. For each alien investor listed in item 4.a., above, identify the following:

        i. the date(s) of investment in the commercial enterprise;

        ii. the amount(s) of investment in the commercial enterprise; and

        iii. the date(s), nature, and amount(s) of any payment/remuneration/profit/return on investment made to the alien investor by the commercial enterprise and/or regional center from when the investment was initiated to the present.

5. Be prepared to identify/list each of the target industry categories of business activity within the geographic boundaries of your regional center that have:

    a. received alien investors' capital, and in what aggregate amounts;

    b. received non-EB-5 domestic capital that has been combined and invested together, specifying the separate aggregate amounts of the domestic investment capital;

    c. of the total investor capital (alien and domestic) identified above in 5.a and 5.b, identify and list the following:
        i. The name and address of each "direct" job creating commercial enterprise.
        ii. The industry category for each indirect job creating investment activity.

6. Be prepared to provide:

    a. The total aggregate number of approved EB-5 alien investor I-526 petitions per each Federal Fiscal Year to date made through your regional center.

    b. The total aggregate number of approved EB-5 alien investor I-829 petitions per each Federal Fiscal Year to date through your regional center.

7. The total aggregate sum of EB-5 alien capital invested through your regional center for each Federal Fiscal Year to date since your approval and designation.

8. The combined total aggregate of "new" direct and/or indirect jobs created by EB-5 investors through your regional center for each Federal Fiscal Year to date since your approval and designation.

9. If applicable, the total aggregate of "preserved" or saved jobs by EB-5 alien investors into troubled businesses through your regional center for each Federal Fiscal Year to date since your approval and designation.

10. If for any given Federal Fiscal Year your regional center did or does not have investors to report, then provide:

    a. a detailed written explanation for the inactivity,

    b. a specific plan which specifies the budget, timelines, milestones and critical steps to:

        i. actively promote your regional center program,

        ii. identify and recruit legitimate and viable alien investors, and

        iii. a strategy to invest into job creating enterprises and/or investment activities within the regional center.

11. Regarding your website, if any, please be prepared to provide a hard copy which represents fully what your regional center has posted on its website, as well as providing your web address. Additionally, please provide a packet containing all of your regional center's hard copy promotional materials such as brochures, flyers, press articles, advertisements, etc.

12. Finally, please be aware that it is incumbent on each USCIS approved and designated regional center, in order to remain in good standing, to notify USCIS within 15 business days at USCIS.ImmigrantInvestorProgram@dhs.gov of any change of address or occurrence of any material change in:
    - the name and contact information of the responsible official and/or Point of Contact (POC) for the RC

- the management and administration of the RC,
- the RC structure,
- the RC mailing address, web site address, email address, phone and fax number,
- the scope of the RC operations and focus,
- the RC business plan,
- any new, reduced or expanded delegation of authority , MOU, agreement, contract, etc. with another party to represent or act on behalf of the RC,
- the economic focus of the RC, or
- any material change relating to your regional center's basis for its most recent designation and/or reaffirmation by USCIS.

If you have any questions concerning the GCFM amendment approval and designation under the Immigrant Investor Pilot Program, please contact USCIS by e-mail at USCIS.ImmigrantInvestorProgram@dhs.gov.

INSTRUCTIONS:
Enclosed please find the decision of the Administrative Appeals Office in your case. All of the documents related to this matter have been returned to the office that originally decided your case. Please be advised that any further inquiry that you might have concerning your case must be made to that office.

If you believe the law was inappropriately applied by us in reaching our decision, or you have additional information that you wish to have considered, you may file a motion to reconsider or a motion to reopen. The specific requirements for filing such a request can be found at 8 C.F.R. § 103.5. All motions must be submitted to the office that originally decided your case by filing a Form I-290B, Notice of Appeal or Motion, with a fee of $630. Please be aware that 8 C.F.R. § 103.5(a)(1)(i) requires that any motion must be filed within 30 days of the decision that the motion seeks to reconsider or reopen.

Perry Rhew
Chief, Administrative Appeals Office

DISCUSSION: The Director, California Service Center, denied the proposal to amend a designation as a regional center. The director reaffirmed that decision on motion. The matter is now before the Administrative Appeals Office (AAO) on certification. The AAO will withdraw the director's decision in part, and affirm the decision of the director in part. The request to amend the regional center designation will be denied.

The applicant, Gulf Coast Funds Management, LLC (GCFM), is a regional center pursuant to section 610(c) of the Departments of Commerce, Justice and State, the Judiciary, and Related Agencies Appropriations Act of 1993, Pub. L. No. 102-395, 106 Stat. 1874 (1992), as amended by section 116 of Pub. L. No. 105-119, 111 Stat. 2440 (1997); section 402 of Pub. L. No. 106-396, 114 Stat. 1637 (2000) and section 11037 of Pub. L. No. 107-273, 116 Stat. 1758 (2002). The initial proposal, which the applicant filed on January 17, 2008, requested that U.S. Citizenship and Immigration Services (USCIS) include the states of Mississippi and Louisiana. USCIS approved the general regional center proposal on August 18, 2008.

On May 7, 2009, the applicant filed its first amendment request for two specific projects. The projects envision (1) limited liability companies (funds) that will make an equity investment in Hybrid Kinetic Automotive Corporation (Hybrid Kinetic), a Mississippi entity, for the purpose of building a car manufacturing plant and (2) investments in a shipyard in Louisiana. On July 13, 2009, USCIS approved the amendment.[1]

On January 15, 2010, the applicant filed a second amendment request, this time to expand the geographic area to include parts of Virginia for purposes of constructing a car parts manufacturing plant. In this request, the applicant proposed an investment in GreenTech Automotive, Inc. "formerly known as Hybrid Kinetic Automotive Corp." The applicant submitted the Mississippi Articles of Merger listing Hybrid Kinetic and GreenTech Automotive, Inc. as the merging companies. The applicant also submitted a Virginia Certificate of Incorporation for a new entity, WM GreenTech Automotive Corp. USCIS denied the amendment request on February 18, 2010 as the applicant failed to explain how the addition of parts of Virginia would allow the regional center designation to remain a limited geographic area.

On February 22, 2010, the applicant filed the instant amendment request. The applicant now seeks to amend its geographic region to include Tennessee and portions of Virginia. The applicant still proposes to build the car manufacturing plant in Mississippi and the car parts manufacturing plant in Virginia, but now includes a warehouse in Tennessee near the Mississippi border. The director denied the applicant's request on August 11, 2010 and reaffirmed that decision on motion. The director certified her decision to the AAO on January 28, 2011.

In reaffirming the denial of the amendment request on motion, the director determined (1) that the investors would have reduced management rights; (2) that the purchase of stock undermined the congressional intent to promote pooled investment; (3) that the proposal to convert each membership unit to an estimated price of $550,000 in common stock in five years constituted an impermissible

[1] Although various documents in the record of proceeding reference "Hybrid Kinetics Automotive Corp.," the Mississippi corporate filings list the company name as "Hybrid Kinetic Automotive Corp."

redemption agreement; and (4) that the amendment did not propose investments in a distinct, contiguous geographic region.

Pursuant to 8 C.F.R. § 103.4(a)(2), the director advised the applicant that it could submit a brief to the AAO within 30 days. The applicant resubmitted the February 22, 2010 amendment request. This resubmission failed to address issues numbered (1) through (3) above. The purpose of a certification is to address unusually complex and novel issues of law or fact. 8 C.F.R. § 103.4(a)(1). By not addressing those issues, the applicant missed an opportunity to further explain its position on these issues to the AAO.

On August 24, 2011, the AAO issued a request for evidence seeking clarification and documents. Specifically, the AAO advised the applicant that while the record of proceeding fully addressed issues (1), (2) and (4); documents that would fully explain the relationship between GCFM, each of the proposed funds, and GreenTech Automotive, Inc. and WM GreenTech Automotive Corp. were absent from the record.

In response, the applicant first asserts that "the record should note that [GCFM] believes that it assisted [USCIS] in clarifying the record in terms of the first two issues in responding to several requests for evidence focusing on individual GCFM I-526s and that [the issue regarding the geographic area to include Tennessee and Virginia] was reviewed internally by USCIS." The implication is that other offices within USCIS have already resolved the issues that are before the AAO.

First, any information provided to USCIS with respect to an individual investor's Form I-526 petition is contained within a separate record of proceeding. *See* 8 C.F.R. § 103.8(d). In making a determination of statutory eligibility, USCIS is limited to the information contained in the record of proceeding. *See* 8 C.F.R. § 103.2(b)(16)(ii). The AAO is unaware of any pending Form I-526 appeals with respect to the funds for this regional center, nor are the Form I-526 records of proceeding or any documents peculiar to those files before the AAO. The only record of proceeding before the AAO at this time is the amended regional center application. Second, the applicant does not explain what office within USCIS has conducted an "internal review" of the concerns raised by the service center director with respect to the geographic area of the regional center. There is nothing within this record of proceeding to suggest that this issue has been resolved. Accordingly, the AAO will address both of these concerns within the context of this decision.

The applicant now acknowledges that GreenTech Automotive, Inc. and WM GreenTech Automotive Corp. are separate entities despite consistently referring to both entities interchangeably as "GTA" in previous correspondence and in previous agreements. The applicant further acknowledges that GreenTech Automotive Corp. issued preferred shares in error to GCFM, the company managing the funds, rather than to the pooled investment funds and that some investors submitted these shares to USCIS.[2] The applicant further documents that the stock option/cash reimbursement provision in a Business Cooperation Agreement that the applicant had previously submitted was, in fact, revoked on

[2] The applicant again appears to be referencing records of proceeding that are not before the AAO. There are no Form I-526 appeals or certified Form I-526 decisions relating to this regional center's investment funds pending before the AAO at this time.

February 2, 2010, prior to the filing of the instant amendment request, and without notice to USCIS. The applicant's response includes agreements fundamental to the rights and duties of the parties involved that was not previously in the record of proceeding. The most significant of these documents is the Attachment to the Articles of Incorporation of GreenTech Automotive, Inc. The response acknowledges that the applicant has previously submitted confusing, erroneous and incomplete statements and documents to USCIS.

The applicant's response also includes an amended Operating Agreement for GTA Fund A-2, LLC dated January 18, 2011 that was not previously part of the record. Most significantly this amended agreement proposes to purchase stock in GreenTech Automotive, Inc. rather than WM GreenTech Automotive Corp. This change is fundamental to the AAO's analysis as the record does not contain any stock conversion provisions for WM GreenTech Automotive Corp. As will be discussed below, the amendment proposal is not approvable because of the valid concerns over the geographic region described. The January 18, 2011 Operating Agreement postdates the filing of the amendment. As the January 18, 2011 Operating Agreement changes the entity in which the fund will purchase stock, that change is a material one. An applicant may not make material changes to a proposal that has already been filed in an effort to make an apparently deficient proposal conform to USCIS requirements. *See Matter of Izummi,* 22 I&N Dec. 169, 175 (Comm'r 1998). Therefore, if otherwise approvable, the AAO would not consider the January 18, 2011 Operating Agreement and would conclude that the record lacks evidence of the provisions WM GreenTech Automotive, Corp. has, if any, for converting preferred stock to common stock. In the interest of thoroughness, however, the AAO will address the January 18, 2011 Operating Agreement.

Finally, while the applicant acknowledges that it has submitted offering memoranda, operating agreements and subscription agreements for multiple investment funds, it now concedes that it only intends to proceed with two of those funds. The AAO will only address these two funds in this decision.

For the reasons discussed below, the AAO finds that the provision in the GTA Automotive Investment Fund 1, LLC Operating Agreement that the director identified as reducing management rights is not problematic. The AAO will also withdraw the director's concerns that the stock purchase agreement undermines the concept of a pooled investment. Further, while any stock conversion agreement must be examined carefully to ensure that it does not effectively constitute a redemption agreement, the record now reflects that the proposed conversion of membership interests in each of the funds to common stock does not, in this case, amount to a redemption agreement. While the AAO does not question that there are legitimate business reasons to build one of the project's plants in Virginia, it remains that approving the requested amendment would negate any meaning to the geographical concept inherent in the regional center program and as interpreted by USCIS. Thus, the addition of the Virginia plant would need to form the basis of a new regional center application. For this reason alone the AAO will uphold the director's denial of the applicant's amendment request.

An application or petition that fails to comply with the technical requirements of the law may be denied by the AAO even if the Service Center does not identify all of the grounds for denial in the initial decision. *See Spencer Enterprises, Inc. v. United States*, 229 F. Supp. 2d 1025, 1043 (E.D.

Cal. 2001), *aff'd*, 345 F.3d 683 (9th Cir. 2003); *see also Soltane v. DOJ*, 381 F.3d 143, 145 (3d Cir. 2004) (noting that the AAO conducts appellate review on a *de novo* basis).

USCIS's examination of the provisions in the offering memoranda and operating agreements derives from the regulations and precedent decisions relating to Form I-526 adjudication. The AAO finds that these concerns may be identified at the regional center proposal stage. The regulation at 8 C.F.R. § 204.6(m)(3)(iv) requires that the regional center proposal explain how the regional center will have a positive impact on the regional or national economy. A proposal that contains agreements that do not comply with the regulations at 8 C.F.R. § 204.6(a)-(j), however, cannot demonstrate how the regional center will have a positive impact, as USCIS will not approve any Form I-526 petitions based on those agreements. Thus, USCIS does not err in reviewing the regional center proposal for Form I-526 compliance.

I. RELEVANT STATUTE AND REGULATIONS

Section 203(b)(5) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1153(b)(5), as amended by Pub. L. No. 107-273, 116 Stat. 1758 (2002), provides classification to qualified immigrants seeking to enter the United States for the purpose of engaging in a new commercial enterprise:

> (i) in which such alien has invested (after the date of the enactment of the Immigration Act of 1990) or, is actively in the process of investing, capital in an amount not less than the amount specified in subparagraph (C), and
>
> (ii) which will benefit the United States economy and create full-time employment for not fewer than 10 United States citizens or aliens lawfully admitted for permanent residence or other immigrants lawfully authorized to be employed in the United States (other than the immigrant and the immigrant's spouse, sons, or daughters).

Section 610 of the Departments of Commerce, Justice and State, the Judiciary, and Related Agencies Appropriations Act of 1993, as amended, provides:

> (a) Of the visas otherwise available under section 203(b)(5) of the Immigration and Nationality Act (8 U.S.C. 1153(b)(5)), the Secretary of State, together with the Attorney General, shall set aside visas for a pilot program to implement the provisions of such section. Such pilot program shall involve a regional center in the United States, designated by the Attorney General on the basis of a general proposal, for the promotion of economic growth, including increased export sales, improved regional productivity, job creation, or increased domestic capital investment. A regional center shall have jurisdiction over **a limited geographic area**, which shall be described in the proposal and consistent with the purpose of concentrating pooled investment in defined economic zones. The establishment of a regional center may be based on general predictions, contained in the proposal, concerning the kinds of commercial enterprises that will receive capital from aliens, the jobs that will be

> created directly or indirectly as a result of such capital investments, and the other positive economic effects such capital investments will have.
>
> * * *
>
> (c) In determining compliance with section 203(b)(5)(A)(iii) of the Immigration and Nationality Act, and notwithstanding the requirements of 8 CFR 204.6, the Attorney General shall permit aliens admitted under the pilot program described in this section to establish reasonable methodologies for determining the number of jobs created by the pilot program, including such jobs which are estimated to have been created indirectly through revenues generated from increased exports, improved regional productivity, job creation, or increased domestic capital investment resulting from the pilot program.

(Bold emphasis added.)

The regulation at 8 C.F.R. § 204.6(j)(5) states:

> To show that the petitioner is or will be engaged in the management of the new commercial enterprise, either through the exercise of day-to-day managerial control or through policy formulation, as opposed to maintaining a purely passive role in regard to the investment, the petition must be accompanied by:
>
> (i) A statement of the position title that the petitioner has or will have in the new enterprise and a complete description of the position's duties;
>
> (ii) Evidence that the petitioner is a corporate officer or a member of the corporate board of directors; or
>
> (iii) If the new enterprise is a partnership, either limited or general, evidence that the petitioner is engaged in either direct management or policy making activities. For purposes of this section, if the petitioner is a limited partner and the limited partnership agreement provides the petitioner with certain rights, powers, and duties normally granted to limited partners under the Uniform Limited Partnership Act, the petitioner will be considered sufficiently engaged in the management of the new commercial enterprise.

The regulation at 8 C.F.R. § 204.6(e) states, in pertinent part, that:

> *Invest* means to contribute capital. A contribution of capital in exchange for a note, bond, convertible debt, obligation, or any other debt arrangement between the alien entrepreneur and the new commercial enterprise does not constitute a contribution of capital for the purposes of this part.

The regulation at 8 C.F.R. § 204.6(m) provides, in pertinent part:

> (1) *Scope.* The Immigrant Investor Pilot Program is established solely pursuant to the provisions of section 610 of the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriation Act, and subject to all conditions and restrictions stipulated in that section. Except as provided herein, aliens seeking to obtain immigration benefits under this paragraph continue to be subject to all conditions and restrictions set forth in section 203(b)(5) of the Act and this section.

The regulation at 8 C.F.R. § 204.6(m)(3) provides:

> *Requirements for regional centers.* Each regional center wishing to participate in the Immigrant Investor Pilot Program shall submit a proposal to the Assistant Commissioner for Adjudications, which:
>
> (i) Clearly describes how the regional center focuses on **a geographical region of the United States**, and how it will promote economic growth through increased export sales, improved regional productivity, job creation, and increased domestic capital investment;
>
> (ii) Provides in verifiable detail how jobs will be created indirectly through increased exports;
>
> (iii) Provides a detailed statement regarding the amount and source of capital which has been committed to the regional center, as well as a description of the promotional efforts taken and planned by the sponsors of the regional center;
>
> (iv) Contains a detailed prediction regarding the manner in which the regional center will have a positive impact on the regional or national economy in general as reflected by such factors as increased household earnings, greater demand for business services, utilities, maintenance and repair, and construction both within and without the regional center; and
>
> (v) Is supported by economically or statistically valid forecasting tools, including, but not limited to, feasibility studies, analyses of foreign and domestic markets for the goods or services to be exported, and/or multiplier tables.

(Bold emphasis added.)

Finally, the regulation at 8 C.F.R. § 204.6(m)(3)(ii) requires the applicant to provide "verifiable" detail as to how the jobs will be created.

USCIS has been encouraged to accept any projections previously submitted at the regional center stage when adjudicating the Form I-526 petitions filed by individual alien investors provided that

there has been no material change and absent fraud.[3] USCIS, however, has the authority to evaluate whether a regional center will have a positive impact on the regional or national economy. 8 C.F.R. § 204.6(m)(3)(iv). USCIS will not abdicate its authority to verify that the regional center proposals are reasonable. USCIS must evaluate all of the documents submitted with a regional center approval for compliance with both regional center and investor requirements.

Addressing all concerns at the regional center stage will increase the likelihood of job creation and, absent a material change, the likelihood that the aliens who invest in the project will not only be able to obtain conditional permanent resident status but also demonstrate compliance with the requirements to remove conditions on their status through the success of their investment. While the AAO recognizes that the applicant cannot guarantee the proposed regional center's success, it is not (1) in the interest of USCIS or the aliens who invest in a regional center and (2) consistent with Congressional intent to improve regional productivity to approve a regional center whose proposal is not based on a reasonable economic analysis.

(b)(4)

II. ANALYSIS

A. Management

[3] *See* the March 28, 2009 Employment Creation Immigrant Visa (EB-5) Program Recommendations prepared by the USCIS Office of the Ombudsman, incorporated into the record of proceeding. *See also USCIS Responses to Public Form I-924/I-924A Comments* [*sic*] at www.reginfo.gov (noting that USCIS accepted the American Immigration Lawyers Association suggestion that USCIS should not readjudicate or reconsider its decision to approve even a legally deficient regional center application) (copy incorporated into the record of proceeding).

The director concluded that this provision negates the normal rights of a limited partner as specified in the Uniform Limited Partnership Act (ULPA). The director, however, did not cite to any provision in the ULPA providing that limited partners normally have the authority to act for the Company solely by virtue of being a limited partner.

As previously noted, the regulation at 8 C.F.R. § 204.6(j)(5)(iii) states:

> For purposes of this section, if the petitioner is a limited partner and the limited partnership agreement provides the petitioner with certain rights, powers, and duties normally granted to limited partners under the Uniform Limited Partnership Act, the petitioner will be considered sufficiently engaged in the management of the new commercial enterprise.

Section 302 of the ULPA (2001), titled "No Right or Power as Limited Partner to Bind Limited Partnership," states that "[a] limited partner does not have the right or the power as a limited partner to act for or bind the limited partnership." ULPA of 2001, available at http://www.law.upenn.edu/bll/archives/ulc/ulpa/final2001.pdf. In the comment associated with this section, the drafting committee noted:

> In this respect a limited partner is analogous to a shareholder in a corporation; status as owner provides neither the right to manage nor a reasonable appearance of that right.
>
> The phrase "as a limited partner" is intended to recognize that: (i) this section does not disable a general partner that also owns a limited partner interest, (ii) the partnership agreement may as a matter of contract allocate managerial rights to one or more limited partners; and (iii) a separate agreement can empower and entitle a person that is a limited partner to act for the limited partnership in another capacity; e.g., as an agent.

The ULPA further specifies various circumstances in which limited partners have consent and management rights, including actions such as: the admission of a limited partner (Section 301(3) of the ULPA); admission of a general partner (Section 401(4)); amendment of the partnership agreement (Section 406(b)(1)); the disposition of all or substantially all of the limited partnership's property, outside the ordinary course (Section 406(b)(3)); the expulsion of a limited partner by consent of the other partners (Section 601(b)(4)); the expulsion of a general partner by consent of the other partners (Section 603(4)); causing dissolution by consent (Section 801(2)); and approving, amending or abandoning a plan of merger (Sections 1107(a) and (b)(2)).

The fact that the regulations refer to a partnership is not dispositive in this case. The organization in the present case is a Limited Liability Company (LLC), which possesses the features of both a corporation and a partnership. Properly structured, the owners of an LLC obtain both a corporate-styled liability shield and the pass-through tax benefits of a partnership. General partnerships do not

offer their general partners a corporate-styled liability shield. Limited partnerships provide their limited partners a shield from liability exceeding their initial investment.

C Corporations do not offer their shareholders the same pass-through tax benefits of a partnership. *Cf.* Uniform Limited Liability Company Act (2006), available at http://www.law.upenn.edu/bll/archives/ulc/ullca/ULLCA_Final_06_1.htm.

Significantly, the Uniform Limited Liability Company Act (2006) provides a member with rights, powers, and duties similar to or even greater than those that are normally granted to limited partners under the Uniform Limited Partnership Act. *Id.* In a typical limited liability company, the management and conduct of the company is vested in the members, each member has equal rights in the management and conduct of the company's activities, and any difference arising among members may be decided by a majority of the members. *Id.* at section 407(b). Where the operating agreement reflects that the company will be managed by managers or member-managed, the managers exclusively decide any matter relating to the activities of the company. *Id.* at 407(a), (c)

Notably, the Uniform Limited Liability Company Act (2006) provides:

> The consent of all members is required to:
>
> > (A) sell, lease, exchange, or otherwise dispose of all, or substantially all, of the company's property, with or without the good will, outside the ordinary course of the company's activities;
> >
> > (B) approve a merger, conversion, or domestication under [Article] 10;
> >
> > (C) undertake any other act outside the ordinary course of the company's activities; and
> >
> > (D) amend the operating agreement.

Id. at 407(c)(4).

The AAO is persuaded that the provision in GTA Automotive Investment Fund 1, LLC's operating agreement indicates that the members will have certain rights, powers and duties normally granted to limited partners under the ULPA. The AAO notes that Article 6, section 6.1 of the Sample 2010 Operating Agreement for GTA Automotive Investment Fund 1, LLC provides the members with specific voting rights that Article 6, section 6.3 does not nullify. For example, in this case a majority of the members of GTA Automotive Investment Fund 1, LLC may approve an amendment to the operating agreement or a change in the nature of the business from owning and holding the Preferred Shares or the liquidation or winding up of the Company. The majority may also approve the liquidation or winding up of GTA Automotive Investment Fund 1, LLC. *See* Sample 2010 Operating Agreement for GTA Automotive Investment Fund 1, LLC, Article VI, section 6.1. More generally, the non-managing members of a limited liability company serve in a similar role to

limited partners in a limited partnership. Similarly, the managing members of a limited liability company serve in a similar role to general partners of a limited partnership.

Accordingly, the AAO withdraws the director's finding on this issue.

B. Stock Purchase

Article II, section 2.3 of the 2009 Operating Agreement for Gulf Coast Automotive Investment Fund A-1, LLC states:

> Purpose. The Company is organized to invest in the Preferred Shares until the Preferred Shares are converted into common stock, at which time the common stock will be distributed to the Members and the Company will be liquidated.

The January 18, 2011 Operating Agreement for GTA Fund A-2, LLC states:

> Purpose. The Company is organized to invest in the Preferred Shares until the Preferred Shares are converted into common stock, at which time the common stock will be distributed to the Members and the Company's assets will be orderly liquidated [*sic*] in accordance with distribution obligation to Members.

Article I of the Operating Agreement for Gulf Coast Automotive Investment Fund A-1, LLC defines preferred shares as preferred stock in "GreenTech Automotive, Corp.," a company that will do business in Mississippi.[4] Article I of the January 18, 2011 Operating Agreement for GTA Fund A-2 defines preferred shares as preferred stock of GreenTech Automotive, Inc.

The director concluded that the purchase of stock in GreenTech Automotive, Inc. undermines Congressional intent for a pooled investment. While the director made no mention of GreenTech Automotive, Inc.'s issuance of preferred stock directly to the fund manager, counsel acknowledges in response to the AAO's request for additional evidence that GreenTech Automotive, Inc. issued such shares in error. The unsupported assertions of counsel do not constitute evidence. *Matter of Obaigbena,* 19 I&N Dec. 533, 534 n.2 (BIA 1988); *Matter of Laureano,* 19 I&N Dec. 1, 3 n.2 (BIA 1983); *Matter of Ramirez-Sanchez,* 17 I&N Dec. 503, 506 (BIA 1980).

---

[4] The Mississippi corporation documented in the record, however, is GreenTech Automotive, Inc., not GreenTech Automotive, Corp. A review of corporate records for Mississippi reveals that GreenTech Automotive Corp. does not exist in Mississippi. *See* https://business.sos.state.ms.us/corp/soskb/SearchResults.asp?FormName=CorpNameSearch&Words=Starting&SearchStr=greentech+automotive, accessed September 1, 2011 and incorporated into the record of proceeding. The Virginia corporation documented in the record is WM GreenTech Automotive, Corp, not GreenTech Automotive, Corp, although a corporation with that name does exist in Virginia. *See* https://cisiweb.scc.virginia.gov/instant.aspx, accessed September 1, 2011 and incorporated into the record of proceeding.

The proposal before the AAO contemplates that the fund will purchase stock and that is the proposal the AAO must consider. The AAO finds the fund's proposed purchase of stock is not problematic. The offering memoranda for the various limited liability companies clearly indicate that the investor funds would be pooled in Gulf Coast Automotive Investment Fund A-1, LLC or GTA Fund A-2, LLC initially and throughout the conditional residence period. Thus, the AAO will withdraw the director's concern that the proposal to purchase stock precludes a pooled investment strategy during the conditional residence period. Once pooled, the limited liability companies serve as pass-through entities for the investment of the funds in the job creating enterprise through the purchase of stock in that enterprise.

C. Stock Conversion

As stated above, the operating agreements provide that, upon conversion of preferred stock to common stock, the funds will distribute the common stock to the members. Based on language in the offering memoranda and business plan specifying the worth of that stock at the time of conversion, the director concluded these provisions constituted an impermissible redemption agreement.

Upon review of all the agreements representing the rights and duties of all involved parties, most significantly the evidence submitted in response to the AAO's request for additional evidence, the AAO concludes that the investor fund members place their funds at risk of loss at the time of investing in the funds and at risk for the purpose of generating a return at the time of conversion.

The record contains the following documents relevant to Gulf Coast Automotive Fund A-1, LLC, GTA Fund A-2, Gulf Coast Funds Management, LLC (the managing member of the funds) and GreenTech Automotive, Inc.:

1. A Business Cooperation Agreement between the Gulf Coast Funds Management, LLC (the managing member of the limited liability companies) and Hybrid Kinetic Automotive Corp. (and its successors). This agreement postdates the approval of the applicant's original regional center request and, thus, the approval did not take this agreement into account.

2. A February 2, 2010 Addendum to the Business Cooperation Agreement

3. A March 31, 2009 Offering Memorandum for Gulf Coast Automotive Investment Fund A-1.

4. A 2010 Offering Memorandum for GTA Fund A-2.

5. An operating agreement for Gulf Coast Automotive Investment Fund A-1, LLC dated "____th day of August, 2009."

6. A January 18, 2011 Operating Agreement for GTA Fund A-2, LLC.

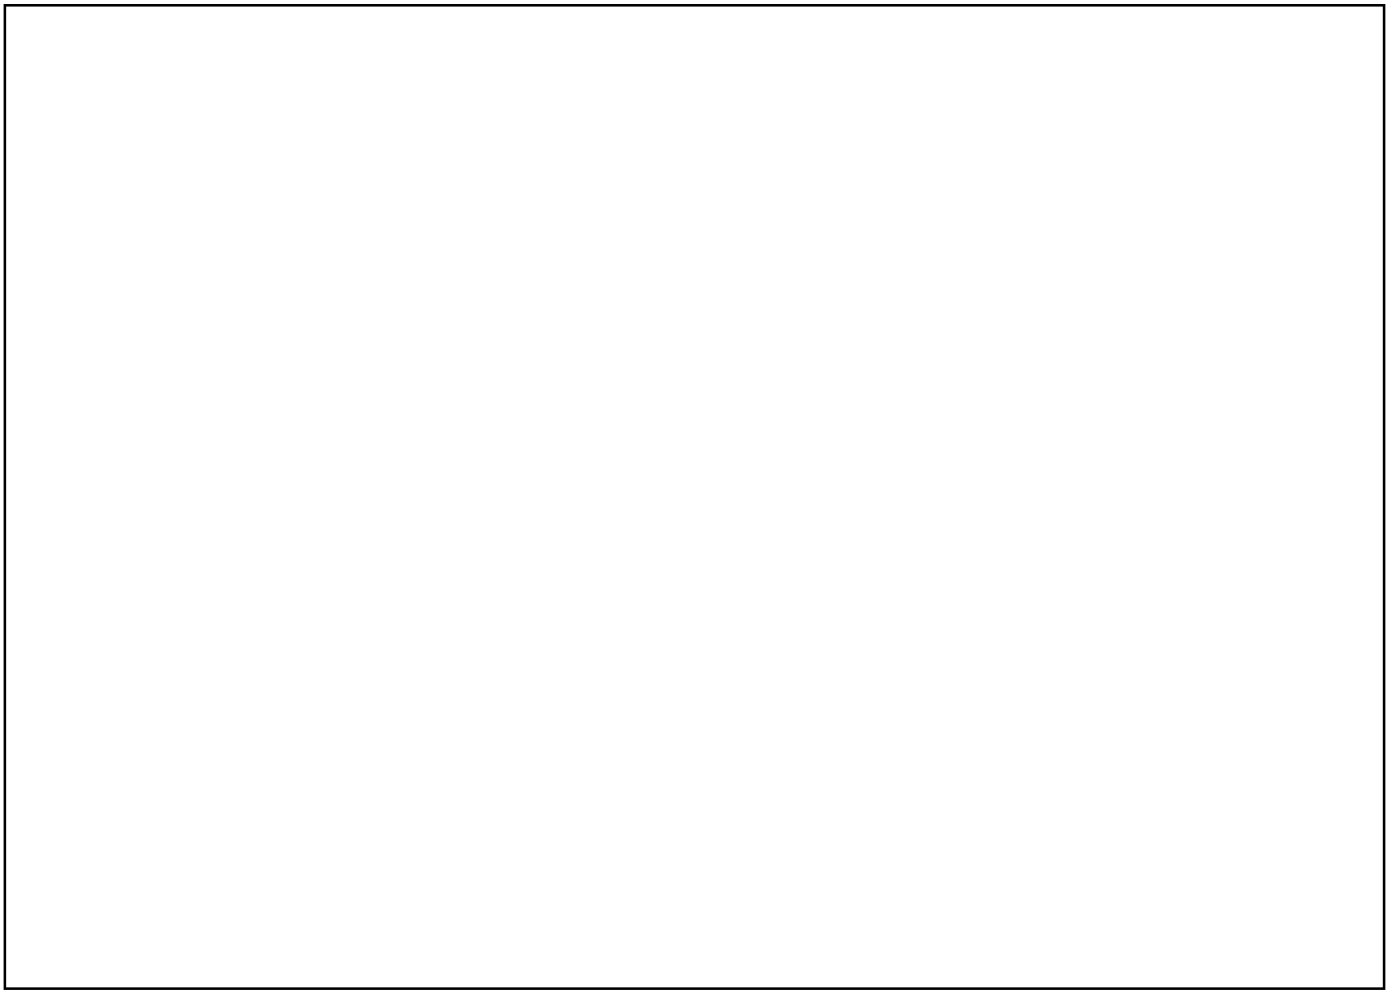
7. An undated Attachment to Articles of Incorporation of GreenTech Automotive, Inc.

The applicant submitted documents 2, 6 and 7 for inclusion in the case before the AAO for the first time in response to the AAO's request for additional evidence. It is these critical documents, however, that allow the AAO to trace the rights and duties of all parties involved.

1. The Offering Memoranda

The record, which includes the original proposal and three amendment requests, contains multiple Offering Memoranda for several funds. The AAO will consider the documents pertaining to Gulf Coast Investment Fund A-1, LLC and GTA Fund A-2, LLC. The March 31, 2009 Offering Memorandum for Gulf Coast Investment Fund A-1, LLC, which the applicant submitted with the May 1, 2009 amendment request, permits the issuance of up to 100 units of membership interest and provides:

(b)(4)



The Operating Agreement for Gulf Coast Automotive Investment Fund A-1, LLC, Article 8.2 states:

The sample Operating Agreement for GTA Fund A-2, LLC provides the same language, except that the last sentence specifies that the company shall be dissolved "after the last Member's Preferred Share is converted."

The February 1, 2010 Business Plan for GCFM discussing the regional center's investment in both GreenTech Automotive, Inc. and WM GreenTech Automotive, Corp. provides:

[5] A Membership Unit is the ownership interest an investor receives for

2. Redemption Agreement

Eligibility for the employment creation visa hinges on the alien investor's actual investment of the required amount of capital. The regulations define the term "invest" as a "contribution of capital," excluding any contribution of capital as part of a debt arrangement between the alien investor and the new commercial enterprise. 8 C.F.R. § 204.6(e).

As evidence of the required investment, the regulations further require the alien investor to show that the funds have been placed "at risk":

> To show that the petitioner has invested or is actively in the process of investing the required amount of capital, the petition must be accompanied by evidence that the petitioner has placed the required amount of capital *at risk* for the purpose of generating *a return* on the capital placed *at risk.*

8 C.F.R. § 204.6(j)(2) (emphasis added).

According to the Financial Industry Regulatory Authority, the largest independent regulator for all securities firms doing business in the United States, risk is the possibility that an investment will lose, or not gain, value. *See* http://apps.finra.org/investor_information/smart/bonds/BondGlossary.asp (accessed September 1, 2011 and incorporated into the record of proceedings). That said, the regulation at 8 C.F.R. § 204.6(j)(2) unambiguously requires that an investor also have a chance at gain. *See also Matter of Izummi,* 22 I&N Dec. at 187.

The AAO acknowledges that there are many types of financial risk. *See* http://apps.finra.org/investor_information/smart/bonds/BondGlossary.asp, http://www.finra.org/Investors/SmartInvesting/AdvancedInvesting/ManagingInvestmentRisk/. Generally considered on a spectrum from lesser risk to greater risk, financial risk may include inflation risks, interest rate risks, currency exchange risks, liquidity risk, credit risks, and market risk, also known as systematic risk. *Id.* Liquidity risk, the risk that an investor might not be able to buy or sell investments quickly for a price that is close to the true underlying value of the asset, is a systematic risk. *Id.* All of these risks are measurable financial mechanisms which may decrease the value of an asset or investment over time.

The EB-5 case law specifically requires a market risk before the alien investor's contribution of capital may be considered an actual investment. In other words, there must be a chance that the invested principal will decrease in value. *See Matter of Izummi*, 22 I&N Dec. at 186. More specifically, for the alien's money to be truly at risk, the alien cannot invest into a commercial enterprise knowing that he has a willing buyer in a certain number of years, nor can he be assured that he will receive a certain price. *Id.* That precedent decision further notes: "True fair market value cannot be known five years in advance" and "assumes the existence of a market." The decision continues:

> The alien must go into the investment not knowing for sure if he will be able to sell his interest at all after he obtains his unconditional permanent resident status; and if he is successful in selling his interest, the sale price may be disappointingly low (or surprising[ly] high and more than what he paid). This way, the alien risks both gain and loss.

Id. at 186-87.

Federal courts have found that this interpretation rationally advances the job creation purposes of the statute by requiring that a qualifying EB-5 investment be in the nature of equity rather than a loan. *R.L. Inv. Ltd. Partners v. INS*, 86 F.Supp.2d at 1024. The court stated:

> There is admittedly no simple rule for distinguishing debt from equity. One might conclude that Zou's lack of any right to share in any of RLILP's profits above 4 percent per annum rendered Zou's agreement a debt arrangement. Such a conclusion would not be clearly erroneous. . . . Courts have held that severe limitations on the right to share in profits suggest a party is a creditor rather than an equity stakeholder. *See, e.g., Santa Fe Gaming Corp. v. Hudson Bay Partners, L.P.*, 49 F.Supp.2d 1178 (D.Nev.1999) ("The term 'equity' indicates ownership or a right to share in the profits of the corporation").
>
> The court will not disturb the INS's interpretation of the term "invest" even if, as Plaintiffs argue, that interpretation "ignor[es] business reality." *See* Plaintiffs' Memo. in Opp. at 14. According to Plaintiffs, "all investors in whatever kind of business want to minimize their risk. The EB-5 regulations require that the investment be 'at risk' but do not require that the risk be maximized or subjectively large in INS's eyes. Disallowing a buy-back arrangement is unrealistic because there is no market for selling the investor's partnership interest to the public." *Id.* It is not the court's place "to decide which among several competing interpretations *1024 best serves the regulatory purpose." *See Thomas Jefferson Univ.*, 512 U.S. at 512, 114 S.Ct. 2381. Such a decision would implicate policy, not law. The agency's interpretation must be given "'controlling weight unless it is plainly erroneous or inconsistent with the regulation.'" *Id.*

Id. at 1023-24.

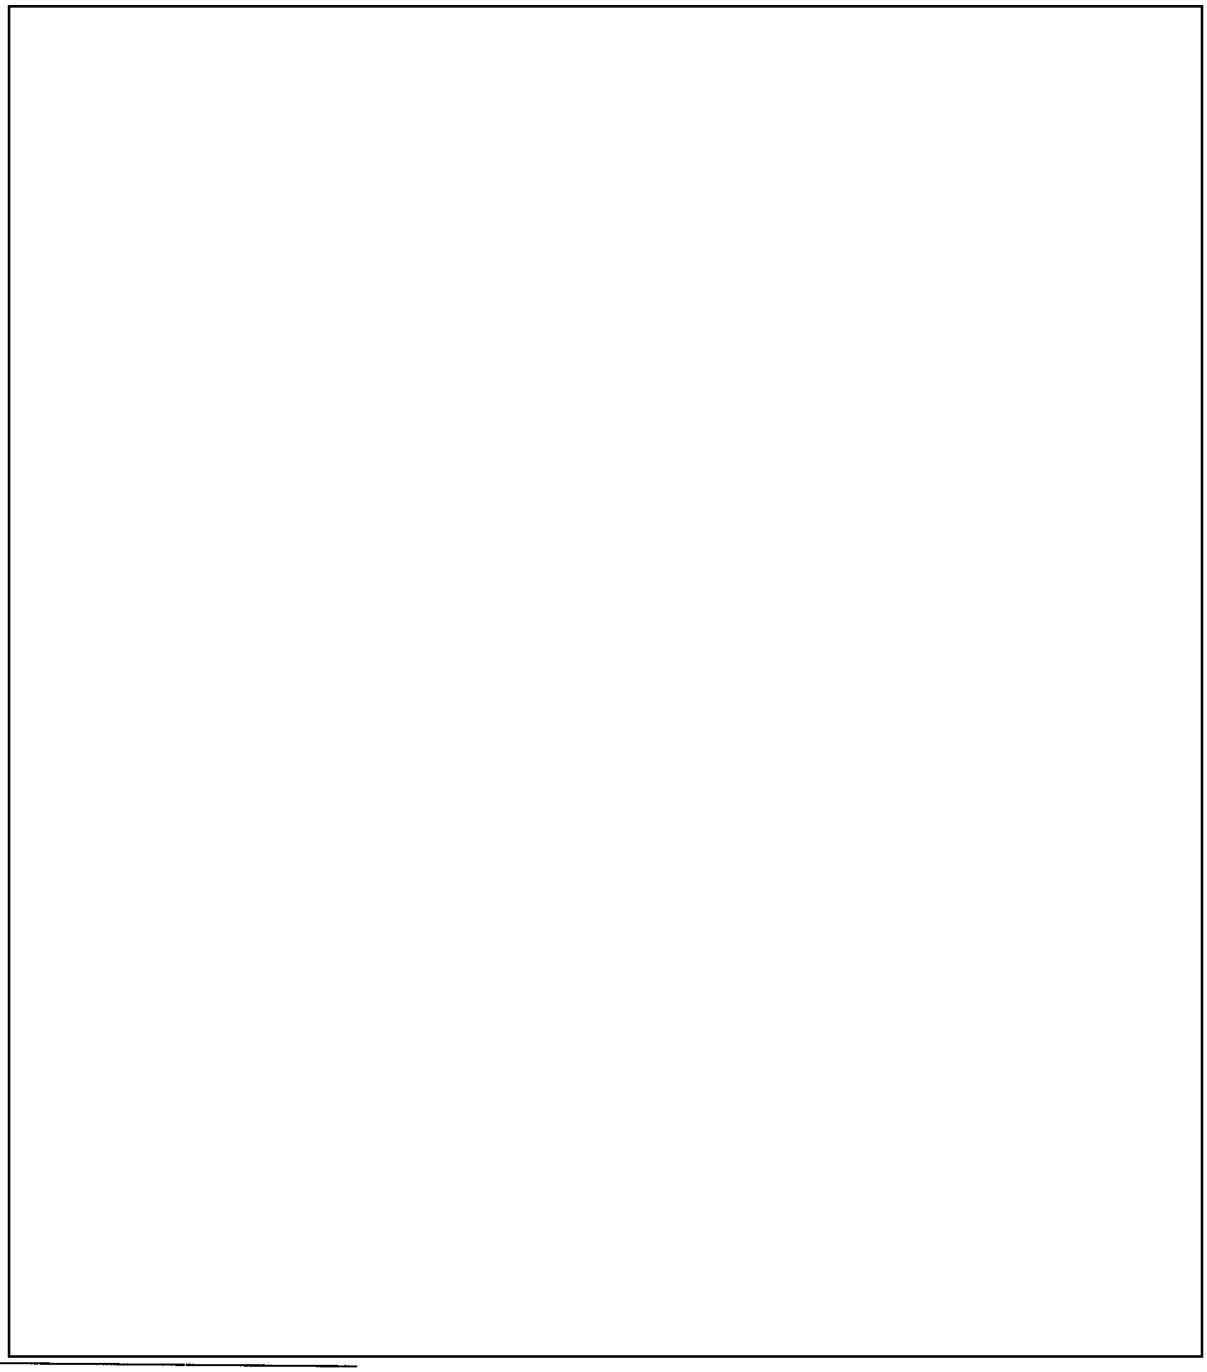
A credit risk is a nonsystematic risk. *See* http://www.finra.org/Investors/SmartInvesting/AdvancedInvesting/ManagingInvestmentRisk/. This type of financial risk is primarily associated with bonds, debts or loans, not investments. *Id.* If the alien investor's capital were only subject to a repayment risk, that factor would strongly indicate that the alien has made a contribution of capital in exchange for a debt arrangement, contrary to the definition of invest at 8 C.F.R. § 204.6(e).

On October 28, 2009, the applicant submitted an October 28, 2008 Business Cooperation Agreement between GCFM and Hybrid Kinetic (now GreenTech Automotive, Inc.). Article I establishes that

the agreement is between GCFM and "Gulf Coast Automotive Investment Fund, LLC, a Mississippi limited liability company."[6]

Article III discusses the applicant's consideration and provides, in pertinent part:

(b)(4)



[6] Although the Business Cooperation Agreement calls the fund "Gulf Coast Automotive Investment Fund, LLC," the applicant has not submitted any documents showing that such a fund exists, and in response to the AAO's request for evidence, the applicant asserts that there is no such entity

[redacted]

(b)(4)

(Bold emphasis added.)

[redacted]

In light of the above, given all of the agreements before the AAO at this time, the AAO is persuaded that no impermissible redemption agreement exists.

D. Geographic Area

USCIS initially approved the applicant's request to include Mississippi and Louisiana within the regional center. USCIS subsequently approved an amendment whereby the applicant proposed to build a hybrid vehicle manufacturing plant and a shipyard within these two states. On December 7, 2009, the applicant requested the addition of several areas in Virginia "close to deepwater seaports in Norfolk" to process parts for the plant in Tunica, Mississippi. The proposed Virginia portion of the regional center would not include Norfolk but extends to within approximately 20 miles of that city. The applicant claims that the proposed site will actually be 80 miles from Norfolk. The director denied this amendment request on February 18, 2010, noting that Virginia was not contiguous with the geographic region in Mississippi. The current amendment request, filed on February 22, 2010, includes all of Tennessee, asserting that the regional center will build a warehouse in Tennessee 25 miles from the manufacturing plant site in Mississippi. The facility in Virginia will receive parts from overseas, assemble some parts at the facility and transport those parts by rail to the Tennessee hub. The Tennessee hub will combine the Virginia parts with other domestic and international parts and transport them to the Tunica, Mississippi site. The applicant asserts that the Virginia location would be beneficial due to its proximity to a deepwater port.[7]

The director concluded that the project would not improve productivity for the entire region, but instead covered two distinct regions: the Tobacco Region in Virginia, which consists of 33 southern Virginia counties, and the Northern Mississippi/Memphis Tennessee area. These two areas are separated by almost the entire State of Tennessee. The applicant initially listed other industries in addition to the car manufacturing project, such as education and training, research and development and wholesale trade that could include investments in Tennessee. In response to the director's request for additional evidence, however, the applicant stated that it "no longer requests an amendment for the economic sectors of manufacturing, education and training, research and development and wholesale trade," expressing its understanding that it was already approved to engage in manufacturing projects.

[7] The AAO notes that the area in Virginia the applicant seeks to include is landlocked. Nevertheless, the AAO acknowledges that the easternmost border of Sussex County is only 20 miles from the coast and the applicant proposes to build the plant in Sussex County, approximately 80 miles from the coast.

The Private Placement Memorandum suggests the possibility of "small assembly operations in the State of Tennessee along the railway between Norfolk, Virginia and Memphis Tennessee." The economic analysis, however, is limited to the car manufacturing project. Merely noting that Tennessee contains areas of high unemployment that could benefit from an investment, without identifying potential types of projects and explaining their impact is insufficient. The Private Placement Memorandum expresses the applicant's willingness to "explore the possibilities of establishing small assembly operations." This statement is too nonspecific to justify the inclusion of the entire state of Tennessee as part of a single regional center that would allow the applicant to connect otherwise isolated projects in Mississippi and Virginia with no discernible geographic nexus that would allow consideration of the two areas as a "limited geographic area" as provided in the public law, Pub. L. No. 103-121, 106 Stat. 1874 (1992) as amended. The only specific proposal for Tennessee includes a warehouse and transportation hub. While this hub is only approximately 25 miles from Tunica, Mississippi it is nearly 300 miles from the southwestern Virginia border and approximately another 200 miles from eastern Virginia where the parts plant would be built.

Section 610 of the Departments of Commerce, Justice and State, the Judiciary, and Related Agencies Appropriations Act of 1993, as amended, states that a regional center shall have jurisdiction over a "limited geographic area." Any interpretation of the regional center concept may not render the geographical limitation of a regional center meaningless. *Matter of Izummi,* 22 I&N Dec. at 174

Despite the valid business reasons for building a parts facility in Virginia, the approval of the amendment would essentially qualify investments in two areas separated by hundreds of miles with no discernible geographic nexus for inclusion within a single regional center. Such a result would render meaningless the geographical element of the regional center concept set forth in the public law, Pub. L. No. 103-121, 106 Stat. 1874 (1992) as amended, and as reflected in USCIS implementing regulation set forth at 8 C.F.R. § 204.6(m).

In light of the above, the applicant has not justified the inclusion of the entire state of Tennessee as part of a geographically based regional center. Rather, the applicant added Tennessee as a land bridge between two isolated investments that otherwise could not be included in the same regional center with little explanation of the types of investments that would occur throughout Tennessee.

III. CONCLUSION

While the AAO withdraws some of the director's concerns, the proposed amendment may not be approved due to its failure to describe a limited geographic area. Accordingly, the director's decision denying the petition will be affirmed.

ORDER: The decision of the director is affirmed. The petition is denied.

IN RE: Applicant: GULF COAST FUNDS MANAGEMENT, LLC

Request for Additional Evidence

Dear Ms. Wei:

As discussed below, the Administrative Appeals Office (AAO) requests additional evidence relating to a request to amend a previously approved regional center that is currently pending review before the AAO on certification. *See* 8 C.F.R. § 103.4(a). In accordance with the regulation at 8 C.F.R. § 103.2(b)(8)(iv), you are afforded 87 days from the date of this notice in which to respond.

I. Procedural History

You are a regional center pursuant to section 610(c) of the Departments of Commerce, Justice and State, the Judiciary, and Related Agencies Appropriations Act of 1993, Pub. L. No. 102-395, 106 Stat. 1874 (1992), as amended by section 116 of Pub. L. No. 105-119, 111 Stat. 2440 (1997); section 402 of Pub. L. No. 106-396, 114 Stat. 1637 (2000) and section 11037 of Pub. L. No. 107-273, 116 Stat. 1758 (2002). The initial proposal, which you filed on January 17, 2008, requested that U.S. Citizenship and Immigration Services (USCIS) include the states of Mississippi and Louisiana. USCIS approved the general regional center proposal on August 18, 2008.

On May 7, 2009, you filed your first amendment request for two specific projects. The projects envision (1) limited liability companies that will make an equity investment in Hybrid Kinetic Automotive Corporation (Hybrid Kinetic), a Mississippi entity, for the purpose of building a car manufacturing plant and (2) investments in a shipyard in Louisiana. On July 13, 2009, USCIS approved the amendment.[1]

On January 15, 2010, you filed a second amendment request, this time to expand the geographic area to include parts of Virginia for purposes of constructing a car parts manufacturing plant. In this request, you

[1] Although various documents in the record of proceeding reference "Hybrid Kinetics Automotive Corp." the Mississippi corporate filings list the company name as "Hybrid Kinetic Automotive Corp."

proposed an investment in GreenTech Automotive, Inc. "formerly known as Hybrid Kinetic Automotive Corp." You submitted the Mississippi Articles of Merger listing Hybrid Kinetic Automotive Corp. and GreenTech Automotive, Inc. as the merging companies. You also submitted a Virginia Certificate of Incorporation for a new entity, WM GreenTech Automotive Corp. USCIS denied the amendment request on February 18, 2010 as you failed to explain how the addition of parts of Virginia would allow the regional center designation to remain a limited geographic area.

On February 22, 2010, you filed a third amendment request. You now seek to amend your geographic region to include Tennessee and portions of Virginia. You still propose to build the car manufacturing plant in Mississippi and the car parts manufacturing plant in Virginia, but now include a warehouse in Tennessee near the Mississippi border. The director denied your request on August 11, 2010 and reaffirmed that decision on motion. The director certified her decision to the AAO on January 28, 2011.

(b)(4)

In reviewing the record of proceeding, the AAO has identified three relevant limited liability companies in which you propose alien investors will pool their funds: Gulf Coast Automotive Investment Fund A-1, LLC (a Mississippi company); GTA Automotive Investment Fund 1, LLC (a Virginia company) and GTA Fund A-2, LLC (a Virginia company).[2] The managing partner for all of these limited liability companies is GCFM, the approved regional center. American Immigration Center, LLC (AIC) purchased [redacted] units of GCFM on October 6, 2009 and entered into a Consulting Agreement under which GCFM pays AIC [redacted] annually for consulting services. The offering memoranda indicate that the limited liability companies will invest in either GreenTech Automotive, Inc. (a Mississippi corporation that is the successor to Hybrid Kinetic) or WM GreenTech Automotive Corp. (a Virginia corporation). While your submissions refer to both corporations as "GTA," the record contains no evidence that these corporations are one and the same. In order for the AAO to determine the relationships, obligations and rights of all parties involved, the AAO must review all agreements between all parties involved in the investment proposal.

The AAO has identified the following documentation that is currently within the record of proceeding:

Gulf Coast Automotive Investment Fund A-1, LLC

1. A March 31, 2009 offering memorandum for Gulf Coast Automotive Investment Fund A-1, LLC proposing to purchase stock in Hybrid Kinetics.

[2] On July 13, 2009, USCIS also approved Gulf Coast Fund 1, LLC.

2. An operating agreement for Gulf Coast Automotive Investment Fund A-1, LLC dated "____th day of August, 2009".

3. An undated subscription agreement for Gulf Coast Automotive Investment Fund A-1, LLC listing a subscription price of $500,000.

GTA Automotive Investment Fund 1, LLC

4. Two offering memoranda, dated 2009 and 2010, for GTA Automotive Investment Fund 1, LLC, which propose to invest in either Green Tech Automotive, Inc. or WM GreenTech Automotive Corp.

5. A 2010 operating agreement for GTA Automotive Investment Fund 1, LLC.

6. A 2010 management agreement between GCFM and GTA Automotive Investment Fund 1, LLC.

7. An undated subscription agreement for GTA Automotive Investment Fund 1, LLC listing a subscription price of $500,000.

GTA Fund A-2, LLC

8. A 2010 offering memorandum for GTA Fund A-2, LLC proposing to purchase stock in WM GreenTech Automotive Corp.

9. A 2010 operating agreement for GTA Fund A-2, LLC.

10. An undated subscription agreement for GTA Fund A-2, LLC listing a subscription price of $500,000.

11. A membership interest purchase agreement and consulting agreement between GCFM and AIC.

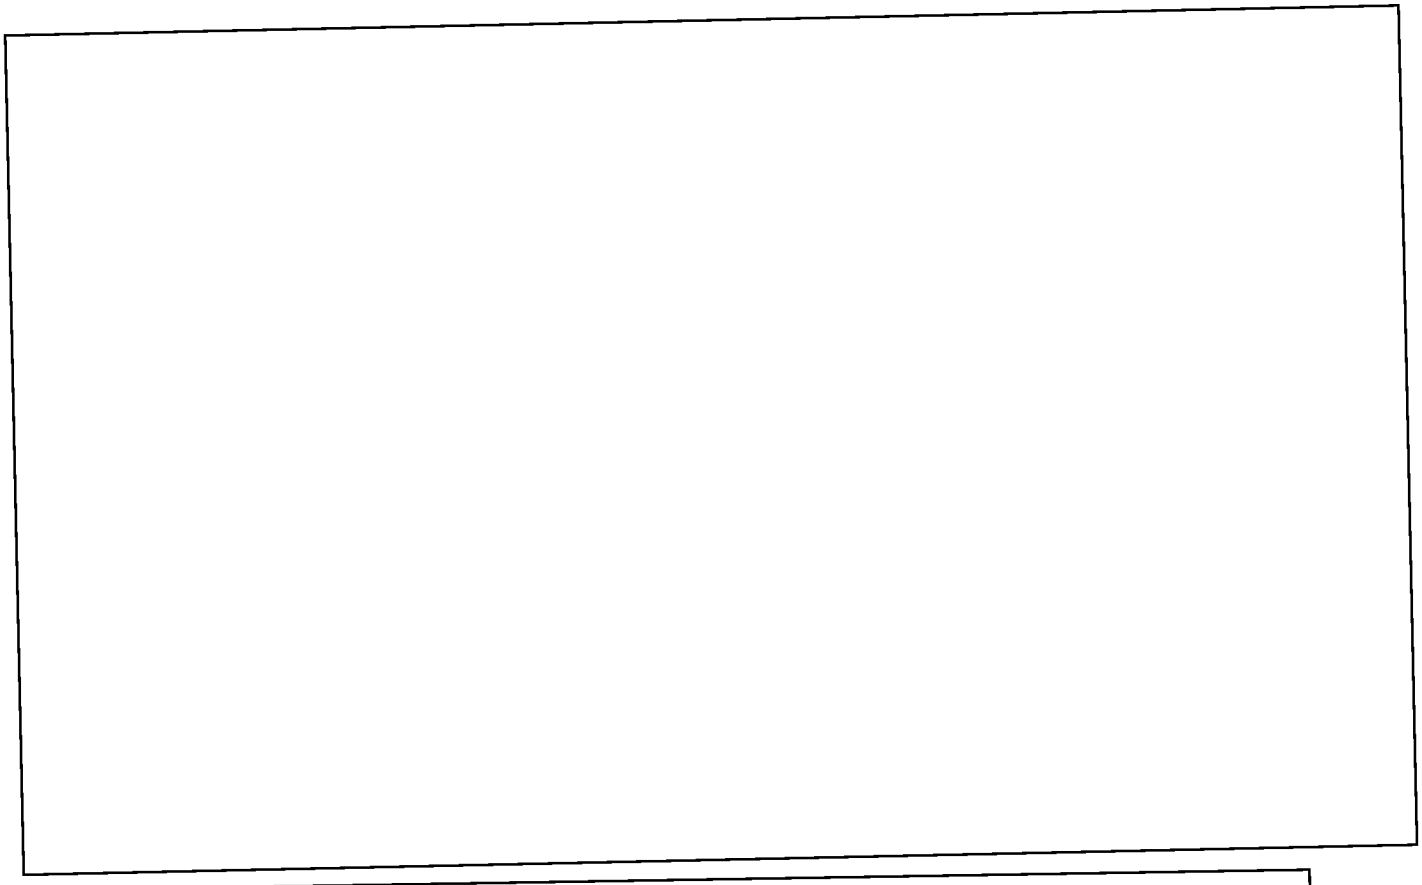
Gulf Coast Funds Management, LLC

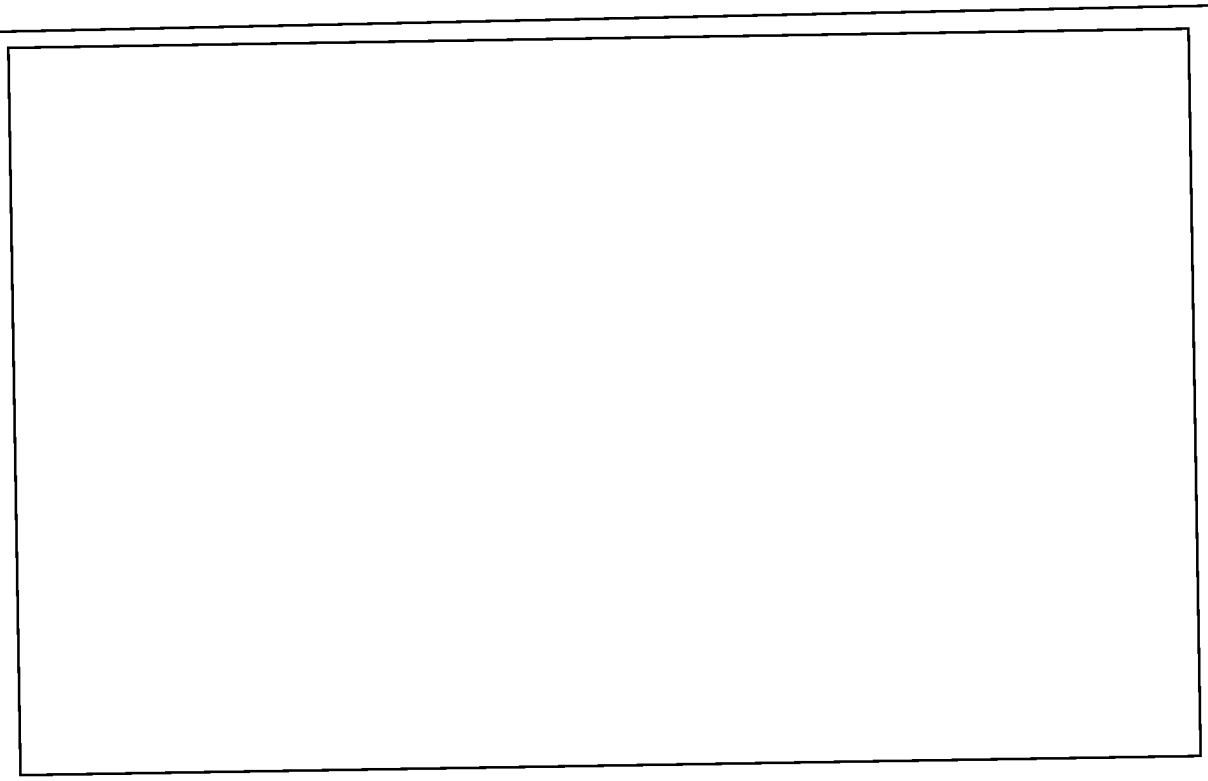
12. A Business Cooperation Agreement between GCFM and Hybrid Kinetic Automotive Corp. (and its successors) dated October 28, 2008.

II. Discussion

The AAO takes special note of the Business Cooperation Agreement. This document was not available to USCIS when it adjudicated the initial regional center proposal or the first amendment; the regional center submitted it as a supplemental document on October 28, 2009, one year after GCFM and Hybrid Kinetic Automotive Corp. signed it and three months after USCIS approved the proposal for Gulf Coast Automotive Investment Fund A-1, LLC and Gulf Coast Fund 1, LLC.

(b)(4)





(b)(4)

[redacted]

The final sentence quoted above obligates the job creating enterprise, Hybrid Kinetic (now GreenTech Automotive, Inc.), to pay cash should it be unable to meet its stock option obligation.

The record does not contain any similar agreement describing the relationship, duties and rights between GCFM and WM GreenTech Automotive Corp., a wholly separate corporation from GreenTech Automotive, Inc. The record does not contain any agreements describing the relationship, duties and rights between GreenTech Automotive, Inc. and WM GreenTech Automotive Corp. and each of the alien investor funds.

[redacted]

(b)(4)

[redacted]

[3] The 2010 Offering Memorandum for GTA Automotive Investment Fund 1, LLC does not specify which entity the investors will invest in or the entity to which the investors will provide administrative fees.

(b)(4) [redacted]

III. Requested Evidence

Please submit the following:

1. An explanation of how the common and preferred stock will be distributed at the end of the investment period and which agreements address each stock transfer stage (from either GreenTech Automotive, Inc. or WM GreenTech Automotive Corp. to GCFM and subsequently from GCGM to the individual investors). Please reference GreenTech Automotive, Inc. and WM GreenTech Automotive Corp. separately and individually rather than interchangeably as "GTA."

2. The articles of organization and operating agreement for Gulf Coast Automotive Investment Fund, LLC referenced in the October 28, 2008 Business Cooperation Agreement between GCFM and Hybrid Kinetic Automotive Corp. (now GreenTech Automotive, Inc.).

3. The articles of organization for Gulf Coast Automotive Investment Fund A-1, LLC.

4. Any and all agreements between GCFM and WM GreenTech Automotive Corp. and Capital Wealth Holdings, Ltd., as well as any documentation, such as articles of organization, referenced therein. If no such agreements exist, please attest to the absence of such documentation and explain how the rights between these companies are derived.

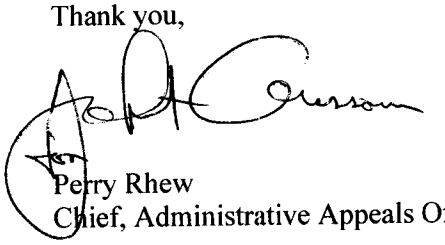
5. Any and all agreements between GCFM and GreenTech Automotive, Inc., including any documentation, such as articles of organization, referenced therein. Please also submit any agreements as to the dollar amount that triggers GCFM's stock option and GreenTech Automotive's obligation should it fail to raise that dollar amount. If no such agreements exist, please attest to the absence of such documentation and explain how these issues have been resolved in the absence of such an agreement.

6. Given that the only document that appears to bind GreenTech Automotive, Inc. to provide common stock to any entity is the October 28, 2008 Business Cooperation Agreement, which requires it to provide (b)(4) [redacted] in publicly traded stock or [redacted] please explain and document how and when GreenTech Automotive, Inc. or WM GreenTech Automotive Corp. or GCFM are obligated to transfer the stock to the alien investors. Please provide a copy of the agreements that document the conditions under which GreenTech Automotive, Inc., WM GreenTech Automotive Corp. and GCFM have agreed to transfer the stock in GreenTech Automotive Inc. or WM GreenTech Automotive Corp.

In accordance with the regulation at 8 C.F.R. § 103.2(b)(8)(iv), you are hereby afforded **87 days** in which to respond. If you choose to respond, please submit your response to the address shown on the first page of this letter. Also, please reference the regional center receipt number, **RCW 1031910314**, in your response. If you

believe that the record of proceeding is complete, and desire a decision based on the evidence already submitted, please advise the AAO at your earliest convenience in order to ensure a more timely adjudication of the pending certified decision. *See* 8 C.F.R. §§ 103.2(b)(11) and (14).

Thank you,



Perry Rhew

IN RE: Applicant: GULF COAST FUNDS MANAGEMENT, LLC

Request for Additional Evidence

Dear Ms. Wei:

As discussed below, the Administrative Appeals Office (AAO) requests additional evidence relating to a request to amend a previously approved regional center that is currently pending review before the AAO on certification. *See* 8 C.F.R. § 103.4(a). In accordance with the regulation at 8 C.F.R. § 103.2(b)(8)(iv), you are afforded 87 days from the date of this notice in which to respond.

I. Procedural History

You are a regional center pursuant to section 610(c) of the Departments of Commerce, Justice and State, the Judiciary, and Related Agencies Appropriations Act of 1993, Pub. L. No. 102-395, 106 Stat. 1874 (1992), as amended by section 116 of Pub. L. No. 105-119, 111 Stat. 2440 (1997); section 402 of Pub. L. No. 106-396, 114 Stat. 1637 (2000) and section 11037 of Pub. L. No. 107-273, 116 Stat. 1758 (2002). The initial proposal, which you filed on January 17, 2008, requested that U.S. Citizenship and Immigration Services (USCIS) include the states of Mississippi and Louisiana. USCIS approved the general regional center proposal on August 18, 2008.

On May 7, 2009, you filed your first amendment request for two specific projects. The projects envision (1) limited liability companies that will make an equity investment in Hybrid Kinetic Automotive Corporation (Hybrid Kinetic), a Mississippi entity, for the purpose of building a car manufacturing plant and (2) investments in a shipyard in Louisiana. On July 13, 2009, USCIS approved the amendment.[1]

On January 15, 2010, you filed a second amendment request, this time to expand the geographic area to include parts of Virginia for purposes of constructing a car parts manufacturing plant. In this request, you

[1] Although various documents in the record of proceeding reference "Hybrid Kinetics Automotive Corp." the Mississippi corporate filings list the company name as "Hybrid Kinetic Automotive Corp."

proposed an investment in GreenTech Automotive, Inc. "formerly known as Hybrid Kinetic Automotive Corp." You submitted the Mississippi Articles of Merger listing Hybrid Kinetic Automotive Corp. and GreenTech Automotive, Inc. as the merging companies. You also submitted a Virginia Certificate of Incorporation for a new entity, WM GreenTech Automotive Corp. USCIS denied the amendment request on February 18, 2010 as you failed to explain how the addition of parts of Virginia would allow the regional center designation to remain a limited geographic area.

On February 22, 2010, you filed a third amendment request. You now seek to amend your geographic region to include Tennessee and portions of Virginia. You still propose to build the car manufacturing plant in Mississippi and the car parts manufacturing plant in Virginia, but now include a warehouse in Tennessee near the Mississippi border. The director denied your request on August 11, 2010 and reaffirmed that decision on motion. The director certified her decision to the AAO on January 28, 2011.

(b)(4)

Accordingly, this notice seeks additional information in order for the AAO to fully resolve the last issue.

In reviewing the record of proceeding, the AAO has identified three relevant limited liability companies in which you propose alien investors will pool their funds: Gulf Coast Automotive Investment Fund A-1, LLC (a Mississippi company); GTA Automotive Investment Fund 1, LLC (a Virginia company) and GTA Fund A-2, LLC (a Virginia company).[2] The managing partner for all of these limited liability companies is GCFM, the approved regional center. American Immigration Center, LLC (AIC) purchased [redacted] units of GCFM on October 6, 2009 and entered into a Consulting Agreement under which GCFM pays AIC [redacted] annually for consulting services. The offering memoranda indicate that the limited liability companies will invest in either GreenTech Automotive, Inc. (a Mississippi corporation that is the successor to Hybrid Kinetic) or WM GreenTech Automotive Corp. (a Virginia corporation). While your submissions refer to both corporations as "GTA," the record contains no evidence that these corporations are one and the same. In order for the AAO to determine the relationships, obligations and rights of all parties involved, the AAO must review all agreements between all parties involved in the investment proposal.

The AAO has identified the following documentation that is currently within the record of proceeding:

Gulf Coast Automotive Investment Fund A-1, LLC

1. A March 31, 2009 offering memorandum for Gulf Coast Automotive Investment Fund A-1, LLC proposing to purchase stock in Hybrid Kinetics.

[2] On July 13, 2009, USCIS also approved Gulf Coast Fund 1, LLC.

2. An operating agreement for Gulf Coast Automotive Investment Fund A-1, LLC dated "____th day of August, 2009".

3. An undated subscription agreement for Gulf Coast Automotive Investment Fund A-1, LLC listing a subscription price of $500,000.

GTA Automotive Investment Fund 1, LLC

4. Two offering memoranda, dated 2009 and 2010, for GTA Automotive Investment Fund 1, LLC, which propose to invest in either Green Tech Automotive, Inc. or WM GreenTech Automotive Corp.

5. A 2010 operating agreement for GTA Automotive Investment Fund 1, LLC.

6. A 2010 management agreement between GCFM and GTA Automotive Investment Fund 1, LLC.

7. An undated subscription agreement for GTA Automotive Investment Fund 1, LLC listing a subscription price of $500,000.

GTA Fund A-2, LLC

8. A 2010 offering memorandum for GTA Fund A-2, LLC proposing to purchase stock in WM GreenTech Automotive Corp.

9. A 2010 operating agreement for GTA Fund A-2, LLC.

10. An undated subscription agreement for GTA Fund A-2, LLC listing a subscription price of $500,000.

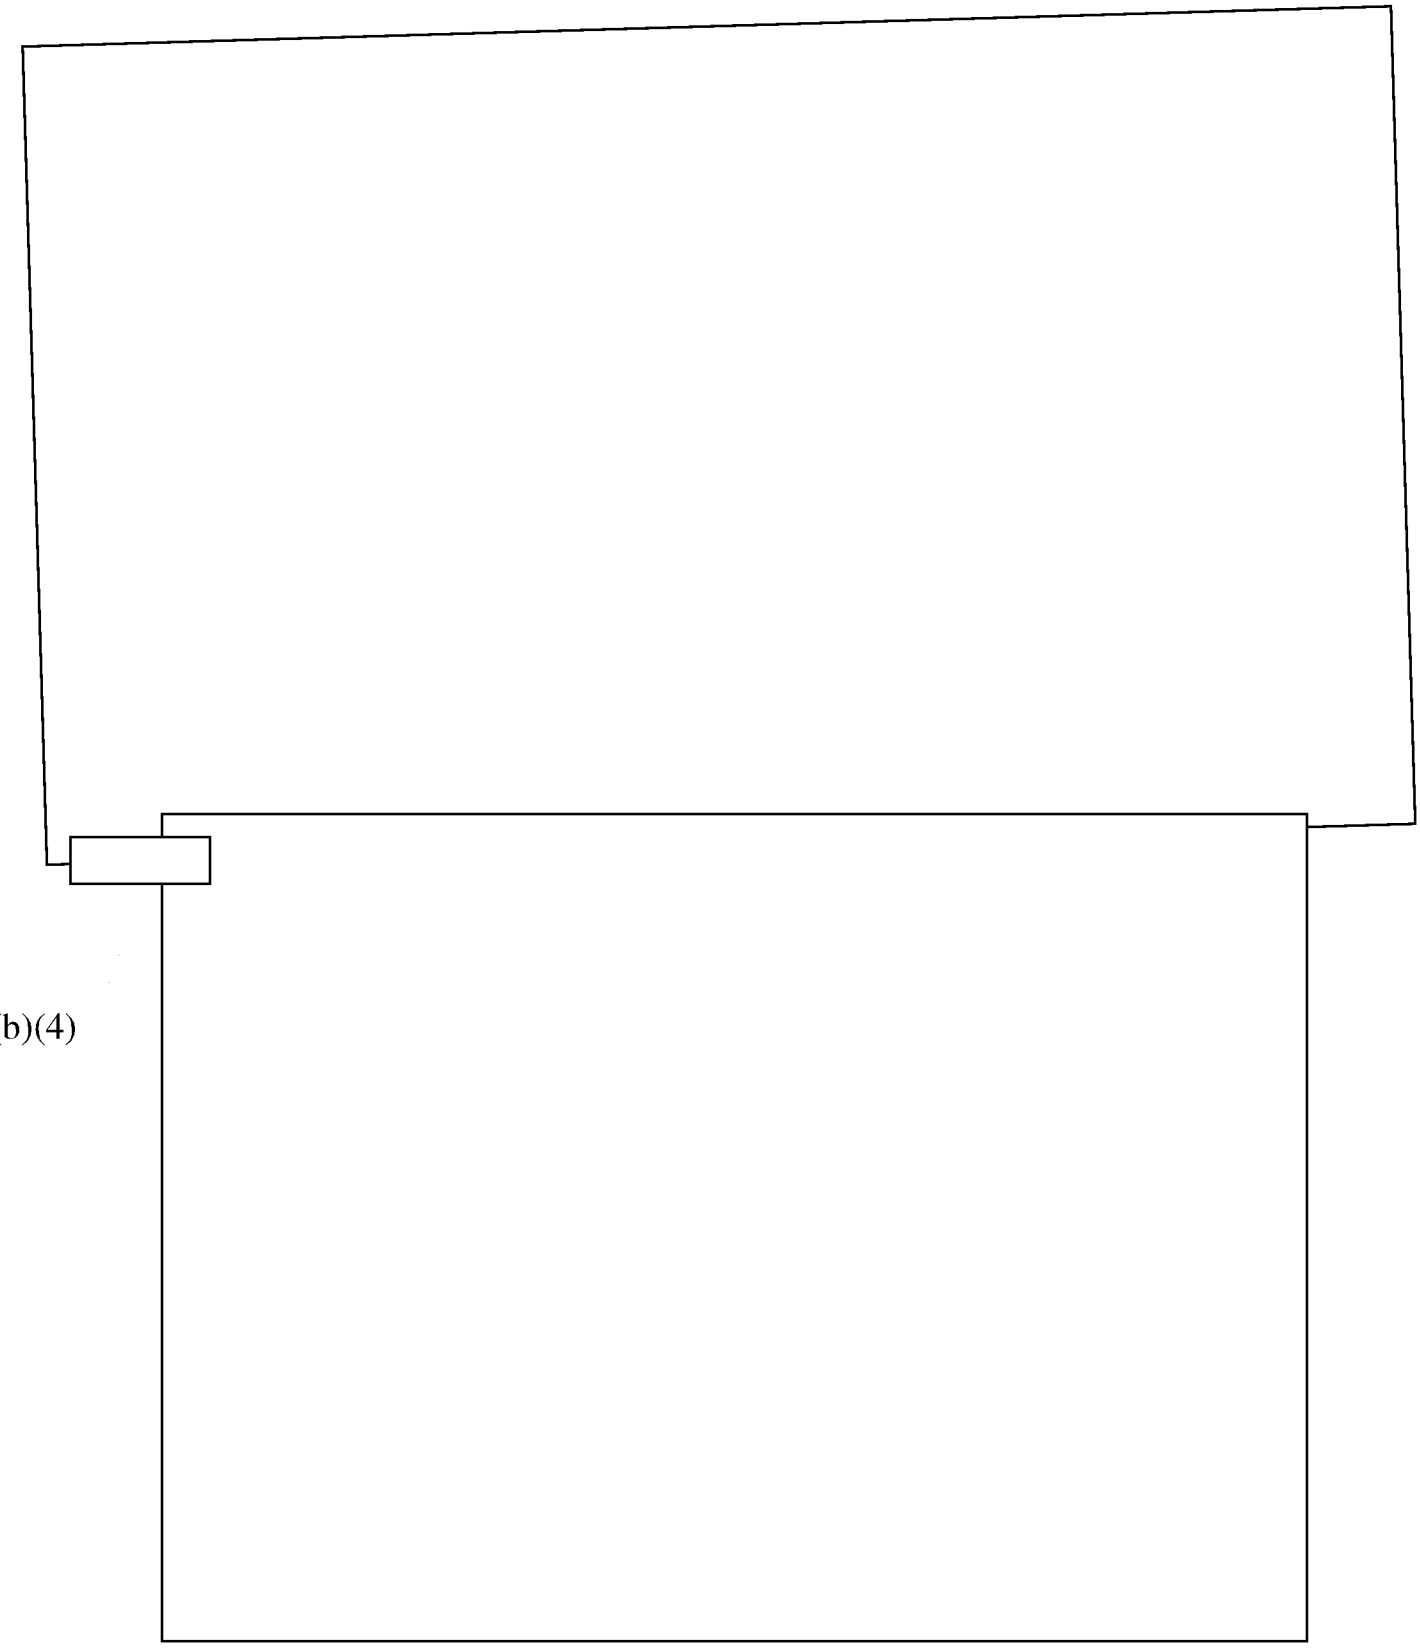
11. A membership interest purchase agreement and consulting agreement between GCFM and AIC.

Gulf Coast Funds Management, LLC

12. A Business Cooperation Agreement between GCFM and Hybrid Kinetic Automotive Corp. (and its successors) dated October 28, 2008.

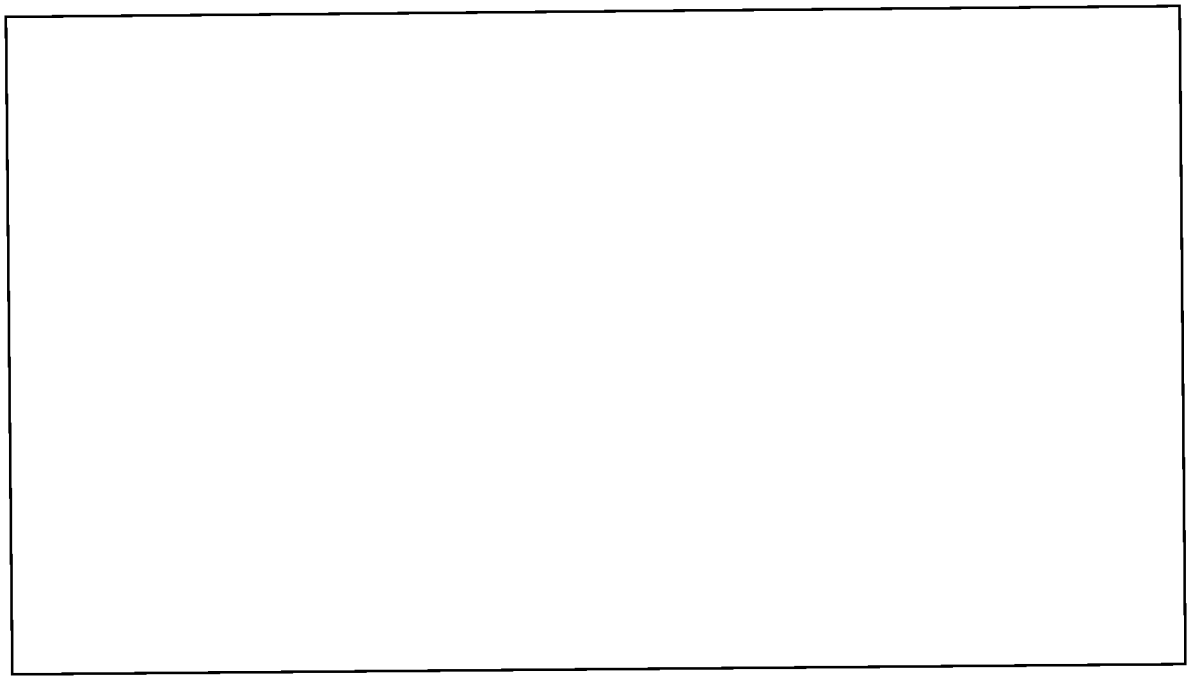
II. Discussion

The AAO takes special note of the Business Cooperation Agreement. This document was not available to USCIS when it adjudicated the initial regional center proposal or the first amendment; the regional center submitted it as a supplemental document on October 28, 2009, one year after GCFM and Hybrid Kinetic Automotive Corp. signed it and three months after USCIS approved the proposal for Gulf Coast Automotive Investment Fund A-1, LLC and Gulf Coast Fund 1, LLC.



(b)(4)

(b)(4)

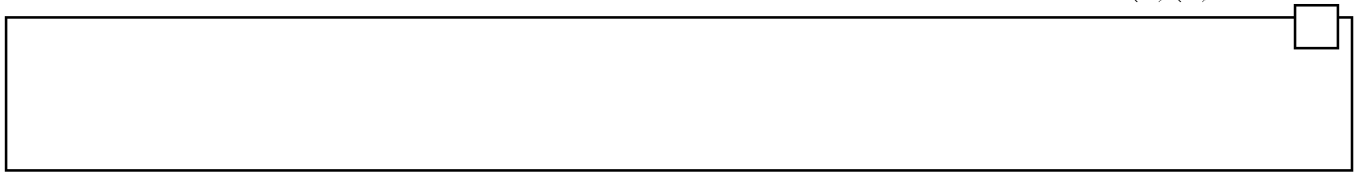


The final sentence quoted above obligates the job creating enterprise, Hybrid Kinetic (now GreenTech Automotive, Inc.), to pay cash should it be unable to meet its stock option obligation.

The record does not contain any similar agreement describing the relationship, duties and rights between GCFM and WM GreenTech Automotive Corp., a wholly separate corporation from GreenTech Automotive, Inc. The record does not contain any agreements describing the relationship, duties and rights between GreenTech Automotive, Inc. and WM GreenTech Automotive Corp. and each of the alien investor funds.

The offering memoranda detail how each alien investor's unit of membership interest in the investment funds will convert into stock in the job creating enterprises after five years. It appears that the only stock available for GCFM to transfer to the alien investor funds is the stock (or cash) that results from the stock option detailed in the Business Cooperation Agreement. Because the Business Cooperation Agreement incorporates by reference the Operating Agreement for Gulf Coast Investment Fund, LLC at Article I and subsequent GCFM-managed Automotive Investment Funds at Article III, section (c), it appears that the Business Cooperation Agreement is the vehicle through which GCFM obtains stock (or cash) on behalf of the aliens who invested in GreenTech Automotive, Inc. There is nothing similar to document how stock (or cash) will transfer from WM GreenTech Automotive Corp. to GTA Fund A-2, LLC or GTA Automotive Investment Fund 1, LLC.

(b)(4)



[3] The 2010 Offering Memorandum for GTA Automotive Investment Fund 1, LLC does not specify which entity the investors will invest in or the entity to which the investors will provide administrative fees.

(b)(4)

[redacted]

III. Requested Evidence

Please submit the following:

1. An explanation of how the common and preferred stock will be distributed at the end of the investment period and which agreements address each stock transfer stage (from either GreenTech Automotive, Inc. or WM GreenTech Automotive Corp. to GCFM and subsequently from GCGM to the individual investors). Please reference GreenTech Automotive, Inc. and WM GreenTech Automotive Corp. separately and individually rather than interchangeably as "GTA."

2. The articles of organization and operating agreement for Gulf Coast Automotive Investment Fund, LLC referenced in the October 28, 2008 Business Cooperation Agreement between GCFM and Hybrid Kinetic Automotive Corp. (now GreenTech Automotive, Inc.).

3. The articles of organization for Gulf Coast Automotive Investment Fund A-1, LLC.

4. Any and all agreements between GCFM and WM GreenTech Automotive Corp. and Capital Wealth Holdings, Ltd., as well as any documentation, such as articles of organization, referenced therein. If no such agreements exist, please attest to the absence of such documentation and explain how the rights between these companies are derived.

5. Any and all agreements between GCFM and GreenTech Automotive, Inc., including any documentation, such as articles of organization, referenced therein. Please also submit any agreements as to the dollar amount that triggers GCFM's stock option and GreenTech Automotive's obligation should it fail to raise that dollar amount. If no such agreements exist, please attest to the absence of such documentation and explain how these issues have been resolved in the absence of such an agreement.

6. Given that the only document that appears to bind GreenTech Automotive, Inc. to provide common stock to any entity is the October 28, 2008 Business Cooperation Agreement, which requires it to provide [redacted] in publicly traded stock or [redacted] cash, please explain and document how and when GreenTech Automotive, Inc. or WM GreenTech Automotive Corp. or GCFM are obligated to transfer the stock to the alien investors. Please provide a copy of the agreements that document the conditions under which GreenTech Automotive, Inc., WM GreenTech Automotive Corp. and GCFM have agreed to transfer the stock in GreenTech Automotive Inc. or WM GreenTech Automotive Corp.

In accordance with the regulation at 8 C.F.R. § 103.2(b)(8)(iv), you are hereby afforded **87 days** in which to respond. If you choose to respond, please submit your response to the address shown on the first page of this letter. Also, please reference the regional center receipt number, **RCW 1031910314**, in your response. If you

believe that the record of proceeding is complete, and desire a decision based on the evidence already submitted, please advise the AAO at your earliest convenience in order to ensure a more timely adjudication of the pending certified decision. *See* 8 C.F.R. §§ 103.2(b)(11) and (14).

Public Comments and USCIS's Response

Form Type	Comment	USCIS Response	Modify Form Y/N	Modification Notes
Form I-924 & Ins.	What are the standards for re-designating an approved regional center as mentioned in Part 2 of the form? The EB-5 regulations do not discuss redesignation. What standards are being implemented that require approved regional centers to apply for re-designation after five years from approval, or 5 years from the date of last re-designation? Will all documents required for an initial regional center application be required for a regional center re-designation application? Is the fee the same for re-designation as for an initial regional center application? The USCIS needs to provide specific standards for redesignation. Moreover, this kind of change must go through the Administrative Procedure Act rulemaking process; it should not be done by creating a form.	USCIS has decided not to require the re-designation of approved regional centers every five years.	Yes	The Form I-924, I-924A, and instructions have been modified to remove the re-designation procedure.
Form I-924A	It appears that no fee is required to submit the I-924A form each year. However, every five years the I-924A would have to be filed with form I-924, and the proposed $6,230 filing fee must be paid at that time. The fee seems excessive, especially for not-for-profit regional centers that are strictly for economic development and job creation. Is there a fee exemption for the not-for-profit regional centers? USCIS should consider an initial filing fee exemption for not-for-profits, much like not-for-profits are exempt from the H-1B training fee.	See above.	Yes	The Form I-924, I-924A, and instructions have been modified to remove the re-designation procedure.
Form	The concept of —Regional Center re-designation is brand	See above.	Yes	The Form I-924,

I-924 Inst.	new and represents a big change to the EB-5 Program. Changes this big should not be implemented via Form. They need to go through the Administrative Procedure Act (—APA) rulemaking process. Furthermore, IIUSA finds no evidence of regulatory or statutory authority to implement this re-designation process or for the five-year limit on a Regional Center designation. Lastly, the process for an EB-5 investor to become an unconditional permanent resident *and* potentially have his or her capital returned from investment usually lasts at least five years. This provides another angle of risk for investors who are already being asked to shoulder the immigration and capital investment risk. Investors should not be asked to take on another element of risk in this situation. IIUSA asks that USCIS instead put the concept of —re-designation itself through the standard APA rulemaking process so that the agency can take all public comment on the process into consideration before implementing such a big change to the Program. IIUSA would also be interested in USCIS's responses to the following questions on the topic: • What are the standards for re-designation? • Where did the five-year cycle come from and under what authority? • Is the fee ($6,230) the same for re-designation as for an initial application? • Do all supporting documents need to be included in an application for regional center re-designation?			I-924A, and instructions have been modified to remove the re-designation procedure.

Form I-924A	It appears that no fee is required to submit the I-924A form each year. However, every five years the I-924A would have to be filed with form I-924, and the proposed $6,230 filing fee must be paid at that time. The fee seems excessive, especially for not-for-profit regional centers that are strictly for economic development and job creation. Is there a fee exemption for the not-for-profit regional centers? USCIS should consider an initial filing fee exemption for not-for-profits, much like not-for-profits are exempt from the H-1B training fee.	See above.	Yes	The Form I-924, I-924A, and instructions have been modified to remove the re-designation procedure.
Form I-924	□ Would USCIS consider a fee exemption for not-for-profit Regional Centers?	USCIS has established procedures for the granting of fee waiver requests. USCIS plans to use these established procedures in the adjudication of fee waiver requests relating to the Form I-924.	No	
Form I-924 & Ins.	Form I-924 will also be used for regional center amendment requests. Will there be a reduced fee for regional center amendment requests, or will it be the same as the initial fee? Many regional center amendments require fewer documents to be submitted, depending on the amendment being sought, and thus would require less work to adjudicate than an initial regional center application. Additionally, since the supporting documents required for a regional center amendments are specific to what is being sought to be amended, do all sections of the form I-924 need to be filled out for an amendment application, or just the applicable sections?	Upon further consideration USCIS has come to the conclusion that the estimated ten hour public burden to prepare a Form I-924 amendment application underestimates that actual time required to prepare these materials. A review of a substantial number of recently filed	Yes	Amend public burden section of the Form I-924 instructions.

Form I-924 & Ins.	Form I-924 will also be used for regional center amendment requests. Will there be a reduced fee for regional center amendment requests, or will it be the same as the initial fee? Many regional center amendments require fewer documents to be submitted, depending on the amendment being sought, and thus would require less work to adjudicate than an initial regional center application. Additionally, since the supporting documents required for a regional center amendments are specific to what is being sought to be amended, do all sections of the form I-924 need to be filled out for an amendment application, or just the applicable sections? Also, The USCIS, like all federal agencies, must follow Office of Management and Budget ("OMB") Circular No. A-25 (http://www.whitehouse.gov/omb/rewrite/circulars/a025/a025.html) when determining fees to charge for its services. I do not believe that USCIS has followed this OMB circular in determining a fee for regional center amendments In A12d of the *Supporting Statement: Application for Regional Center under the Immigrant Investor Pilot Program: Form I-924, and Form I-924A* (OMB No. 1615-NEW), USCIS states that the adjudication of amendments to Regional Center designations requires 10 hours of work per response, compared to 40 hours for initial designation. Based on this difference, USCIS should charge a lower fee for amendments than for original regional center applications.	amendment requests by previously designated regional centers reveals that most amendments involve a diverse variety of adjudicative issues, such as changes in the regional center's: • Geographic scope • Organizational Structure • Capital investment projects, and; • Exemplar Form I-526 petitions While an amendment filed for but one of these issues might possibly only require ten hours to prepare, USCIS is convinced that the typical burden hours to prepare a detailed amendment application is substantially the same to prepare an initial application. USCIS has amended the Form I-924	Yes	Amend public burden section of the Form I-924 instructions.

		Supporting Statement, OMB No. 1615-NEW, to reflect this updated estimate. According to the OMB Circular A-25, user charges must be sufficient to recover the full cost of the federal government in providing the service. USCIS has determined that the amount of resources required to adjudicate amendments to a regional center's designation do not vary significantly from that required to adjudicate initial applications. This is due in part to the requirement that the entire record must in most cases be reviewed to adjudicate the amendment request.		
Form	The USCIS, like all federal agencies, is required to follow	See above.	Yes	Amend public

I-924	the Office of Management and Budget (—OMB□) *Circular No. A-25 Revised* (http://www.whitehouse.gov/omb/rewrite/circulars/a025/a025.html) when determining the fees to charge for its services. In the case of the proposed $6,230 fee for proposed Form I-924, IIUSA does not believe USCIS has met this burden set forth in Section 7f of the aforementioned Circular. That section states that —every effort should be made to keep the costs of collection to a minimum.□ In A12d of the *Supporting Statement: Application for Regional Center under the Immigrant Investor Pilot Program: Form I-924, and Form I-924A* (OMB No. 1615-NEW), USCIS states that the adjudication of amendments to Regional Center designations required 10 hours of work per response, compared to 40 hours for initial designation. IIUSA believes USCIS should consider a separate and lower fee based on the 30 hours difference in adjudication time between initial designation applications and amendments to existing designations. This rationale also applies to —exemplar I-526 petitions.□ The Association supports a full fee for initial exemplar petition adjudication. However it is IIUSA's position that USCIS should lower the fee for filing amendments to already approved exemplar I-526 petitions, which are usually filed to make sure all —material change□ requirements have been met. USCIS states that an amendment takes 25% as much time to adjudicate. According to Section 7f of the OMB Circular, USCIS is required to keep the fees associated with this service to a minimum. As such, the fee for amendments to existing Regional Center designations or approved exemplar I-526 petitions should be 25% of the			burden section of the Form I-924 instructions.

	initial designation fee.			
Form I-924 Inst Page 1	Section 5, under the heading, *Who Must File Form I-924 Supplement for Each Fiscal Year?*, states: In reference to 8 CFR 204.6(m)(3)(iv), provide a *detailed prediction* which addresses the prospective impact of the capital investment projects sponsored by the Regional Center, regionally or nationally, with respect to increases in household earnings, greater demand for business services, utilities, maintenance and repair, and construction both within and without the Regional Center. (Emphasis added.) The statement about a detailed projection is superseded by § 11037(a)(3) of the 21st Century Department of Justice Appropriations Authorization Act, which authorizes the approval of Regional Centers based on —general predictions.□ The provision reads as follows: The establishment of a regional center may be based on general predictions, contained in the proposal, concerning the kinds of commercial enterprises that will receive capital from aliens, the jobs that will be created directly or indirectly as a result of such capital investments, and the other positive economic effects such capital investments will have. IIUSA urges USCIS to change the reference on the Form I-924 Instructions to the 2002 amendments, allowing Regional Center applications based on —general predictions.	USCIS agrees that the regional center may provide general predictions which address the prospective impact of the capital investment projects sponsored by the Regional Center, regionally or nationally, with respect to increases in household earnings, greater demand for business services, utilities, maintenance and repair, and construction both within and without the Regional Center. The draft instructions have been modified accordingly.	Yes	Delete "detailed" from initial evidence 5 and replace with "general".
Form I-924 Inst. Page 1	I do not fully understand the language of the Purposes section in the instructions for form I-924. Page 1, section B describes when a regional center amendment may be filed for preliminary project approval. Subsection B.1 mentions an exemplar form and seems to follow the USCIS	Several commenters were confused by the language used in subsection B.2. of the Form I-924 instructions. To clarify	Yes	Delete What is the purpose of this form 2.B.2.

	December 11, 2009 memo on that issue. Subsection B.2 states, "An actual investment project where an exemplar investment project that is materially the same as the actual investment project was previously approved for use by the regional center for EB-5 capital investments." What does that mean?	this subsection has been eliminated as amendments of this nature are covered under subsection 2. A. 3.		
Form I-924 Inst.	B.2. states, "An actual investment project where an exemplar investment project that is materially the same as the actual investment project was previously approved for use by the regional center for EB-5 capital investments." What does that mean?	See above.	Yes	Delete What is the purpose of this form 2.B.2.
Form I-924 Inst. Page 1, Section B	What is the purpose or meaning of Section 2(B)(2) under the heading "What is the purpose of this Form?" This section reads "[a]n actual investment project where an exemplar investment project that is materially the same as the actual investment project was previously approved for use by the regional center for EB-5 capital investments." Please clarify.	See above.	Yes	Delete What is the purpose of this form 2.B.2.
Form I-924 & Inst.	Form I-924 and the instructions fail to define what constitutes a material change, which would require a regional center amendment (as to the regional center itself or as to a project approval). Thus, regional centers have no way of knowing when they are required to file an amendment. What happens if a regional center thought a change was not material but USCIS later determines it was material? USCIS should define material change narrowly to only apply when changes in the business plan lower the total job creation prediction below ten per investor.	Several commenters requested that USCIS define what constitutes a material change which would require an amendment to a regional center's designation. USCIS notes that the Form instructions in Part 2. under "What is the Purpose of this Form?" have been modified to	Yes	Modify Part 2. "What is the Purpose of this Form?"

		remove all reference to material change requirements. The circumstances within which a regional center may wish to file an amendment to a regional center designation are outlined in Part. 2.		
Form I-924 Inst	There remains no definition or guidance of what makes for a —material change□ that requires a Regional Center to submit an amendment (either to their designation or to a previously approved exemplar I-526). Changes in initial business plans are a part of doing business. In fact, the ability to adapt to those changes quickly often defines the success of a fledgling business. It is in the interest of the Program as a whole that there are clear guidelines on this issue so Regional Centers know when they have to submit an amendment. This kind of certainty is imperative to investors' confidence, which will always be the backbone of this, or any investment deal. It is the position of IIUSA that material change should be narrowly defined to only apply when changes in the business plan lower the total job creation prediction below ten per investor. It is the position of IIUSA that USCIS should be very reluctant to find a "material change" and should only do so when the purposes of the program would be frustrated. Changes to business operations involving EB-5 petitions should not require any additional filings when they represent the normal vicissitudes of business in reaction to changing market conditions and don't fundamentally change the type	See above.	Yes	Modify Part 2. "What is the Purpose of this Form?"

	of business being invested in and the way that jobs will be created. And even when material change may have occurred, USCIS should allow a regional center to file an exemplar petition for a previously approved project in order to give notice to USCIS of revisions to the business plan without requiring every investor to file a new individual petition and without causing "age out" of children who turned 21 after the initial I-526 was filed. Investors should be allowed to file an I-829 petition with evidence of a filed or approved I-924 to revise a business plan for the affected investors, showing that the new plan is viable and is reasonably likely to create the requisite jobs within a reasonable time using "reasonable methodologies," as is appropriate under the language in the legislation creating the regional center program and the normal regulator standard for I-829 approval.			
Form I-924 Inst.	**Part 2: Amendment to an approved Regional Center designation** □ Do all sections of the I-924 need to be filled out for an amendment, or only applicable sections?	The form must be completed in its entirety in order to be accepted by USCIS. However, if certain information in Part 3. of the form has not changed since the filing of the initial application or the last amendment, then the applicant may note "no change" in this section. Similarly, if the answer to the question is provided in an exhibit	No	

		submitted in support of the application, then the exhibit reference may be provided in response to the question on the form.		
Form I-924	Do all questions need to be answered on the form, or can we reference attached supporting materials (i.e. for Part 3 Question 5 could re say "see exhibit 3 attached" instead of using the box provided).	See above.	No	
Form I-924 Inst.	**Information about the Regional Center** □ Do all questions need to be answered on the form, or can the corresponding materials be referenced to attached supporting materials (i.e. —see exhibit 3 attached□)?	See above.	No	
Form I-924 Inst. Page 1	Page 1 of the draft I-924 instructions would allow USCIS to readjudicate a regional center project if its original determination was "legally deficient." If the project developer, investors and everyone else involved in the project relied on USCIS' original approval, USCIS should not be able to reverse its decision. To allow a readjudication would violate Chang v. United States, 327 F.3d 911 (9th Cir. 2003), in which the Ninth Circuit held that the immigration agency could not retroactively change its EB-5 interpretations.	Several commenters expressed concerns about the re-adjudication of various aspects of an approved regional center's designation referenced in the form instructions. This section of the form instructions has been removed.	Yes	Delete entire section
Form I-924 Inst.	IIUSA objects to the third basis for re-adjudicating a project that has been approved through exemplar petition, that the project approval was "legally deficient." Regional Center operators and EB-5 investors should not be asked to shoulder all of the consequences if USCIS did not properly adjudicate the exemplar I-526 in the first place. It is too late to re-adjudicate once people have committed. If the	See above.	Yes	Delete entire section

	Regional Center's business plan is followed, based on USCIS positive adjudication of the exemplar I-526, it has to be approved4. The law is too unclear and developing to allow the program to hinge on successive USCIS adjudicators agreeing or disagreeing with each other (or same adjudicator not changing his or her mind). This basis of re-adjudicating project represents another aspect of uncertainty that the EB-5 Program cannot afford. There is too much capital, economic growth, and job creation at stake to allow for that.			
Form I-924 Inst. Page 1	On page 1 under the heading "What is the purpose of this Form?" the instructions describe the "safe harbor" provision as follows: USCIS can readjudicate a prior regional center approval, including an exemplar, if the agency determines the project has experienced a "material change." AILA's primary objection is not the right of USCIS to reexamine a prior decision upon the occurrence of a "material change," but rather the agency's failure to define "material change." In the absence of a well-defined legal standard, stakeholders have no ability to reasonably assess if any change which occurs is "material," or if the change is insignificant necessitating no further action.	See above.	Yes	Delete entire section
Form I-924	AILA agrees that a prior decision may be subject to	See above.		

Page 1	readjudication if the record contains clear evidence of fraud or misrepresentation.			
Form I-924 Page 1	AILA strongly disagrees with the proposed USCIS policy that a prior decision may be subject to readjudication if the record contains evidence that the approval was "legally deficient." If USCIS receives a bona fide application and after review issues an approval, the Service must be legally bound to honor that approval in the absence of a finding of fraud or misrepresentation. The Service is reminded of *Chang v. United States of America*, 327 F. 3d 911 (9th Cir. 2003), where the court held that during the adjudication of Form I-829, USCIS could not review whether the initial plan submitted with Form I-526 was qualifying, but could only review whether the alien sustained that plan.	See above.	Yes	Delete entire section
Form I-924	Part 3(A) asks for the Social Security # of the Regional Center. Shouldn't this be an EIN instead?	Several commenters …USCIS has decided not to require this information collection	Yes	Delete this information collection.
Form I-924	(A): why does it ask for the Social Security # of the Regional Center? Shouldn't this be an EIN instead?			
Form I-924	I-526 petitions based on approved exemplar I-526 petitions should be eligible for premium processing. Those petitions should only be adjudicating the investors immigration aspects of the petition. This is no different than the many other immigrant and nonimmigrant visa categories that enjoy premium processing service.	One commenter stated that the Form I-526 petition should be eligible for premium processing service. This comment is not relevant to the Form I-924. Note	No	

		however, that USCIS has determined that premium processing service cannot be offered for the processing of Form I-526 petitions at this point in time due to operational constraints.		
Form I-924	Part 3(D) asks for the name of "other agent." Should this be completed for the managing principal(s)?	Yes. The purpose of the information collection in Form I-924, Part 3. D. is to collect information regarding all of the parties that will be involved in the management, oversight, and administration of the regional center, to include the managing principal(s) not already identified in Form I-924, Part 3, A., B. or C.	No	
Form I-924	(D): Name of other Agent: should this be completed for the managing principal(s)?			
Form I-924	Part 3(D)(9)(c) asks whether the Regional Center or any of its principals or agents has received or will receive fees, profits, surcharges, or other like remittances through EB-5 capital investment activities from this commercial enterprise. Does this refer to the administrative fees charged to investors on top of the capital contribution of $500,000 or $1 million, or something else?	Section 3. D. 9. c. requests information regarding whether the Regional Center or any of its principals or agents has received or will receive fees, profits, surcharges, or other like remittances through EB-5	Yes	Modify question with bolded language.
Form I-924	(D)(9)(c): *Has or will the Regional Center or any of its principals or agents receive fees, profits, surcharges, or*			

	other like remittances through EB-5 capital investment activities from this commercial enterprise? What information is the Agency looking for here?	capital investment activities from this commercial enterprise, **beyond the minimum capital investment threshold required of the EB-5 alien entrepreneurs.**		
Form I-924	Part 5, Signature of Attorney, fails to provide space for the firm name and address of the attorney.	One commenter noted that Part 5 of the form did not provide space for the firm name and address of the attorney. The form has been modified accordingly.	Yes	Provide space for firm name and address of attorney.
Form I-924 Ins.	The filing fee is stated as $6,245 under the heading —*What is the Filing Fee?"* It is our understanding that the proposed fee is **$6,230**.	Several commenters pointed out an error in the filing fee noted in the form relative to the fee referenced in the rule. This error has been fixed.	Yes	Fix filing fee amount
Form I-924 Inst.	On page 3 under the heading "Initial Evidence Requirements," Section 2 contains a note that reads: "An alien filing a Regional Center-affiliated Form I-526 must still establish that the investment will be made in a TEA at the time of filing of the alien's Form I-526 petition, or at the time of the investment, whichever occurs first, to qualify for the reduced $500,000 capital investment threshold." AILA strongly §opposes this interpretation of determining when an "investment" has occurred for EB-5	One commenter provided commentary relating to when TEA determinations must be made. The reference in the form instructions regarding the timing of TEA determinations has been eliminated it is not relevant to the	No	

	purposes. AILA suggests that USCIS reconsider this policy, which is unsupported by the regulations, in favor of a fair and reasonable interpretation that recognizes that an investment has occurred as of the date of receipt of capital into an irrevocable escrow.	adjudication of Form I-924 applications.		
Form I-924 Inst. **What is the purpose of the Form?**	Is it USCIS' policy that an amendment request "may" or "must" be filed if seeking a change to the regional center's "geographic area?"	The statutory framework of the Regional Center Pilot Program requires that a regional center *shall have jurisdiction over a limited geographic area, which shall be described in the proposal.* As such, an amendment must be filed if a regional has been designated with jurisdiction over a given geographic area and the regional center wishes to incorporate areas outside of its geographical designation.	No	
Form I-924 Inst.	Is it USCIS' policy that that an amendment request "may" or "must" be filed if seeking "any change" or "any material change" to the regional center's "organizational structure or administration?" Note that on page 8 of the instructions under the heading "Processing Information," USCIS writes: "Designated Regional Centers must notify USCIS within 30 days of the occurrence of any material change in	One commenter questioned whether the notification to USCIS through the EB-5 Program mailbox of a change in the structure, operation, or	Yes	Designated Regional Centers must notify USCIS within 30 days of change of address, contact information,

	the structure, operation, or administration of the Regional Center. Notification can be made by sending an e-mail to the EB-5 Program mailbox."	administration of the regional center constitutes an amendment of the designation of the regional center. The reference and the note on page 8 of the instructions is intended to provide a means for USCIS to timely capture minor changes such as changes in regional center staff and contact information, etc. This section has been modified to provide clarity on this point.		regional center principal(s), contracting agents or similar changes in the operation or administration of the Regional Center. Notification can be made by sending an e-mail to the EB-5 Program mailbox.
Form I-924 Inst.	What is the purpose or meaning of Section 2(A)(3) under the heading "What is the purpose of this Form?" This section reads "[a]ffiliated commercial enterprise investment opportunities, to include changes in the economic analysis and underlying business plan used to estimate job creation for previously approved investment opportunities." Please clarify the meaning of "affiliated commercial enterprise investment opportunities," as this appears to be a new term or concept to the EB-5 program.	One commenter expressed confusion over the use of the term "affiliated commercial enterprise investment opportunities". This phrase refers to capital investment projects offered by the regional center. This subsection has been modified to provide clarity on this point.	Yes	Capital investment projects, to include changes in the economic analysis and underlying business plan used to estimate job creation for previously approved investment opportunities

Form I-924 Inst	Lastly, in the draft I-924 instructions, on page 4, item 4 there is a verb missing from the last sentence which states, "...investment projects will from lawful sources."		Yes	Add "from" to the sentence.
Form I-924 Inst.	On page 4, Paragraph 4, the last sentence is incomplete and appears to be missing one or more words. The sentence reads: "Submit a plan of operation for the Regional Center which addresses how investors will be recruited and how the Regional Center will conduct its due diligence to ensure that all immigrant investor funds affiliated with its capital investment projects will (____) from lawful sources."			
Form I-924 Inst.	**Page 4, Item 4**- A verb is left out of the last line. —Submit a plan of operation for the Regional Center which addresses how investors will be recruited and how the Regional Center will conduct its due diligence to ensure that all immigrant investor funds affiliated with its capital investment projects will [arise?] from lawful sources."			
Form I-924 Inst.	On page 4, in the "Note" section, the instructions read: "The EB-5 alien investor's capital investment in a 'troubled business' must maintain the number of existing employees at no less than the pre-investment level for the period following his admission as a conditional permanent resident." Is it USCIS policy in a "troubled business" setting, that "pre-investment level" employees refers to those employees that exist as of (a) the actual date the alien's investment capital is placed into an irrevocable escrow; (b) the date of receipt of the I-526 petition (priority date); (c) the date the funds are released from escrow if triggered by I-526 approval; (d) the first day of conditional resident status; or (d) another date? Please clarify the instructions.	One commenter asked about when the number of employees to be maintained in "troubled business" is established. USCIS has determined that this is established at the time immediately prior to the capital investment, which is the earlier of the date upon which the capital investment was made or the filing date of the alien	No

Regional Center

Business Expansion Plan

Date: February 1, 2010

A NOTE ABOUT CONFIDENTIALITY

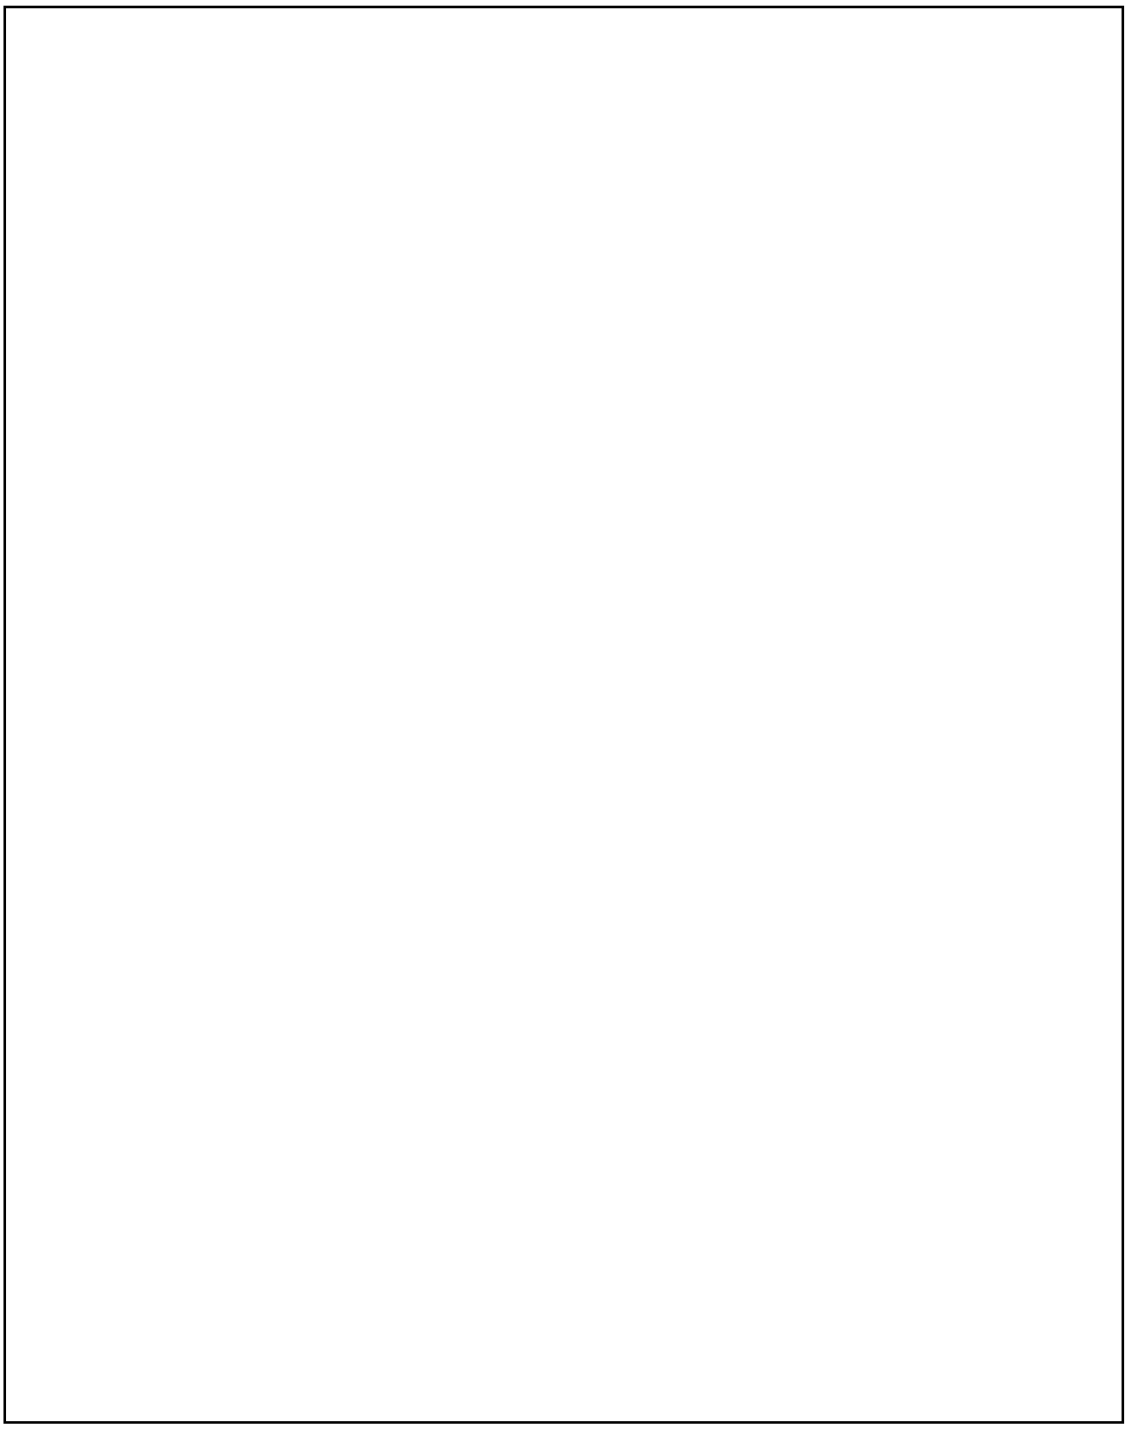
The contents of this business plan are highly proprietary, and should not be shared with any person other than officials of the U.S. Department of Homeland Security and USCIS who require this plan in order to analyze the application of Gulf Coast Funds Management LLC for an EB-5 regional center to expand coverage in the Commonwealth of Virginia and the State of Tennessee.

(b)(4)

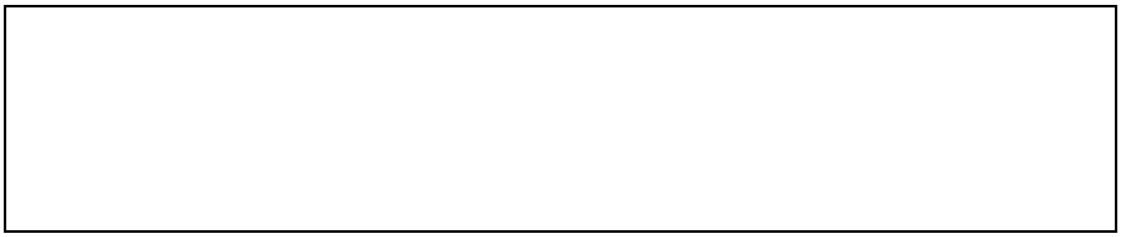
Gulf Coast Funds Management Regional Center Business Expansion Plan

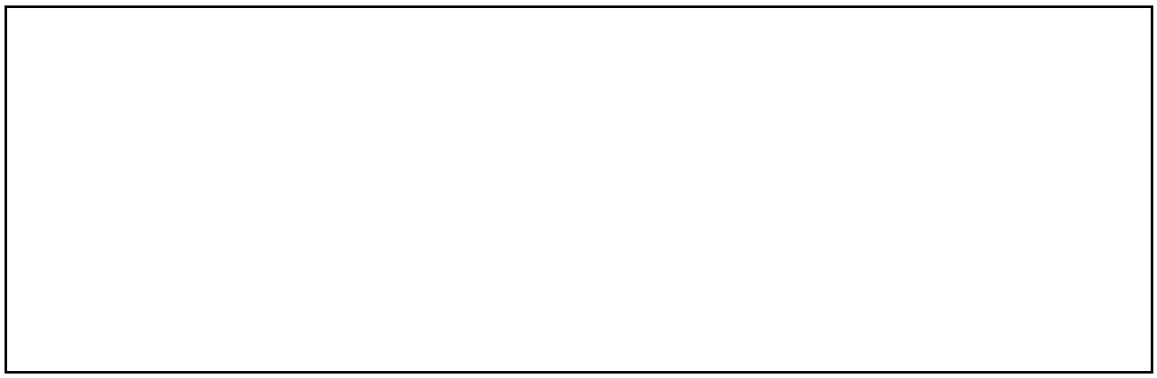
1.0 Executive Summary

(b)(4)



2.0 Company Summary





3.0 The EB-5 Immigrant Investor Program

The management company will manage EB-5 investment funds. The EB-5 immigrant investor program is described as follows by the United States Department of Homeland Security:

Immigration through Investment Overview

Under section 203(b)(5) of the Immigration and Nationality Act (INA), 8 U.S.C. 81153(6)(5), 10,000 immigrant visas per year are available to qualified individuals seeking permanent resident status on the basis of their engagement in a new commercial enterprise.

Of the 10,000 investor visas (i.e., EB-5 visas) available annually, 3,000 are set aside for those who apply under a pilot program involving a USCIS-designated Regional Center. A regional center is an entity, organization or agency that has been approved as such by the USCIS; focuses on a specific geographic area within the United States; and seeks to promote economic growth through increased export sales, improved regional productivity, creation of new jobs, and increased domestic capital investment.

"Alien investors" must demonstrate that a "qualified investment" (see below) is being made in a new commercial enterprise or approved Regional Center; and, show, using reasonable methodologies, that 10 or more jobs are actually created either directly or indirectly from the new commercial enterprise through revenues generated from increased exports, improved regional productivity, job creation, or increased domestic capital investment resulting from the pilot program.

Eligibility

Permanent resident status based on EB-5 eligibility is available to investors, either alone or coming with their spouses and unmarried children under 21 years of age. Eligible aliens are those who have invested – or are actively in the process of investing – the required amount of capital into a new commercial enterprise that they have established. They must further demonstrate that this

investment will benefit the U.S. economy and create the requisite number of full-time jobs within the U.S.

In general, "eligible individuals" include those:

1. Who establish a new commercial enterprise by: creating an original business; or purchasing an existing business and simultaneously or subsequently restructuring / reorganizing the business such that a new commercial enterprise results; or expanding an existing business by 140 percent of the pre-investment number of jobs or net worth, or retaining all existing jobs in a troubled business that has lost 20 percent of its net worth over the past 12 to 24 months; and

2. Who have invested – or who are actively in the process of investing – in a new commercial enterprise: at least $1,000,000; or at least $500,000 where the investment is being made in a "targeted employment area," which is an area that has experiences unemployment of at least 150 percent of the national average rate or a rural area as designated by OMB; and

3. Whose engagement in a new commercial enterprise will benefit the United States economy and: create full-time employment for not fewer than 10 qualified individuals; or maintain the number of existing employees at no less than the pre-investment level for a period of at least two years, where the capital investment is being made in a "troubled business," which is a business that has been in existences for at least two year and that has lost 20 percent of its net worth over the past 12 to 24 months.

Immigration risks

The investor himself and herself must meet the requirements under the EB-5 program. Each purchaser of a Unit must understand that the Fund, the management company and each of their affiliates make no representation or warranty of any kind concerning whether an investment in the Fund will meet the requirements of the EB-5 program or other U.S. immigration requirements. Each investor in a Unit must further understand that there can be no assurance that an investment in the Unit will result in his or her family receiving an EB-5 visa, conditional resident status or permanent resident status. Please carefully consider the following immigration risks, and discuss these and other immigration risks with your personal immigration lawyer.

As a Unit holder, you will be subjected to certain general immigration risks faced by all immigrants to the United States.

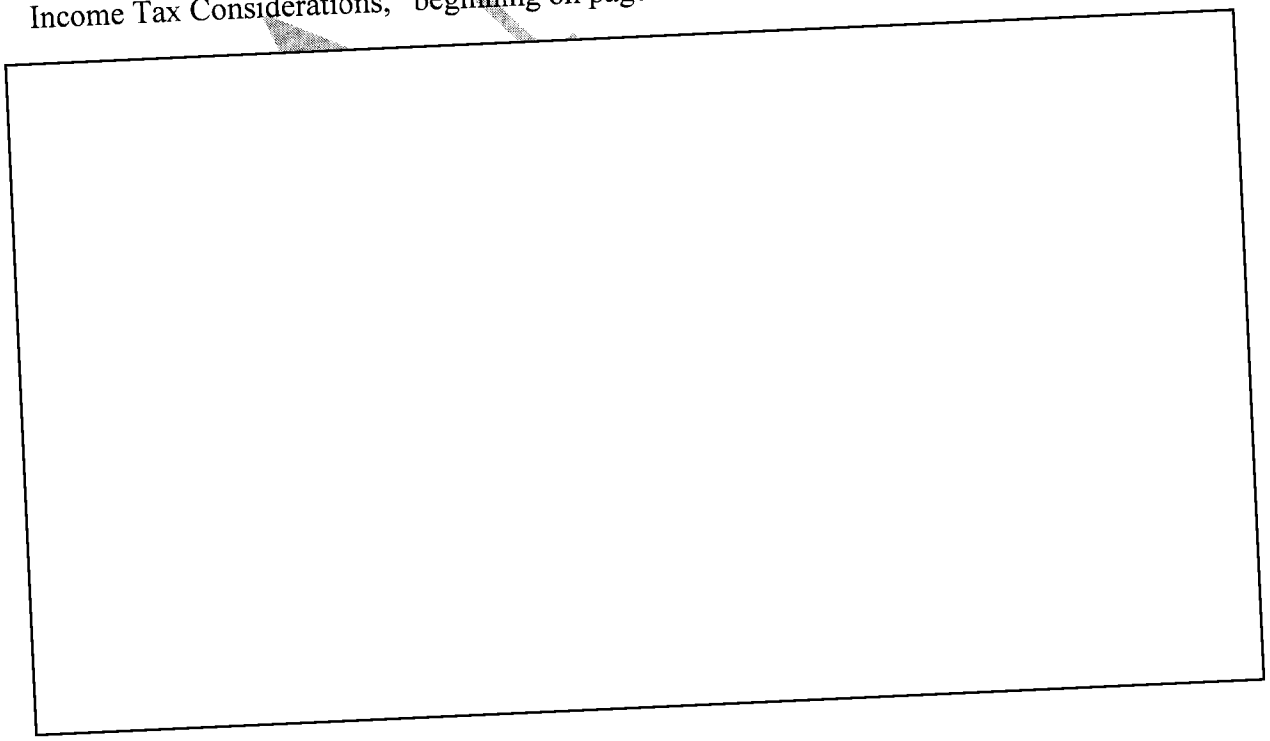
The process of obtaining conditional resident status and permanent resident status involves many factors and circumstances that are not within the control of the Fund. These include the investor's past history and source of funds, immigration visa backlogs, potential changes in immigration laws and regulations (including laws and regulations specific to the EB-5 immigrant investor program) and quotas established by the United States government limiting the number of visas available to qualified individuals seeking conditional resident status under the EB-5 program. Although the Fund has been structured with the objective of providing Unit holders with eligibility for conditional and permanent resident status under the EB-5 regional center provisions of the U.S. immigration laws, no assurance can be given that each Unit holder will obtain approval of his or her particular immigrant application. Purchase of a Unit does not guarantee conditional or permanent residency in the United States. Furthermore, no assurances or advice can be given that conditional resident status will be converted to permanent resident status.

An investment in a Unit is only a part of the requirement for meeting EB-5 residency status. In addition, the USCIS will require that you pass a background check.

Each immigrant investor in the United States is subjected to a thorough background check. An EB-5 immigrant investor's background (or that of an immediate family member) may not meet the USCIS criteria for temporary or permanent residency in the United States. For example, among other criteria, the following may be grounds for denial of immigration benefits for the immigrant, and/or other members of the immigrant's family: having a communicable disease (e.g., AIDS) or other dangerous contagious disease; having been at any time involved with, trafficking in, or taking, illegal drugs; having been convicted of certain crimes; having committed a fraud or misrepresentation to a U.S. Government official; or having violated U.S. immigration law in the past.

As a result of participation in the EB-5 program and as a result of your investment in the Fund, you must pay income taxes in the United States on your world-wide income. You should consult your personal tax advisor about this obligation.

As an EB-5 participant, you will have to pay taxes in the United States on your world-wide income. As a member of the Fund, which is a limited liability company, your proportionate share of the Fund's income will be "passed-through" to you for U.S. Federal income tax purposes. You will also be required to include in income your proportionate share of the taxable income of the Fund for the purposes of any state of which you are a resident. Please consult your personal tax advisor about the tax consequences of an investment in the Fund. Further information about these matters is included in this private placement memorandum under the heading "Certain U.S. Federal Income Tax Considerations," beginning on page 32. (b)(4)



[redacted]

The EB-5 regional center program is a U.S. government program that is highly regulated and that requires frequent interaction between the Fund and government officials.

The EB-5 regional center program was created by Congress, which has accorded broad regulatory powers to the Department of Homeland Security and in particular to the United States Citizenship and Immigration Service (USCIS). Currently, all EB-5 related filings are reviewed by USCIS adjudicators in the USCIS California service center. While the Fund will strive to coordinate with USCIS to achieve our investors' immigration goal, there can be no assurance that USCIS adjudicators will take a consistent position on issues arising under the program, and there can be no assurance that USCIS regulations will not change in the future. Since the laws, regulations and bureaucratic interpretations applicable to the Fund's investments are subject to change at any time, there can be no assurance that the Fund will not be required to substantially change its investment policies in the future. The EB-5 program could be discontinued or altered by Congress at any time.

It is a requirement of the EB-5 program that an immigrant investor's source of funds be proper, under U.S. immigration guidelines.

EB-5 immigrant investors must demonstrate to the USCIS that the funds they invest in the Units were obtained through lawful means. Each EB-5 immigrant investor must document, to the satisfaction of the USCIS and the U.S. State Department, that the source of funds is acceptable. The Fund, and the EB-5 immigrant investor's immigration attorney, may make a preliminary assessment, but the ultimate decision will be made solely by USCIS and the U.S. State Department. Each EB-5 immigrant investor must agree to provide information and documents to the Fund, and to allow the Fund to make further investigation, concerning the EB-5 immigrant investor's source of funds and the personal and business background of the EB-5 immigrant investor and accompanying family members.

Achieving your immigration goal of conditional and permanent resident status will require you to maintain your primary residence in the United States.

EB-5 immigrant investors who obtain conditional resident status or permanent resident status must intend to make the United States their primary residence. Conditional residents or permanent residents who maintain their primary residence outside the United States risk revocation of their U.S. residence status. Each prospective EB-5 immigrant investor should consult a competent immigration attorney to review the likelihood that the investor's immigration objectives will be achieved.

SAMPLE

USE OF PROCEEDS

SAMPLE

MANAGEMENT OF GTA

The following is a description of the business backgrounds of the executive officers of GTA:

Terry McAuliffe, Chairman

Mr. McAuliffe is the Chairman of GTA. He has been a long time investor and promoter of affordable green energy projects. It is at his direction that GTA has set its goal to truly meet a higher standard among our peers stating that "no green technology is green unless it is affordable to average consumers."

Before joining GTA, Mr. McAuliffe has been a longtime business leader and successful entrepreneur for nearly four decades. He has successfully started over two dozen companies in the fields of banking, real estate, securities, marketing, renewable energy and insurance. At the age of 14, Mr. McAuliffe started his first business, McAuliffe Driveway Maintenance, where he sealed residential driveways and commercial parking lots in his local community of Syracuse, New York. In January 1988, when he was only 30 years old, Mr. McAuliffe became the youngest chairman of a federally chartered bank in the history of the United States.

Mr. McAuliffe also served as Chairman of American Heritage Homes, one of Florida's largest homebuilding companies, as well as President of American Capitol Management Company, a major developer of real estate projects. He has been an active investor in the alternative energy field for over a decade.

In addition to his successful business career, he is a longtime political leader for the Democratic Party in the United States. He started his political career in the 1980 Presidential reelection campaign of President Jimmy Carter, and at the age of 22 became the national finance director for that campaign. He then served as National Finance Chairman of the Gephardt for President committee, National Finance Chairman and the National Co-Chairman of the Clinton-Gore re-election committee. In 1993, he was named by President Clinton as Ambassador and Commissioner General of the Korean International Exposition. He was Chairman of the 53rd Presidential Inaugural Committee and Chairman of the White House Millennium Celebration. In 2000, he chaired the Democratic National Convention in Los Angeles. He was elected Chairman of the Democratic National Committee from 2001 to 2005. He is widely credited with rebuilding, reenergizing and revitalizing the Democratic Party. As Chairman of the DNC, he shattered all Party records by raising over $535 million. He also served as Chairman of the 2008 Hillary Clinton Presidential campaign. In 2009, he unsuccessfully ran for Governor of the State of Virginia.

Chairman McAuliffe received a Juris Doctor degree from Georgetown University School of Law and a bachelors degree from The Catholic University of America in Washington, D.C.

MANAGEMENT OF OUR FUND

The management company of the Fund is managed by a group of distinguished business, community, and political leaders with extensive experience in investment. The following is a description of the business backgrounds of the board members and officers of the management company for the Fund. With the expansion of GCFM-RC coverage, the fund will provide the same level of highly professional management as it does right now to support GTA project.

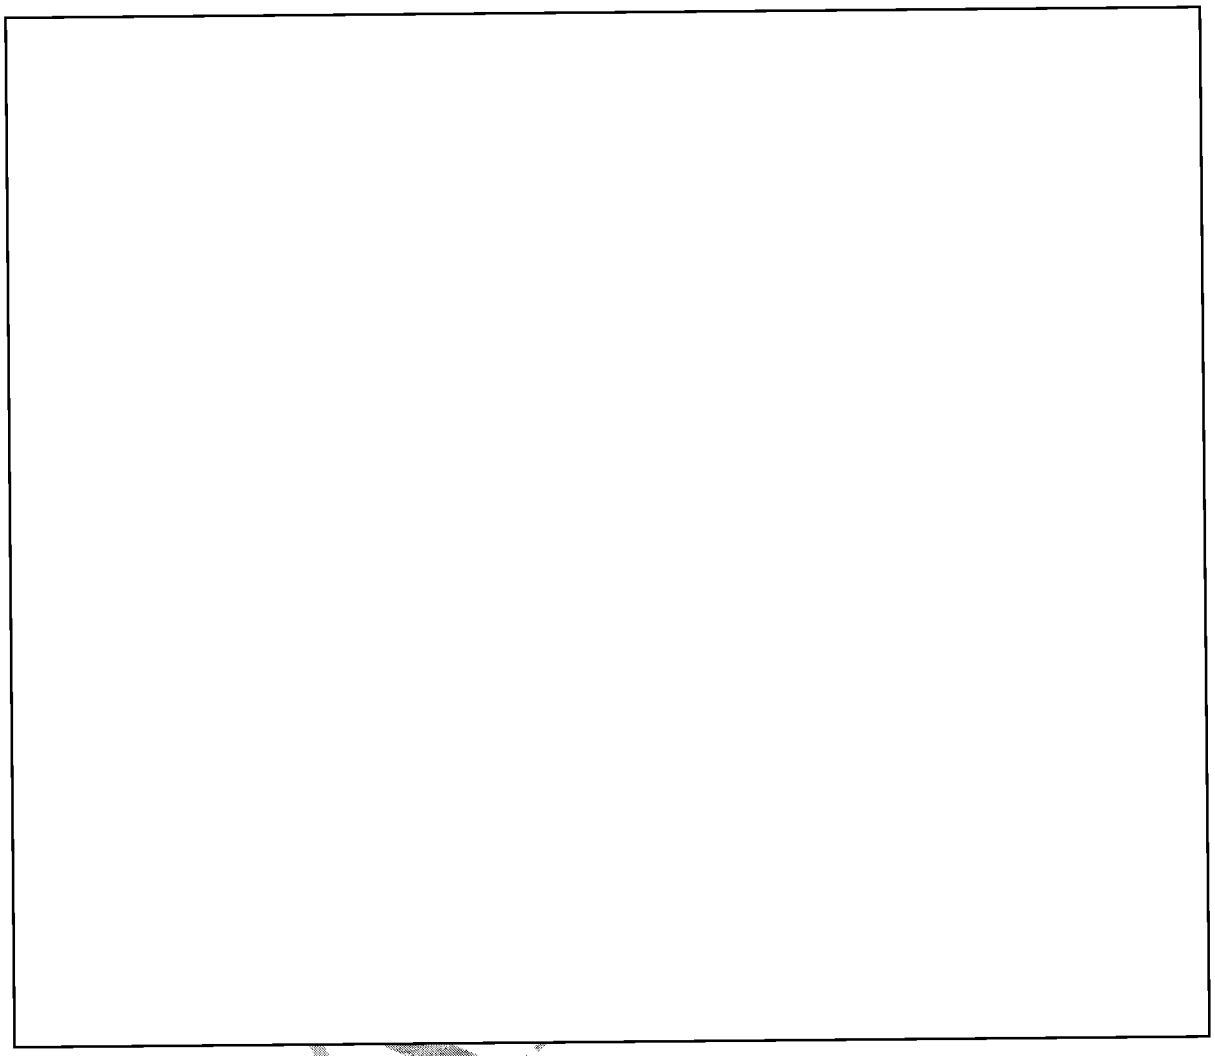
Board Director, Kathleen Blanco

Kathleen Blanco is the former governor of the State of Louisiana. Governor Blanco was elected lieutenant governor in 1995, and was overwhelmingly reelected to her second term in 1999, winning 80 percent of the vote. As the state's second-highest official, she supervised the Department of Culture, Recreation and Tourism. Under her leadership, tourism in Louisiana increased by 41 percent. This growth led to a $2.5 billion increase in the tourism industry's economic contribution to the state and the creation of 21,000 new tourism-related jobs.

On January 12, 2004, Blanco became the first woman governor of Louisiana. Committed to education excellence, she chaired the Southern Regional Education Board and made Louisiana a leader in improved education standards throughout the South. She was responsible for passage of the largest increased investment in education in the state's history. Blanco also led one of the most aggressive economic development efforts in state history, making significant investments in the advanced technology infrastructure needed to diversify Louisiana's economy as well as in the highway, port, and infrastructure improvements needed to increase Louisiana's ability to compete for new jobs. In all, she attracted nearly $24 billion in new investments representing nearly 35,000 new jobs in just three years. In addition, she was responsible for the expansion of access to health insurance for Louisiana's children, and created a nationally-recognized model of excellence in juvenile justice by overhauling Louisiana's state corrections system. In 2005, Governor Blanco led Louisiana through Hurricane Katrina and its aftermath, the largest natural disaster in American history. Under her leadership and guidance, well over $2 billion in recovery dollars is at work aiding local communities. Included in that figure are investments in school and home rebuilding, improving emergency response capabilities, and addressing health care needs. Blanco also established the Coastal Protection and Restoration Authority and led the fight to secure America's wetland, Louisiana's natural barrier against future storms. During her gubernatorial tenure, Blanco served on the National Governors Association's Center for Best Practices board as well as on two NGA committees: Natural Resources; and Education, Early Childhood, and Workforce.

DRAFT

Board Director, Margret Richardson (b)(6)



Board Director, Owen Pickett

Congressman Pickett began his distinguished career in public service in 1972 by serving in the Virginia House of Delegates where he gained a reputation for his fiscal conservatism. While in the House of Delegates, Congressman Pickett served on numerous boards and committees, including the Virginia Democratic State Central Committee, Democratic City Committee Virginia Beach, and on the executive committee of the Southern Growth Policies Board.

In 1986 Congressman Pickett was elected to the 100th Congress to represent Virginia's Second District. Virginia's Second District is home to the nation's largest military complex with facilities serving commands of the Navy, Army, Coast Guard, and the NATO Atlantic Command. Appropriately, Congressman Pickett serves on the Armed Services Committee. He is the Ranking Member on the Military Research and Development Subcommittee and also serves on the Readiness Subcommittee. Congressman Pickett is a member of the Congressional Study Group on Germany, as

4. Using the IMPLAN Model to Calculate National Multipliers

The IMPLAN model is a regional input/model developed and maintained by the Minnesota IMPLAN group, headquartered in Minneapolis. The basic model was originally developed by the USDA Forest Service in cooperation with the Federal Emergency Management Agency and the USDI Bureau of Land Management.

The IMPLAN model has certain similarities with the RIMS (Regional Input/Output Modeling system) model developed by the Department of Commerce, but is generally thought to contain several superior features besides its greater ease and flexibility of use. These improvements can be summarized as follows:

1. The Commerce Department is not permitted to publish data in any category where there are less than three organizations in a given economic area. IMPLAN has developed an algorithm to fill in the missing numbers.

2. IMPLAN has introduced improved methods of accounting for flows of goods and services among counties.

3. IMPLAN permits aggregation of any subset of industries for calculation and tabular purposes. This is useful when results are desired for, say, 1-digit industries instead of the 509 industries actually found in the input/output table.

4. As seen in the tables throughout this text, IMPLAN estimates three separate effects, labeled "direct", "indirect" and "induced". The direct effects are those entered by the user. The other two columns represent the multiplier effects, but they are usually combined in other input/output models. Briefly, the indirect effect represents purchases made by businesses when their sales rise. For example, a restaurant might order more food produced or sold in the region, or an automobile plant might order more steel. The induced effect represents the additional household spending because income has risen. For example, casino workers would spend their paychecks on various goods and services, some of which are produced in the region. In general, then, the larger the region under consideration, the larger the multipliers would be.

The following material, taken from the IMPLAN manual, describes the input/output process in more detail.

Input/output analysis is a means of examining relationships within an economy, both between businesses and between businesses and final consumers. It captures all of the monetary market transactions for consumption in a given time period. The resulting mathematical formulae allow examination of

the effects of a change in one or several economic activities on an entire economy.

A descriptive model includes information about local economic interactions known as regional economic accounts. These tables describe a local economy in terms of the flow of dollars from purchasers to producers within the region. The initial IMPLAN data details all purchases, including imported goods and services. When regional economic accounts are created, imports to the region are removed from the initial data, allowing examination of local inter-industry transactions and final purchases.

The regional economic accounts are used to construct local level multipliers. Multipliers describe the response of the economy to a stimulus (a change in demand or production). The multipliers represent the Predictive Model.

Purchases for final use (final demand) drive an input/output model. Industries producing goods and services for consumption purchase goods and services from other producers. These other producers, in turn, purchase goods and services. These indirect purchases (or indirect effects) continue until leakages from the region (imports, wages, profits, etc.) stop the cycle.

The indirect effects and the effects of increased household spending (induced effects) can be mathematically derived as sets of multipliers. The derivation is called the Leontief inverse. The resulting sets of multipliers describe the change of output for each industry caused by a one dollar change in final demand for any given industry.

The input/output analysis framework is similar to a financial accounting framework that tracks purchases of and expenditures on goods and services in dollars. Input/output accounting traces the flow of dollars between businesses and between businesses and final consumers. An input/output accounting framework can be illustrated using classic financial accounting T-accounts, which include receipts (income) and expenditures (expenses) on each side of a "T", as shown below.

Final Consumption (or final demand) drives input/output models. Industries respond to meet demand directly or indirectly, by supplying goods and services to industries responding directly. Each industry that produces goods and services generates demands for other goods and services, and so on. Multipliers describe these iterations.

There are three different multipliers developed for predictive modeling: Type I, Type II, and Type SAM. We start with the transactions table and derive a coefficient by dividing each industry column by the column total. This coefficient matrix is also known as the ***A Matrix***.

Appendix B. Resume of Dr. Michael K. Evans

CURRENT AND PREVIOUS POSITIONS

• Chairman, *Evans, Carroll & Associates, Inc.*, 1980-present (previously Evans Economics)

Economic consulting firm specializing in EB-5 immigration analysis, economic impact studies of development projects and new construction, models of state and local tax receipts, impact of current and proposed government legislation, and construction of econometric models for individual industries and companies.

• Chief Economist, *American Economics Group*, 2000-present.

Built a comprehensive state modeling system that provides economic analysis for a variety of consulting projects (see below).

• Clinical Professor of Economics, Department of Managerial Economics and Decision Sciences (MEDS), Kellogg Graduate School of Management, Northwestern University, 1996-99.

Taught courses in macroeconomics and business forecasting. Wrote textbooks for both courses.

• Winner of Blue Chip Economic Indicator Award for most accurate macroeconomic forecasts during the past four years, November 1999

• Founder and President, *Chase Econometric Associates*, 1970-1980

• Assistant and Associate Professor of Economics, Wharton School, University of Pennsylvania, 1964-69. Co-developer of the original Wharton Model.

• Visiting Professor, Radford University, (Radford, VA), 1987

Chairman of Institute for International Economic Competitiveness

• Visiting Lecturer, Hebrew University (Jerusalem), 1966-67

Built econometric model of the Israeli economy

Ph. D. in Economics, Brown University. Dissertation, "A Postwar Quarterly Model of the United States Economy, 1948-1962". A. B. in Mathematical Economics, Brown University

PREVIOUS ACTIVITIES AND EDUCATION

- Contributing Editor, *Industry Week*

Wrote a column in each issue on economic and financial trends as they impact the mfg sector.

- Editor, *The Evans Report*

Weekly newsletter discussing economic trends and financial markets. Pioneered the concept of the Monthly Tracking Model to incorporate recent economic releases into the overall economic forecast, including methods to predict these economic data.

- Consultant, *National Printing Equipment and Supply Association*

Prepares quarterly forecasts of shipments of printing equipment and graphic arts supplies by product line, based on an econometric model constructed for NPES. Also prepares analysis and forecasts of exports and imports by principal product line.

- Consultant, *APICS -- The Educational Society for Resource Management*,

In 1993, designed and developed the *APICS Business Outlook Index*, which uses survey data collected by the Evans Group to measure current production, production plans, shipments, employment, new orders, unfilled orders, inventory stocks, and the comparison of the actual to desired inventory/sales ratio to predict short-term changes in mfg sector activity. The results of this survey appeared every month in *APICS: The Performance Advantage*

- Consultant, *American Hardware Mfg Association*

Wrote a separate weekly edition of the Evans Report analyzing recent trends in the hardware and housing industries, including forecasts of the hardware industry based on an econometric model developed for AHMA.

- Board of Economists, *Los Angeles Times*

Wrote column every 6 weeks (5 other economists on the Board)

- Columnist, *United Press International*

  Wrote twice-weekly column, "Dollars and Trends"

- Consultant, Senate Finance Committee,

  Built the first large-scale supply-side model of the U. S. economy

- Consultant, Environmental Protection Agency and Council on Environmental Quality

  Estimated inflationary impact of government regulations

- Consultant, National Aeronautics and Space Administration

  Estimate impact of R&D spending on productivity growth

- Consultant, U. S. Treasury

  Estimated impact of investment tax credit and accelerated depreciation on capital spending by industry

- Consultant, U. S. Department of Agriculture

  Built large-scale econometric model of agricultural sector of U. S. economy

- Consultant, Organization of Economic Cooperation and Development

  Built econometric model of the French economy

SAMPLE OF RECENT CONSULTING PROJECTS

A. Economic Impact of EB-5 Immigrant Investor Programs and New Markets Tax Credits

- Calculated the number of jobs created for a film production company in New York City.

- Calculated economic impact of small-scale rooftop solar panels in various counties in California.

- Calculated economic impact of 7 different types of proposed businesses for a proposed regional center in the Bay Area of California.

- Determined the economic impact of a new biological research park, office building, and logistics center in Wooster, Ohio.

- Calculated the economic effect of a mixed-use urban renewal project in Cleveland, Ohio.

- Calculated economic impact of 14 different types of proposed businesses for a proposed EB-5 regional center that would include the entire state of Florida.

- Calculated economic impact of dairy farm and cheese processing plant in Northern California.

- Determined economic impact of a shipyard, food processing plant, and semiconductor plant for a proposed regional center in Louisiana and Mississippi.

- Calculated the economic impact of a new gaming casino in Natchez, Mississippi.

- Calculated the economic impact of a retail shopping center in suburban Los Angeles County.

- Prepared an economic impact analysis for the "timber to homes" project for a proposed regional center in Colorado.

- Calculated the economic impact for a proposed regional center in Baltimore, Maryland that would include the rebuilding of depressed areas in East Baltimore and along the riverfront.

- Prepared the economic analysis for a proposed EB-5 regional center for the entire state of Florida that included impact calculations for 14 different types of industries.

- Prepared the economic analysis for a proposed EB-5 regional center in the San Francisco Bay area that included calculations for 10 different types of industries.

- Prepared economic impact calculations for proposed EB-5 regional centers in New York City and Northeastern New Jersey.

- Calculated the economic impact of a rehabilitated office building in Albuquerque, New Mexico, including the increase in high quality jobs.

- Calculated the economic impact of a rehabilitated skilled nursing center in East Los Angeles, California, including the impact on nearby census tracts.

- Calculated the economic impact of development of warehouse and light industrial mfg space in Las Vegas, Nevada.

- Calculated the economic impact of rehabilitation and expansion of a vacation and health spa in Sharon Springs, New York

- Calculated economic impact of revitalizing an old resort hotel and adding new facilities for Lake Geneva, WI.

- Calculated the employment and tax effects for a portfolio of projects undertaken under the New Market capital program.

- Calculated generic employment changes for proposed EB-5 project for an Inland Port in Palm Beach County, FL

- Calculated the economic impact of construction of El Monte Village in El Monte, CA.

- Built an input/output model of Guam to be used to calculate economic impact of EB-5 projects. Used this model to estimate impact of various proposed projects.

- Calculated the economic impact of moving the Social Security Administration building in Birmingham, AL, and revitalizing the surrounding neighborhood.

- Calculated the economic impact of rehabbing and expanding the Everett Mall in Everett, WA.

- Determined the economic impact of building a new medical center in Charleston, SC

- Calculated economic impact of expanding Sugarbush resort in Vermont. Study included expansion of existing facilities and addition of new facilities.

• Calculated economic impact for new market tax credit program in Portsmouth, N.H. Study included both overall economic impact, and the increase in employment and income and the decrease in the unemployment rate and incidence of poverty in individual census tracts.

• Calculated the economic benefits of EB-5 programs for foreign investors for a mixed-use construction project, including a hotel, retail stores, apartments, and a sports stadium in the Washington, D. C. metropolitan area

• Calculated the economic benefits of EB-5 programs for foreign investors for a mixed-used retail shopping center in the New York City metropolitan area.

• Calculated the economic benefits of EB-5 programs for foreign investors for proposed shopping centers in five separate counties in Southern California, including differential impacts of building the shopping centers in different counties.

B. Projects for State and Local Governments

• Constructed an econometric model for the State of New York and determined the change in employment, labor income, and tax revenues for 43 different tax changes proposed by the Governor's office.

• Constructed a detailed econometric model for the State of Pennsylvania to determine the economic impact of the complete panoply of state taxes levied; the model contains over 1,000 equations. In cooperation with American Economics Group, the model was developed to simulate the effect of changes in any state tax rate on households and businesses by income deciles, household status, age of individuals, size of households, and many other demographic variables. The change in business taxes can also be simulated for detailed industry classifications.

• Determined whether the Washington, D.C. water and sewer authority should accept a high bid for a new waste disposal system. Decision to reject has saved the authority over $200 million, as construction prices turned down sharply as predicted.

• Built an econometric model to determine the "tax gap" caused by Internet sales for the state of Minnesota.

• Determined appropriate levels of shelter grants individual counties in New York State, and for utility allowances in New York City. Reviewed and prepared testimony in ongoing court cases in these areas.

• Calculated the economic impact of the revitalization of downtown Milwaukee, Wisconsin.

C. Economic Impact of Casino Gaming

• Built an econometric model to predict the growth of the gaming industry over the next decade, and the economic impact of that industry on employment and tax revenues at the Federal and state levels.

• Estimated the economic impact of Indian casino gaming nationally and for the State of Wisconsin.

• Determined the economic impact of the Oneida Indian gaming casino on the Green Bay metropolitan area.

• Estimated the negative economic impact on the Milwaukee area if a new Indian gaming casino were to be built in Kenosha, Wisconsin.

D. Economic Impact of Smoking Bans and Higher Taxes

• Testified on economic impact of smoking bans in Canada; certified as an expert witness by the Court.

• Examined the impact of smoking bans on restaurant sales in several different locations in the U.S. to determine how much sales changed when these bans were imposed, and the differential effects depending on whether these bans were partial or total.

• Determined the cross-border effects on retail sales from differential rates in cigarette, gasoline, and alcohol excise taxes

• Determined the economic impact of higher cigarette taxes on minority group employment.

• Estimated the economic impact and loss of Federal and state tax revenues when higher cigarette prices lead to increased smuggling.

E. Consulting Projects for Travel and Tourism

• Built an econometric model to predict tourism trips and revenues for the major regions of the U.S. economy.

• Constructed econometric models to predict tourism in Las Vegas and Orlando.

• Using the IMPLAN model, predicted economic impact of tourism and travel expenditures for all counties in Pennsylvania.

F. Other Private Sector Consulting Projects

• Calculated the economic impact of proposed EPA bans on fluoropolymer production.

• Estimated the size and economic importance of the fluoropolymer industry, and calculated economic impact of shutting down domestic production.

• Built an econometric model to examine how U.S. tax and regulatory policies help determine whether the gold mining industry would invest in the U.S. or other countries. Testified before Congress to help defeat legislation inimical to the mining industry.

• Built an econometric model to predict consumer bankruptcies, based on recent growth in consumer credit outstanding, the overall economic environment, and recent changes in credit regulations

• Estimated the economic impact of the ethanol subsidy on the U.S. economy and Farm Belt States, including the impact on the balance of payments, employment, and tax receipts. Testified before Congress to help pass legislation to extent subsidies to the ethanol industry.

• Built an econometric model to determine the impact of updating and improving the system of locks on the Upper Mississippi River on corn prices and exports, farm income, and the overall economy.

Commonwealth of Virginia

STATE CORPORATION COMMISSION

Richmond, October 9, 2009

This is to certify that the certificate of incorporation of

WM GreenTech Automotive Corp.

was this day issued and admitted to record in this office and that the said corporation is authorized to transact its business subject to all Virginia laws applicable to the corporation and its business. Effective date: October 9, 2009

State Corporation Commission
Attest:

Joel H. Peck
Clerk of the Commission

CIS0313

COMMONWEALTH OF VIRGINIA
STATE CORPORATION COMMISSION

ARTICLES OF INCORPORATION
OF A VIRGINIA STOCK CORPORATION

The undersigned, pursuant to Chapter 9 of Title 13.1 of the Code of Virginia, state(s) as follows:

Article 1.
The name of the corporation is:

WM GreenTech Automotive Corp.

Article 2.
The number (and classes, if any) of shares the corporation is authorized to issue is (are):

Number of shares authorized	Class

(b)(4)

Article 3.
A. The name of the corporation's initial registered agent is:

Charles Xiaolin Wang

B. An individual who is a resident of Virginia and an initial director of the corporation.

1. a. The corporation's initial registered office address, which is the business office of the initial registered agent, is:

   1356 Beverly Road, Suite 200
   McLean, VA 22101

   b. The registered office is physically located in the **county of Fairfax**

2. The initial directors are:

Name	Address
Terry McAuliffe	
Charles Xiaolin Wang	
Gary Yi Tang	

3. Incorp

COMMONWEALTH OF VIRGINIA
STATE CORPORATION COMMISSION

AT RICHMOND, OCTOBER 9, 2009

The State Corporation Commission has found the accompanying articles submitted on behalf of

WM GreenTech Automotive Corp.

to comply with the requirements of law, and confirms payment of all required fees. Therefore, it is ORDERED that this

CERTIFICATE OF INCORPORATION

be issued and admitted to record with the articles of incorporation in the Office of the Clerk of the Commission, effective October 9, 2009.

The corporation is granted the authority conferred on it by law in accordance with the articles, subject to the conditions and restrictions imposed by law.

Re: WAC1024250498 (Motion)
W09001430/RCW10319103l4 (Regional Center Proposal)

NOTICE OF DECISION

The applicant filed Regional Center Proposal, pursuant to section 610(a) of the Pilot Immigration Program, on February 22, 2010. On August 11, 2010, U.S. Citizenship and Immigration Services (USCIS) denied the application for the reason(s) discussed in that decision. On September 10, 2010, the Regional Center filed a Motion to Reopen and Reconsider the adverse decision.

8 C.F.R. 103.5 states:

> (2) Requirements for motion to reopen. A motion to reopen must state the new facts to be proved in the reopened proceeding and be supported by affidavits or other documentary evidence.
>
> (3) Requirements for motion to reconsider. A motion to reconsider must state the reasons for reconsideration and be supported by any pertinent precedent decisions to establish that the decision was based on an incorrect application of law or Service policy. A motion to reconsider a decision on an application or petition must, when filed, also establish that the decision was incorrect based on the evidence of record at the time of the initial decision.

8 C.F.R. 103.5(a)(4) states, in part:

> . . . A motion that does not meet applicable requirements shall be dismissed. . .

The Regional Center has not stated reasons for reconsideration that are supported by precedent decisions or other binding decisions showing that the USCIS decision was based on an incorrect application of law. As such, the Motion to Reconsider is denied.

However, because the Regional Center has provided new evidence that directly addresses eligibility for the benefit, the case will be re-opened. In accordance with 8 C.F.R. 103.5(a), the motion is granted. The previous decision is vacated and the proposal is reopened. However, after further review, the proposal will be denied and certified to the Office of Administrative Appeals for their action. Please see the enclosed denial notice.

NOTICE OF CERTIFICATION

Re: Request by Gulf Coast Funds Management Regional Center to amend their designation as a Regional Center.

PLEASE TAKE NOTICE THAT THE FOLLOWING ACTION HAS BEEN TAKEN IN THE ABOVE ENTITLED MATTER:

See Attachment

The case has been certified for review to:

CHIEF, ADMINISTRATIVE APPEALS OFFICE

Within thirty (30) days after the date of this notice, the petitioner may submit a brief or other written statement for consideration by the reviewing authority. The thirty (30) day period may be waived, but it may not be extended. The brief, statement or waiver of this thirty (30) day briefing period must be sent directly to:

U. S. Citizenship and Immigration Services
Administrative Appeals Office MS 2090
Washington, D.C. 20529-2090.

Sincerely,

Rosemary Langley Melville
Director, California Service Center

cc: Dawn Lurie, esq.

This Notice is in reference to the request by Gulf Coast Funds Management, LLC. to Amend its Regional Center Proposal. That amendment was filed on February 22, 2010, with the California Service Center, and denied on August 11, 2010. On September 10, 2010, Gulf Coast Funds Management, LLC ("GCFM") filed a motion requesting that USCIS reopen and reconsider the decision to deny the amendment request. As noted on the motion decision, USCIS has granted the motion to reopen but denied the motion to reconsider. This decision will be certified to the Office of Administrative Appeals for their review.

Background:

On August 18, 2008, USCIS approved and designated GCFM as a Regional Center under the Immigrant Investor Pilot Program ("Pilot Program"). Currently the focus of the GCFM-RC business plan and job creation analysis and multipliers is to generate immigrant investor capital into the following target industry commercial enterprise activities within Mississippi and Louisiana:

1. Shipbuilding;

2. Food Processing; and

3. Manufacturing.

As such, aliens seeking immigrant visas through the Immigrant Investor Pilot Program may file individual petitions with USCIS for these commercial enterprises located within the GCFM-RC area comprised of the states of Mississippi and Louisiana. The Gulf Coast Funds Management Regional Center requested USCIS to amend its designation as a Regional Center for the purpose of expanding their industrial scope to include: manufacturing; education and training; research and development; and wholesale trade. The Center also requested permission to add the State of Tennessee and the Tobacco dependent counties of the Commonwealth of Virginia to the current focus area of the States of Mississippi and Louisiana.

As part of the requested amendment GCFM is seeking authorization to offer capital investment opportunities to immigrant investors in order to invest in limited liability companies (LLCs) as the new commercial enterprise, the first one being GTA Automotive Investment Fund I, LLC (GTAAIF I)[1]. Through
(b)(4) GTAAIF I the Regional Center plans to offer investment "Units" only to non-resident investors with a subscription price of [redacted] of which will be the EB-5 investment capital investment. According to page two of GTAAIF I's sample Offering Memorandum, $55,000 of the subscription price will be transferred from GTAAIF I to the prospective job-creating entities, WM GreenTech Automotive Corp. (WMGTA) or GreenTech Automotive, Inc. (GTAI) as an administrative fee which will be used to "pay legal and other administrative fees associated with marketing the Units world-wide." According to the Business Expansion Plan, dated February 1, 2010, GTAI was incorporated in Mississippi, and WMGTA was incorporated in Virginia. The business plan refers to the corporations as "GTA", collectively.
The investment units are to be used by GTAAIF to purchase shares of preferred stock in either WMGTA or GTAI, to construct and operate a hybrid car automotive plant, predominantly building the parts in the Virginia plant (WMGTA) and then assembling the parts in the Mississippi plant (GTAI). A transportation hub/warehouse will be constructed and will operate in Shelby County, TN, which is in close proximity to the MS plant.

[1] A review of the GCFM website shows that GCFM is currently promoting investments in GTAI through an entity called Gulf Coast Automotive Fund A-1, which is within the geographic area (MS & LA) which is the GCFM's current geographic scope. http://www.gulfcoastfunds.com/investmentfunds/automotivefund/index.html

The request to amend the proposal was denied because the amendment failed to show that its focus will be on the newly defined geographical area in its entirety. The amendment was also denied because the impact prediction required under 8 C.F.R. 204.6(m)(3)(iii) did not establish the impact of the future Regional Center's activities on either the national or regional level. Based upon a review of the entire record, including the documentation and arguments submitted in support of the motion, the Regional Center still has failed to demonstrate that it will in fact focus on the entire geographic area of the regional center.

Description of how the Regional Center will focus on the geographical area

Section 610 of the Departments of Commerce, Justice and State, the Judiciary, and Related Agencies Appropriations Act of 1993, Pub. L. 102-395, as amended, provides:

> (a) Of the visas otherwise available under section 203(b)(5) of the Immigration and Nationality Act (8 U.S.C. 1153(b)(5)), the Secretary of State, together with the Secretary of Homeland Security, shall set aside visas for a pilot program to implement the provisions of such section. Such pilot program shall involve a regional center in the United States, designated by the Secretary of Homeland Security on the basis of a general proposal, for the promotion of economic growth, including increased export sales, improved regional productivity, job creation, or increased domestic capital investment. **A regional center shall have jurisdiction over a limited geographic area, which shall be described in the proposal and consistent with the purpose of concentrating pooled investment in defined economic zones.** The establishment of a regional center may be based on general predictions, contained in the proposal, concerning the kinds of commercial enterprises that will receive capital from aliens, the jobs that will be created directly or indirectly as a result of such capital investments, and the other positive economic effects such capital investments will have.

8 CFR 204.6(m)(3) states, in pertinent part:

> (3) Requirements for regional centers. Each regional center wishing to participate in the Immigrant Investor Pilot Program shall submit a proposal to the Assistant Commissioner for Adjudications, which:
>
> (i) Clearly describes how the regional center **focuses on a geographical region** of the United States, and how it will promote economic growth through increased export sales [if any], improved regional productivity, job creation, and increased domestic capital investment; (emphasis added).

(Emphasis added)

8 CFR 204.6(e) defines a Regional Center as follows:

Regional center

means any **economic unit**, public or private, which is involved with the promotion of economic growth, including increased export sales, improved regional productivity, job creation, and increased domestic capital investment.

(Emphasis added)

As indicated above, the statute provides that "a regional center shall have jurisdiction over a limited geographic area, which shall be described in the proposal and consistent with the purpose of concentrating pooled investment in defined economic zones." The regulation at 8 C.F.R. § 204.6(m)(3) also provides that each regional center must describe "how the regional center focuses on a geographical region of the United States." Further, the regulation at 8 CFR 204.6(e) defines a Regional Center as an economic unit. The geographical limitation of the regional center was also emphasized in *Matter of Izummi*, 22 I&N Dec. 169,174 (Comm'r. 1998). Thus, the evidence to demonstrate that the requirement at 8 CFR 204.6(m)(3)(i) has been met must be based on a single geographic region as defined in the proposal or amendment and must demonstrate also that the proposed geographical area functions as an economic unit.

The evidence of record discusses Sussex County Virginia, which is part of the Richmond Metropolitan Statistical Area ("MSA"), Shelby County Tennessee, part of the Memphis MSA and Tunica County Mississippi, which is also part of the Memphis MSA. It is significant that Shelby County Tennessee is nearly 900 miles from Sussex County Virginia and that the July 2010 analysis did not provide any narrative or documentary evidence to show that the large geographic area between these very distant counties will be the focus of the Regional Center's activities to any degree. Thus, the focus, as shown in the July 2010 analysis, of the Regional Center appears not to be on one geographic area, but on two distinct and unrelated areas; the Memphis MSA and the Richmond MSA.

It is the responsibility of the Regional Center to show that its activities will focus on the requested geographic region, and not simply on isolated and unrelated areas within the region. It appears that the addition of sections of the Commonwealth of Virginia and the entire State of Tennessee is being requested as an expanded geographic scope to the GCFM because the various components of the prospective automotive manufacturing project lend themselves to locations in Sussex County, VA (deep-sea port access, less humidity than MS, and trained technicians, etc.), Shelby County, TN (rail transportation hub, etc.), and Tunica County, MS (transportation, business-friendly environment, etc.) The prospective location of these manufacturing & transportation centers may be desirable from a production and distribution standpoint, but the amendment does not show how the GCFM is going to focus on the entire region as an economic unit, other than to link these locations together so that the geographic area of the Regional Center will be considered contiguous for EB-5 purposes.

For the foregoing reasons, GCFM has not demonstrated that the current and prospective activities of the Regional Center will focus on the proposed geographic area in a manner consistent with the statutory requirement that at a Regional Center have jurisdiction over a limited geographic area with the purpose of concentrating pooled investment in defined economic zones.

The Individual Alien's Investment Funds must be placed "at risk" - Redemption Agreement

Section 610(c) of the Departments of Commerce, Justice and State, the Judiciary, and Related Agencies Appropriations Act of 1993, as amended, allows aliens admitted under the pilot program described in this section to establish reasonable methodologies for determining the number of jobs created by the pilot program, including jobs which are estimated to have been created indirectly through revenues generated from increased exports, improved regional productivity, job creation, or increased domestic capital investment resulting from the pilot program. 8 CFR 204.6(m)(3)(ii) requires that a Regional Center proposal must provide in verifiable detail how jobs will be created indirectly. It is also noted in 8 CFR 204.6(m)(1) in pertinent part that *except as provided herein, aliens seeking to obtain immigration benefits under this paragraph continue to be subject to all conditions and restrictions set forth in section 203(b)(5) of the Act and this section.*

8 C.F.R. 204.6(j)(2) states in part:

> To show that the petitioner has invested or is actively in the process of investing the required amount of capital, the petition must be accompanied by evidence that the petitioner has placed the required amount of capital at risk for the purpose of generating a return on the capital placed at risk.

In Matter of Izummi, 22 I&N Dec. 169 (Assoc. Comm., 1998), the Service found that an alien "may not enter into a redemption agreement with the new commercial enterprise at any time prior to completing all of his cash payments" or "enter into a redemption agreement prior to the end of the two year period of conditional residence."

For an alien's money to be truly at risk, the alien cannot enter into a partnership knowing in advance that s/he already has a willing buyer for his/her shares in the partnership. Nor is the investment at risk if the alien can be assured s/he will receive a certain price for his/her shares in the partnership. An investment assumes that a risk exists. The alien must go into the investment not knowing for sure if s/he will be able to sell that interest at all after obtaining unconditional permanent resident status; and if the alien is successful in selling the interest, the sale price will be determined in an open market. This way, the alien risks both gain and loss.

(b)(4)

In light of the above, it appears that the plan for the return of the immigrant investors' capital involves a de facto redemption agreement.

The Regional Center activities must be consistent with the purpose of concentrating pooled investments.

Section 610(a) of P.L. 102-395 as amended by P.L. 107-273 describes the statutory basis for eligibility as a Regional Center

a) Of the visas otherwise available under section 203(b)(5) of the Immigration and Nationality Act (8 U.S.C. 1153(b)(5)), the Secretary of State, together with the Attorney General, shall set aside visas

> for a pilot program to implement the provisions of such section. Such pilot program shall involve a regional center in the United States, designated by the Secretary of Homeland Security on the basis of a general proposal, for the promotion of economic growth, including increased export sales, improved regional productivity, job creation, and increased domestic capital investment. A regional center shall have jurisdiction over a limited geographic area, which shall be described in the proposal and consistent with the purpose of concentrating pooled investment in defined economic zones. The establishment of a regional center may be based on general predictions, contained in the proposal, concerning the kinds of commercial enterprises that will receive capital from aliens, the jobs that will be created directly or indirectly as a result of such capital investments and the other positive economic effects such capital investments will have...

Thus, section 610(a) of the Pilot Immigration program requires that the regional center proposal be consistent with the purpose of concentrating pooled investments.

As stated in the introduction to the Offering Memorandum, the GTA Automotive Investment Fund I, the (b)(4) enterprise, "will transfer [the [redacted] unit] to WM Green Tech or GTA at the time the Unit is purchased." Further in the same introduction, the Fund describes its initial actions as immediately investing all of the proceeds of the offering in GTA and in turn the fund will receive in behalf of the investor a preferred stock interest in GTA. Thus, the enterprise will be serving as an investment agent for the individual investors not as an enterprise concentrating pooled resources and then investing those pooled resources as a unit into individual companies or projects. This scheme seems to defeat the statutory requirement that the proposal be consistent with the purpose of concentrating pooled investments.

Immigrant Investor Engagement in the Management of the New Commercial Enterprise

8 CFR 204.6(j)(5) states:

> To show that the petitioner is or will be engaged in the management of the new commercial enterprise, either through the exercise of day-to-day managerial control or through policy formulation, as opposed to maintaining a purely passive role in regard to the investment, the petition must be accompanied by:
>
> (i) A statement of the position title that the petitioner has or will have in the new enterprise and a complete description of the position's duties;
>
> (ii) Evidence that the petitioner is a corporate officer or a member of the corporate board of directors; or
>
> (iii) If the new enterprise is a partnership, either limited or general, evidence that the petitioner is engaged in either direct management or policy making activities. For purposes of this section, if the petitioner is a limited partner and the limited partnership agreement provides the petitioner with certain rights, powers, and duties normally granted to limited partners under the Uniform Limited Partnership Act, the petitioner will be considered sufficiently engaged in the management of the new commercial enterprise.

GCFM has structured the new commercial enterprise that will serve as the vehicle for the immigrant investors' capital investment as LLCs. The regulation at 8 CFR 204.6(j)(5) does not specifically address the level of engagement that an immigrant investor must have in the management of the LLCs. However, in

practice, USCIS has recognized that as long at an EB-5 immigrant investor has been granted the normal rights and responsibilities provided for under the jurisdiction of the LLC's organization that this eligibility requirement will be met. The following is noted on page 6 of the sample GTA Automotive Investment Fund 1, LLC Operating Agreement, Article VI (6.3(b)):

> This Section 6.3 supersedes any authority granted to the members pursuant to the Law.

This provision in the sample operating agreement seems to imply that immigrant investors will not be granted the normal rights and responsibilities provided for under the law in the jurisdiction of the LLC's organization, and thus this provision may not be EB-5 compliant. Additionally, the other provisions within the operating agreement do not appear to provide the immigrant investor with rights and responsibilities that are comparable to those referenced in 8 CFR 204.6(j)(5)(iii).

Therefore this amendment is again denied for the reasons cited above. However, because of the complexity of the issues involved, this decision is certified to the AAO in accordance with 8 CFR 103.4.

Managing Investment Risk

When you invest, you take certain risks. With insured bank investments, such as certificates of deposit (CDs), you face inflation risk, which means that you may not earn enough over time to keep pace with the increasing cost of living. With investments that aren't insured, such as stocks, bonds, and mutual funds, you face the risk that you might lose money, which can happen if the price falls and you sell for less than you paid to buy.

Just because you take investment risks doesn't mean you can't exert some control over what happens to the money you invest. In fact, the opposite is true.

If you know the types of risks you might face, make choices about those you are willing to take, and understand how to build and balance your portfolio to offset potential problems, you are managing investment risk to your advantage.

Why Take Risks?

The question you might have at this point is, "Why would I want to risk losing some or all of my money?" In fact, you might not want to put money at risk that you expect to need in the short term—to make the down payment on a home, for example, or pay a tuition bill for next semester, or cover emergency expenses. By taking certain risks with the rest of your money, however, you may earn dividends or interest. In addition, the value of the assets you purchase may increase over the long term.

If you prefer to avoid risk and put your money in an FDIC-insured certificate of deposit (CD) at your bank, the most you can earn is the interest that the bank is paying. This may be good enough in some years, say, when interest rates are high or when other investments are falling. But on average, and over the long haul, stocks and bonds tend to grow more rapidly, which would make it easier or even possible to reach your savings goals. That's because avoiding investment risk entirely provides no protection against inflation, which decreases the value of your savings over time.

On the other hand, if you concentrate on only the riskiest investments, it's entirely possible, even likely, that you will lose money.

For many people, it's best to manage risk by building a diversified portfolio that holds several different types of investments. This approach provides the reasonable expectation that at least some of the investments will increase in value over a period of time. So even if the return on other investments is disappointing, your overall results may be positive.

Types of Investment Risk

There are many different types of investment risk. The two general types of risk are:

- Losing money, which you can identify as investment risk
- Losing buying power, which is inflation risk

It probably comes as no surprise that there are several different ways you might lose money on an investment. To manage these risks, you need to know what they are.

Most investment risk is described as either systematic or nonsystematic. While those terms seem intimidating, what they refer to is actually straightforward.

Systematic Risk

Systematic risk is also known as market risk and relates to factors that affect the overall economy or securities markets. Systematic risk affects all companies, regardless of the company's financial condition, management, or capital structure, and, depending on the investment, can involve international as well as domestic factors. Here are some of the most common systematic risks:

mutual funds, is losing ground to inflation. In addition, you should be aware that money in money market funds usually is not insured. While such funds have rarely resulted in investor losses, the potential is always there.

Other asset classes, including real estate, pose their own risks, while investment products, such as annuities or mutual funds that invest in a specific asset class, tend to share the risks of that class. That means that the risk you face with a stock mutual fund is very much like the risk you face with individual stock, although most mutual funds are diversified, which helps to offset nonsystematic risk.

Step 2: Selecting Risk

The second step is to determine the kinds of risk you are comfortable taking at a particular point in time. Since it's rarely possible to avoid investment risk entirely, the goal of this step is to determine the level of risk that is appropriate for you and your situation. Your decision will be driven in large part by:

- Your age
- Your goals and your timeline for meeting them
- Your financial responsibilities
- Your other financial resources

Age is one of the most important issues in managing investment risk. In general, the younger you are, the more investment risk you can afford to take. The reason is simple: You have more time to make up for any losses you might suffer in the short term.

You can use recent history to illustrate the validity of this point. Suppose two people, one 30 and the other 60, had been similarly invested in October 2007 in portfolios overloaded with stocks. By March 2009, both would almost certainly have lost substantial amounts of money. But while the younger person has perhaps 35 years to recover and accumulate investment assets, the older person may be forced to delay retirement.

On the other hand, having a long time to recover from losses doesn't mean you can ignore the importance of managing risk and choosing investments carefully and selling them when appropriate. The younger you are, the more stock and stock funds—both mutual funds and exchange traded funds—you might consider buying. But stock in a poorly run company, a company with massive debt and noncompetitive products, or a company whose stock is wildly overpriced, probably isn't a good investment from a risk-management perspective, no matter how old you are.

As you get closer to retirement, managing investment risk generally means moving at least some of your assets out of more volatile stock and stock funds into income-producing equities and bonds. Determine what percentage of your assets you want to transfer, and when. That way you won't have more exposure to a potential downturn than you've prepared for. The consensus, though, is to include at least some investments with growth potential (and therefore greater risk to principal) after you retire since you'll need more money if you live longer than expected. Without growth potential, you're vulnerable to inflation.

Keep in mind that your attitude toward investment risk may—and probably should—change over time. If you are the primary source of support for a number of people, you may be willing to take less investment risk than you did when you were responsible for just yourself.

In contrast, the larger your investment base, the more willing you may be to take added risk with a portion of your total portfolio. In a worst-case scenario, you could manage without the money you lost. And if your calculated risk pays off, you may have even more financial security than you had before.

Many people also find that the more clearly they understand how investments work, the more comfortable they feel about taking risk.

Step 3: Evaluating Specific Investments

The third step is evaluating specific investments that you are considering within an asset class. There are tools you can use to evaluate the risk of a particular investment—a process that makes a lot of sense to follow both before you make a new purchase and as part of a regular reassessment of your portfolio. It's important to remember that part of managing investment risk is not only deciding what to buy and when to buy it, but also what

to sell and when to sell it.

For stocks and bonds, the place to start is with information about the issuer, since the value of the investment is directly linked to the strength of the company—or in the case of certain bonds, the government or government agency—behind them.

- **Company Documents**—Each public company must register its securities with the Securities and Exchange Commission (SEC) and provide updated information on a periodic basis. ,The annual report on Form 10-K contains audited financial statements as well as a wealth of detailed information about the company, the people who run it, the risks of investing in the company, and much more. Companies also submit to the SEC three additional quarterly reports called 10-Qs and interim reports on Form 8-K. You can access these company filings using the SEC's EDGAR database. While they aren't always exciting reading, SEC filings can be a treasure trove of information about a company.

  When you're reading a company's financial statements, don't skip over the footnotes. They often contain red flags that can alert you to pending lawsuits, regulatory investigations, or other issues that could have a negative impact on the company's bottom line.

  The company's prospectus, especially the risk factors section, is another reliable tool to help you evaluate the investment risk of a newly issued stock, an individual mutual fund or exchange-traded fund, or a REIT (real estate investment trust). The investment company offering the mutual fund, ETF, or REIT must update its prospectus every year, including an evaluation of the level of risk you are taking by owning that particular investment. You'll also want to look at how the fund, ETF, or REIT has done in the past, especially if it has been around long enough to have weathered a full economic cycle of market ups and downs—which might be as long as 10 years. Keep in mind, however, that past results cannot predict future performance. Also verify that mutual fund managers have not changed. In actively managed funds, it is the managers' picks that determine returns and the level of risk the fund assumes. Past returns would not reflect a new manager's performance.

- **Rating Services**—It's important to check what one or more of the independent rating services has to say about specific corporate and municipal bonds that you may own or may be considering. Each of the rating companies—including A.M. Best Company, Inc.; Dominion Bond Rating Service Ltd. (also known as DBRS Ltd.); Egan-Jones Rating Company; Fitch, Inc.; Japan Credit Rating Agency, Ltd.; LACE Financial Corp.; Moody's Investors Service; Rating and Investment Information, Inc.; Realpoint, LLC (which focuses on commercial mortgage-backed securities); and Standard & Poor's Ratings Services—evaluates the issuing company a little differently, but all of them are focused on the issuer's ability to meet its financial obligations. The higher the letter grade a rating company assigns, the lower the risk you are taking. But remember that ratings aren't perfect and can't tell you whether or not your investment will go up or down in value.

  Also remember that managing investment risk doesn't mean avoiding risk altogether. There might be times when you include a lower-rated bond or bond fund in your portfolio to take advantage of the higher yield it can provide.

  Research companies also rate or rank stocks and mutual funds based on specific sets of criteria. Brokerage firms that sell investments similarly provide their assessments of the probable performance of specific equity investments. Before you rely on ratings to select your investments, learn about the methodologies and criteria the research company uses in its ratings. You might find some research companies' methods more useful than others'.

Take a Broad View

While the past performance of an investment never guarantees what will happen in the future, it is still an important tool. For example, a historical perspective can alert you to the kinds of losses you should be prepared for—an awareness that's essential to managing your risk. A sense of the past can also tell you which asset class or classes have provided the strongest return over time and what their average returns are.

Another way to assess investment risk is to stay tuned to what's happening in the world around you. For example, investment professionals who learn that a company is being investigated by its regulator may decide it's time to

unload any of its securities that their clients own or that they hold in their own accounts. Similarly, political turmoil in a particular area of the world might increase the risk of investing in that region. While you don't want to overreact, you don't want to take more risk than you are comfortable with.

Investing to Minimize Risk

While some investors assume a high level of risk by going for the gold—or looking for winners—most people are interested in minimizing risk while realizing a satisfactory return. If that's your approach, you might consider two basic investment strategies: asset allocation and diversification.

Using Asset Allocation

When you allocate your assets, you decide—usually on a percentage basis—what portion of your total portfolio to invest in different asset classes, usually stock, bonds, and cash or cash equivalents. You can make these investments either directly by purchasing individual securities or indirectly by choosing funds that invest in those securities.

As you build a more extensive portfolio, you may also include other asset classes, such as real estate, which can also help to spread out your investment risk and so moderate it.

Asset allocation is a useful tool in managing systematic risk because different categories of investments respond to changing economic and political conditions in different ways. By including different asset classes in your portfolio, you increase the probability that some of your investments will provide satisfactory returns even if others are flat or losing value. Put another way, you're reducing the risk of major losses that can result from over-emphasizing a single asset class, however resilient you might expect that class to be.

For example, in periods of strong corporate earnings and relative stability, many investors choose to own stock or stock mutual funds. The effect of this demand is to drive stock prices up, increasing their total return, which is the sum of the dividends they pay plus any change in value. If investors find the money to invest in stock by selling some of their bond holdings or by simply not putting any new money into bonds, then bond prices will tend to fall because there is a greater supply of bonds than of investors competing for them. Falling prices reduce the bonds' total return. In contrast, in periods of rising interest rates and economic uncertainty, many investors prefer to own bonds or keep a substantial percentage of their portfolio in cash. That can depress the total return that stock provides while increasing the return from bonds.

While you can recognize historical patterns that seem to indicate a strong period for a particular asset class or classes, the length and intensity of these cyclical patterns are not predictable. That's why it's important to have money in multiple asset classes at all times. You can always adjust your portfolio allocation if economic signs seem to favor one asset class over another.

Financial services companies make adjustments to the asset mix they recommend for portfolios on a regular basis, based on their assessment of the current market environment. For example, a firm might suggest that you increase your cash allocation by a certain percentage and reduce your equity holdings by a similar percentage in a period of rising interest rates and increasing international tension. Companies frequently display their recommended portfolio mix as a pie chart, showing the percentage allocated to each asset class.

Modifying your asset allocation modestly from time to time is not the same thing as market timing, which typically involves making frequent shifts in your portfolio holdings in anticipation of which way the markets will turn. Because no one knows what will happen, this technique rarely produces positive long-term results.

Using Diversification

When you diversify, you divide the money you've allocated to a particular asset class, such as stocks, among various categories of investments that belong to that asset class. These smaller groups are called subclasses. For example, within the stock category you might choose subclasses based on different market capitalizations: some large companies or funds that invest in large companies, some mid-sized companies or funds that invest in them, and some small companies or funds that invest in them. You might also include securities issued by companies that represent different sectors of the economy, such as technology companies, manufacturing companies, pharmaceutical companies, and utility companies.

Similarly, if you're buying bonds, you might choose bonds from different issuers—the federal government, state

and local governments, and corporations—as well as those with different terms and different credit ratings.

Diversification, with its emphasis on variety, allows you to manage nonsystematic risk by tapping into the potential strength of different subclasses, which, like the larger asset classes, tend to do better in some periods than in others. For example, there are times when the performance of small company stock outpaces the performance of larger, more stable companies. And there are times when small company stock falters.

Similarly, there are periods when intermediate-term bonds—U.S. Treasury notes are a good example—provide a stronger return than short- or long-term bonds from the same issuer. Rather than trying to determine which bonds to buy at which time, there are different strategies you can use.

For example, you can buy bonds with different terms, or maturity dates. This approach, called a barbell strategy, involves investing roughly equivalent amounts in short-term and long-term bonds, weighting your portfolio at either end. That way, you can limit risk by having at least a portion of your total bond portfolio in whichever of those two subclasses is providing the stronger return.

Alternatively, you can buy bonds with the same term but different maturity dates. Using this strategy, called laddering, you invest roughly equivalent amounts in a series of fixed-income securities that mature in a rolling pattern, perhaps every two years. Instead of investing $15,000 in one note that will mature in 10 years, you invest $3,000 in a note maturing in two years, another $3,000 in a note maturing in four years, and so on. This approach helps you manage risk in two ways:

- If rates drop just before the first note matures, you'll have to invest only $3,000 at the new lower rate rather than the full $15,000. If rates behave in traditional fashion, they will typically go up again at some point in the ten-year span covered by your ladder.
- If you need money in the short term for either a planned or unplanned expense, you could use the amount of the maturing bond to meet that need without having to sell a larger bond in the secondary market.

How Much Diversification?

In contrast to a limited number of asset classes, the universe of individual investments is huge. Which raises the question: How many different investments should you own to diversify your portfolio broadly enough to manage investment risk? Unfortunately, there is no simple or single answer that is right for everyone. Whether your stock portfolio includes six securities, 20 securities, or more is a decision you have to make in consultation with your investment professional or based on your own research and judgment.

In general, however, the decision will depend on how closely the investments track one another's returns—a concept called correlation. For example, if Stock A always goes up and down the same amount as Stock B, they are said to be perfectly correlated. If Stock A always goes up the same amount that Stock B goes down, they are said to be negatively correlated. In the real world, securities often are positively correlated with one another to varying degrees. The less positively correlated your investments are with one another, the better diversified you are.

Building a diversified portfolio is one of the reasons many investors turn to pooled investments—including mutual funds, exchange traded funds, and the investment portfolios of variable annuities. Pooled investments typically include a larger number and variety of underlying investments than you are likely to assemble on your own, so they help spread out your risk. You do have to make sure, however, that even the pooled investments you own are diversified—for example, owning two mutual funds that invest in the same subclass of stocks won't help you to diversify.

With any investment strategy, it's important that you not only choose an asset allocation and diversify your holdings when you establish your portfolio, but also stay actively attuned to the results of your choices. A critical step in managing investment risk is keeping track of whether or not your investments, both individually and as a group, are meeting reasonable expectations. Be prepared to make adjustments when the situation calls for it.

Measuring Risk

You can't measure risk by putting it on a scale or lining it up against a yardstick. One way to put the risk of a particular investment into context—called the risk premium in the case of stock or the default premium in the case of bonds—is to evaluate its return in relation to the return on a risk-free investment.

Is there actually a risk-free investment? The one that comes closest is the 13-week U.S. Treasury bill, also referred to as the 91-day bill. This investment serves as a benchmark for evaluating the risk of investing in stock for two reasons:

- The shortness of the term, which significantly reduces reinvestment risk.
- The backing of the U.S. government, which virtually eliminates default, or credit risk

The long-term Treasury bond is the risk-free standard for measuring the default risk posed by a corporate bond. While both are vulnerable to inflation and market risk, the Treasury bond is considered free of default risk.

Modern Portfolio Theory

In big-picture terms, managing risk is about the allocation and diversification of holdings in your portfolio. So when you choose new investments, you do it with an eye to what you already own and how the new investment helps you achieve greater balance. For example, you might include some investments that may be volatile because they have the potential to increase dramatically in value, which other investments in your portfolio are unlikely to do.

Whether you're aware of it or not, by approaching risk in this way—rather than always buying the safest investments—you're being influenced by what's called modern portfolio theory, or sometimes simply portfolio theory. While it's standard practice today, the concept of minimizing risk by combining volatile and price-stable investments in a single portfolio was a significant departure from traditional investing practices.

In fact, modern portfolio theory, for which economists Harry Markowitz, William Sharpe, and Merton Miller shared the Nobel Prize in 1990, employs a scientific approach to measuring risk, and by extension, to choosing investments. It involves calculating projected returns of various portfolio combinations to identify those that are likely to provide the best returns at different levels of risk.

Re: Hard Copy of the Response to Request for Evidence
Applicant: Gulf Coast Fund Management, LLC
File: RCW 1031910314
Response Due: November 19, 2011

Dear Sir/Madam:

We submitted our response to Request for Evidence for the above applicant, via Federal Express, which was delivered today, August 30, 2011. Unfortunately, in reviewing the scan version made of the hard copy delivered to you this morning, we discovered incorrect and/or incomplete exhibits/appendices that were provided in the paper submission. Please note that the electronic submission sent to Director Alejandro Mayorkas, earlier today is the complete and correct document, and does not suffer from any of the issues contained in the paper copy.

Enclosed is a complete and corrected copy of the filing. **Please disregard the first response and consider this filing as our submission to the RFE.**

Again, I apologize for the inconvenience and deeply appreciate your assistance with the above request. If you have any questions or need additional information, please call me at (703) 903.7527.

Sincerely,

Greenberg Traurig, LLP

Re: Response to Request for Evidence
Applicant: Gulf Coast Fund Management, LLC
File RCW 1031910314
Response Due: November 19, 2011

Dear Sir/Madam:

This letter constitutes a timely response to your notice dated August 24, 2011, in connection with a request to amend a previously approved regional center that is currently pending review before the Administrative Appeals Office (hereinafter referred to as "AAO") on certification.

Background

The AAO states, "In reaffirming the denial of the amendment request on motion, the director determined (1) that the investors would have reduced management rights; (2) that the purchase of stock undermined the congressional intent to promote pooled investment; (3) that the amendment did not propose investments in a distinct, contiguous geographic region; and (4) that the agreement to convert each membership unit of preferred stock to an estimated price o[redacted] (b)(4) in stock in five years constituted an impermissible redemption agreement. The AAO believes that the record of proceeding fully addresses the first three issues; however, documents that would fully explain the relationship between Gulf Coast Funds Management, LLC, each of the proposed funds, and GreenTech Automotive, Inc. and WM GreenTech Automotive Corp. are absent from the record." Furthermore, the record should note that Gulf Coast Funds Management, LLC ("GCFM") believes that it assisted United States Citizenship and Immigration Service ("USCIS") in clarifying the record in terms of the first two issues in responding to several requests for evidence focusing on individual GCFM I-526s and that issue

number 3 was reviewed internally by USCIS as the regulations are silent on contiguous geographic region investments. Accordingly, this response focuses on resolving the last issue dealing with an alleged impermissible redemption agreement.

Historical Corporate Structure

Since much of the confusion stems from the corporate agreements and structure of entities involved in filings by GCFM, undersigned counsel believes that a brief history of the relationship of Hybrid Kinetic Automotive Corp. ("Hybrid Kinetic"), GreenTech Automotive, Inc. ("GreenTech") a Mississippi corporation, GCFM, a Louisiana Limited Liability Company, Capital Wealth Holdings Limited ("CWH"), a British Virgin Islands entity, and WM GreenTech Automotive Corp. ("WMGTA") a Virginia Corporation, will assist the AAO in evaluating the matter.

Formation Dates

1. CWH was formed in 2006.
2. GCFM was formed on December 10, 2007.
3. Hybrid Kinetic was formed on October 21, 2008.
4. GreenTech was formed on August 14, 2009.
5. WMGTA was formed on October 9, 2009.

Hybrid Kinetic/GreenTech Reorganization and Ownership Change

On August 14, 2009, Hybrid Kinetic and GreenTech entered into a Plan and Agreement of Merger whereby Hybrid Kinetic and GreenTech merged with GreenTech continuing as the surviving company (the "Merger"). A copy of the Plan and Agreement of Merger is attached hereto as Appendix A. Following the Merger, Hybrid Kinetic no longer existed.

Pursuant to further restructuring, on February 16, 2010, CWH acquired 100% of the shares of stock of GreenTech from its existing shareholders. CWH acquired the GreenTech shares from these shareholders by issuing them preferred stock of CWH in exchange for such shares. A copy of the Plan of Share Exchanges is attached hereto as Appendix B.

Thereafter, on March 18, 2010, CWH entered into a share exchange that resulted in WMGTA owning [redacted] of the common stock of GreenTech and CWH owning [redacted] of the common stock of WMGTA. A copy of the Plan of Share Exchange is attached hereto as Appendix C.

GCFM Purchase by CWH (b)(4)

Prior to November 2, 2009, GCFM was owned by Frantzen/Voelker Investments, L.L.C., Tax Credit Capital, LLC, Taylor Beery and Richard C. Conway, Jr. (collectively, the "Prior GCFM Owners") and managed by David Voelker. *See* the Articles of Organization of GCFM attached

hereto as Appendix D. On November 2, 2009, CWH created a wholly owned subsidiary (American Immigration Center, LLC) which purchased [redacted] of the membership interests of GCFM (the "GCFM Purchase") pursuant to the Assignment of Membership Interests attached hereto as Appendix E. Accordingly, following such purchase, CWH became and continues to be the sole member of GCFM.

Formal Responses to Request for Evidence

RFE #1. *An explanation of how the common and preferred stock will be distributed at the end of the investment period and which agreements address each stock transfer stage (from either GreenTech Automotive, Inc. or WM GreenTech Automotive Corp. to GCFM and subsequently from GCGM to the individual investors). Please reference GreenTech Automotive, Inc. and WM GreenTech Automotive Corp. separately and individually rather than interchangeably as "GTA".*

For the record, a conversion is not a redemption and at all times both before and after the conversion, the EB-5 investors remain at risk for the success of the GreenTech project.

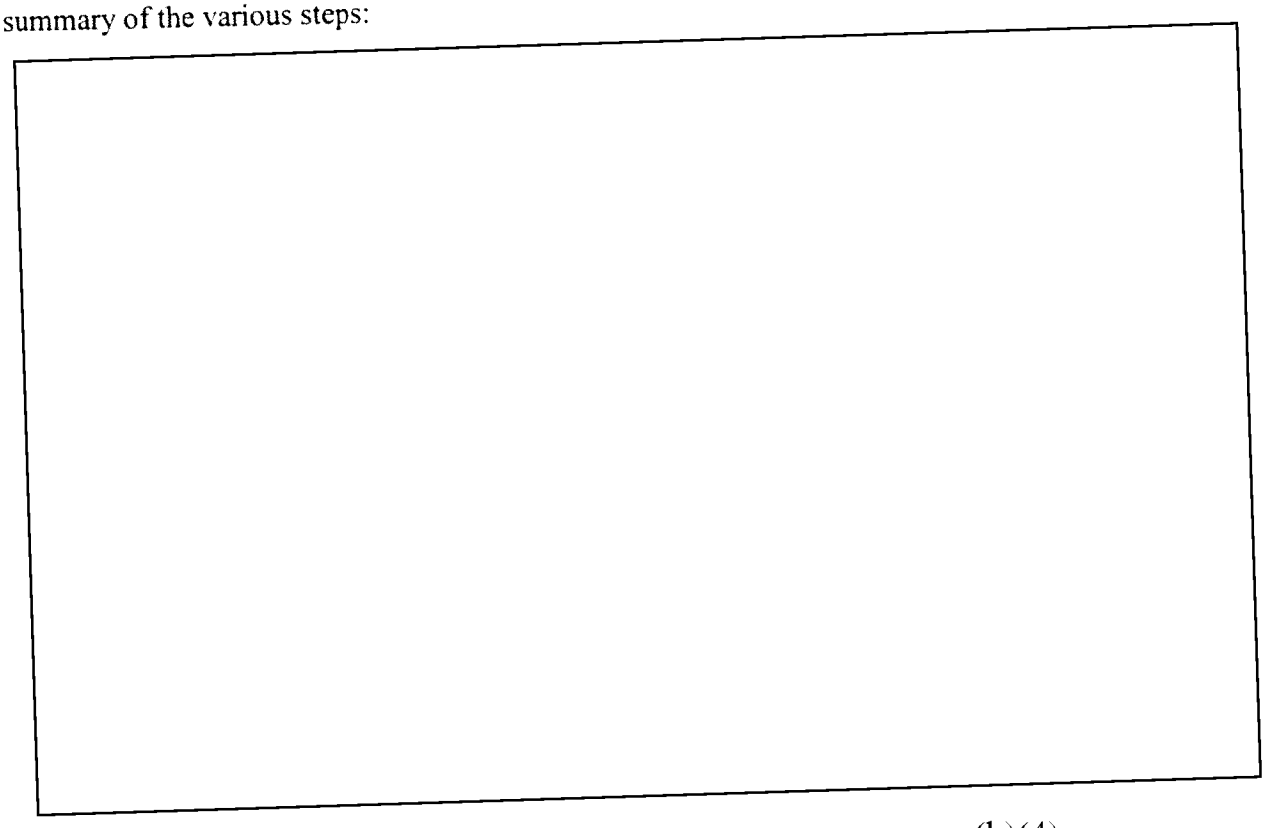
The dispositive factor in distinguishing a "redemption" from a "conversion" is the type of asset received in exchange for the security being surrendered. In a redemption, an investor receives the return of his or her investment capital in cash or a fixed income security such as a promissory note or bond. On the other hand, in a conversion, the investor exchanges his or her convertible security, such as preferred stock, into another type of security, such as common stock, typically at a predetermined price, on or before a predetermined date.

[redacted]

WMGTA are separate entities. Therefore, we have provided the "Historical Corporate Structure" above and the chart attached hereto as Exhibit 3 to assist your understanding of the various entities.

Initial Issuance of the Preferred Stock. Attached as Exhibit 1 is a chart showing the steps involved in the initial issuance of each unit (each a "Unit") of the Gulf Coast Automotive Investment Fund A-1, LLC (the "A-1 Fund") or GTA Fund A-2, LLC (the "A-2 Fund"). Each EB-5 Investor purchased one (1) Unit pursuant to a Subscription Agreement. Pursuant to the Operating Agreement of the A-1 Fund and A-2 Fund which are attached hereto as Appendices F and G, such fund then purchased one (1) share of Preferred Stock from GreenTech. All the shares of Preferred Stock are owned by the A-1 Fund and A-2 Fund, not the EB-5 Investors. GCFM is a separate entity from both the A-1 Fund and A-2 Fund with completely separate owners. GCFM is owned by CWH (as described in the "Historical Corporate Structure" section) and all of the Units of the A-1 Fund and A-2 Fund are owned by the EB-5 Investors. GCFM, as the management entity, has no ownership interest in either the A-1 Fund or A-2 Fund.

Conversion/Distribution of Common Stock at End of Investment Period. Attached as Exhibit 2 is a chart showing the steps involved in the conversion of the Preferred Stock into Common Stock and the ultimate distribution of the Common Stock to the EB-5 Investors. Below is a summary of the various steps:



(b)(4)

(b)(4)

[redacted]

RFE #2. *The articles of organization and operating agreement for Gulf Coast Automotive Investment Fund, LLC referenced in the October 28, 2008 Business Cooperation Agreement between GCFM and Hybrid Kinetic Automotive Corp. (now GreenTech Automotive, Inc.).*

It should first be noted that the only two pooled investment vehicles (collectively, "funds") that have been marketed to EB-5 investors are Gulf Coast Automotive Investment Fund A-1, LLC and GTA Fund A-2, LLC. While initially contemplated, no other funds have been marketed to investors, including and without limitation, GTA Automotive Investment Fund, LLC and GTA Automotive Investment Fund 1, LLC.

[redacted]

(b)(4)

Agreement, as amended by the Addendum, GCFM's only compensation from GreenTech is to receive the Annual Fee.[1]

RFE #3. *Articles of Organization for Gulf Coast Automotive Investment Fund A-1, LLC.*

The above referenced document is attached hereto as Appendix F.

RFE #4. *Any and all agreements between GCFM and WM GreenTech Automotive Corp. and Capital Wealth Holdings, Ltd., as well as any documentation, such as articles of organization, referenced therein. If no such agreements exist, please attest to the absence of such documentation and explain how the rights between these companies are derived.*

(b)(4)

[redacted]

[1] Without the Addendum, after CWH's acquisition of GCFM, GreenTech would have been issuing stock in itself to its majority stockholder (essentially CWH would be paying itself from its own funds) which would have had no benefit but would have resulted in a tax liability.

RFE #5. *Any and all agreements between GCFM and GreenTech Automotive, Inc., including any documentation, such as articles of organization, referenced therein. Please also submit any agreements as to the dollar amount that triggers GCFM's stock option and GreenTech Automotive's obligation should it fail to raise that dollar amount. If no such agreements exist, please attest to the absence of such documentation and explain how these issues have been resolved in the absence of such an agreement.*

(b)(4)

[2] The Annual Fee and Option compensation were designed to provide compensation similar to what other consultants receive when they perform similar services for an issuer of securities. Such consultants are often times compensated with (1) an up-front fee roughly equal to certain of its projected costs (the "Up-front Fee"), and (2) a success fee for achieving certain milestones (a " Success Fee"). In structuring the Annual Fee and the Option, GCFM and GreenTech intended (i) the Annual Fee to provide for a reimbursement of its projected costs similar to an Up-Front Fee, and (ii) the Option to provide a Success Fee.

RFE #6. *Given that the only document that appears to bind GreenTech Automotive, Inc. to provide common stock to any entity is the October 28, 2008 Business Cooperation Agreement, which requires it to provide* [redacted] *in publicly traded stock or* [redacted] *cash, please explain and document how and when GreenTech Automotive, Inc. or WM GreenTech Automotive Corp. or GCFM are obligated to transfer the stock to the alien investors. P lease provide a copy of the agreements that document the conditions under which GreenTech Automotive, Inc., WM GreenTech Automotive Corp. and GCFM have agreed to transfer the stock in GreenTech Automotive Inc. or WM GreenTech Automotive Corp.*

[redacted]

(b)(4)

[redacted]

We trust that this information is sufficient to assist you in determining that the agreement to convert each membership unit of preferred stock to an estimated price of [redacted] in stock in five years constituted does not constitute and impermissible redemption agreement. If you have any questions or need additional information, please call me at (703) 903.7527.

Sincerely,

Greenberg Traurig, LLP

Re: Hard Copy of the Response to Request for Evidence
Applicant: Gulf Coast Fund Management, LLC
File: RCW 1031910314
Response Due: November 19, 2011

Dear Sir/Madam:

We submitted our response to Request for Evidence for the above applicant, via Federal Express, which was delivered today, August 30, 2011. Unfortunately, in reviewing the scan version made of the hard copy delivered to you this morning, we discovered incorrect and/or incomplete exhibits/appendices that were provided in the paper submission. Please note that the electronic submission sent to Director Alejandro Mayorkas, earlier today is the complete and correct document, and does not suffer from any of the issues contained in the paper copy.

Enclosed is a complete and corrected copy of the filing. **Please disregard the first response and consider this filing as our submission to the RFE.**

Again, I apologize for the inconvenience and deeply appreciate your assistance with the above request. If you have any questions or need additional information, please call me at (703) 903.7527.

Sincerely,

Greenberg Traurig, LLP

Re: Response to Request for Evidence
Applicant: Gulf Coast Fund Management, LLC
File RCW 1031910314
Response Due: November 19, 2011

Dear Sir/Madam:

This letter constitutes a timely response to your notice dated August 24, 2011, in connection with a request to amend a previously approved regional center that is currently pending review before the Administrative Appeals Office (hereinafter referred to as "AAO") on certification.

Background

The AAO states, "In reaffirming the denial of the amendment request on motion, the director determined (1) that the investors would have reduced management rights; (2) that the purchase of stock undermined the congressional intent to promote pooled investment; (3) that the amendment did not propose investments in a distinct, contiguous geographic region; and (4) that the agreement to convert each membership unit of preferred stock to an estimated price of $550,000 in stock in five years constituted an impermissible redemption agreement. The AAO believes that the record of proceeding fully addresses the first three issues; however, documents that would fully explain the relationship between Gulf Coast Funds Management, LLC, each of the proposed funds, and GreenTech Automotive, Inc. and WM GreenTech Automotive Corp. are absent from the record." Furthermore, the record should note that Gulf Coast Funds Management, LLC ("GCFM") believes that it assisted United States Citizenship and Immigration Service ("USCIS") in clarifying the record in terms of the first two issues in responding to several requests for evidence focusing on individual GCFM I-526s and that issue

number 3 was reviewed internally by USCIS as the regulations are silent on contiguous geographic region investments. Accordingly, this response focuses on resolving the last issue dealing with an alleged impermissible redemption agreement.

Historical Corporate Structure

Since much of the confusion stems from the corporate agreements and structure of entities involved in filings by GCFM, undersigned counsel believes that a brief history of the relationship of Hybrid Kinetic Automotive Corp. ("Hybrid Kinetic"), GreenTech Automotive, Inc. ("GreenTech") a Mississippi corporation, GCFM, a Louisiana Limited Liability Company, Capital Wealth Holdings Limited ("CWH"), a British Virgin Islands entity, and WM GreenTech Automotive Corp. ("WMGTA") a Virginia Corporation, will assist the AAO in evaluating the matter.

Formation Dates

1. CWH was formed in 2006.
2. GCFM was formed on December 10, 2007.
3. Hybrid Kinetic was formed on October 21, 2008.
4. GreenTech was formed on August 14, 2009.
5. WMGTA was formed on October 9, 2009.

Hybrid Kinetic/GreenTech Reorganization and Ownership Change

On August 14, 2009, Hybrid Kinetic and GreenTech entered into a Plan and Agreement of Merger whereby Hybrid Kinetic and GreenTech merged with GreenTech continuing as the surviving company (the "Merger"). A copy of the Plan and Agreement of Merger is attached hereto as Appendix A. Following the Merger, Hybrid Kinetic no longer existed.

Pursuant to further restructuring, on February 16, 2010, CWH acquired 100% of the shares of stock of GreenTech from its existing shareholders. CWH acquired the GreenTech shares from these shareholders by issuing them preferred stock of CWH in exchange for such shares. A copy of the Plan of Share Exchanges is attached hereto as Appendix B.

Thereafter, on March 18, 2010, CWH entered into a share exchange that resulted in WMGTA owning 100% of the common stock of GreenTech and CWH owning 75% of the common stock of WMGTA. A copy of the Plan of Share Exchange is attached hereto as Appendix C.

GCFM Purchase by CWH

Prior to November 2, 2009, GCFM was owned by Frantzen/Voelker Investments, L.L.C., Tax Credit Capital, LLC, Taylor Beery and Richard C. Conway, Jr. (collectively, the "Prior GCFM Owners") and managed by David Voelker. *See* the Articles of Organization of GCFM attached

hereto as Appendix D. On November 2, 2009, CWH created a wholly owned subsidiary (American Immigration Center, LLC) which purchased 100% of the membership interests of GCFM (the "GCFM Purchase") pursuant to the Assignment of Membership Interests attached hereto as Appendix E. Accordingly, following such purchase, CWH became and continues to be the sole member of GCFM.

Formal Responses to Request for Evidence

RFE #1. *An explanation of how the common and preferred stock will be distributed at the end of the investment period and which agreements address each stock transfer stage (from either GreenTech Automotive, Inc. or WM GreenTech Automotive Corp. to GCFM and subsequently from GCGM to the individual investors). Please reference GreenTech Automotive, Inc. and WM GreenTech Automotive Corp. separately and individually rather than interchangeably as "GTA".*

For the record, a conversion is not a redemption and at all times both before and after the conversion, the EB-5 investors remain at risk for the success of the GreenTech project.

The dispositive factor in distinguishing a "redemption" from a "conversion" is the type of asset received in exchange for the security being surrendered. In a redemption, an investor receives the return of his or her investment capital in cash or a fixed income security such as a promissory note or bond. On the other hand, in a conversion, the investor exchanges his or her convertible security, such as preferred stock, into another type of security, such as common stock, typically at a predetermined price, on or before a predetermined date.

(b)(4)

(b)(4)

(b)(4)

RFE #2. *The articles of organization and operating agreement for Gulf Coast Automotive Investment Fund, LLC referenced in the October 28, 2008 Business Cooperation Agreement between GCFM and Hybrid Kinetic Automotive Corp. (now GreenTech Automotive, Inc.).*

It should first be noted that the only two pooled investment vehicles (collectively, "funds") that have been marketed to EB-5 investors are Gulf Coast Automotive Investment Fund A-1, LLC and GTA Fund A-2, LLC. While initially contemplated, no other funds have been marketed to investors, including and without limitation, GTA Automotive Investment Fund, LLC and GTA Automotive Investment Fund I, LLC.

(b)(4)

Re: Response to Request for Evidence
Applicant: Gulf Coast Fund Management, LLC
File RCW 1031910314
Response Due: November 19, 2011

Dear Sir/Madam:

This letter constitutes a timely response to your notice dated August 24, 2011, in connection with a request to amend a previously approved regional center that is currently pending review before the Administrative Appeals Office (hereinafter referred to as "AAO") on certification.

Background

The AAO states, "In reaffirming the denial of the amendment request on motion, the director determined (1) that the investors would have reduced management rights; (2) that the purchase of stock undermined the congressional intent to promote pooled investment; (3) that the amendment did not propose investments in a distinct, contiguous geographic region; and (4) that the agreement to convert each membership unit of preferred stock to an estimated price of $550,000 in stock in five years constituted an impermissible redemption agreement. The AAO believes that the record of proceeding fully addresses the first three issues; however, documents that would fully explain the relationship between Gulf Coast Funds Management, LLC, each of the proposed funds, and GreenTech Automotive, Inc. and WM GreenTech Automotive Corp. are absent from the record." Furthermore, the record should note that Gulf Coast Funds Management, LLC ("GCFM") believes that it assisted United States Citizenship and Immigration Service ("USCIS") in clarifying the record in terms of the first two issues in responding to several requests for evidence focusing on individual GCFM I-526s and that issue

ATLANTA • AUSTIN • BOSTON • CHICAGO • DALLAS • DELAWARE • DENVER • FORT LAUDERDALE • HOUSTON • LAS VEGAS • LONDON* • LOS ANGELES • MIAMI • NEW JERSEY • NEW YORK • ORANGE COUNTY • PHILADELPHIA • PHOENIX • SACRAMENTO • SILICON VALLEY • TALLAHASSEE • TAMPA • TYSONS CORNER • WASHINGTON, D.C. • WEST PALM BEACH • WHITE PLAINS

number 3 was reviewed internally by USCIS as the regulations are silent on contiguous geographic region investments. Accordingly, this response focuses on resolving the last issue dealing with an alleged impermissible redemption agreement.

Historical Corporate Structure

Since much of the confusion stems from the corporate agreements and structure of entities involved in filings by GCFM, undersigned counsel believes that a brief history of the relationship of Hybrid Kinetic Automotive Corp. ("Hybrid Kinetic"), GreenTech Automotive, Inc. ("GreenTech") a Mississippi corporation, GCFM, a Louisiana Limited Liability Company, Capital Wealth Holdings Limited ("CWH"), a British Virgin Islands entity, and WM GreenTech Automotive Corp. ("WMGTA") a Virginia Corporation, will assist the AAO in evaluating the matter.

Formation Dates

1. CWH was formed in 2006.
2. GCFM was formed on December 10, 2007.
3. Hybrid Kinetic was formed on October 21, 2008.
4. GreenTech was formed on August 14, 2009.
5. WMGTA was formed on October 9, 2009.

Hybrid Kinetic/GreenTech Reorganization and Ownership Change

On August 14, 2009, Hybrid Kinetic and GreenTech entered into a Plan and Agreement of Merger whereby Hybrid Kinetic and GreenTech merged with GreenTech continuing as the surviving company (the "Merger"). A copy of the Plan and Agreement of Merger is attached hereto as Appendix A. Following the Merger, Hybrid Kinetic no longer existed.

Pursuant to further restructuring, on February 16, 2010, CWH acquired 100% of the shares of stock of GreenTech from its existing shareholders. CWH acquired the GreenTech shares from these shareholders by issuing them preferred stock of CWH in exchange for such shares. A copy of the Plan of Share Exchanges is attached hereto as Appendix B.

Thereafter, on March 18, 2010, CWH entered into a share exchange that resulted in WMGTA owning 100% of the common stock of GreenTech and CWH owning 75% of the common stock of WMGTA. A copy of the Plan of Share Exchange is attached hereto as Appendix C.

GCFM Purchase by CWH

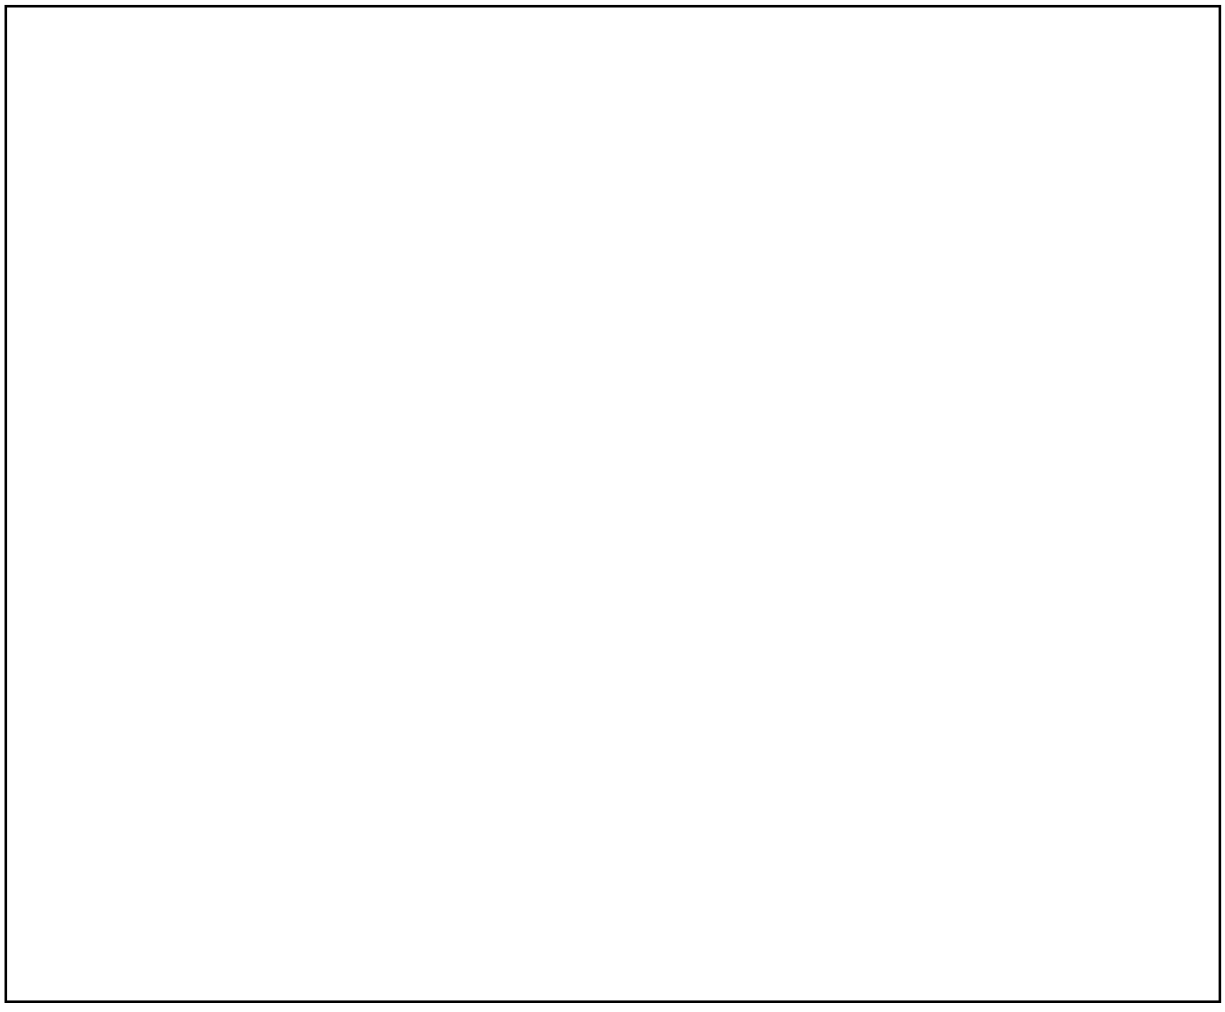
Prior to November 2, 2009, GCFM was owned by Frantzen/Voelker Investments, L.L.C., Tax Credit Capital, LLC, Taylor Beery and Richard C. Conway, Jr. (collectively, the "Prior GCFM Owners") and managed by David Voelker. *See* the Articles of Organization of GCFM attached

hereto as Appendix D. On November 2, 2009, CWH created a wholly owned subsidiary (American Immigration Center, LLC) which purchased 100% of the membership interests of GCFM (the "GCFM Purchase") pursuant to the Assignment of Membership Interests attached hereto as Appendix E. Accordingly, following such purchase, CWH became and continues to be the sole member of GCFM.

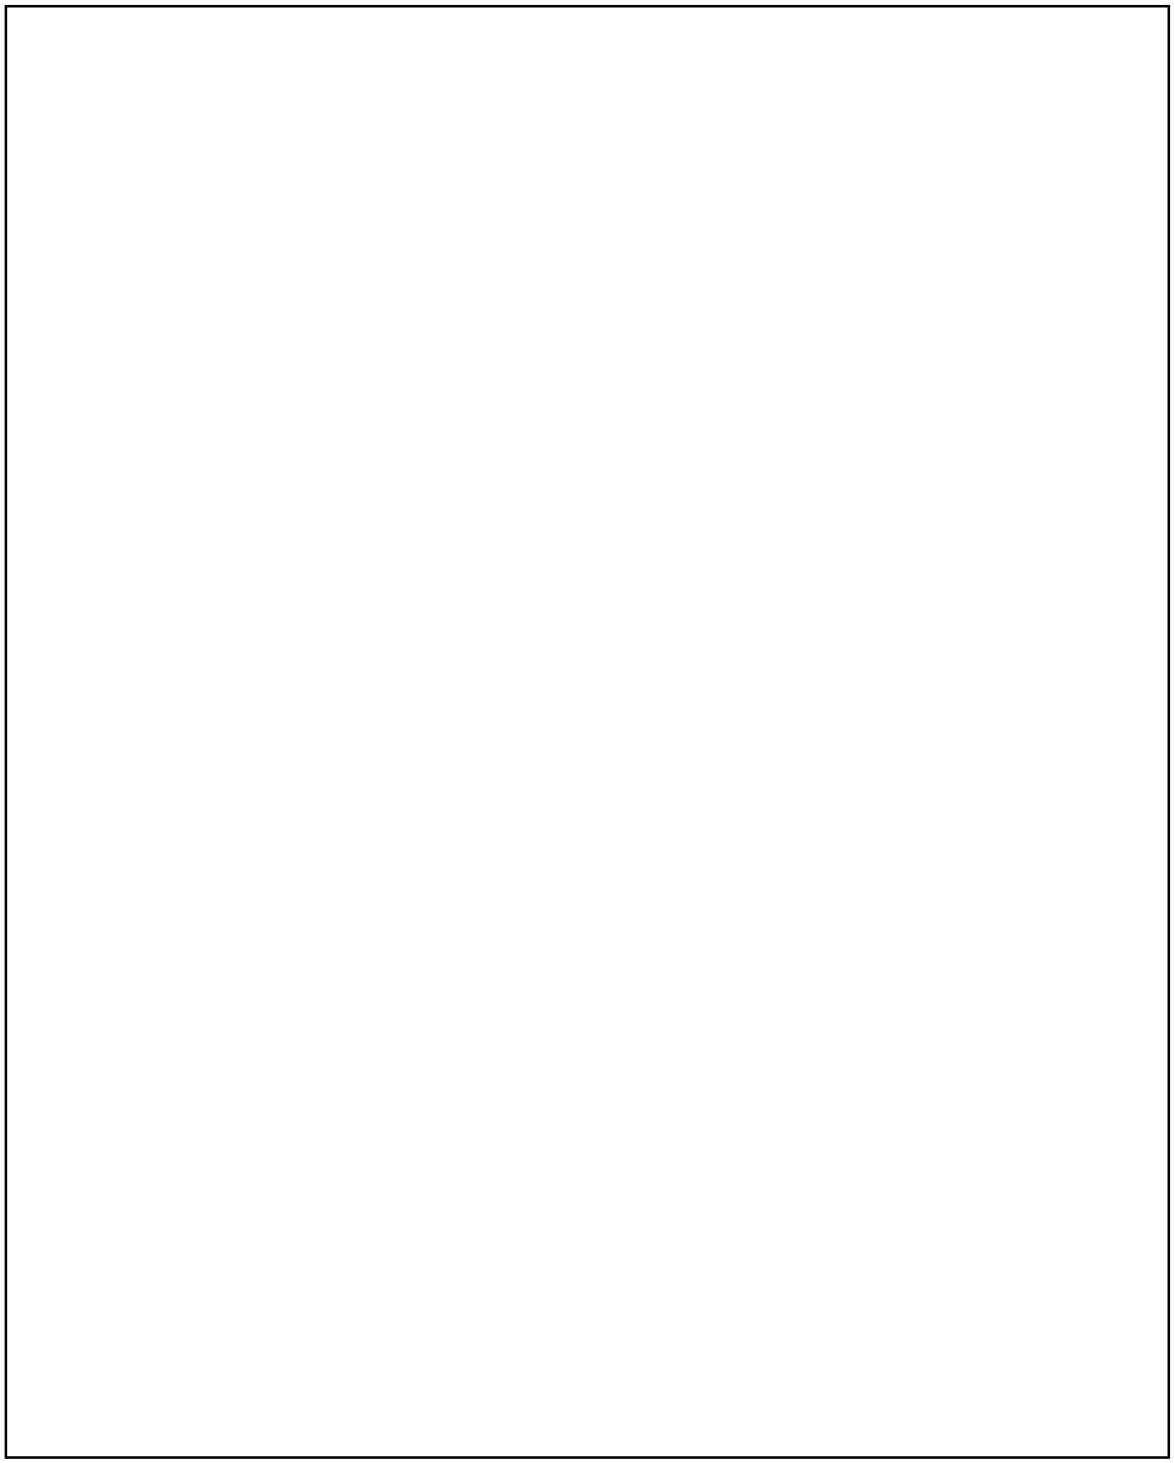
Formal Responses to Request for Evidence

RFE #1. *An explanation of how the common and preferred stock will be distributed at the end of the investment period and which agreements address each stock transfer stage (from either GreenTech Automotive, Inc. or WM GreenTech Automotive Corp. to GCFM and subsequently from GCGM to the individual investors). Please reference GreenTech Automotive, Inc. and WM GreenTech Automotive Corp. separately and individually rather than interchangeably as "GTA".*

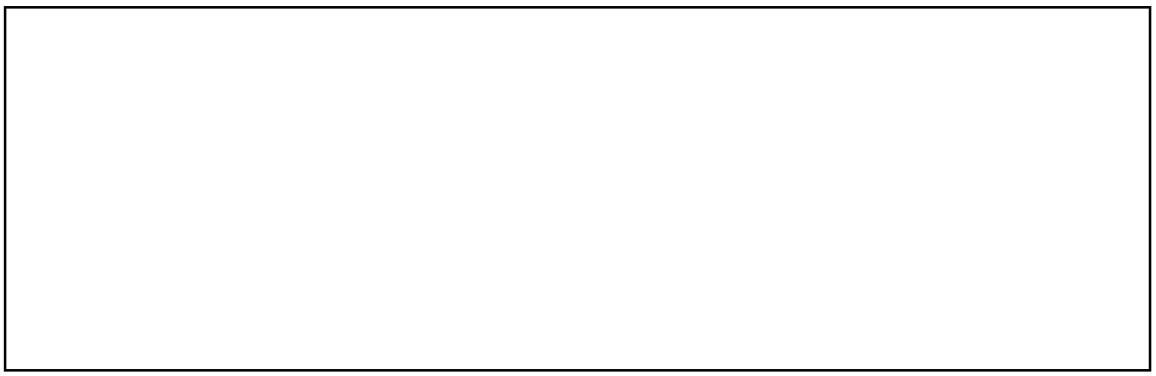
(b)(4)



(b)(4)



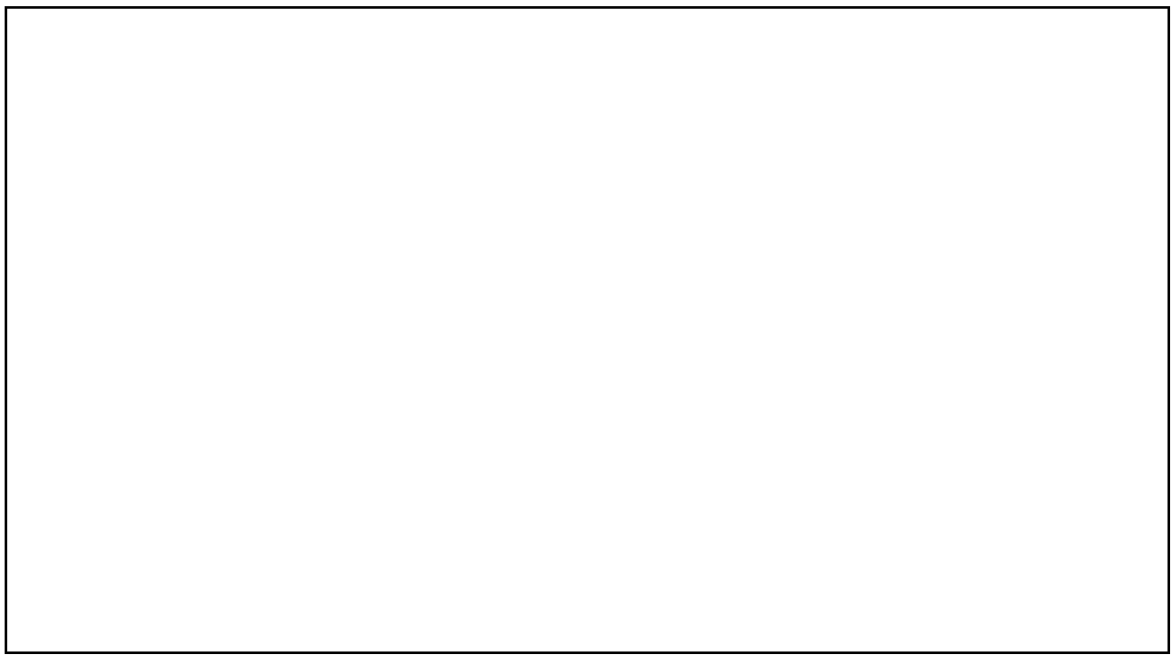
(b)(4)



RFE #2. *The articles of organization and operating agreement for Gulf Coast Automotive Investment Fund, LLC referenced in the October 28, 2008 Business Cooperation Agreement between GCFM and Hybrid Kinetic Automotive Corp. (now GreenTech Automotive, Inc.).*

It should first be noted that the only two pooled investment vehicles (collectively, "funds") that have been marketed to EB-5 investors are Gulf Coast Automotive Investment Fund A-1, LLC and GTA Fund A-2, LLC. While initially contemplated, no other funds have been marketed to investors, including and without limitation, GTA Automotive Investment Fund, LLC and GTA Automotive Investment Fund 1, LLC.

(b)(4)



(b)(4) [redacted]

RFE #3. *Articles of Organization for Gulf Coast Automotive Investment Fund A-1, LLC.*

The above referenced document is attached hereto as Appendix F.

RFE #4. *Any and all agreements between GCFM and WM GreenTech Automotive Corp. and Capital Wealth Holdings, Ltd., as well as any documentation, such as articles of organization, referenced therein. If no such agreements exist, please attest to the absence of such documentation and explain how the rights between these companies are derived.*

(b)(4) [redacted]

[1] Without the Addendum, after CWH's acquisition of GCFM, GreenTech would have been issuing stock in itself to its majority stockholder (essentially CWH would be paying itself from its own funds) which would have had no benefit but would have resulted in a tax liability.

(b)(4)

RFE #5. *Any and all agreements between GCFM and GreenTech Automotive, Inc., including any documentation, such as articles of organization, referenced therein. Please also submit any agreements as to the dollar amount that triggers GCFM's stock option and GreenTech Automotive's obligation should it fail to raise that dollar amount. If no such agreements exist, please attest to the absence of such documentation and explain how these issues have been resolved in the absence of such an agreement.*

(b)(4)

RFE #6. *Given that the only document that appears to bind GreenTech Automotive, Inc. to provide common stock to any entity is the October 28, 2008 Business Cooperation Agreement, which requires it to provide* [redacted] *in publicly traded stock or* [redacted] *cash, please explain and document how and when GreenTech Automotive, Inc. or WM GreenTech Automotive Corp. or GCFM are obligated to transfer the stock to the alien investors. P lease provide a copy of the agreements that document the conditions under which GreenTech Automotive, Inc., WM GreenTech Automotive Corp. and GCFM have agreed to transfer the stock in GreenTech Automotive Inc. or WM GreenTech Automotive Corp.*

(b)(4)
