Eligibility Attestations

Minor eligibility attestation

As a prospective parolee, DHS wants to ensure you are aware of the program eligibility requirements for children under the age of 18.

Children who are under the age of 18 may only be eligible for parole if they are traveling to the United States with and in the care and custody of their parent or legal guardian. Parents or legal guardians traveling with a minor child should be prepared to provide documentation of their relationship to the child upon arrival to the United States. If this proof is not available, for the protection and welfare of the child, U.S. law may require that the child be placed in the custody of the Department of Health and Human Services (HHS). Generally, evidence of legal guardianship requires that a legal or administrative process involving the courts or other recognized government entity take place (i.e., a power of attorney or written and/or notarized statement is not a formally recognized arrangement).

Please complete the below attestation to certify your understanding of the family relationship requirement for children requesting parole.

- I understand that only minors (under the age of 18) traveling with and in the care and custody of a parent or legal guardian are eligible for parole.
- If I travel with a child of whom I am the parent or legal guardian, I am able to provide documentation as evidence of my parental relationship or legal guardianship of the child. Evidence may include a birth certificate for the child, and identity documents for the parent or legal guardian. Generally, evidence of legal guardianship requires that a legal or administrative process involving the courts or other recognized government entity take place (i.e., a power of attorney or written and/or notarized statement is not a formally recognized arrangement).
- If I travel with a child of whom I am not the parent or legal guardian, then it is possible that upon arrival at the United States Port of Entry, the child will be referred to the Department of Health and Human Services as an unaccompanied child.

Eligibility attestation

- I affirm that I am not a permanent resident or dual national of any country other than Venezuela, and I do not currently hold refugee status in any country; or I am the spouse, common-law partner, or unmarried child under the age of 21 of and traveling with an eligible national of Venezuela.

Add Travel Group Member

Please enter the travel group member's information. Each travel group member must be a beneficiary of a confirmed Form I-134. You can find your travel group member's A-number and receipt number on their Form I-134 Confirmation Notice or Account Notice. You cannot add yourself as a travel group member.

You may only add a travel group member if the individual is either a Venezuelan citizen or your immediate family member of any nationality. Immediate family members eligible for parole are:

- Spouses or common-law partners of Venezuelan citizens; and
- Unmarried children under age 21 of Venezuelan citizens.

Once you add a travel group member, you must complete all required attestations on their behalf. If you no longer want to include the travel group member in your submission, you can remove them before you submit to CBP.

Complete las Certificaciones de Vacunas Después de Su Llegada

- Una vez que los beneficiarios llegan a Estados Unidos y se les concede el permiso de permanencia temporal deben completar una certificación de tuberculosis en la cuenta.
- El beneficiario principal debe hacer esto por sí mismo y por los miembros del grupo de viaje, si corresponde.

Vaccine Attestation

Post Arrival Attestation

Attestation is required within 90 days after U.S. arrival.

Tuberculosis screening (Select one):

- My test result is negative. I have undergone tuberculosis screening starting with an IGRA (interferon-gamma release assay) blood test, and my result is negative. I have and will retain my IGRA test result documentation.
- My test result is indeterminate. I have undergone tuberculosis screening starting with an IGRA (interferon-gamma release assay) blood test and my results are indeterminate. An indeterminate IGRA result means additional testing is needed because I may have a tuberculosis infection which has not yet resulted in a positive IGRA test. I will follow up with a state or local public health office or doctor's office and will complete any additional recommended testing to include further IGRA blood testing, chest x-ray, or other testing and treatment. I have and will retain my IGRA test result documentation.
- My test result is positive. I have undergone tuberculosis screening starting with an IGRA (interferon-gamma release assay) blood test and this screening was positive for tuberculosis. I understand that prior Bacillus Calmette-Guerin (BCG) vaccination does not cause a positive IGRA result, thus a positive IGRA test must be taken seriously. I will receive a chest x-ray, and if abnormal, or other signs or symptoms of active tuberculosis disease are present, I will comply with isolation and treatment measures as determined by a state or local public health office or doctor's office. I have and will retain my IGRA test result documentation as well as documentation that I followed up for additional testing and treatment.
- I have not undergone tuberculosis screening but qualify for an exception to this requirement because I am younger than 2 years old.

Polio and COVID-19 vaccinations (Select if applicable):

- I did not receive a polio vaccine prior to arriving in the United States because it was not approved or licensed for my age group but have now been vaccinated against polio.
- I did not receive a COVID-19 vaccination prior to arrival in the United States because it was not approved or licensed for my age group or was only partially vaccinated prior to arriving in the United States. I have completed or will complete my COVID-19 primary series to become fully vaccinated within 90 days of arrival or within 90 days of reaching the eligible age for vaccination according to the current guidelines: <https://www.cdc.gov/vaccines/covid-19/clinical-considerations/interim-considerations-us.html>
